Congressional Record

PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, SECOND SESSION

SENATE—*Wednesday, October 15, 1986*

(Legislative day of Tuesday, October 14, 1986)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge Him, and He shall direct thy paths.—Proverbs 3:5-6.

Almighty God, eternal Father, perfect in all virtue whose truth lights our way—we know that ultimate issues are in Your hands—that all authority comes from You. We pray for Your special guidance in these swift yet strangely slow-moving hours. We know the nearer we get to November 4, the greater the pressure and inward struggle, and the greater the possibility for partisanship. We accept this as a reality in our political process, Gracious God, but we ask You to prevent urgent and important issues from being subordinate to political considerations alone. Strengthen Your servants—give them courage to take risks when necessary for the sake of the common good. Help them to entrust themselves to You with confidence in Your oversight and ample provision. In the name of the Prince of Peace, we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able and distinguished majority leader, Senator ROBERT DOLE of Kansas, is now recognized.

Mr. DOLE. I thank the distinguished Presiding Officer, the President pro tempore, Senator THURMOND from South Carolina.

SCHEDULE

Mr. DOLE. Under the standing order, the leaders have 10 minutes each, followed by routine morning business not to extend beyond 11 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

At 11 o'clock, unless we have some agreement to change it, under the provision of rule XXII, a live quorum will begin, to be followed by a cloture vote on the drug bill. If cloture is invoked, it will be the intention of the majority leader to continue consideration of the drug bill.

Regardless of the outcome of the cloture vote, it will be the intention of the majority leader to turn to the consideration of a number of items. I do believe now we are finally seeing a little daylight. It is my understanding the House will consider the continuing resolution early this evening, somewhere around 6 o'clock. Since the Government will shut down tomorrow, unless we complete action, it would be my intention to stay in late tonight and try to finish the continuing resolution, and it could be rather late, say, 10, 11, midnight, or after.

The reconciliation conference report is hung up on provisions affecting the Finance Committee and the House Ways and Means Committee. Everything else, as I understand it, is settled.

On the debt limit, I have met with the distinguished chairman of the Ways and Means Committee, Chairman ROSTENKOWSKI, just this morning. We think we have made some progress on that.

On the drug bill, it is still my hope that we can resolve the one big issue, the death penalty. I know there were discussions going on yesterday. It was my understanding that I was to have met with Senator BIDEN yesterday, but I do not believe Senator BIDEN was available yesterday. In any event, the Senator from Delaware requested to delay the filing of cloture, so we would have cloture voted today, to give us yesterday to negotiate. I still hope that if there is some way to resolve the major problem, it can be done so that we can continue our bipartisan efforts to have a drug bill passed and signed by the President this year.

That would leave the immigration conference report. I am not certain when the House is going to take that up—I think sometime tomorrow morning.

I believe we may be in a position to take care of all the nominations on the Executive Calendar. Yesterday, I submitted a unanimous-consent request. I did not propound that request, but I now believe, with the Malone nomination withdrawn in effect, we may be able to get an agreement on all the other names on the Executive Calendar, including Helen Marie Taylor, Edwin Corr, Eleanor Constable, plus a number of others on the Executive Calendar. I will submit this request to the distinguished minority leader and, if we can clear it, that is something we can do during the day if we have some free time.

So I alert my colleagues this could be one of those stop-and-go days, with no certainty when we might complete our work. On the other hand, we have reached the point where the present continuing resolution will expire at midnight. If the House completes action on the CR and sends it to us this evening, of course we will be around to act on it.

SENATOR TOM EAGLETON

Mr. DOLE. Mr. President, I have taken the opportunity to make comments about a number of our colleagues who are retiring, and today I would like to speak a moment about a friend and a neighbor, TOM EAGLETON.

TOM EAGLETON is a legislator's legislator. During his three terms in the Senate, he has established a reputation as a man you can talk to and a man you can work with, and that is what legislating and making policy is all about.

TOM has dozens of friends, on both sides of the aisle, and they are his friends because they admire him and respect him. A man of strong feelings

and deep commitments, he has always shown the flexibility and the willingness to change but he has fought hard and often successfully—and more often than not, I might add—for the causes in which he believes.

As a result, TOM has accumulated some very significant legislative accomplishments: He was a key architect in the war powers resolution; a prime mover in establishing the National Institute for the Aging, as well as many programs under the Older Americans Act. TOM was also instrumental in requiring health warning labels on cigarette packages.

Whatever the issue, TOM EAGLETON has always been sensitive to the needs and interests of the average citizen.

I know the people of Missouri were disappointed when TOM announced he would not seek reelection. He has served them in one capacity or another for 30 years, since being first elected to public office at the age of 27 as a circuit attorney in St. Louis. But he will leave behind a record of achievement in the Senate, and legions of friends in the Senate and throughout the Capitol, and he can therefore be justly proud, as I know his Missouri constituents are, of his efforts.

Again, I indicate that he is a close friend and a valued friend, and we will continue to work with him long after his has left the U.S. Senate.

SIX RETIRING SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent to include in the RECORD an article which appeared in USA Today today, comments about who the retiring Senators are. I think it is of some interest.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From USA Today, Oct. 15, 1986]

WHO'S RETIRING IN THE SENATE

SENATOR RUSSELLL LONG, 67

Background: Louisiana Democrat elected in 1948. Longtime chairman of tax-writng Senate Finance Committee until GOP took control of the Senate.

Top Achievement: "Employee stock ownership. There are about 16 provisions in the (1973) law I passed to make it more attractive for more companies to make shareholders out of their employees. What is important is that they should have a piece of the action and a share of the prosperity in the firm."

Biggest disappointment: "I am sorry I didn't start it (employee stock ownership) sooner."

Plans: "I don't know if I will be running for office again (he's viewed as a potential gubernatorial candidate in Louisiana), practicing law or serving on a corporate board or two."

Advice for successor: "Tell the truth to these senators because they will come to know you for what you are. If you do make (a commitment), keep it."

SENATOR BARRY GOLDWATER, 77

Background: Arizona Republican elected 1952 and 1968. Chairman, Senate Armed Services Committee. GOP presidential nominee in 1964.

Top Achievement: "The Grand Canyon Enlargement Act and the Defense Reorganization Bill . . . but for me the crowning achievement has been (representing) Arizona."

Biggest disappointment: The way the Senate as a whole has changed. . . . There are as many as 20,000 staff people assisting congressmen in ways that make me wonder who is really running the show. . . . In essence, you have a body that works a three-day week considering a convoluted calendar of bills that few people understand."

Plans: I have four children and 10 grandchildren, and I look forward to spending time with them."

Advice for successor: "You need to be honest with yourself first, then always shoot straight with the people."

SENATOR CHARLES MC C. MATHIAS, 64

Background: Liberal Maryland Republican elected in 1968. Had seniority to become chairman of Judiciary Committee but conservative Republicans blocked his path to the chairmanship in 1977.

Top achievement: "Winning my last election by a larger margin than my first." (In his first election, he won with 48 percent of the vote; in his last election, he got 66 percent of the vote.)

Biggest disappointment: "The loss in momentum in the civil rights efforts." (He cited a moribund Civil Rights Commission and the loss of interest in affirmative action.) On the lighter side: "Not getting Maryland crab cakes on the menu of the Senate Dining Room."

Plans: "Practice law, lecture at Johns Hopkins and pull long-overdue weeds at my farm," 30 miles from Frederick, Md.

Advice to Successor: "Don't let your desire to get re-elected get in the way of your judgment."

SENATOR THOMAS EAGLETON, 57

Background: Missouri Democrat elected in 1968. Foreign Relations Committee member Vice presidential candidate (withdrew) in 1972).

Top achievement: "The 1973 amendment to the appropriations bill that prohibited any further expenditures for bombing in Cambodia" that he sponsored.

Biggest disappointment: "Eagleton has seen "billions and billions of dollars poured into innumerable education programs while the quality of education in this country has not increased, but declined."

Plans: "University professor at Washington University in St. Louis, also practice law there."

Advice to Successor: "Get on the Finance Committee; it is becoming the pre-eminent committee in Congress. It's the center of so much activity. Issues of trade, health, the environment, taxes and Social Security are settled there."

SENATOR GARY HART, 49

Background: Colorado Democrat elected in 1974. Third-ranking Democrat on Senate Armed Services Committee. Presidential candidate 1984; expected to run again in 1988.

Top achievement: "What stands out is the Senate itself. I've served with some great American leaders. The great contributions they have made are well documented."

Biggest disappointment: "I and others were not able to bring about some serious movement on arms control, which is still the most serious issue of our day."

Plans: "Well, I've had some inquiries from law firms, universities and businesses about what I can do after January of 1987. But whatever I do, Colorado will continue to be my home."

Advice for successor: "No advice is necessary. I'm confident Rep. Tim Wirth (running against Republican Ken Kramer) will manage just fine in the Senate."

SENATOR PAUL LAXALT, 64

Background: Nevada Republican elected in 1974. Close friend of President Reagan. Sent to the Philippines by Reagan administration earlier this year to persuade President Ferdinand Marcos to step down.

Top achievement: "The fact that I had the opportunity with my relationship with the President to serve as a conduit between two branches of government while not compromising my position as a U.S. senator from Nevada."

Biggest disappointment: "Losing the Panama Canal (treaties) fight."

Plans: "Into private law practice in Washington, D.C."

Advice for successor: "Don't take yourself too seriously because nobody else in Washington will."

□ 1010

RECOGNITION OF THE DEMOCRATIC LEADER

The PRESIDING OFFICER (Mr. STAFFORD). Under the previous order, the Democratic leader of the Senate, Senator BYRD, is recognized.

Mr. BYRD. I thank the Chair.

THE REYKJAVIK SUMMIT

Mr. BYRD. Mr. President, no one rejoices in the apparent frustrating finale to the Reykjavik meetings. The overwhelming sense of disappointment that has permeated the atmosphere, because agreements were not reached on the key arms control issues, is palpable. But, one must ask, if we look back to the week before this meeting, what were our expectations? A week before the Reykjavik meeting, everyone was supposed to refrain from calling this meeting a "summit." In retrospect, this was obviously unrealistic.

My own standards for a successful meeting were twofold: First, that on arms control matters, progress on the whole range of questions on the table at Geneva be achieved so that detailed instructions for further negotiations on those matters would be given to our negotiators on both sides; second, that the so-called real summit be scheduled so that the respective bureaucracies, would be galvanized to develop solutions to outstanding issues.

Additionally, it was reasonable to expect that other agreements could be reached in Iceland, such as the proposal for risk reduction centers, progress on human rights, and progress on regional problems such as Afghanistan. These agreements would serve to help maintain a positive atmosphere within

which forward movement on arms control issues is more possible.

Democrats in both the Senate and the House made concessions on arms control matters.

President Reagan made a major point of "untying" his hands, and we gave our unqualified support, as we should have done. He went to Reykjavik with bipartisan and bicameral support.

It was unrealistic, Mr. President, that the administration convinced itself that this was not really a summit, that somehow all the issues were not going to be joined. Why, one must ask, did Mr. Gorbachev ask for this meeting?

Did the Soviets come ready to negotiate an "endgame," to cut through the central unresolved problems across the board, to completely engage the United States? I think the President's advisers did not serve him well, in that he was apparently not adequately prepared for what took place.

If we but look back 3 weeks ago, Mr. President, we recall a story in the Washington Post, on September 23, with the headline "Quick Accord on Missiles Seen Unlikely," by R. Jeffrey Smith and Walter Pincus. I read three or four paragraphs therefrom:

> Despite optimistic statements in recent days by U.S. and Soviet leaders about progress on intermediate-range nuclear forces (INF), no agreement is likely until several key issues are resolved in the Reagan administration and between the superpowers, according to U.S. and diplomatic officials.
>
> The two sides have not agreed on the allowable number of Soviet intermediate-range SS20 missiles aimed at Asia and short-range missiles on both sides based in Europe, or on the mix of U.S. intermediate-range weapons in Europe.
>
> The Pentagon and State Department remain bitterly divided on several of these issues, although neither favors the Soviet position. They also disagree about whether the United States should be allowed to redeploy missiles overseas that are removed from Western Europe, and about replacement of the missiles with shorter-range weapons. Given these disagreements, no treaty is likely without substantial negotiation and new compromises by all sides, sources said.

So, there were within the administration itself deep divisions, deep divisions between the Pentagon and the State Department, as the President was soon to make preparations for going to what he described as a base camp on the way to the summit.

The results of the summit and the developments of the final hours of the summit have some important lessons for us. First, it is unwise to attempt to bargain with the Soviets on arms control without thorough preparation in advance.

Second, summits between heads of state should be preserved for the ratification of ideas carefully thought out and hammered out in advance. Third, if the opportunity is at hand to strike a major arms control deal, one should not in anger, frustration, or impatience let the opportunity slip away. The responsibility, it seems, was on both leaders not to let it slip away. Yet, both unprepared to control the crucial moment of decision.

Mr. President, the Soviet leader is an adroit player, articulate, and he obviously came to Iceland with a well-thought-out game plan. He has the capacity to be, at times, too pushy. When I visited with him a year ago in the Kremlin, along with a bipartisan group of seven other Senators, we came away with mixed impressions. He interrupted my presentation at least once in a flare of anger, and was adamant on several occasions in reminding us whom we were attempting to deal with. In my formal report to the Senate, I said,

> Mr. Gorbachev displays irritation when confronted with a position that he seems to interpret as an intrusion into Soviet internal affairs, or that he believes to slight the Soviet Union as a superpower unequal to the United States. At times, this seems to take the form of defensiveness, * * * and he accused the United States of attempting to "intimidate" the Soviet Union on matters such as SDI.

His initial comment to me, after I made a long presentation to him on behalf of the entire Senate delegation was:

> I heard nothing new and, therefore, I don't see any great reason to discuss anything.

He then accused me of asking for Soviet "capitulation" on the major policies under discussion. Not only was this not true; it was also a patently unfair interpretation of our presentation.

So, Mr. President, we are dealing with a complex man—sometimes hypersensitive and even arrogant, who is also highly capable and quick-minded. It is entirely understandable how he could have rubbed President Reagan the wrong way.

It is important for a President to be able to walk away from a bad deal. There is a difference between willingness to walk away from a bad deal and unpreparedness to engage creatively on those issues which we well know are crucial to both nations. There is no doubt that active pursuit of the SDI Program, in the long run, involves a tremendous dedication of national resources to military purposes. There is no doubt that the Soviets would have to counter it with a renewed massive infusion of their own previous resources.

This prospect has the Soviets on edge.

American technology is probably better positioned to break through in many areas of military space technology. I am for the SDI Program—I have supported a vigorous research effort, and I will continue to support a vigorous research effort. As a supporter of SDI, I agree with the President that SDI was the beacon that attracted the Soviets to the negotiating table, but I do not believe SDI should become the rock upon which arms control founders. If the President and General Secretary Gorbachev were as close to a major arms control deal as it appears they were, it is unfortunate that patience and tenacity did not counsel deferring final judgment to another day and another place while experts worked out the technicalities.

□ 1020

There is apparently some question about whether the United States should accept a 10-year ban on deployment and testing of space weapons systems of a defensive nature.

It is my impression that the technical ground for acceptable compromise on component testing outside the laboratory exists, but that the two sides have not yet adequately explored that ground.

SDI's Director, Lt. Gen. James Abrahamson, has said that deployment of SDI systems could not occur until after the mid-1990's. Thus, one must ask whether the quest for Soviet acceptance of a broader interpretation of the ABM Treaty would yield as much in increased U.S. security as would achieving the offensive arms reductions proposed in Iceland.

Mr. President, the Senate is going to have to give its advice and consent prior to ratification of any treaty that this administration comes up with. From all reports, we are told that major progress was made on a variety of issues, including euromissiles, strategic weapons, verification questions, nuclear testing, and perhaps other matters, but that the futuristic SDI possibilities that are the apple of President Reagan's eye could not be constrained, and so the entire fabric of issues is in limbo.

Nevertheless, the progress on many matters that was reported can be taken up again if both sides are willing to start over. It seems to me that an acceptable resolution of the ABM Treaty-SDI Program can be achieved.

It remains an open question whether the summit advanced, or retarded, our efforts to build a safer world. I urge the leaders of both nations to renew their quest for peace, without permitting the disappointments of the moment to obscure this goal. Both leaders have stated their continued committment to continue doing business. To demonstrate this commitment, both governments should pick up the pieces and instruct their negotiations in Geneva to pursue those avenues which appeared most promising in Iceland.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 11 a.m., with statements therein limited to 5 minutes each.

The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may yield briefly to the Senator from Maryland without being charged with the time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I thank the Senator from Wisconsin.

ORDER FOR PRINTING OF IMPEACHMENT DOCUMENTS

Mr. MATHIAS. Mr. President, I ask unanimous consent that the proceedings of the Senate, sitting in open session as a court of impeachment to consider the articles of impeachment against United States District Judge Harry E. Claiborne of the District of Nevada; together with statements submitted for the record; briefs, memoranda, and motions submitted by the parties to the Senate following the completion of the Senate Impeachment Trial Committee's hearings on September 23, 1986; legislative proceedings relating to this matter; and briefs filed in the Federal courts by both Judge Claiborne and the Senate and relevant judicial orders; be separately printed for the use of the Senate. I further ask that 300 copies be printed for the use of the Senate Impeachment Trial Committee and 300 copies be printed for the use of the Secretary of the Senate.

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, the distinguished Senator is asking these matters be printed and gathered together as a Senate document?

Mr. MATHIAS. Yes.

Mr. BYRD. I think this is very wise and appropriate. It seems to me it would be of service to the Senate in the future when such cases may again come before the Senate for trial. Our experiences in this event can constitute a guiding light to those Members in the future.

The Senator is rendering a service by making the request.

I remove my reservation.

Mr. MATHIAS. I thank the distinguished minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I further ask unanimous consent that the time not be subtracted from the time of the Senator from Wisconsin.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wisconsin is recognized.

IS GORBACHEV PUSHING UNITED STATES TO GO AHEAD WITH STAR WARS?

Mr. PROXMIRE. Mr. President, the one, far and away most persuasive argument for the strategic defense initiative [SDI], or star wars, is that the Soviet Union, specifically Secretary Gorbachev, so vehemently opposes it. Now, suppose the fact is Gorbachev does not oppose SDI, just suppose he favors the United States proceeding with it? Consider, there is solid logic in Gorbachev concluding that the Soviets will gain clear military advantage if the United States pours a trillion dollars into SDI. So Gorbachev should logically pursue a course of conduct that would push our country ahead with star wars. Is Gorbachev doing this? I believe he is doing exactly this. But how can that be? Didn't Secretary Gorbachev make restraint on SDI the absolute condition for his agreement to arms control at the Iceland summit? He did, indeed. And hasn't Secretary Gorbachev vigorously and consistently denounced SDI as a stumbling block to arms control? He has. Now doesn't all this prove that however American critics may demean SDI as an effective defense against Soviet nuclear attack, Gorbachev himself recognizes the serious threat the American SDI poses to the credibility of the Soviet's nuclear deterrent?

Mr. President the answer to these questions is evident to anyone who will put himself in the position of Mr. Gorbachev. So what action by the United States would you view as most likely to serve the military purposes of the Soviet Union if you were Gorbachev? Answer: for the United States to squander its great technological and economic military advantages on a massive $1 trillion project that you believe is bound to fail. If he United States pulls tens of thousands of its best scientists and technicians away from improving its planes and tanks and warships, if it pours hundreds of billions of dollars of its military expenditures into a strategic defense initiative which the Soviets can easily and for far less money overwhelm, penetrate, spoof, underfly, won't that serve the interest of the Soviet Union? Of course, it will. So how does Mr. Gorbachev persuade the United States to proceed with SDI? Easy. He makes the biggest possible fuss about SDI. He denounces it. He calls it a terrible threat to world peace. And then comes the masterstroke. Gorbachev walks right up to a massive arms control agreement that would cut the missile forces of each superpower by 50 percent, and says—we want oh so much to cut our nuclear missile force but we can't do this if the United States continues its SDI project. Is Secretary Gorbachev smart enough to understand that this is precisely the kind of performance that is likely to give SDI its best and biggest chance? You betcha. Certainly Gorbachev understands that it will be much easier for President Reagan to move ahead with SDI inspite of the strong public and congressional opposition to the program if he—Gorbachev—the Communist Leader—persists as its leading critic. There is nothng easier in American politics than to champion a U.S. military security project that has the all-out opposition of the Soviet Union and its top boss. Does Secretary Gorbachev know this? Does he realize that when he opposes a U.S. military project he gives it the strongest possible political support in this country. Of course, he does. And when this leader of the Soviet Union makes the SDI project the one and only reason he won't accept a massive nuclear arms reduction program he achieves other ends too. Gorbachev wins points with peace movements in Europe and even in America. He focuses blame on what he calls stubborn American intransigence with much of the European and American public. At the same time he encourages America to impose an enormously heavy burden on its economy and to divert its military resources to a project that he must know will not and cannot eliminate the credibility of the Soviet's massive nuclear deterrent.

Ah, but suppose SDI or star wars works. Isn't Secretary Gorbachev taking a reckless gamble? No, indeed, the record of hearings before the Defense Appropriations Subcommittee is replete with testimony from former Secretaries of Defense—Republican and Democratic—and from scientific experts who have told the committee that SDI cannot provide an effective shield over our cities. They have testified that the SDI defense can never be fully or adequately tested and repeated testing is absolutely essential to build such a system. They have testified to its immense cost. Secretary Gorbachev knows all this. He also understands enough about American politics to know for a sure and certain fact that he has the power to greatly advance any U.S. military project with the American public and the Congress by simply opposing it. This is precisely what he is doing with SDI. We shouldn't fall for it.

MYTH OF THE DAY: NUCLEAR TERRORISM CAN'T HAPPEN HERE

Mr. PROXMIRE. Mr. President, the myth of the day is the often heard proposition that nuclear terrorism, while an interesting theoretical concept, just can't happen here.

After all, the argument goes, the United States has suffered little in the way of any terrorist activity. We safeguard our military facilities. We guard our nuclear powerplants. Nuclear materials are always under close control. So a nuclear terrorist incident here is just not likely.

Mr. President, this is a comforting conclusion. Nuclear terrorism just can't happen here. But it is a myth and the kind of complacency we cannot afford.

According to the International Task Force on the Prevention of Nuclear Terrorism, the probability of nuclear terrorism is increasing. They cite the growing incidence, sophistication and lethality of conventional terrorist activity—giving rise to the perception among terrorists that a nuclear event might be the biggest victory of all.

In addition, there is increasing State support for international terrorism. Iran, Iraq, Libya, Yemen, are all countries who have demonstrated a willingness to support the most violent terrorist organizations.

In the last 20 years there have been some 155 bombings, attacks or violent demonstrations at civil nuclear installations around the world. Most have not been serious but they demonstrate that nuclear reactors are prime targets.

Building a nuclear device is within reach of terrorists having resources to recruit a team of three or four technically qualified specialists according to the task force. Reactor grade plutonium or highly enriched uranium would be required.

For all these reasons, Mr. President, we must begin now to guard against these possibilities. To continue to say that it can't happen here is a deadly myth—one that strikes at our national security.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EVANS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FEDERALISM ACT OF 1986 [FACT]

Mr. EVANS. Mr. President, I rise to introduce the Federalism Act of 1986 or Fact for short. Senator DURENBERGER and I believe that Fact offers a working draft or blueprint to thoroughly overhaul our Federal, State, and local governmental relationships. Fact is a proposal that would:

First. Achieve sweeping federalism reform and a major reordering of Federal domestic priorities on which Republicans and Democrats; conservatives and liberals; and Federal, State, and local governments can agree;

Second. Provide a responsible, achievable middle ground for the coming debate over welfare reform and family policy;

Third. Offer taxpayers a more effective and efficient government for each of their tax dollars paid; and

Fourth. Present a structural change to government that better defines the future budget decisions that must be addressed.

And, most importantly, the elements of this proposal would be implemented gradually on a fiscally neutral basis—a concept that we inherited from Gramm-Rudman and tax reform.

Mr. President, the effort to develop this legislation began in December 1985, when the Committee on Federalism and National Purpose—established under the auspices of the project on the Federal social role—released its report, "To Form a More Perfect Union." It was the culmination of the work by the committee, cochaired by former Gov. Charles Robb of Virginia and myself. We were joined by a group of 23 other Republican and Democratic representatives from all levels of government, academicians, and well-respected professionals. The legislation we introduce today reflects the consensus achieved by this diverse group.

Mr. President, I ask unanimous consent that a list of those who were members of that committee be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FEDERALISM AND NATIONAL PURPOSE

CHAIRMEN

Daniel J. Evans, U.S. Senator from Washington.

Charles S. Robb, Governor of Virginia.

MEMBERS

Bruce Babbitt, Governor of Arizona.

Samuel H. Beer, Eaton Professor of the Science of Government, Emeritus, Harvard University.

Benjamin L. Cardin, Speaker, Maryland House of Delegates.

Barber B. Conable, Distinguished Professor of the University of Rochester.

Dave Durenberger, U.S. Senator from Minnesota.

Stuart E. Eizenstat, Powell, Goldstein, Frazer & Murphy.

Richard A. Gephardt, U.S. Representative from Missouri.

Charles W. Gilchrist, Montgomery County, Maryland, Executive.

W. Wilson Goode, Mayor of Philadelphia.

Frank Horton, U.S. Representative from New York.

A.E. Dick Howard, White Burkett Miller Professor of Law and Public Affairs, University of Virginia; and Counselor to the Governor of Virginia.

Richard P. Nathan, Professor of Public and International Affairs, Princeton University.

Leon E. Panetta, U.S. Representative from California.

Jane Smith Patterson, Director of Contracts Administration, ITT Telecom, N/A.

Neal R. Peirce, Contributing Editor, National Journal.

Alan Pifer, President Emeritus, Carnegie Corporation of New York.

Lois D. Rice, Senior Vice President for Governmental Affairs, Control Data Corporation.

Alice M. Rivlin, Director, Economic Studies Program, The Brookings Institute.

Robert J. Rubin, M.D., Executive Vice President, ICF, Inc.

Richard S. Schweiker, President, American Council of Life Insurance.

Alair A. Townsend, Deputy Major for Finance and Economic Development, City of New York.

Eddie N. Williams, President, Joint Center for Political Studies.

Richard S. Williamson, Senior Vice President for Corporate and International Affairs, Beatrice Companies, Inc.

DIRECTORS

Forrest P. Chisman.

Stephen B. Farber.

Judith Golub, Project Associate.

Mr. EVANS. Our report, "To Form a More Perfect Union," sets the framework for the legislative drafters. In crafting this legislation we drew on the talents of many experts as well as officials from former Democratic and Republican administrations.

The legislative package we devised takes into account the fact that sweeping change can probably best be accomplished—if it can be accomplished at all—incrementally. Fact presents a straightforward plan for phasing in a comprehensive restructuring of Federal and State governmental relationships. We are introducing the legislation today so that Members can have an opportunity to study our proposals during the long recess. Hopefully, when we convene the 100th Congress, Members will be sufficiently familiar with the legislation so that we can move promptly to hold hearings, to incorporate the best suggestions of Members and other analysts, and then pass this legislation.

Mr. President, let me briefly describe the legislative components of Fact. As I indicated, the changes would be phased in over a number of years, and would be fiscally neutral. Under Medicaid, we would establish more uniform eligibility and benefits standards. We would expand coverage to all children 5 years of age and under as well as pregnant women living in families with incomes below the poverty line. The Federal commitment would be increased to a 90-percent match. By providing medical coverage to all poor children under 5 years of age, we can keep an additional 1.3 million children healthy. This proposal is consistent with this year's reconciliation bill which seeks Medicaid coverage for poor children. Other elements of our proposal would establish more uniform Medicaid standards.

Under AFDC, we would establish a national minimum benefit level for

AFDC benefits and increase the Federal commitment to a 90-percent match. The program would continue to be administered at the State level. In a wealthy nation like ours, it is a disgrace that a poor family of four in one region of the country can receive assistance up to five times as great as a poor family in another region. After all, to be poor and hungry in New York or California is not much different than being poor and hungry in Mississippi, Maine, or Missouri.

In addition, Fact would require all States to join the 26 States that already participate in the AFDC-Unemployed Parent Program. Without the AFDC-UP Program, the current AFDC system encourages the separation of parents in order to qualify for benefits—a policy that is antifamily and must be changed.

It is important to note, Mr. President, that before these AFDC reforms are implemented, Fact requires States to undertake aggressive efforts to develop and operate a program to encourage and assist AFDC recipients to prepare for, seek, and accept work.

To fund these increased Federal commitments, most local community development, infrastructure and many personal social service programs would be terminated at the Federal level. State and local governments could replace Federal spending for programs that are more cost-effective and responsive to local priorities.

Mr. President, when the Federal program terminations included in Fact are balanced against the increased Federal role in Medicaid and AFDC, the result is a fiscally neutral legislative package. But it is not carved in stone. Alternative combinations of program terminations have been explored and can be developed. With further coalition building and additional Member support other options will emerge.

While terminating programs has proven to be difficult for Congress, it becomes much more palatable when it represents a reordering of responsibilities between Federal, State, and local governments. Even with the bold efforts of Senators DOMENICI and CHILES, Congress has been restricted to offering status quo budgets that are responsive to this year's needs but not next. By allowing continued program freezes or spending reductions of 5 or 10 percent, the Congress and the President are not doing an effective job and are slowly strangling many important programs.

If all States and localities were identical, an intergovernmental exchange could be simple. But with the wide fiscal disparities among States and localities, the Federal Government should help meet targeted needs.

Integral to this federalism proposal are fiscal capacity grants targeted to those States and localities with very low tax capacity. Those States with low fiscal capacity would receive grants that would help them provide an adequate level of public services. Furthermore, localities would be allocated grants to cushion the impact of program terminations on communities with limited resources. Such a targeted program is 300 percent more efficient in reducing fiscal disparities than general revenue sharing, at one-half of the cost.

The final component of Fact converts the current Federal spending on the nonmedical aspects of long-term care into block grants to the States, thereby removing the present programmatic bias toward institutional solutions and enabling States to experiment with more efficient and humane forms of service. In addition, Federal funding will rise slowly to help narrow the gap between resources available in different States.

While a comprehensive solution appears to be a decade away, this proposal provides a first step in that direction and goes a long way toward meeting some of the costs and care concerns generated by the current system.

In conclusion, the Federalism Act of 1986 supports a diverse combination of interests.

First, it terminates a number of Federal programs and allows States and localities to determine their own priorities.

Second, it creates greater nationwide uniformity in the benefits provided by Federal safety net programs and it promises to place welfare recipients in jobs.

Third, it removes the tangled web of regulation between Federal and State/local governments.

Fourth, it mitigates the effect of fiscal disparities between the poorest and wealthiest States.

Fifth, it reforms our intergovernmental structure—helping us better define our future budget decisions.

With our Nation celebrating the bicentennial of the Constitution next year, there is no better time to return to the basics—"to form a more perfect Union."

Mr. President, I ask unanimous consent that the summary and a section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY

The Federalism Act of 1986 (FACT) offers a plan to thoroughly overhaul our intergovernmental relationships—a proposal that would:

Achieve sweeping federalism reform and a major reordering of federal domestic priorities on which Republicans and Democrats; conservatives and liberals; and federal, state and local governments can agree;

Provide a responsible, achievable middle ground for the coming debate over welfare reform and family policy; and

Present a structural change to government that better defines the future budget decisions that must be addressed.

And, most importantly, the elements of this proposal would be implemented gradually on a fiscally-neutral basis.

BACKGROUND

In December, 1985, the Committee on Federalism and National Purpose released its report, To Form a More Perfect Union. It was the culmination of the work by the Committee, co-chaired by Senator Daniel J. Evans (R-WA) and former Governor Charles Robb (D-VA), along with a group of 23 other representatives from all levels of government, Republicans and Democrats, academicians and well-respected professionals. Truly, the strength of the Committee was the consensus found from such diverse members.

Experts in the field were enlisted as well as former Democratic and Republican Administration officials, to draw up the FACT of 1986 using To Form a More Perfect Union as a guide.

IMPLEMENTATION PLAN

The proposals offered by FACT can be implemented in a fiscally-neutral way by seeking leadership and member endorsement, building a diverse coalition of support and using the reconciliation process during 1987. As a starting point, however, omnibus legislation was introduced in October which will serve to initiate discussion and to develop alternative options.

INITIAL PROPOSALS

The following outlines a combination of proposals and options that could be pursued gradually in a fiscally-neutral fashion:

Medicaid Reform: In year 1, provide Medicaid coverage for all children 5 years of age and under and pregnant women living in families with income below the poverty line. The federal government will pay 80 percent of the Medicaid program cost for these two groups in year one and 90 percent thereafter. The age of eligibility for children will increase by 1 year through 1994, when children under 12 will be covered. In the first year, this proposal will cover an estimated additional 1.3 million children from poor families, and an additional 1.8 million children through 1994. Furthermore, an additional estimated 286,000 poor pregnant women will be covered in each year of the program.

In year 2, eligibility for the medical components of Medicaid would be made more uniform and broader nationwide. Also beginning in year 2, the federal government will increase its reimbursement rate for state Medicaid costs by 2 percentage points per year. Federal payments to states would be capped at 90 percent.

AFDC Reform: In year 2, all states would be required to join the 26 states that already participate in the AFDC—Unemployed Parent Program. Without the AFDC-UP program, the current AFDC system encourages the separation of parents in order to quality for benefits—a policy that is anti-family and must be changed.

Also in the second year, the federal funding match would increase to 90 percent from the current average of 54 percent, and a minimum AFDC benefit floor would be set for all states which, when combined with the cash value of Food Stamps, would equal 50 percent of poverty level income. The value of this minimum grant would increase by 2 percent of poverty per year each year thereafter. By 1994, the federal minimum

would be 62 percent of poverty, at or above the maximum combined AFDC and Food Stamp benefit currently in effect in 34 states.

A poor family of 4 in one region of the country will receive assistance up to 5 times as great as a similar family elsewhere. Afterall, to be poor and hungry in New York or California is little different from being poor and hungry in Mississippi, Maine or Missouri.

Work-Welfare: Along with providing more uniform and adequate welfare benefits, it is important to pursue initiatives aimed at enhancing the employment prospects of AFDC recipients. The suggested general characteristics of such a program are:

A federal mandate that states develop and operate a program to encourage and assist AFDC recipients to prepare for, seek and accept work, combined with broad state flexibility as to the specific design of that program.

Authorization for the states to require that AFDC recipients participate in offered programs and accept work, subject to certain minimum federal standards (e.g., exemption of the disabled, etc.).

Consolidation of existing federal work/welfare initiatives (with a 10 percent state match), which is administered by the Department of HHS.

Expanded funding for state programs in future years with a portion of the increase tied to the effectiveness of state programs.

It is important to note that AFDC employment requirements begin one year prior to the increasing federal role proposed under AFDC.

Long-term care: In year 3, create a block grant based on the current federal contribution to long term care. Funding levels will rise so as to combine an increased federal presence with additional funds to deal with case load and cost changes. While a comprehensive solution appears to be a decade away, this proposal provides a first step in that direction and goes a long way toward meeting some of the cost and care concerns generated by the current system.

Targeted assistance grants: Integral to this federalism proposal are "fiscal capacity grants" targeted to those states and localities with very low tax capacity. Those states with low fiscal capacity would receive grants that would help them provide an adequate level of public services. Furthermore, localities would be allocated grants to cushion the impact of program terminations on communities with limited resources. A preliminary framework for these two grants is described as follows:

Grants to Localities: These grants are targeted at those localities most in need. Need is to be measured by Total Tax Revenue (TTR), a standard developed by the Department of Treasury. The Department also will administer the funds on the national level. Grants will begin in Year 1 and continue each year thereafter. Funding is set at approximately $2.0 billion per year. Commissions in each state will have the option to develop an alternate formula by which to disburse fund within each state.

Fiscal Capacity Grants to States: These grants will be targeted at those states whose fiscal capacity is below 90 percent of the national average of total taxable resources, as determined by a formula developed by the General Accounting Office. Available funds will be allocated to states falling below 90 percent of the average in proportion to the extent to which these state's capacities fall below that mark. This measurement will be reestimated annually. The Treasury Department will administer these funds nationally. Grants to selected states will be authorized at $2.0 billion annually and will begin in year 3, continuing thereafter.

Program terminations: In year 1, most local community development, infrastructure and many personal social service programs would be terminated. State and local governments could replace federal spending for programs that are more cost-effective and responsive to local priorities.

A combination of program terminations that would provide for a fiscally-neutral proposal include: EDA; Appalachian Regional Commission; CSBG; UDAG; CDBG; UMTA—Research, Training & Human Resources, Interstate Transfer, and Section 9; EPA Wastewater Grants; Rural Water Waste Disposal Grants; Impact Aid; Chapter 2; Vocational Education; Title XX; and low-income housing (new commitments).

Alternative combinations of program terminations have been explored and can be developed. With further coalition building and additional member support other options will emerge.

SECTION-BY-SECTION ANALYSIS

A bill to establish more uniform eligibility and benefit levels under the Aid to Families with Dependent Children program and the Medicaid program, to provide for greater Federal financial responsibility for such programs, to enhance the employment prospects of recipients of Aid to Families with Dependent Children, to provide for a reduced Federal role with respect to certain activities, to provide fiscal capacity grants to States, and for other purposes.

SUMMARY OF TITLE I: AID TO FAMILIES WITH DEPENDENT CHILDREN

To establish more uniform eligibility and benefit levels for the Aid to Families with Dependent Children Program and greater federal responsibility for program costs, and to enhance the employment prospects of recipients so that they may become self-sufficient through a federal mandate that states develop and operate a program to encourage and assist recipients of Aid to Families with Dependent Children to prepare for, seek and accept work, combined with broad state flexibility as to the specific design of that program.

Subtitle A—Benefits and Federal participation

Section 101—AFDC Minimum Benefit Amount: Effective October 1, 1988, a federal minimum monthly benefit is set for all states. This federal minimum is a cash grant which, when combined with the cash value of food stamps, equals 50 percent of the nonfarm income official poverty line established by the Office of Management and Budget and revised annually. The value of the minimum grant increases 2 percent of poverty per year each year until FY95 when it reaches 62 percent of poverty level income. The federal government pays 90 percent of the value of this grant, with states continuing to be reimbursed by the federal government for amounts above this minimum at current reimbursement rates.

Section 102—Mandatory Provision of Aid with Respect to Dependent Children in Two-Parent Families: As of October 1, 1988, all states are required to adopt the AFDC-UP program. The costs of this program would be reimbursed at the same rate as the regular AFDC program.

Subtitle B—Work-related requirements

Section 111—State Plan Requirements; Registration of AFDC Applicants and Recipients for Work-Related Counseling, Assessment, and Assignment: AFDC recipients are required to register for work-related counseling and assessment, and assignment to employment, training, education, and other employment related activities designated by a state agency in each state that would consolidate the administration of each state's work-related functions. Current WIN regulations exempting certain populations would be continued, except that states may require individuals with children under the age of six to register, but only if childcare and transportation arrangements are available. States also may exempt recipients if participation in the program would not improve their employment prospects or if accepting work would lead to a net loss of income. Non-exempted recipients who without good cause do not register or participate in the program if offered to them will lose benefits.

Section 112—Consolidated Administration of Work-Related Programs: The Governor of each state designates the state agency which will administer work-related programs for Title IV-A recipienets. This agency registers all recipients and determines the appropriate kind and level of activity and, to the maximum extent possible, provides for increased coordination between the AFDC agency and other employment, training and education programs offering services to AFDC recipients. Such programs include the work incentive program, the work incentive demonstration program, the state's community work experience and supplementation programs, a work demonstration program (under section 1115), any program under the Job Training Partnership Act, any program of job search and related services, and any other program which could be made available to this population. Childcare, transportation and other necessary assistance is funded at a 90/10 rate.

The federal government authorizes funds of $500 million for FY88. This grant is increased $100 million annually and is capped at $1 billion for each of the fiscal years 1993–1995. First year funding is matched at a 90/10 rate, distributed to states on the basis of caseload. One half of the annual increases is distributed also on the basis of caseload and is matched at a 70/30 rate. The remaining half is matched at a 70 to 90 percent variable based on performance. The federal government contributes 50 percent to cover administrative costs.

In consultation with other officials, the Secretary of Health and Human Services will develop performance standards, giving special weight to the number of AFDC beneficiaries with limited prior work history that each state has placed in employment.

Section 113—Optional Coverage of Employment-Related Support Services for Certain Individuals: States have the option to continue payments for childcare, transportation and other employment-related support services for up to 12 months for families whose eligibility for AFDC has ended due to increased levels of income. States may opt to develop a fee schedule for these recipients.

Section 114—Technical, Conforming and Miscellaneous Amendments: The responsibility for administering the WIN program on the national level is transferred from the Department of Labor to the Department of Health and Human Services. Federal assistance is made equal to the applicable percentage of the costs of carrying out the activities determined by the designated state agency.

Section 115: Except as indicated otherwise, work-related requirements take effect October 1, 1987.

Subtitle C—Hold harmless

Section 121—Hold Harmless: The federal government will reimburse states at a 100% rate for amounts expended by them for AFDC in FY89 that are in excess of the amounts expended by them in FY88 for such aid and activities. This provision mandates federal reimbursement to states for the difference between the additional spending attributable to the AFDC amendments in FY89 and the additional federal reimbursements that occur that same year.

SUMMARY OF TITLE II: MEDICAID

To establish more uniform eligibility and benefit levels for Medicaid, along with greater federal responsibility for program costs.

Section 201—Medicaid Eligibility for Poor Children and Pregnant Women: Starting October 1, 1987, all children under 5 years of age living in families with income below the poverty line and all pregnant women (and during the 60-day period following pregnancy) living in such families would be eligible for Medicaid. The age of eligibility for children will be raised 1 year in each succeeding year, reaching 11 years of age. Secretary of Health and Human Services will set minimum nationwide uniform standards of service coverage and reimbursement.

Section 202—Medicaid Eligibility for Certain Other Individuals: Starting October 1, 1988, the following groups would be made eligible for the medical component of Medicaid: All persons eligible for but not receiving SSI; All institutionalized persons who are not categorically eligible for Medicaid solely by virtue of the more restrictive income eligibility requirements for this population; persons residing in states that do not provide Medicaid to all SSI recipients.

Section 203—Medically Needy Program Required: Starting October 1, 1988, all states are required to institute Medically Needy programs.

Section 204—Federal Medical Assistance Percentage: The federal government will pay 80 percent of the Medicaid costs for poor children and pregnant women in FY88. In FY89, the federal government will pay 90% of the costs. The state medical assistance percentage to cover Medicaid costs for groups other than poor children and pregnant women will be reduced by 2 percentage points beginning on October 1, 1988. By and after October 1, 1994 the state percentage will be reduced by 14 percent.

Section 205—Hold Harmless Provision: The federal government will reimburse states at a 100 percent rate for the costs attributable to the amendments detailed in Title II that a state expends in FY88 and FY89 that are in excess of the amounts states expended in FY87. This provision mandates federal reimbursement for the difference between the additional spending attributable to the Medicaid amendments in FY88 and FY89 and the additional federal reimbursements that occur in those years.

SUMMARY OF TITLE III: TERMINATION OR REDUCTION OF CERTAIN FEDERAL PROGRAMS

To provide for a reduced federal role with respect to certain activities.

Section 301—Repeal of Certain Statutes: The following provisions of the law are repealed: Appalachian Regional Commission; Economic Development Administration; Urban Mass Transit Interstate Transfer; Urban Development Action Grants (UDAG) and Community Development Block Grants (CDBG); Impact Aid; Chapter 2 of the Education Consolidation and Improvement Act of 1981; Vocational Education; Community Services Block Grant; Wastewater—Federal Water Pollution Control Act; Rural Waste Water Disposal.

Section 302—Reduction in Housing Assistance Program Outlays: Federal outlays are reduced for the following programs: Housing Assistance Payments under Section 8; Public Housing Assistance and Loans; Rental Housing Assistance; Section 202 Housing Loans for the Elderly and Handicapped; Congregate Services Assistance; Operating Assistance under Section 201. Congress will reduce aggregate outlays for these programs from the aggregate baseline outlay amount, as determined by the Director of the Congressional Budget Office by the following cumulative amounts: For FY88, $800 million; FY89, $900 million; FY90, $1 billion; FY91, $1 billion; FY92, $1.2 billion; FY93, $1.3 billion; FY94, $1.4 billion; FY95, $1.5 billion.

Section 303—Reduction and Termination of the Social Services Block Grant: The Social Services Block Grant will be reduced in FY88 by $1.6 billion. The program is repealed in FY90.

SUMMARY OF TITLE IV: FISCAL CAPACITY GRANTS TO STATE AND LOCAL GOVERNMENTS

To establish targeted grant programs to reduce fiscal among state and local governments, and ensure that all communities can provide their citizens with a safety net of basic public services, by providing general purpose fiscal assistance to needy communities.

Section 401—Findings and Purposes.

Section 402—Definitions and Special Rules of Application: Defines county, township, city, Indian tribes and Alaskan Native Villages that are eligible to receive funds, defines data factors to be used in calculating grant allotments, and other terms required in the civil rights provisions.

Section 403—Payments to State and Local Governments: Contains technical/administrative provisions related to the timing of payments and making adjustments to payments as may be required.

Section 404—General Fiscal Assistance Trust Fund: Establishes a General Fiscal Assistance Trust Fund to be administered by the Secretary of the Treasury. $2.0 billion are authorized for payment to State governments and $2.0 billion for payments to units of local government. In addition, $500,000 is authorized to be appropriated to the Department of Commerce for collecting and tabulating data on fees and charges and Total Taxable Resources, used in calculating grant payments.

Section 405—Qualifications: Imposes certain requirements on grantees, including: (1) they pay prevailing wages to public employees whose salaries are in part paid with grant funds, and (2) imposes Davis-Bacon provisions on construction projects financed with grant funds.

Section 406—Special Entitlements for Indian Tribes, Alaskan Native Villages, and the District of Columbia: Provides per capita payments to the District of Columbia, each Indian tribe and Alaskan Native village equal to 150 percent of the per capita amount appropriated for all units of local government.

Section 407—State Area Allocations for Units of General Local Government: Funds for units of local government are allocated among state areas according to a 3-factor formula based on population multiplied by tax effort multiplied by relative fiscal capacity using the total taxable resources (TTR) measure of fiscal capacity. The details of the interstate formula are as follows: (1) no state area receives a payment less than 20 percent of the U.S. average per capita payment, (2) a state's tax effort is revenues (taxes plus fees and charges) divided by its TTR, (3) the total taxable resources of all states is adjusted to reflect the higher cost of living in higher income states, and (4) funds are allocated in proportion to the extent to which a state's TTR is less than 150 percent of the TTR of all states.

Section 408—Allocations to Units of General Local Government in the Same State: Allocates each state area allotment to units of general local government using a formula based on the population, tax effort and per capita income of each unit of local government.

Paragraph (b)(1) defines the tax effort of each unit of local government as revenues collected (taxes plus fees and charges) divided by resident's total income. However, the revenues of a unit of local government are limited to no more than twice the state average. This provision is intended to prevent extraordinarily large payments to localities that can export a large proportion of local taxes to non-residents because of large shopping centers or industrial parks that yield large revenues relative to population. The income factor is defined so that local governments whose per capita incomes exceed 120 percent of the U.S. per capital income (adjusted for cost-of-living differences) are ineligible. Per capital payments for the remaining eligible governments increases in proportion to the extent their per capital income is below the 120 percent income eligibility standard.

Section 409—Adjustments of Local Government Allocations Made Under Section 408: Provides adjustments to payments established in Section 408—(1) no local government may receive a per capita payment more than 3 times the national average payment, and (2) if the payment determined in section 408 is less than $1,000 the payment is automatically waived and reallocated to remaining eligible governments.

Section 410—Alternative Distribution of Funds to Local Governments: Establishes a Commission in each state composed of elected local government officials to investigate alternative formulas that may better target aid to local governments with high costs of providing for their public service needs and low revenue raising capacity. If the Commission finds that a better method of allocating funds can be devised then it may recommend an alternative formula, which if approved by the Governor and State Legislature, will replace the allocation provisions contained in sections 408 and 409.

Section 411—Allocations to State Governments: Allocates funds to state governments using the same interstate formula as described in section 407 except that eligibility is limited to only those states whose total taxable resources are below 90 percent of the average taxable resources of all states. However, no minimum per capita payment is provided. In addition, if the formula would allot less than $1.0 million to any state government their allotment would be waived and reallocated to remaining eligible State governments.

Section 412—Information Used in Allocation Formulas: Requires that the latest available data be used for calculating grant allotments, that population data be adjusted to reflect under counts from the 1980 census and provides hold-harmless provi-

sions for areas designated as major disaster areas.

Section 413—Accountability: Contains the same public hearing provisions that has been required under general revenue sharing.

Sections 414 through 420—Discrimination: Contains the same anti-discriminatory provisions as has been required under general revenue sharing.

Section 421—Audits, Investigations and Reviews: Invokes requirements of the Single Audit Act of 1984 for governments receiving $25,000 or more.

Section 422—Reports: Imposes the same reporting requirements on the Treasury Secretary and grant recipients as was required under general revenue sharing.

SUMMARY OF TITLE V: BLOCK GRANTS TO STATES FOR LONG-TERM HEALTH CARE SERVICES

To establish a block grant program with respect to the nonmedical aspects of long-term care, thereby removing the present programmatic bias toward institutional solutions to the problem and enabling the states to experiment with more efficient and humane forms of service. In addition, provide federal funds for the block grants at a level that would help narrow the gap between resources available in different states for the nonmedical aspects of long-term care.

Section 501—Establishment of Block Grant Program with Respect to Long-Term Health Care: Federal spending on long-term care is converted into a block grant to states to cover services supplied by skilled nursing facilities; intermediate care facilities for mentally retarded individuals or individuals with related conditions; intermediate care facilities for other populations; inpatient psychiatric hospitals; and by home health care. The program will take effect beginning the third year after the enactment of the Federalism Act of 1986.

The size of the grant to each state will be based on qualifying expenditures for long-term care in the year prior to the program's implementation. Qualifying expenditures are: the funds required to provide institutional-based services up to the national average in terms of average care days per recipient for each type of service and funds spent in providing home health care services.

The federal block grant to each state will increase according to the primary adjusted federal medical assistance percentage on qualifying expenditures, 5 percent in the first year and for each subsequent fiscal year, the sum of 3 percent and the primary adjustment percentage for the immediately preceding fiscal year. The federal block grant amount to each state also will reflect the secondary adjusted federal medical assistance percentage on expenditures above the qualifying amount, a 2.5 percent reduction in the matching rate in the first year and for each subsequent fiscal year, the sum of 1.5 percent and the secondary adjustment percentage for the immediately preceding fiscal year.

Furthermore, the Secretary of Health and Human Services will increase the qualifying expenditures used in the grant formula to reflect growth in the target population and in unit costs. Except for this percentage increase mandated by the Secretary, long-term care federalization generally is complete when the cumulative annual increments bring the match rate to 90 percent.

Section 502—Report by Secretary with Respect to Technical and Conforming Changes: Within 180 days after enactment, the Secretary of Health and Human Services shall submit to Congress a report describing the necessary technical and conforming changes.

Mr. DURENBERGER. Mr. President, the goal of this legislation can be described in a single word: "responsibility." For two decades, we've known what's wrong with the Federal system. For a decade, at least, we've had a pretty good idea about how to fix it.

But, knowing what we ought to do, and getting it done, are two different matters. Federalism reform is not going to happen until we take the responsibility to make some very tough decisions. By we I mean the Federal Government, State and local governments, and the American people. All of us and each of us.

For the Federal Government, this means finally admitting our responsibility to the poor, establishing a real safety net that supports people on an equal basis—in Mississippi as well as in Minnesota.

For State and local governments, this means abandoning the old illusions that we can have it all—and that we can have it both ways—Federal aid for every purpose under the Sun, everywhere on an equal basis, whether you're Bedford-Stuyvesant or Beverly Hills.

And, finally, responsible federalism makes demands on people as well as governments. Take the case of welfare. Government has a responsibility to provide a minimum level of resources. But, the individual and the family have responsibilities as well, both to themselves and to society.

The legislation that DAN EVANS and I are introducing in the Senate, and that TOM DOWNEY is introducing in the House, is about "responsible federalism."

While this legislation took over a year to develop, it does not mark an end to our discussion and debate on this subject. Instead, this legislation, and the hearing we held on federalism reform last week before the Senate Subcommittee on Intergovernmental Relations, will launch the beginning of a dialog which is well-suited for 1987—a year in which we will celebrate the bicentennial of our Constitution and begin the 100th Congress of the United States.

This dialog, in turn, is not about arcane administrative arrangements of governmental activities. Rather it is about the future direction of our system of government. And it is about the most fundamental questions concerning the role of government in our society—questions like:

Which levels of government should be responsible for delivering which services?

What should be the responsibility of government—and of society as a whole—to assist individuals who have difficulty caring for themselves?

Should there be a uniform, minimum level of income and services, below which no American citizen should be permitted to fall?

What responsibilities do recipients of public assistance owe to society at large?

Can States be trusted to administer devolved programs, given their dramatic advances in State institutional capacity, revenue raising ability, and fairness in electoral participation?

And finally, in a period of retrenchment and record Federal deficits, how can we afford to meet competing demands for services in a fiscally responsible manner?

No issues could be more appropriate for our discussion as we stand on the verge of the 100th Congress and prepare to celebrate the bicentennial of our Constitution. But our interest in comprehensive federalism reform is not an intellectual exercise prompted by mere historical curiosity. Three very real and contemporary problems have combined to place these fundamental issues of governance on the forefront of our national policy agenda.

The first is welfare reform. If 1986 was the year of tax reform, 1987 will likely be the year of welfare reform. As the extremes of family income grow wider in our society, the paradox of poverty in the midst of plenty grows more acute. As the so-called underclass grows and seemingly resists more than two decades of antipoverty programs, the calls mount for a redefinition of society's obligations to the poor—as well as a redefinition of individuals' and families' responsibilities to society as a whole. For all of these reasons, the President has indicated that welfare reform may become an important item on his agenda next year, and this hearing demonstrates that welfare reform will be a major item on the congressional agenda.

The second stimulus for this legislation is a set of longstanding problems in our system of cooperative federalism that demand comprehensive reform. Despite all the budget cuts and block grants, there has been no systematic sorting out of Federal, State, and local responsibilities since 1980, when the Advisory Commission on Intergovernmental Relations concluded that our intergovernmental relations had become both "less" and "more." Less manageable, less effective, and less accountable * * * but more costly, more pervasive, and more intrusive. The intergovernmental aid system remains overloaded, over-regulated, and overly complex.

This intergovernmental confusion has been increased rather than reduced by the third factor shaping federalism today—fiscal retrenchment. During the past 6 years, we have indeed begun to reshape our Federal

aid system. Since 1980, Federal aid adjusted for inflation is down 24 percent—with virtually no area untouched. In health services, real spending is down 14 percent. Child nutrition grants are down another 14 percent. Mass transit—down 19 percent. Economic development—down 39 percent. Social services—down 25 percent. Training and employment—down 69 percent. In short, we in Washington have been busy restructuring fiscal federalism; but we have been doing it almost by accident, without rhyme or reasons, without any set of guiding principles.

Except for cuts and a few block grants created back in 1981, most programs remain unchanged. EDA and UDAG are still there. So is CDBG, family planning grants, the community services block grant, impact aid, mass transit grants, and the Job Corps. The programs are still there, but each year we whittle off 10 percent here and 20 percent there—or we just freeze their budgets and let inflation do the cutting for us. All the while, these programs become worth less and less, the deficit continues to mount, and we do nothing to establish a sense of national priorities.

The problem is not the programs. Each of them has value. The problem has been our unwillingness to make hard choices. By trying to still do everything we did in the past, though we can no longer afford it, we risk doing nothing well. And we risk ignoring new problems or trying new approaches simply because they are locked into today's budget.

That is why we are here today. Because the need for welfare reform, intergovernmental management, and fiscal retrenchment demand that we reexamine Federal, State, and local roles in delivering governmental services, and that we do it in a principled way.

The last time we addressed the issue of sorting out responsibilities in a serious way—back in 1982—I identified three sets of principles that I believe can help define the scope of legitimate national purpose and thus help us make the difficult choices we face.

The first set of principles are constitutional in nature. They have helped us assign responsibilities in our Federal system since 1787; and because they are embodied in our founding document, they continue to shape our pollicies today. By virtue of the Constitution, the National Government has the responsibility: First, to secure the individual rights and liberties guaranteed to all Americans; second, to defend American interests and conduct foreign relations in the community of nations; and third, to promote economic growth and regulate interstate commerce.

Over the past 200 years, these broad constitutional dictates have been reinforced by a set of five time-tested administrative principles which enhance efficiency and effectiveness in the conduct of Government. These principles address problems that are widely experienced and cannot be easily resolved by State and local action. Thus, the National Government has a responsibility to address problems where:

Significant savings can be realized by operating a central program, as in research and development;

Where States cannot be effective by operating alone, as with combating organized crime;

Where benefits spill over to citizens of other States, as in protecting wilderness areas;

Where single States encounter extraordinary costs beyond their means, as in disaster relief and refugee assistance; and finally,

Where competition among the States prevents them from acting in the public good, as in regulating minimum wages and hours and insuring against unemployment.

Finally, there are two principles of fairness that reflect the needs of a changing America as we approach the 21st century. These are principles that, while acknowledging the degree to which we remain a diverse nation, reflect the greater sense of national community that has evolved over the past 50 years. These principles of national fairness establish, first, that the National Government has a responsibility to provide for the income security of all Americans. This includes the regulation of banking and pensions for the employed; social insurance for the retired, sick, and unemployed; and income maintenance for the poor.

The second principle of fairness recognizes a national responsibility to ease disparities in fiscal capacity among States and communities. This is the public-sector counterpart of the principle above. Just as the principle of income security establishes a safety net of private goods—food, housing, medical care—so the narrowing of fiscal disparities establishes a safety net of public goods, to provide a minimum level of basic public services in those States and communities that simply lack the tax base to provide these services alone.

Above all, it is these two national responsibilities—to fill the gaps in our system of income security and to reduce fiscal disparities—that the legislation we are introducing seeks to address. It is these two principles of national community which create a solid foundation on which a true "responsible federalism" can be built.

The legislation before us is only a beginning, not the final word. As we take up this debate in the 100th Congress, let us be guided toward "forming a more perfect Union" by embracing fairness across our national community, building on the firm foundation of constitutional principles and administrative practices that have sustained us for 200 years.

Thank you Mr. President.

ORDER OF PROCEDURE

(The following occurred during the foregoing remarks of Mr. EVANS:)

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. EVANS. Mr. President, I ask unanimous consent for an additional 2 minutes.

Mr. CHAFEE. Mr. President, we are running out of time.

The PRESIDING OFFICER. Is there objection?

Mr. CHAFEE. Mr. President, I wonder if the Senator could make it 1 minute. We have several backed up. We have to go to the vote at 11.

Mr. EVANS. I understand, I shall try. Does the Senator want 2 minutes?

The PRESIDING OFFICER. The Senator has a pending unanimous-consent request for 2 minutes. Is there objection?

Mr. LEVIN. Mr. President, I would like to amend the unanimous-consent request that I have 4 minutes, that the Senator from Rhode Island be given 4 minutes, and then that the Senator from Illinois be given 3 minutes.

The PRESIDING OFFICER. Is there objection to the amended request? If not, without objection, it is so ordered.

The Chair now recognizes the Senator from Michigan.

Mr. LEVIN. I thank the Chair.

THE DEATH PENALTY PROVISION IN THE PENDING DRUG BILL

Mr. LEVIN. Mr. President, the issues before us are very simple as we prepare to vote on cloture. Do we want "to bring to an end" debate on a major piece of legislation which we have not yet begun to debate and which has never been the subject of hearings? Are we really ready to foreclose the possibility of amending this bill under the strict germaneness rules which cloture will bring?

Mr. President, it is no secret that I oppose the death penalty in general nor is it a surprise that I oppose the particular form of the death penalty contained in this bill. This is not the time to give you my reasons for opposing the death penalty—though there should have been time for that—but it is the time to say that cloture, and its rules of strict germaneness, will prevent the Senate from considering this bill in a rational manner. No matter what your position on the death penalty or the drug bill, you should oppose cloture now for three reasons.

First, this bill and the new substitute amendment needs to be considered very carefully. It is a major piece of legislation which was drafted under very real time constraints. People have not had an opportunity to carefully study it. Just in terms of the death penalty provision, please recognize that this provision has never been in another death penalty bill considered by the Senate, it has never been the subject of hearings, it is flawed in a number of ways—yet we have never really debated it on the floor in a way which would expose—and perhaps correct—those flaws. We had about 20 minutes of debate on this subject when we considered the drug bill a week or so ago. And that really wasn't debate—only the proponents spoke and then a motion to table was made and then the amendment was withdrawn. Yesterday we had another 20 minutes or so of debate. Not much time, but we did discover a few facts which my colleagues ought to keep in mind. There is no data available to us which indicates how many drug-related deaths might be covered by this provision. And, in reality, there is no agreement as to which drugs related deaths would be covered by this provision.

Yesterday, I believe my friend from Utah was suggesting that this bill would let us sentence to death the drug dealers in the street who sell dope to people who subsequently die of, for example, an overdose. But that is not my understanding of the way the bill operates. And when my staff talked with the staff of the principal sponsor in the House, that was not their understanding either. Since intent must be found before a death sentence can be imposed, the dealer who, for example, sold drugs to a Lennie Bias is probably beyond the reach of this provision unless he or she intended to kill or intended to inflict serious bodily injury or intended to use lethal force. If the Bias case is an example of what we call an accidental overdose, could not be sentenced to death under the provisions of the law.

While the bill arguably deters drug traffickers from killing one another, it does nothing relative to users since pushers don't intend to kill users—they want to keep them alive to buy more drugs. The only people really subject to the death penalty under this bill are major drug traffickers—as the chief of police of the city of Detroit wrote in a letter to me of October 14,

> A survey of drug-related homicides in the city of Detroit indicates that the overwhelming majority of these victims are drug traffickers.

So, if you believe that the death penalty deters, it will deter drug traffickers from killing other drug traffickers. And in that sense this is, in effect, the Drug Trafficker Protection Act.

Hearings would have helped clear up this confusion and perhaps eliminate these problems. But we have had no hearings—and if we invoke cloture, we will have no real debate.

There is something else we will not have if cloture is invoked, Mr. President. We will not have a real opportunity to amend this bill.

While I oppose the death penalty, I suspect that some of the amendments I have prepared and filed at the desk might be supported by those who favor the death panalty. Who would oppose an amendment designed to exclude consideration of the race of the victim as well as the defendant? Who would oppose an amendment designed to allow for Government disclosure of evidence in its files on mitigating circumstances? And who would oppose an amendment clarifying the bill by making intent an element of the crime, as apparently intended by the floor manager, rather than just an aggravating factor? We may never know who would oppose—or who would support—such amendments because all of them, under the technical rules of cloture, could be ruled nongermane even though they are very relevant. While we can, of course, appeal a ruling of the Chair on germaneness, I know how that clouds the issue and makes it difficult to get to the substance of the arguments. And, of course, our ability to debate those issues would be restricted by the 1 hour allocated to each Senator under cloture rules. My point, Mr. President, is simply that cloture is designed to bring debate to a close—but this debate has not even started. If we close debate now, we will foreclose the right of Members to offer constructive and perhaps even acceptable amendments.

And it is not just my amendments which could not be considered if cloture is invoked. Those who have other concerns, concerns which go to other areas of the bill, might also find themselves closed out. The Senator from Louisiana has mentioned one such major concern to me relative to creating a new checkoff on our tax forms right after we have simplified those forms—he might well be prohibited from raising it. Others may find themselves in the same situation if we act prematurely and invoke cloture now.

Let there be no mistake: cloture here is premature. The death penalty provision before us has never been a part of any broader death penalty bill, never been the subject of hearings, and is flawed in many respects. While it is true that I oppose the death penalty, I also have some serious amendments I want to offer and some constructive suggestions to make. There has been no time to do that. The bill was called up on Friday night, very late, and a cloture petition was filed at once. On Tuesday we spent perhaps 20 minutes debating the bill. And here we are today trying to see if we should bring debate to a close? Mr. President, with all due respect, one reason we have postcloture filibusters is because we don't have precloture debate. And, I submit, there is a difference between the two at least in this case. Precloture we could deal with the issue; postcloture we deal with tactics.

I ask my colleagues to give us some time to work on this bill before they vote to close debate and foreclose the opportunity to offer relevant amendments.

The PRESIDING OFFICER. The Senator from Rhode Island is now recognized for 4 minutes.

Mr. CHAFEE. I thank the Chair.

THE COMMUNITY AND FAMILY LIVING AMENDMENTS OF 1985

Mr. CHAFEE. Mr. President, this has been a banner year for individuals with developmental disabilities. We celebrated the 10th anniversary of the Education for all Handicapped Children's Act—Public Law 94-142 and just last week the President signed the reauthorization of that act into law. The reauthorization of the Rehabilitation Act has been passed by the Congress. The Tax Reform Act contains a number of provisions which clarify the status of disability-related expenses. Finally, the reconciliation bill we are currently considering will allow disabled individuals to continue to receive Medicaid assistance after they begin to work, until their wages are sufficient to purchase assistance.

All of these actions are aimed at the same goal: To help disabled individuals achieve their fullest potential by giving them an opportunity they have long been denied—to participate in the American dream.

□ 1050

However, unfortunately, when the 99th Congress finishes its work this week or next week and adjourns, it will do so without having enacted S. 873, the Community and Family Living Amendments of 1985, legislation which I introduced to reform one of the major problems those with disabilities and their families face; namely, the Medicaid problem.

Why begin with changes in the Medicaid? What is the matter with the Medicaid system?

For all practical purposes, Mr. President, Medicaid is the sole Federal program which provides States with funding for long-term care for the disabled. That is where the money comes from to help the disabled. Currently, those funds flow primarily toward large facilities. Why do they go to large facilities? The Medicaid Program began as a medical assistance program for low-

income individuals. That is what the term is, medical care for those who are low income in the low-income strata.

In time, the program was used to pay for long-term care services for the elderly and the disabled.

Today, more than one-half of all Medicaid funds are used for this purpose. That is, long-term care for the disabled or the elderly.

But the long-term care services the program will pay for are still rooted in the medical model. S. 873 would provide funding for a full range of residential options for independent living, ranging from independent living to institutional placing. Currently, the funds all go to institutions. Is that the best place for a disabled person to be? I do not think so, in many instances.

S. 873 provides the mechanism to move people into the community so they can be close to their families, close to their relatives, close to those that they know, and have the security and the support they need to grow and thrive and reach their fullest potential, something that does not occur when they are in an institution.

Mr. President, S. 873 undoubtedly is controversial. It has stimulated discussions and debates about those who have disabilities and what their future shall be. We have held three hearings in the Finance Committee on this matter, and I have held two unofficial hearings. I have participated in scores of conferences and gatherings on this issue. Congress is coming back in January and I will reintroduce this measure. I hope it will pass.

I would like to take a moment to review the history of this legislation and share my thoughts about its future.

In 1983, a few forward thinking organizations and individuals shared their dream of the future with me—a future in which the values of freedom, work and family association were extended to those with physical and mental impairments—where each person, no matter how disabled, would be assisted and cared for in his or her own community.

It was a future I knew could work because I had seen a glimpse of it already in my own home State of Rhode Island.

In 1983, I made a commitment—to pursue this vision in Congress and to make it a reality for all individuals with severe mental and physical impairments regardless of the State they lived in. In 1983, I introduced the first version of that dream, a bill to reform the Medicaid system.

Why begin by changing the Medicaid Program?

For all practical purposes Medicaid is the sole Federal program which provides States with funding for long term care services for the disabled. Currently these funds flow primarily toward large facilities. Why? The Medicaid Program began as a medical assistance program for low-income individuals. In time, the program was used to pay for long-term care services for the elderly and the disabled. Today more than one-half of Medicaid funds are used for this purpose; but, the long-term care services the program will pay for are still rooted in the medical model.

As our understanding of the capabilities and needs of individuals with disabilities have progressed, however, it has become clear that traditional medically oriented long-term care services provided through Medicaid are inappropriate.

S. 873 would provide funding for a full range of residential options from independent living to institutional placements. In addition, it clearly outlines a wide variety of services that would be eligible for Medicaid funding at the option of individual States. The thrust of the bill is to provide services based on individual needs.

S. 873 provides the mechanism to move people into community living arrangements where they can live safely, with the security and support they need along with the opportunity to grow and develop as individuals. Just as important, it allows individuals who are currently living in the community—at home or in some other arrangement—to remain there by giving them and their families the support and services they need.

Even though the legislation has not yet passed the Congress, the simple introduction of the community and family living amendments was a spark that ignited a fire in the souls of all of us who are concerned about the future of those who have developmental disabilities. Long overdue discussions and debates about the future of those with disabilities have taken place in every State. The Finance Committee has held three hearings on this issue. I have held two unofficial hearings and I have participated in scores of conferences and gatherings on the issue.

These discussions have led to agreement that some change must occur in the Medicaid Program; the only remaining question is what shape that change should take.

A new session of Congress will begin in January 1987. At that time, I will reintroduce the community and family living amendments. Over the next 4 months I will be working to refine and revise certain provisions in the legislation. The hearings that have been held will serve as my base of information for that process. However, the basic premise of the proposal—that a full range of services and options be available and that the funding should flow toward individual needs—will remain the same.

The American dream should not stop outside the lives of those who are disabled. One of the hallmarks of America is that we each believe that out there in the future is a better life for ourselves and our children. Our challenge is to ensure that our fellow citizens with disabilities share in that better future. That's what this legislation is all about.

The PRESIDING OFFICER. The Senator from Illinois.

H. CON. RES. 395, CORRECTING THE ENROLLMENT OF THE TAX REFORM ACT

Mr. DIXON. Mr. President, I know I do not have to tell any of my colleagues that we should have adjourned weeks ago. I know they all share the same desire: to leave Washington and return to their home States. I, too, would like to leave Washington and return to my home State of Illinois. I am a candidate for reelection to the Senate, and election day is a mere 3 weeks from today.

It seems to me, however, that we cannot leave until we complete our work, and that means that we must act on the continuing resolution, which embodies the 13 annual appropriations bills that must be enacted to keep the Government functioning. It means we must act on legislation to increase the public debt limit, as distasteful as that duty is. It means that we must pass the reconciliation bill, to bring the budget into compliance with the Gramm-Rudman-Hollings targets for 1987.

Just as important as these three measures, however, is Tax Reform Act correction concurrent resolution—House Concurrent Resolution 395. Passage of this resolution is essential to correct numerous technical flaws in the Tax Reform Act, and to ensure that the tax reform package includes everything that the conferees agreed that it should.

I think it is unconscionable that we are considering letting the Tax Reform Act be signed into law without the necessary corrections, and without inclusion of the substantive provisions that were always intended to be a part of the final tax reform bill.

Now I understand that there are a number of my colleagues who would like to use the concurrent resolution to revisit issues that they believe were not satisfactorily resolved by the conferees, and I have to say that I share their unhappiness with the bill in a number of areas. I believe Congress ought to revisit several matters the Tax Reform Act settled wrongly early in the next Congress, but I do not believe that it is either fair nor reasonable to expect the Congress to revisit them now, in the few days reamining in this session. There is virtually no way major issues can be reopened without destroying the bill's revenue neutrality or without undermining the many compromises in the bill in ways that we now are not even in a position to be able to foresee.

I know how important many of these issues are to my colleagues. They know, however, the practical considerations involved with this resolution even better than I. They know this resolution simply will not be passed by the other body if any major issue were to be changed here in the Senate. The truth is, therefore, that any significant amendment adopted here would not be made a part of the bill in any event. The only consequence would be to ensure that a sloppy, technically flawed, and incomplete bill would be sent to the President.

I do not believe that is any way to legislate, Mr. President. I think we ought to do our duty by this landmark legislation and send it to the President in as mistake-free and complete a form as we can. I urge the Senate, therefore, not to forget the policy issues in dispute here, but to allow the tax reform bill to go to the President in a way that makes sense. I promise my colleagues I will be the first to work with them to see that the Senate revisits tax questions that must be revisited as early as possible in the next Congress.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

PROMPT PAYMENT AMENDMENTS

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar 1071, S. 2479, the Prompt Payment Act amendments.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2479) to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Prompt Payment Amendments of 1986".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(1) the billpaying practices of most Federal Government agencies have substantially improved, with certain exceptions, after three years of experience under the Prompt Payment Act (codified in chapter 39 of title 31, United States Code);

(2) the improvement in such billpaying practices has resulted in fairer treatment of contractors who furnish supplies, services, or construction to the Federal Government, especially small businesses; and

(3) nonetheless, contractors who deal with the Federal Government continue to experience many persistent billpaying problems which are caused by—

(A) a failure to modify the Federal Acquisition Regulation as part of the implementation of the provisions of the Prompt Payment Act;

(B) the implementation of the provisions of the Prompt Payment Act in a manner that denies the Act's protections in cases of certain contract payments;

(C) the implementation of the provisions of such Act in a manner which has permitted Federal Government agencies to take discounts for early payment months after the expiration of the discount period specified in the contractor's invoice;

(D) inadequate implementation of the requirement that Federal Government agencies automatically pay interest penalties with delinquent payments;

(E) the use of the unlimited time afforded agencies to formally accept a contractor's performance for the purpose of avoiding the requirement that the agencies pay an interest penalty with late payments made for supplies or services; and

(F) abusive use of certain payment grace periods which afford the Federal Government additional time to pay its bills without incurring interest penalties otherwise due.

DEFINITIONS AND APPLICATION

SEC. 3. (a) Section 3901(a)(4) of title 31, United States Code, is amended to read as follows:

"(4) the head of the agency is deemed to receive an invoice on the later of—

"(A) the date on which the office or employee of the agency designated by the agency to first receive such invoice actually receives a proper invoice; or

"(B) on the fifth day after the date on which, in accordance with the terms and conditions of the contract, the property is actually delivered or final performance of the services is actually completed, as the case may be, unless the contract specifies a longer period for agency acceptance of the property or services.".

(b)(1) Section 3901 of such title is further amended by adding at the end the following new subsection (c):

"(c) This chapter applies to the United States Postal Service. However, the Postmaster General shall be responsible for issuing the implementing procurement regulations, solicitation provisions, and contract clauses as part of the Postal Contracting Manual.".

(2) Section 410(b) of title 39, United States Code, is amended by inserting after clause (8) the following new clause (9):

"(9) Chapter 39 of title 31.".

INTEREST PENALTIES: REDUCTIONS IN GRACE PERIOD; INCREASED PENALTIES

SEC. 4. (a)(1) Section 3902(b) of title 31, United States Code, is amended—

(A) by striking out "16th" in clause (3) in such sentence and inserting in lieu thereof "8th"; and

(B) by adding at the end the following new sentence:

"Clause (3) of the preceding sentence shall not apply to payments under any contract for which the procurement solicitation is issued on or after October 1, 1988.".

(b) Section 3902 of such title is further amended by redesignating subsections (c) through (e) as subsections (d) through (f), respectively, and by inserting after subsection (b) the following new subsection (c):

"(c)(1) Any amount of an interest penalty which exceeds $1.00 and is owed a business concern under this section shall be paid without regard to whether the business concern has requested payment of such penalty.

"(2) If a business concern—

"(A) is owed an interest penalty by an agency;

"(B) is not paid the interest penalty in a payment made to the business concern by the agency on or after the date on which the interest penalty becomes due; and

"(C) is not paid the interest penalty by the agency within 15 days after the date on which the interest penalty becomes due,

such business concern shall be entitled to receive an interest penalty equal to twice the amount of the interest payment that would otherwise be due.".

INTEREST PENALTIES ON PROGRESS PAYMENTS AND RETAINED AMOUNTS UNDER CONSTRUCTION CONTRACTS

SEC. 5. Section 3903 of title 31, United States Code, is amended—

(1) by striking out clause (4);

(2) by redesignating clause (5) as (6); and

(3) by inserting after clause (3) the following new clause (4):

"(4) in the case of a construction contract, provide for the payment of interest on—

"(A) any progress payment due under the contract for—

"(i) a period of more than 7 days; or

"(ii) a longer period if the contracting officer determines that the prevailing practice in private construction contracts is to provide such longer payment period; and

"(B) any amount which has been retained during the performance of the contract and are due to be released to the contractor after final acceptance of the construction, if such retained amount is not paid to the contractor by the required payment date;".

PERIODIC PAYMENTS UNDER SUPPLY AND SERVICE CONTRACTS

SEC. 6. Section 3903 of title 31, United States Code, as amended by section 5, is further amended by inserting after clause (4) the following:

"(5) provide for periodic payments, in the case of a supply or service contract which authorizes periodic payments and periodic submission of invoices during the contract period, upon—

"(A) submission of an invoice for supplies delivered or services performed during the contract period; and

"(B) either—

"(i) acceptance of the supplies or services by an employee of an agency authorized to accept the supplies or services; or

"(ii) certification, by such an employee, that the performance covered by the invoice conforms to the terms and conditions of the contract.".

PAYMENT CLAUSE FOR SUBCONTRACTS UNDER CONSTRUCTION CONTRACTS

SEC. 7. (a) Chapter 39 of title 31, United States Code, is amended—

(1) by redesignating sections 3905 and 3906 as 3906 and 3907, respectively; and

(2) by adding at the end the following new section 3905:

"§ 3905. Payment clause for subcontracts under construction contracts

"(a) Each construction contract awarded by an agency shall include a clause that requires the prime contractor to include, in each subcontract for property or services entered into by the prime contractor and a subcontractor (including a material supplier) for the purpose of performing such con-

struction contract, a payment clause which obligates the prime contractor—

"(1) to pay the subcontractor promptly (as determined in accordance with prevailing industry standards) out of amounts paid to the prime contractor by the agency; and

"(2) to pay to the subcontractor an interest penalty on amounts due in the case of each payment not made in accordance with such payment clause—

"(A) for the period beginning on the day after the required payment date and ending on the date on which payment of the amount due is made; and

"(B) computed at the most current rate of interest that has been determined by the Secretary of the Treasury for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) and published by the Secretary in the Federal Register.

"(b) A prime contractor's obligation to pay an interest penalty to a subcontractor pursuant to the payment clause included in a subcontract under subsection (a) may not be construed to be an obligation of the United States. A contractor may not obtain reimbursement from the United States for such interest penalty. A contract modification may not be made for the purpose of providing reimbursement of such interest penalty. A cost reimbursement claim may not include any amount for reimbursement of such interest penalty.".

(b) The table of sections at the beginning of such chapter is amended by striking out the items relating to sections 3905 and 3906 and inserting in lieu thereof the following:

"3905. Payment clause for subcontracts under construction contracts.
"3906. Reports.
"3907. Relationship to other laws.".

LIMITATIONS ON DISCOUNT PAYMENTS

SEC. 8. Section 3904 of title 31, United States Code, is amended by inserting after the first sentence the following: "For the purpose of the preceding sentence, the specified time shall be calculated from the date the invoice under the contract is received by the office or employee of the agency designated by the agency to first receive such invoice until the date of payment.".

REPORTS

SEC. 9. Section 3905(a) of title 31, United States Code, is amended to read as follows:

"(a)(1) By the 60th day after the end of the fiscal year, the head of each agency shall submit to the Director of the Office of Management and Budget a report on the agency's payment practices, including a description of the extent to which those practices satisfy the requirements of this chapter.

"(2) In addition to such other information as may be required by the Director, the report required by paragraph (1) shall include—

"(A) the number, amounts, and frequency of interest penalty payments, and the reasons the interest penalties were not avoided by prompt payment; and

"(B) the number, dollar value, and frequency of invoices paid after the required payment date without payment of an interest penalty, and the reasons no obligation to pay interest penalties was incurred with respect to such invoices or no amount for interest penalties were included in the payments of such invoices.".

IMPLEMENTATION THROUGH THE FEDERAL ACQUISITION REGULATION

SEC. 10. (a) The Federal Acquisition Regulation shall be modified to provide appropriate solicitation provisions and contract clauses that implement chapter 39 of title 31, United States Code, and the regulations prescribed under section 3903 of such title.

(b) The solicitation provisions and contract clauses required by subsection (a) shall include the following matters:

(1) Authority for a contracting officer to specify for a contract or class of contracts a specific payment period, which—

(A) in the case of payments for commercial items or services, is similar to the payment period or periods permitted in prevailing private industry contracting practices;

(B) in the case of payments for noncommercial items and services, does not exceed 30 days unless the circumstances of the procurement action require a longer period for payment; and

(C) in the case of progress payments under construction contracts, does not exceed 7 days, unless the contracting officer determines that the prevailing practice in private construction contracts requires a longer payment period.

(2) Requirements to make periodic payments, in the case of a supply or service contract which authorizes periodic payments and periodic submission of invoices during the contract period, upon—

(A) submission of an invoice for supplies delivered or services performed during the contract period; and

(B) either—

(i) acceptance of the supplies or services by an employee of the contracting agency authorized to accept the supplies or services; or

(ii) certification, by such an employee, that the performance covered by the invoice conforms to the terms and conditions of the contract.

(3) A conclusive presumption that the Federal Government has accepted property or services by the fifth day after the date on which, in accordance with the terms and conditions of the contract, the property is delivered or final performance of the services is completed, unless the circumstances of the procurement require a longer period for acceptance by the Federal Government and such longer period is specified in the solicitation for such contract.

(4) The limitation that the Federal Government may take a discount offered by a contractor for early payment by the Federal Government only in accordance with the time limits specified by the contractor.

(5) The requirements of section 3902(c) of title 31, United States Code.

(c) The regulations required by subsection (a) shall be published as proposed regulations for public comment as provided in section 22 of the Office of Federal Procurement Policy Act (41 U.S.C. 420) within 120 days after the date of the enactment of this Act.

EFFECTIVE DATES

SEC. 11. (a) Section 3(a)(2) and the amendments made by sections 3(a)(1), 4, 5, 6, 7, and 8 shall apply to payments under contracts awarded during or after the first fiscal quarter which begins more than 90 days after the date of the enactment of this Act.

(b) The amendments made by section 3(b) shall apply to payments under contracts awarded on or after October 1, 1987.

(c) The amendment made by section 9 shall apply to the report required by section 3905(a) of title 31, United States Code, for each fiscal year beginning after September 30, 1986.

AMENDMENT NO. 3402

(Purpose: To make various amendments to requirements and procedures for prompt payment of Government contractors)

Mr. CHAFEE. Mr. President, I send an amendment to the desk on behalf of Senator ROTH, which is a committee substitute.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for Mr. ROTH, proposes an amendment numbered 3402.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, line 6, insert ", except section 3905 of this title," after "chapter".

On page 12, line 9, strike out "as" and all that follows through "Manual" on line 10.

On page 12, line 25, strike out "1988" and insert in lieu thereof "1989".

On page 13, line 14, strike out "and".

On page 13, line 16, strike out "15" and all that follows through line 17, and insert in lieu thereof "10 days after the date on which such payment is made; and".

On page 13, between lines 17 and 18, insert the following:

"(D) makes a written demand, not later than 40 days after the date on which such payment is made, that the agency shall pay such a penalty,

On page 16, line 8, strike out "agency;" and insert in lieu thereof "agency for work performed by the subcontractor under that contract;".

Mr. CHAFEE. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not the question is on agreeing to the amendment.

The amendment (No. 3402) was agreed to.

Mr. CHAFEE. Mr. President, I move adoption of the committee substitute, as amended.

The PRESIDING OFFICER. Is there further debate? Hearing none, the question is on agreeing to the committee substitute, as amended.

The committee amendment in the nature of a substitute, as amended was agreed to.

Mr. TRIBLE. Mr. President, I am pleased that the Senate is considering S. 2479, the Prompt Payment Act Amendments of 1986. I urge my colleagues to support its passage.

Forty-two Senators have joined me as cosponsors of S. 2479, designed to get the Government to pay its bills on time. With S. 2479, we take up where the Prompt Payment Act of 1982 left off—insisting on timeliness rather than redtape, efficiency instead of delay, and streamlined procedures rather than complicated layers of payment paperwork.

Slowly but surely, the Government is getting into the habit of paying its bills as our citizens must. Either payment must be made on time or interest penalties must be paid. With the Prompt Payment Act of 1982 (Public Law 97-177) we created a systematic payment procedure: Definite payment standards, penalties for failure, and annual reporting to Congress on progress under the act.

There remains a gap between what we did in 1982 and what the executive branch agencies are doing today. To close that gap, I sponsored S. 2479 and am asking the Senate to approve this measure in order to:

First. Reassert our intention that most bills be paid within 30 days.

Second. Ensure that no payments be deliberately held beyond 30 days without the payment of interest penalties.

Third. Discourage the withholding of interest payments mandated by the law.

Fourth. Ensure that discounts are taken fairly.

Fifth. Extend coverage of the standards in the act to late pay by the Postal Service.

Sixth. Include progress payments, retainage on construction projects, and partial payment for partial delivery among those payments covered by the act.

Seventh. Solve the problem of late payments to subcontractors.

Eighth. Insist that the law be implemented through the Federal Acquisition Regulation.

Ninth. Improve the reports Congress gets for oversight purposes.

Achieving these nine goals will enable us to fulfill the promise of the 1982 act.

While I am convinced that S. 2479 is needed, I want to underscore one point: The Federal Government's bill-paying practices have greatly improved under the 1982 act. This was documented recently by the General Accounting Office:

> Passage of the act and its implementation led to substantial improvement in Federal bill-paying performance. These initiatives resulted in a noticeable reduction in excessively late payments (over 60 days late) and hundreds of millions in savings to the Government by avoiding early payments.

The GAO is not alone in this assessment. When I conducted hearings on this subject on December 2, 1985, and on June 19, 1986, many witnesses commented on the progress to date. So, if Senators are wondering if the 1982 act is working, numerous individuals have stated that, in varying degrees, it is.

With enactment of S. 2479, the Prompt Payment Act can work more effectively. All the witnesses at those hearings described the inadequacies of current law, and eliminating those inadequacies is the goal of S. 2479. Take, for example, the frustration described by William Meuhleib, president, Federal Sales Service (Alexandria, VA) representing the Coalition for Multiple Award Contracts:

> Prior to the implementation of the Prompt Payment Act, the average paytime for Government accounts receivable was in the 68-day area. It took us 68 days to collect from the Federal Government. After the first full year of implementation of the Prompt Payment Act, that dropped from 68 to 66 days, and the following year it dropped to 65 days. However, for October 1985, which would have been the third full year, our accounts receivable is now back up to 67 days. We currently have in our files 328 letters that we have written to various activities requesting that interest be paid.

Or, consider the distress of Jack Greenhalgh who indicated that agencies often lose its invoices. When I asked him why they lost his invoices, he said:

> We don't know exactly. All we know is that when we follow up, receipt is not acknowledged. They respond that they have not received the invoice, and this happens frequently.

Donald H. Redman, chief executive officer, Federal Marketing (Richmond, VA), a division of Virginia Impression Products, broke down his billing to Federal agencies for the committee and said:

> And for a little company like Federal Marketing to have out $289,000 is pretty tough. It's pretty tough, Senator. That's with total receivables with the Federal Government of $1,387,000. So that's a lot of money.

Ironically, with the Government being late on 20 percent of his receivables, Mr. Redman is doing better than the average because the GAO found that, based on dollar volume, 23 percent of the Government's outstanding funds owed are being paid late—after the 45th day.

Mr. President, of the 623 pages of testimony compiled as a result of the hearings I chaired for the Senate Committee on Small Business, 73 pages contain examples of invoices which have been delayed and paid late by Federal agencies. Witness after witness provided the committee with detailed breakdowns of their accounts receivable indicating long delays in receipt of their payments and the poor governmental response to vendors who complain. Several witnesses said they had to hire employees who work full-time to get Federal agencies to pay their bills. Witnesses outlined the daily frustration they face as they endure late payment:

> The average number of days to collect is in the 60-90-day range. If we are able to accept the Government's reason, it is because all the parties involved have lost or failed to route the paperwork properly. Interestingly, they seem to misplace 75 percent of our invoices, and as a result need retyped originals. Douglas D. Guernsey, Guernsey Office Products (Virginia Beach, VA).

> We are practically to the point now where we tie in submission of an invoice to a dispute under the Disputes Act because some of them we know that we had just as well start the clock running there, because otherwise we are not going to ever get paid because they take 60 days to make a decision on the claim itself. T.L. Richards, director of contracts and corporate counsel, Inter Systems (Annandale, VA).

One of the first individuals to suggest to me that prompt pay reforms were needed was R. Alan Fuentes, president of Computer Dynamics (Virginia Beach, VA), who testified that ". . . We paid out last year in interest to finance the Federal Government amounted to somewhere close to $150,000 for the year. If we could get paid, if we were paid reasonably quickly, and I am talking 30 days, we wouldn't have that problem." Mr. Fuentes provided the committee with eight pages of documentation, showing late payments received by his company under 238 different invoices. Agencies mentioned in his testimony included the U.S. Navy, General Services Administration, Federal Aviation Administration, Federal Highway Administration, Department of State, and the Health Care Financing Agency.

Another indication that the problem is widespread and not merely isolated among a few agencies is the fact that at the Virginia State meeting of the White House Conference delegates in August 1985, improvement of the Prompt Payment Act was one of the top three procurement issues selected by delegates from all over Virginia. In the months that followed, delegates in many other States made the same recommendation. We are being told by small firms from all 50 States that they want us to find a solution. Mr. President, I believe we have the solution in S. 2479.

Let me outline the goals of S. 2479.

First. It will eliminate the lengthy periods agencies take to "receive", "accept," and "certify" products and services. The authors of the 1982 act did not anticipate the extraordinary delays the executive agencies would impose before they admit to having received or accepted a product or service. For Federal agencies, 30 days means 30 days—after processing of paperwork begins—which might take months. In S. 2479, we establish that this process should not take longer than 5 days, unless the contract specifies a longer period. This 5-day rule must be established by Congress, as we are doing in S. 2479.

Second. It will ensure that no payments be deliberately held beyond the due date without payment of interest penalties. The 1982 law clearly states that Congress expects payments to be made by set statutory standards, unless otherwise established by contract. However, the GAO report and witnesses before our committee demonstrate that incentives are needed to press the agencies to reach statutory standards. That is why in S. 2479 we are phasing out the grace periods

which give agencies the technical authority to pay later than the standards without penalty. There has been far too much of the grace periods.

Rather than an option of last resort, it has become the loophole of choice. Through S. 2479, we are correcting this problem and restoring the intent of congress in a way that can only be achieved through legislation.

Third. It will discourage the withholding of interest payments mandated by the law. Many agencies fail to pay the interest penalties which are required by law. Therefore, we have added an extra penalty in S. 2479 to improve the incentive to get the job done.

Fourth. It will ensure that discounts are taken fairly. S. 2479 strengthens the language to ensure that discounts are taken only when payments are made within a specified time. This provision in S. 2479 will give OMB more clout to encourage the agencies to comply with the 1982 act.

Fifth. It will extend the act to cover late payments by the postal service. Leaving out the Postal Service from the 1982 act was an oversight which we are correcting in S. 2479. We do not intend to impose more reporting requirements on the Postal Service, but we do want to insist on prompt pay.

Sixth. It will solve the problem of late payments to subcontractors. This is a sensitive matter which Congress should watch carefully in the future to ensure that our goals are met.

Seventh. It will insist that the law be implemented by the Federal Acquisition Regulation. It is interesting to note that shortly after we introduced S. 2479, the executive branch quickly compiled a proposed far provision on prompt pay and rushed it into the Federal Register. This action was several years late and appears to have been encouraged by congressional prodding. When we read the proposed FAR rules, however, instead of seeing a mirror image of the Prompt Payment Act of 1982, we saw myriad loopholes and exceptions that will increase delay and despair for thousands of small businesses. Businesses in Virginia were shocked by the FAR proposals. by enacting S. 2479, we insist that the job be done right.

Eighth. It will improve the reports Congress gets for oversight purposes. getting a thorough annual prompt pay report is a key to ensuring compliance with the 1982 act. Only through S. 2479 can we insist on getting the data we need to obtain proper oversight. For 3 years, we have received glowing reports from OMB indicating that 99 percent of the Government's bills are paid on time. It appeared that we were achieving outstanding results from the 1982 act. GAO told us this summer however, that only 75 percent of the Government's bills are paid on time. Studying the GAO report reveals exactly how this discrepancy occurred: Congress was not getting the right data. We correct this in S. 2479.

Mr. President, before I conclude, I would like to express my opposition to several recent actions among the executive agencies which indicate to me they have strayed far from the intent of Congress when it comes to prompt pay:

First, the proposed regulations appearing in the Federal Register to apply prompt pay provisions to the Federal Acquisition Regulation has badly missed the mark. The Coalition for Prompt Pay has identified 19 different exceptions the FAR proposal has made to the Prompt Payment Act. One would allow agencies to take up to 80 days to pay bills that the act and S. 2479 say should be paid in 30–35 days.

I know many Senators will join me in urging the FAR Secretariat to rewrite the proposal to make it consistent with the Prompt Payment Act. The FAR Secretariat would do well to read the testimony before the Small Business Committee on S. 2479 and to incorporate into the FAR the proposals made in S. 2479. To do less, would be to undermine the 1982 act.

Second, the decision by the Agriculture Department to suspend the application of the act to meat purchases should be withdrawn. There simply is no provision in the act, nor is there in S. 2479, to encourage any agency to exempt itself from the law. The Agriculture Department petitioned neither the Small Business Committee nor the Governmental Affairs Committee for an exception to the law. Therefore, they should obey it. I hope the Office of Management and Budget will join us in underscoring this point to the Agriculture Department.

Third, the proposal by the Defense Department, as described at a Defense Appropriation Subcommittee hearing August 7 to arbitrarily begin to use the 15-day grace period in the act for all payments is quite contrary to the intent of the law. While DOD is moving into the 15-day grace period with the enthusiasm of someone who has just found a way to beat the bank, S. 2479 will limit use of the grace period. Most witnesses testified that the grace period is being abused. The recent GAO study documents this point.

DOD's proposal seems to confirm the allegations and convinces me we need to eliminate the grace period as proposed by S. 2479.

Mr. President, many people were involved in the development of this measure and I appreciate their fine work. Senator COHEN's efforts on behalf of S. 2479, and the work of his Oversight Subcommittee staff, particularly Jeff Minsky, were extremely helpful in crafting the prompt payment amendments. In addition, I want to thank Senator ROTH for convening the Government Affairs Committee to win approval of S. 2479 before the end of the 99th Congress. Both Senator COHEN and Senator ROTH were cosponsors of the Senate version of the act in 1982 and are keenly aware of the need to close the late-payment gap as proposed by S. 2479.

In addition, I want to thank two other original cosponsors of this bill, Senator WEICKER and Senator BUMPERS for their leadership on this issue and their assistance through the Small Business Committee. I also want to acknowledge the hard work of Bill Montalto of the Small Business Committee. His knowledge of the prompt payment issue greatly aided the development of the prompt payment amendments.

Finally, I want to express my thanks to Lori Beth Feld of my staff. Her hard work was instrumental in development of this important legislation.

Mr. President, I ask unanimous consent that the following be inserted into the RECORD:

A list of cosponsors of S. 2479.

A letter from Kenton Pattie, director of the Coalition for Prompt Pay and senior staff vice president of the International Communications Industries Association.

A letter from Yvonne Kidd, executive director of the Coalition for Common Sense in Government Procurement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COSPONSORS

Senators Lowell P. Weicker, Jr., Dale Bumpers, John C. Danforth, Lawton Chiles, Warren B. Rudman, Carl M. Levin, Thad Cochran, James R. Sasser, Mack Mattingly, Alan J. Dixon, Don Nickles, Sam Nunn, Alfonse M. D'Amato, Max Baucus.

Senators Charles E. Grassley, Tom Harkin, John F. Kerry, Edward Zorinsky, Daniel P. Moynihan, David L. Boren, John Melcher, John Heinz, Jeremiah A. Denton, Bob Kasten, Jr., David Pryor, Robert T. Stafford, Thomas F. Eagleton, Claiborne Pell.

Senators Mark Andrews, Donald W. Riegle, Jr., Ernest F. Hollings, Chic Hecht, Malcolm Wallop, Quentin N. Burdick, Spark M. Matsunaga, Ted Stevens, William S. Cohen, David Durenberger, Dan Quayle, John H. Glenn, Jr., Albert Gore, Jr., and William V. Roth, Jr.

COALITION FOR
PROMPT PAY,
October 3, 1986.

Hon. PAUL TRIBLE,
Senate Hart Office Building,
Washington, DC.

DEAR SENATOR TRIBLE: On behalf of the Coalition for Prompt Pay, I am pleased to report that the Coalition is in full support of the Prompt Payment Act Amendments, S. 2479, in the form in which the bill was approved by the Senate Governmental Affairs Committee.

We have reviewed the changes made by the Oversight Subcommittee and by the Governmental Affairs Committee during its

markup October 2nd. We believe the bill you introduced, with Senator Weicker and Senator Bumpers, has survived intact in most respects with some important strengthening on some points. Here are our views on the recent changes to S. 2479.

THE SUBCONTRACTOR AMENDMENT

We have carefully reviewed the changes that have been approved to the subcontractor provision and I believe a fair and long-needed solution is now contained in S. 2479. Over the years, we have struggled with complaints from subcontractors who fulfill numerous Federal requirements while performing on Federal property under Federal contracts which require that much of the prime contract be subcontracted. Complaints about late pay have been frustrating because, until S. 2479 there was no reasonable remedy available. Having tried to work out the problem through the prime contractor, the subcontractor had no rules to turn to and certainly no one in the Federal government who would lift a hand to solve the problem.

S. 2479, without adding any expense to the Federal government, and without giving the Federal government new enforcement powers, established the rules for passing through to subcontractors payments that are initially issued to the prime contractor. No special privilege is being established here because unlike a company which deals directly with the Federal government and thus expects payment in 30 days, the subcontractor—living with the fact that the payment has to be processed by the prime contractor—has to adapt to a 37-day standard (30 days for the prime contractor to get the money and 7 days for the prime to reissue the funds to the subcontractor).

The subcontractor provision in S. 2479, based as it is on the accepted industry standard approved by the Associated General Contractors, the American Subcontractors Association, and other organizations in the construction business, is fair to all parties and will have the effect of encouraging small businesses to participate in Federal construction projects knowing they will be paid for their work in a prompt and reliable fashion.

INTEREST PENALTIES

Language in S. 2479 clarifying the method of obtaining a penalty due when an agency deliberately withholds interest is acceptable to the Coalition. The language in S. 2479, with the clarification, will discourage any agency from deliberately withholding the payment and interest penalty in hope that the vendor might overlook its absence. As long as threat of the double interest penalty is there, as proposed by S. 2479, I believe we will see more adherence to the 1982 law which requires payment of late payment interest penalties at the same time principal is being issued.

U.S. POSTAL SERVICE

Language clarifying the relationship between the U.S. Postal Service and the Office of Management and Budget is acceptable to the Coalition. We have had numerous complaints about late pay by the Postal Service and are very pleased that S. 2479 extends coverage of the 1982 Act to the Postal Service. However, we understand the concern expressed by Senator Stevens calling for a continued separation of the Postal Service from the Federal government, and thus we find acceptable Senator Steven's amendment to exempt the Postal Service from the reporting requirements of the bill. While they need not report to OMB they would still be required to fulfill the 30-day standard and penalties established by the 1982 Act and S. 2479. This is fair.

PHASING OUT THE GRACE PERIOD

The language setting the date for finally eliminating the 15-day grace period is acceptable to the Coalition. We believe the Senate is being extraordinarily generous to the executive branch by giving them more than adequate time to make the final adjustment to the 30-day standard. By the time the provisions of S. 2479 become law, the executive branch will have had approximately seven years from the date of enactment in 1982 to get ready for the 30-day standard. We are convinced that they could in fact make the adjustment far sooner. Based on statistics in a recent General Accounting Office report, 75 percent of all payments are already made within the 30-day standard which indicates that the executive branch has the technical ability to pay on time and will be able to comply with the requirements in S. 2479 in whatever year you set as the deadline. Senator, we are pleased to report that the bill was very ably presented to the full committee by Senator Cohen who worked hard to compose the final compromises and adjustments with the help of his subcommittee and staff member Jeff Minsky. Senator Cohen and the Oversight Subcommittee accepted almost all of the provisions you had recommended and by the time he brought the bill to the full committee it had been strengthened by the final agreement on subcontractor language.

We admire the leadership Senator Roth provided by convening the Governmental Affairs Committee to mark-up your bill, despite the busy end-of-the-session workload which made attendance for all the senators difficult and challenging. To make the needed quorum for S. 2479 and to vote for the bill, we are grateful to Senator Roth, Senator Eagleton, Senator Stevens, Senator Cohen, Senator Rudman, Senator Cochran, Senator Chiles and Senator Nunn. They spoke for the entire committee, almost every member of which was a cosponsor of S. 2479.

S. 2479 was approved unanimously by the committee having won the cosponsorship of 41 senators prior to passage. Chairman Roth thoughtfully announced he too would be a cosponsor of your bill.

Senator, we are very pleased you are taking S. 2479 to the Senate floor. While we know this is a busy time for you, we believe there are several important reasons Senate passage of this bill is extremely important and urgent:

1. *80 days is too much.* A proposed change in the Federal Acquisition Regulations would cull out 19 loopholes in the 1982 Act and convert the statutory 30-day payment standard into an 80-day standard. In contrast, S. 2479 reaffirms the Senate's commitment to the 30-day standard and should be read by the authors of the proposed FAR amendment that 80 days is unacceptable.

2. *An end to the loopholes:* The proposed FAR amendment, veering far from the 1982 Act, undermines the intent of Congress in 19 ways. In contrast S. 2479 is a no-loophole bill which underscores the Senate's intention that the 1982 Act be a no-loophole law. Rather than finding loopholes, we would rather see the executive branch finding ways to be more efficient and reliable in their payment practices. S. 2479 calls for no less than an overall improvement and offers neither a loophole nor an excuse for making late payments.

3. *No self-proclaimed exemptions:* While the Agriculture Department has claimed it has the power to exempt certain of its payment practices from coverage of the 1982 Act, neither the Act nor S. 2479 offers any legal basis for such an exemption. In contrast, public consideration of S. 2479 throughout 1986 has given any agency any opportunity to seek a special exemption under the law. No exemption has been sought and no exemption is being granted by S. 2479. Neither the Office of Management and Budget, empowered to issue regulations under the 1982 Act, nor Congress has granted authority to any agency to arbitrarily suspend the application of the 1982 Act. Senate passage of S. 2479 should signal the Agriculture Department, and any other agency contemplating a similar move that the Senate is opposed to self-proclaimed exceptions but instead is insistent that agencies comply with the intent of the 1982 Act.

4. *Abusing the grace period doesn't have a prayer.* The Department of Defense proposes to begin making all its payments after the 30-day grace deadline set by the 1982 Act. In an August 7th, 1986 announcement before the Senate Defense Appropriations Subcommittee, the Department outlined a program of being deliberately late on all payments. The 1982 Act does allow, under very limited and unique circumstances some payments to be mailed after the 30-day deadline but no later than the 45th day. However, the 1982 Act makes it very clear that the Federal policy is for all payments to be made by the 30th day. This extra period, referred to as the "grace period" was never in the Senate version of the 1982 Act but was added in the House at the request fo the Defense Department. At the time the Department said they needed some extra time as a buffer to take care of situations caused by the transition period and by unusual problems that might inadvertently cause an occasional slippage past the 30-day mark.

The August 7th 15-day buffer period proposal indicates that the 1982 provision in the law was just a toe hold for a big loophole in 1986. What was to be the exception in 1982 could become the rule in 1986.

In passing S. 2479, the Senate is offering not the slightest encouragement to any agency which may view the 15-day buffer period as a loophole to justify late payments. S. 2479 deals directly with this problem in the only sensible way: to gradually eliminate the buffer period.

So, passage of S. 2479 should be received at DOD as a signal that delaying payments regularly into the buffer period neither has a prayer nor is it consistent with the intent clearly spelled out by Congress in 1982.

Senator Trible, I want to say how much we admire the determined and sensible way in which you have pursued this problem. You devoted a whole day to a field hearing in Norfolk and generously heard a representative sample of Virginia small businesses experiencing late pay. The same hearing could have been held in many other parts of the country, with similar results. In fact, the Virginia businesspeople experienced late payments being issued by payment offices which serve thousands of companies in many other states.

Then, you held a hearing in Washington at which time you generously devoted a day to hearing the problems as related by national associations and the small businesses they present. It was an honor to represent the Coalition at these hearings.

You listened carefully, and along with your staff member, Lori Beth Feld, you developed a sensible and responsible answer to what you had been hearing. You have earned the deepest appreciation of hundreds of small businesses in Virginia and thousands around the country who admire your leadership on the prompt pay issue.

Senator, we appreciate your bringing this important legislation to the Senate floor and we wish you every success in convincing the Senate to adopt S. 2479 over which you have labored so long.

Sincerely,

KENTON PATTIE,
Director of the Coalition for Prompt Pay and Senior Vice President of the International Communications Industries Association.

Re: S. 2479, Prompt Payment Amendments to the Prompt Payment Act of 1982.

Hon. PAUL S. TRIBLE, Jr.,
Senate Small Business Committee, Russell Senate Office Bldg., Washington, DC.
Attn: Lori Beth Feld

DEAR SENATOR TRIBLE: On behalf of the Coalition for Common Sense in Government Procurement, I wish to express our full support for passage of S. 2479, the Prompt Payment Act Amendments bill.

We have reviewed the bill, including the subcontractor provision, as reported by the Senate Government Affairs Committee on October 2. On balance, we feel that passage of the complete bill before Congress recesses in October is urgently needed to warn the executive branch against its current efforts to gut the 1982 Act. As you know, these efforts include:

The July 17 proposed FAR amendment that would lengthen the current standard for payment from 30 days to 80 days.

The Department of Agriculture's refusal to pay promptly on meat purchases, with the argument that individual agencies are free to suspend the Act altogether when it suits their purposes to do so.

A Department of Defense plan to stretch all payments 10-14 days beyond the statutory 30-day deadline.

Senator Trible, the Coalition congratulates you for your role in sponsoring and crafting a well-balanced Prompt Pay Amendments bill that corrects, to the greatest extent feasible, the problems associated with the 1982 Act. We urge you to push for passage of this bill before Congress adjourns, and stand ready to support your effort in any way possible.

Sincerely,

YVONNE KIDD,
Executive Director.

Mr. COHEN. Mr. President, today I rise in support of S. 2479, the Prompt Pay Amendments of 1986, which is designed to close loopholes in and improve the implementation of the original Prompt Pay Act.

S. 2479 was introduced in May of this year and approved unanimously, with an amendment in the nature of a substitute, by the Governmental Affairs Committee in October. This legislation currently has over 40 cosponsors and is strongly supported by

prime contractor and subcontractor groups alike.

I'd like to commend Senator TRIBLE, sponsor of the legislation, for taking this important initiative, as well as the Small Business Committee, which has developed an extensive hearing record to support the need for the legislation.

By way of background, Mr. President, the Prompt Payment Act of 1982 was enacted to ensure that businesses dealing with the Government are paid in a timely manner and, if not, are paid interest on the overdue amounts. The act, for the first time, established statutory payment terms that generally require an agency to pay a prime contractor within 30 days after receipt of a proper invoice.

If timely payments are not made, the agency is required under the act to pay the contractor interest on the late payment. The interest rate is set by the Department of Treasury twice a year and is paid out of the funds for the program which incurred the interest penalty.

The act also provided a 15-day grace period for the Government in paying its bills to avoid the potential administrative problem of incurring small interest penalties. Under the act, if payment is made during this grace period, and interest penalty is not imposed. If, however, payment is not made by the expiration of the grace period, the interest penalty accrues from the payment due date.

While this law has unquestionably improved the timeliness of the Government's bill paying, implementation of the act has resulted in several problems that require resolution. Witnesses testifying before both the Senate Small Business Committee and the House Government Operations Committee stated that the following problems continue to plague Federal pay practices.

First, agencies still pay nearly 25 percent of their bills after the due date. Second, agencies frequently fail to pay the interest penalty on late payments. Third, agencies often abuse the intent of establishing a grace period by routinely paying invoices within this extended period. Fourth, agencies take discounts offered by contractors for fast payment, although actual payment is made after expiration of the specified discount period. And, finally, agencies inform contractors, who inquire about the nonpayment of interest owed, that a written demand for the interest is required. Some agencies, in fact, have a policy not to pay interest owed unless asked.

According to the Office of Management and Budget, over 99 percent of the Government's bills are now paid on time. Contrary to OMB's assessment, however, the General Accounting Office states unequivocally in an August 1986 report that this is not an accurate assessment. OMB's 99 percent success rate, according to the GAO, is premised on the belief that any payments that did not include interest penalties had been paid on time regardless of whether payment occurred by the due date. OMB's figures, therefore, include payments made on time, those made during the grace period, and late payments in which penalties were owed but not paid.

The GAO concludes in its report that OMB's annual performance reports under the act have been misleading, thereby not highlighting the need for corrective action.

In testimony before the Senate and House committees, the OMB acknowledged that problems exist in the implementation of the Prompt Payment Act, but stated its preference to remedy these problems administratively rather than through legislation. The proposed administrative steps taken thus far, however, have been inadequate. In particular, the proposed changes to the Federal acquisition regulation issued in July stipulate that agencies would generally have a maximum of 75 days to make payment—consisting of a 30-day acceptance term, a 30-day payment term, and a 15-day grace period—before a contractor would be entitled to any later payment interest penalty.

These proposed regulations would clearly extend, rather than limit, the payment term prescribed under the act and consequently exacerbate, rather than remedy, the problems identified with implementation of the act.

In light of the inadequate administrative action taken to date to address the implementation problems, I agree with Senator TRIBLE that legislation is necessary. Even if the proposed administrative action were consistent with legislative objectives, legislation is nonetheless needed, in my judgment, to codify this action to ensure continued and effective implementation.

As chairman of the Governmental Affairs Oversight Subcommittee, which has jurisdiction over S. 2479, I reviewed the extensive hearing records developed by the Small Business Committee and worked closely with Senator TRIBLE in perfecting his legislation. My subcommittee unanimously reported a substitute to S. 2479 that preserves the majority of Senator TRIBLE's original proposal, but revises it to address additional problems and recommendations brought out in the testimony.

The Trible-Cohen substitute, which is before us today, proposes the following changes to the Prompt Pay Act. First, it revises the receipt of invoice trigger to clarify when the prompt payment term starts. Second, it reduces the grace period, within which agencies are permitted to make payment, from 15 to 8 days and subsequently eliminates it altogether. Third, it requires that interest, when due, must be paid automatically without regard to whether the contractor has requested payment of such penalty. Fourth, it entitles a contractor, when an interest penalty is due but not paid, to double interest payments. Fifth, it clarifies that the act applies to progress payments and retained amounts for construction contracts. And, finally, it expands application of the act to include subcontracts under construction contracts.

This last provision is of particular interest to subcontractors who, like prime contractors, want to be paid promptly when working on Federal contracts. For this reason, the committee substitute to S. 2479, which originally did not cover subcontractors, requires that prime contractors must pay their subcontractors in accordance with prevailing industry standards and pay a specified interest penalty when prompt payment is not made.

Mr. TRIBLE. Would the Senator yield for a question? This provision, as you've mentioned, is quite important to the subcontractors. I would ask the senior Senator from Maine to clarify your intent in requiring prime contractors to pay their subcontractors in accordance with prevailing industry standards.

Mr. COHEN. The prevailing industry standards are intended to reflect current industry practices—agreed to in a joint policy statement by the Associated General Contractors, the American Subcontractors Association, and the Associated Specialty Contractors—requiring payment to subcontractors within 7 days after the prime contractor has been paid.

Mr. TRIBLE. I thank my colleague for that clarification and again commend him for his contribution to the legislation, particularly in the area of subcontractor coverage.

Mr. COHEN. In closing, Mr. President, I believe this legislation goes a long way toward improving the Government's bill-paying practices, and urge my colleagues to lend their support.

Mr. ROTH. Mr. President, I rise in support of S. 2479, a bill to amend the Prompt Payment Act of 1982, Public Law 97-177. I am a cosponsor of this legislation, which was approved by the Governmental Affairs Committee last week. I want to commend Senator TRIBLE and Senator COHEN for the work they have done to formulate and advance this proposal. I urge the Senate to approve this measure which is so important to small businesses all across the Nation.

The original Prompt Payment Act was reported by the Committee on Governmental Affairs and enacted in 1982 in response to widely recognized problems in Federal Government pay

practices. The General Accounting Office reported in 1978 that the Federal Government did not pay its bills in a uniform manner. Many bills were paid either too early or too late. Sometimes bills were paid without regard to contract terms, the effect on vendors' cash flow, or Government interest costs. Before passage of this act, only 61 percent of the Government's bills were paid within 30 days, a situation that created a particular hardship for small businesses.

By all available evidence, the Prompt Payment Act has substantially improved the bill paying practices of Federal departments and agencies. The GAO has reported that implementation of the act has resulted in a noticeable reduction in excessively late payments. A GAO report released just last week estimated that 24 percent of Federal vendor payments were made after the due date during a 4-month test period. While the Office of Management and Budget's [OMB] recent estimate of 99 percent agency compliance with the provisions of the act is overstated, it is indicative of the improvements that the 1982 legislation has brought about.

Mr. President, I think it is interesting to note that following the passage of the Prompt Payment Act of 1982, many States have taken similar action based on the Federal statute. In fact, 44 States now have prompt payment laws. Many of these State statutes are modeled after the 1982 Federal law. Clearly prompt pay is a constructive approach, applicable throughout our intergovernmental system. For example, my home State of Delaware enacted prompt pay legislation in 1983, participating in a national movement at the State level to implement the prompt pay principles encompassed in the 1982 Federal law.

Despite the increase in timely payments on the part of the Federal agencies, however, problems still exist. Hearing evidence indicates that Federal agencies continue to pay nearly 25 percent of their bills after the due date and often fail to pay the interest penalty for payments made beyond the date required in the contract or in the act. Certain agencies also abuse the 15-day grace period contained in the act by routinely paying invoices between the 8th and 14th days of this extended period.

S. 2479 addresses these and other problems. It closes several loopholes in the provisions of the original act. And it sends a clear message to the OMB and the agencies that the Senate is adamant in its desire that the provisions of the Prompt Payment Act be complied with both in letter and in spirit. Specifically, the bill revises the receipt of invoice" trigger to clarify when the 30-day payment term starts. It reduces the grace period from 15 days to 8 days, and subsequently eliminates the grace period. The legislation requires that interest, when due, must be paid automatically without regard to whether the contractor has requested payment of the penalty. It also entitles a contractor, when an interest penalty is due but not paid, to double interest payments after a 10-day period.

The bill expands the act to include subcontracts on construction projects by requiring that contracts between prime and subcontractors include a prompt payment requirement as well as an interest penalty clause. Additionally, the bill prohibits the government from taking early payment discounts unless the agency complies with the early payment terms.

Mr. President, a number of technical concerns that arose following committee action on this proposal need to be addressed. I ask that these amendments be considered in block and be accepted by unanimous consent. The nature of these amendments is quite straightforward. The first amendment exempts the Postal Service from the reporting requirements of the Prompt Payment Act as amended. The purpose of this change is to preserve the independence of the Postal Service from direct OMB oversight. Since passage of the 1982 act, the Postal Service has made a concerted effort to pursue the goals of this legislation.

The second amendment revises the date for elimination of the grace period for late payments from the agencies. That date is moved from October 1, 1988, to October 1, 1989 to provide the agencies at least 2 years to adjust their systems for prompt payments without the current grace period.

The amendments also address the circumstances under which Federal agencies must make a double interest penalty payment to a contractor by stipulating that a double interest penalty is due when the interest penalty is not paid by an agency within 10 days after the date on which the payment is made. This is a change from the initial requirement for the double payment 15 days after the date on which the interest penalty became due. This provision of the bill is changed also to State that a business concern, to be eligible for the double interest penalty payment, must make a written demand for such payment not later than 40 days after the due date on which the payment is made. These changes are intended to clarify the date on which a business can first make a claim for a double interest penalty and to ensure that if such claim is to be made, it is requested in a timely manner.

The final change amends the section dealing with payment for subcontracts under construction contracts to stipulate that these funds be taken from the amounts paid to the prime contractor by an agency for work performed by the subcontractor under that contract.

Consideration also was given to an amendment to address the need for a minimum interest penalty higher than $1 as currently provided in S. 2479. We will return to this issue at a later date when more complete information is available on the number and amount of late payments and interest penalties made under these provisions. Such information will better enable us to determine the appropriate level for such a minimum penalty provision.

Mr. President, the provisions of the Prompt Pay Amendments of 1986 clearly indicate that the Senate will tolerate no administrative actions that undercut the Prompt Payment Act. This act is very important to business, especially small businesses, doing work for the Federal Government. Small firms typically operate on narrow margins and are especially jeopardized when any customer does not pay in a timely fashion. Time and energy is needlessly wasted as these contractors attempt to get moneys due them under Federal contracts. And when payments are finally made, they often fail to include interest as required by law or use a discount rate no longer applicable. The discipline imposed on the Federal Government's pay practices by the legislation before us today is crucial to the financial well-being of our Nation's small firms.

As we all know, small businesses are a primary source of the innovation, research, and development that stimulate our economy. Small businesses generate millions of new jobs each year, employing so many of our fellow citizens. By contributing to such characteristics as independence and entrepreneurship, small businesses nurture and sustain the most basic American values.

Mr. President, this legislation will assure that these firms are treated fairly in their dealings with the Federal Government. It is a step we must take, and one I am proud to support.

Mr. President, I ask unanimous consent that attached statements be printed in the RECORD, and that the sectional analysis of the bill and amended version of the bill be printed in the RECORD in full.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF PROVISIONS AND STATEMENTS OF CONGRESSIONAL INTENT

SECTION 1. SHORT TITLE

This section establishes the bill's citation as the "Prompt Payment Act Amendments of 1986."

SECTION 2. CONGRESSIONAL FINDINGS

This section enunciates a series of congressional findings based upon the three fiscal years of experience with Federal agency billpaying practices since the

Prompt Payment Act became effective on October 1, 1982. The first congressional findings is that the Prompt Payment Act has substantially improved the billpaying practices of the Federal agencies. This improvement in timely bill paying has resulted in fairer treatment of the thousands of contractors who furnish supplies, services, or construction to the Federal Government. The general success of the Prompt Payment Act has been particularly important to small business government contractors who are especially sensitive to cash flow from their customers. The succeeding paragraph of this Section summarizes the specific problems that have been identified. Remedies to these implementation problems are set forth in the subsequent sections of the bill.

SECTION 3. DEFINITIONS AND APPLICATION

Subsection (a) of this Section amends the Prompt Payment Act by requiring a clearer definition of the starting point for the time period during which an agency is required to effect payment. The length of time for payment is prescribed by either the contract's specific payment provision or in accordance with the Act's standards, in the absence of such a specific contractual payment term. Under the Prompt Payment Act, the starting point for the "payment clock" is the later of the receipt of a proper invoice by the designated payment office or the date the supplies, services or construction were formally accepted by the Federal agency. Acceptance in government contract practice is distinct from simple delivery of supplies or the completion of the performance of a service. Under the Federal Acquisition Regulation (FAR), acceptance constitutes acknowledgement by the Government that the supplies or services (including construction) conform with the requirements of the contract; it is the point at which title passes to the Government. Given that the time of acceptance is solely in the hands of the Federal agency, the agencies are also in control of the starting point of the payment clock.

For example, a contractor makes a timely delivery of supplies specified by its contract to the designated delivery point on June 1st, concurrently furnishing a proper invoice to the designated payment office. The agency formally accepts the supplies on July 31st, some 60 days later. Payment is made on August 30th, within 30 days of acceptance, but 90 days after delivery of the required supplies and the proper invoice. Under the terms of Prompt Payment Act, and current agency practice, the contractor would not be entitled to any interest penalty. Section 3(a) of the bill amends the acceptance provision of the Act by specifying that acceptance is deemd to have been accomplished 5 days after delivery (or final performance of a service, including construction), unless the contract specifies a longer period for acceptance. This amendment preserves the Government's right to assure itself adequate time to accomplish acceptance, but also assures that it will inform the contractor of acceptance periods exceeding five days when the contractor is seeking to compete for the contract rather than when he or she is seeking to get paid for work completed. In implementing this provision in the FAR, contracting officers should be accorded the flexibility to prescribe an acceptance period that comports with the subject matter of the contract. For example, commercial items should require a shorter acceptance period than items fabricated to a Government design specification not subject to inspection prior to shipment. Since acceptance time periods will now have to be announced in the contract solicitation, permitting competing contractors to adjust their prices to account for the financing costs associated with exceptionally long acceptance periods, the implementing procurement regulations should strongly encourage that acceptance periods be kept to the minimum required based on experience.

Finally, it is emphasized that the amendment does not compel the Government to pay for supplies or services (including construction) that it has not had the opportunity to inspect and accept. Rather, it merely lifts the financial burden of unexpected Government delay from the contractor by requiring the payment of interest. Payment of the contract price, and any accrued interest penalties, will only be payable after acceptance (if a proper invoice has been received).

During Subcommittee consideration, a further amendment to 31 U.S.C. 3901(a)(4)(A) was made to reflect that the "payment clock" is triggered when a proper invoice is received by the office or employee of the buying agency designated by the agency to first receive the invoice. Several commentators on the bill noted that under the Act's current language a contract might require an invoice to be first sent to a contracting officer's technical representative (COTR) or auditing activity rather than to the designated payment office which will subsequently be responsible for actually issuing the payment. Some agencies refuse to recognize the start of the "payment clock" until the invoice is received by the payment office. The time an invoice is in the hands of these other designated agency players, is not counted for the purpose of establishing whether timely payment has been made or a late payment interest penalty is due to the contractor. The amendment requires the agency to start counting from the time it first received a proper invoice.

Subsection (b) of this Section amends the Prompt Payment Act to explicitly cover the United States Postal Service (USPS). It was intent of the sponsors of the legislation that became the Prompt Payment Act (S. 1131 and H.R. 4709 in the 97th Congress) that the USPS be covered by the Act's provisions. To attain that objective, the board definition of "agency" found at Section 551(1) of Title 5 was used. However, a required amendment to the USPS's organic statute was not made. This amendment corrects that oversight. The Committee is informed that the USPS has generally adjusted its billpaying procedures and practices to comport with the Act's standards, but the proposed amendment would statutorily assure USPS contractors the same protections accorded to contractors dealing with the departments and agencies of the Executive Branch. It should be noted that the amendment reserves to the Postmaster General the authority to implement the Act through the USPS's own procurement regulations.

The Subsection has been further modified to exempt the USPS from reporting its compliance with the Act to the Office of Management and Budget, in recognition of its independent status. Nevertheless, the USPS is still required to maintain its own data concerning its bill paying performance in furtherance of effective cash management and to permit appropriate oversight by USPS senior management as well as the Congress.

SECTION 4. INTEREST PENALTIES: REDUCTIONS IN GRACE PERIOD; INCREASED PENALTIES

Subsection (a) of this Section would gradually eliminate the Prompt Payment Act's current 15-day "grace period", during which any agency may pay a bill late without incurring any interest penalty. For example, if payment for a routine commercial item is due in 30 days, the buying agency can now pay anytime up to the 45th day without incurring any interest penalty for the late payment. The Act's "grace periods" were included in the Act from the House bill (H.R. 4709) at the request of the Administration. The justification for the "grace periods" was grounded in the argument that some mechanism was essential to protect the Government from the substantial administrative burden and expense anticipated from having to pay tens of thousands of small interest penalties while the agencies adjusted their billpaying systems to the Act's standards—the anticipated result given the Government's dismal billpaying record at the time of enactment. Given that the Act provided almost six-months for agencies to expect an adjustment to their billpaying procedures and became effective at the beginning of a new fiscal year (October 1, 1982), agency transition to the Act's requirements was accomplished with substantially less trauma than predicted. OMB's first report to the Congress in February of 1984 emphasized this effective agency implementation.

Testimony from witnesses representing small business government contractors called for the immediate elimination of the 15-day grace period noting that the substantial improvements in agency billpaying practices being reported by OMB during the first three fiscal years of experience under the Act virtually eliminated the basic rationale for the grace period. Rather, these witnesses characterized the grace period as an interest-free loan taken from the pockets of those dealing with the Government that is readily and frequently abused by buying agencies. Rather than eliminate the 15-day grace period immediately, the bill initially reduces it to 7 days, deferring elimination until October 1, 1988. This was further extended to October 1, 1989 during floor consideration of the bill. This very gradual elimination of the 15-day grace period is responsive to agency concerns.

Subsection (b) of this Section amends the Act to make explicit that interest penalties for late payment are to be paid automatically. Further, it seeks to deter agency finance center personnel from withholding a late payment interest penalty due to a contractor by making the agency liable for twice the interest penalty due under limited circumstances.

Testimony from witnesses representing small business government contractors cite experiences in which they had to make a formal written demand for late payment interest penalties due, despite the Act's clear intent and the explicit direction to the agencies in OMB Circular A-125 (Prompt Payment) that such penalties are to be paid "automatically". GAO found that some payment centers even had "informal" local policies of generally requiring a contractor to make a demand for interest due on a late payment. The likely origin for this reluctance to pay interest can be found in OMB's measure to agency performance under the Act: on the basis of the number of invoices upon which the agency paid a late payment interest penalty. As noted by GAO, this per-

formance measure maintains strong organizational pressures to both pay invoices on time (the objective of the Act) and to avoid paying interest even when it is due (an unintended side-effect of the Act's current reporting requirement).

Subsection (c)(2) provides a countervailing pressure on payment center personnel who might be tempted to withhold payment of late payment interest penalties due contractors, so as to reduce the number of late invoices reported to OMB. Under the amendment, the contractor would become entitled to double any late payment interest penalty (not double the payment due for contract performance), if four conditions are met. First, the contractor must be entitled to a late payment penalty. Second, the agency must have actually made a payment to the contractor which did not include any late payment interest penalty. Third, the agency would have ten days from the date of its payment to the contractor to catch any inadvertant failure to pay the late payment interest penalty and to make such payment. Agency corrective action during the ten day period would eliminate the contractors entitlement to the double interest penalty. And, finally, the contractor must make a written demand for the late payment interest penalty within the forty days of the date of payment.

Given these requirements and the improved internal management controls in most automated payment centers, the double late payment interest penalty authorized by this amendment to the Act could only be expected to fall upon those who deliberately try to avoid paying a late payment interest penalty, so they look "good" in their reports to OMB. In the view of the Committee, the current incentive to withhold late payment interest penalties in order to avoid OMB criticism is counteracted by this provision of the bill. Under the proposed amendment such unacceptable behavior will put the payment center or an individual payment clerk at risk of looking twice as "bad" than if the contractor were automatically paid the interest penalty due under the Act.

SECTION 5. INTEREST PENALTIES ON PROGRESS PAYMENTS AND RETAINED AMOUNTS UNDER CONSTRUCTION CONTRACTS

This section makes explicit the intent of the Prompt Payment Act that progress payments under construction contracts are subject to the Act's requirements and protections. Despite explicit legislative history in the reports accompanying S. 1131 and H.R. 4709 that progress payments fall within the reach of the Act's provision affording coverage to payments for partial executions if authorized by the contract (31 U.S.C. (4)), most agencies have determined by regulation that construction progress payments are "payments . . . made solely for financing purposes", which are exempt from coverage under OMB Circular A-125 (Para. 8(c)).

The section also extends the Act's coverage to amounts "retained" from progress payments paid to the contractor by the agency during the term of a construction contract. Contracting officers are authorized by regulation to retain a percentage of a program payment otherwise due a contractor upon making a specific finding concerning the timeliness of the contractor's performance, for conformity with the contract specifications. Once such deficiencies have been corrected to the agency's satisfaction and the construction project accepted by the Government the contractor is entitled to be paid these retained amounts as promptly as the final payment under the contract.

SECTION 6. PERIODIC PAYMENTS UNDER SUPPLY AND SERVICE CONTRACTS

During subcommittee consideration, 31 U.S.C. 3903 (4) was further clarified with respect to the Act's application to various periodic payments authorized under some supply and many service contracts. Testimony received reflected the fact that some agency buying personnel maintain that such payments are not subject to the Act, and hence not entitled to interest penalties for late payment. The agency's assert this position on the basis of two arguments. First, they may maintain that such periodic payments are not payments for work performed, but rather "payments solely for financing purposes", which have been explicitly exempted from the Act's protection under OMB Circular A-125. Or, second, they will avoid the Act's interest penalty on the basis that the contract does not include the "separate required payment dates" mentioned in the Act. Given that the FAR's menu of contract clauses was never modified to implement this among other provisions in the Prompt Payment Act, contractor's generally do not get paid interest penalties for late periodic payments. The Subcommittee amendments also made a corresponding modification in Section 10, which requires the promulgation of FAR coverage to implement the Act.

SECTION 7. PAYMENT CLAUSE FOR SUBCONTRACTS UNDER CONSTRUCTION CONTRACTS

This amendment adds a new section to the Prompt Payment Act which addresses the issue of extending the Act's coverage to subcontractors under federal construction contracts. The hearing record contains extensive and detailed testimony from witnesses representing subcontractors urging such coverage. They make a strong case that such coverage will contribute significantly to the timely completion of federal projects by eliminating one of the principal causes of delay: payment problems. Their testimony also made a strong case that such coverage is the only way to assure equitable treatment of subcontractors.

Subsection (a) of the proposed new section to the Act requires that the prime contractor include a payment clause in its contracts with its various subcontractors. It adopts "prevailing industry standards" as the payment term. The prevailing industry standard is currently deemed to be seven days, based upon a joint policy statement on prompt payment issued by the Associated General Contractors of America (AGC), the American Subcontractors Association (ASA), and the Associated Specialty Contractors (ASC), as well as an array of standard contract documents used extensively in the industry for both private and governmental construction projects. The Joint Policy Statement on Prompt Payment establishes a seven-day standard for payment of subcontractors after receipt of a payment by the prime contractor from the Owner (the Government). Similarly, the AGC's recommended standard form "Subcontract for Building Construction" (AGC Document No. 600, August 1984) provides for the payment of progress payments to subcontractors not later, then seven days after receipt of a payment by the prime contractor. Finally, the Standard Form of Agreement Between Contractor and Subcontractor (Document A-401, 1978) issued by the American Institute of Architects (AIA, provides for the payment to the subcontractor of each progress payment and the final payment within three days after the prime contractor receives payment from the Owner.

Subsection (a)(1) provides that a subcontractor's entitlement to payment from the prime contractor commences when the prime contractor has been paid by the Government, a so-called "pay when paid" relationship. As with the Act's application between the prime contractor and the Government, the subcontractor's entitlement to timely payment or interest penalties for late payment, only applies when no dispute exists as to performance. The subcontractor is not entitled to payment if his or her performance is not in conformity with the project schedule or the Government's specifications (which the prime contractor is required by its contract with the Government to include in its subcontracts). Similarly, the prime contractor may be entitled by its subcontract to withhold a portion of a payment for: (1) work that is in dispute; (2) third party claims, filed or reasonably expected to be filed; (3) alleged damages suffered by the prime contractor or another subcontractor; or (4) overdue subcontractor payments for labor, equipment or materials. However, to assure equitable treatment of subcontractors, it is essential that a prime contractor identify subcontractor performance deficiencies and other claims in its application for payment, and any accompanying certificate, to the Government and not request payment for amounts in dispute with the subcontractor until such dispute is resolved.

The resolution of any such performance dispute or other claim must remain subject to resolution between the parties to the subcontract and not be devolved upon the Government contracting officer for resolution. It should be noted, however, that Section 8(d) of the Small Business Act (15 U.S.C. 637(d)), as amended by the "Small Business and Federal Procurement Competition Enhancement Act of 1986", Public Law 98-577, would require the contracting officer to ensure compliance with the subcontract's payment provisions in the same manner as any other material provision of the subcontract.

Finally, the provision does not prohibit the prime contractor from withholding retainage from progress payments otherwise due the contractor upon a finding of delay or other performance not in conformity with the performance requirements of their contract. The rate of such retainage, (the percentage of the progress payment otherwise due) should be no higher than the rate the Government withheld from the prime contractor.

Subsection (a)(2) entitles the subcontractor to the payment of an interest penalty, if the prime contractor fails to pay the subcontractor in accordance with the payment clause required to be included in the contract between them. The interest rate specified is the same rate as applies to late payments by the Government to the prime contractor.

Subsection (b) makes clear that the payment of any late payment interest penalties incurred by the contractor may not be passed along to the Government, nor may the subcontractor pursue such late payment interest penalties with the Government.

SECTION 8. LIMITATIONS ON DISCOUNT PAYMENT

This section clarifies the time period during which an agency may legitimately take advantage of a contractor's offer of a

price discount for early payment. For example, a contractor may offer a 2% discount from its contract price in exchange for being paid by the Government within 20 days instead of the 30 days specified in its contract. The proposed amendment to the Prompt Payment Act makes clear that the discount period begins when a proper invoice is received by the first agency office designated in the contract. If the agency is to avail itself of the discount offered, it must make payment before the expiration of the period specified in the contractor's "fast pay" offer. The burden of accomplishing acceptance and other administrative matters prior to making payment against the contractor's proper invoice falls on the agency seeking to accept the discount price. Testimony from small business government contractors demonstrated that some agency payment centers have taken early payment discounts after the expiration of the discount period by not starting the "discount payment clock" until such time as acceptance and other administrative matters have been completed, irrespective of the time consumed by agency personnel. This amendment is designed to prevent such abuses.

SECTION 9. REPORTS

This section amends the Prompt Payment Act's reporting requirements to assure that data will be collected on the number and dollar value of invoices paid after the required payment date without payment of any interest penalty. The provision also requires the reporting agency to identify the reason a late payment interest penalty was not incurred. Currently, agencies are only reporting late invoices upon which an interest penalty was paid. GAO found that measurement of agency performance on the basis of this criteria has distorted the reports submitted to the Congress. This amendment will assure that OMB reports a more accurate and complete picture of agency compliance with the Act. The United States Postal Service (USPS) is specifically exempted from this reporting requirement to the Office of Management and Budget by Section 3(b) of the bill. However, as noted in the discussion of that provision, it is intended that the USPS collect data on its bill paying performance to permit senior management to monitor compliance and to permit congressional oversight.

SECTION 10. IMPLEMENTATION THROUGH THE FEDERAL ACQUISITION REGULATION

Subsection (a) of this section requires that the Prompt Payment Act be implemented in the Federal Acquisition Regulation (FAR). No coverage is presently included, despite the fact that the FAR was issued subsequent to the enactment of the Prompt Payment Act.

Subsection (b) specifically identifies the provisions of the Act which require FAR implementation, principally through the issuance of appropriate solicitation provisions and contract clauses.

Paragraph (1) establishes parameters for the payment terms to be developed. The fundamental theme is to conform to prevailing market practice whenever possible. This is especially important when acquiring commercial items of supply or services (including construction) in which prevailing practices are defined principally by private commercial activity. When the Government enters an essentially commercial market, it should conform its payment terms to those of the market, unless compelling reasons dictate otherwise. It is also intended that these regulations will afford the contracting officer the flexibility to specify a payment term for an individual contract or a class of contracts that will most effectively tap the market. It is favorably noted that the General Services Administration adopted this approach in Temporary Regulation 66 (Prompt Payment Procedures) to the former Federal Procurement Regulations (FPR) issued on October 5, 1982 to implement the Prompt Payment Act. Unfortunately, these regulations were not incorporated into the FAR, which superceded the FPR when the FAR became effective on April 1, 1984. Finally, the recently proposed FAR implementation of the Prompt Payment Act (51 Fed. Reg. 25976; July 17, 1986) suggests an unacceptably rigid system that would afford the Government at least a 30-day acceptance period and a 30-day payment period in every case. Such periods, when coupled with the currently available 15-day grace period, would effectively establish a minimum 75-day period before a contractor would be entitled to a late payment interest penalty.

Paragraph (2) provides guidance concerning the regulations addressing periodic payments in response to periodic invoices for supplies furnished or services performed during the term of a contract.

Paragraph (3) calls for regulations implementing the bill's amendment regarding periods for acceptance. The purposes of these amendments have been described previously in Section 3 (Definitions and Application) of this Summary of Provisions.

Paragraph (4) requires implementation of the Act's provisions relating to the Government's taking "early payment" discounts.

Paragraph (5) requires implementation of increased late payment interest penalties when the conditions of Section 4(c)(2) of the bill are met.

Subsection (c) specifies a time certain for issuance of proposed regulations and requires their publication for public comment.

SECTION 11. EFFECTIVE DATES

This section establishes the effective dates for the bill's various provisions. Subsection (a) provides the agencies with an implementation period of at least 90 days for most of the bill's provisions. Subsection (b) establishes the effective date for the Prompt Payment Act's explicit application to the United States Postal Service. Subsection (c) requires OMB to change the agency reporting requirements under the Act beginning with FY 87.

DISCUSSION OF THE APPLICATION OF THE PROMPT PAYMENT ACT TO PAYMENTS TO PROVIDERS AND SUPPLIERS UNDER THE MEDICARE PROGRAM FROM THE COMMITTEE ON SMALL BUSINESS

During its hearing on the Implementation of the Prompt Payment Act held on June 19, 1986, the Committee on Small Business received testimony about delays in payments by the Department of Health and Human Services' (HHS) Health Care Financing Administration (HCFA) under the Medicare Program. For some time prior to the hearing, the Small Business Committee received a steady stream of complaints from Medicare Program "providers" (e.g., hospitals, home health organizations, rehabilitation facilities, and pharmacists) and "suppliers" (e.g., durable medical equipment manufacturers and dealers), and the associations representing them, due to very lengthy delays in payments due to them.

To explore the full range of issues surrounding delayed payments under the Medicare Program, witnesses representing Medicare "providers" and "suppliers" were invited to testify along with a representative of the Blue Cross and Blue Shield Association, whose members provide the vast majority of "fiscal intermediary" services to HCFA, making payments to Medicare Program beneficiaries as well as "providers" and "suppliers". During the hearing, the National Association of Rehabilitation Facilities (NARF), and association representing one group of "providers", reported that many outpatient rehabilitation facilities had experienced delays of over 6 months in the payment of claims under Medicare. NARF's witness made a strong argument that there is a very serious problem with delays in Medicare payments, resulting in very adverse effects on Medicare "providers" and that such payment problems are exactly the type which the Prompt Payment Act was enacted to solve. Senator Bumpers, Ranking Minority Member of the Small Business Committee, noted that a number of "providers" of services in Arkansas, particularly pharmacists, had been experiencing severe cash flow problems because of the failure of HCFA and its agents to make timely payments.

The Committee invited HCFA to testify and present its policies regarding the payment of claims and to address the question of the applicability of the Prompt Payment Act to payments due "providers" and "suppliers" under the Medicare Program. Mr. Louis B. Hays, HFCA's Associate Administrator for Operations, appeared for the agency. In his testimony, Mr. Hays noted that HFCA takes the position that the Prompt Payment Act does not apply to payments under the Medicare Program, but that the agency is nonetheless trying to pay its bills promptly. He stated that HCFA's current payment standard is to pay "clean claims" within 27 days of receipt and to pay or otherwise dispose of claims that require further information within 60 days of initial receipt. In response to a question from Senator Trible, Mr. Hays was unable to state why HCFA feels that the Prompt Payment Act does not apply to payments under the Medicare Program. He did offer, however, to provide to the Committee an opinion of the HHS General Counsel substantiating this position.

This opinion was provided to the Committee on Small Business and printed in the appendix to the hearing record. The opinion is contained in a memorandum prepared by an attorney-advisor in HHS's Office of General Counsel, Deborah M. Chaskes, and directed to the Director of HCFA's Bureau of Program Operations, John C. Berry. The memorandum, dated February 6, 1984, addressed a variety of issues relating to payments under the Medicare Program under the subject "Authority to Determine Payment Cycle." The paragraphs of the memorandum which address the relationship between the Prompt Payment Act and the Medicare Program are as follows:

"4. Does the Prompt Payment Act (P.L. No. 97-177) apply to Medicare benefit payments?

In our opinion, the Prompt Payment Act does not apply to the Medicare program. The Act by its terms applies to "Federal agenc(ies) which acquire(s) property or services from a business concern." § 2(a)(1), 31 U.S.C. § 1801. Although "business concern" is defined broadly in the Act and federal policy issuances (see § 6(2) of the Act, 31 U.S.C. § 1805; OMB Circular A-125, 47 Fed. Reg. 37322 (Aug. 25, 1982)) and which encompass Medicare providers, it is not clear

that HCFA "acquires" goods and services in the sense used in the Act. Beneficiaries, not HCFA, "acquire" goods and services under the Medicare program; HCFA, through its intermediaries and carriers, makes payment on behalf of eligible beneficiaries. Therefore, the Prompt Payment Act would not seem to apply to the Medicare program."

"5. Could the Prompt Payment Act be utilized as an indication of Congressional intent for all Federal payment transactions?

We do not believe it is necessary to look outside of title XVIII for indications that Congress intended the Medicare program to be administered in an efficient manner. For example, the requirement in section 1815 that Part A providers be paid no less often than monthly expresses Congress' intent as to the promptness with which Medicare payment should be made."

Under HHS's analysis, HCFA is free from the requirements of the Prompt Payment Act on the basis that HCFA is not "acquiring" services. This conclusion is reached by HHS's Office of General Counsel principally because HCFA uses commercial insurance companies and Blue Cross-Blue Shield organizations as "fiscal intermediaries" in the administration of the Medicare Program and because the various services are rendered to Medicare beneficiaries rather than to the Government.

In the opinion of the Committee, this analysis has proceeded on the proper basis to determine if the Prompt Payment Act applies, i.e., a transactional basis, not a program basis. If a contract exists with the Government, and the contract does not include a specific payment term, then the payment terms specified in the Act control. The question to be answered is whether a contract exists between HHS and Medicare "providers" and "suppliers". This is a question of fact.

The testimony of witnesses appearing before the Committee on Small Business made a strong case that a contractual relationship does in fact exist. For example, under 42 U.S.C. 1395cc, an entity must enter into an agreement with the Secretary of HHS to be a "provider" of services under the Medicare Program. If this agreement and the laws and regulations incorporated into it by reference are found to memorialize the terms of a contract between the Secretary and the "provider", a direct contractual relationship would exist between HCFA and the "provider" organization. It was also persuasively argued that the mere use of "fiscal intermediaries" as HCFA's payment agents would not disrupt a finding of a contractual relationship. Further, the fact that the services of the "providers" are rendered to Medicare beneficiaries does not necessarily void the contractual nature of the relationship between HHS and the "provider". Medicare beneficiaries may well be found to be third party beneficiaries of this relationship, but the terms of the contract are set between the Secretary and the "provider" of the services.

It is noted that on June 17, 1986, Senator Durenberger, joined by twelve original cosponsors, introduced S. 2576, the "Medicare Timely Payment Amendments of 1986." This bill amends the Social Security Act to require that agreements with fiscal intermediaries under Section 1816(c) (42 U.S.C. 1395(c)) require the payment of "clean claims" within 22 calendar days after receipt, or the claimant "provider" or supplier" is entitled to late payment interest penalty.

Subsequently, the substance of S. 2576 was incorporated into S. 2706, the "Sixth Omnibus Budget Reconciliation Act, 1986", at Sec. 612 (Payment of Medicare Claims). The payment standard was modified to require payment within 24 days before an entitlement to a late payment interest penalty would arise. In addition, Section 612(c)(3)(B) established a 14—day "grace period" which expires at the end of FY 87, September 30, 1987.

Section 10221 of H.R. 5300, the "Omnibus Budget Reconciliation Act of 1986", as passed by the House of Representatives on September 24, 1986, contained a similar provision. It required payment of a "clean claim" within 22 calendar days, or the claimant was entitled to a late payment interest penalty. The House provision did not include any "grace period."

Nothing in the legislative history of S. 2576, or the successor provision in S. 2706, suggests that the proposed amendment to the Social Security Act was introduced because the sponsors had determined that payments to "providers" and "suppliers" under the Medicare Program were not covered by the requirements of the Prompt Payment Act. Rather, all indications suggest that the legislation sponsors wanted to bind HCFA's fiscal intermediaries to a stricter payment term than the 30-day payment term prescribed by the Prompt Payment Act for most supplies and services in the absence of a contractually specified payment term. The proposed statutory payment term appears to be closely akin to the stricter payment terms for meat and meat food products or perishable agricultural commodities presently cited in paragraphs (2) and (3) of section 3903, 31 United States Code.

Given the position taken by the Department of Health and Human Services, the application of the Prompt Payment Act to payments due to "providers" and "suppliers" under the Medicare Program will require a judicial determination. This is unfortunate, since the matter of timely payment could have been easily resolved by HCFA's specification of a payment term.

Mr. WEICKER. Mr. President, I rise in support of S. 2479, the Prompt Payment Act Amendments of 1986. I urge my colleagues to join Senator TRIBLE, and the bill's 44 cosponsors in voting to pass this important legislation now, before the adjournment of the 99th Congress.

As chairman of the Committee on Small Business, I feel very strongly about timely payment for Government contractors, since small business firms constitute the vast majority of those who sell to the Government, and are the hardest hit by late Government payments. The Prompt Payment Act of 1982 had its origins as an important initiative of the Small Business Committee during the 97th Congress. Senator SASSER introduced the Late Payment Act of 1981, S. 30, early in the first session. Then, Senator DANFORTH and Senator CHILES, chairman and ranking minority member of the Governmental Affairs Committee's Subcommittee on Federal Expenditures, Research and Rules took up the cause and introduced S. 1131, the Delinquent Payment Act of 1981 along with 22 original cosponsors, including myself and several other members of the Small Business Committee.

A companion measure, H.R. 4709, the Prompt Payment Act was already moving steadily through the House with the strong support of Representatives JACK BROOKS and FRANK HORTON, chairman and ranking minority member of the Committee on Government Operations and a broad, bipartisan array of their colleagues. Given strong support from the broad-based Prompt Pay Coalition, strong concurrent House action, and the persistence of Senators DANFORTH and CHILES in the face of steadfast opposition from OMB and the procuring agencies, S. 1131 was finally signed into law on May 21, 1982, and became effective on October 1 of that year.

Mr. President, Government contractors, small businesses, and large firms, have now had 4 complete fiscal years of experience with agency billpaying practices subject to the Prompt Payment Act. This experience has been monitored by the Prompt Pay Coalition and many of its member associations. This long-term monitoring effort leads to two conclusions: First, that the Prompt Payment Act has substantially improved the Government's billpaying practices from the dismal situation that existed prior to enactment; and second, that the agencies have frustrated full implementation of the act as intended by Congress by exploiting ambiguities and loopholes in the statute.

Given the years of billpaying experience under the act and the problems being repeatedly faced by small business Government contractors, the Prompt Pay Coalition and its member associations began to call for oversight hearings and consideration of amendments to remedy problems identified. For example, the Small Business Committee's National Advisory Council considered the issue of the implementation of the Prompt Payment Act during its meeting on October 25, 1985, and adopted a resolution.

Mr. President, I ask unanimous consent that a copy of the October 25, 1985, resolution of the National Advisory Council on implementation of the Prompt Payment Act be printed in the RECORD following my statement.

The issue of implementational problems regarding the Prompt Payment Act was also surfaced by many small business owners during the State and regional meetings that preceded the White House Conference on Small Business, which was held August 17–21, 1986. Implementation of the Prompt Payment Act was one of the conference's agenda items, as a result of resolutions adopted at these preparatory State conferences. A resolution calling for vigorous enforcement of the act and suggesting a series of amendments finished among the top

40 recommendations from a starting agenda of over 400 issue items.

Mr. President, I ask unanimous consent that a copy of the recommendation concerning the Prompt Payment Act adopted by the White House Conference on Small Business on August 21, 1986, be printed in the RECORD following my statement.

Given The Small Business Committee's sustained interest in small business participation in the Federal procurement market, Senator BUMPERS and I decided to act on the resolution of the committee's National Advisory Council. Senator TRIBLE took the lead in conducting oversight hearings.

On December 2, 1985, Senator TRIBLE chaired a Small Business Committee field hearing in Norfolk, VA. Representatives of small firms providing supplies, an array of services, and construction to various Government agencies provided testimony. A very extensive statement was presented by the Prompt Pay Coalition. The testimony expressed three basic themes. First, the Prompt Payment Act has substantially improved the billpaying practices of those executive agencies which are subject to its provisions. Second, many agencies have devised various stratagems, based on ambiguities in the act, which have permitted them to pay late without incurring late payment interest penalties, principally by delaying the start of the payment clock. Third, agency implementing regulations have restricted the act's application, and thus its protections, with regard to certain types of payments due to contractors, most notably, construction progress payments, and partial and periodic payments under supply and service contracts. Agency testimony was received from Navy personnel representing Defense agency experience and GSA representatives on behalf of the civil agencies. After a careful consideration of this extensive hearing record, additional materials submitted to the committee by individual contractors and the associations comprising the Prompt Pay Coalition, as well as OMB's reports to the Congress on agency performance under the Prompt Payment Act for fiscal years 1982, 1983, and 1984, Senator TRIBLE directed committee staff in the preparation of what became the Prompt Payment Act Amendments of 1986. It should be noted that extensive informal staff discussions preceded the bill. These discussions involved not only groups representing small business Government contractors but individuals within OMB's financial management division. A discussion draft was widely circulated for comment. Copies were provided to OMB, as well as the General Accounting Office [GAO] task force conducting a review of the act's implementation in response to a request from Representative JACK BROOKS in his capacity as chairman of the Legislation and National Security Subcommittee of the House Government Operations Committee.

On May 21, 1986, Senator TRIBLE introduced S. 2479. He was joined by 20 original cosponsors that included most of the members of the Small Business Committee and many of the key sponsors of the original Prompt Payment Act legislation, including Senators DANFORTH and CHILES.

Senator TRIBLE pressed forward for a full committee hearing on the implementation of the Prompt Payment Act, which was held on June 19, 1986. At this all-day hearing extensive testimony was received from 13 witnesses, principally representing small business Government contractors. Many additional statements were submitted for the record.

Testimony was presented on behalf of the Prompt Pay Coalition, the National Federation of Independent Business [NFIB], the Small Business Legislative Council [SBLC], the Associated General Contractors of America [AGC], the American Subcontracting Association [ASA], and others. Most of their testimony followed the themes of the previous field hearing, but expanded to a national scope. Especially useful testimony comparing the objectives of the Prompt Payment Act and agency implementation during the first 3 years was presented by Christopher R. Brewster, who served as staff director to the former Subcommittee on Federal Expenditures, Research and Rules at the time S. 1131 was considered and enacted. John J. Lordan, OMB's Deputy Associate Administrator for Financial Management presented a statement from the OMB Director. Althrough not a legislative hearing, most of the witnesses, including the OMB representative, commented on S. 2479. All of the private sector witnesses supported Senator TRIBLE's bill. OMB's testimony acknowledged that the bill addressed valid implementational problems. However, as expected, they opposed a legislative solution, preferring to make the necessary improvements though amendments to OMB Circular A-125—prompt payment—the issuance of appropriate implementing procurement regulations in the Federal Acquisition Regulation [FAR], and other administrative actions. These arguments failed to persuade me. In fact, as has already been noted by others, the proposed FAR regulations to implement the act would operate as a virtual regulatory repeal of the Prompt Payment Act.

Our full committee hearing did develop one new issue of substantial significance: whether the Prompt Payment Act should be amended to provide protection to subcontractors under Federal construction contracts. Testimony from the witnesses representing ASA and the Associated Speciality Contractors [ASC] addressed this issue extensively, strongly urging such an amendment to the act. Support for such an amendment was also included in the testimony of the witnesses representing the Prompt Pay Coalition, NFIB, and SBLC. AGC's witness opposed such an amendment on the basis that it would be an unwarranted governmental intrusion into what is essentially a private contractual relationship between the prime contractor and its subcontractors. As a fundamental policy, AGC opposes any governmental intrusion on the principle of privity of contract.

Based on the extensive testimony presented at the committee's June 19 hearing, I support such coverage and commend Senator COHEN and his Subcommittee on Oversight of Government Management for tackling this tough issue. I believe that the language which we are considering today does what's needed. It assures that an adequate payment clause is included in the agreements negotiated between the prime contractor and its subcontractors. It assures that the payment term incorporated in such payment clauses will reflect prevailing industry standards. Finally, it provides the necessary enforcement mechanism by entitling the subcontractor to late payment interest penalties on the same basis, and at the same rate, as the prime contractor is now entitled to late payment interest penalties from the Government.

After reviewing the extensive array of contract clauses currently mandated by the FAR for inclusion in the subcontracts awarded by a Federal construction contractor, I cannot accept the argument that this provision is an unwarranted intrusion into a private contractual relationship. Further, after reviewing the explanation of this provision contained in the summary of the bill accompanying the statement of the chairman of the Committee on Governmental Affairs, I cannot accept the argument that the provision will inevitably embroil the Government in disputes between prime contractors and their subcontractors. On the contrary, I believe that the bill's provisions requiring a complete and enforceable payment provision in construction subcontractors will go a long way to avoiding prime contractor-subcontractor conflict, to their benefit as well as the Government's.

Mr. President, it is unnecessary for me to comment further on the bill's provisions. The summary of provisions which Senator ROTH has included with his statement provides a comprehensive analysis of its provisions and their intended purpose.

Nonetheless, in considering this bill and the underlying act which it is de-

signed to improve, it is important that one basic concept remain in clear focus: we are talking about moneys owed to contractors for work that they have performed for the Government in conformity with their contractual responsibilities. The Government has determined that it has gotten what it contracted to obtain; the only issue is fulfillment of the Government's obligation to pay. The Prompt Payment Act's requirements operate, and its protections adhere, only if the contractor has performed.

Mr. President, this legislation has the broad support of the small business community. My colleague from Virginia (Mr. TRIBLE) and my colleague from Maine (Mr. COHEN) have both noted many of the groups who worked hard to get the Prompt Payment Act in 1982, who have closely monitored its implementation, and who have assisted in shaping and moving these amendments. I would be remiss if I did not cite the help provided by them. Special thanks must go to the Prompt Pay Coalition under the able leadership of Kenton Pattie. A listing of the associations that comprise the coalition is included with Senator TRIBLE's remarks. Steadfast support has also been provided by other members of the coalition including the National Federation of Independent Business, the Small Business Legislative Council, the American Subcontractors Association, the National Electrical Contractors Association, the National Association of Plumbing-Heating-Cooling Contractors, and the Associated Speciality Contractors. Small Business United has also lent its strong hand to the advancement of this legislation.

Mr. President, I ask unanimous consent that letters of support from several of these associations be printed in the RECORD following my statement.

In addition, Mr. President, the Prompt Payment Act has enjoyed the strong support of the Associated General Contractors of America. They have helped monitor its implementation in the construction industry. While expressing strong reservations concerning the bill's coverage of construction subcontractors, a matter on which we differ, I must recognize their strong support for the other provisions of the Prompt Payment Act Amendments of 1986.

Finally, Mr. President, I must recognize and commend my friend from Virginia, Mr. TRIBLE, for his leadership on this important small business issue. From the adoption of the resolution by the Small Business Committee's National Advisory Council until today's impending approval by the Senate, he has worked with patience and determination to shape and move this bill, after thoroughly immersing himself in the background, purposes, and operational details of the Prompt Payment Act.

Mr. President, the small business community is also indebted to my colleague from Maine (Mr. COHEN), chairman of the Subcommittee on Oversight of Government Management, and my friend from Delaware (Mr. ROTH), chairman of the full Governmental Affairs Committee. Although their legislative agendas were already quite full, they gave this bill their full attention, made significant improvements, and moved it forward promptly for consideration today by the full Senate. Their cooperation and assistance was essential, and I know the small business community joins me in thanking them.

Mr. President, I urge all my colleagues to join me in voting to adopt S. 2479, the Prompt Payment Act Amendments of 1986.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON IMPLEMENTATION OF THE PROMPT PAYMENT ACT

Whereas, the members of the National Advisory Council to the Senate Committee on Small Business, having considered the Federal agency implementation of the Prompt Payment Act, Public Law 97-177, during the three years since it became effective on October 1, 1982, have found that the objectives of the legislation and the intent of Congress are not being fully attained;

Whereas, some Federal agencies continue to make payments beyond the payment date specified in its contracts or beyond the times specified in the Act, without the payment of interests;

Whereas, some Federal agencies are abusing the fifteen day "grace period" provided in the Act by failing to initiate payment action on contractors' invoices until the expiration of thirty days;

Whereas, some Federal agencies are delaying payments to small business contractors by rejecting their invoices as "improper" after the fifteen days provided by the Act;

Whereas, some Federal agencies are delaying payments to small business contractors by refusing formal acceptance of supplies, services or construction so as to delay the start of the payment periods mandated by the Act, after which interest must be paid;

Whereas, some Federal agencies are failing to automatically pay interest due to small business contractors, rather requiring them to make a demand for payment of interest contrary to the Act's self-enforcing intent;

Whereas, these problems with agency implementation of the Act are placing substantial financing burdens on small business government contractors, and acting as an obstacle to small business participation in the Federal procurement market, thus denying the Government the advantages of the competition industry, and innovation provided by many small businesses;

Therefore, be it Resolved, That, the National Advisory Council to the Senate Committee on Small Business calls upon the Congress, especially the Senate and House Committees on Small Business, the Senate Governmental Affairs Committee, and the House Government Operations Committee which were instrumental in the passage of the Prompt Payment Act, to:

1. conduct oversight hearings on the implementation of the Prompt Payment Act through OMB Circular A-125, the Federal Acquisition Regulation, and the implementing regulations of individual Federal agencies; and

2. to consider modifications to the Prompt Payment Act that will address demonstrated implementational abuses by some Federal agencies and assure attainment of Congressional intent and objectives in passing the Act.

[The White House Conference on Small Business—August 17-21, 1986]

FINAL RECOGNITION PERTAINING TO PROMPT PAYMENT ACT OF 1982

32. Prompt pay legislation should be extended to cover postal service and federally assisted procurement and strengthened through an amendment to the 1982 Prompt Payment Act to eliminate the fifteen day grace period; require automatic payment of interest penalties; more clearly define that the entire payment process, including acceptance, must occur within 30 days; include progress payments and retainage; and require prime contractors to pay their subcontractors within seven days after receiving payment from the government or incur interest payment penalties. In addition, when the government pays the prime contractors late, interest payments shall flow through from prime contractors to subcontractors on a pro-rata basis. The prompt payment act shall be vigorously enforced by all branches of government. [R.A. 277, Procurement; 652 votes]

NATIONAL FEDERATION OF INDEPENDENT BUSINESS,
Washington, DC, October 3, 1986.

Hon. LOWELL WEICKER, Jr.,
U.S. Senate,
Washington, DC.

DEAR LOWELL: On behalf of the more than 500,000 small business owner members of NFIB, I urge your support for S. 2479, the Prompt Payment Amendments of 1986, introduced by Senator Paul Trible. The bill was reported out of the Senate Governmental Affairs Committee, and we anticipate action by the full Senate before adjournment.

NFIB supported passage of the original Prompt Pay Act of 1982. We know this is an important issue for small business. Maintaining a steady cash flow is an important issue for small business. Maintaining a steady cash flow is a chronic problem for many small firms, a problem which is exacerbated if bills owed by the government are not paid on time.

Since enactment of this law, government contractors of all sizes report obvious improvements in the payment process. Nevertheless, we continue to hear from our members on spotty implementation of the Act.

S. 2479 amends the Prompt Payment Act to:

Clearly define "receipt of invoice";

Phase out the 15-day grace period;

Require interest penalties be paid automatically;

Require interest penalties be paid on late progress payments and retained amounts for construction;

Extend coverage of the Act to subcontractors on Federal construction projects;

Forbid taking early discounts unless the agency actually complies with the payment terms; and

Require that the annual reports on the implementation of the Act provide more detailed information.

S. 2479 is particularly important now because of recent actions proposed by the agencies, including:

(1) Regulations proposed by the Federal Acquisition Regulation Council that would give federal agencies up to 80 days to pay their bills;

(2) Testimony by Deputy Secretary of Defense William H. Taft, IV, that DOD will delay payments for 40 days beginning in fiscal 1987; and

(3) An announcement by the Commodity Credit Corporation that it is going to "suspend" the Prompt Payment Act.

NFIB believes that this legislation is necessary not only to protect businesses who contract with the federal government, but also to send a firm message to the agencies that Congress expects them to pay their bills on time.

S. 2479 has 41 cosponsors, and we would appreciate your support when this legislation reaches the Senate floor. This will be a Key Small Business Vote.

Sincerely,

JOHN J. MOTLEY III,
Director of Federal Legislation.

SMALL BUSINESS LEGISLATIVE COUNCIL,®
Washington, DC, October 3, 1986.

Hon. LOWELL P. WEICKER, Jr.,
U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR SENATOR WEICKER: On behalf of the Small Business Legislative Council I wish to express our support for S. 2479, The Prompt Payment Amendment Act, as reported by the Committee on Governmental Affairs on October 2, 1986.

The Small Business Legislative Council (SBLC) is a permanent, independent coalition of nearly ninety trade associations representing over four million small businesses. Our sole mission is to represent the interests of small business in national policy matters.

Small business played an important role in securing passage of the original prompt payment act and at the recent White House Conference on Small Business, 1,800 small business owners voted to recommend enactment of the reforms included in this bill as one of their final sixty priorities.

We are pleased with the progress made to date as a result of the original law. However, as one might suspect, we could not anticipate all of the potential loopholes which existed in the original law. The bill reported by this Committee will result in significant improvements in the prompt payment system. We also believe it is time to recognize the importance of prompt payment to all businesses such as subcontractors, and we are pleased with the provisions of the bill which address this aspect of the problem.

We consider this matter most urgent and ask you to ensure consideration of this measure before adjournment.

Sincerely,

JOHN S. SATAGAJ,
President.

WALTHAM, MA, *October 9, 1986.*

Hon. LOWELL P. WEICKER,
Chairman, Senate Small Business Committee, Russell Senate Office Building, Washington, DC.

DEAR MR. CHAIRMAN: On behalf of the individual members of the associations making up Small Business United, we wish to urge your support of passage of S. 2479, the Prompt Pay Amendments Act. Regrettably, a host of executive branch agencies have seen fit to ignore the spirit and intent of the 1982 Prompt Payment Act as was amply demonstrated in Senate and House hearings that were held earlier this year addressing the implementation of Public Law 97-177.

As you are aware, the Senate Small Business Committee Advisory Council adopted a resolution last year pointing out that federal agencies ignore statutory payment dates, consciously wait as long as thirty days to begin payment action, purposely wait longer than fifteen days to reject incorrectly submitted invoices, refuse acceptance of supplies or services to delay the beginning of required payment periods, and fail to routinely pay interest dues as stipulated by law.

S. 2479 addresses and recitifies many of these concerns. Its passage now will signal OMB and the abusing agencies that the above mentioned shortcomings should be rectified administratively between now and the beginning of the 100th Congress or else face the legislative consequences next year.

In closing, we wish to thank you, the Ranking Minority Member, Senator Bumpers, and the other members of the Senate Small Business Committee for their support and leadership in helping to resolve this pernicious problem that threatens to undermine your collective efforts promoting increased government competition.

Sincerely,

SAMUEL N. HOPE III,
President.

Mr. NICKLES. Mr. President, I take great pleasure in supporting S. 2479, the Prompt Payment Act Amendments of 1986. As a cosponsor of this legislation, I think S. 2479 represents a significant and carefully crafted im-

provement of a law which has received overwhelming support since its enactment in 1982. To the Nation's business community and particularly to small businesses, the Prompt Payment Act represents the Federal Government's commitment to adhere to a standard of fairness and reliability in its commercial transactions.

The Committee on Small Business, on which I serve, held hearings on prompt pay earlier this year, which were chaired by my distinguished colleague and the principal author of S. 2479, Senator TRIBLE. At the hearing in June, I expressed my hope that the hearing and the interest it generated would lead to remedies to the problems that have been recounted by my constituents and other small business owners. I am delighted to see that the process has served us so well by bringing this legislation to the floor quickly for a vote.

The hearings on prompt pay were enlightening because they raised a number of issues that have either been unresolved by existing law or, in some cases, have been the subject of controversy because of administrative interpretation of the act.

S. 2479 deserves our support. The Prompt Payment Act established a standard of fairness for the Federal Government to follow in doing business with the many firms that we represent. S. 2479 renews our commitment to making that standard work not only for the benefit of business but for the Government and ultimately the taxpayer as well. Mr. President, on behalf of small business and good government, I urge the Senate to approve this bill.

Mr. WALLOP. Mr. President, I rise in support of S. 2479, the Prompt Payment Act amendments and I would like to share with the Senate some of the findings of a new report from the General Accounting Office.

As you know, we passed the Prompt Payment Act in 1982. Since then, complaints have continued and the GAO looked into the situation. Here is some of what they found:

Twenty-four percent of federal vendor payments, involving $7.7 billion, were made after the due date during its 4-month test period. Some were extremely late. For example, GAO found that 7 percent of the late payments in its sample were between 46 and 150 days late and about 1.3 percent were more than 90 days late. Page 3

Required interest penalties were seldom paid. GAO's evaluation of its sample payments showed that agencies paid only one of every six penalties owed. GAO estimated that agencies should have paid approximately $15 million in late payment penalties during the 4 months . . . Page 3

OMB has reported annually since 1983 that the government pays over 90 percent of its bills on time. This is not an accurate assessment . . . Page 5

The 372 late payments in our adjusted universe ranged up to about 5 months late; however, the vast majority (96 percent were paid within 60 days of the due date. Page 21

Although payment performance is not yet fully satisfactory for either civil or defense activities, our analysis showed that civil agency payment centers paid invoices late more than twice as often as defense centers . . . Page 29

Collectively, however, federal agencies still face a major challenge to improve the government's image as a bill payer. Only three fourths of the bills are paid by the due date and many of these are paid too soon. In addition, agencies did not consistently take discounts only during the offered time frame or voluntarily pay any interest penalties owed. Page 31. These come from GAO's Prompt Payment Act: Agencies Have Not Fully Achieved Available Benefits (GAO/AFMD-86-69), August, 1986.

Mr. President, the GAO report is enough to convince anyone that the goals we set with the 1982 act are not being met today. That is why we need to pass S. 2479. As a cosponsor of this bill, I am convinced that we must continue to apply congressional pressure on the agencies, to set the rules they have to act by, until they achieve prompt payment. Without S. 2479, I fear we will once again face complaints about late pay throughout the 100th Congress.

Mr. WARNER. Mr. President, I am pleased to rise in support of S. 2479, the Prompt Payment Act Amendments of 1986. This important measure amends and strengthens the Prompt Payment Act of 1982 which I cosponsored during the 97th Congress.

I am particularly proud to note that S. 2479 was introduced by my colleague from Virginia, Senator PAUL TRIBLE. Senate action on this measure is a tribute to Senator TRIBLE's determination to address a problem facing many small businesses, both in Virginia and across the Nation. That problem involves the timeliness of the U.S. Government in the payment of its debts.

Senator TRIBLE has conducted two hearings on this matter, first in Norfolk, VA, in December of 1985, and then in Washington, DC, on June 19, 1986. As documented by the many small business representatives who testified at the hearings, the impact of the 1982 law has not lived up to our expectations. Executive branch agencies continue to skirt the law through the use of grace periods and suspensions. Meanwhile, many small businesses dealing with the Government find themselves living hand to mouth, trying to meet expenses while waiting for an overdue Government payment.

Mr. President, we would not have the bill before us today without the support of Senators COHEN and ROTH, the respective chairmen of the Governmental Affairs Subcommittee on Oversight of Government Management and the full Governmental Affairs Committee. While the Small Business Committee has exercised its oversight powers with the hearings and investigation, Governmental Affairs has been the committee of jurisdiction.

What we have had, basically, is a coalition of groups seeking a workable solution to the problem of the Government not paying its bills on time. S. 2479 is the product of that coalition, a product cosponsored by more than 40 Members of this body.

I strongly encourage its adoption.

Mr. DURENBERGER. Mr. President, today we have a simple, but important task to complete with the passage of S. 2479, the Prompt Payment Act Amendments of 1986. It is a task that Congress thought had been accomplished with the passage of the original Prompt Payment Act of 1982, of which I was a cosponsor.

That task is to get Federal agencies to pay their bills on time. Though payment policies have improved since the 1982 act was passed, many agencies have exploited serious loopholes in that legislation and have strayed far away from the intent of the act.

Several abuses were documented in June hearings before the Committee on Small Business on implementation of the Prompt Payment Act. These abuses have not been corrected. Indeed, recent policy statement by various Federal agencies have intensified the concern.

For example, the Department of Defense has stated its intention of paying bills in 45 days rather than in 30 days "to save the taxpayer money." In other words, it plans to use the 15-day grace period routinely for all payments. It has abandoned the 30-day standard and has instituted its own 44-day standard. This approach is neither consistent with the intent of the act, nor is it consistent with the statements in 1982 when the DOD requested the 15-day grace period to provide some latitude in exceptional cases.

One prominent advocate of Prompt Payment Act improvements has summed up the implications of this DOD policy in an insightful way:

Not only does their plan undermine the intent of the Act, but it misleads the Congress in a theory that says: late payments equal a savings to the taxpayer. As you know, this is no savings but merely a delay in payment. It is, in effect, borrowing $2.8 billion in late payments from small and large businesses. This is interest-free money so that at the end of the fiscal year, some payments would be postponed until the next fiscal year.

Rather than saving the taxpayer money, it will cost the taxpayer dearly. Companies which know that the Government is going to pay them later will increase prices to cover the added cost of doing business with the Government. So, in the long run, the Government will pay later, but will pay much more than it should for the same goods and services.

Mr. President, I join my colleagues Senator TRIBLE, Senator COHEN, and my fellow members of the Subcommittee on Oversight of Government Management, in supporting the practical and commonsense amendments to the act contained in S. 2479.

The amendments would take a most significant step in restoring the confidence of businesses providing our Federal Government with goods and services. By conducting contractual relationships in a professional and business-like manner, the Federal Government creates an environment where high standards of conduct are expected and considered the norm. Finding loopholes in one piece of legislation only encourages that activity in other arenas.

For example, the amendments would phase out the 15-day grace period. After 4 years, that grace period has become an excuse for abuse rather than a needed cushion for exceptional cases.

Mr. President, I applaud the efforts of those who worked on the original legislation and particularly the current efforts to ensure that the Prompt Payment Act of 1982 is correctly implemented. In this way, we send a strong and credible message to everyone in Government and in the private sector that sound business practices have a high priority.

Mr. D'AMATO. Mr. President, I rise today to commend my colleagues for passing the Prompt Payment Act Amendments of 1986. This legislation amends the Prompt Payment Act, Public Law 97-177, and corrects abusive practices of some Government agencies and to assure the implementation of congressional intent and objectives.

The Prompt Payment Act established payment terms for Government contractors providing supplies, services, or construction to Federal agencies if the individual contract did not specify a specific payment term. This law was necessary to correct the abusive payment practices of some Federal Government agencies; long delays in paying its contractors is injurious to a business enterprise, especially a small business. Therefore, it became necessary to assure that businesses were paid in a timely manner or that interest penalties be paid for late payments.

Mr. President, although the Prompt Payment Act has tremendously increased the timeliness of payments, some agencies continue to delay payment by exploiting the act's purposes. The Prompt Payment Act Amendments of 1986 will correct the abuses in a reasonable and fair manner.

Mr. President, I thank my colleagues for acting expeditiously on this legislation. I especially commend the distinguished chairman, Senator WEICKER, and Senators TRIBLE, BUMPERS, and COHEN for their diligence and hard work in ensuring passage of this important legislation.

Mr. DANFORTH. Mr. President, I am pleased to offer my support for S. 2479, the Prompt Payment Act Amendments of 1986. This legislation would effect certain changes in the Prompt Payment Act to ensure that Government contractors are paid on time, and that interest penalties are paid in those cases where payment is late. Earlier this year, I joined Senator TRIBLE as an original cosponsor of S. 2479, and I commend him and Senator COHEN for their work on behalf of this legislation.

Mr. President, I was one of the principal authors of the original Prompt Payment Act, which was intended to bring some order into the Government's bill paying practices. The history of this legislation was detailed by my former counsel, Christopher Brewster, in testimony before the Senate Small Business Committee earlier this year. I will ask that a copy of his testimony be printed in the RECORD following my statement.

Enactment of the Prompt Payment Act followed a report issued by the General Accounting Office in 1978, which found that some 30 percent of Federal invoices were paid late for no reason whatsoever, and that still others were paid much earlier than required. The Government's bill payment performance was a plain and simple case of sloppy management. It was costing the Government money in foregone interest on early payments. It was costing Government contractors money on late payments. And it was discouraging contractors from doing business with the Government. The cost was staggering. The GAO estimated that some $9.8 billion in Federal contracts were paid late just during the 6-month sampling period of the GAO study—at a cost to Government contractors, many of them small companies, of some $30 million. To correct this problem, the Prompt Payment Act requires specific payment terms in Government contracts, requires the Government to pay bills when due, and awards interest penalties to Government contractors when the Government pays late.

I am pleased to say that the 3 years since enactment of the Prompt Payment Act have seen a measurable improvement in the Government's bill payment performance. Moreover, the Prompt Payment Act has proved to be a model for similar State legislation. Since its enactment in 1982, many States have enacted prompt payment legislation for State contracts, including my own State of Missouri in 1985. Nonetheless, more work must be done. Strengthening the Prompt Pay Act was a principal recommendation of the recently concluded White House Conference on Small Business. It is easy to understand why.

Since 1983, the OMB has reported that fully 99 percent of Government contracts are paid on time, but this statistic masks some troubling facts. In testimony before the House Government Operations Committee only 2 months ago, the GAO reported that agencies paid only 75 percent of their invoices by the due date. The disparity between the GAO and the OMB data is accounted for, in large part, by the fact that OMB did not consider a payment as late unless an interest penalty was paid. For example, payments made after the due date but before the expiration of the 15-day grace period provided for in the act would not be considered late by OMB. Contractors would likely think otherwise. So do I. The routine use of the grace period, as reported by the GAO, is quite troubling. Indeed, one of the principal changes in the act that would be effected by S. 2479 is the gradual elimination of the grace period. I think this change in the law makes sense.

When the Prompt Payment Act was written, the grace period was not part of the original Senate bill. It was added by the House, at the urging of the executive branch, to avoid payment of numerous small interest penalties during the time it took for the executive branch to bring payment practices into line with the requirements of the act. It was intended, in effect, as a safety valve, and a temporary one at that. It was not intended to give the Federal Government carte blanche to pay its bills in 45 days when it was required to pay its bills in 30 days. Nonetheless, the GAO reports that 20 percent of all invoices it reviewed in its recent survey were paid during the grace period.

Unfortunately, it appears that the availability of the grace period has proved to be an invitation to agencies to cut corners. In testimony before the Senate Appropriations Committee only this past August, Deputy Secretary of Defense William Howard Taft IV testified that the Department of Defense was "reviewing the flexibilities available to us under the Prompt Payment Act" as a means of cutting costs. Mr. Taft proposed that the Department pay its bills 10 days into the grace period to reduce outlays.

I am pleased to note that the subcommittee has questioned Mr. Taft's proposal, and that the chairman of the subcommittee, Senator STEVENS, is a cosponsor of S. 2479. In my opinion, Mr. Taft's proposal is no way for the Federal Government to do business. Money the Federal Government saves by paying its bills late is money earned at the expense of Government contractors—many of them small companies that can ill afford delays in payment. If the Federal Government

promises payment in 30 days it should pay its bills in 30 days—not 45.

In any event, the cost savings attributed to late payment would likely prove short-lived. If the Federal Government is saving money by paying its bills late it is only doing so because those goods and services were priced on the assumption that payment would be made in a timely fashion. If the Government is going to routinely pay its bills late it can and should expect to pay more for goods and services. It should also expect to find fewer companies interested in doing business. Unfortunately, abuse of the grace period can be expected for so long as the grace period remains available. The grace period should be eliminated.

Another troubling finding of the GAO report is the fact that agencies are not paying interest penalties. The GAO reports that five out of every six vendors in their survey did not receive interest penalties to which they were entitled. Moreover, some offices were flatly refusing to pay interest penalties unless forced to do so by their contractors.

The Prompt Payment Act is intended to be self-enforcing. Late payments carry an interest penalty. The GAO reports, however, that fully 24 of the 39 payment centers reviewed in their study had unpaid penalties—and that 3 of the 39 centers had local policies not to pay interest unless the vendors asked for it. Mr. President, this is wrong. If the Prompt Payment Act is to work as it was intended to work interest penalties should be paid whenever bills are paid late. This is what the law requires now. Nonetheless, problems persist. The amendments effected by S. 2479 would make it absolutely clear that interest penalties are to be paid to contractors automatically.

In addition to these concerns, it continues to be the case that the Federal Government is taking discounts for prompt payment even when it fails to make payment in a timely fashion. The GAO reports that 18 percent of discounts taken by agencies in their sample were taken after the discount period had expired. It should not take an act of Congress to prevent this sort of practice, but apparently it does. S. 2479 would expressly prohibit agencies from taking prompt payment discounts unless payment is made during the discount period.

Finally, I am pleased to note the bill makes it clear that the U.S. Postal Service is covered by the requirements of the Prompt Payment Act. This has been a particularly vexing problem for several of my constituents. It was our intent to cover the USPS when the act was first written; S. 2479 will make coverage explicit.

Mr. President, the recommendations made by this bill are nothing more than a simple matter of fundamental fairness. It is not fair when the Government promises payment to contractors in 30 days and pays its bill in 45 days—or longer. It is not fair when the Government ignores its responsibility to pay contractors interest penalties when it fails to pay its bills on time. And it is manifestly unfair when the Government takes prompt payment discounts without making prompt payment.

The administration has urged that we forgo this legislation in favor of administrative fixes for the problems identified by the GAO. I have great faith in the sincerity with which this proposal is made, but experience dictates that something stronger than an administrative fix is needed. The reforms made by this legislation are sadly necessary. I strongly support them.

Mr. President, I ask unanimous consent that the statement of Christopher R. Brewster to which I referred be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TESTIMONY OF CHRISTOPHER R. BREWSTER

Mr. Chairman and members of the Committee, my name is Christopher Brewster. Although I am currently in the private practice of law with the firm of Kaye, Scholer, Fierman, Hays & Handler, I served as Chief Counsel of what was then called the Subcommittee on Governmental Affairs during consideration of the legislation that became the Prompt Payment Act, P.L. 97-177, and in that capacity served as one of the principal staff drafters of the Senate bill. I am pleased to have this opportunity to testify before the Committee concerning the Prompt Payment Act. I salute you and Senator Trible for your leadership in undertaking these hearings, and in sponsoring S. 2479, the Prompt Payment Act Amendments of 1986.

The Subcommittee on Federal Expenditures was charged with oversight responsibility for the Federal procurement process. When Senator Danforth assumed the Chairmanship of the Subcommittee in 1981, he directed the staff to review the procurement system to identify opportunities for reform. To that end, the staff met with all sorts and conditions of government contractors, from large multinational corporations to small mom and pop companies. In meeting after meeting—but most often in our meetings with small businesses—we repeatedly heard complaints about the problems encountered in getting the government to pay its bills on time. Contractors recited story after story of delays in obtaining payment that betrayed a shocking insensitivity on the part of the government to the hardships encountered by businesses, especially small businesses, when payments were late. To make matters worse, we were told that the Government sometimes had the gall to take "quick pay" discounts after making contractors wait weeks, or even months for payment. This anecdotal evidence was bolstered by a 1978 GAO study that found some 30% of invoices were paid late for no good reason whatsoever. All in all, the GAO estimated that $9.8 billion in Federal contracts were paid late during the six month sampling period covered by the study.

We sought explanations from government managers and were met instead with lame excuses. At one point it was suggested to us that no real problem existed because the government's late payments were balanced out by many cases where the government paid bills a good deal earlier than it had to, an argument that reminded us of something Gracie Allen might have said to George Burns, and that somehow failed to give us great faith in the government's financial managers. In short order, we became convinced that prompt payment simply was not a high priority for Federal agencies, and that no amount of administrative saber rattling or GAO studies would do anything to change the slipshod way in which the government paid its bills. Therefore, Senator Danforth, together with Chairman Weicker and some 21 cosponsors, introduced S. 1131, the Delinquent Payments Act, which became, in due time, the Prompt Payment Act. The legislation, as you know, requires the Federal government to write payment due dates into its contracts, pay its bills when due, and pay interest when it fails to pay within 15 days after the payment due date. Interest penalties are to be paid out of agency budgets.

I am very pleased, and to be honest, a little proud that the years following enactment of the Prompt Payment Act have seen a substantial improvement in the government's bill paying practices. Nonetheless, there is no question that inequities remain, and that more can and should be done to ensure that government contractors are treated fairly by their government.

I have read the transcript of the hearing that was held by Senator Trible in Norfolk concerning the implementation of the Prompt Payment Act, and I have reviewed the legislation that he introduced with Chairman Weicker, Senator Bumpers, Senator Danforth, and others, to correct abuses that persist four years after the Prompt Payment Act was signed into law.

The proposed amendments make good sense. Unfortunately, the problems identified by the witnesses at the Norfolk hearing were not unexpected when the Prompt Payment Act was first written. In large measure they stem from concessions that were made by Congress, at the urging of the Executive Branch, or from creative interpretations of the Act that simply ignore the plain language of the Act.

At the outset, I should point out that the inclusion of clearly defined payment dates in all Federal procurement contracts is absolutely critical to the success of any effort to secure prompt payment. Without payment terms in contracts, or some payment standards in generally applicable laws or regulations, the task of evaluating early or late payment, while not impossible, takes on certain metaphysical properties. As was noted in the report of the Governmental Affairs Committee on S. 1131, many of the problems associated with the government's cash management practices can be traced to nonspecific payment terms in government contracts. Indeed, the lack of clearly defined payment terms not only cost contractors money in late payments—it also costs the government money in early payments. By paying bills when due, instead of early, the GAO estimated in that 1978 study that the government could save anywhere from $900 million to $3.8 billion in foregone interest. This was a principal finding of the 1978 study, and ought not to be forgotten.

To correct these problems, the Prompt Payment Act directed the promulgation of regulations providing for payment terms in all government procurement contracts. Nonetheless, four years later, there are still no provisions in the Federal acquisition Regulation (FAR) setting forth authority to specify payment terms. You are right, therefore, to include language in the Prompt Payment Act Amendments directing the amendment of the FAR to include provisions for payment terms, and in specifying exactly how those provisions should read. These regulations are the keystone of the effort to ensure prompt payment.

Another problem that must be addressed is the fifteen day grace period. As you know, the fifteen day grace period was not created by the Senate, but was instead put in the legislation by the House to avoid administrative problems that might be occasioned in calculating minor interest penalties when the government missed a payment date by a few days. The Executive Branch financial managers told us this grace period was essential to avoid imposing substantial costs on the government, especially as the government began to revise its payment practices to meet the requirements of the legislation. And so, a fifteen day grace period was allowed under the Act.

The fifteen day grace period was never intended to be a license to financial managers to pay bills in forty-five days instead of the thirty days typically afforded for payment, and the House report said as much. We suspected, however, that the grace period would be abused, and your hearings confirm that suspicion. Your proposal to phase out the fifteen days grace period therefore makes very good sense to me. Agencies have now had four years of experience under the Act. They should be able, on the basis of this experience, to pay their bills in the time allotted for payment without resorting to a grace period to tide them over, and your proposal to ease them into prompt payment with an eight day grace period is sufficiently generous to allow for any dislocations that might occur.

You are also right to tighten the provisions of the Act respecting receipt of an invoice, to ensure that contractors are promptly informed if an invoice is in error, and to ensure that the clock starts running against the government on receipt of a proper invoice. Since prompt payment is keyed to receipt of a proper invoice, agencies have every incentive in the world to delay receipt, or even lose an invoice, to avoid prompt payment penalties. Your proposal to declare an invoice received on the later of the actual date of receipt or five days from delivery of goods or services should deprive agencies of any effective means to avoid their responsibilities under the Act. I should note that the government has the opportunity, under your bill, to specify a longer period for acceptance of goods or services at the time the contract is written, and this is appropriate. When contractors know, up front, that they can expect delays in payment, they can build in this cost when they prepare bids. Currently, they are at the mercy of the agencies, and that is simply wrong.

You are right in making it clear, through this legislation, that payment of interest penalties should be automatic. This was the intent of the original Act. Requiring contractors to ask for interest penalties only adds insult to injury. It also plays upon the reluctance some contractors have to "rock the boat" and risk opportunities for future contracts. Moreover, since interest penalties accumulate daily, contractors are hard pressed, as a practical matter, to calculate interest penalties.

When a contractor meets the obligations of the contract and submits a proper invoice, timely payment is the law, and interest penalties for late payment are a matter of right. You are justified, therefore, not only in directing automatic payment of interest, but also in doubling the interest penalty in cases where the agency intentionally or capriciously holds back interest payments and forces the contractor to demand payment.

Finally, I think that you are right in making clear that the Act is intended to apply to progress payments. This was always the intent. The Act provides for "separate payment dates for contracts under which goods or services are provided in a series of partial executions or deliveries to the extent the contract provides for separate payments for partial execution or delivery." Nonetheless, progress payments have been said to be outside of the scope of the Act. This makes no sense. It is just as important for progress payments to be paid on time as it is for any other payments to be made on time, and the government should expect to suffer penalties when it does not live up to the terms of its agreements.

Mr. Chairman, when the Prompt Payment Act was written, Senator Chiles observed that "life is full of small victories, and passage of this bill will certainly be one of them." He was certainly right. In the best of all possible worlds, it should not be necessary for Congress to pass a law in order to get the government to pay its bills on time—and it certainly should not be necessary to come back and amend the law to ensure compliance.

After all, in any procurement system there are few things as fundamental as paying bills on time. Nonetheless, the Federal procurement system being something less than the best of all possible worlds, it sometimes becomes necessary to write laws to accomplish what ought to be fundamental business practice, and this is one occasion when legislation is a necessity. I hope and trust that this legislation will find smooth passage in Congress and that the President will support it. I am willing to work with you in that effort, and to assist you in your work in every way possible.

Mr. GRASSLEY. Mr. President, I rise in support of S. 2479, the Prompt Pay Act Amendments of 1986.

The purpose of this legislation is quite simple: to ensure that the Government pays its bills on time. It should not be necessary to legislate prompt pay. Paying bills on time is a matter of course for most businesses and individuals, but the Federal Government has a lamentable record in this area.

S. 2479 closes loopholes in the original prompt pay legislation which was enacted into law in 1982. The 1982 act required that the Goverment pay its bills within 30 days and pay interest when payments are late. The Government's record has improved somewhat since 1982, but significant problems persist. Many Federal agencies do not comply with the provisions of the law either due to inefficiency or due to deliberate circumvention of the law.

The GAO has recently audited the Federal Government's bill paying performance, and the GAO conclusions support the need for the Prompt Pay Amendments Act. The GAO estimated that agencies paid only about 75 percent of invoices by the due date and that five of every six vendors that were entitled by law to interest payments did not receive them.

Several recent executive branch actions indicate that agencies are ignoring the intent of the 1982 law. For example, both the 1982 act and S. 2479 require that agencies pay their bills within 30 days, but regulations published in the July 17 Federal Register call for an 80-day payment period. This is clearly not the intent of Congress.

Deputy Secretary of Defense, William H. Taft IV told a Senate Appropriations subcommittee on Auguest 7, 1986

Further, the Prompt Payment Act provides a 15-day grace period after the payment due date before incurring interest penalties. Delaying payments 10 days into this grace period will reduce outlays by an additional $2.8 billion in FY87.

Neither the 1982 act nor S. 2479 permits such a 10-day delay, and I hope that DOD will reconsider this policy in light of S. 2479. Another example of this deliberate noncompliance is that the Commodity Credit Corporation has suspended application of the 1982 Prompt Payment Act for all payments for purchases of meat.

Mr. President, passage of S. 2479 is a warning to Federal agencies that Congress expects them to pay their bills on time. This is an important issue for small businesses in Iowa and I urge the Senate to support S. 2479 as a fair and well-reasoned solution to the problem.

Mr. DIXON. Mr. President, I rise today to join my colleague Senator TRIBLE in expressing appreciation to the Senate leadership for allotting time on the busy schedule for consideration of the Prompt Payment Act Amendments of 1986.

Small business led the fight for the passage of the original Prompt Payment Act in 1982. In essence, the law was passed to assure that all contractors dealing with the Government are paid on time or receive interest penalties for late payments. Small business Government contractors have now had 3 fiscal years of experience with this legislation. As Senator TRIBLE has detailed in his eloquent opening statement, these 3 years of experience reflect that the act has very substantially improved the Government's bill-paying practices. However, problems still remain.

The prompt payment coalition has been monitoring the act's implementation and collecting examples of how agencies have frustrated the act's pur-

poses by exploiting ambiguities during their implementation. Receiving payment in a timely manner is especially important to small businesses for which cash-flow is such a significant factor in their success.

During the 1986 White House conference on Small Business, the issue of prompt payment became one of the final 60 recommendations. Permit me to quote the report of the final recommendations in reference to prompt payment:

Prompt pay legislation should be extended to cover Postal Service and federally assisted procurement and strengthened through an amendment to the 1982 Prompt Payment Act to eliminate the 15-day grace period; require automatic payment of interest penalties; more clearly define that the entire payment process, including acceptance, must occur within 30 days; include progress payments and retainage; and require prime contractors to pay their subcontractors within 7 days after receiving payment from the Government or incur interest payment penalties.

In addition, when the Government pays the prime contractors late, interest payments shall flow through from prime contractors to subcontractors on a pro rata basis.

The Prompt Payment Act shall vigorously be enforced by all branches of government.

Mr. President, I believe we are now addressing the legislation that cares for the concerns of the small business community. Indeed, all Government contractors will benefit from this bill.

This legislation closes existing loopholes and insures that our small businesses receive contract payments in a timely fashion. We have similar provisions in Illinois law, and I am glad to report that these procedures work well in my State. We should do the same at the Federal level.

I encourage my colleagues to join me in supporting this legislation.

Mr. BURDICK. Mr. President, I welcome the opportunity to participate with Senators TRIBLE, COHEN, and many others in cosponsoring and supporting the call for fast action by this body on S. 2479, the Prompt Payment Act Amendments of 1986.

Over the past 4 years, since the passage of the Prompt Payment Act of 1982, many Government bills have been paid more promptly. Federal agencies have expressed concern about paying interest on those invoices that are paid late. Unfortunately, however, that concern has not always translated into paying bills within the time period indicated on the invoices.

The experience of many businesses that supply goods and services to the Federal Government is that the intent of Congress, clearly set forth in the 1982 act, has not been implemented in payment procedures and practices.

For example, businesses have reported a sharp increase in the number of invoices that have been lost since the Prompt Payment Act went into effect. Other businesses relate that their invoices travel through several individuals or offices before the payment clock starts.

An August, 1986 General Accounting Office study concludes that, during a 4-month test period, 24 percent of all Federal payments were made after their due dates. Some were extremely late—being paid as much as 150 days later than they were due. Required interest payments were seldom paid. The GAO report concluded further that Federal agencies paid only one of every six interest penalties that were actually owed.

Mr. President, S. 2479 spells out exactly when the payment clock begins. It states that an invoice is considered to have been received when the designated person or agency receives a proper invoice, or five days after "the property is actually delivered or final performance of the services is actually completed."

Another clarification in S. 2479 will help remove the burden on businesses who work with the Federal Government. The Prompt Payment Act of 1982 explicitly stated that interest automatically should be included with late payments. This simply has not happened.

Business after business suffers late payments—without interest. Research indicates that only when interest is specifically demanded, on a case by case basis, is it paid.

I need not tell you, Mr. President, that few companies, particularly our small and medium size organizations, have the staff or resources to carry out a lengthy and time consuming campaign to get interest on late payments. It is difficult enough just to get the invoice paid.

S. 2479 states that businesses are entitled to double interest in the event that the Government withholds interest that is clearly due. Such a penalty should stop agencies once and for all from making companies come begging for the interest penalty that is due them.

The legislation at hand more carefully defines and explains payment terms and conditions under the act. I believe that this provides the necessary tools for agencies to carry out the very straightforward intent of Congress—the Government simply must pay its bills on time.

Mr. BUMPERS. Mr. President, it is with pleasure that I rise in support of S. 2479, the Prompt Payment Act Amendments of 1986. When Senator TRIBLE, Senator WEICKER and I introduced this legislation along with 18 original cosponsors, we recognized the need to improve a law that is of major importance to the Nation's small business community.

At a hearing held by the Senate Small Business Committee, where I have the privilege of serving as ranking member, we heard from a number of business people about problems they continue to encounter in trying to get the Federal Government to live up to the terms of the original Prompt Pay Act. I might add that I've been working on this problem since I first learned that the act did not apply payment standards equally to poultry and red meat products. This was an issue of some importance in the Nation's largest poultry producing State, my home State of Arkansas. Congress has since changed this requirement to include poultry with other meat and meat food products, a change that was badly needed.

in addition, my childhood served to enlighten me to the importance of prompt payment of one's debts. My father's small-town business and the businesses which I later operated depended on customers who lived up to their obligations in a fair and honest manner. Prompt payment of debts is among the most basic ethics of business. This same standard of ethics should apply whether the purchaser is a hardware store in Charleston, AR, or an agency of the Federal Government. Indeed, it's the small business owners who suffer most when late payments by the Government either make it impossible to participate in Government markets or cause them harsh economic consequences for taking the risk of doing business with the Government.

S. 2479 represents an attempt to make a good law better and work the way it was intended by Congress. Despite agency protestations to the contrary and indeed contrary to the Office of Management and Budget's own published reports, Federal agencies are still paying about 24 percent of vendor payments after the due date. This information is contained in a report recently issued by the General Accounting Office at the request of the House Subcommittee on Legislation and National Security. The GAO studied, in a 4-month period, 1,520 randomly selected invoices totaling about $17.4 million at 39 statistically selected payment centers for 13 departments and agencies. I recommend this report to my colleagues as it highlights the need for legislation to enforce the Prompt Payment Act.

Other findings by GAO include the fact that—despite clear congressional intent—the supposedly automatic interest penalties on late payments are seldom paid: Only one of every six penalties owed in the GAO sample was paid. Payments made during the grace period allowed by the act constituted about 18 percent of the adjusted sample invoices; 217 invoices could not be studied in this manner because of the agencies' failure to document precise due dates. That means 18 percent of payments, almost one in five, are being made in the grace period when it was clearly the intent of Congress that

the 15 days' grace be used only for extraordinary circumstances that would prevent timely payment. S. 2479 phases out the grace period in the law, and the results of the GAO study underscore the need for its elimination. In the age of computerized bill-paying by Federal agencies, there is little excuse for such delays.

Furthermore, GAO estimates that 8.6 percent of commercial vendor invoices were paid after any applicable grace period. Again, action is needed to ensure that agencies comply with the law. Frankly, the anecdotal evidence received by Senators suggests this problem is even more widespread than 8.6 percent. Some small business owners have told me they were reluctant to ask for an interest payment to which they were legally entitled for fear of bureaucratic retribution.

Other startling disclosures by GAO are the projections that, for the 4-month period in question, agencies should have paid vendors about 278,000 late payment penalties, totaling about $15 million. In addition, GAO estimates that during this period about 146,000 "early payment" discounts, totaling approximately $2 million, were wrongfully taken by Government agencies after the discount period had expired, and were not repaid.

OMB's annual report of compliance with the Prompt Payment Act showed a total of 281,258 interest penalties for a total of $7,121,205 paid during 1985. Unhappily, the reporting does not tell the entire story, and that is another reason why S. 2479 is needed. This legislation requires OMB to report to Congress not only interest penalties paid, but also late payments for which no interest penalty was paid and the reasons why not. Greater accountability is needed for Congress to exercise its oversight responsibilities in this area, and S. 2479 provides the needed tools.

Mr. President, S. 2479 also makes other important and needed changes in the law. This bill will ensure that construction progress payments are subject to payment requirements, and late progress payments will incur interest penalties as they should. We have also extended prompt payment to subcontractors, as a considerable majority of Federal construction work is carried out by subs working under the prime contract.

This bill has broad support among the small business community.

One other point I would like to make is that at the time of the Senate Small Business Committee hearing in June, I was receiving many complaints about late payments by the Health Care Financing Administration [HCFA] to suppliers under the Medicare Program. The committee was told by officials from the administration that HCFA considered these payments exempt from the Prompt Payment Act because they were actually disbursed by fiscal intermediaries. That is, the payments are actually disbursed by contractors such as Arkansas Blue Cross and Blue Shield, which work under close supervision and direction of HCFA. That concerned me greatly and I raised that matter at the hearing. We received testimony by HCFA concerning the administration's payment practices and efforts to address obvious problems. I was impressed by HCFA's apparent goodfaith efforts to address this problem and, consequently, this bill does not contain a provision dealing directly with Medicare. However, if this problem remains unresolved when the 100th Congress convenes, then it may be necessary to amend the Prompt Payment Act to ensure that these Medicare payments are made promptly.

Mr. President, I urge my colleagues to join me in supporting S. 2479.

Mr. GORE. Mr. President, S. 2479, the Prompt Pay Amendments of 1986, will go far in addressing the Federal Government's ability to pay its bills. In 1982, Congress approved the Prompt Payment Act to ensure that businesses would be reimbursed in a timely manner for providing goods and services to the Government. The act also required the Government to pay interest penalties if the businesses were not paid on time.

While this act has significantly improved the manner in which the Federal Government pays its bills, many agencies still continue to pay almost 25 percent of their bills after the due date and fail to pay the interest penalty due on late payments. S. 2479 would address these and other problems in the system. It would clarify exactly when the 30-day payment term begins and require that interest be paid automatically, without demanding that the contractor request the payment. An important addition to the act will be the inclusion of subcontractors under construction contracts by requiring that subcontracts include a payment clause which necessitates prompt payment.

The 1982 act vastly improved the way Federal agencies deal with the businesses that provide the goods and services necessary to their mission. The 1986 prompt pay amendments will augment those changes and create a better system for the Federal Government to pay its bills promptly and efficiently. I am pleased to be a cosponsor of this legislation and I look forward to the quick and speedy implementation of its provisions.

Mr. LEVIN. Mr. President, I am pleased that the Senate is considering S. 2479, the Prompt Payment Amendments Act of 1986, and I urge my colleagues to support it. I was an original cosponsor of the legislation that created the Prompt Payment Act in the 97th Congress, and I am an original cosponsor of this legislation which makes improvements in the act.

In 1978, the General Accounting Office [GAO] reported to Congress that the Federal Government was paying its bills too early or too late. Congress responded to that report by passing the Prompt Payment Act in 1982. That act requires Federal agencies to pay their bills within 30 days or pay interest on overdue amounts. The law even provided a grace period of 15 days. If bills were not paid by the 45th day, interest accrued automatically from the 30th day. This was a solid step toward assuring that those who do business with the Federal Government are treated fairly and paid within a reasonable period of time.

In August of this year, the GAO reported to Congress that, "Passage of the act and its implementation led to substantial improvement in Federal bill-paying performance." The GAO also reported that, "the full potential of the law has not yet been realized," referring to the fact that a significant portion of bills are still being paid later than they should be.

The Senate is responding to this GAO report by proposing the changes in the Prompt Payment Act that we are considering today. These changes will enable us to realize the full potential of the law. The legislation strengthens the interest penalty provision, phases out the grace period, and strengthens the congressional plan that progress payments for completed work are covered by the act.

Hearings on the bill indicated that Congress should consider extending the policy of prompt payment to construction subcontractors and suppliers. After consideration of this matter, the Senate included provisions to provide such an extension.

There are hundreds of thousands of small businesses that provide goods and services to the Federal Government. We have made significant improvements in becoming a better customer for small businesses. As the recent GAO report indicates, we still have a way to go. This bill is an important step in that direction, and I urge its adoption.

Mr. NUNN. Mr. President, as a cosponsor of the Prompt Payment Act of 1982, I joined with Senator TRIBLE, Senator COHEN, and many of my colleagues in urging passage of S. 2479, legislation providing necessary amendments to the act.

Our intent in 1982 was straightforward: To establish guidelines for Federal agencies to pay their suppliers in a timely fashion. The prompt pay legislation was born out of the fact that the Government was in essence borrowing money free of charge from those who supplied goods and services. At that time, millions of dollars were

months past due. For many small and medium-sized businesses, those unpaid Government invoices caused severe hardships.

During consideration of the Prompt Payment Act, Federal agencies indicated that they did not favor the legislation. They expressed the opinion that fiscal management of the taxpayers' money mandated that invoices be held as long as possible. Unfortunately, those savings to the Government really are nonrecoverable losses to the supplier. The reluctance to pay promptly did not stop totally with passage of the 1982 act, and has been a continuing problem in the last 4 years since passage.

Certainly, many invoices are being paid much more promptly today than 4 years ago. There are, however, certain disturbing behaviors that these amendments can correct.

First of all, these amendments reiterate the intention of Congress that bills will be paid on time, in a manner congruent with the standard practices of various business sectors.

Second, the burden that business has borne is now listed. The amendments ensure that the payment clock for invoices is not set back and that interest payments owed on overdue payments are made automatically.

Third, the amendments include a provision for the implementation of the act to be carried out through the Federal acquisition regulation.

Mr. President, I believe that these amendments will provide a clear message to the Federal agencies that paying bills on time is clearly consistent with congressional intent and a necessary component of sound fiscal management.

When Congress approved the Prompt Payment Act in 1982, we were confident that the agencies would comply with our intent. Indeed, early indications were that payment of invoices had speeded up considerably. I am confident that these amendments will facilitate the payment of agency bills in a more timely fashion. With these practical amendments I believe we provide the necessary tools to implement in all agencies the provisions of the 1982 Prompt Payment Act. Mr. President, I urge adoption of the bill by the Senate.

Mr. SASSER. Mr. President, I am pleased to join in today's effort to pass much needed changes to a most worthy program, the Prompt Payment Act. The Prompt Payment Act Amendments of 1986, S. 2479, which we offer today will greatly enhance the prompt pay procedures. As my colleagues will recall, we passed the Prompt Payment Act back in 1982. The act is designed to make the Government pay its bills on time to Federal contractors and others who supply goods and services to the Federal agencies.

This act brought much needed relief to thousands of small businesses which did business with the Federal Government. When we first looked into this issue several years ago, we found that the Federal Government was not paying its bills on time between 30 and 40 percent of the time. Nearly $10 billion in Federal payments to Government contractors was not paid within 30 days.

We have made great improvements since 1982. Indeed, the Prompt Payment Act has diminished the number of late payments made by agencies. But there are several problem areas calling out for action. A handful of agencies and payment centers are not meeting the mandate of this legislation.

Corrective legislation is necessary, Mr. President, because quite frankly, we can't count on the administration to clear up these problem areas. The Office of Management and Budget has shown little inclination to make administrative changes necessary to eliminate recurring late payment problems at various agencies.

The primary OMB document for implementing the Prompt Payment Act is OMB Circular A-125. That circular has not been significantly revised since it was first issued by OMB in 1982. We hear that some proposed changes to the circular will be forthcoming. Well, we have heard that tune before. And even if true, these changes will be too little, too late. We need clear direction in this important area and S. 2479 provides that direction.

Since passage of the act in 1982, we have continued to receive complaints by both large and small contractors of repeated late payments by several agencies. Yet, policymakers at OMB have been unable, and some would suggest unwilling, to revise Circular A-125 to bring defaulting agencies in line. In fact, the so-called cash management philosophy which pervades the circular appears to encourage agencies to make payments as late as possible and still be within the time limits set by the Prompt Payment Act.

This policy of cash management may improve the Government's account ledgers, but it reeks havoc on small firms. These companies are forced to borrow money at high interest rates to finance their operations while they wait for a Government check. Clearly, OMB's present policy is penalizing small businesses. We need to correct that. S. 2479 moves us in that direction.

Let me add, Mr. President, that while S. 2479 makes needed changes necessary to solve many of the persistent late payment problems, the bill does not do this in a way that unfairly or unnecessarily impairs agency operations. To the contrary, the legislation basically clarifies certain aspects of the current law so as to reduce agency discretion as to when bills must be paid. For example, the legislation reduces the grace period in the act from 15 to 7 days and imposes time restrictions for acceptance, rejection, and certification of goods or services rendered.

In short, Mr. President, this bill presents a commonsense approach to refine a current law that is working to the benefit of contractors who do business with the Federal Government. I urge my colleagues to support this important measure.

Mr. CHILES. Mr. President, the Senate's consideration of amendments to the Prompt Payment Act of 1982 is important for many businesses who do business with the Federal Government. I am a cosponsor of S. 2479 because I see this legislation as an extension of the effort that I've been involved with since my membership on the Procurement Commission. In 1982, I cosponsored the generic prompt pay authored by Senator DANFORTH.

Legislative success in this area has been measured in small steps. The idea that the Federal Government should pay its bills on time is foreign practice to many executive branch agencies. It is important yet it is a simple, straightforward principle that the Congress reemphasize that agencies cannot deliberately hold back payments beyond the 30-day time limit or face interest payments—just like any other business firm or individual citizen.

Hearings by the Small Business Committee and Governmental Affairs Committee in the past have detailed some of the problems facing subcontractors who work on Government projects. We heard graphic details of small firms that can almost—and sometimes do—go bankrupt because of the retainage situation where a percent of the payments are held in abeyance long after the contract has been completed.

Subcontractors also have the added problem of trying to get their payments on time from prime contractors. The ripple effect is that sometimes the prime contractors will not be paid promptly and thus will not pay the subcontractor on time. Mr. President, I think the Government should pay its bill on time or pay interest. Let there be no mistake about my feelings on that situation. However, there are large companies that can survive late payments and continue to operate. Almost all of the small contractors on Federal projects operate on such a tight cash flow situation that a late payment can ruin them altogether. It's happened before and will likely happen again.

Many small firms or subcontractors simply don't have the personnel to track down Federal agency personnel and get paid. They don't have enough

people who can call up and followup to be sure that agencies will get tired of being reminded of their indebtedness and pay up. Usually a person key to the company's operation must take time out of their production duties to handle the administrative paperwork and phone calls in order to be paid. That should not have to happen. I am hopeful that when legislation such as S. 2479 becomes law it will no longer happen.

Mr. President, I want to compliment Senators WEICKER, TRIBLE, COHEN, LEVIN, ROTH, and others for the fine work that's been accomplished on this bill.

Mr. EAGLETON. Mr. President, I am a cosponsor of S. 2479, the Prompt Payment Act Amendments of 1986, and I participated in the final approval of the bill in the Governmental Affairs Committee. We approved it unanimously.

The need for this bill illustrates how far the executive branch agencies can stray from the intent of the laws we pass. As a cosponsor of the original Prompt Payment Act of 1982, I thought we had good reason to expect that the agencies would make a sincere effort to follow through on the rules we set. Some did and there has been some progress.

But, when we read in the Federal Register how they planned to administer the law, it was clear that S. 2479 is needed to get them back on the right course. The proposed regulations, if approved, would create 19 different loopholes in the 1982 act. For example, the act calls for payment of bills in 30 days, the regulations allow up to 80 days. These loopholes were very well spelled out by Kenton Pattie, director of the Coalition for Prompt Pay, in his letter to the Federal Acquisition Regulation Secretariat.

To strengthen the record in support of S. 2479, Mr. President I ask unanimous consent that the September 15, 1986, letter from Mr. Pattie be inserted in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COALITION FOR PROMPT PAY,
September 15, 1986.

Re: FAR Case 84-30.
GENERAL SERVICES ADMINISTRATION,
FAR SECRETARIAT (VRS),
Washington, DC.

DEAR FAR SECRETARIAT: On Thursday, July 17, 1986, proposed regulations were published in the Federal Register to incorporate the provisions of the Federal Prompt Payment Act of 1982 into the Federal Acquisition Regulation (FAR).

The Coalition for Prompt Pay encourages standardized payment practices which are consistent with the Prompt Payment Act. Inclusion of statutory prompt pay requirements in the FAR would help businesses and agencies conduct their transactions expeditiously.

However, we are concerned because the proposed regulations do not accurately follow the requirements of the statute. In fact, the proposed FAR language misses the intent of Congress by such a wide mark that we believe the FAR Secretariat needs to launch a thorough and serious study of the issue before again attempting to publish on this subject. Among the steps the Secretariat should take:

1. A public hearing open to industry representatives who could describe the impact of the proposed rules on the government and the private sector.

2. A period of reviewing proposals currently being studied by Congess, including those embodied in S. 2479 which is the product of two Senate Committees.

3. A study of the recent General Accounting Office report on implementation of the Prompt Payment Act, a study not available in July when the Far draft was published.

Our specific comments on the Federal Register item follow and we would appreciate your making these a part of the record:

PROPOSED RULE

Parts 32 and 52 titled "Contract Financing" and "Solicitation Provisions and Contract Clauses"

Coalition Comment: We question the desirability and advisability of having two sections of the FAR dealing with prompt payment. Why not have one section? How inconvenient to ask contract officers and vendors to refer to more than one place in the FAR to determine the rules. Furthermore, neither section 32 nor 52 is properly titled to accommodate prompt pay. Certainly "Contract Financing" is not the proper title and nor is "Solicitation Provisions and Contract Clauses". Therefore, the Coalition recommends that a single FAR part be created to encompass all rules and contract clauses regarding prompt payment. Further, we recommend that that part be named "Part xx Prompt Payment".

To maintain two separate FAR parts in future years will invite possible inconsistencies and misinterpretations by those who speculate on proper procedure while trying to put together parallel sets of instructions. One part devoted entirely to prompt pay will suffice.

PROPOSED RULE

32.502-1 Use of customary progress payments

This rule would prohibit progress payments from being made for "quick turnover" items for which progress payments are not customarily made in commercial transactions. The rule defines such items as: "subsistence, clothing, medical and dental supplies, and standard commercial items not requiring a substantial accumulation of predelivery expenditures by the contractor."

Coalition Comments: In this subpart, the FAR proposal attempts to define what will qualify for "progress payments" by indicating what will not qualify. At best this is an awkward approach to a straightforward problem. Why not just say what will qualify for progress payments such as construction, remodeling repairs for such requirements as electrical, plumbing, heating, computer installations, sound and communications systems installations, and other mechanical or electronic performance that involves extended contractor work on site beyond the moment of delivery?

At worst, this provision causes more problems than it solves, by saying: "If progress payments are granted in circumstances such as these, the contracting officer shall certify that such financing was in the best interest of the Government. The certification shall include full justification and specify the financing cost implications of the Government considered by the contracting officer . . ."

Because the Prompt Payment Act already authorizes partial payment for partial completed delivery, the above provision deliberately undermines the Act itself. Under no circumstances should a contract officer be required to develop a certification for every partial payment owed for such things as subsistence, clothing, medical and dental supplies and standard commercial products. The Act calls for no such certification. A-125 calls for no such certification. Therefore, the FAR has no business calling for any such certification.

We recommend that this paragraph be deleted and replaced with one which simply lists areas that would qualify for progress payments and makes no mention of certification for periodic payments.

Further, the replacement paragraph should not refer to "financing cost implications" because partial payments on partial delivery are not considered "financing". Partial payments are for completion of specific steps in a project, for delivered portions of a contract, and are in no way a means of "financing" vendors.

PROPOSED RULE

Subpart 32.9 Prompt Payment

32.901 Applicability

This subpart does not apply to purchases of utilities (gas, water, electricity) when late payment charges are included in the contract or established by tariff or state regulatory commissions.

Coalition comment: Nowhere in either the Act or the A-125 Circular are payments owed to utilities exempt from coverage of the Prompt Payment Act. Congress certainly did not intend to give a blanket exception of any class of contracts.

What the FAR provision does is to hide utilities behind the fact that the law allows contracts which establish payment terms. Since all utilities are procured under contract and are subject to tariff or regulatory commissions, the FAR proposal, if adopted, would leave out utility payments from the Prompt Payment Act henceforth.

The Coalition feels this proposed provision is entirely unnecessary and implies that the FAR writers have the authority to exempt certain classes of payments from time to time. The Act already takes care of the contingency raised by the FAR "applicability" section.

In lieu of this draft provision, we recommend an alternative provision be inserted:

"No purchases or classes of purchases are exempt from the provisions of this regulation."

PROPOSED RULE

Subpart 32.9 Prompt Payment

32.902 Definitions

"Designated payment office" means the place designated in the contract for fowarding invoices and requests for contract financing payment (e.g., disbursing office) or, in certain instances, for approval."

Coalition for Prompt Pay Comments: The above definition while it follows the existing OMB Circular A-125, has been the subject of considerable misunderstanding concerning the intent of Congress in the law. Because of this misunderstanding which has resulted in a variety of different practices among agencies, proposed legislation in the U.S. Senate eliminates the term "designated payment office" and for purposes of deter-

mining date of receipt of invoice substitutes, "office or employee of the agency designated by the agency to first review such invoice".

This change is intended to clarify the problem of delays occurring at the outset of the payment process in which invoices are shuffled for months among various offices. It clearly defines receipt of invoice as the date on which the "office . . . first receives such invoice," or on the fifth day after the date of delivery.

We would suggest that a similar change be made in the FAR. Such a change would not be inconsistent with existing law in that the change merely clarifies when the 30 days allowed for payment begins. Without this provision agencies can cause long and unnecessary delays which are contrary to the intent of the Act, which calls for prompt payment.

The recordkeeping functions, processing of paperwork relating to agency purchases, and issuance of a check should not consume more than the 30 days allotted by law. This change we propose makes that intent clear.

PROPOSED RULE

Subpart 32.9 Prompt Payment

32.902 Definitions

"Contract financing payment" means a disbursement of moneys to a contractor for operating capital incidental to contract performance, such as a progress payment, advance payment, and interim cost reimbursement."

Coalition comment: Under no circumstances should a progress payment be considered a "contract financing payment". A progress payment is simply a payment for a completed stage in a project. A payment at this point is fair compensation for the company's completed work. Neither the company nor the government agency considers it as "financing" nor is it operating capital incidental to contract performance. But instead a progress payment is a payment for services rendered. In contrast, we have no argument with the concept of including "advance payments" as "contract financing". Advanced payments are usually made in a series and are not based on the achievement of specific stages of work but rather are based on the firm's need for a positive cash flow (operating capital) during a special period in the contract fulfillment.

Further, the Coalition questions the inclusion of "interim cost reimbursement" as a form of "contract financing". The term "cost reimbursement" implies a finished job and as such a payment would not constitute "financing" but rather a payment for a service rendered for goods previously purchased. We believe that any form of cost reimbursement is specifically covered by the Prompt Payment Act and we recommend that the FAR so state.

Meanwhile, we recommend that in 32.902, the words "progress payment" and "interim cost reimbursement" be deleted from the definition of "Contract financing payment".

PROPOSED RULE

32.903 Policy

. . . "Prompt payment discounts offered by the contractor shall only be taken when invoice payments are made within the discount period."

Coalition comments: Because so many contractors have reported abuses of early payment discounts, we recommend that language be added to clarify that the discount period begins at receipt of invoice in the office first designated for initial receipt, not at some future date when all the receiving paperwork has been processed in some second, third or fourth office. Again, the change recommended by the Coalition is consistent with Congressional intent.

PROPOSED RULE

32.905 Payment Standards

"(a) Invoice payments shall be made as close as possible to, but not later than, the due date established in the Prompt Payment clause at 52.232.25."

Coalition comments: The Prompt Payment clause at 52.232.25 incorrectly allows an additional 30 days for payment beyond the 30 days specified by statute. Our comments on that section follow in sequential order. However, a policy of making payments "as close as possible to" the due date runs the considerable risk of unintentional delays which can and often do carry the payment beyond the statutory 30-day terms. This phrase "as close to as possible to but not later than" is not in the Act, but has been advanced by OMB as a tool of its Cash Management program. Cash Management is not a legislated program of the government and should OMB wish to enforce this provision they should seek a change in the law to authorize it. Short of a change in the law, agencies should be allowed to pay at any time within the 30 days.

Unfortunately the language you propose created the current practice of routine misuse of the grace period for issuing payment, a misuse of the extra 15 days allotted by Congress to help in emergency situations, but not for routine use. An example of this abuse is the Department of Defense's recent announcement that it wants to begin delaying payments to reduce outlays. Since current practice calls for issuance of the check "as close as possible" to the due date, this means the interest-free grace period will be used routinely by DoD.

We recommend that care be taken in drafting a FAR requirement that still offers the Government the benefit of the statutory payment period of up to 30 days but does not result in abuses. For example, a sentence should be added in the FAR that this requirement does not in any way authorize the routine extension of payments into the 15-day grace period permitted by statute. There are agencies which find they get better prices and more competition when they promise to pay in under 30 days. These agencies should not be precluded from "Fast Pay" and similar programs because such programs are in the interest of the government and encourage participation of small firms. Therefore, the FAR language should be changed to spell out clearly the circumstances in which the grace period may be utilized keeping in mind Congressional intent that it be used to provide flexibility in instances of major catastrophic events, such as phenomenally adverse weather conditions or major systems failures involving a breakdown of several days or weeks, etc. Delays should never be allowed in cases of routine employee leave, work backlog, and lost paperwork. Of course, such delays would have far less impact if agencies could pay anytime within the 30 days.

PROPOSED RULE

32.905 Payment Standards

"(b) If an invoice is determined by the designated payment office to be defective, then the contractor must be notified of the defect within 15 days after receipt of the invoice at the designated payment office. This notification of defects period is 3 days for meat and meat food products and 5 days for perishable agricultural commodities."

Coalition comments: This requirement is included in the statute and also in OMB Circular A-125. However, we are dismayed at reports from contractors and vendors that agencies routinely ignore the notification requirement. Obviously, the language needs to be improved so that more emphasis is placed on the fact that notification within 15 days of a defective invoice is required by law.

PROPOSED RULE

32.905 Payment Standards

"(c) The receiving report should be submitted to the appropriate office within four work days after Government acceptance, unless other arrangements have been made. . . ."

Coalition comments: The statute authorizes a total payment period of 30 calendar days; not 30 days plus 4 work days for receiving reports to be filed. There is no legal basis for this additional period to be added. All agency functions including acceptance, receiving, and payment should be made within the 30 calendar days as authorized by the statute. Further, it should be noted that the Act is entirely written around calendar days, not work days. There is no reason whatsoever why receiving should take a week or four days. Receiving should be done without fail on the date of delivery. Shipping regulations require this. Prompt inspection of goods is in the government's best interest and no FAR provision should encourage delay in receiving.

PROPOSED RULE

32.906 Determining Due Dates

"(a) The due date for invoice payment will be the 30th day after receipt of a proper invoice by the designated payment office or the 30th day after the supplies or services are accepted by the Government, whichever is later. . . ."

Coalition comments: Because Part 52-Solicitation Provisions and Contract Clauses, 52.232-25 Prompt Payment (as proposed) authorizes an acceptance period of 30 days following delivery, this provision has the effect of doubling the statutory 30-day payment period. If 30 days are granted for acceptance and an additional 30 for payment after acceptance, the sum total called for in the FAR provision is 60 days. Add to that the previous 4 days for receiving plus the 15-day grace period permitted by law and the agencies would now have a total of 80 days in which to pay bills. This is an incredible distortion of a statute which clearly says: "30 days".

PROPOSED RULE

32.906 (a)(3) and (d) Determining Due Dates

"(3) Agency heads are authorized to prescribe longer periods, if justified."

"(d) Agency heads may also adopt longer periods as policy (e.g. 30th day after receipt)."

Coalition comments: There is no basis for these statements in the statute. Instead, under the Act, the agency head is responsible for enforcing the provisions of the Act and has no authority whatsoever to waive the Act. Under the Act, there is no justification for being late. No excuses are acceptable, whether prescribed by the agency head or by anyone else in the agency. Congress wanted a "no excuse", on-time payment policy. But, these proposed provisions in the FAR open up a new loophole—an excuse signed off on by the head of the agency. We are opposed to these provisions in the pro-

posed rule and recommend that you remove them.

PROPOSED RULE

32.906 Determining Due Dates

"(b) The Prompt Payment clause at 52.232.25 specifies that, unless otherwise established by the contracting officer under a special provision in accordance with agency procedure, acceptance should occur within 30 days following contractor delivery of supplies or services . . ."

Coalition comments: As stated previously, the statute does not allow an additional 30 days for acceptance beyond the 30 days for payment. Therefore, lacking any statutory base, this provision should be deleted and the following inserted:

"The Prompt Payment clause at (52.232-25) specifies that, unless otherwise established by the contracting officer under a special provision in accordance with agency procedure, all acceptance, receiving and payment functions should occur within 30 days following contractor delivery of supplies of services or receipt of proper invoice by the office or employee of the agency designated by the agency to first review such invoice".

PROPOSED RULE

32.906(b) Determining Due Dates

". . . and it does not compel the disbursing officer to make payment prior to obtaining a receiving report."

Coalition comments: In this provision, the FAR would give the agency 30 days to accept delivery, a period which is outrageously excessive and entirely contrary to the Act, as we shall show later in this paper. But to make the 30-day acceptance period even worse, the FAR adds another loophole: if you don't have the receiving report after 4 working days and after 30 additional acceptance period days you can wait as long as you want until you receive the receiving report. In contrast, the FAR should require that the receiving report be advanced to the payment office immediately, with no excuses being acceptable. There should be no latitude for agency personnel to wait indefinitely for receiving reports. The FAR should establish that it is the responsibility of the payment office to obtain the receiving report in time to make a prompt payment.

In our opinion, the loophole you have outlined here is at the heart of what is wrong with the government's payment practices. Agency employees feel that the word "prompt" in "Prompt Payment Act" applies only to what they do after they get all the paperwork together, and paperwork accumulation can take as long as they wish. Even though you appear to say in 32.906 that under the FAR 30 days should be enough to accumulate the paperwork, in fact by leaving the receiving report loophole, you are trying to open up the 30-day Act to be an indefinite-period Act in [(in d)] which the standard is not set by Congress, but by the agency which loses, or misplaces, or overlooks receiving reports.

PROPOSED RULE

32.907(h) "Interest penalties are not required on . . . amounts temporarily withheld in accordance with terms of the contract . . ."

Coalition comments: If there is a reasonable disagreement over performance under a contract, there is a basis for temporarily holding up part or all of a payment, pending resolution of the disagreement. Under those circumstances, payment must be made promptly on resolution of the disagreement. We recommend that the FAR be very clear on this point: Every effort should be made by both parties to rapidly clear up disputes and, on that resolution, the agency must pay promptly. The regulation should prohibit the withholding of payments for an additional 30 days following resolution of a dispute.

However, there is a further serious loophole proposed by the FAR in refusing to pay interest penalties on "amounts temporarily withheld in accordance with terms of the contract". If the contract calls on the government to hold back 5 percent or 10 percent of a payment for retainage, pending completion of the job, then on completion the entire 5 percent or 10 percent should be released. If that 5 percent or 10 percent is not released promptly, it should be subject to the Prompt Payment Act and should be exposed to late payment interest penalties.

Yet, the proposed FAR language, in effect, exempts retainage under construction contracts from coverage by the Act. In contrast, the Act exempts no class of payments. Therefore, we recommend that, in order for the FAR to comply with the Act, that the regulation state that retained amounts under construction projects, and as a result of withholding under progress payments, are subject to the Act and would, if paid more than 30 days from completion on the job be subject to the interest penalties called for by the Act.

PROPOSED RULE

32.908 Contract Clauses

"The contracting officer shall insert the Prompt Payment clause at 52.232-25 or an alternate prompt payment clause into all contracts except utility contracts exempted by 32.901. Agency heads are authorized to prescribe alternate clauses which stipulate different standards for determining due dates on invoice payments and contract financing payments or establish different payment procedures (e.g. lease payments)."

Coalition comments: Here again the FAR writers have veered dramatically from the intent of Congress. Faced by the absence of an enforced government payment standard, and observing that private commerce had standards in the 25-30 day range, Congress decided to establish the 30-day standard of government payments and to call for enforcement of that standard through interest penalties.

The 7-day meat standard, the 10-day agricultural products standard, and the 30-day products and services standard were intended by Congress to be the rule, not the exception.

Yet, to our dismay, the proposed rule gives contracting officers and agency heads authority to thumb their noses at the Congressionally established standards by setting "different standards". What is so wrong with what Congress has done that you feel agencies can do better?

In fact, the proposed rule just culls out another in a series of loopholes to encourage the agencies to undermine the intent of Congress. When it passed the Act, Congress did not say agency heads could re-write the "Standards for determining the due dates".

Therefore, we recommend that the rule be re-written as follows:

"The contracting officer shall insert the Prompt Payment clause at 52.232-25. Changes to the clause shall be the exception not the rule and shall be the result only of mutual consent between contracting parties. Changes to the clause shall not be made in procuring commercial products and services for which there is no genuine contract negotiation between vendor and government agency. Further, agency heads are not authorized to establish alternative standards except where they find that payment in under 30 days is in the best interests of the government."

PROPOSED RULE

Part 52—Solicitation Provisions and Contract Clauses

52.232.25 Prompt Payment (a) ". . . Contract financing payment" means a disbursement of monies to a contractor for operating capital incidental to contract perforemance, such as a progress payment, advance payment, and interim cost reimbursement voucher."

Coalition comment: As mentioned previously in this paper, the FAR draft is incorrect in calling a "progress payment" or a "cost-reimbursement" a method of "contract financing". Neither payment is for financing, but rather for completion of work or service, or in compensation for a payment already issued by the vendor. Neither payment is designed as a loan, a method of capitalization, or a form of Federal assistance. Rather both are genuine commercial payments. As such, they should be treated as payments due under the terms of the Prompt Payment Act. A late progress payment should be subject to interest penalties, just as a late cost-reimbursement should be subject to interest penalties.

There is absolutely no basis in the Act for the FAR to create this loophole and we recommend that the proposed rule be amended accordingly.

PROPOSED RULE

52.232-25 (b) "An invoice shall be prepared and submitted to the designated payment office in quadruplicate (one copy shall be marked "original"), unless otherwise specified."

Coalition comments: Quadruplicate? Fortunately, the Congress, in passing the Prompt Payment Act, had better sense than recommending such an absurd regulation. Nor was such a recommendation proposed in OMB Circular A-125. "Quadruplicate" can only be the creation of cynical bureaucrats, who knowing that most vendors could not meet this requirement, would rejoice in the ever mounting backlog of rejected invoices stamped "Not Enough Copies—Refer to Quadruplicate Requirement".

Without question, "quadruplicate" sneers at the Paperwork Reduction Act and reveals the underside of a government payment system still overburdened by excessive paperwork, and hungering for more paperwork.

If private commerce can survive with a single invoice, why can't a federal agency? Must the Federal agencies be four-times worse than the businesses they contract with?

The Coalition recommends that the proposed regulation be re-written as follows:

"An invoice shall be submitted to the office or employee of the agency designated by the agency to first review such invoice, unless otherwise specified."

PROPOSED RULE

Part 52—Solicitation Provisions and Contract Clauses

52.232-25 Prompt Payment

"(c)(4) Unless otherwise specified by the contracting officer under a special provision in the contract, the acceptance date for purposes of computing interest penalties owed the contractor shall be deemed to have oc-

curred on the 30th day following the date of contractor delivery of supplies or services. . ."

Coalition comments: Again, an additional 30 days for acceptance of supplies or services is authorized here yet there is no basis for this extended payment period in the statute. Congress specifically authorized payment to be made within 30 days. The addition of standardized periods of time for all of the paperwork functions that take place prior to payment is contrary to the intent of the statute. We recommend that the 30-day payment standard authorized by Congress be adhered to and that regulations clearly spell out that all paperwork processes leading up to issuance of the check be completed within that 30-day time frame.

PROPOSED RULE

52.232-25 Prompt Payment

"(b)(6) Name and address of contractor official or office to which payment is to be sent (which must be the same as that in the contract or on a proper notice of assignment)"

Coalition comment: We question why it is essential for the agencies to match place of payment on contract with place of payment on invoice. Between the date of a contract and the completion of the work, if a vendor changes a box number or wants a payment sent to an office other than the one designated by the contract, that should be allowed. We often get complaints from vendors who say that their payment is being held up because they put one payment address on the invoice and another on the contract.

In our opinion, if the agency has a question about a discrepancy between two company addresses, such a discrepancy could be resolved during the 30 days and need not cause the invoice to be rejected on the basis of being improper. We find that government agencies change addresses during contract periods and government managers come and go, with no penalty to the government. Similar treatment should be accorded companies.

Therefore, we recommend that this provision be re-written as follows:

"(6) Name, address and phone number of contractor official or office to which payment is to be sent."

PROPOSED RULE: PART 52 SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.232-25 Prompt Payment

Alternate I (August, 1986) (End of Clause)

"(f) Electronic Wire Transfer. Payments under this contract will be made by the Government either by check or wire transfer (through the Treasury Financial Communications System [TFCS] or the Automated Clearing House (ACH), at the option of the Government."

Coalition comments: This section of the proposed regulations describes the circumstances and manner in which electronic wire transfer payments can be used. The Coalition feels very strongly that use of electronic wire transfer for government payments to vendors can solve a number of the late pay problems currently existing. It is our hope that the proposed regulations will specifically attempt to encourage the use of electronic wire transfer payments as a matter of general practice by federal agencies. The use of wire transfer should be mentioned in each contract to assure the vendor and prompt the finance office to act accordingly.

However, we object to the phrase "at the option of the government".

If the government is willing to make wire transfer payments, an agreement to do so should be reached at the time the contract is signed and there should be no subsequent doubt as to how the payment will be made. The company has a right to know where to expect the payment (in the mail or in the bank) and a firm agreement on this subject should be reached at the begining of the contract. To leave this as an option for the government places some unfair uncertainty on the contractor.

While the goal should be more and more wire transfers, the goal should be to lessen the paperwork and red-tape necessary to get a wire transfer initiated. For example, why should the vender have to fill out a form for each payment over $25,000? This would lead to endless duplication of information. Why not establish a system in which the vendor provides the information once and such information applies to each successive payment?

Proposed rule: The proposed FAR regulations (July 17, 1986) do not address the question of prompt payment to subcontractors.

Coalition comments: Many federal construction contracts require subcontracting with a number of small business firms. When government payments are paid late to the prime contractor, this creates an equal burden for subcontractors who must wait to receive their payment from the prime. Interest penalties paid by the government to prime contractors should therefore be passed through to subcontractors within 7 days. Further, payments should be passed on to subcontractors within 7 days, in accordance with common commercial practice (as established by a published industry standard, the Joint Policy statement of 1978 by Associated General Contractors, American Subcontractors Association, Associated Specialty Contractors) and (2) The Small Business and Federal Procurement Competition Enhancement Act of 1984 (PL 98-577) which states: ". . . the policy of the United States that its prime contractors establish procedures to ensure the timely payment of amounts due pursuant to the terms and their subcontracts with small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals." The FAR should spell this out clearly to ensure a government-wide consistent treatment of contracts involving subcontractors.

Proposed Rule: The proposed FAR regulations (July 17, 1986) do not address the requirements for federal agencies to report their incidences of late payment to the Office of Management and Budget.

Coalition comments: Currently, federal agencies are required by the Act and by OMB to report annually on the incidence of late payments by providing the costs of annual interest penalties incurred. Unfortunately, this reporting system does not provide any data on the actual incidence of late payments for which no interest penalty was paid. OMB is currently reviewing proposed revisions to Circular A-125 which would increase the reporting requirements and we urge that contracts and contract offices be so administered as to produce the following information and that such information be required by regulation in the FAR:

1. Number of interest penalties paid.
2. Amount of interest penalties paid.
3. Relatively frequency of interest penalty payments to the total number of payments.
4. Number, amount, and relative frequency of payments made 3 days or more before the due date, except where cash discounts were taken.
5. Reasons that interest penalties were incurred.
6. An analysis of the progress made from previous years in improving the timeliness of payments.
7. Number, amount and relative frequency of invoices paid during the grace period (stratified 1-5 days, 6-10 days, 11-15 days).
8. Number, amount and relative frequency of invoices paid more than 15 days after the due date that did not include interest penalties, and the reasons therefore.

Proposed rule: The proposed FAR regulations (July 17, 1986) do not address the issue of whether payments made by federal agencies through fiscal intermediaries, and other distributors of Federal money, are subject to the prompt payment provisions.

Coalition comments: We believe that for the purpose of distributing federal funds, contract officers should be granted authority to require that those funds be made subject to the prompt payment provisions of the FAR regardless of whether intermediary payment organizations, grantees, state or local governments perform the actual disbursement.

At the present time, the Prompt Payment Act of 1982 is under scrutiny by Committees of both the House of Representatives and U.S. Senate. A considerable number of questions have been raised as to whether intermediaries or others receiving Federal loans, grants and contracts through assistance programs are complying with the Act's goals. The FAR draft should be amended to require prompt payment by organizations distributing Federal funds or making payments under Federal loan guarantees.

Proposed Rule: The proposed FAR regulations are silent on the authority of an agency to suspend application of the Act to a class of contract payments.

We would also like to see the regulations address another disturbing problem of recent occurence: namely, the announcement by one federal agency (The Commodity Credit Corporation) on June 25, 1986, that the Prompt Payment Act's requirements are suspended in situations where an agency's inability to make payment is due to circumstances beyond the agency's control such as occurred with respect to depletion of CCC's borrowing authority. It should be clearly spelled out in the FAR regulations that no agency has the authority to suspend application of the law or any provision of the law. No such authority was granted by Congress. No such authority was even extended by A-125. By amending the proposed FAR regulation we urge you to take immediate action to prevent future abuses of this nature.

PROPOSED RULE

The proposed FAR is silent on the definition of agency.

Coalition comment: While OMB Circular A-125 defines "agency" for the purposes of the Act, the proposed FAR does not. Because there are three important distinctions made in A-125, we recommend that these be incorporated into the FAR picking up 4.a. from A-125.

(1). Entities acting as instrumentalities of a Federal agency to administer that agency's programs are considered agencies under the Act.

(2). Military posts, base exchanges and commissaries are included as agencies. This is a very important distinction because these agencies spend considerable sums and are

viewed by vendors as part of the U.S. government even though, at times, they may spend non-appropriated funds.

(3). The Tennessee Valley Authority is specifically mentioned in the Act and this reference should be repeated in the Act until such time if ever, that Congress changes this provision.

Proposed rule: The proposed FAR is silent on partial payments for partial deliveries.

Coalition comment: While the Act and OMB Circular A-125 mention partial payment for partial deliveries, this important provision in the Act has been overlooked by the FAR writers.

We recommend that the following be inserted as a clause in each contract:

"Partial payments will be made for partial completed deliveries."

Proposed rule: The proposed FAR is silent on when a check should be mailed.

Coalition comment: While the OMB Circular A-125 deals with this, the FAR does not.

To avoid the danger of agencies holding checks after they have been cut, we recommend that the following provision be added to the FAR:

"Checks will be mailed or transmitted on the day for which the check or transmission is dated."

Proposed Rule: The proposed FAR is silent on how to handle payments for which there is no invoice.

Coalition comment: A lot of unnecessary paperwork is created by the requirement that companies submit monthly invoices to receive payment under a lease. Just as many taxpayers are able to pay mortgage and car payments monthly without having to be billed, so should the government make monthly payments for leased equipment and facilities without requiring a separate invoice.

The FAR should deal directly with this by permitting periodic payments to be made without the periodic invoices being submitted. Agreements concerning leases should specify the payment schedule and should be subject to the Prompt Payment Act and its interest penalties when such payments are late.

Proposed Rule: The proposed FAR does not mention a provision in the act which authorizies recipients of Federal assistance to pay interest penalties.

Coalition comment: The Congress agreed that this is a serious matter which needed to be resolved through the Act. The FAR should treat it with equal seriousness. Therefore, the FAR should have a provision as follows: "Recipients of Federal assistance may pay interest penalties if so specified in their contracts with business concerns. Obligations to pay such interest penalties will not be obligations of the United States. Federal funds may not be used for this purpose, nor may interest penalities be used to meet matching requirements of federally-assisted programs."

Proposed Rule: The proposed FAR is silent on the matter of where agencies and vendors should direct their inquiries.

Coalition comment: When OMB issued A-125, it included in its concluding provision, some offices and phone numbers that could be used for agencies and companies seeking additional information on the Prompt Payment Act.

Including such information in every contract, as a standard contract provision, would be a useful public service and could help reduce the number of misunderstandings and mistakes with respect to compliance on the part of both agencies and companies. Therefore, the Coalition recommends that the FAR be amended to require the following:

In all contracts there shall appear the following information:

"Questions or inquiries concerning the Prompt Payment Act may be directed to the Financial Management Division, Office of Management and Budget, Washington, D.C. 20503, telephone number 202/395-4773.

"Inquiries concerning the applicable interest rate may be directed to the Appropriation and Investment Branch, Department of the Treasury, telephone number 202/566-5651.

"Inquiries concerning payment under this contract, after all other avenues have been exhausted, may be directed to the following, who is the chief fiscal officer for this agency: ——."

In conclusion, The Coalition for Prompt Pay is pleased to see that an attempt is being made to incorporate the Prompt Payment Act into the FAR. This is needed to implement the policy provided in the statute. However, we are distressed by the proposals you have drafted because you have strayed so far from the intent and spirit of the Act. The comments we have made concerning the inconsistencies in the regulations as they relate to provisions in the law are designed to help you reevaluate your draft. Your consideration of our recommendations, including the proposed public hearing, the review of the Congressional and GAO reports should be done deliberately and thoroughly.

In view of the currrent Congressional work on this subject, moreover, we feel you are proceeding in a very sensitive area in which agencies and companies seek a consistent, fair, and red-tape free path to prompt payment.

Respectfully submitted on behalf of the Coalition,

KENTON PATIE,
Director.

JOINT POLICY STATEMENT 1: PROMPT PAYMENT

Undue delays by owners, architects/engineers, general contractors, subcontractors and sub-subcontractors in processing amounts due to general contractors, subcontractors, sub-subcontractors and suppliers, or in making timely payments of these amounts, impose hardships and improper financing burdens on the contractors and suppliers and amount to extensions of credit by the contractors and suppliers to their respective higher tiers.

Accordingly, it is the policy of the Associated General Contractors of America, the American Subcontractors Association and the Associated Specialty Contractors that all payments must be made on all contracts promptly. This should include payment for all labor, services and materials stored on the job site or other approved storage sites as of the closing date of requisitions. This applies to both progress payments and final payments.

All local chapters of AGC, ASA and ASC are urged to make efforts, singly or cooperatively where possible, to persuade all owners, architects/engineers, general contractors, subcontractors and sub-subcontractors to adopt and adhere to this policy in the conduct of their business.

The following schedule of billings, certificates and payments by various participants in the construction process is recommended.

The schedule assumes normal trade contract terms allowing monthly progress payments for work performed and materials suitably stored through the end of the month. This schedule does not refer to payments to suppliers who are not subcontractors.

It is important to note that along the sequence of events, any recipient of a payment request who takes exception to an item of billing should immediately contact the initiating party by telephone and attempt to resolve the matter. Failing resolution, the party taking exception should notify the other party in writing the reasons for the action.

DAY OF CALENDAR MONTH AND EVENT
20th—Sub-subcontractors request payment from subcontractors.
25th—Subcontractors request payment from contractor, incorporating the sub-subcontractor's request in the billing.
1st—Contractor submits to the owner's representative an itemized application for payment with the necessary supporting data, covering the monthly progress of the entire contract being performed.
5th—The owner's representative issues the certificate for payment to the owner for the amount requested.
10th or sooner—The owner makes payment to the contractor for the amount certified by the owner's representative.

No More Than 7 Days After Receipt—The contractor pays each subcontractor the amount received from the owner on his account promptly but not later than seven days after receipt.

No More Than 7 Days After Receipt—Each subcontractor pays each subcontractor the amount received from the owner on his account promptly but not later than seven days after receipt.

The schedule should be adjusted by making appropriate billings and payments on the last working day prior to any listed Saturday, Sunday or holiday. It is also recommended that collection efforts be commenced immediately following the day any payment due was not paid.

● Mr. PRYOR. Mr. President, today I join many of my colleagues in urging approval of S. 2479, the Prompt Payment Act Amendments of 1986. I am a cosponsor of this legislation, and I was a cosponsor of the original 1982 Prompt Payment Act which this legislation amends.

The primary purpose of the 1982 act was, quite simply, to make the Government pay its bills on time, and to assess interest penalties for late payments and improperly taken discounts.

The good news is that the act had substantially improved the Government's bill-paying performance overall. The bad news is that there remain an excessively high number of late payments by agencies, and vendors that are paid late do not automatically receive the interest penalties owed to them under the act.

In testimony before the Legislation and National Security Subcommittee of the House Committee on Government Operations on July 29, 1986, Mr. Frederick D. Wolf of the General Accounting Office [GAO] testified that governmentwide, agencies still paid a quarter of their commercial bills after the due date. Close to 5 percent of these payments should have included penalties. Some of the payments were extremely late.

Mr. Wolf also testified that agencies frequently did not pay the penalties they owed and did not repay improperly taken discounts. The GAO identified 66 invoice payments in its sample which should have included late payment penalties. However, agencies had paid penalties for only 10 of these. In other words, five out of every six vendors entitled to interest penalties did not receive them.

In private commerce, late payments and improperly taken discounts for early payment do not occur so frequently or without some penalty attached. When a consumer does not pay his or her bank credit card balance in full within 30 days, interest charges are automatically assessed and added to the balance due. When the consumer pays off the balance, that payment includes accrued interest penalties.

The 1982 act explicitly stated that agencies should automatically include interest penalties in late invoice payments. Yet five out of six vendors receive their late payment without the interest included. Why should agencies get away with something that an ordinary consumer cannot get away with?

S. 2479 addresses this problem by requring that the interest penalty be doubled if the agency does not automatically include the interest in a late payment to the vendor and more than 15 days elapses after interest first becomes due. This provision adds teeth to the Prompt Payment Act without unduly interfering with agency operations.

The legislation contains many other similar refinements of the Prompt Payment Act. Taken together, they represent important and needed solutions to some of the outstanding problems that have developed in implementing the Prompt Payment Act of 1982.●

Mr. HARKIN. Mr. President, today I join several of my colleagues in supporting S. 2479, the amendments to the Prompt Payment Act of 1982.

The intent of that legislation was clearly articulated in the 1982 act. Unfortunately the bright hopes that the act offered, when President Reagan signed it into law, have not yet been realized totally.

While many invoices are being paid diligently by Federal agencies, we have a 4-year history that displays patterns of policies and behaviors that are far afield from our intention of getting Government bills paid on time.

The pattern of late payment of invoices reflects a conflict of priorities. There should be no such conflict. Incorrectly, agencies have felt that paying their bills late was good fiscal and business practice, because they were saving the taxpayers money. In fact, small, medium and large businesses who supply the Government have been providing interest-free loans.

The amendments contained in S. 2479 will clarify and strengthen the Prompt Payment Act. These amendments also will bring contractual relationships between Federal agencies and their suppliers to a more professional and business-like manner of operating.

This particularly is important, Mr. President, to our small and medium size businesses in Iowa and elsewhere. They have borne a heavy burden in doing business with the Government. This, in spite of the fact that the Government needs suppliers who are reliable and honest, and who compete to supply goods and services at the lowest possible cost.

There is no question that the cost to the supplier of late payments (these interest-free loans to the Government) will be added to the price of the product or service provided.

To make the most responsible use of taxpayer money to provide needed Government services, we must be able to attract the greatest range of businesses to compete for the Government's business. The great difficulty for many small and medium size businesses is that they cannot afford to do business with the Government.

Because often Government payment is so slow, these businesses cannot in turn meet their obligations to employees and suppliers. The task of following up on late bills, wading through a maze of organization charts trying to find the correct individual to talk to, and resubmitting invoices often in triplicate and quadruplicate is simply beyond many organizations' resources. When this happens, all taxpayers lose, not just one business.

Mr. President, while it is discouraging that we must address this difficulty of slow payment of invoices when we have already done so in a clear and straightforward manner, I find it encouraging that we have carefully and steadfastly monitored the implementation of the act to determine its effect on small business and equally important on the efficient working of the Government.

While S. 2479 focuses on the problems that still need to be solved, the hearings held by the Committee on Small Business in June of this year provided many examples of the positive results that the act has had.

The Prompt Pay Coalition, directed by Kenton Pattie of the International Communication Industries Association [ICIA], pointed out difficulties that have been experienced by businesses. He also pointed out, however, the important results that the Prompt Payment Act of 1982 has had.

The Prompt Payment Act of 1982 has been a success. Our 3 years of experience with this law show there has been significant improvement since 1982. I have received many comments from businesspeople indicating that interest is being paid on bills and far more payments are made on time now than before 1982.

Meanwhile, the Federal Prompt Payment Act also has provided an incentive to 44 States to pass their own prompt pay laws. Iowa, I am proud to report, is one of the 44 "prompt pay" States having adopted its law in 1983. Further, in many cases, payment procedures have been streamlined so that invoices move rapidly. So, we have accomplished much of what we intended to with the original legislation.

Now, with the work of my colleagues and their staffs, these current amendments proposed in S. 2479 can take us the final distance to achieving the goal of making the Government a strong, reliable, business partner. When we do this, we will attract the best businesses to compete for Government business. That will give us true, continuing savings without sacrificing quality. Mr.

President, I am pleased to cosponsor S. 2479 and I hope the Senate will pass this bill to encourage the executive branch to live up to the intent of the 1982 law.

Mr. CHAFEE. Mr. President, I ask for a third reading.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 2479) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2479

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Prompt Payment Amendments of 1986".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(1) the billpaying practices of most Federal Government agencies have substantially improved, with certain exceptions, after three years of experience under the Prompt Payment Act (codified in chapter 39 of title 31, United States Code);

(2) the improvement in such billpaying practices has resulted in fairer treatment of contractors who furnish supplies, services, or construction to the Federal Government, especially small businesses; and

(3) nonetheless, contractors who deal with the Federal Government continue to experience many persistent billpaying problems which are caused by—

(A) a failure to modify the Federal Acquisition Regulation as part of the implementation of the provisions of the Prompt Payment Act;

(B) the implementation of the provisions of the Prompt Payment Act in a manner that denies the Act's protections in cases of certain contract payments;

(C) the implementation of the provisions of such Act in a manner which has permitted Federal Government agencies to take discounts for early payment months after the expiration of the discount period specified in the contractor's invoice;

(D) inadequate implementation of the requirement that Federal Government agencies automatically pay interest penalties with delinquent payments;

(E) the use of the unlimited time afforded agencies to formally accept a contractor's performance for the purpose of avoiding the requirement that the agencies pay an interest penalty with late payments made for supplies or services; and

(F) abusive use of certain payment grace periods which afford the Federal Government additional time to pay its bills without incurring interest penalties otherwise due.

DEFINITIONS AND APPLICATION

SEC. 3. (a) Section 3901(a)(4) of title 31, United States Code, is amended to read as follows:

"(4) the head of the agency is deemed to receive an invoice on the later of—

"(A) the date on which the office or employee of the agency designated by the agency to first receive such invoice actually receives a proper invoice; or

"(B) on the fifth day after the date on which, in accordance with the terms and conditions of the contract, the property is actually delivered or final performance of the services is actually completed, as the case may be, unless the contract specifies a longer period for agency acceptance of the property or services.".

(b)(1) Section 3901 of such title is further amended by adding at the end the following new subsection (c):

"(c) This chapter, except section 3905 of this title, applies to the United States Postal Service. However, the Postmaster General shall be responsible for issuing the implementing procurement regulations, solicitation provisions, and contract clauses.".

(2) Section 410(b) of title 39, United States Code, is amended by inserting after clause (8) the following new clause (9):

"(9) Chapter 39 of title 31.".

INTEREST PENALTIES: REDUCTIONS IN GRACE PERIOD; INCREASED PENALTIES

SEC. 4. (a) Section 3902(b) of title 31, United States Code, is amended—

(A) by striking out "16th" in clause (3) in such sentence and inserting in lieu thereof "8th"; and

(B) by adding at the end the following new sentence:

"Clause (3) of the preceding sentence shall not apply to payments under any contract for which the procurement solicitation is issued on or after October 1, 1989.".

(b) Section 3902 of such title is further amended by redesignating subsections (c) through (e) as subsections (d) through (f), respectively, and by inserting after subsection (b) the following new subsection (c):

"(c)(1) Any amount of an interest penalty which exceeds $1.00 and is owed a business concern under this section shall be paid without regard to whether the business concern has requested payment of such penalty.

"(2) If a business concern—

"(A) is owed an interest penalty by an agency;

"(B) is not paid the interest penalty in a payment made to the business concern by the agency on or after the date on which the interest penalty becomes due; and

"(C) is not paid the interest penalty by the agency within 10 days after the date on which such payment is made; and

"(D) makes a written demand, not later than 40 days after the date on which such payment is made, that the agency pay such a penalty,

such business concern shall be entitled to receive an interest penalty equal to twice the amount of the interest payment that would otherwise be due.".

INTEREST PENALTIES ON PROGRESS PAYMENTS AND RETAINED AMOUNTS UNDER CONSTRUCTION CONTRACTS

SEC. 5. Section 3903 of title 31, United States Code, is amended—

(1) by striking out clause (4);

(2) by redesignating clause (5) as (6); and

(3) by inserting after clause (3) the following new clause (4):

"(4) in the case of a construction contract, provide for the payment of interest on—

"(A) any progress payment due under the contract for—

"(i) a period of more than 7 days; or

"(ii) a longer period if the contracting officer determines that the prevailing practice in private construction contracts is to provide such longer payment period; and

"(B) any amount which has been retained during the performance of the contract and are due to be released to the contractor after final acceptance of the construction, if such retained amount is not paid to the contractor by the required payment date;".

PERIODIC PAYMENTS UNDER SUPPLY AND SERVICE CONTRACTS

SEC. 6. Section 3903 of title 31, United States Code, as amended by section 5, is further amended by inserting after clause (4) the following:

"(5) provide for periodic payments, in the case of a supply or service contract which authorizes periodic payments and periodic submission of invoices during the contract period, upon—

"(A) submission of an invoice for supplies delivered or services performed during the contract period; and

"(B) either—

"(i) acceptance of the supplies or services by an employee of an agency authorized to accept the supplies or services; or

"(ii) certification, by such an employee, that the performance covered by the invoice conforms to the terms and conditions of the contract.".

PAYMENT CLAUSE FOR SUBCONTRACTS UNDER CONSTRUCTION CONTRACTS

SEC. 7. (a) Chapter 39 of title 31, United States Code, is amended—

(1) by redesignating sections 3905 and 3906 as 3906 and 3907, respectively; and

(2) by adding at the end the following new section 3905:

"§ 3905. Payment clause for subcontracts under construction contracts

"(a) Each construction contract awarded by an agency shall include a clause that requires the prime contractor to include, in each subcontract for property or services entered into by the prime contractor and a subcontractor (including a material supplier) for the purpose of performing such construction contract, a payment clause which obligates the prime contractor—

"(1) to pay the subcontractor promptly (as determined in accordance with prevailing industry standards) out of amounts paid to the prime contractor by the agency for work performed by the subcontractor under that contract; and

"(2) to pay to the subcontractor an interest penalty on amounts due in the case of each payment not made in accordance with such payment clause—

"(A) for the period beginning on the day after the required payment date and ending on the date on which payment of the amount due is made; and

"(B) computed at the most current rate of interest that has been determined by the Secretary of the Treasury for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611) and published by the Secretary in the Federal Register.

"(b) A prime contractor's obligation to pay an interest penalty to a subcontractor pursuant to the payment clause included in a subcontract under subsection (a) may not be construed to be an obligation of the United States. A contractor may not obtain reimbursement from the United States for such interest penalty. A contract modification may not be made for the purpose of providing reimbursement of such interest penalty. A cost reimbursement claim may not include any amount for reimbursement of such interest penalty.".

(b) The table of sections at the beginning of such chapter is amended by striking out the items relating to sections 3905 and 3906 and inserting in lieu thereof the following:

"3905. Payment clause for subcontracts under construction contracts.
"3906. Reports.
"3907. Relationship to other laws.".

LIMITATIONS ON DISCOUNT PAYMENTS

SEC. 8. Section 3904 of title 31, United States Code, is amended by inserting after the first sentence the following: "For the purpose of the preceding sentence, the specified time shall be calculated from the date the invoice under the contract is received by the office or employee of the agency designated by the agency to first receive such invoice until the date of payment.".

REPORTS

SEC. 9. Section 3905(a) of title 31, United States Code, is amended to read as follows:

"(a)(1) By the 60th day after the end of the fiscal year, the head of each agency shall submit to the Director of the Office of Management and Budget a report on the agency's payment practices, including a description of the extent to which those practices satisfy the requirements of this chapter.

"(2) In addition to such other information as may be required by the Director, the report required by paragraph (1) shall include—

"(A) the number, amounts, and frequency of interest penalty payments, and the reasons the interest penalties were not avoided by prompt payment; and

"(B) the number, dollar value, and frequency of invoices paid after the required payment date without payment of an interest penalty, and the reasons no obligation to pay interest penalties was incurred with respect to such invoices or no amount for interest penalties were included in the payments of such invoices.".

IMPLEMENTATION THROUGH THE FEDERAL ACQUISITION REGULATION

SEC. 10. (a) The Federal Acquisition Regulation shall be modified to provide appropriate solicitation provisions and contract clauses that implement chapter 39 of title 31, United States Code, and the regulations prescribed under section 3903 of such title.

(b) The solicitation provisions and contract clauses required by subsection (a) shall include the following matters:

(1) Authority for a contracting officer to specify for a contract or class of contracts a specific payment period, which—

(A) in the case of payments for commercial items or services, is similar to the payment period or periods permitted in prevailing private industry contracting practices;

(B) in the case of payments for noncommercial items and services, does not exceed 30 days unless the circumstances of the procurement action require a longer period for payment; and

(C) in the case of progress payments under construction contracts, does not exceed 7 days, unless the contracting officer determines that the prevailing practice in private construction contracts requires a longer payment period.

(2) Requirements to make periodic payments, in the case of a supply or service contract which authorizes periodic payments and periodic submission of invoices during the contract period, upon—

(A) submission of an invoice for supplies delivered or services performed during the contract period; and

(B) either—

(i) acceptance of the supplies or services by an employee of the contracting agency authorized to accept the supplies or services; or

(ii) certification, by such an employee, that the performance covered by the invoice conforms to the terms and conditions of the contract.

(3) A conclusive presumption that the Federal Government has accepted property or services by the fifth day after the date on which, in accordance with the terms and conditions of the contract, the property is delivered or final performance of the services is completed, unless the circumstances of the procurement require a longer period for acceptance by the Federal Government and such longer period is specified in the solicitation for such contract.

(4) The limitation that the Federal Government may take a discount offered by a contractor for early payment by the Federal Government only in accordance with the time limits specified by the contractor.

(5) The requirements of section 3902(c) of title 31, United States Code.

(c) The regulations required by subsection (a) shall be published as proposed regulations for public comment as provided in section 22 of the Office of Federal Procurement Policy Act (41 U.S.C. 420) within 120 days after the date of the enactment of this Act.

EFFECTIVE DATES

SEC. 11. (a) Section 3(a)(2) and the amendments made by sections 3(a)(1), 4, 5, 6, 7, and 8 shall apply to payments under contracts awarded during or after the first fiscal quarter which begins more than 90 days after the date of the enactment of this Act.

(b) The amendments made by section 3(b) shall apply to payments under contracts awarded on or after October 1, 1987.

(c) The amendment made by section 9 shall apply to the report required by section 3905(a) of title 31, United States Code, for each fiscal year beginning after September 30, 1986.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table is agreed to.

ORDER OF PROCEDURE

Mr. CHAFEE. Mr. President, I ask unanimous consent that the live quorum to occur at 11 a.m. be postponed for 15 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL CPR AWARENESS WEEK

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 426, National CPR Awareness Week, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 426) to designate the week of October 19 through October 25, 1986, as "National CPR Awareness Week."

The Senate proceeded to consider the joint resolution.

Mr. CHAFEE. Mr. President, I move adoption of the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 426) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, together with the preamble, reads as follows:

S.J. RES. 426

Whereas heart attacks are the leading cause of death in the United States;

Whereas as many as one million five hundred thousand Americans may be stricken by a heart attack during 1986;

Whereas cardio-pulmonary resuscitation commonly referred to as CPR, is a first aid procedure which significantly reduces the incidence of sudden death due to a heart attack; and

Whereas the death rate due to heart attacks would be reduced if more Americans received training in CPR: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 19 through October 25, 1986, is designated as "National CPR Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate programs and activities.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 1100

ORDER FOR CLOTURE VOTE AT 3 P.M.

Mr. CHAFEE. I ask unanimous consent that the cloture vote occur at the hour of 3 p.m. today, with mandatory quorum under rule XXII being waived.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, there is no objection on this side.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

AMERICAN PHYSIOLOGISTS WEEK

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 408, American Physiologists Week.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, does the distinguished acting Republican leader

also wish to ask unanimous consent that the Senate move to its immediate consideration?

Mr. CHAFEE. Yes, Mr. President.

Mr. BYRD. If he does, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 408) designating "American Physiologists Week."

The PRESIDING OFFICER. The joint resolution will be considered as having been read the second time at length and the Senate will proceed to its consideration.

The joint resolution (S.J. Res. 408) was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 408

Whereas 1987 marks the one-hundredth anniversay of the founding of the American Physiology Society;

Whereas physiology is the taproot for all of the life sciences;

Whereas early findings by physiologists resulted in the development of blood transfusions and modern anesthesia, eradication of many diseases, and the discovery of antibiotics;

Whereas physiology continues to be the fountainhead from which life science research enriches the health and longevity of humans and animals; and

Whereas internationally renowned physiologists from every continent are coming to the District of Columbia to engage in scientific and educational dialogue with the American Physiological Society during its Centennial Week celebration of a century in physiology: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning March 29, 1987, is designated as "American Physiologists Week". The President is requested to issue a proclamation calling on the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. CHAFEE. I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL BOWLING WEEK

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from consideration of Senate Joint Resolution 388, National Bowling Week, and that the Senate proceed to its immediate consideration.

Mr. BYRD. Mr. President, there is no objection to either request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 388) designating the week beginning January 4, 1987, as "National Bowling Week."

The PRESIDING OFFICER. The joint resolution will be considered as having been read the second time at length, and the Senate will proceed to its consideration.

The joint resolution (S.J. Res. 388) was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 388

Whereas bowling is one of the oldest and most popular indoor family sports in the world and is played in more than 79 nations;

Whereas people have competed in some form of bowling for thousands of years;

Whereas many immigrants brought a form of bowling from their homeland during the birth of America;

Whereas bowling has contributed to the social fabric of the United States with 8,000,000 people participating as members of local bowling organizations in more than 2,800 cities and towns across our land;

Whereas bowling is played in 8,300 bowling centers, virtually in every community in the Nation, and has emerged as the longest running, most highly rated individual sport television series on Saturday;

Whereas bowling is the largest indoor participation sport in the United States with over 69,000,000 Americans bowling each year; and

Whereas bowling is an excellent form of exercise and recreation for all people regardless of age: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning January 4, 1987, is designated "National Bowling Week". The President is requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

FISHERIES ACTIVITIES AUTHORIZATION

Mr. CHAFEE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 991.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 991) entitled "An Act to provide authorization of appropriations for certain fisheries activities", do pass with the following amendments:

Strike out all after the enacting clause and insert:

TITLE I—FISHERIES CONSERVATION AND MANAGEMENT

SECTION 101. REFERENCE.

Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a title, section, subsection, paragraph, or other provision, the reference shall be considered to be made to a title, section, subsection, paragraph, or other provision of the Act entitled "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (Public Law 94-265, 90 Stat. 331 et seq.).

SEC. 102. UNITED STATES RIGHTS AND AUTHORITY REGARDING FISH AND FISHERY RESOURCES WITHIN THE EXCLUSIVE ECONOMIC ZONE.

(a) DEFINITION OF EXCLUSIVE ECONOMIC ZONE.—Section 3 (16 U.S.C 1802) is amended—

(1) by striking out paragraph (8);

(2) by redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively; and

(3) by inserting immediately after paragraph (5) the following new paragraph:

"(6) The term 'exclusive economic zone' means the zone established by Proclamation Numbered 5030, dated March 10, 1983. For purposes of applying this Act, the inner boundary of that zone is a line coterminous with the seaward boundary of each of the coastal States.".

(b) AUTHORITY REGARDING EXCLUSIVE ECONOMIC ZONE.—Title I (16 U.S.C. 1811-1813) is amended to read as follows:

"TITLE I—UNITED STATES RIGHTS AND AUTHORITY REGARDING FISH AND FISHERY RESOURCES

"SEC. 101. UNITED STATES SOVEREIGN RIGHTS TO FISH AND FISHERY MANAGEMENT AUTHORITY.

"(a) IN THE EXCLUSIVE ECONOMIC ZONE.—Except as provided in section 102, the United States claims, and will exercise in the manner provided for in this Act, sovereign rights and exclusive fishery management authority over all fish, and all Continental Shelf fishery resources, within the exclusive economic zone.

"(b) BEYOND THE EXCLUSIVE ECONOMIC ZONE.—The United States claims, and will exercise in the manner provided for in this Act, exclusive fishery management authority over the following:

"(1) All anadromous species throughout the migratory range of each such species beyond the exclusive economic zone; except that that management authority does not extend to any such species during the time they are found within any foreign nation's territorial sea or exclusive economic zone (or the equivalent), to the extent that that sea or zone is recognized by the United States.

"(2) All Continental Shelf fishery resources beyond the exclusive economic zone.

"SEC. 102. EXCLUSION FOR HIGHLY MIGRATORY SPECIES.

"The sovereign rights and exclusive fishery management authority asserted by the United States under section 101 over fish do not include, and may not be construed to extend to, highly migratory species of fish.".

(c) CONFORMING AMENDMENTS.—The Act referred to in section 101 of this Act is amended—

(1) by amending section 2—

(A) by amending paragraph (1) of subsection (b) to read as follows:

"(1) to take immediate action to conserve and manage the fishery resources found off the coasts of the United States, and the anadromous species and Continental Shelf fishery resources of the United States, by exercising (A) sovereign rights for the purposes of exploring, exploiting, conserving, and managing all fish except highly migratory species, within the exclusive economic zone

established by Presidential Proclamation 5030, dated March 10, 1983, and (B) exclusive fishery management authority beyond the exclusive economic zone over such anadromous species and Continental Shelf fishery resources;", and

(B) by amending paragraph (5) of subsection (c) to read as follows:

"(5) to support and encourage active United States efforts to obtain internationally acceptable agreements which provide for effective conservation and management of fishery resources.",

(2) by striking out "fishery conservation zone" each place it appears therein and inserting "exclusive economic zone"; and

(3) by amending the entry for title I in the table of contents to read as follows:

"TITLE I—UNITED STATES RIGHTS AND AUTHORITY REGARDING FISH AND FISHERY RESOURCES

"Sec. 101. United States sovereign rights to fish and fishery management authority.

"Sec. 102. Exclusion for highly migratory species.".

SEC. 103. BILATERAL AGREEMENTS REGARDING FOREIGN FISHING.

Section 201(e) (16 U.S.C. 1821(e)) is amended—

(1) by striking out clause (viii) of subsection (e)(1)(E) and inserting the following:

"(viii) whether, and to what extent, such nation is extending to vessels of the United States substantially the same fishing privileges with respect to fishery resources under its authority as the United States extends to vessels of that nation with respect to fishery resources under United States authority; and

"(ix) such other matters as the Secretary of State, in cooperation with the Secretary, considers appropriate.";

(2) by inserting "or (3)" after "paragraph (1)" in paragraph (2)(B); and

(3) by adding at the end thereof the following new paragraph:

"(3)(A) Subject to subparagraph (C), the Secretary of State may initiate and conduct negotiations with any foreign nation, with which there is in effect a governing international fishery agreement, for the purpose of entering into a bilateral agreement that—

"(i) is effective for all, or any portion, of the period in which the governing international fishery agreement is in effect;

"(ii) requires each party to implement during the effective period of the bilateral agreement the respective obligations referred to in subparagraph (B);

"(iii) contains such other understandings and commitments on the part of the parties as may be necessary or appropriate to accomplish the purposes of the bilateral agreement; and

"(iv) provides, and specifies the procedures, for the resolution of disputes that may arise with respect to the exercise of the rights and obligations of the parties under the bilateral agreement.

"(B) A bilateral agreement entered into under the authority of this paragraph—

"(i) may obligate the United States, during the effective period of that agreement—

"(I) to exempt the foreign nation from the provisions of paragraph (1)(C) and (D);

"(II) to guarantee the foreign nation, for each harvesting season within the effective period of that agreement, a specified percentage of the total allowable level of foreign fishing in one or more United States fisheries;

"(III) to a reduction or elimination of the fees imposed on the vessel of that nation under section 204(b)(10); and

"(ii) may obligate the foreign nation—

"(I) to specify those actions that it will take during the effective period of that agreement to benefit the United States in regard to the issues referred to in paragraph (1)(E)(i), (ii), (iii), (v), (vii), and (viii); and

"(II) to limit its exports of fish products to the United States during that effective period.

"(C) The Secretary of State may initiate and conduct negotiations under subparagraph (A) only if the Secretary of State and the Secretary, after consultation with the appropriate Councils, mutually agree upon the objectives to be obtained through the negotiations.

"(D) A bilateral agreement entered into under this paragraph may become effective with respect to the United States only as provided for under section 203.".

SEC. 104. CONGRESSIONAL OVERSIGHT.

Section 203 (16 U.S.C. 1823) is amended—

(1) by amending the section heading by inserting "AND OTHER BILATERAL AGREEMENTS" before the period;

(2) by inserting after the first sentence of subsection (a) the following new sentence: "No bilateral agreement entered into under section 201(e)(3) shall become effective with respect to the United States before the close of the first 30 calendar days of continuous session of Congress after the date on which the President transmits to the House of Representatives and to the Senate a document setting forth the text of that agreement."; and

(3) by amending subsection (d)(2)(A) to read as follows:

"(A) the effect of which is to prohibit the entering into force and effect of any governing international fishery agreement, or any bilateral agreement entered into under section 201(e)(3), the text of which is transmitted to the Congress under subsection (a) of this section; and".

SEC. 105. FOREIGN FISHING PERMITS.

Section 204(b) (16 U.S.C. 1824(b)) is amended—

(1) by adding at the end of paragraph (1) the following new sentence: "No permit issued under this section may be valid for longer than a year; and section 558(c) of title 5, United States Code, does not apply to the renewal of any such permit.";

(2) by striking out ", upon its request" in paragraph (4)(C);

(3) by amending paragraph (6) by inserting ", or he may disapprove all or any portion of the application" immediately before the period at the end of subparagraph (A); and

(4) by amending paragraph (12) to read as follows:

"(12) SANCTIONS.—(A) If any foreign fishing vessel has been used in the commission of any act prohibited by section 307, or if the owner or operator of the vessel has committed such an act, the Secretary may, or if any civil penalty imposed under section 308 or any criminal fine imposed under section 309 has not been paid and is overdue, the Secretary shall—

"(i) revoke such permit, if any, issued for the vessel under this subsection, with or without prejudice to the right of the foreign nation involved to obtain a permit for such vessel in any subsequent year;

"(ii) suspend such permit for the period of time deemed appropriate;

"(iii) deny a permit under this subsection to the vessel; or

"(iv) impose additional conditions and restrictions on the approved application of the foreign nation involved and on any permit issued under that application.

Any permit which is suspended under this subparagraph for nonpayment of a civil penalty shall be reinstated by the Secretary upon the payment of such civil penalty together with interest thereon at the prevailing rate.

"(B) The Secretary may temporarily deny or suspend the permit of any foreign fishing vessel pending the outcome of any administrative proceeding respecting a violation of section 307 of this Act if the Secretary determines that—

"(i) based upon information available to the Secretary, there are reasonable grounds to believe that the vessel has been used in the commission of such violation;

"(ii) immediate suspension of fishing privileges would serve the purposes of this Act; and

"(iii) either—

"(I) the violation presents a serious threat to the public interest,

"(II) the violation presents a serious threat to the achievement of any purpose or policy of this Act, or

"(III) the owner or operator of the vessel has been involved in a prior violation of this Act.

In applying this subparagraph—

"(I) the Secretary must notify the vessel owner of the proposed denial or suspension and give the owner a reasonable opportunity, not longer than 10 days from service of notice, to respond in writing or otherwise;

"(II) if a permit is denied or suspended under this subparagraph, any administrative proceeding respecting the violation at issue must be held as promptly as possible; and

"(III) if another permit application is pending for such vessel on or after the date of the violation, the Secretary need not act on that application before deciding whether or not to deny or suspend temporarily a permit under this subparagraph.".

SEC. 106. HEALTH AND SAFETY STANDARDS FOR FOREIGN FISHING VESSELS.

(a) STANDARDS FOR UNITED STATES OBSERVERS.—Subsection (i) of section 201 (19 U.S.C 1821(i)) is amended—

(1) by inserting "(A)" after "(1)" in paragraph (1);

(2) by inserting at the end of paragraph (1) the following new subparagraph:

"(B) The Secretary shall by regulation prescribe minimum health and safety standards that shall be maintained aboard each foreign fishing vessel with regard to the facilities provided for the quartering of, and the carrying out of observer functions by, United States observers."; and

(3) by amending subparagraph (B) of paragraph (2) to read as follows:

"(B) the time during which a foreign fishing vessel will engage in fishing within the exclusive economic zone will be of such short duration that the placing of a United States observer aboard the vessel would be impractical; or".

(b) COMPLIANCE WITH VESSEL SAFETY STANDARDS OF THE FLAG COUNTRY.—Paragraph (3) of section 204(b) (16 U.S.C. 1824(b)(3)) is amended—

(1) by striking "and" at the end of subparagraph (E);

(2) by inserting "and" after the semicolon at the end of subparagraph (F); and

(3) by adding after subparagraph (F) the following new subparagraph:

"(G) all applicable vessel safety standards imposed by the foreign country, and shall include written certification that the vessel is in compliance with those standards;".

SEC. 107. REGIONAL FISHERY MANAGEMENT COUNCILS.

(a) VOTING MEMBERS.—(1) Subsection (b) of section 302 (16 U.S.C. 1852(b)) is amended as follows:

(A) Paragraph (2)(A) is amended to read as follows:

"(2)(A) The members of each Council required to be appointed by the Secretary must be individuals who are knowledgeable and experienced with regard to the conservation and management, or the recreational or commercial harvest, of the fishery resources of the geographical area concerned. The Secretary, in making appointments under this section, shall ensure a fair apportionment, on a rotating or other basis, of the active participants (or their representatives) involved in the fisheries under Council jurisdiction.".

(B) Paragraph (2)(B) is amended—

(i) by adding after the first sentence thereof the following new sentence: "A Governor may not submit the names of individuals to the Secretary for appointment unless the Governor has first consulted with representatives of the commercial and recreational fishing interests of the state regarding those individuals.";

(ii) by striking out "knowledge or experience" in the third sentence thereof and inserting "knowledge and experience"; and

(iii) by adding at the end thereof the following new sentence: "An individual is not eligible for appointment by the Secretary until that individual complies with the applicable financial disclosure requirements under subsection (k).".

(C) Paragraph (3) is amended to read as follows:

"(3) Each voting member appointed to a Council by the Secretary in accordance with subsection (b)(2) shall serve for a term of 3 years; except that the Secretary may designate a shorter term if necessary to provide for balanced expiration to terms of office.".

(2) The amendments made by paragraph (1) shall apply with respect to voting members of regional fishery management councils who are appointed, and to individuals who are nominated for appointment as voting members, on or after the date of the enactment of this Act.

(b) COUNCIL COMMENT ON FEDERAL AND STATE ACTION AFFECTING HABITAT.—Section 302 is further amended—

(1) by redesignating subsection (i) as subsection (j); and

(2) by adding after subsection (h) the following new subsection:

"(i) FISHERY HABITAT CONCERNS.—Each Council may comment on, or make recommendations concerning, any activity undertaken, or proposed to be undertaken, by any State or Federal agency that, in the view of the Council, may affect the habitat of a fishery resource under its jurisdiction. Within 45 days after receiving such a comment or recommendation from a Council, a Federal agency must provide a detailed response, in writing, to the Council regarding the matter.".

(c) CLOSURE OF MEETINGS.—Paragraph (4) of section 302(j) (as redesignated by subsection (b)) is amended by striking out "; except that" and all that follows thereafter and inserting "; except that such procedures, in the case of statistics submitted to the Council by a State or by the Secretary under section 303(d), must be consistent with the laws and regulations of that State, or with the procedures of the Secretary, as the case may be, concerning the confidentiality of the statistics.".

(d) COMMITTEES AND PANELS.—Subsection (j) (as redesignated by subsection (b)) of section 302 is further amended by adding at the end thereof the following new paragraph:

"(5) Each Council shall specify those procedures that are necessary or appropriate to ensure that the committees and advisory panels established under subsection (g) are involved, on a continuing basis, in the development and amendment of fishery management plans.".

(e) DISCLOSURE OF FINANCIAL INTEREST.—(1) Section 302 is further amended by adding at the end thereof the following new subsection:

"(k) DISCLOSURE OF FINANCIAL INTEREST.—(1) For purposes of this subsection, the term "affected individual" means an individual who—

"(A) is nominated by the Governor of a State for appointment as a voting member of a Council in accordance with subsection (b)(2);

"(B) is a voting member of a Council appointed under subsection (b)(2); or

"(C) is the executive director of a Council.

"(2) Each affected individual must disclose any financial interest held by—

"(A) that individual;

"(B) the spouse, minor child, or partner of that individual; and

"(C) any organization (other than the Council) in which that individual is serving as an officer, director, trustee, partner, or employee;

in any harvesting, processing, or marketing activity that is being, or will be, undertaken within any fishery over which the Council concerned has jurisdiction.

"(3) The disclosure required under paragraph (2) shall be made—

"(A) in the case of an affected individual referred to in paragraph (1)(A), before appointment by the Secretary; and

"(B) in the case of an affected individual referred to in paragraph (1)(B) or (C), within 45 days of taking office.

"(4) An affected individual referred to in paragraph (1)(B) or (C) must update his or her disclosure form at any time any such financial interest is acquired, or substantially changed, by any person referred to in paragraph (2)(A), (B), or (C).

"(5) The financial interest disclosures required by this subsection shall—

"(A) be made on such forms, in accordance with such procedures, and at such times, as the Secretary shall by regulation prescribe; and

"(B) be kept on file, and made available for public inspection at reasonable hours, at the Council offices.

"(6) The participation by an affected individual referred to in paragraph (1)(B) or (C) in an action by a Council during any time in which that individual is not in compliance with the regulations prescribed under paragraph (5) may not be treated as cause for the invalidation of that action.

"(7) Section 208 of title 18, United States Code, does not apply to an affected individual referred to in paragraph (1)(B) or (C) during any time in which that individual is in compliance with the regulations prescribed under paragraph (5).".

(2) For purposes of applying subsection (k) of section 302 (as added by paragraph (1)) to voting members and executive directors of regional fishery management councils who are serving in those capacities on the date on which the regulations prescribed to carry out that subsection first take effect, each such member or director must file a disclosure form under that subsection within 45 days after that date.

SEC. 108. FISHERY MANAGEMENT PLANS; DISCLOSURE OF CONFIDENTIAL STATISTICS.

(a) REQUIRED PROVISIONS.—(1) Section 303(a) (16 U.S.C. 1853(a)) is amended—

(A) by striking out "and" at the end of paragraph (4);

(B) by striking out the period at the end of paragraph (5) and inserting a comma; and

(C) by adding after paragraph (5) the following new paragraphs:

"(6) consider, and may provide for, temporary adjustments, after consultation with the Coast Guard and persons utilizing the fishery, regarding access to the fishery for vessels otherwise prevented from harvesting because of weather or other ocean conditions affecting the safety of the vessels; and

"(7) include readily available information regarding the significance of habitat to the fishery and assessment as to the effects which changes to that habitat may have upon the fishery.".

(2) The amendments made by paragraph (1) apply to each fishery management plan that—

(A) is submitted to the Secretary of Commerce for review under section 304(a), or that is prepared by the Secretary, after January 1, 1986; or

(B) is in effect on that date, but compliance with those amendments is not required except in conjunction with the amendment to the plan next occurring after that date.

(b) DISCRETIONARY PROVISIONS.—Section 303(b) (16 U.S.C. 1853(b)) is amended—

(1) by redesignating subparagraphs (A) through (F) of paragraph (6) as clauses (i) through (vi), respectively;

(2) by inserting "(1)" following the subheading and by redesignating paragraphs (1) through (8) as subparagraphs (A) through (H), respectively;

(3) by amending paragraph (F) (as redesignated by paragraph (2) of this subsection) by inserting "subject to paragraph (2)," immediately after "(F)";

(4) by redesignating subparagraphs (G) and (H) (as redesignated by paragraph (2) of this subsection) as subparagraphs (H) and (I), respectively;

(5) by inserting after subparagraph (F) the following new subparagraph:

"(G) if a limited access system is established under subparagraph (F), and subject to paragraph (2), establish a fishery compensation plan subject to subsection (f);"; and

(6) by adding at the end thereof the following new paragraph:

"(2)(A) No limited access system or fishery compensation plan referred to in paragraph (1) (F) and (G) may be approved or implemented by the Secretary under section 304 unless—

"(i) the system or plan, or both, are approved by not less than three-fourths of the voting members of the Council having jurisdiction over the fishery for which the system will be implemented; and

"(ii) the establishment of the system or plan, or both, is approved by at least two-thirds of the fishermen presently participating in that fishery.

"(B) No limited access system referred to in paragraph (1)(F) may be approved or implemented by the Secretary under section 304 unless the system prohibits the sale of all permits, shares, or rights that may be granted to fishermen who participate in the system.".

(c) DISCLOSURE OF CONFIDENTIAL STATISTICS.—The first sentence of section 303(d) (16 U.S.C. 1853(d)) is amended to read as follows: "Any statistic submitted to the Secretary by any person in compliance with any

requirement under subsection (a)(5) shall be confidential and shall not be disclosed; except—

"(1) to National Marine Fisheries Service personnel and Council employees who are responsible for management plan development and monitoring; or

"(2) when required by court order.".

(d) FISHERY COMPENSATION PLANS.—Section 303 is further amended by adding at the end thereof the following new subsection:

"(f) FISHERY COMPENSATION PLANS.—(1) For purposes of this subsection, the term 'fishery compensation plan' means a plan, whether administered by the Secretary or by the States represented on the Council that established the plan, for compensating, in whole or in part, fishing vessel owners for the loss or reduction of livelihood that results from the implementation of a limited access system (intended to reduce overcapitalization in a particular fishery) under subsection (b)(1)(F), including, but not limited to, compensation through purchase of their vessels, financial assistance to modify vessels for use in other fisheries, or other financial remunerations as established by the Council. A fishery compensation plan shall be funded through fees levied under subsection (b)(1)(A).

"(2) In developing a fishery compensation plan, the Council and the Secretary shall take into account the factors listed in subsection (b)(1)(F) (i) through (vi) and the effect of the plan on the fishermen who will be displaced by the system.

"(3) All fees collected under a fishery compensation plan shall be deposited into the Fishery Compensation Fund established under paragraph (4).

"(4)(A) There is established in the Treasury of the United States a revolving fund known as the Fishery Compensation Fund (hereinafter in this paragraph referred to as the 'Fund'). Each fishery compensation plan established under subsection (b)(1)(G) shall have a separate account in the Fund and the fees collected under the program that are deposited into the Fund shall be credited to that account.

"(B) The Secretary shall withdraw funds credited to any account at such times and in such amounts as may be necessary for the administration of the fishery compensation plan concerned.".

(e) NORTHERN PACIFIC HALIBUT CONVENTION.—Section 5(c) of the Northern Pacific Halibut Act of 1982 (16 U.S.C. 773c(c)) is amended—

(1) by striking out ", including limited access regulations," and inserting ", including limited access and fishery compensation plan regulations,"; and

(2) by amending the second sentence thereof to read as follows: "Such regulations shall only be implemented with the approval of the Secretary, shall not discriminate between residents of different States, and shall be consistent with the limited entry system and fishery compensation plan criteria, and the conditions on the approval thereof, set forth in subsections (b) and (f) of section 303 of the Magnuson Fishery Conservation and Management Act.".

SEC. 109. ACTION BY SECRETARY REGARDING FISHERY MANAGEMENT PLANS.

Section 304 (16 U.S.C. 1854) is amended as follows:

(1) Subsection (a) is amended—

(A) by striking out "(the date of receipt of which is hereafter in this section referred to as the 'receipt date')" in paragraph (1);

(B) by redesignating subparagraphs (A), (B), and (C) of paragraph (1) as subparagraphs (B), (C), and (D), respectively;

(C) by inserting immediately before subparagraph (B), as so redesignated, of paragraph (1) the following new subparagraph:

"(A) immediately make a preliminary evaluation of the management plan or amendment for purposes of deciding if it is consistent with the national standards and sufficient in scope and substance to warrant review under this subsection and—

"(i) if that decision is affirmative, implement subparagraphs (B), (C), and (D) with respect to the plan or amendment, or

"(ii) if that decision is negative—

"(I) disapprove the plan or amendment; and

"(II) notify the Council, in writing, of the disapproval and of those matters specified in subsection (b)(2)(A), (B) and (C) as they relate to the plan or amendment;";

(D) by amending subparagraph (C) (as so redesignated) of paragraph (1) by striking out "75-day" and inserting "60-day";

(E) by amending subparagraph (D) (as so redesignated) of paragraph (1) by striking out "30th day" and inserting "15th day";

(F) by amending paragraph (2)—

(i) by striking out "(1)(A)" and inserting "(1)(B)"; and

(ii) by striking out the period at the end of subparagraph (C) and inserting "and to fishery access adjustments referred to in section 303(a)(6).";" and

(G) by adding at the end thereof the following new paragraph:

"(3)(A) The Secretary shall take action under this section on any fishery management plan or amendment to a plan which the Council characterizes as being a final plan or amendment.

"(B) For purposes of this section, the term 'receipt date' means the 5th day after the day on which a Council transmits to the Secretary a fishery management plan, or an amendment to a plan, that it characterizes as a final plan or amendment."

(2) Subsection (b) is amended—

(A) by amending paragraph (1)(A) to read as follows:

"(A) the Secretary does not notify the Council in writing of—

"(i) his disapproval under subsection (a)(1)(A)(ii), or

"(ii) his disapproval, or partial disapproval, under paragraph (2), of the plan or amendment before the close of the 95th day after the receipt date; or";

(B) by striking out "75th day" in paragraph (1)(B) and inserting "60th day";

(C) by amending paragraph (2) by striking out "paragraph (1)(A)" and inserting "paragraph (1)(B)"; and

(D) by amending paragraph (3)—

(i) by striking out "If the Secretary" in subparagraph (A) and inserting "If the Secretary disapproves a proposed plan or amendment under subsection (a)(1)(A)(ii), or"; and

(ii) by striking out "(a)(1)(A)" in each of subparagraphs (B)(i) and (C)(i) and inserting "(a)(1)(B)".

(3) Subsection (c) is amended—

(A) by striking out "75-day" in paragraph (2)(A)(ii) and inserting "60-day";

(B) by striking out "30th day" in paragraph (2)(A)(iii) and inserting "15th day"; and

(C) by striking out "75-day" wherever it appears in paragraph (2)(B) and inserting "60-day".

(4) Subsection (d) is amended by striking out the period at the end thereof and inserting the following: "; except that if fees are also used to fund a fishery compensation plan under section 303(b)(1)(G), the level of fees shall not exceed the administrative costs incurred in issuing the permits and the costs of funding that plan.".

(5) Subsection (e) is amended—

(A) by inserting ", in cooperation with the Councils," immediately after "maintain";

(B) by striking out "management," and inserting "management and on the economics of the fisheries,"; and

(C) by adding at the end thereof the following: "The Secretary shall annually review and update the comprehensive program and make the results of the review and update available to the Councils.".

SEC. 110. STATE JURISDICTION.

Section 306 (16 U.S.C. 1856) is amended as follows:

(1) Subparagraph (C) of subsection (a)(2) is amended by striking out "(for the purpose of regulating fishing for other than any species of crab)".

(2) Subsection (b) is amended to read as follows:

"(b)(1) If the Secretary finds, after notice and an opportunity for a hearing under section 554 of title 5, United States Code (unless an earlier action is required because the Secretary finds that an emergency exists), and then after consultation with the State that—

"(A) the fishing in a fishery, which is covered by a fishery management plan implemented under this title, is engaged in predominately within the exclusive economic zone and beyond such zone; and

"(B) the State has taken any action, or omitted to take any action, the results of which will substantially and adversely affect the carrying out of such fishery management plan;

the Secretary shall promptly notify the State and the appropriate Council of such finding and of his intention to regulate the applicable fishery within the boundaries of the State (other than its internal waters), pursuant to that fishery management plan and the regulations promulgated to implement that plan. The notification shall also inform the State that, at its request if promptly made, the Secretary will submit the matters involved in the finding to arbitration under such procedures as may be mutually agreeable to the Secretary and the State. The entering into arbitration between the Secretary and the State does not affect the authority of the Secretary to commence or continue regulation of the fishery under the authority of this paragraph.

"(2) If the Secretary assumes responsibility under paragraph (1) for the regulation of a fishery that is within the boundaries of a State but regarding which a hearing was not held under paragraph (1), the State may—

"(A) request a hearing in accordance with section 554 of title 5, United States Code, regarding the finding of the Secretary under paragraph (1), but the authority of the Secretary to regulate the fishery under paragraph (1) shall terminate on the 20th day after the date on which the hearing is requested unless the hearing and the Secretary's findings are completed before that day; or

"(B) apply to the Secretary for reinstatement of its authority over the fishery.

If after application under subparagraph (B) the Secretary finds that the reasons for which he assumed regulation of the fishery in the State waters no longer prevail, the Secretary shall promptly terminate that regulation.".

SEC. 111. SUBMISSION OF CERTAIN FALSE STATEMENTS A PROHIBITED ACT.

(a) Paragraph (1) of section 307 (16 U.S.C. 1857(1)) is amended—

(1) by striking out "or" at the end of subparagraph (G);

(2) by inserting "or" after the semicolon at the end of subparagraph (H); and

(3) by adding at the end thereof the following new subparagraph:

"(I) to knowingly and willfully submit to a Council, the Secretary, or the Governor of a State false information (including, but not limited to, false information regarding the capacity and extent to which a United States fish processor, on an annual basis, will process a portion of the optimum yield of a fishery that will be harvested by fishing vessels of the United States) regarding any matter that the Council, Secretary, or Governor is considering in the course of carrying out this Act.".

(b) Section 309(a)(1) (16 U.S.C. 1859(a)(1)) is amended by striking out "or (H)" and inserting "(H), or (J)".

SEC. 112. CIVIL PENALTIES.

Section 308 (16 U.S.C. 1858) is amended—

(1) by amending the first sentence of subsection (b) to read as follows: "Any person against whom a civil penalty is assessed under subsection (a) may obtain review thereof in the United States district court for the appropriate district by filing a complaint in such court within 30 days from the date of such order and by simultaneously serving a copy of such complaint by certified mail on the Secretary, the Attorney General and the appropriate United States Attorney.";

(2) by redesignating subsections (d) and (e) as subsections (e) and (f), respectively; and

(3) by inserting immediately after subsection (c) a new subsection (d) to read as follows:

"(d) IN REM JURISDICTION.—A fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used in the commission of an act prohibited by section 307 shall be liable in rem for any civil penalty assessed for such violation under section 308 and may be proceeded against in any district court of the United States having jurisdiction thereof. Such penalty shall constitute a maritime lien on such vessel which may be recovered in an action in rem in the district court of the United States having jurisdiction over the vessel.".

SEC. 113. ADMINISTRATIVE FORFEITURES.

(a) PROCEDURES.—Section 310 (16 U.S.C. 1860) is amended—

(1) by amending the second sentence of subsection (c) to read as follows: "The provisions of the customs laws relating to—

"(1) the seizure, forfeiture, and condemnation of property for violation of the customs law;

"(2) the disposition of such property or the proceeds from the sale thereof; and

"(3) the remission or mitigation of any such forfeiture;

shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, unless such provisions are inconsistent with the purposes, policy, and provisions of this Act."; and

(2) by adding at the end of subsection (d)(1) the following new sentence: "Nothing in this paragraph may be construed to require the Secretary, except in the Secretary's discretion or pursuant to the order of a court under section 311(d), to release on bond any seized fish or other property or the proceeds from the sale thereof.".

(b) JURISDICTION OF COURTS.—Section 311 (16 U.S.C. 1861) is amended—

(1) by redesignating subsection (e) as subsection (f); and

(2) by inserting after subsection (d) the following:

"(e) PAYMENT OF STORAGE, CARE, AND OTHER COSTS.—Notwithstanding any other provision of law, after September 30, 1986, the Secretary or the Secretary of the Treasury may pay from sums received as fines, penalties, or forfeitures of property for violations of any provision of this Act—

"(1) the reasonable and necessary costs incurred in providing temporary storage, care, and maintenance or seized fish or other property pending disposition of any civil or criminal proceeding alleging a violation of any provision of this Act with respect to that fish or other property; and

"(2) a reward to any person who furnishes information which leads to an arrest, conviction, civil penalty assessment, or forfeiture of property for any violation of any provision of this Act.

Any person assessed a civil penalty for, or convicted of, any violation of any provision of this Act shall be liable for the cost incurred in storage, care, and maintenance of any fish or other property seized in connection with the violation concerned.".

SEC. 114. REPEAL.

Section 401 (16 U.S.C. 1881; relating to the Law of Sea Treaty), and the entry referring to that section in the table of contents of the Act, are repealed.

SEC. 115. AUTHORIZATION OF APPROPRIATIONS.

(a) AUTHORIZATION.—Section 406 (16 U.S.C. 1882) is amended by adding at the end thereof the following new paragraphs:

"(12) $69,000,000 for fiscal year 1986.

"(13) $70,800,000 for fiscal year 1987.".

(b) LIMITATIONS REGARDING CERTAIN NOAA FISHERY RESEARCH VESSELS.—During fiscal years 1986 and 1987, the Secretary of Commerce may not replace with chartered fishery survey vessels the fishery research vessels of the National Oceanic and Atmospheric Administration operated by the Atlantic Marine Center, unless a period of 90 days has expired after the Secretary has submitted to Congress a full and complete statement (including relevant supporting studies) concerning the proposed chartering and the reasons therefor.

SEC. 116. CLERICAL AMENDMENTS.

Section 3(4) (16 U.S.C. 1802(4)) is amended—

(1) by striking out "Artica islandica" in the listing of mollusks and inserting in lieu thereof "Arctica islandica"; and

(2) by striking out "Hippiospongia canaliculata" in the listing of sponges and inserting in lieu thereof "Spongia cheiris".

SEC. 117. DIRECTIONS REGARDING FISHERY MANAGEMENT COUNCIL MEMBERSHIP.

Notwithstanding section 302 of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1852) and effective on and after the date of the enactment of this Act, the Secretary shall take action to ensure, to the extent practicable, that those persons dependent for their livelihood upon the fisheries within the respective jurisdictions of the Regional Fishery Management Councils are fairly represented as voting members of the Councils.

TITLE II—SEAFOOD MARKETING COUNCILS

SEC. 201. SHORT TITLE.

This title may be cited as the "Seafood Marketing Councils Act".

SEC. 202. FINDING.

The Congress finds that it is in the national interest to promote the consumption of fish and fish products.

SEC. 203. PURPOSES.

The purposes of this title are to—

(1) strengthen the competitive position of the United States seafood industry in the domestic and international marketplace;

(2) encourage the development and utilization of all species of fish available for harvest by the United States industry;

(3) encourage the utilization of domestically produced fish and fish products through market enhancement, promotion, and public relations;

(4) encourage the United States fishing industry to develop methods to improve product quality and efficiency in the marketplace;

(5) educate and inform consumers on the use of fish and fish products;

(6) educate and inform the public about the nutritional and dietary value of fish and fish products; and

(7) enhance the role of the private sector in promoting the consumption of fish and fish products.

SEC. 204. DEFINITIONS.

As used in this title—

(1) The term "Administrator" means the Administrator of the National Oceanic and Atmospheric Administration.

(2) The term "council" refers to a seafood marketing council established under section 205.

(3) The term "consumer education" means actions undertaken to inform consumers on matters related to the consumption of fish and fish products.

(4) The term "fish" means finfish, mollusks, crustaceans, and all other forms of marine and freshwater life used for human consumption.

(5) The term "fish processing vessel" means a vessel that is used for the preparation of fish or fish products, other than by gutting, decapitating, gilling, skinning, shucking, icing, freezing or brine chilling, for commercial sale.

(6) The term "fish product" means a product used for human consumption that consists, in whole or in part, of fish.

(7) The term "handle" means—

(A) the sale of fish and fish products by harvesters to receivers;

(B) the purchase of fish and fish products by receivers from harvesters; or

(C) the importation of fish and fish products by importers.

(8) The term "marketing and promotion" means an activity aimed at encouraging the consumption of fish and fish products or expanding or maintaining commercial markets for fish and fish products.

(9) The term "person" means—

(A) any individual who is a citizen or national of the United States;

(B) any group of individuals described in subparagraph (A); or

(C) any partnership, corporation, association, cooperative, or other private entity organized or existing under the laws of the United States or any State, commonwealth, territory, or possession of the United States.

(10) The term "quality standard" means a standard reflecting the relative degree or level of excellence of a fish or fish product.

(11) The term "research" means any type of research designed to advance the image, desirability, usage, marketability, production or quality of fish and fish products.

(12) The term "sector" means any of the following:

(A) The harvesting sector consisting of persons in the business of catching fish for purposes of sale.

(B) The importing sector consisting of persons in the business of importing fish or fish products into the United States or who act as agents, brokers, or consignees for any person or nation that produces fish or fish products outside of the United States for sale in the United States.

(C) The marketing sector consisting of persons in the business of selling fish or fish products in the wholesale, retail, or restaurant trade, but whose primary business function is not the processing or packaging of fish or fish products.

(D) The processing sector consisting of persons in the business of preparing or packaging fish or fish products for sale and who are not receivers.

(E) The receiving sector consisting of owners of fish processing vessels and of persons in the business of acquiring fish directly from harvesters.

(F) The consumer sector consisting of persons professionally engaged in the dissemination of information pertaining to the nutritional benefits and preparation of fish and fish products.

(13) The term "United States" means the several States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands and any other territory, possession, or commonwealth of the United States.

SEC. 205. COUNCIL ESTABLISHMENT.

(a) IN GENERAL.—An application for a charter for a seafood marketing council for one or more species of fish and fish products of that species may be filed by persons who meet the requirements specified in accordance with subsection (b)(6).

(b) APPLICATION.—An application for a charter for a council shall be made by filing with the Administrator the text of a proposed charter in such form as shall be prescribed by regulation by the Administrator. The text of a proposed charter must contain such information as the Administrator considers necessary or appropriate for carrying out the provisions of this title, including but not limited to—

(1) the name of the council and a provision proclaiming its establishment;

(2) a declaration of the purposes and objectives of the council;

(3) a description of the species of fish and the fish products for which the council will implement marketing and promotion plans under section 206;

(4) the identification of each sector and the number and terms of representatives thereof that will be represented as voting members of the council;

(5) the identification of those sectors (including harvesters, receivers and, if subject to assessment, importers) subject to a referendum to establish a council under subsection (e);

(6) a specification for each sector described under paragraph (5) of the minimum requirements, as measured by income, volume, or other relevant factors, that a person engaging in business in the sector must meet in order to participate in that referendum;

(7)(A) a description of the procedures for determining assessment rates under section 208;

(B) the proposed rate or rates that will be imposed by the council on receivers and, if subject to assessment, importers during its first year of operation;

(C) the maximum amount an assessment rate for any period may be raised above the rate applicable for the immediately preceding period; and

(D) the maximum rate or rates that can be imposed by a council on receivers or importers during the operation of the council;

(8) a provision setting forth the definition of a quorum and the procedures for selecting a council chairman;

(9) a provision setting forth the voting procedures applicable to absentee council members; and

(10) such other provisions relating to council administration as the Administrator deems necessary.

The text of a proposed charter shall be accompanied by a document identifying, to the extent practicable by address of place of business, the persons (hereinafter referred to in this title as "sector participants") that are considered by the applicants to meet the requirements specified in paragraph (6). The text of a proposed charter shall include provisions setting forth procedures for providing refunds to those sector participants subject to assessment under section 208, and may also include provisions which establish a maximum limit on the amount that any one sector participant may be required to pay under an assessment for any period.

(c) COUNCIL REQUIREMENTS.—The Administrator may not approve a proposed charter filed under subsection (a) unless the proposed council meets the following requirements:

(1) The council must have voting members representing the harvesting, receiving and, if subject to assessment, the importing sectors.

(2) The members of a council shall serve without compensation, but shall be reimbursed for their reasonable expenses incurred in performing their duties as council members.

(d) APPROVAL OF PROPOSED CHARTERS BY ADMINISTRATOR.—(1) Within 180 days of the receipt of an application to establish a council, the Administrator shall—

(A) identify, to the extent practicable, those sector participants that meet the requirements, specified under subsection (b)(6), for eligibility to participate in the referendum under subsection (e);

(B) determine, to the extent practicable, if the charter is accompanied by a petition comprised of the signatures or corporate certifications, as the case may be, of no less than three sector participants in each sector identified in accordance with subsection (b)(5) who collectively accounted for, in the 12-month period immediately preceding the month in which the application was filed, not less than 10 percent of the value of the fish or fish products described in accordance with subsection (b)(3) that were handled by each sector identified in accordance with subsection (b)(5) during that period; and

(C) determine if the proposed charter is consistent with the provisions of this title and any other applicable law.

(2) If negative determinations are made under paragraph (1) regarding an application and charter, the Administration shall advise in writing the sector participants who made the application of the reasons therefor. A corrected application may be submitted thereafter to the Administrator for approval.

(e) REFERENDA.—(1) Upon making affirmative determinations under subsection (d)(1) regarding a proposed charter, the Administrator, within 90 days after the date of the last of those determinations, shall hold a referendum on the adoption of the proposed charter among all sector participants identified in accordance with subparagraph (d)(1)(A). If a majority of the voting sector participants in each sector who collectively accounted for, in the 12-month period immediately preceding the month in which the proposed charter was filed under subsection (a), 66 percent or more of the value of the fish or fish products described in accordance with subsection (b)(3) that were handled by that sector during that period approve the proposed charter, the Administrator shall by order establish the council and the proposed charter, as so approved, shall thereafter be treated as its charter.

(2) Not less than 30 days prior to holding a referendum under this subsection, the Administrator shall—

(A) publish (by such means as will result in wide publicity in regions affected by the proposed charter) the text of the proposed charter and a list of those sector participants eligible to vote in the referendum; and

(B) provide for public comment including the opportunity for a public meeting.

(3) The Administrator shall pay all costs of the referendum which establishes a council under this subsection; but within 2 years after the council is established, the council shall reimburse the Administrator for any expenses incurred for the conduct of the referendum from assessments collected by the council. Before holding a referendum under this subsection, the Administrator shall require sureties to post a bond or other security acceptable to the Administrator, in an amount which the Administrator determines to be sufficient to pay any expenses incurred for the conduct of the referendum, and shall immediately recover such amount if a referendum fails to establish the council. For the purpose of this title, the term "expenses incurred for the conduct of the referendum" shall not include salaries of Government employees or other administrative overhead, but shall be limited to those additional direct costs incurred in connection therewith.

(f) COUNCIL MEMBER APPOINTMENTS.—(1) Within 30 days after a council is established under subsection (e), the Administrator shall solicit from the sectors represented on the council nominations for council members. If the harvesters and receivers represented on the council are engaged in business in two or more regions of the United States, the nominations made under this paragraph, and the appointments to the council made under paragraph (3), must, to the extent practicable, result in representation for the constituent regions.

(2) No individual is eligible for nomination or appointment as a council member unless that individual is knowledgable and experienced with regard to the activities of the sector which that individual will represent on the council and is or has been actively engaged in the business of the sector which that individual will represent on the council.

(3) The Administrator, within 60 days after the close of the 30-day period in paragraph (1), shall appoint the members of the council from the nominees.

(4) A vacancy on a council shall be filled, within sixty days after the vacancy occurs, in the same manner in which the original appointment was made. A council member appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of that term.

(5) The Administrator shall remove any council member if the council concerned first recommends removal for cause by not less than two-thirds of the council members. A removal recommendation of a council must be in writing and accompanied by a statement of the reasons upon which the recommendation is based.

(g) COUNCIL STATUS.—A council is not an instrumentality of the United States Government.

SEC. 206. FUNCTIONS AND POWERS OF COUNCILS.

(a) FUNCTIONS.—

(1) Each council shall—

(A) adopt a seal which shall be judicially noticed;

(B) implement all terms of its charter;

(C) prepare and submit to the Administrator, for review and approval under section 207(a)(1), a marketing and promotion plan and amendments thereto which contain descriptions of the projected consumer education, research, and other marketing and promotion activities of the council;

(D) implement and administer an approved marketing and promotion plan and amendments thereto;

(E) determine the assessments to be made under section 208 and administer the collection of the assessments to finance council expenses described in paragraph (2);

(F) receive, investigate and report to the Administrator accounts of violations of rules or orders relating to assessments collected pursuant to section 208, or quality standard requirements established under subsection (c);

(G) prepare and submit to the Administrator, for review and approval under section 207(a)(1), a budget (on a fiscal year basis) of the anticipated expenses and disbursements of the council including—

(i) all administrative and contractual expenses,

(ii) the probable costs of consumer education, research, and other marketing and promotion plans or projects,

(iii) the costs of the collection of assessments, and

(iv) the expense of repayment of the costs of each referendum conducted in regard to the council;

(H) maintain books and records, prepare and submit to the Administrator such reports from time to time as may be necessary for appropriate accounting with respect to the receipt and disbursement of funds entrusted to it, and cause a complete audit report to be submitted to the Administrator at the end of each fiscal year;

(I) reimburse the Administrator for the expenses incurred for the conduct of the referendum to establish the council or a subsequent referendum to terminate the council that fails; and

(J) prepare and submit to the Administrator from time to time such reports or proposals as a council determines appropriate for furthering the purposes of this Act.

(2) Funds collected by a council under section 208 shall be used by the council for—

(A) research, promotion and consumer information activities regarding the quality and marketing of fish and fish products;

(B) other expenses as described in subsection (a)(1)(G);

(C) such other expenses for the administration, maintenance, and functioning of the council as may be authorized by the Administrator;

(D) any reserve fund established under subsection (b)(5) and any administrative expenses incurred by the Administrator specified as reimbursable under this Act.

(3) Marketing and promotion plans and amendments thereto prepared by a council under subsection (a)(1)(C) shall be designed to increase the general demand for fish and fish products described in accordance with section 205(b)(3) by encouraging, expanding, and improving the marketing, promotion and utilization of the fish and fish products, in domestic or foreign markets or both, through consumer education, research, and other marketing and promotion activities.

(4) Consumer education and other marketing and promotion activities carried out by a council under a marketing and promotion plan and amendments thereto may not contain references to any private brand or trade name and shall avoid the use of deceptive acts or practices in promoting fish or fish products or with respect to the quality, value, or use of any competing product or group of products.

(b) POWERS.—A council—

(1) may sue and be sued;

(2) may enter into contracts;

(3) may employ and determine the salary of an executive director who may, with the approval of the council, employ and determine the salary of such additional staff as may be necessary;

(4) may collaborate with other councils in establishing and implementing a national marketing and promotion plan for one or more species of fish or fish products; and

(5) may establish a reserve fund from monies collected and received under section 208 to permit an effective and sustained program of research, promotion, and consumer education regarding the quality and marketing of fish and fish products in years when production and assessment income may be reduced; but the total reserve fund may not exceed the amount budgeted for the current fiscal year of operation.

(c) QUALITY STANDARDS.—(1) A council may develop and submit to the Administrator for approval, or upon the request of a council the Administrator shall develop, quality standards for a fish or fish product described in accordance with section 205(b)(3). Any quality standard developed under this paragraph shall be consistent with the purposes of this title.

(2) A quality standard developed under paragraph (1) may be adopted by a council by a majority of the council members if first approved, in a referendum conducted by the council, by a majority of the voting sector participants of the sector concerned who collectively accounted for, in the 12-month period immediately preceding the month in which the referendum is held, not less than 66 percent of the value of the fish or fish products described in accordance with section 205(b)(3) that were handled by that sector.

(3) With respect to a quality standard adopted under paragraph (2), the council shall develop and file with the Administrator an official identification in the form of a symbol, stamp, label, or seal that will be used to indicate that a fish or fish product meets the quality standard at the time the official identification is affixed to the fish or fish product, or is affixed to or printed on the packaging material of the fish or fish product.

(4) The Administrator shall establish by regulation procedures for the use of an official identification filed with the Administrator under paragraph (3). Misuse of an official identification established under this section shall constitute a violation of this title.

(5) Before issuing final regulations under paragraph (4) the Administrator shall—

(A) publish the proposed regulations by such means as will result in wide publicity in affected regions; and

(B) provide for public comment and the opportunity for a public hearing.

(6) A council may receive, investigate and report to the Administrator accounts of violations of regulations issued under paragraph (4).

(7) Any regulation issued under paragraph (4) shall be immediately repealed by the Administrator upon the termination under section 211 of the council that developed the official identification to which the regulations apply.

(8) The procedures applicable to the adoption and the taking effect of a quality standard developed under this subsection also apply to the subsequent amendment or termination of the standard.

(d) CHARTER AMENDMENTS.—A council may submit to the Administrator amendments to the text of the council's charter. Any proposed amendments to a charter shall be approved or disapproved in the same manner as the original charter was approved under section 205(d) and (e) with the exception of section 205(d)(1)(B).

SEC. 207. FUNCTIONS AND POWERS OF THE ADMINISTRATOR.

(a) FUNCTIONS.—In addition to the duties prescribed under section 205, the Administrator shall—

(1) review, for consistency with the provisions of the Act and other applicable law, and approve or disapprove, marketing promotion plans and budgets within sixty days after their submission by a council;

(2) immediately notify a council in writing of the disapproval of a marketing and promotion plan or budget and reasons therefor;

(3) issue orders and amendments thereto that are necessary to implement quality standards under section 206(c);

(4) promulgate regulations necessary to carry out the purposes of this title;

(5) enforce the provisions of this title as provided under section 212; and

(6) make all appointments to the councils in accordance with section 205(f).

(b) POWERS.—The Administrator may provide, on a reimbursable or other basis, such administrative or technical assistance as the councils may request for purposes of the initial organization and subsequent operation of the Council.

SEC. 208. ASSESSMENTS.

(a) IN GENERAL.—A council shall impose and administer the collection of the assessments that are necessary to pay for all expenses incurred by the council in carrying out its functions under this title.

(b) NATURE OF ASSESSMENTS.—(1) Assessments shall be imposed on sector participants in the receiving sector or the importing sector or both as specified in an approved council charter.

(2) An assessment on sector participants in the receiving sector is—

(A) except for owners of fish processing vessels, in the form of a percentage of the value of the fish described in accordance with section 205(b)(3) when purchased by those participants from fish harvesters; and

(B) for owners of fish processing vessels, in the form of a percentage of the value of the fish described in accordance with section 205(b)(3) and harvested by such vessels that is no less than the value of those fish as determined in subparagraph (A).

(3) An assessment on sector participants in the importing sector is in the form of a percentage of the value, as determined for the purposes of the customs laws, of the fish or fish products described in accordance with section 205(b)(3) when entered, or withdrawn from warehouse for consumption, in the customs territory of the United States by those participants.

(c) EXCEPTIONS.—A council may not impose an assessment on any person that was not eligible to vote in the referendum establishing the council under section 205(e) by reason of failure to meet the requirements specified under section 205(b)(6).

(d) VOLUNTARY PAYMENTS.—Any person may make voluntary payments or in-kind contributions to a council for purposes of assisting the council in carrying out its functions.

(e) COUNCIL ACCOUNTS.—All funds collected or received by a council under this section shall be deposited by the council in an appropriate account in the name of the council specified in its charter. Funds eligible to be collected or received by a council shall be limited to those authorized under this section.

(f) CONFIDENTIALITY OF INFORMATION.—(1) Sector participants shall make available to the Administrator such information and data as is necessary for the effectuation, administration or enforcement of this title or any order or regulation issued pursuant to this title. Except as provided in paragraphs (2) and (3), any information obtained in carrying out this subsection shall be kept confidential by all officers and employees of the National Oceanic and Atmospheric Administration, independent accountants and other persons who have access to such information.

(2) If the Administrator or an employee of the United States Government is party to a suit or administrative action involving an assessment, order, or regulation issued under this title, the Administrator may disclose information obtained under paragraph (1) to the extent allowed by the judicial or administrative officer presiding over such suit or action.

(3) This subsection shall not prohibit—

(A) the issuance of general or statistical statements based upon reports of a number of persons subject to the provisions of this title which do not identify the information furnished by any person; or

(B) the publication by direction of the Administrator of the name of any person violating a requirement relating to the assessment imposed under section 208(a) or to quality standards implemented by the Administrator under section 206(c), and a statement of the particular provisions of the requirement violated by such person.

(4) Any individual who is required to keep information confidential under this subsection and who knowingly violates this subsection shall, upon conviction, be—

(A) subject to a fine of not more than $1,000 or to imprisonment for not more than one year, or both; and

(B) removed from office if an officer or employee of a council or the National Oceanic and Atmospheric Administration.

(g) PROHIBITION.—It shall be unlawful for any person to use the seal under section 206(a) or the official identification under section 206(c) unless such person is paying assessments under section 208 or has the express written permission of the council to use the seal or official identification. The Administrator shall issue regulations to implement this prohibition.

SEC. 209. PETITIONS.

(a) IN GENERAL.—Any person subject to assessment under section 208 may file a written petition with the Administrator alleging that—

(1) the assessment;

(2) the plan approved under section 207(a)(1) on which the assessment is based; or

(3) any obligation imposed under the plan; is not in accordance with law and requesting the Administrator to modify, or take other appropriate action regarding the assessment or plan.

(b) PROCEDURAL REQUIREMENTS.—Petitions shall be in writing and filed within the period prescribed by the Administrator. A person who files a petition under this section shall be given an opportunity for a hearing regarding the petition in accordance with regulations issued by the Administrator. After hearing, or if no hearing is requested, after consideration of all documentation and other evidence, the Administrator shall make a ruling upon the petition.

SEC. 210. REFUNDS.

Notwithstanding any other provision of this title, any person who pays an assessment shall have the right to demand and promptly receive from the council a refund of such assessment. A demand for refund must be made in accordance with the procedures and within such time, as shall be prescribed by the council and as approved by the Administrator.

SEC. 211. COUNCIL TERMINATION.

(a) PETITION AND REFERENDUM.—(1) A petition to terminate a council may be filed with the Administrator by no less than three sector participants in any one sector. Any petition filed under this subsection shall be accompanied by a written document explaining the reasons for the petition.

(2) If the Administrator determines that a petition filed under paragraph (1) is accompanied by the signatures, or corporate certifications, as the case may be, of no less than three sector participants in a sector referred to in paragraph (1) who collectively accounted for, in the 12-month period immediately preceding the month in which the petition to terminate was filed, not less than 20 percent of the value of the fish or fish products described in accordance with section 205(b)(3) that were handled by that sector during that period, the Administrator, within 90 days after that determination, shall hold a referendum for termination of the council among all sector participants in that sector.

(3) Not less than 30 days before holding a referendum under this subsection, the Administrator shall publish a notice of such referendum including the document explaining the reasons for the petition filed under paragraph (1) and any other relevant information the Administrator deems appropriate.

(4) If a majority of the voting sector participants who, in the period referred to in paragraph (2), collectively accounted for not less than 66 percent of the value of such fish and fish products that were handled during that period by a sector referred to in paragraph (1) approve a referendum to terminate a council, the Administrator shall by order terminate the council effective as of a date by which the affairs of the council may be concluded on an orderly basis.

(5) The Administrator initially shall pay all costs of a referendum to terminate a council under this subsection. Before holding a referendum under this section, the Administrator shall require sureties to post a bond or other security acceptable to the Administrator in an amount which the Administrator determines to be sufficient to pay any expenses incurred for the conduct of the referendum.

(6)(A) If a referendum conducted under this section fails to result in the termination of the council, the Administrator shall immediately recover the amount of the bond posted by sureties under paragraph (5).

(B) If a referendum conducted under this section results in the termination of the council, the Administrator shall recover the expenses incurred for the conduct of the referendum from the account established by the council under section 208(e). If the amount remaining in such account is insufficient for the Administrator to recover all expenses incurred for the conduct of the referendum, the Administrator shall recover the balance of such expenses from the sureties that posted a bond under paragraph (5).

(b) RETURN OF ASSESSMENTS.—If a council is terminated under subsection (a), the Administrator, after recovering all expenses incurred for the conduct of the referendum under subsection (a), shall take such action as is necessary and practicable to ensure that moneys remaining in the account established by the council under section 208(e) are paid on a prorated basis to the sector participants from whom those moneys were collected under section 208.

SEC. 212. ENFORCEMENT.

(a) IN GENERAL.—(1) The district courts of the United States shall have jurisdiction specifically to enforce and to prevent and restrain any person from violating any assessment, order or regulation made or issued under this title.

(2)(A) If the council has reason to believe that a person subject to an assessment, order or regulation made or issued under this title is violating such assessment, order or regulation, it may refer the matter to the Administrator.

(B) Except as provided in subparagraphs (C) or (D), any civil action authorized to be brought under this subsection, when referred by a council under subparagraph (A), shall be referred to the Attorney General for appropriate action.

(C) If the Administrator believes that the administration and enforcement of the provisions of the title would be adequately served by taking administrative action under subsection (b) or providing written notice or warning to any person committing a violation of this title, the Administrator is not required to refer such violation to the Attorney General.

(D) Whenever a matter has been referred by a council under subparagraph (A) and the Administrator or the Attorney General fails within 60 days of such referral to take appropriate action, the council may, upon filing notice with the Administrator or Attorney General, as appropriate, and other interested parties, bring an action under its own name.

(b) PENALTIES.—(1)(A) When a council brings an action under subsection (a)(2), it shall be entitled to recover costs of litigation, and where the action is brought to collect an unpaid assessment, interest from the date the amount became due and payable.

(B) Any person who violates any provision of any order, (including a cease and desist order previously issued under this paragraph) or regulation issued by the Administrator under this title, or who fails or refuses to pay, collect, or remit any assessment required under this title, may be assessed a

civil penalty by the Administrator of not less than $500 nor more than $5,000 for each such violation. Each violation shall be a separate offense. In addition to, or in lieu of, a civil penalty under this subparagraph, the Administrator may issue an order requiring such person to cease and desist from continuing such violation.

(C) No penalty shall be assessed, or cease and desist order issued, under this paragraph unless the affected person is given notice and opportunity for a hearing before the Administrator with respect to such violation.

(D) Any order of the Administrator under this paragraph assessing a penalty or imposing a cease and desist order shall be final and conclusive, unless the affected person files an appeal from the Administrator's order with the appropriate United States court of appeals.

(2)(A) Any person against whom a violation is found under paragraph (1) may obtain review of such action in the United States court of appeals for the circuit in which such person resides or has his place of business or in the United States Court of Appeals for the District of Columbia Circuit by filing a notice of appeal in such court within thirty days after the date of such order and by simultaneously sending a copy of such notice by certified mail to the Administrator.

(B) The Administrator shall promptly file in the court a certified copy of the record upon which such violation was found.

(C) The findings of the Administrator shall be set aside only if found to be unsupported by substantial evidence or if not in accordance with law.

(3)(A) If any person fails to pay a civil penalty after it has become final, the Administrator shall refer the matter to the Attorney General.

(B) The Attorney General shall institute appropriate action to recover the amount assessed under this subsection in a district court of the United States.

(C) If, within 60 days after such referral, the Attorney General fails to file a civil action, the council to whose programs the assessment, order or regulation relates may institute an action in its own name.

SEC. 213. INVESTIGATIONS.

(a) IN GENERAL.—The Administrator may make such investigations as the Administrator determines necessary to—

(1) carry out the Administrator's responsibilities under this title; and

(2) determine whether any person has engaged in any act or practice which constitutes a violation of the provisions of this title.

(b) POWERS.—For the purpose of investigations under subsection (a), the Administrator may administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents which are relevant to the inquiry. The attendance of witnesses and the production of any such records may be required from any place in the United States.

(c) ENFORCEMENT.—In case of contumacy or refusal to obey a subpoena by any person, the Administrator may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, to require the attendance and testimony of witnesses and the production of books, papers, and documents. Such court may issue an order requiring such person to appear before the Administrator to produce records or to give testimony relating to the matter under investigation.

SEC. 214. APPROPRIATIONS.

Any authority of the Administrator to make payments under this title shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriations Acts.

TITLE III—INTERJURISDICTIONAL FISHERIES RESEARCH

SEC. 301. SHORT TITLE.

This title may be cited as the "Interjurisdictional Fisheries Research Act of 1986".

SEC. 302. PURPOSES.

The purposes of this title are—

(1) to promote and encourage State research in support of the management of priority interjurisdictional fishery resources; and

(2) to promote and encourage management of priority interjurisdictional fishery resources throughout their range.

SEC. 303. DEFINITIONS.

For the purposes of this title:

(1) The term "Federal fishery management plan" means a plan developed under "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (Public Law 94-265; 90 Stat. 331 et seq.).

(2) The term "fishery resource" means finfish, mollusks, crustaceans, and any other form of marine animal or plant life, other than marine mammals and birds.

(3) The term "interjurisdictional fishery resource" means—

(A) a fishery resource for which there exists a Federal fishery management plan and for which a fishery occurs in waters under the jurisdiction of one or more States and the exclusive economic zone established by Proclamation Numbered 5030, dated March 10, 1983;

(B) a fishery resource for which there exists an interstate fishery management plan; or

(C) a fishery resource which migrates between the waters under the jurisdiction of two or more States bordering on the Great Lakes.

For purposes of applying section 305 during fiscal year 1987, a Federal fishery management plan or an interstate fishery management plan for the fishery resource need not be in existence, but a plan of either kind for that resource must be in the development process during that year.

(4) The term "interstate fishery management plan" means a plan for managing fisheries developed and adopted by an interstate commission.

(5) The term "interstate commission" means a commission or other administrative body established by an interstate compact.

(6) The term "interstate compact" means a compact that has been entered into by two or more States, established for the purposes of conserving and managing interjurisdictional fishery resources throughout their range, and consented to and approved by Congress.

(7) The term "project" means a program for research in support of the management of an interjurisdictional fishery resource.

(8) The term "Secretary" means the Secretary of Commerce.

(9) The term "State" means any of the several States of the United States, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, or the Northern Mariana Islands.

(10) The term "State agency" means any department, agency, commission, or official of a State authorized under the laws of the State to regulate commercial fisheries.

SEC. 304. APPORTIONMENT.

(a) IN GENERAL.—

(1) Funds appropriated under section 308(a) shall be apportioned by the Secretary among the States on October 1 of each fiscal year, or as soon thereafter as practicable. The amount of funds apportioned to each State shall be determined by the Secretary as the ratio which the equally weighted average of the volume and value of fishery resources harvested by domestic commercial fishermen and received within such State during the 3 most recent calendar years for which data satisfactory to the Secretary are available bears to the total equally weighted average of the volume and value of all fishery resources harvested by domestic commercial fishermen received within all of the States during those calendar years.

(2) No State may receive an apportionment under this subsection for any fiscal year if the equally weighted average of the volume and value of fishery resources harvested by domestic commercial fishermen and received within such State during the three most recent calendar years for which data satisfactory to the Secretary are available is less than one-tenth of 1 percent of the total equally weighted average of the volume and value of all fishery resources harvested by domestic commercial fishermen and received within all of the States during those 3 calendar years unless—

(A) the State is a signatory to an interstate fishery compact; or

(B) the State borders one or more of the Great Lakes.

(3) No State which is a signatory to an interstate fishery compact, or which borders one or more of the Great Lakes, may receive an apportionment for any fiscal year under this subsection which is less than 1 percent of the total amount of funds available for apportionment for that fiscal year.

(4) No State may receive an apportionment for any fiscal year under this subsection which is more than 6 percent of the total amount of funds available for apportionment for such fiscal year.

(b) UNUSED APPORTIONMENTS.—Any part of an apportionment for any fiscal year to any State—

(1) that is not obligated during that year;

(2) with respect to which the State notifies the Secretary that it does not wish to receive that part; or

(3) that is returned to the Secretary by the State—

may not be considered to be apportioned to that State and shall be added to such funds as are appropriated pursuant to section 308(a) for the next fiscal year (and shall be treated as having been appropriated for such next year) for apportionment under subsection (a). Any notification or return of funds referred to in paragraph (2) or (3) by a State is irrevocable.

SEC. 305. STATE PROJECTS.

(a) IN GENERAL.—

(1) Any State may, through its State agency or an interstate commission, submit to the Secretary a proposal for a project which includes full plans, specifications, and cost estimates for such project. The total cost of all items included for engineering, planning, inspection, and unforeseen contingencies in connection with any works to be constructed as part of such a proposed project shall not exceed 10 percent of the

total cost of such works, and shall be paid by the State as a part of its contribution to the total cost of the works.

(2) No part of any funds appropriated under any authorization contained in section 308 may be obligated with respect to any project until the proposal for such project has been submitted under paragraph (1) and approved by the Secretary. The Secretary, before approving any proposal for a project, must evaluate the proposal as to—

(A) the soundness of design;

(B) the possibilities of securing productive results;

(C) the minimization of duplication with other research projects in support of the management of interjurisdictional fishery resources and carried out under this title or under any other law or regulation;

(D) the organization and management of the project;

(E) the methods proposed for monitoring and evaluating the success or failure of the project;

(F) the consistency of the project with the purposes of this title specified in section 302; and

(G) such other criteria as the Secretary may prescribe.

(3) The Federal share of the cost of any project conducted under this title shall not exceed 75 percent of the total estimated cost of the project unless—

(A) the State has adopted the interstate fishery management plan for the resource to which the project applies; or

(B) the State has adopted fishery regulations which the Secretary has determined are consistent with the Federal fishery management plan for the species to which the project applies;

in which case the Federal share shall not exceed 90 percent of the total estimated cost of the project.

(4)(A) If the Secretary approves or disapproves a proposal for a project, he shall promptly give written notification, including, if disapproved, a detailed explanation of the reasons for the disapproval, to the State agency submitting the proposal or, if the proposal is submitted through an interstate commission, such commission and the State.

(B) For the purposes of this title, funds apportioned under this section to any State shall be treated as having been obligated with respect to a project during the fiscal year in which the written notification of approval required under subparagraph (A) for the project proposal is made.

(b) RESTRICTION.—The expenditure of funds under this title shall be applied only to projects for which a proposal has been approved under subsection (a), and if otherwise applied such funds shall be replaced by the State before the State may receive any additional funds under this title.

(c) PAYMENT.—When the Secretary determines that a project carried out under a proposal approved by him has been completed, or where he otherwise deems it appropriate, he shall cause to be paid to the proper authority of the State, or to the official or depository designated by the interstate commission if the State agency specifies that payment is to be made to the interstate commission, the Federal share of the project. Any payment made to an interstate commission shall be charged against the apportionment of the State concerned.

SEC. 306. PROPERTY.

(a) APPLICATION OF FEDERAL AND STATE LAWS.—All work, including the furnishing of labor and materials, needed to complete any project approved by the Secretary shall be performed in accordance with applicable Federal and State laws under the direct supervision of the State agency, and in accordance with regulations as the Secretary may prescribe.

(b) TITLE.—Title to all property, real and personal, acquired for the purposes of completing any project approved by the Secretary vests in the State.

(c) DISPOSAL.—If a State disposes of any real or personal property acquired under this title, the State shall pay into the Treasury of the United States the amount of any proceeds resulting from the property disposed to the extent of and in the same ratio that funds provided under this title were used in the acquisition of the property. In no case shall the amount paid into the Treasury of the United States under this section exceed the amount of funds pro- vided by this chapter for the acquisition of the property involved.

SEC. 307. REPORTS.

After consultation with the States receiving funds under this title and with any interstate commission involved in carrying out a project under this title, the Secretary shall submit to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate not later than 90 days after the end of the fiscal year 1988, and each second fiscal year occurring after that fiscal year, a report which contains—

(1) a description of each project receiving funds under this title during the last 2 fiscal years ending before such report is submitted;

(2) a specification of the total amount of funds from the Federal Government and the total amount of funds from each State spent on each project receiving funds under this title during the last 2 fiscal years ending before such report is submitted;

(3) an assessment of each project receiving funds under this title during the last 2 fiscal years ending before such report is submitted to determine whether such project is furthering the purposes of this title; and

(4) a statement specifying all funds which have been apportioned pursuant to section 305(a) and are available for obligation by a State or the Secretary but which have not been obligated.

SEC. 308. AUTHORIZATION OF APPROPRIATION.

(a) GENERAL APPROPRIATIONS.—There are authorized to be appropriated to the Department of Commerce for apportionment to carry out the purposes of this title $5,000,000 for each of fiscal years 1987, 1988, and 1989.

(b) ADDITIONAL APPROPRIATIONS.—In addition to the amounts authorized in subsection (a), there are authorized to be appropriated to the Department of Commerce $2,500,000 for each of fiscal years 1987, 1988, and 1989, which shall be available in such amounts as the Secretary may determine appropriate for the purposes of this title; except that—

(1) in providing funds to States under this subsection, the Secretary shall give a preference to those States regarding which he determines there is a commercial fishery failure or serious disruption affecting future production due to a fishery resource disaster arising from natural or undetermined causes, and any sums made available under this subsection may be used either by the States or directly by the Secretary in cooperation with the States for any purpose that the Secretary determines is appropriate to restore the fishery affected by such a failure or to prevent a similar failure in the future; and

(2) the funds authorized to be appropriated under this subsection shall not be available to the Secretary for use as grants for chartering fishing vessels.

Amounts appropriated under this subsection shall remain available until expended.

(c) DEVELOPMENT OF MANAGEMENT PLANS.—In addition to the amounts authorized under subsections (a) and (b), there are authorized to be appropriated to the Department of Commerce $350,000 for each of fiscal years 1987, 1988, and 1989 to support the efforts of the following interstate commissions to develop interstate fishery management plans for interjurisdictional fishery resources:

(1) The commission established by the Atlantic States Marine Fisheries Compact, as consented to and approved by Public Law 77-539 (56 Stat. 267), approved May 4, 1942.

(2) The commission established by the Pacific Marir e Fisheries Compact, as consented to and approved by Public Law 80-232 (61 Stat. 419), approved July 24, 1947.

(3) The commission established by the Gulf States Marine Fisheries Compact, as consented to and approved by Public Law 81-66 (63 Stat. 70), approved May 19, 1949.

SEC. 309. REPEAL.

The Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779 et seq.) is repealed.

SEC. 310. EFFECTIVE DATE.

This title takes effect October 1, 1986.

TITLE IV—MISCELLANEOUS PROVISIONS RELATING TO FISH AND FISHERIES

SEC. 401. NOAA MARINE FISHERIES PROGRAM AUTHORIZATIONS.

The National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act (Public Law 98-210; 97 Stat. 1409) is amended—

(1) in section 2(a), by striking out "and" after "1984,", and by inserting ", $27,382,000 for fiscal year 1986, $28,121,314 for fiscal year 1987, $28,915,392 for fiscal year 1988, and $29,764,234 for fiscal year 1989" immediately after "1985";

(2) in section 3(a), by striking out "and" after "1984,", and by inserting ", $25,933,000 for fiscal year 1986, $26,633,191 for fiscal year 1987, $27,385,248 for fiscal year 1988, and $28,189,171 for fiscal year 1989" immediately after "1985"; and

(3) in section 4(a), by striking out "and" after "1984,", and by inserting ", $11,395,000 for fiscal year 1986, $11,702,665 for fiscal year 1987, $12,033,120 for fiscal year 1988, and $12,386,365 for fiscal year 1989" immediately after "1985".

SEC. 402. ANADROMOUS FISH CONSERVATION ACT AUTHORIZATIONS.

Section 4(a) of the Anadromous Fish Conservation Act (16 U.S.C. 757d(a)) is amended—

(1) by striking out "and 1985." in paragraph (4) and inserting "1985, and 1986."; and

(2) by adding after paragraph (4) the following:

"(5) $7,702,500 for fiscal year 1987.

"(6) $7,920,000 for fiscal year 1988.

"(7) $8,152,500 for fiscal year 1989.".

SEC. 403. CENTRAL, WESTERN, AND SOUTH PACIFIC FISHERIES DEVELOPMENT ACT AUTHORIZATIONS.

Section 8 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) is amended—

(1) by striking "and" after "1984,"; and

(2) by inserting immediately after "1985" the following: ", 1986, 1987, and 1988".

SEC. 404. ATLANTIC TUNAS CONVENTION ACT OF 1975 AUTHORIZATIONS.

Section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "year 1976, the period beginning July 1, 1976, and ending September 30, 1976, and fiscal years 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, and 1986" and inserting "years 1986, 1987, 1988, and 1989".

SEC. 405. GREAT LAKES FISHERY COMMISSION.

(a) INCREASE IN NUMBER OF COMMISSIONERS.—Section 3 of the Great Lakes Fishery Act of 1956 (16 U.S.C. 932) is amended to read as follows:

"SEC. 3. (a)(1) The United States shall be represented on the Commission by 4 Commissioners who shall be appointed by the President and who may not receive compensation for service as Commissioners. Of the Commissioners—

"(A) 1 shall be an official of the United States Government; and

"(B) 3 shall be individuals who reside in different Great Lakes States and who are knowledgeable regarding the fisheries of the Great Lakes, except that 1 of them must also be an official of a Great Lakes State.

"(2) The President shall appoint an alternate Commissioner who shall perform the duties of a Commissioner—

"(A) until a vacancy referred to in subsection (b)(3) is filled; and

"(B) in the event of the absence of a Commissioner from any meeting of the United States Section or the Commission.

"(b)(1) Except as provided in paragraph (2), the term of office of Commissioners appointed under subsection (a)(1)(B) is 6 years.

"(2) Of the Commissioners first appointed under subsection (a)(1)(B) after the date of the enactment of this subsection, 1 shall be appointed for a term of 2 years, 1 shall be appointed for a term of 4 years, and 1 shall be appointed for a term of 6 years.

"(3) Whenever a vacancy occurs among Commissioners appointed under subsection (a)(1)(B), the President shall appoint an individual to fill that vacancy for the remainder of the applicable term.".

(b) TRANSITION.—The term of office of each United States Commissioner on the Great Lakes Fishery Commission who is serving on the date of enactment of this Act is terminated (except the United States Government official appointed under section 3(a) of the Great Lakes Fishery Act of 1956 (16 U.S.C. 932(a), as in effect before the date of enactment). However, the individuals appointed to those terms shall continue to serve as Commissioners until the President makes appointments under section 3(b)(2) of the Act of 1956 (as added by subsection (a)), which appointments shall be made within 60 days after the date of enactment.

(c) CONFORMING AMENDMENT.—Section 201 of the Act entitled "An Act to amend the North Pacific Fisheries Act of 1954, and for other purposes", approved October 9, 1972 (22 U.S.C. 2672a) is amended by striking out "the Great Lakes Fishery Commission,".

SEC. 406. NOAA ESTUARINE PROGRAMS OFFICE.

(a) ESTABLISHMENT.—The Administrator of the National Oceanic and Atmospheric Administration (hereinafter in this section referred to as the "Administrator") shall establish within the Administration an Estuarine Programs Office.

(b) FUNCTIONS.—The Estuarine Programs Office shall—

(1) develop and implement a national estuarine strategy for the Administration that integrates the research, regulatory, and trusteeship responsibilities of the Administration;

(2) coordinate the estuarine activities of the various organizations within the Administration, including activities in estuarine research and assessment, fisheries research, coastal management, and habitat conservation;

(3) coordinate the estuarine activities of the Administration with the activities of other Federal and State agencies; and

(4) provide technical assistance to the Administrator, to other Federal agencies, and to State and local government agencies in—

(A) assessing the condition of estuaries;

(B) identifying estuaries of critical national or regional importance;

(C) identifying technical and management alternatives for the restoration and protection of estuarine resources; and

(D) monitoring the implementation and effectiveness of estuarine management plans.

(c) AUTHORIZATION.—There are authorized to be appropriated to the Administration not to exceed $500,000 for fiscal year 1987, $530,000 for fiscal year 1988, $560,000 for fiscal year 1989, and $600,000 for fiscal year 1990 to carry out the provisions of this section.

SEC. 407. NOAA OFFICERS.

(a) UNDER AND ASSISTANT SECRETARIES OF COMMERCE FOR OCEANS AND ATMOSPHERE.—

(1) Chapter 40 of title 15, United States Code, is amended—

(A) by inserting after section 1503a the following new section:

"§ 1503b. Under and Assistant Secretaries of Commerce for Oceans and Atmosphere.

"Under Secretary

"(a) There shall be in the Department of Commerce an Under Secretary of Commerce for Oceans and Atmosphere who shall serve as the Administrator of the National Oceanic and Atmospheric Administration established by Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) and perform such duties as the Secretary of Commerce shall prescribe. The Under Secretary shall be appointed by the President by and with the advice and consent of the Senate and shall be compensated at the rate now or hereafter provided for Level III of the Executive Schedule Pay Rates (5 U.S.C. 5314).

"Assistant Secretary

"(b) There shall be in the Department of Commerce, in addition to the Assistant Secretaries provided by law before the effective date of this section, one additional Assistant Secretary of Commerce who shall have the title Assistant Secretary of Commerce for Oceans and Atmosphere and shall serve as the Deputy Administrator of the National Oceanic and Atmospheric Administration established by Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) and perform such duties and functions as the Under Secretary of Commerce for Oceans and Atmosphere shall prescribe. The Assistant Secretary for Oceans and Atmosphere shall be appointed by the President by and with the advice and consent of the Senate and shall be compensated at the rate now or hereafter provided for Level IV of the Executive Schedule Pay Rates (5 U.S.C. 5315).";

(B) by inserting after the entry for section 1503a in the table of contents the following:

"1503b. Under and Assistant Secretaries of Commerce for Oceans and Atmosphere.".

(2) The individual serving on the date of the enactment of this Act—

(A) as the Administrator of the National Oceanic and Atmospheric Administration shall serve as the Under Secretary of Commerce for Oceans and Atmosphere until such time as a successor is appointed under section 1503b(a) of title 15, United States Code; and

(B) as the Deputy Administrator of the National Oceanic and Atmospheric Administration shall serve as the Assistant Secretary of Commerce for Oceans and Atmosphere until such time as a successor is appointed under section 1503b(b) of title 15, United States Code.

(b) CHIEF SCIENTIST OF NOAA.—Section 2(d) of Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) is amended to read as follows:

"(d) There shall be in the Administration a Chief Scientist of the National Oceanic and Atmospheric Administration who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for Level V of the Executive Schedule Pay Rates (5 U.S.C. 5316). The Chief Scientist shall be the principal scientific adviser to the Administrator, and shall perform such other duties as the Administrator may direct. The Chief Scientist shall be an individual who is, by reason of scientific education and experience, knowledgeable in the principles of oceanic, atmospheric, or other scientific disciplines important to the work of the Administration.".

(c) CONFORMING AMENDMENTS.—

(1) Section 5314 of title 5, United States Code, is amended by striking out "Administrator, National Oceanic and Atmospheric Administration." and inserting "Under Secretary of Commerce for Oceans and Atmosphere, the incumbent of which also serves as Administrator of the National Oceanic and Atmospheric Administration.".

(2) Section 5315 of title 5, United States Code, is amended—

(A) by striking out "Deputy Administrator, National Oceanic and Atmospheric Administration." and inserting "Assistant Secretary of Commerce for Oceans and Atmosphere, the incumbent of which also serves as Deputy Administrator of the National Oceanic and Atmospheric Administration.", and

(B) by striking out "Associate Administrator, National Oceanic and Atmospheric Administration.".

(3) Section 5316 of title 5, United States Code, is amended by inserting at the end thereof the following:

"Chief Scientist, National Oceanic and Atmospheric Administration.".

SEC. 408. TRANSFER OF AUTHORITY FOR REIMBURSEMENT UNDER THE FISHERMEN'S PROTECTIVE ACT OF 1967.

Effective October 1, 1986, paragraph (1) of section 7(f) of the Fishermen's Protective Act of 1967 (22 U.S.C. 1977(f)(1)) is amended to read as follows:

"(1) the term 'Secretary' means the Secretary of State.".

SEC. 409. FISHERIES LOAN FUND.

The third sentence of section 4(c) of the Fish and Wildlife Act of 1956 (16 U.S.C. 742c(c)) is amended to read as follows: "Any funds received in the fisheries loan fund after September 30, 1986, shall be covered into the Treasury as miscellaneous receipts.".

SEC. 410. CONVEYANCE AGREEMENT PROVISIONS.

(a) IN GENERAL.—Under the Agreement dated December 9, 1977, between the Commandant of the Coast Guard and Koniag, Incorporated, a regional native corporation, pursuant to Public Law 92-203 (a copy of which is recorded beginning at Book 44,

Page 179 of the Kodiak Recording District, Kodiak, Alaska) and any conveyance made under that Agreement, the rights or title conveyed to Koniag, Incorporated, shall be construed to include the following:

(1) Under the Agreement, welding or other equipment or machinery may be operated or maintained on lands conveyed to Koniag, Incorporated, if the equipment or machinery does not cause harmful electromagnetic interference with the Coast Guard Holiday Beach receiver site or is operated or maintained under terms and conditions mutually agreeable to the Coast Guard and Koniag, Incorporated. Harmful electromagnetic interference is defined as radio frequency signals which disrupt or degrade communications reception performance.

(2) The conveyance of the "old shipyard" includes the wharf and all lands of any nature beneath the wharf.

(3) An access and utility easement is intended as part of the conveyance for Parcel 2, known as Cliff Point, which consists of—

(A) a 100-foot wide access easement along the existing access road or a location that is mutually agreeable to the Coast Guard and Koniag, Incorporated, and includes the right to construct and operate an access road, bridges, guard rails, and other associated improvements; and

(B) a 40-foot wide utility easement adjacent to the access easement in paragraph (3)(A) of this subsection or a location that is mutually agreeable to the Coast Guard and Koniag, Incorporated.

(4) The construction, maintenance, and operation of a dock facility or location of any structure or thing on the premises described in section (c) of Schedule 4 of the Agreement is not inconsistent with the easement for the barge landing easement and access to and from the barge landing area reserved by the United States Government (hereinafter referred to in this paragraph as the "Government"), if the dock facility is constructed or the structure or thing is located as approved by the Government. Approval by the Government is deemed to be granted if a proposal for the construction and location of the dock facility, structure, or thing is submitted to the Government and—

(A) the Government does not respond within 60 days of receipt of the proposal; or

(B) if a response with recommendations for modification is submitted by the Government within 60 days of receipt of the proposal, the proposal is modified in a manner necessary to reasonably satisfy the requirements of the Government—

(i) to use the dock facility for a barge landing area as contemplated by the easement; and

(ii) to permit access to and from the barge loading area to public highways for the transportation of materials as specified in Agreement.

(b) APPLICATION.—All rights or conveyances confirmed by this section are subject to the sanctions in the Agreement referred to in subsection (a).

(c) IMPLEMENTATION.—The Commandant of the Coast Guard or other appropriate Federal officer shall issue the appropriate corrective conveyance and perform any other appropriate ministerial or official act necessary to carry out the purposes of this section within 60 days after the date of the enactment of this title.

Amend the title so as to read: "An Act to amend certain provisions of the law regarding the fisheries of the United States; to provide for the establishment of seafood marketing councils; and for other purposes.".

AMENDMENT NO. 3403

Mr. CHAFEE. Mr. President, I move that the Senate concur in the House amendments with a further Senate amendment, which I send to the desk on behalf of Senator DANFORTH in the nature of a substitute.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for Mr. DANFORTH, proposes an amendment in the nature of a substitute numbered 3403.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of amendment No. 3403 is printed in today's RECORD under "Amendments Submitted.")

Mr. DANFORTH. Mr. President, I am offering an amendment in the nature of a substitute for S. 991, a bill to authorize appropriations for the marine fishery programs administered by the National Oceanic and Atmospheric Administration [NOAA] of the Department of Commerce and for other purposes. Many of these provisions have already been passed by the Senate when this body first considered S. 991 in October 1985. On August 12 of this year, the House passed as amended version of the bill which included reauthorization of, and amendments to, the Magnuson Fishery Conservation and Management Act, along with other substantive amendments. The bill I am offering on behalf of the Commerce Committee today represents a modified version of that package.

Title I of the bill includes amendments to the Magnuson Fishery Conservation and Management Act [MFCMA]. Under this act, the United States exercises management authority over fishery resources within 200 miles of our Nation's coast. The amendments that are being offered today generally strengthen the management and enforcement provisions of the act.

An important purpose of the MFCMA is to encourage development of the U.S. fishing industry. The United States exercises jurisdiction over approximately 20 percent of the world's fishery resources. Much of this resource has traditionally been harvested and processed by foreign fleets; however, in recent years, the United States has made progress toward full utilization of our fishery stocks. The Commerce Committee will be closely monitoring future developments to determine whether further amendments to the act are necessary to assure that both the domestic harvestng and processing industry are able to fully utilize of our Nation's fishery resources.

Title II of this bill contains the fish and Seafood Promotion Act, which was unanimously reported by the Commerce Committee on September 3 of this year. This bill is patterned after existing agricultural research and promotional boards. It is designed to increase the sales and quality of fish and seafood products in the United States and to expand foreign markets for United States produced fishery products.

Title III of this bill includes the Interjurisdictional Fishery Act. This act will replace the current Commercial Fisheries Research and Development Act and will provide Federal matching funds for important joint State and Federal fishery programs, including the regional marine fishery commission.

Title IV includes authorization and amendments of acts which comprise the bulk of NOAA's non-Maguson Act marine fishery programs. This title includes authorization of the NOAA Marine Fisheries Program Authorization Act; the Anadromous Fish Conservation Act; the Central, Western, and South Pacific Fisheries Development Act; and the Atlantic Tunas Convention Act. It also includes: Amendments to the Great Lakes Fishery Act; establishment of an Estuarine Programs Office and a Chief Scientist at NOAA, as well as an Assistant Secretary and an Under Secretary of the Department of Commerce; provisions dealing with the incidental taking of marine mammals; provisions relating to the Fishermen's Protective Act; provisions relating to the fishery loan fund; provisions relating to a conveyance of land by the Coast Guard; provisions relating to vessel documentation; provisions relating to Coast Guard contracts; and miscellaneous amendments to title 46, United States Code.

This bill is designed to increase the efficiency and effectiveness of U.S. fisheries activities. It is important legislation and I urge my colleagues to join me in supporting it.

Mr. President, I ask unanimous consent that a section-by-section analysis of the legislation be inserted into the RECORD following my statement.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF S. 991

TITLE I—MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT

SECTION 101

Section 101 of the bill brings the Magnuson Fishery Conservation and Management Act (MFCMA) into technical conformance with the President's proclamation establishing an exclusive economic zone. This amendment would substitute for the term "Fishery Conservation Zone" the term "Exclusive Economic Zone" (EEZ). Under this section,

the United States exercises sovereign rights and exclusive fishery management authority over all fishery resources within 200 miles of our nation's shoreline, all continental shelf fishery resources extending beyond the EEZ, and all anadromous species of U.S.-origin throughout their migratory range, but not within any foreign nation's EEZ. The United States will not assert management authority over highly migratory species, defined in the MFCMA.

SECTION 102

Section 102 amends the MFCMA to facilitate enforcement in response to requests for such amendments by the administration. Subsection (1) clarifies that foreign fishing permits issued under the MFCMA are not valid for more than one year. In addition, this subsection clarifies that the section of the Administrative Procedure Act (5 U.S.C. 558(c)) requiring formal proceedings does not apply to denials or terminations of foreign fishing permits that are subject to renewal.

Subsection (2) ensures that the appropriate regional fishery management councils receive copies of foreign fishing permit applications, obviating the need for a council to request such copies in order to receive them.

Subsection (3) provides that the Secretary of Commerce may disapprove all, or any portion, of a foreign fishing permit application.

Subsection (4) adds a new enforcement provision which would allow the Secretary of Commerce to modify, suspend, revoke or deny the permit of a foreign fishing vessel under specified circumstances.

SECTION 103

Section 103 requires the Secretary of Commerce to promulgate regulations prescribing health and safety standards that must be maintained by foreign fishing vessels which carry United States observers. It is intended that a foreign vessel that does not meet the minimum standards be denied a permit to harvest fish within the United States EEZ. In addition, this subsection requires that an application for a foreign fishing permit include a written certification that the vessel is in compliance with all applicable vessel safety standards imposed by the foreign country.

SECTION 104

Section 104 modifies certain provisions relating to regional fishery management councils. Subsection (a) requires that individuals who are appointed to serve as council members be both knowledgeable and experienced with regard to the conservation and management, or the recreational or commercial harvest, of the fishery resources of the area concerned. In addition, when making appointments, the Secretary should ensure, to the extent practicable, a fair apportionment of active participants in the fisheries. Furthermore, subsection (a) requires state governors to consult with, to the extent practicable, representatives of the commercial and recreational fishing interest before making Council nominations. Obviously, not every active participant in the fishery can be represented on a council, nor can a governor be expected to consult with every fishing industry representative before making nominations to a council. The phrase "to the extent practicable" is intended to mean that good faith efforts should be made by the Secretary and by state governors.

Subsection (b) provides that a council may comment on activities undertaken by state or federal agencies that affect the habitat of fishery resources within its jurisdiction. A federal agency must respond within forty-five days of receiving a council's comments. It is anticipated that a federal agency receiving comments from a council will, at a minimum, inform the council whether it agrees with the council's assessment as to the impact of the planned activity on habitat, and whether the agency will take steps to mitigate that impact.

Subsection (c) amends the provisions of existing law relating to procedures for the protection of confidential statistics. Council procedures for the protection of confidential statistics submitted to it by either the Secretary of Commerce or a state must be consistent with the procedures of the Secretary or the laws and regulations of the state submitting them.

Subsection (d) requires that each council establish procedures that it deems necessary or appropriate to ensure that the scientific and statistical committees, as well as any advisory panels established by that council, are involved on a continuing basis in the development, monitoring, and amendment of fishery management plans.

Subsection (e) requires all individuals who are nominated to serve on a council, all voting members of a council, and the executive director of each council, to disclose any financial interest in any harvesting, processing, or marketing activity of fishery resources over which the council concerned has jurisdiction. This subsection of the bill further provides that noncompliance with the disclosure requirements may not be treated as a cause for the invalidation of any Council action or decision that had occurred during the time of the noncompliance.

SECTION 105

Section 105 amends the section of the MFCMA relating to the contents of fishery management plans (FMP) and the disclosure of confidential statistics. Subsection (a) adds two new items to the list of elements that must be included in every FMP. First, every FMP must consider temporary adjustments of limitations on access to the fishery for vessels that have been otherwise prevented from harvesting because of weather or other ocean conditions. Second, readily available information on fishery habitat must be included within every FMP. "Readily available information" is intended to include only the habitat information that a council determines appropriate for inclusion within an FMP. It is not intended that the phrase be interpreted to require the inclusion of all information regarding fishing habitat in every FMP.

Subsection (b) provides authority for the Secretary of Commerce to disclose confidential statistics to those National Marine Fisheries Service personnel and council employees who are responsible for the development and monitoring of FMPs and when required by court order to do so.

SECTION 106

Section 106 contains amendments relating to the timing and manner of Secretarial review of FMPs or amendments to FMPs developed by the councils. This section modifies the review process for FMPs by requiring the Secretary to publish proposed regulations within fifteen days after receiving an FMP. In addition, this section requires the Secretary to commence a review of FMPs or amendments to FMPs on the fifth day after the day on which a Council has transmitted to the Secretary a document that it characterizes as an FMP or an FMP amendment.

SECTION 107

Section 107 clarifies that the knowing and willful submission of false information to a council, a state governor, or the Secretary of Commerce regarding any matter that these persons are considering in the course of carrying out the MFCMA is prohibited.

SECTION 108

Section 108 of the bill contains a number of amendments to the MFCMA relating to civil penalties. Subsection (1) clarifies that any person against whom a civil penalty has been assessed by the Secretary of Commerce may obtain a review of that assessment in an appropriate United States district court by filing a complaint in such court within thirty days of the Secretarial assessment order. Subsections (2) and (3) of this section add a new provision to the MFCMA which makes any fishing vessel used in the commission of a prohibited act liable in rem for any civil penalty assessed for violations of the Act. Furthermore, the amount of such assessment shall constitute a maritime lien on the vessel which may be recovered in the district court of the United States having jurisdiction over the vessel.

SECTION 109

Section 109 adds new administrative forfeiture procedures to the MFCMA. Subsection (a) would allow the Department of Commerce to institute forfeiture proceedings against seized fish. In addition, the provision clarifies that the Secretary has discretion as to whether to release on bond fish or other property seized for violations of this Act. Subsection (b) would authorize the Secretary to use money received from penalties and forfeitures of the MFCMA to defray storage costs for seized property and to pay rewards.

SECTION 110

Section 110 deletes reference to the Law of the Sea Treaty from the MFCMA.

SECTION 111

Section 111 authorizes appropriations to carry out the MFCMA through fiscal year 1989. In addition, this section requires the Secretary of Commerce to report to Congress before replacing with chartered vessels any fishery research vessels of the National Oceanic and Atmospheric Administration operated by the Atlantic Marine Center.

SECTION 112

Section 112 makes technical clerical amendments to the MFCMA.

SECTION 113

Section 113 requires that the Secretary of Commerce take action to ensure, to the extent practicable, that those persons who are dependent for their livelihood upon fisheries are fairly represented as voting members on regional fishery management councils. It is not intended that this section require that every fishery group have a representative on an appropriate council, but the Secretary must make a good faith effort to consider the representation of those who depend upon fisheries for their livelihood when making appointments to a council.

TITLE II—FISH AND SEAFOOD PROMOTION

Title II of the bill contains the Fish and Seafood Promotion Act. This title creates a National Fish and Seafood Promotional Council and would authorize the establishment of species-specific promotional councils, which will enable the United States fish and seafood industry to establish a coordinated program of research, education, and

promotion, including export promotion to expand markets for United States fishery products. The National Council would be funded through an increase in foreign fishing fees. A detailed legislative history and section-by-section analysis of the bill as reported by the Commerce Committee is set forth in S. Rept. 99-930.

This bill modifies the Fish and Seafood Promotion Act as reported by the Committee in that the authorization for the National Council is reduced from five million dollars annually to $750,000 in fiscal year 1987, three million dollars in fiscal years, 1988 and 1989, and two million dollars in fiscal year 1990. In addition, the increase in foreign fishing fees is reduced to the same amounts, thereby maintaining the Fish and Seafood Promotion Act as revenue neutral. These figures represent a recognition that the National Council will require less funds during the first year of operation. During the second and third years, the National Council will be critically important in helping to establish species-specific councils. During the National Council's fourth year, it is expected that more of its efforts will be devoted to promotion. In addition, as a technical modification, "the Secretary of Commerce, or his designee" is substituted for the "Administrator of NOAA".

TITLE III—INTERJURISDICTIONAL FISHERIES ACT

Title III of the bill contains the Interjurisdictional Fisheries Research Act. The provisions of this title are similar to the corresponding provisions of S. 991 as passed by the House of Representatives. A section-by-section analysis of those provisions passed by the House is set forth in H. Rept. 99-20.

The text of the Interjurisdictional Fisheries Act in this bill differs from the House text in that it modifies the mechanism for apportioning funds among the states. Section 304 provides that no state shall receive less than one-half of one percent of the total amount of funds available for fiscal year 1988. After fiscal year 1988, no state which lands one-third of one percent or more of the weighted average of volume and value of fishery resources shall receive less than one-percent of the total amount of funds available under this legislation. In addition, after fiscal year 1988, any state which lands less than one-third of one percent of the weighted average of volume and value of fishery resources would receive an apportionment of one-half of one percent only if that state is a signatory to an interstate fishery compact, has entered into a cooperative enforcement agreement with the Secretary of Commerce or Secretary of the Interior, borders one or more of the Great Lakes, or has entered into an interstate cooperative fishery management agreement such as the Upper Mississippi River Conservation Committee.

TITLE IV—MISCELLANEOUS PROVISIONS

SECTION 401

Section 401 reauthorizes the NOAA Marine Fisheries Programs Authorization Act through fiscal year 1989. The 1986 authorization levels are capped at the 1985 appropriation level and an increase is provided for inflation during 1987 through 1989, reflecting the need to provide essential government services while restraining federal spending. The funds authorized by this provision will be used by NOAA's National Marine Fisheries Service to carry out a portion of its duties in the areas of information collection and analysis, fisheries conservation and management, and state and industry assistance programs.

SECTION 402

Section 402 would reauthorize section 4 of the Anadromous Fish Conservation Act through 1989. This Act authorizes a federal-state cost sharing program for research, development, and management necessary to support anadromous fish. The Act encourages a coordinated approach to research and management efforts.

SECTION 403

Section 403 provides an authorization for the Central, Western, and South Pacific Fisheries Development Act through fiscal year 1989 at existing levels of five million dollars annually.

SECTION 404

Section 404 authorizes appropriations to carry out the Atlantic Tunas Convention Act through fiscal year 1989. The Atlantic Tunas Convention Act authorizes U.S. participation in the International Convention for the Conservation of Atlantic Tunas.

SECTION 405

Section 405 amends the Great Lakes Fishery Act by authorizing four U.S. representatives to serve on the Great Lakes Fishery Commission. Current law authorizes only three commissioners; however, the treaty was renegotiated to provide for another commissioner. In addition, this section would limit the terms of office of each commissioner to six years.

SECTION 406

Section 406 provides for the establishment of an Estuarine Programs Office within NOAA. This Office will be responsible for development of an agency-wide strategy for the coordination of estuarine management activities.

SECTION 407

Section 407(a) establishes an Under Secretary of Commerce for Oceans and Atmosphere, who shall also serve as the NOAA Administrator. Subsection (b) establishes an Assistant Secretary of Commerce of Oceans and Atmosphere, who shall serve as the NOAA Deputy Administrator. This change in title will not result in a higher rate of compensation for the current NOAA Administrator and Deputy Administrator or in any change to their respective duties or responsibilities. Subsection (c) establishes within NOAA the position of Chief Scientist to replace the current position of Associate Administrator. The Chief Scientist will be appointed by the President, with the advice and consent of the Senate. The Chief Scientist is required to have a strong background in appropriate scientific disciplines and serves as the focal point for the direction and coordination of agency research programs.

SECTION 408

Section 408 transfers authority to administer section 7 of the Fishermen's Protective Act from the Secretary of Commerce to the Secretary of State.

SECTION 409

Section 409 provides that funds received from foreign fishing fees after September 30, 1986, will be covered into the Treasury as miscellaneous receipts. The fees generated before that date will remain in the Fisheries Loan Fund.

SECTION 410

This Section amends and clarifies a covenant accompanying the conveyance of lands owned by the Koniag Native Corporation at Kodiak, Alaska. This provision clarifies that welding may be undertaken on land transferred from the Coast Guard to the Koniag Corporation in 1977, if it does not cause harmful electromagnetic interference with the Coast Guard's Holiday Beach receiver site or is operated or maintained under terms and conditions mutually agreeable to the Coast Guard and Koniag. If harmful electromagnetic interference is discovered, the Coast Guard would have the authority to halt the activity.

SECTION 411

This section amends the Marine Mammal Protection Act (MMPA) and makes conforming amendments to the Endangered Species Act (ESA) to allow incidental taking of depleted as well as non-depleted specifies of marine mammals under certain conditions.

The 1982 amendments of the ESA contained a provision that allowed the incidental take of listed specifies if the result of the consultation process was a non-jeopardy biological opinion or the specification of reasonable and prudent alternatives, and if the parties concerned took actions to minimize and mitigate the taking. The 1981 amendments of the MMPA contained provisions that allowed similar incidental taking of non-depleted marine mammals. Since species listed as threatened as endangered under the ESA are considered depleted under the MMPA and the more restrictive provisions of the MMPA prevail, the ESA provisions could not be used to authorize incidental taking of depleted marine mammals, even if the take involved was nonlethal and resulted in no jeopardy.

The provisions of this section would amend section 101(a)(5)(A) of the MMPA to allow incidental taking of depleted species of marine mammals under certain conditions and would amend the ESA to clarify that such taking must satisfy section 101(a)(5)(A) as so amended.

The combined provisions of the ESA and the "negligible impact" standard of the MMPA should secure effective protection for such listed marine mammals.

Subsection (a) deletes the phrase "that is not depleted" from section 101(a)(5)(A) of the MMPA, thereby allowing the incidental taking of depleted marine mammals pursuant to the same statutory requirements as are applied to the incidental taking of non-depleted species. It is intended that the new statutory standards applied by the Secretary regarding depleted species be the same as those for non-depleted species. In order that there be no confusion as to the interpretation of the standard now applicable to incidental taking of both depleted and non-depleted species, it is explained below.

It is intended that the term "negligible impact" as contained in subparagraph (5)(A)(i) of the MMPA be determined with reference to the affected population of marine mammals, and not with reference to the effects on individual members of any population, unless the resulting impact on the populations is more than negligible. For instance, an individual whale might be affected by industrial activities so as to alter its course but that would likely result in a negligible impact on the individual and the population absent some other adverse impact. On the other hand, effects on individuals could result in a greater than negligible impact on the population depending on the number of individuals affected in proportion to the total population or the severity of the effect on each individual.

The term "negligible impact" as applied to populations means an impact that cannot reasonably be expected to, and is not reasonably likely to affect adversely the overall population through effects on annual rates of recruitment or survival. It is not intended that the Secretary find impacts to be more than negligible when the effect of specified activities on the population is conjectural or speculative. Impacts which are not negligible must be attributable to the action being considered. The degree of certainty of occurrence required in these judgments should be inversely proportional to the resultant harm to the overall population.

It is intended that if the Secretary finds that mitigating measures would render the impact of a proposed activity negligible when it would not otherwise satisfy that requirement, the Secretary shall require such measures by regulation under subparagraph (5)(A)(ii) as a condition of the authorization for any such incidental taking.

A minor impact upon a small segment of habitat might be found to be more than negligible under the prior standard, even if it has no impact upon the overall population utilizing the habitat. But it is also the case that populations could be affected aversely by actions that damage rookeries, mating grounds, feeding areas and areas of similar significance. The Secretary shall take those impacts into accounts when making a "negligible impact" determination under section 105(A)(5)(i). Because these factors are to be taken into account, in making such a determination, subparagraph (a)(2)(A) of this section deletes the phrase "and its habitat" from subparagraph 5(A)(i) of the MMPA. It is expected that the existing provisions of the ESA relating to protection of critical habitat will secure adequate protection of any habitat so designated. Moreover, the provisions of subparagraph (5)(A)(ii) of the MMPA ensure the least practicable adverse impact upon the species' habitat, even if it is not designated as critical habitat and even if the impact of the activities on the population will be negligible.

Subsection (a) also modifies the standard by which the Secretary is to evaluate the impact on subsistence uses, in effect substituting "unmitigable adverse impact" for "negligible." This is a more workable and effective standard.

An "unmitigable adverse impact" in this context is one that is attributable to the particular activities resulting from the agency action being considered as opposed to environmental or other extraneous factors, and is likely to result in a reduction in availability of marine mammals to a level insufficient to allow for a harvest of resources sufficient to meet the subsistence needs of the community for marine mammals by: (1) causing sufficient numbers of the marine mammal population subject to subsistence use to vacate subsistence hunting areas; or (2) directly displacing subsistence users; or (3) erecting physical barriers between the marine mammals and the subsistence hunters. In addition, such an impact must also be one which cannot be sufficiently mitigated to increase that availability such that a harvest which meets the subsistence needs of the community may be obtained. It is not intended that this section affect the interpretation of any other laws relating to subsistence uses, rights, obligations or responsibilities.

The reference to "a cooperative agreement" in subparagraph (a)(2)(B) is intended to cover cooperative agreements such as the one entered between NOAA and the Alaska Eskimo Whaling Commission under both the Whaling Convention Act of 1949 and the MMPA.

It is further intended that protection of the marine mammals and availability of the marine mammals for subsistence use be secured by regulations under subparagraph (5)(A)(ii) of the MMPA. Subparagraph (a)(3)(B) amends subparagraph (5)(A)(ii)(I) of the MMPA to require that regulations be issued to ensure the least practicable adverse impact on such subsistence use even if the activity will not otherwise have an unmitigable adverse effect. Mitigating measures are intended to facilitate the harvest of sufficient resources to meet subsistence needs of the community and to minimize the impacts upon subsistence species and users. The agency or applicant and affected subsistence users are encouraged to agree upon terms and conditions for activities which satisfy the operational, scientific, or other needs of the agency or applicant and the requirements of the subsistence users. Applicants are also encouraged to meet directly with subsistence users to develop agreements for specified activities which may have an impact on the availability of marine mammals taken for subsistence uses.

It is intended that the Secretary amend the general regulations (50 C.F.R. 228.1-228.6) to implement the amended section 101(a)(5)(A) of the MMPA as it applies to depleted marine mammals in accordance with the legislative intent as contained in this document and the changes brought about by these amendments. It is anticipated, however, that new species-specific regulations would be required by section 101(a)(5)(A)(ii) of the MMPA for specified activities in a specified region involving incidental taking of a depleted species.

It is intended that, immediately upon passage of this legislation and subject to the provisions of other applicable law including the ESA, the Secretary may provide for incidental taking of depleted species under the MMPA by promulgating regulations required by section 101(a)(5)(A)(ii) and issuing letters of authorization through procedures described for incidental taking of non-depleted species in current regulations (50 C.F.R. Part 228). The new regulations and letters of authorization should be patterned after the current regulations for incidental taking of non-depleted ringed seals (50 C.F.R. 228.11-228.14) with necessary modifications to conform to these new provisions and the legislative intent expressed in this document.

Finally, subsections (b) and (c) make conforming amendments to the ESA to reflect the changes to the MMPA and to clarify the relationship between the two statutes. It is intended that the decision processes under the involved statutes be coordinated and integrated to the maximum extent practicable.

SECTION 412

This section contains provisions ordered reported unanimously by the Commerce Committee on September 24, 1986. It grants legislative waivers from restrictions on vessel documentation under the laws of the United States for five vessels:

(1) DUNES SPIRIT

The Committee approved a Jones Act waiver for the Dunes Spirit (U.S. official number 690176) because of the need to correct a questionable action by the Coast Guard regarding this particular vessel. This 45-foot sailboat, which is 49 gross tons and was built overseas, was purchased new from a New Jersey boat dealer in 1985. It is capable of carrying up to 24 passengers with a two-person crew. The buyer, a real estate company from Hilton Head Island, South Carolina, purchased this vessel for the exclusive recreational use of time-share owners of a condominium project at Shelter Cove Harbour on Hilton Head. From August to November 1985, the time-share owners of the condominium development chartered the vessel on a bareboat basis for four days each week. Under terms of the August 1985 agreement, it is clear that the charterers had the full responsiblity to arrange for a competent captain and crew.

In late November 1985, the Coast Guard cited the vessel for failing to comply with the terms of title 46 of the United States Code dealing with small passenger vessel safety. The Coast Guard's position was partly predicated on its judgment that the Jones Act applied to this particular vessel when carrying the time-share condominium owners. The Committee considers this judgment to have been erroneous.

As the Customs Service has indicated in correspondence with the Committee, "the use of a vessel by a person and his guests under conditions amounting to a bareboat charter would not be considered a carriage of passengers for hire and their use of a vessel in activities which ordinarily would be considered coastwise trade would not be in violation of law." The Committee was offered no information indicating that the Dunes Spirit was not being operated in accordance with such a bareboat charter. However, because the Coast Guard appears to be committed to its initial decision, the Jones Act waiver is being granted so that the Dunes Spirit may be operated as originally intended, for the exclusive use of Hilton Head condominium owners. In light of this case, the Committee intends to look into the Coast Guard's practices with regard to Bareboat charters of recreational vessels to determine if broader statutory modification is required to clarify U.S. policy in this area.

(2) KODIAK QUEEN

The Kodiak Queen (U.S. Official Number 507891), a vessel of 478 gross tons and about 144 feet in length, was built in Mare Island, California, in 1941 for the Department of the Navy. It was placed under Liberian registry in 1962 as the M.S. Vardshov when it was purchased by Somhov Tankers, Inc. of Monrovia, Liberia. In 1967, the vessel was acquired by Arntsen and Brechen, Inc. of Kodiak, Alaska, and placed under U.S. flag and registry as the Kodiak Queen. The vessel has been owned since that time by U.S. citizens.

The Kodiak Queen is documented for the fisheries, and has been operating in the tanner crab fishery in and around Kodiak during 1986. Its present owners wish to use the vessel in coastwise trade, to tender salmon, herring, crab or freight for Ocean Beauty Seafoods and other seafood processing companies. However, the Kodiak Queen is restricted from engaging in the coastwise trade of the United States because of alien ownership in its chain of title.

(3) LA REINA

The La Reina (U.S. Official Number 230115), formerly known as Noah's Ark, is a 56-foot Tilghman River Yacht that was built in Florida in 1930. It has been used as a pleasure boat and has never left the waters of Florida.

The present owner is doing business as a golf and tennis resort in Florida. The owner

wishes to use the vessel to carry guests of the resort on a cruise of Lake Harris for dining, entertainment, and sightseeing as part of their visit to the resort. The vessel cannot be documented for such coastwise trade because the most recent previous owner was a resident alien (Canadian citizen) who used the vessel as a pleasure boat in Florida. That alien ownership in the chain of title precludes documentation even though the vessel was built in and has never left the United States.

(4) NORTHWIND

The Northwind (U.S. Official Number 230147), a motor yacht of 221 gross tons and 122 feet in length, was built in Manitowoc, Wisconsin, in 1930. In 1938, the vessel was transferred from United States to British ownership, to be used in the service of the British Government and Royal Navy. After the war, the Northwind was sent on a diplomatic world cruise in support of the British export trade, as well as in the service of the Prime Minister. In 1975, the vessel was purchased by Argyco Compania, based in the Mediterranean, and was placed under Panamanian registry. The vessel is now located in Seattle, Washington.

The vessel had suffered substantial deterioration over the years and required extensive renovation to restore its historic grandeur. In addition, modern navigation and other electrical innovations were installed. The overhaul and modernization, which took place in Seattle, Washington, cost the present owner approximately $400,000, an amount in excess of the 1975 purchase price.

The present owners wish to engage the Northwind in the coastwise trade of the United States as a pleasure charter for groups of up to 12 persons, with a crew of five or six, in and around Seattle, Washington. The vessel is restricted from such trade because of alien ownership in its chain of title.

(5) WANDERBIRD

The Wanderbird (U.S. Official Number 229607), an oak-planked, copper-sheathed schooner of 52 gross tons and about 80 feet in length, was built in Germany in 1883. The vessel was originally commissioned by the German Government to guide vessels through the North Sea. In 1926, the Wanderbird was purchased by Warwick Tompkins. The vessel was refitted, and in 1929, set a transatlantic crossing record of 16 days. In 1936, the Wanderbird was sailed to San Francisco. In 1969, the current owner purchased the Wanderbird and began a full-scale restoration effort in the United States.

The Wanderbird is presently documented for use as a pleasure vessel, capable of accommodating eight passengers. The owner wishes to use the vessel to carry passengers for hire on pleasure sail cruises in San Francisco Bay and along the California coast. The Wanderbird is currently restricted from engaging in the coastwise and fisheries trades of the United States because it is a foreign-built vessel.

SECTION 413

This section was ordered reported unanimously by the Commerce Committee on September 24, 1986. It requires that the Coast Guard include a provision in each contract for construction or services requiring hiring of local residents when the unemployment rate in the state where the contract is to be performed exceeds the national average rate of unemployment. For purposes of this section, the term "local resident" includes individuals who are within daily commuting distance of such state.

SECTION 414

This section was ordered reported unanimously by the Commerce Committee on September 24, 1986.

Subsection (a) clarifies that fishing vessels which incidentally freeze fish during the course of a fishing operation are not to be considered "fish processing vessels" for purposes of title 46. Subsection (b) makes a substantive change to title 46. It grants the Secretary of Transportation the legal authority to receive reimbursement for the travel and subsistence expense incurred by Coast Guard personnel. This authority is limited to instances when applicants desire a certificate or license issued by the Coast Guard and no travel funds are available to perform the requisite tests.

Mr. WEICKER. Mr. President, I am pleased to have this opportunity to express my support for S. 991, the National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act. This legislation authorizes appropriations through fiscal year 1989 for NOAA's marine and anadromous fisheries management programs. In addition, I am very pleased at the inclusion of section 507 of the bill which would give NOAA the recognition and stature within the Department of Commerce it has long deserved, by designating the Administrator of NOAA as an Under Secretary of Commerce, the Deputy Administrator as Assistant Secretary, and the Associate Administrator as Chief Scientist.

This organizational change in the Department of Commerce is appropriate and timely. With over 60 percent of the Department's budget and over 40 percent of its employees, and as the Nations' leading civilian oceanic and atmospheric agency, NOAA is one of Commerce's most important agencies. Since the establishment of NOAA in 1970, three Secretary positions have been created within the Department: one for the International Trade Administration, one for Economic Affairs, and one for the Travel and Tourism Administration. NOAA is long overdue in joining these ranks.

The dual titles of Under Secretary and Administrator would better enable the Administrator to manage a $1.2 billion agency with 14,000 employees. In intra- and inter-departmental meetings and negotiations the Administrator may be disadvantaged without the recognition of the rank of Under Secretary. At the international negotiating table, where the term "NOAA Administrator" may be unrecognizable, the position of Under Secretary would be more likely to asssume a higher Oceanographic Commission, the International Whaling Commission, and the London Dumping Convention.

An equally important provision in this legislation is the appointment of a Chief Scientist to replace the Associate Administrator's position. NOAA must have the assurance of someone in upper management with direct scientific experience relevant to the agency's activities. The Chief Scientist would act as the principal scientific advisor to the Under Secretary, and would be required to have experience in oceanic, atmospheric, or other scientific disciplines important to NOAA's missions. It only makes sense that creating a Chief Scientist position will strengthen the agency's scientific direction.

Mr. President, I urge my colleagues to support S. 991, so that we as a nation can continue to maintain sound ocean, coastal, and fisheries research and management programs within NOAA.

Mr. HOLLINGS. Mr. President, I urge the Senate to approve the amendment to S. 991 offered on behalf of the Commerce Committee. This amendment incorporates a number of fishery measures that the committee has had under consideration during this Congress. I would like to make a few comments on several aspects of the amendment that are of special interest to me.

First, the amendment contains multiyear authorizations for most of the fishery programs of the National Oceanic and Atmospheric Administration, including programs for fisheries research, fishing industry development, and the conservation and management of marine fisheries within 200 miles of the U.S. coast. The funding levels are compatible with Senate and House appropriations actions for NOAA.

Second, I note that title II of the amendment contains the Fish and Seafood Promotion Act, which was reported by the Commerce Committee on September 3 in the form of an amendment to H.R. 2935. Certainly seafood is vitally important to my State's coastal economy. The annual dockside value of seafood produced in South Carolina is in the neighborhood of $20 million to $25 million, placing it 19th in the United States. In addition to the actual harvest of seafood that is brought into my State by South Carolina fishermen, fish and shellfish play an important role in our restaurant and tourism industries.

I anticipate that the Fish and Seafood Promotion Act will be beneficial to the fish and seafood industry in my State and across the country. This legislation's goal is to strenghen the U.S. commercial fishing industry through consumer education, research, and other marketing and promotion activities. The fishing industry has never had the benefit of a promotion board, unlike many of its competitors in the protein production business. And in light of the recent medical research findings that point to the significant value of seafood in the diet, such a board can contribute also to wider dis-

semination of useful nutritional information.

The act combines two different approaches to fish and seafood promotion, a product-specific approach and a national promotion effort. This two-tiered system takes into account the fact that the fishing industry is composed of numerous small- and medium-sized firms, which tend to operate very independently. It is hoped that the National Council to be created by this legislation will help stimulate the formation of industry-run bodies for the promotion of specific seafood products. The national group, modestly financed from foreign fishing fees, is to exist for only 4 years, but if it is successful, privately funded councils for specific products will survive for many years to come.

The final item of special interest to me is contained in section 507 of the amendment to S. 991. That section would create the position of Chief Scientist at NOAA, to take the place of the current Associate Administrator position. In addition, it provides that the NOAA Administrator and Deputy Administrator shall also serve as Under Secretary and Assistant Secretary of Commerce, respectively.

Mr. President, I know my colleagues are aware of the major role I played in the establishment of NOAA back in 1970. Since that time, I have followed the agency's progress with great interest. I have worked to develop its programs and budgets through my work on the Commerce and Appropriations Committees. And I remain committed to the goals and ideals that led to the formation of the agency 16 years ago. This is why today I am keenly interested in the replacement of the Associate Administrator position in NOAA with that of a Chief Scientist.

It simply makes good sense to require that someone in NOAA's upper management have direct scientific experience relevant to the agency's work. NOAA has numerous scientific responsibilities vital to the national interest—natural resource conservation, weather forecasting and public warning, aviation and marine safety, the national geodetic network, and oceanic and atmospheric research and services. To successfully accomplish these various missions, NOAA has a vast array of scientific expertise in a number of areas. The Chief Scientist's job will be to coordinate NOAA's internal talent and act as liaison to the scientific community outside of NOAA. In addition, the Chief Scientist will be the principal scientific adviser to the NOAA Administrator.

I think this change is a good idea. I also believe it will be useful to identify the NOAA Administrator and Deputy Administrator for what they are—two of the highest ranking officials in the Department of Commerce. The change to Under Secretary and Assistant Secretary will only clarify their standing within the Department; they will remain at executive levels III and IV, respectively.

For all these reasons, Mr. President, I urge my colleagues to join me in supporting this amendment to S. 991.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Rhode Island [Mr. CHAFEE].

The motion was agreed to.

Mr. CHAFEE. I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read: "An Act to amend certain provisions of the law regarding the fisheries of the United States, and for other purposes.".

ANTIKICKBACK ENFORCEMENT ACT

Mr. CHAFEE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2250.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2250) entitled "An Act to strengthen the prohibition of kickbacks relating to subcontracts under Federal Government contracts", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Anti-Kickback Enforcement Act of 1986".

SEC. 2. (a) The Act entitled "An Act to eliminate the practice by subcontractors, under cost-plus-a-fixed-fee or cost reimbursable contracts of the United States, of paying fees or kick-backs, or of granting gifts or gratuities to employees of a cost-plus-fixed-fee or cost reimbursable prime contractors or of higher tier subcontractors for the purpose of securing the award of subcontracts or orders", approved March 8, 1946 (41 U.S.C. 51-54), is amended to read as follows:

"SHORT TITLE

SECTION 1. This Act may be cited as the 'Anti-Kickback Act of 1986'.

"DEFINITIONS

"SEC. 2. As used in this Act:

"(1) The term 'contracting agency', when used with respect to a prime contractor, means any department, agency, or establishment of the United States which enters into a prime contract with a prime contractor.

"(2) The term 'kickback' means any money, fee, commission, credit, gift, gratuity, thing of value, or compensation of any kind which is provided, directly or indirectly, to any prime contractor, prime contractor employee, subcontractor, or subcontractor employee for the purpose of improperly obtaining or rewarding favorable treatment in connection with a prime contract or in connection with a subcontract relating to a prime contract.

"(3) The term 'person' means a corporation, partnership, business association of any kind, trust, joint-stock company, or individual.

"(4) The term 'prime contract' means a contract or contractual action entered into by the United States for the purpose of obtaining supplies, materials, equipment, or services of any kind.

"(5) The term 'prime contractor' means a person who has entered into a prime contract with the United States.

"(6) The term 'prime contractor employee' means any officer, partner, employee, or agent of a prime contractor.

"(7) The term 'subcontract' means a contract or contractual action entered into by a prime contractor or subcontractor for the purpose of obtaining supplies, materials, equipment, or services of any kind under a prime contract.

"(8) The term 'subcontractor'—

"(A) means any person, other than the prime contractor, who offers to furnish or furnishes any supplies, materials, equipment, or services of any kind under a prime contract or a subcontract entered into in connection with such prime contract; and

"(B) includes any person who offers to furnish or furnishes general supplies to the prime contractor or a higher tier subcontractor.

"(9) The term 'subcontractor employee' means any officer, partner, employee, or agent of a subcontractor.

"PROHIBITED CONDUCT

"SEC. 3. It is prohibited for any person—

"(1) to provide, attempt to provide, or offer to provide any kickback;

"(2) to solicit, accept, or attempt to accept any kickback; or

"(3) to include, directly or indirectly, the amount of any kickback prohibited by clause (1) or (2) in the contract price charged by a subcontractor to a prime contractor or a higher tier subcontractor or in the contract price charged by a prime contractor to the United States.

"CRIMINAL PENALTIES

"SEC. 4. Any person who knowingly and willfully engages in conduct prohibited by section 3 shall be imprisoned for not more than 10 years or shall be subject to a fine in accordance with title 18, United States Code, or both.

"CIVIL ACTIONS

"SEC. 5. (a)(1) The United States may, in a civil action, recover a civil penalty from any person who knowingly engages in conduct prohibited by section 3. The amount of such civil penalty shall be—

"(A) twice the amount of each kickback involved in the violation; and

"(B) not more than $10,000 for each occurrence of prohibited conduct.

(2) The United States may, in a civil action, recover a civil penalty from any person whose subcontractor or subcontractor employee violates section 3 by providing, accepting, or charging a kickback. The amount of such civil penalty shall be the amount of that kickback.

"(b) A civil action under this section shall be barred unless the action is commenced within 6 years after the later of (1) the date on which the prohibited conduct establishing the cause of action occurred, and (2) the date on which the United States first knew or should reasonably have known that the prohibited conduct had occurred.

"ADMINISTRATIVE OFFSETS

"SEC. 6. (a) A contracting officer of a contracting agency may offset the amount of a kickback provided, accepted, or charged in violation of section 3 against any moneys owed by the United States to the prime contractor under the prime contract to which such kickback relates.

"(b)(1) Upon direction of a contracting officer of a contracting agency with respect to a prime contract, the prime contractor shall withhold from any sums owed to a subcontractor under a subcontract of the prime contract the amount of any kickback which was or may be offset against that prime contractor under subsection (a).

"(2) Such contracting officer may order that sums withheld under paragraph (1)—

"(A) be paid over to the contracting agency; or

"(B) if the United States has already offset the amount of such sums against that prime contractor, be retained by the prime contractor.

"(3) The prime contractor shall notify the contracting officer when an amount is withheld and retained under paragraph (2)(B).

"(c) An offset under subsection (a) or a direction or order of a contracting officer under subsection (b) is a claim by the Government for the purposes of the Contract Disputes Act of 1978.

"(d) As used in this section, the term 'contracting officer' has the meaning given that term for the purposes of the Contract Disputes Act of 1978.

"CONTRACTOR RESPONSIBILITIES

"SEC. 7. (a) Each contracting agency shall include in each prime contract awarded by such agency a requirement that the prime contractor shall have in place and follow reasonable procedures designed to prevent and detect violations of section 3 in its own operations and direct business relationships.

"(b) Each contracting agency shall include in each prime contract awarded by such agency a requirement that the prime contractor shall cooperate fully with any Federal Government agency investigating a violation of section 3.

"(c)(1)(A) Whenever a prime contractor or subcontractor has reasonable grounds to believe that a violation of section 3 may have occurred, the prime contractor or subcontractor shall promptly report the possible violation in writing.

"(B) A contractor shall make the reports required by subparagraph (A) to the inspector general of the contracting agency, the head of the contracting agency if the agency does not have an inspector general, or the Department of Justice.

"(2) In the case of an administrative or contractual action to suspend or debar any person who is eligible to enter into contracts with the Federal Government, evidence that such person has supplied information to the United States pursuant to paragraph (1) shall be favorable evidence of such person's responsibility for the purposes of Federal procurement laws and regulations.

"INSPECTION AUTHORITY

"SEC. 8. For the purpose of ascertaining whether there has been a violation of section 3 with respect to any prime contract, the General Accounting Office and the inspector general of the contracting agency, or a representative of such contracting agency designated by the head of such agency if the agency does not have an inspector general, shall have access to any and may inspect the facilities and audit the books and records, including any electronic data or records, of any prime contractor or subcontractor under a prime contract awarded by such agency.".

(b) The title of such Act is amended to read as follows: "An Act to prohibit kickbacks relating to subcontracts under Federal Government contracts.".

SEC. 3. (a) Except as provided in subsection (b), the Anti-Kickback Act of 1986 (as set out in section 2(a)) shall take effect with respect to conduct described in section 3 of such Act which occurs on or after the date of the enactment of this Act.

(b) Subsections (a) and (b) of section 7 of the Anti-Kickback Act of 1986 (as set out in section 2(a)) shall take effect with respect to contract solicitations issued by an agency, department, or other establishment of the Federal Government on or after the date which is 90 days after the date of the enactment of this Act.

Mr. LEVIN. Mr. President, a month ago, on September 12, 1986, the Senate passed S. 2250, the Anti-Kickback Enforcement Act of 1986. The purpose of this legislation was to strengthen existing law against subcontractor kickbacks affecting the Federal procurement system. Specifically, the bill sought to close loopholes in and broaden the coverage of the Anti-Kickback Act, 41 U.S.C. 51-54.

Since the House of Representatives has held hearings on S. 2250 and a companion bill, H.R. 4783, which was introduced in the House by my friend Congressman JOHN BRYANT. The House made a few technical and substantive changes in the Senate bill. On October 7, 1986, the House passed the amended bill and returned it for our further consideration. I believe the resulting bill represents a significant improvement over current law, and I recommend that we enact it into law today.

I wish to thank the many people who participated in the effort to make enactment of this legislation a reality. My good friend Senator COHEN showed leadership and persistence in guiding the bill through the Senate. Congressman JOHN BRYANT, who introduced the companion bill in the House, demonstrated equal skill in bringing the bill to the attention of his colleagues. Congressman JACK BROOKS, chairman of the Government Operations Committee, made an extraordinary effort to consider this bill near the end of the session, to improve it and get it passed. Congressman FRANK HORTON, ranking Republican on the Government Operations Committee, joined in this effort. Congressman RODINO, chairman of the Judiciary Committee, and DAN GLICKMAN, chairman of the Subcommittee on Administrative Law, also made extraordinary efforts to consider this legislation and get it through. I thank you for your efforts and applaud the bipartisan work that has resulted in this legislative overhaul of the Federal law prohibiting subcontractor kickbacks.

PROVISIONS OF THE ANTI-KICKBACK ENFORCEMENT ACT

The House changes in the bill are both technical and substantive. The technical changes included substituting the word "rewarding" for the word "acknowledging;" substituting the word "provide" for the word "pay" when used to describe prohibited kickback activities; substituting the word "possible" for the word "potential" when referring to the types of kickback suspicions that must be reported to Federal authorities; substituting the word "knew" for "became aware" when determining when the statute of limitations for civil suits begins to run; including the word "willfully" in the criminal intent standard; and changing the descriptive title of the act. The substantive changes include using a "civil penalty" rather than a "conclusive presumption" in civil suits by the United States to ensure that the Government can recover kickback costs without having to establish, in each case, that it was injured by the kickback activity; permitting recovery of kickback amounts against persons whose employees, subcontractors, or subcontractor employees engaged in kickback activities; and limiting the United States right to offset kickback amounts, when proceeding under this legislation, to situations where the moneys being offset were owed under the prime contract tainted by the kickbacks.

Because the bill has changed somewhat from the legislation discussed in the House and Senate committee reports, a detailed explanation of the substantive provisions that were changed in the final bill follows:

SECTION 2: DEFINITIONS

Section 2(2) defines "kickback," a term which does not appear in the text of the existing act but is a key element in the bill. I want to make a couple of points that have not yet been made about the definition.

The word "purpose" was included in the definition to stress the importance, in determining whether a specific transaction constitutes a "kickback," of analyzing the reasons for the suspect transaction. For example, when examining an exchange of money, a court should try to determine why the money was exchanged—what each party achieved by participating in the transaction. In determining the transaction's "purpose," a court should examine objective factors, such as what the person paying the money actually received for that payment, and subjective factors, such as what the person paying the money expected or wanted to receive for that payment.

The Government is not limited, in establishing the "purpose" of a payment, to proving the mental states of the participants, and the Government

is in no way required to show that the participants had a specific intent to, for example, defraud the Government. What the Government must prove, through objective or subjective evidence, is that the reason one person provided something of value to another was to improperly influence a procurement decision.

The word "improperly" was included in the definition to emphasize the bill's focus on prohibiting only unethical conduct. The bill is not meant to prohibit conduct which legitimately influences a procurement decision. For example, it is not a kickback when a subcontractor provides a prime contractor employee with an expensively prepared report to explain the subcontractor's bid. Similarly, it is not a kickback when a prime contractor pays a subcontractor a cash bonus to induce the subcontractor to produce a needed part on a rush basis. The bill's prohibition applies only to unethical conduct.

As with the use of the word "purpose," use of the term "improperly" in the definition of kickback is not meant to create an intent element. In other words, to judge whether a payment was made to "improperly" influence a procurement decision, a court should not limit the Government to establishing what was in the mind of any particular individual—whether, collectively or individually, the participants thought they were doing something wrong. Such subjective assessments are less important than external, objective measures of ethical conduct, such as rules and ethics codes governing the procurement process.

For example, in determining whether a subcontractor provided free airfare, hotel space, and meals to a prime contractor employee evaluating its facilities for the purpose of "improperly" influencing the employee's evaluation, a court may consider the subcontractor's subjective feelings about the fairness of its actions, but should concentrate much more on objective ethical standards governing the propriety of the conduct in question.

It is our hope and our design that courts will interpret the definition of "kickback" to condemn conduct leading to an unfair favoritism based on graft and to condone only that conduct contributing to an honest competition among subcontractors based on merit. Our goal is a body of law providing guidance to contractors about the proper way to do business with the United States.

Finally, section 2(9) defines "subcontractor employee," a term not defined in the existing act. The definition encompasses "any officer, partner, employee, or agent" of the subcontractor. The term is intended to be construed broadly and may include, inter alia, a subcontractor's owners, directors, or trustees if any of these persons were acting to benefit or on behalf of the subcontractor when participating in a kickback scheme. The definition's reference to "employee" should be interpreted broadly, consistent with common law.

The definition of "subcontractor employee" gained new importance when the House amended the civil recovery portion of the bill to permit a civil action against any person whose "subcontractor or subcontractor employee" engages in kickbacks. When making this change, the House and Senate authors of the bill relied on the courts using a broad interpretation of "subcontractor employee," In particular, the with respect to the definition's use of the word "agent."

"Agent" should be interpreted broadly to make the definition of "subcontractor kickback" applicable to third parties, such as independent sales representatives and consultants, who make improper payments to induce prime contractors to enter into subcontracts with their clients. For example, in cases where an independent sales representative offers to split a commission with a prime contractor employee if that employee purchases certain products from certain clients, the bill intends such transactions to be considered "kickbacks." For purposes of determining the civil liability of prime contractors whose employees accept such payments, the bill intends the third parties to be considered "subcontractor employees," even if they were acting without the knowledge or consent of the companies they represented and even if they were acting contrary to their clients' instructions. By making prime contractors civilly liable for such kickbacks, the bill provides an incentive for prime contractors to police their employees' relationships with independent sales representatives, consultants and other third parties.

SECTION 4: CRIMINAL PENALTIES

The bill increases the existing criminal penalties for kickbacks. Current law subjects violators to a maximum prison term of 2 years and a maximum criminal fine of $10,000; 41 U.S.C. 54. The bill provides a maximum prison term of 10 years and criminal fines in accordance with the Criminal Fine Enforcement Act of 1984, Public Law 98-596, currently codified at 18 U.S.C. 3623. The Criminal Fine Enforcement Act subjects individuals to a fine equal to the greater of $250,000 or double the amount of any gain by the wrongdoer or of any loss by a victim, and subjects businesses to a fine equal to the greater of $500,000 or double the gain or loss. These penalties are comparable to those in other Federal criminal fraud and corruption statutes.

The bill provides that, to be subject to criminal penalties, the wrongdoer must act "knowingly and willfully." The current Anti-Kickback Act imposes its criminal penalties on those who act "knowingly." The addition in the bill of the word "willfully" is not, however, a change in current law but a reflection of the actual standard being used in kickback cases.

The knowing element in the standard requires the Government to prove that the alleged wrongdoer knew what he or she was doing and was not acting through mistake, inadvertence or mere negligence. The willful element in the standard requires the Government to prove that the alleged wrongdoer was acting on his or her own volition and not because he or she was being coerced. To meet the standard, the Government could demonstrate, for example, that a prime contractor employee realized he was being offered money, freely accepted the money offered, and provided favorable treatment to the payor in return. In such a case, the employee deliberately chose to act as he did and is therefore criminally liable for his actions.

The knowing and willful standard does not require proof of a specific criminal intent such as an intent to defraud the Government. All that is required for criminal liability is proof that the alleged wrongdoer knew what he or she was doing and was acting on his or her own volition.

Adding "willfully" to the criminal provision should not be construed as in any way reinforcing or expanding the scope of the so-called "economic coercion" or "extortion" defense, in which a subcontractor pleads relief from criminal liability, because it did not want to pay the kickback but was "forced" to pay it to survive or prosper economically. This defense has rarely, if ever, been successful in past kickback cases, and Congress in no way intends it to be more successful after passage of the bill.

Finally, in determining the criminal mens rea of a business entity, courts should look to the mens rea of the individuals who were acting on behalf of or to benefit that business.

SECTION 5: CIVIL ACTIONS

The existing act permits the United States to recover the "amount of any [kickback] from the subcontractor or the recipient thereof by * * * an action in an appropriate court of the United States." 41 U.S.C. 51. Section 5 of the legislation expands the act's civil recovery provisions in several ways.

First, where current law provides for the civil recovery of only the amount of the kickback itself, the bill provides that, in cases where a person "knowingly" engages in prohibited conduct, the United States may recover a civil penalty from that person equal to twice the amount of each kickback involved in the case and up to $10,000 for each occurrence of prohibited conduct.

Requiring the United States to prove that the wrongdoer acted "knowingly" is not a change from current law, but a reflection of the cause of action actually being used in civil kickback cases. To meet the standard, the United States has to prove that the alleged wrongdoer was acting with awareness of what he or she was doing and not acting through mistake, inadvertence or mere negligence. The United States does not have to prove any type of specific intent—such as an intent to defraud the Government—it only has to show that the alleged wrongdoer made conscious decisions to act. All of the elements of the civil action authorized by this section of the bill, including proof of knowledge, may be established by a preponderance of the evidence.

Unlike the criminal section of the bill, the civil section does not require the United States to show "willfulness" to justify a recovery. This is because the civil section of the bill has a different purpose than the criminal section of the bill. The criminal section is intended to punish and deter persons who willfully violate the law; it imposes criminal fines and prison terms for that reason. The civil section is not concerned with willful misconduct but primarily with providing the United States with a mechanism to obtain compensation for the damages it suffers when its procurement procedures are tainted by kickbacks.

Civil suits in antikickback law are based upon the principle that Federal contractors who engage in kickback activities pass on their kickback costs to the United States. In the most typical case, the subcontractor who pays a kickback inflates its subcontract price to include the kickback amount so that, in essence, it receives reimbursement from the prime contractor. The prime contractor, in setting its prime contract price, includes its subcontract costs. In this way, the prime contractor passes on the kickback costs to the United States. The United States taxpayers end up footing the bill.

The United States Supreme Court described this process when analyzing a case under the Anti-Kickback Act involving a price redetermination contract:

> The kickbacks here are passed on to the Government in two stages. The prime contractor rarely submits his bid until after he has tentatively lined up his subcontractors. Indeed, as here, the subcontractors frequently participate in negotiation of the prime contract. The subcontractor's tentative bid will, of course, reflect the amount he contemplates paying as a kickback, and then his inflated bid will be reflected in the prime contractor's bid to the Government. At the renegotiation stage, where the prime contractor's actual cost experience is the basis for price redetermination, and kickbacks, paid by subcontractors and passed on to the prime contractor after the prime contract is awarded, will be passed on to the Government in the form of price redetermination upward. *United States* v. *Acme Process Equipment Co.*, 385 U.S. 138, 143 (1966).

Kickback costs are so routinely hidden in contract prices that their inclusion has become a recognized rule of law. English courts have recognized this principle for almost 100 years. See *Hovendon & Sons* v. *Milhoff* [1900] 83 L.T.R. (N.S.) 41 *Grant* v. *Gold Explorations & Development Syndicate, Ltd.* [1900] 1 Q.B. 233; 82 L.T.R. (N.S.) 5; *Mayor, Aldermen, etc. of Slford* v. *Lever* [1891] 1 Q.B., 168; 63 L.T.R. (N.S.) 658. American courts have cited the principle in common law and in cases upholding the existing Anti-Kickback Act. See *United States* v. *Davio*, 136 F. Supp. 423 (E.D. Mich. 1955).

In Davio, a United States district court upheld section 51 of the existing Anti-Kickback Act which states:

> Upon a showing that a subcontractor paid fees, commissions, or compensation or granted gifts or gratuities to an officer, partner, employee, or agent of a prime contractor or of another higher tier subcontractor, in connection with the award of a subcontract or order thereunder, it shall be conclusively presumed that the cost of such expense was included in the price of the subcontract or order and ultimately borne by the United States.

The court held that this "conclusive presumption" was "not offensive to due process since it is based on a logical and probable connection with the antecedent facts." 136 F. Supp. at 429.

Reaffirmation of principle's validity was received when, as part of the September 22, 1986 hearing before the House Government Operations Subcommittee, Chairman BROOKS asked the Department of Justice whether it was "invariably true that the cost of a kickback will be passed on to the Government as part of the contract price." The Justice Department responded in a letter dated September 30, 1986:

> All of our experience in the investigation of such [kickback] cases supports the proposition that illicit payments *do* inflate the price which the Government pays and, indeed, supports the proposition that the Government's loss *exceeds* the amount of the kickback. We can recall no case in which the evidence refuted this proposition. (Original emphasis.)

Current law authorizes the United States to recover only the amount of any kickback which it can prove has taken place in connection with a prime contract. Simple recovery of the kickback amount, however, often fails to compensate the Government for all of its injury. The Supreme Court recognized this fact in the Acme case:

> [The defendant] argues * * * that the express provision for recovery of kickbacks is enough to protect the Government from increased costs attributable to them. But this argument rests on two false assumptions. The first is that kickbacks can easily be detected and recovered. This is hardly the case. * * * The second * * * is that the increased cost to the Government is necessarily equal to the amount of the kickback which is recoverable. Of course, a subcontractor who must pay a kickback is likely to include the amount of the kickback in his contract price. But this is not all. A subcontractor who anticipates obtaining a subcontract by virtue of a kickback has little incentive to stint on his cost estimates. * * *[H]e will be tempted to inflate [his] proposal by more than the amount of the kickback. And even if the Government could isolate and recover the inflation attributable to the kickback, it would still be saddled with a subcontractor who * * * is perhaps entirely unreliable in other ways. *United States* v. *Acme Process Equipment Co.*, 385 U.S. 138, 144 (1966).

By providing for civil recovery of twice the kickback amount plus $10,000 per instance of wrongdoing, the bill provides a mechanism that will more nearly compensate the Government for all of its damages. For example, the provision will enable the United States to recoup the kickback amount; the amount that the subcontractor inflated its contract price beyond the kickback payment; the costs of detecting and investigating the kickback; the interest lost to the Government during the time of the fraud; and for other excess charges and performance problems that may be caused by a corrupt subcontractor. Cf. *United States ex rel. Marcus* v. *Hess*, 317 U.S. 537, 550–52 (1943); *Peterson* v. *Richardson*, 370 F. Supp. 1259, 1267 (N.D. Tex. 1973) aff'd, 508 F.2d 45 (1975), cert. denied, 423 U.S. 830 (1975) (double damages and forfeitures upheld in cases of false claims against the Government as a mechanism for making the Government whole).

In addition to providing an expanded measure of damages, the bill modernizes the civil mechanism used by the United States to recover on a kickback claim. Both the existing statute and the proposed legislation relieve the United States of the costly and time-consuming burden of demonstrating, in each case, that a kickback caused it injury and damage. Both bills relieve the United States of this burden, because of the longstanding rule of law, explained above, that kickbacks invariably injure the defrauded party. For technical reasons, however, the legislation uses a "civil penalty" rather than the existing "conclusive presumption" to achieve the desired result.

The bill uses a "civil penalty" rather than a "conclusive presumption" to achieve the same result, because the authors of the bill wanted the Anti-Kickback Act to more closely parallel the False Claims Act, 31 U.S.C. 3729, which uses a civil penalty, and because Members of the House felt that use of a "conclusive presumption" was an outdated drafting approach.

In practical terms, the bill's use of a civil penalty in place of a conclusive presumption has and is intended to make no substantive change in the

United States' right to recover civil damages in kickback cases. Contrasting the civil actions authorized by current law and the bill illustrate this point. To recover civilly under the current Anti-Kickback Act, the United States is required to establish the payment of a kickback. Upon making this showing, through the "conclusive presumption," the Government is automatically deemed to have been injured and to be entitled to damages equal to the amount of the kickback. The bill works in a similar way. To recover under the proposed legislation, the United States must prove that a kickback was paid, accepted or included in a contract price. Upon making this showing, the United States is entitled to recover a "civil penalty." The United States is automatically entitled to this penalty, without proving specific injury or damages, because the law recognizes its right to compensation for the kickbacks tainting its procurement system.

In addition to providing a more modern civil recovery mechanism and compensation more nearly commensurate with the damages suffered by the United States, the bill also expands the categories of persons who may be sued civilly for engaging in kickbacks. Current law authorizes civil suits only against "the subcontractor" or the "recipient" of a kickback. 41 U.S.C. 51. Other categories of persons who participate in kickbacks and who should be civilly liable for their misconduct include independent sales representatives who pay kickbacks and prime contractors who include kickback costs in their contract prices or who permit kickback activities within their operations.

The bill accordingly expands the current law in two ways. Section 5(a)(1) permits the United States to institute a civil suit against "any person" who knowingly violates the Act, and section 5(a)(2) enables the United States to recover from "any person whose employee, subcontractor or subcontractor employee violates [the Act] by providing, accepting, or charging a kickback."

Section 5(a)(1) is meant to permit a civil recovery against anyone who knowingly engages in kickback activities—paying a kickback, receiving a kickback, including a kickback cost in a contract price, or attempting to do any of these acts. It is intended to subject not only subcontractors and kickback recipients to civil liability, but also prime contractors, independent sales representatives and others who knowingly participate in kickback activities. It is also intended to reach companies whose employees engage in kickbacks, under the doctrine of respondeat superior. The justification for this approach, described earlier, is that persons who engage in kickbacks in the Federal procurement process invariably finance the kickback costs by passing them along to the United States taxpayer. The United States is thus entitled to seek from any of the wrongdoers compensation equal to twice the kickback amount plus $10,000 per instance of wrongdoing.

Section 5(a)(2) addresses a specific deficiency in current law—the failure to provide a civil incentive to business entities such as prime contractors and subcontractors to deter kickback activities within their operations—by authorizing a limited civil action with a reduced civil penalty. This section allows the United States to recover civilly from any person whose employee, subcontractor or subcontractor employee violates the law by engaging in kickbacks. The United States does not have to show that the person being sued knew of the misconduct—just that the misconduct was perpetrated by that person's business associate—and the United States may recover a civil penalty equal to the amount of each kickback involved in the case.

Because section 5(a)(2) imposes civil liability on one person for the actions of its business associate, its provisions are more circumscribed than those in section 5(a)(1). For example, it permits the United States to recover only the amount of a kickback in question rather than twice that amount plus $10,000, and it limits liability to situations where actual rather than attempted misconduct has occurred.

The goal of the section is not only to provide partial compensation to the Government for kickback costs included in Federal contracts, but also to impose a limited civil liability on companies for the kickback activities of their employees, subcontractors and agents, as a way of encouraging these companies to take steps to stop kickbacks within their operations.

The foundation of this approach is the longstanding doctrine of respondeat superior which holds employers responsible for the actions of their employees. By holding employers civilly liable for injuries caused by their employees, the doctrine encourages employers to supervise their employees to deter misconduct. In light of this broad doctrine of employer liability, it is consistent to hold companies civilly liable to the United States for the kickback activities of the persons they employ.

The bill takes the further step of holding a company civilly liable for the misconduct of its subcontractors and the subcontractor's employees when these persons' kickbacks affect a prime contract with the United States. The Supreme Court has upheld this type of civil liability in other Federal laws. *Cf. American Society of Mechanical Engineers, Inc.* v. *Hydrolevel Corp.*, 456 U.S. 556, 572 (1982) (principal held civilly liable under antitust law for agent's anticompetitive actions in order to encourage the principal to supervise its agents to deter their misconduct). Through this expanded civil liability provision, the bill encourages companies to supervise not only their own employees but also their subcontracting operations as a whole to deter kickback activities.

The bill takes this approach, because representatives of various agencies within the Federal Government testified before Congress that subcontractor kickbacks cannot be eliminated from the Federal procurement system, unless prime contractors and subcontractors are enlisted in the fight against this fraud. These contractors are better situated than the Government to detect and prevent kickback schemes perpetrated by their employees or agents—they select the people they do business with, set workplace procedures and monitor the work. But instituting procedures to detect and prevent kickbacks is difficult and costly. For this reason and based upon past experience with the kickback problem, the authors of the bill concluded that without some measure of civil liability for the wrongdoing, companies would not devote the necessary resources to an anti-kickback effort. The bill thus authorizes the United States to seek a civil penalty against companies based upon the kickback activities of their employees, subcontractors and subcontractor employees.

Should the United States recover a civil penalty under section 5(a)(2) from one person for the misconduct of its employee, subcontractor or subcontractor employee, that person may, of course, take any available legal action to seek reimbursement from the actual wrongdoer.

Section 5(b) clarifies the statute of limitations applicable to civil suits under section 5(a). It specifies a period of 6 years from the date the prohibited conduct occurred or, if the conduct was kept hidden, from the date that the United States knew or should reasonably have known that the prohibited conduct had taken place. Six years is a standard time period for filing Federal civil actions involving Federal contracts. The tolling language is modeled in part after that found in 28 U.S.C. 2416(c).

SECTION 6: ADMINISTRATIVE OFFSETS

The existing act provides that the amount of any kickback "shall be recoverable on behalf of the United States from the subcontractor or the recipient thereof by setoff of moneys otherwise owing to the subcontractor either directly by the United States, or by a prime contractor under any contract . . ." 41 U.S.C. 51. The bill preserves this right of offset, but redrafts the provision in light of existing law on administrative offsets and Federal contract procedures.

In 1982, Congress enacted the Debt Collection Act, codified in part at 31 U.S.C. 3716, to standardize Government procedures for instituting administrative offsets. This statute does not govern all types of administrative offsets, but it covers a large variety of situations. The authors of the bill determined that the Anti-Kickback Act, which was enacted in 1946, should not preempt the Debt Collection Act or other common law and statutory schemes which now govern administrative offsets by the United States.

Accordingly, the bill redrafted the Anti-Kickback Act's offset provision so that it applied only to moneys owed by the United States under a prime contract tainted by a kickback. The Debt Collection Act and other administrative offset laws do not apply to such intra-contractual adjustments. *See Avco Corp.* v. *United States,* Case No. 14-85C (U.S. Claims Court Aug. 19, 1986). By limiting the Anti-Kickback Act in this way, the bill in no way limits the United States' right to recover kickback amounts under other laws authorizing administrative offsets; the bill merely requires the United States to cite these other statutes or common law doctrines, rather than the Anti-Kickback Act, as the basis for its actions.

Section 6(a) provides general authorization for offsets of kickback amounts. It provides, in essence, that where it has been determined that a kickback has been provided, accepted or included in a contract price, the contracting officer may offset the amount of the kickback from any moneys owed by the United States to the prime contractor under the prime contract tainted by such misconduct.

This section limits the U.S. right of offset to cases in which actual, as opposed to attempted, misconduct has taken place. The section does not require the United States to obtain a final judgment by a court of law before submitting a kickback claim to a contracting officer; the bill contemplates the United States following the same procedures to arrive at its kickback claim that it follows in submitting any other Government claim to a contracting officer.

The section coordinates the offset provision with existing Federal contract law by requiring a contracting officer to initiate the offset and by referencing the Contract Disputes Act of 1978, 41 U.S.C. 601-613, which provides general procedures for resolving claims between the United States and its contractors. The section is designed to allow the procedures called for in the bill to be handled in accordance with the procedures set out in the Contract Disputes Act. Under the combined provisions of section 6(a) and the Contract Disputes Act, for example, a contracting officer presented with a Government claim for a kickback amount would, pursuant to 41 U.S.C. 605, issue a decision in writing to the prime contractor demanding reimbursement. The contracting officer could, if he or she wished, combine the kickback claim with other claims affecting the same prime contract and issue a single decision letter on all of them.

A prime contractor who disagrees with the Government's kickback claim may appeal the contracting officer's decision on the claim pursuant to the procedures set out in the Contract Disputes Act. In light of the fact that the Government's claim involves fraud, however, the prime contractor's right of appeal is intended by the authors of the bill to lie exclusively with the U.S. Claims Court under 41 U.S.C. 609(a). An agency board should not handle such appeals, because the boards' factual determinations are subject to only limited review in a judicial forum under a standard requiring a showing of fraud, arbitrariness, capriciousness, bad faith or failure of substantial evidence. In contrast, the U.S. Claims Court may review the facts underlying the kickback claim on a de novo basis. Prime contractors should have de novo review, in a judicial forum, of the facts underlying contract claims involving fraud.

Section 6(b) retains the U.S. right under the existing Anti-Kickback Act to exercise an offset through a prime contractor and further permits the prime contractor, in cases the Government deems appropriate, to recoup the offset sums from a subcontractor. The subsections implementing these provisions work in tandem and should be read together.

For example, read together, subsections 6(b)(1) and 6(b)(2)(A) apply to cases in which the United States wishes to recover kickback costs from a subcontractor with whom it has no direct contractual relationship. In this event, the contracting officer may direct the prime contractor, under subsection 6(b)(1), to withhold the necessary sums from moneys that the prime contractor owes the subcontractor and, under subsection 6(b)(2)(A), to pay those sums to the appropriate contracting agency. In this way, the United States recovers its kickback costs administratively from the subcontractor, by acting through the prime contractor.

Subsections 6(b)(1) and 6(b)(2)(B), read together, apply to cases in which the United States has already executed an offset against a prime contractor but wishes to authorize the prime contractor to recoup the offset sums from an appropriate subcontractor. In this event, on instruction of the contracting officer, subsection 6(b)(1) permits the prime contractor to withhold from sums it owes the subcontractor the amount of any kickback which has been or may be offset against the prime contractor under section 6(a). Again on instruction from the contracting officer, subsection 6(b)(2)(B) permits the prime contractor to keep this money (rather than pay it to the United States) if the United States has already collected that sum from the prime contractor through an administrative offset. Subsection 6(b)(3) requires the prime contractor to notify the contracting officer when, after being instructed to do so, it, in fact, has retained money under the authority of subsection 6(b)(2)(B).

Section 6(b) was designed primarily to benefit those prime contractors who are unwitting participants in subcontractor kickback schemes, by enabling them to pass on or recoup from appropriate subcontractors any kickback costs which the United States may recover or has recovered from the prime contractors through an administrative offset. The provisions are, of course, in addition to other legal remedies which a prime contractor may pursue to recoup such losses from an appropriate party.

As a safeguard, a prime contractor may not invoke section 6(b) unilaterally; it must convince a contracting officer to direct the prime contractor to proceed under the section. By assigning the responsibility of initiating the offset procedures to the contracting officer, the bill seeks to assure that due regard will be paid to the purposes of the Act and the facts of each case. For example, it is not intended that a contracting officer will authorize a prime contractor to retain funds under subsection 6(b)(2)(B) in cases where the prime contractor was a knowing participant in a kickback scheme perpetrated by the subcontractor or in cases where the identity of the subcontractor responsible for paying the kickback is unclear.

SECTION 7: CONTRACTOR REQUIREMENTS

Section 7 of the bill imposes new responsibilities on prime contractors and subcontractors. These provisions are intended to increase contractor participation in efforts to deter subcontractor kickbacks.

Section 7(a) states that each Government contract must require the prime contractor to "have in place and follow reasonable procedures designed to prevent and detect violations of [the Act] within its own operations and direct business relationships." This provision is intended to encourage prime contractors to institute formal procedures to combat subcontractor kickbacks.

Some persons expressed concern that this section would require them to impose burdensome and intrusive procedures on their subcontractors, such as requiring the subcontractors to submit to periodic audits of their books by the prime contractor. The bill does not require prime contractors

to impose burdensome and intrusive procedures on their subcontractors. Again, the provision only requires reasonable antikickback measures. Prime contractors should seek a middle ground between ignoring their subcontractors' possible kickback activities and asserting direct control over their subcontractors' operations and personnel. Examples of nonburdensome, unintrusive procedures are requiring subcontractors: (1) to submit declarations with each bid that they have not engaged in kickbacks to win the award of the subcontract, and (2) to answer questions about whether prime contractor employees are soliciting them for kickbacks.

The word "reasonable" provides needed flexibility to this section of the bill, which requires a wide variety of contractors to implement antikickback procedures. The authors of the bill intend courts, when imposing liability for inadequate procedures, to apply the requirement with consideration for good faith efforts and substantial compliance with the provision. At the same time, courts should not allow prime contractors to use the test of reasonableness to, in essence, shield themselves from providing more than token antikickback procedures.

CONCLUSION

The Anti-Kickback Act had not been amended in 25 years, and a legislative overhaul was long overdue. By stiffening criminal penalties, expanding the civil recovery provisions, prohibiting kickbacks on any type of prime contract to obtain any type of favorable treatment, and otherwise modernizing and broadening the Act, the bill provides a needed strengthening of the legal deterrent to subcontractor fraud.

Mr. CHAFEE. Mr. President, I move to concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to table the motion to reconsider.

The motion to lay on the table was agreed to.

CORRECTION IN THE ENROLLMENT OF S. 2250

Mr. BYRD. Mr. President, I send to the desk a Senate concurrent resolution by Mr. LEVIN, for himself and Mr. COHEN, and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will report the concurrent resolution.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 168) authorizing a technical correction to be made in the enrollment of the bill S. 2250.

The PRESIDING OFFICER. Is there further debate on the resolution? If not, the question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to, as follows:

S. CON. RES. 168

Resolved by the Senate (the House of Representatives concurring), That, in the enrollment of the bill (S. 2250) to prohibit kickbacks relating to subcontracts under Federal Government contracts, the Clerk of the Senate shall make the following correction:

In the first sentence of section 5(a)(2) of the Anti-Kickback Act of 1986 (as it appears in section 2(a) of the bill), insert "employee," between "whose" and "subcontractor".

Mr. BYRD. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. CHAFEE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL KIDNEY PROGRAM DAY

Mr. CHAFEE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 367.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S. J. Res. 367) entitled "Joint resolution to designate September 24, 1986, as "National Kidney Program Day", do pass with the following amendment:

Page 2, line 4, strike out (September 24,), and insert: "October 23,"

Amend the title so as to read: "Joint resolution to designate October 23, 1986, as 'National Kidney Program Day.' ".

Mr. CHAFEE. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider that action.

Mr. BYRD. Mr. President, I move to table the motion to reconsider.

The motion to lay on the table was agreed to.

TRANSFER OF THE COAST GUARD CUTTER "TANEY"

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 5598, dealing with the Coast Guard cutter *Taney,* now being held at the desk.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5598) to provide for the transfer of the Coast Guard cutter *Taney* to the city of Baltimore, Maryland, for use as a maritime museum and display.

The Senate proceeded to consider the bill.

Mr. MATHIAS. Mr. President, H.R. 5598 provides for the transfer of the Coast Guard cutter *Taney* to the city of Baltimore, MD, for use as a maritime museum in the city's Inner Harbor area. I understand that this bill has been cleared on both sides and that there are no objections from the executive agencies.

The vessel is named after Roger Brooke Taney of Maryland who served as the fifth Chief Justice of the United States after serving as Secretary of the Treasury and Attorney General. He is buried in Frederick, MD, where he had practiced law as a young man. She was commissioned in 1936 and saw action in both the Atlantic and Pacific Oceans during World War II as well as in Korea and Vietnam.

The *Taney* is due to be decommissioned this December. The Coast Guard has said that, because of its age, she would not be called to duty again. Baltimore will provide the funds for the transfer and drydocking.

I urge my colleagues to support this bill so that the maritime heritage of the *Taney* can be preserved.

Mr. SARBANES. Mr. President, I rise in strong support of H.R. 5598, providing for the transfer of the Coast Guard cutter *Taney* to the city of Baltimore for use as a maritime museum and display, upon decommissioning of the vessel.

Both the cutter and its namesake, Roger Brooke Taney, served the Nation with distinction. Roger B. Taney served as attorney general of Maryland in 1827, Attorney General of the United States in 1831, Secretary of the Treasury in 1833 and was the fifth Chief Justice of the U.S. Supreme Court in 1836. He was born in Calvert County, lived in Baltimore and is buried in Frederick, MD, where his home, the Taney House, is a State historic landmark.

The cutter, commissioned in 1936, is the last of five Coast Guard vessels named after U.S. Secretaries of the Treasury. She is the last U.S. warship out of 101 naval vessels in Pearl Harbor during the attack on December 7, 1941, to be in active service. She also served at Okinawa, Korea, Vietnam, and more recently on the east coast of the United States in law enforcement and search and rescue missions. The impressive historical significance of the *Taney* warrants that once she is decommissioned, the memory of her service and of the Marylander for

whom she is named be preserved as a symbol of Coast Guard heritage.

The transfer to the city of Baltimore would take place after the *Taney* has been decommissioned later this year and the city has agreed to assume all costs associated with transferring and drydocking the cutter. Mr. President, I strongly support this bill and urge its adoption.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5598) was ordered to a third reading, was read the third time, and passed.

Mr. CHAFEE. Mr. President, I move to reconsider that action.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

THE CENTRAL VALLEY PROJECT OPERATION — CONFERENCE REPORT

Mr. CHAFEE. Mr. President, I submit a report of the committee of conference on H.R. 3113 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3113) providing for the coordinated operation of the Central Valley Project and the State Water Project in California, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 14, 1986.)

Mr. McCLURE. Mr. President, the conference agreement on H.R. 3113 marks a great achievement in establishing direction for the management and further development of our western water resources. The agreement is the culmination of not only the efforts of the Senate and House conferees, but reflects a lot of hard work on the part of staff and representatives of the environmental and water resource communities. The agreement is a major step toward the better management of our western water resources.

I express my appreciation for the efforts of my colleagues on the Senate Energy and Natural Resources Committee for their contributions and constructive help in achieving this landmark legislation. I commend also to my colleagues the strong support for the Senate bill by the Senate conferees: Senator DOMENICI, Senator WALLOP, Senator MURKOWSKI, Senator EVANS, Senator JOHNSTON, Senator FORD, Senator METZENBAUM, and Senator MELCHER. Each contributed to the agreement that is before the Senate today.

I particularly thank the chairman of the Subcommittee on Water and Power, Senator MURKOWSKI, for his able assistance in moving the legislation through the subcommittee, the Senate, and the conference. His concerns for the water users and the conservation of our resources helped shape the agreement that is before us.

The text of the agreement is substantially in accord with the Senate version of H.R. 3113 except for title I where the conferees agreed to a true compromise version which, I believe, combines the best elements of both the House and Senate bills.

If I may take just a moment, I will briefly highlight segments of the Statement of the Managers which addresses the areas of compromise in the substitute agreed to by the conferees.

Title I of the substitute amends section 2 of the Act of August 26, 1937, to provide that:

Unless the Secretary of the Interior determines that operation of the Central Valley Project in conformity with State water quality standards for the San Francisco Bay/Sacramento-San Joaquin Delta and Estuary is not consistent with the congressional directives applicable to the project, the Secretary is authorized and directed to operate the project, in conjunction with the State of California Water Project, in conformity with such standards.

This language provides protection for the investment of the taxpayer and the Nation in the facilities of the Central Valley project. Foremost under the reclamation law is the obligation of the Secretary of the Interior to secure repayment of the reimbursable costs of reclamation projects. In operating the Central Valley project to meet appropriate water quality standards, the Secretary must be consistent with the congressional directives applicable to the project. In response to those directives, the Secretary must not place in jeopardy the repayment capability of the project.

This agreement also lays to rest a myth that enactment of this legislation would provide a backdoor authorization for the relocation of the intake of the Contra Costa Canal entirely at Federal expense. I do not know the origin of this myth, but it proved troublesome in reaching a final agreement and is addressed by the legislation.

I would also note that at the insistence of the Senate, the House conferees agreed to modify the provision regarding the reimbursability of costs associated with providing Central Valley project water supplies for the purpose of salinity control and for complying with the State water quality standards identified in the coordinated operation agreement. The conference agreement provides that such costs shall be reimbursed in accordance with existing reclamation law and policy.

The original House version would have made all such costs over and above the so-called "Tracy Standards" nonreimbursable. I commend the House and the Central Valley project participants for their willingness to shoulder the burden of the repayment of the necessary costs. And I thank my Senate colleagues for helping maintain the honesty and integrity of the reclamation program.

Mr. MURKOWSKI. Mr. President, will the chairman yield?

Mr. McCLURE. I would be glad to yield to the distinguished chairman of the Subcommittee on Water and Power.

Mr. MURKOWSKI. I thank the chairman.

I would note that it is customary under the reclamation law for project beneficiaries to pay the costs of mitigating the adverse environmental impacts of such projects.

Mr. McCLURE. Yes, it is. All project purposes share the burden of mitigating adverse environmental impacts and the conference agreement maintains this policy.

Mr. MURKOWSKI. I thank the chairman. It only seems fair to me that those who participate in a Federal project should bear the burden of mitigation commensurate with the benefits received and the impact of that particular project purpose. This is fair.

Mr. McCLURE. Mr. President, I should also advise my colleagues that the agreement provides that the cost of providing water for salinity control and for complying with State water quality standards above those standards in the coordinated operation agreement shall be nonreimbursable. There are three inherent elements in agreeing to this part of the compromise:

First is that the benefits of such efforts are national in scope. The area addressed by the standards, San Francisco Bay and the delta, is of national and international significance as aquatic habitat for wildlife.

Second is the obligation on the part of the Secretary to operate the project in consistency with applicable congressional directives, regardless of what standards may be set.

Third is how we define cost, and here I speak not of dollars and cents, because money alone will not provide salinity control or improved water quality. The real cost of meeting the requirements would be in terms of water. Water is the essential ingredi-

ent in providing for salinity control and water quality standards.

I am totally confident that the participants in the State water project and the Central Valley Project, long before the dollar-and-cents costs could become burdensome on the Federal Treasury, will take every step to ensure that their contractual supplies would not be interrupted. I am not disillusioned as to their ability; these are tough western water users who live in an area where water is worth much more than money.

Mr. MURKOWSKI. Mr. President, will the distinguished chairman yield? I wish to call to the attention of the Senate and those interested in the legislation a letter from the Office of Management and Budget regarding H.R. 3113.

Mr. McCLURE. I will certainly yield to the chairman of the Subcommittee on Water and Power.

Mr. MURKOWSKI. As my colleagues know, the deliberations on this legislation have not been without controversy. Through great efforts in the Committee on Energy and Natural Resources, and on the floor of the Senate, the Senate passed a responsible measure. The Senate version was responsible to the needs of the water users in the Central Valley project in California, responsible to the participants in the Small Reclamation Projects Loan Program, responsible to environmental concerns, and finally, responsible to the taxpayer who carries the initial burden of funding the development of our water resources.

I think the Senate did a good job.

I also agree with the chairman that the conference agreement reflects the efforts of the Senate to ensure fiscal responsibility as well as environmental awareness in perfecting the management of the existing Central Valley project as well as in the granting of loans pursuant to the Small Reclamation Projects Act. We have done a good job—but I am dismayed at the efforts of the Office of Management and Budget. I have here a copy of a letter from the Office of Management and Budget which seems to try and lay down what they believe are the minimum requirements of this legislation if we are to avoid a veto by the President.

First, I resent the late date at which the OMB made their views known, and second, I resent their efforts to try and influence the legislative process of the conference committee.

Mr. McCLURE. I thank the subcommittee chairman for giving me the opportunity to comment on the letter from the OMB. I have a copy. The letter was received by the Committee on Energy and Natural Resources on September 9, 1986.

First of all, the letter was behind the times. The Senate and the conferees had already addressed the concerns expressed by OMB. Perhaps not to the extremes that OMB proposed, but on the other hand, I believe the Congress is in much closer touch with the real world and recognized the practicalities required of the legislation.

Mr. MURKOWSKI. I thank the Chairman.

On balance, I believe that the Senate was far in advance of the OMB in establishing responsible fiscal limitations for both the coordinated operations agreement and the Small Reclamation Projects Act Program. The Senate version of the bill required reimbursability for activities pursuant to the COA, limited the subsidy under the Small Reclamation Projects Act to the smaller, family-sized farm, and provided for a market yield interest rate on interest-bearing components of the loans. In addition, we provided for periodic analysis of the ability to pay capability for the Central Valley project, interest on operation and maintenance deficits for the CVP, shortening of the repayment period for loans pursuant to the Small Reclamation Project Act, and requirements for upfront financing of loans. Individually, these are important steps. Collectively, they amount to a wholesale change in the COA as well as substantial alterations to the Small Reclamation Project Act.

I am pleased to report to my colleagues that the Senate position prevailed in conference and is reflected in the conference agreement.

Most of these actions occurred during consideration of the legislation by the committee and was confirmed on the Senate floor, long before receipt of the letter from the OMB. To the extent that the letter from the OMB supports the actions of the Senate, I am appreciative.

Mr. McCLURE. I thank the subcommittee chairman for his remarks regarding the letter from OMB and I agree with him that the conference agreement more than adequately addresses the issues raised in the letter.

Mr. President, the conferees having adopted title II of the Senate version in its entirety, the next point I would call to the attention of my colleagues is in title III of the agreement.

Title III of the agreement provides for amendments to the Small Reclamation Projects Act of 1956, and here I would take a moment to once again express my gratitude to my colleagues on the Energy and Natural Resources Committee and, in particular, Senators MELCHER and METZENBAUM for their constructive efforts in crafting title III of the Senate version of the bill. The conference agreement reflects their efforts.

Mr. President, as my colleagues will recall from the debate on the floor of the Seante when we considered H.R. 3113, grave concern was expressed regarding the impact of the 20-percent limitation on the appropriation of funds to any one State. Similar concern was expressed on the part of the House conferees and a compromise was adopted. The conference agreement retains the Senate language in a modified form. The conference agreement would impose the 20-percent limitation for a period of 5 years. After that time period, the Secretary may waive the limitation if it is determined that a loan or grant has met the purposes of the act. The Secretary must send the reasons for waiving the limitation to the Congress and allow Congress 60 legislative days in which to pay a joint resolution of dissapproval. I think this compromise reflects the Senate conferees' concern that there should be a mechanism whereby those projects which are worthwhile and clearly meet the objectives of the program should go forward.

Title IV of the agreement is the Senate text with a clarifying amendment.

Mr. President, this legislation is the end product of over 20 years of concerted effort in California regarding the coordinated operations agreement and two Congresses in regard to the Small Reclamation Projects Act. The effort on the part of the staff of the Senate Committee on Energy and Natural Resources should also be recognized. I would like to thank Russ Brown, professional staff of the Subcommittee on Water and Power, for his work, particularly on the Small Reclamation Projects Act, and Bill "Combine" Conway of the minority staff for his efforts on behalf of Senator JOHNSTON and the minority members of the committee.

Mr. President, I urge approval of the conference report.

Mr. JOHNSTON. Mr. President, I am pleased that today we are going to approve the conference report to H.R. 3113. This bill will accomplish a number of meritorious goals.

Title I of the conference report would authorize the Secretary of the Interior to operate the Central Valley project [CVP] on a coordinated basis with the California State water project [SWP] and require the CVP in conjunction with the SWP to meet certain State water quality standards. Under the coordinated operations agreement [COA], both projects will reap benefits from more efficient use of available water resources. In addition, the provisions of the conference report will ensure that the impacts of CVP and SWP operation on water quality in the Sacramento/San Joaquin Delta are mitigated.

Title II of the conference report would reauthorize construction of facilities to protect Suisun Marsh from saline encroachment resulting from operation of the CVP and SWP. I am happy to say that the conferees adopt-

ed provisions in the Senate-passed version of H.R. 3113 requiring significant up-front cost sharing by the State of California and allocation of the Federal share of costs to CVP project purposes.

Title III of the conference report authorizes an additional $600 million for loans and grants under the Small Reclamation Projects Act. For the most part the conferees accepted the Senate-passed language which brings new fiscal discipline to the program. Included in the report the provisions for increased cost sharing by loan recipients, shortened repayment periods, the use of market interest rates, and increased payment of interest by recipients of irrigation benefits. I note that the Small Reclamation Loan Program has an excellent repayment history. Furthermore, most loans are made for purposes of conserving water resources through the rehabilitation and betterment of existing projects. For these reasons, I strongly support the increased authorization for this program.

Finally, title IV of the conference report clarifies that certain irrigation districts which have constructed hydroelectric projects at Bureau of Reclamation dams are not required to pay annual charges for the use of those dams as a result of provisions of their contracts with the Federal Government that exclude such payments.

Mr. President, I believe that it is in the public interest for the Senate to approve the conference report to H.R. 3113. Among other considerations, I believe that this bill will significantly improve repayment of the Federal investment in the Central Valley project. At present the CVP has approximately 1 million-acre-feet per year of firm yield that would ordinarily be available for long-term contract. As a matter of departmental policy, however, the Secretary of the Interior has not marketed this water pending resolution of the obligation of the CVP to meet delta water quality standards. Enactment of H.R. 3113 would resolve this obligation and thus allow the marketing of the water that has previously been reserved. In addition, the provisions of H.R. 3113 would allow the CVP in good water years to expand project yield. The marketing of these new water supplies will increase the revenue stream received by the Federal Government for CVP repayment.

Mr. President, I should note one area of disappointment, and that concerns who is to pay for the costs of meeting State water quality standards in the delta and San Francisco Bay and estuary. Under the provisions of the conference report, the cost of meeting current delta standards is allocated to CVP purposes and required to be reimbursed by project beneficiaries in accordance with existing reclamation law. However, the costs of meeting future delta standards and standards for the bay and estuary—which have yet to be determined—are completely nonreimbursable. That approach is very disturbing to me because it potentially locks in one more layer of subsidy for the benefit of CVP contractors.

To the extent that future water quality standards imposed on the CVP represent mitigation of CVP impacts, as opposed to general environmental enhancement, it is only fair that the cost of meeting those standards should be allocated to project purposes as a "cost of doing business." Yet under the provisions of the conference report, CVP contractors will receive a free ride on all future water quality standards, regardless of their role in making the setting of such standards necessary. I am only able to accept this dubious arrangement because I believe that environmental quality must be maintained and that the ultimate increase in CVP repayment will be greater with enactment of H.R. 3113 than without it.

I note in closing, however, that the unwillingness of CVP contractors in this instance to shoulder a burden that is properly theirs is precisely the sort of position that produces ever more serious assaults upon the Reclamation Program. Undoubtedly, we will revisit many of the issues concerning the Central Valley project. When we do, I would not be surprised to find that, as a result of actions taken today, the case for radical change, perhaps even the charging of interest on repayment of irrigation costs, has become compelling.

Mr. WILSON. Mr. President, the conference report on H.R. 3113 that we are considering today marks what is perhaps the most important Federal legislation on California water issues in the last decade. Putting aside for a moment the substantive provisions of this legislation, what distinguishes this bill and makes it especially important is the spirit of cooperation and comity embodied in this legislation. In a State where it has been said many times that water wars have been raging for decades, H.R. 3113 represents a coming together of a traditionally highly divisive California water community.

Supporting this bill after long and difficult negotiations are the farmers, the environmentalists, the State of California, the communities dependent on the high quality of drinking water provided for by this bill, the fishermen and hunters, and scores other interested parties. Even northern and southern California interests—who rarely agree on any statewide water issues—support this bill, albeit for different reasons.

We have already seen one manifestation of this new-found spirit of cooperation in the work that the environmental defense fund and the Westlands water district have begun together in responding to the Kesterson National Wildlife Refuge crisis.

Leaving the Kesterson problem for another day, let me turn to the conference report at hand. Title I of this bill authorizes the coordinated operations agreement [COA] and in so doing allows for the coordination of the massive Federal Central Valley project and the California State water project. This means a number of things for California, but at least three direct benefits will accrue from this agreement.

First, the Federal Central Valley project is now authorized by this legislation to be operated in conjunction with the State project to meet State-ordered water quality standards in the San Joaquin/Sacramento River Delta and the San Francisco Bay into which the delta feeds. Prior to this agreement, the responsibility for meeting these standards was unclear and created much uncertainty in the water community.

Second, now that the Federal Government's responsibility for meeting State-ordered water quality standards is clearly delineated in the COA and this legislation, the Bureau of Reclamation will be free to begin marketing over 1 million acre-feet of water that it has held back from the market since 1978. For those of my colleagues who are unfamiliar with this Western water law term, an acre-foot of water serves a family of four for about 1 year. There are many anxious buyers in California ready to take advantage of this new water supply, and this legislation will finally give them the opportunity to commence contract negotiations.

Third, the COA contains a provision that authorizes the Bureau of Reclamation to conclude a contractual agreement with the State—subject to congressional approval—that will allow for the sale of as much as 300,000 acre-feet of water to the sprawling metropolitan communities of southern California. In return, the State will make its excess water conveyance system capacity available to the Federal Central Valley project. Simply put, the Federal CVP is short on canal capacity and long on water supply. The State, on the other hand, has the canals but not enough water to service the demands on its system. The potential for a deal here is only too obvious, and this legislation authorizes an agreement to be finalized.

Title II of this conference report authorizes another Federal/State agreement, this one dealing with the protection of the Suisun Marsh located at the nexus of the delta and the San Francisco Bay. Together with the Suisun Resources Conservation Dis-

trict, the State and the Bureau of Reclamation have agreed to cost-share on the building of certain water control facilities in the marsh that will have the effect of maintaining State-ordered water quality standards, thereby preserving the precious wildfowl habitat found at this marsh.

Title III of the conference agreement is the final major provision of this bill. It reauthorizes the Small Reclamation Projects Act of 1956 by making available $600 million for new loans and grants under this program. Since inception, California has benefited extensively from this program. The loans made available under this act have aided water districts throughout California in rehabilitating and restoring their water distribution and supply systems. These loans and grants have also been used for the construction of flood control features, fish and wildlife enhancement, and recreational developments.

When the Senate passed its version of H.R. 3113 earlier this summer, it contained a provision in title III that was very onerous to the State of California. This provision would have capped California's share in the Small Reclamation Projects Act Program at 20 percent. Given that most of the needs intended to be serviced by this program have traditionally been found in California, I objected strenuously to this cap on the floor during the Senate consideration of this bill.

I am most pleased to note that the conference agreement modified this cap provision by allowing the Secretary of the Interior to waive this cap on a loan-by-loan basis after 5 years. I think this a most equitable arrangement and commend the House and Senate conferees for their good work on this issue.

This conference agreement touches on other issues that I will not mention in this statement. But as a general matter, this bill does much for California and I extend my heartfelt thanks to the Energy Committee and its distinguished chairman and staff for their dedicated efforts in bringing this conference report to the floor today. The many hours that the committee spent in hearings, markup, and conference negotiations have come to a successful conclusion, and all of California owes many thanks for this fine work.

I urge adoption of the conference report.

Mr. CRANSTON. I am pleased to support the conference report on H.R. 3113, a bill to authorize the Secretary of the Interior to execute the coordinated operation agreement and Suisun Marsh preservation agreement and reauthorize the Small Reclamation Projects Act.

The coordinated operation agreement is an historic and tremendously important agreement between the Federal Government and the State of California regarding the operation of the Federal Central Valley project and the State water project. It ends years of dispute over the Federal Government compliance with State water quality standards for Sacramento-San Joaquin Delta and provides for use of the State water facilities for conveyance of Federal project water. Importantly H.R. 3113 establishes in Federal law the requirement that the Central Valley project, like the State water project, be operated to protect the water quality of the delta and San Francisco Bay and limit water pumping diversions during drought years, even if it means reducing deliveries to their contract buyers, in order to maintain bay and delta standards. This obligation continues irrespective of the future of the coordinated operation agreement itself. Although the conference report does not contain the House language regarding nonreimbursability of costs associated with meeting these water quality standards, I believe the compromise reached by the conferees is fair and that the legislation is in the best interest of California.

Mr. President, I'm also pleased the conferees have agreed to include authorization of the Suisun Marsh preservation agreement. This agreement will provide for the construction of facilities to restore the marsh which is critical to the Pacific flyway.

Also I'm pleased the conference report includes an additional authorization of $600 million for the Small Reclamation Projects Act. This increase is necessary to continue a program which has been highly successful in California and proven an invaluable tool for the conservation and wise use of limited water resources.

I urge adoption of the conference report.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the conference report.

The conference report was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider that action.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

WILD AND SCENIC RIVERS ACT AMENDMENTS

Mr. CHAFEE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4350.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 4350) entitled "An Act to amend the Wild and Scenic Rivers Act, and for other purposes", with the following amendments:

(1)Page 2, strike out lines 21 to 23, inclusive, and insert:

With respect to the portions of the river segments designated by this paragraph which are within the boundaries of Rocky Mountain National Park, the requirements of subsection (b) of this section

(2)Page 20, strike out all after line 8, over to and including line 2 on page 21.

(3)Page 20, line 3, strike out [511.], and insert: *510.*

(4)Page 22, strike out line 1, and all that follows, over to and including line 2 on page 24.

AMENDMENT NO. 3404

Mr. CHAFEE. Mr. President, I move that the Senate concur in the House amendments with a further Senate amendment which I send to the desk on behalf of Senator McCLURE.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for Mr. McCLURE, proposes an amendment numbered 3404.

Mr. CHAFEE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add the following new title at the end of the Act:

TITLE VII—TO PROVIDE RELIEF FOR CERTAIN DESERT LAND ENTRYMEN IN IDAHO

SEC. 701. The Congress finds that—

(1) certain developed and productive desert land entries in Idaho, identified in section 702 of this title, made pursuant to the Act entitled "An Act to provide for the sale of desert lands in certain States and Territories", approved March 3, 1877 (43 U.S.C. 321, et seq.), commonly known and hereinafter referred to as the "Desert Land Act", have been cancelled by the Secretary of the Interior pursuant to holding limitation regulations promulgated pursuant to section 7 of the Act (43 U.S.C. 329);

(2) such regulations were retroactively applied to such desert land entries several years after the entries were allowed and more than two years after final development, proof and final payment for such entries were made, without giving the entrymen any opportunity to comply with the new interpretation of such regulations;

(3) cancellation of such desert land entries was harsh and unfair, and resulted in forfeiture to the Government of the developed entries and the monies paid for the land;

(4) such entrymen have fulfilled the requirements of the Desert Land Act in all respects other than such holding limitation regulations; and

(5) such entrymen, or their heirs or devisees, should have the entries reinstated and qualify for issuance of patents to carry out the objectives of the Desert Land Act.

SEC. 702. The names of the entrymen, and the serial numbers of the desert land entries generally known as the "Sailor Creek Project", to which this title applies, are as follows:

Bureau of Land Management

Entryman:	*Serial Number*
G. Patrick Morris	Idaho 013820
John E. Roth	Idaho 013905
Elsie L. Neeley	Idaho 013906
Lyle D. Roth	Idaho 013907
Vera M. Noble (Now Baltzor)	Idaho 014126
Charlene S. Baltzor	Idaho 014128
George R. Baltzor	Idaho 014129
John E. Morris (deceased)	Idaho 014130
Juanita M. Morris	Idaho 014249
Nellie Mae Morris (deceased)	Idaho 014250
Milo Axelsen	Idaho 014251
Peggy Axelsen	Idaho 014252

SEC. 703. (a) The desert land entries identified in section 702 of this title are hereby reinstated. The entrymen, or the heirs or devisees of any deceased entryman, may—

(1) rescind any agreement which is prohibited by the Secretary of the Interior pursuant to regulations under section 7 of the Act (43 U.S.C. 329) within six months after the date of enactment of this title; and

(2) resubmit final proof of reclamation and cultivation of the land in accordance with the provisions of section 7 of the Act (43 U.S.C. 329) before December 31, 1988.

(b) The Secretary of the Interior shall issue patents to the entrymen named in section 702, or their heirs or devisees upon compliance with the provision of subsection (a) and the submission of satisfactory final proof.

SEC. 704. Notwithstanding any other provisions of law, the property right prior to issuance of a patent to the land of any entryman identified in section 702 of this title, or the heirs, or devisees of any such entryman whose entry is reinstated in accordance with section 703 of this title, shall be a personal right, inheritable but not assignable. Any such entry may be mortgaged in the manner permitted by regulations promulgated by the Secretary of the Interior for the purpose of securing repayment of monies borrowed for development of the entry or for farm operating or crop production expenses.

Add at the end of the Act new titles 8, 9 and 10 as follows:

TITLE VIII—BLACK REVOLUTIONARY WAR PATRIOTS MEMORIAL

AUTHORIZATION OF MEMORIAL

SEC. 801. The Black Revolutionary War Patriots Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

FUNDING

SEC. 802. The Black Revolutionary War Patriots Foundation shall establish the memorial with non-Federal funds.

TITLE IX—WOMEN IN THE ARMED FORCES MEMORIAL

AUTHORIZATION OF MEMORIAL

SEC. 901. The Women in Military Service for America Memorial Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor women who have served in the Armed Forces of the United States. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

FUNDING

SEC. 902. The Women in Military Service for America Memorial Foundation shall establish the memorial with non-Federal funds.

TITLE X—NEW RIVER GORGE ADMINISTRATIVE SITE

SEC. 1001. Section 1102(a) of the National Parks and Recreation Act of 1978 (Public Law 95-625) is amended by inserting the following after the second sentence: "In addition, the Secretary may acquire by any of the foregoing methods not to exceed ten acres outside the boundaries of the national river for an administrative headquarters site, and funds appropriated for land acquisition shall be available for the acquisition of the administrative headquarters site.".

SEC. 1002. Section 1112 of the same act is amended by striking "$500,000" and inserting "$3,000,000".

Mr. BYRD. Mr. President, included in these amendments is an amendment which was introduced by my distinguished colleague, Mr. ROCKEFELLER, as a bill, S. 2384, Calendar No. 938. My distinguished colleague is on the floor, and I am sure he will want to address himself to this amendment.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROCKEFELLER. I thank my distinguished senior colleague from West Virginia.

Mr. President, part of this package, I am happy to say, is an amendment of mine which was passed by the Senate Committee on Energy and Natural Resources. I want to particularly give my thanks not only to Chairman MCCLURE of the Senate Energy Committee but also to my distinguished senior colleague, Senator BYRD. If it had not been for the very intense negotiations of both these gentlemen, this package would not have been possible; and this amendment, which will allow for construction of the New River Headquarters and Visitor's Center in Glen Jean, WV, would not have been possible without the work of both those Senators. So I thank them both.

Mr. President, I am pleased to say that my New River headquarters amendment is included in H.R. 4350.

This amendment is identical to S. 2384—which I introduced with Minority Leader BYRD—that cleared the Senate Energy and Natural Resources Committee by a unanimous vote and was reported on September 19. The National Park Service also supports S. 2384.

The bill authorizes the acquisition of land for construction of the New River's administrative headquarters, as well as a visitors' center and maintenance facility.

Over a quarter of a million visitors come to the New River each year. For whitewater rafters, the New River is one of the best rafting rivers in this country. For anglers, the New River has long been a favorite fishing spot. For the local community, the river is an important source of jobs and economic activity in the southern part of my State that has severe economic problems.

Given the sheer volume of New River visitors, it's important that the river be well run and adequately maintained—and it needs the facilities to do that.

Presently, the administrative headquarters for the New River are temporarily located in three rented buildings in Oak Hill. To improve park operations, the National Park Service selected this 10-acre site in the historic coal town of Glen Jean. The Glen Jean headquarters will consolidate and vastly improve the Park Service's New River operation. It will ensure that information and services for Park visitors will be located in a centrally located, accessible place. It will also be a great boost to the local economy.

Mr. President, I thank this body for adopting this measure which makes it clear that funds appropriated for land acquisition within the New River may be used to acquire property for the Glen Jean headquarters site.

Mr. BYRD. Mr. President, I thank my distinguished colleague for the leadership he has demonstrated in introducing this measure and for his leadership in bringing it to fruition on this day as an amendment to the pending measure.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WILD AND SCENIC RIVERS ACT

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be discharged from further consideration of H.R. 2826, amending the Wild and Scenic Rivers Act, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2826) to amend the Wild and Scenic Rivers Act by designating a segment of the Horsepasture River in the State of North Carolina as a component of the National Wild and Scenic Rivers System.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. BYRD. Mr. President, there is no objection to the two requests.

There being no objection, the Senate proceeded to consider the bill.

Mr. BROYHILL. Mr. President, I am most appreciative of the opportunity to address the Senate on the merits of the Horsepasture River. I am pleased to be representing a multitude of individuals and organizations who have been tireless in their efforts to ensure the protection of this natural resource by having it designated as a portion of the National Wild and Scenic River System.

On July 31, 1986, I introduced S. 2707, a bill to amend the Wild and Scenic Rivers Act by designating a segment of the Horsepasture River in the State of North Carolina as a component of the National Wild and Scenic Rivers System.

On July 28, 1986, the U.S. House of Representatives passed an identical bill, H.R. 2826, by voice vote. Although these important actions have happened just recently, I can assure you that they are the product of years of effort.

In 1984, a broad coalition of individuals and groups began to work together to ensure the permanent preservation of the Horsepasture River. This included State and Federal representatives, Duke Power Co., the Trust for Public Lands, a nonprofit land conservation group, and Friends of the Horsepasture, a local citizens group.

Now I'd like to explain why this river is held in such high esteem. In North Carolina, we are fortunate to have an enviable quantity and diversity of breathtaking natural resources. Why, then, has such an enormous amount of effort been committed to the designation of a 4.25-mile stretch of the Horsepasture River, located in the far western part of the State? It's because the Horsepasture River is very special, particularly for its recreational and scenic value.

In a country known as "the land of the waterfalls," the waterfalls of the Horsepasture River stand out as the most spectacular. Horsepasture River Gorge is the most rugged of those in the Blue Ridge escarpment. It has the highest and steepest walls and it is the narrowest. In just 4 miles, the river drops 1,700 feet off the Blue Ridge escarpment into rocky gorges through rugged terrain, spilling out into Lake Jocassee in South Carolina. Many people have said the most impressive of the river's attractions is the 200-foot Rainbow Falls, a mini-Niagara named for the rainbow that can be seen in the mists above the falls.

Extensive woodlands and rough terrain in the Horsepasture River area is home to varied and abundant wildlife populations. Black bear are present and heavily hunted. Deer, turkey, racoon, grouse, and grey squirrel are abundant as well. More than 20 fish species, four of which are of special concern, have been identified in the river, classified by the State as "designated trout waters."

For generations, the river has been a favorite of hikers, swimmers, fishermen, campers, and picnickers. On a typical summer weekend, as many as 300 visitors hike the narrow, unmarked trail to Rainbow Falls and to the other waterfalls, swimming and fishing holes, and picnic sites that surround it. The river is famous among fishermen in the region for its fine trout fishing.

Efforts to preserve Horsepasture River began in August 1984 when the Federal Energy Regulatory Commission gave preliminary approval to Carrasan Power Co.'s application for a license to dam the Horsepasture River at Drift Falls and to divert the river to a powerhouse below Windy Falls. After this happened, North Carolinians united to preserve the Horsepasture in its wild and scenic state.

Last year, Congress approved a request for $1 million to purchase 435 acres of privately owned land along the Horsepasture, helping clear the way for wild and scenic river designation. By including the Horsepasture in the National Wild and Scenic River System, the Congress will cut short the 3-year study of the river it directed in 1984.

Having been born and bred in North Carolina, and representing North Carolinians in the U.S. House for over 23 years, I will certainly not deny my strong love and devotion to this part of the country. I believe the State of North Carolina has a well-deserved reputation for providing Americans nationwide with a place to go to enjoy the beauty of our country—our mountains, our oceans, our woods, our wildlife, and our rivers.

Over the years, it has been rewarding for me to see more and more people moving to our State, particularly young families, motivated in part by the temperate climate and natural resources. I believe it is important to preserve for our children and future generations the spectacular natural beauty of this area that has enriched the lives of so many generations before us.

I want to reiterate my deepest support for the inclusion of the Horsepasture River in the National Wild and Scenic Rivers System and your favorable consideration of H.R. 2826.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE CALENDAR

Mr. CHAFEE. Mr. President, I inquire of the distinguished minority leader if he is in position to confirm the following nominations in the Executive Calendar: 1075, 1076, 1127, 1128, and 1129?

Mr. BYRD. Mr. President, the nominations that have been identified by the distinguished acting Republican leader have been cleared on this side of the aisle. We are ready to proceed to their consideration and confirmation.

Mr. CHAFEE. I thank the distinguished Democratic leader.

EXECUTIVE SESSION

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Senate now go into executive session in order to confirm the nominations just identified, and I ask unanimous consent that they be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered en bloc and confirmed en bloc are as follows:

UNITED NATIONS

Joan Clark, of California, to be an Alternate Representative of the United States of America to the Forty-first Session of the General Assembly of the United Nations.

The following-named persons to be Representatives and Alternate Representatives of the United States of America to the Forty-first Session of the General Assembly of the United Nations:

Representatives: Vernon A. Walters, of Florida; Herbert Stuart Okun, of the District of Columbia; Thomas F. Eagleton, U.S. Senator from the State of Missouri; and Larry Pressler, U.S. Senator from the State of South Dakota.

Alternate Representatives: Patricia Mary Byrne, of Ohio; Hugh Montgomery, of Virginia; Joseph Verner Reed, of New York; John Kerry, U.S. Senator from the State of Massachusetts; and Paul S. Trible, Jr., U.S. Senator from the State of Virginia.

EXECUTIVE OFFICE OF THE PRESIDENT

Jorge L. Mas, of Florida, to be a Member of the Advisory Board for Radio Broadcasting to Cuba for a term expiring August 12, 1989. (Reappointment)

WORLD HEALTH ORGANIZATION

Frank E. Young, of Maryland, to be Representative of the United States on the Executive Board of the World Health Organization, vice Edward N. Brandt, Jr., resigned.

DEPARTMENT OF AGRICULTURE

Peter C. Myers, of Missouri, to be a Member of the Board of Directors of the Commodity Credit Corporation, vice John R. Norton III, resigned.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. CHAFEE. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon is recognized.

HOUSE CONCURRENT RESOLUTION 395—RELATING TO TAX REFORM ACT

Mr. PACKWOOD. Mr. President, shortly I am going to propose a unanimous-consent request relating to the concurrent resolution, not to be confused with the continuing resolution. The concurrent resolution is the resolution that makes technical correction in the tax bill which is still to be sent to the President. It has not yet been enrolled, and it is being held to see if this concurrent resolution can pass.

The reason I am not going to make it now is I think there may be some objections to consent, and I do not want to shutoff anyone's rights to make objections to it. I want to lay out the groundwork a bit as to what I will try to do if we get consent.

First, there is in the tax bill many—I do not want to say numerous—but many technical errors, unintended. They affect the following States, and I say there is no objection to the correction of these errors in the concurrent resolution. They affect: Arizona involving general aviation airplanes; California involving Campbell Soup Co.; Los Angeles Central Library; Bell Gardens bonds; San Jose Convention Center; and city of Berkeley bonds.

They affect Colorado; the Colorado School Boards bond pool.

They affect Connecticut, the Bigelow-Hartford Carpet Mill; John Fitch Court; State of Connecticut bonds; and Yale University.

In Delaware, Campbell Soup Co.

In District of Columbia, Willard Hotel.

In Florida, Campbell Soup Co.; Miami Airport bonds; Hernando County bond pool; and Santa Rosa Hotel in Pensacola.

In Georgia, sewage treatment plant in Conyers; Marquis Two projects in Atlanta; Georgia municipal bond pool.

In Illinois, Homewood municipal bond pool.

In Indiana, Indianapolis Union Station; Fort Wayne low income/rehab. project; and Indiana Bank bond pool.

In Kentucky, Kentucky Assn. of Counties bond pool; Kentucky Municipal League bond pool; and East Broadway project.

In Louisiana, retirement center in New Orleans.

In Maine, Bethel cogeneration facility; and Back Bay Tower.

In Maryland, again the Campbell Soup Co.

In Massachusetts, solid waste facility in Haverhill; electric power facility; cogeneration facility in Turners Falls; and Columbia Point Project in Boston.

In Michigan, Muskegon cross lake ferry.

In Minnesota, fiber optic network; Campbell Soup Co.; solid waste facility in Dakota County; satellite industries in Minneapolis; Coch oil refining facility; and River Place.

In Mississippi, Crown Cork and Seal in Batesville.

In Missouri, Kansas City Southern Industries.

In Nebraska, ethanol plant in Blair; and Campbell Soup Co.

In Nevada, electric plant bonds.

In New Hampshire, 2 waste energy projects.

In New Jersey, Campbell Soup Co.

In New Mexico, New Mexico hospital bond pool.

In New York, Flushing Center; 125th Street project; and New York hospital bonds.

In North Carolina, Campbell Soup Co.; South Pack Plaza; and North Carolina Municipal League bond pool.

In Ohio, Campbell Soup Co.

In Oklahoma, Oklahoma State University; and OK Industries.

In Pennsylvania, Campbell Soup Co.; Wood Street Commons project; mattress factory project; Ransom culm facility; Frankford Arsenal; Pennsylvania local government bond pool; and Pennsylvania university bonds.

In Rhode Island, Providence Union Station; and Plat 141 in Newport.

In South Carolina, Charleston solid waste bonds.

In Tennessee, 3 solid waste facilities; Warehouse Row project in Chatanooga; Carriage Trace in Clinton; Tennessee Student Loan bonds; Tennessee Municipal League bond pool; and Tennessee Utility Districts bond pool.

In Texas, Campbell Soup Co.

In Utah, Utah Municipal Finance bond pool.

In Vermont, Bellows Falls building project.

In Virginia, Tobacco Row bonds.

In Washington, Nichols Boar; and Bonneville Power bonds.

In Wisconsin, fiber optic network.

Mr. President, I know of no objection to the technical corrections in that list. I think they have been cleared all around and people know about them. They are genuinely technical.

In addition when I propose my unanimous-consent request there will be the following amendments you can call substantive if you want or technical if you want. One will delete the market bond discount provisions which is limited to 15 life insurance companies and their affiliates and add a revenue-neutral generic rule for all life insurance companies.

This was a mistake we made in the tax bill in allowing only 15 very large insurance companies to provide the market discount bonds and there are literally hundreds, perhaps thousands of smaller insurance companies that were denied the privilege. This will make the generic for all of them. I know of no objection to that.

We will next retain the current law for travel expenses for State legislators, the current law. As the House sent us the bill, they sunset that provision in 1990; we keep the current law, no change. I know of no objection to that. In fact many, many Senators have contacted me on behalf of their State legislators and asked for no change.

Next, we would liberalize the low-income housing transition relief for rural projects assisted under the Farmers Home Administration, clarifies the at-risk rules, applies to real estate generally and also low-income housing project eligible to the low-income housing project. That is about $20 million. I know of no objection to that.

Next, we will change the effective date for the employer-owned life insurance provision from June 20, 1986, to the date of enactment of the Tax Reform Act. I know of no objection to that.

Next, we will reinstate the Senate-passed rule on trucking company transitional rule but limit the value of $8.5 million which is one-half the full value. When we initially passed in the Senate, it was at full value. I know of no objection to that.

We will make the general aviation transitional rule generic, and I know of no objection to that.

There is one provision that is controversial in the sense there are opposite sides on it, and it relates to the custom broker freight forwarder provision. That is a provision the substance of which I agree with. I think it is a good position, and I think it is a proper competitive position, and on the merits, I would support it. But it is

within the Commerce Committee's jurisdiction. It was put in unbeknown to me. I feel a bit embarrassed about it and I certainly did not mean to trample on the jurisdiction of my good friend, Senator DANFORTH, who is the chairman of the Commerce Committee. I chaired that committee for 4 years prior to the Senator DANFORTH, and he is justifiably upset about that provision having been put in without his knowledge and without my knowledge.

So my unanimous-consent request, when I make it, will be to delete that provision even though I agree with the substance of it, and if we were doing it on the merits, probably I would support it.

That, Mr. President, is the sum and substance of the amendments that I will offer.

I say the long list that I read of the different States affected I know of no objections to.

Here is the problem we have. Anybody, of course, can object to the unanimous-consent request, and I do not want this concurrent resolution and will not let this concurrent resolution become a vehicle for simply relitigating everything on the tax bill, whether that be passive losses or book income for corporations or anything else. Those issues are done. We have had fair debate and full debate, conference, and we passed it.

So if there is objection to the unanimous consent, it is my intention for the moment not to go ahead. I may offer it 2 or 3 hours later when we can see if we can work out what objections there may be to the unanimous consent. If not, I will offer it again 2 or 3 hours later. If we cannot get unanimous consent, I will not offer it at all.

So with that in mind, I am now going to propose the unanimous consent.

Do you want to wait until I propose it?

Mr. METZENBAUM. I think I would like to ask you to withhold for a minute.

Mr. PACKWOOD. All right.

Mr. METZENBAUM. As the chairman of the Finance Committee knows, his staff and my staff have been in discussions on this subject for some time. Then the other day, I gathered at one point that the chairman had decided not to even make the effort to go forward, and now he has decided to go forward. I have no objections to his doing that.

However, I would object if the unanimous-consent request were propounded at this point, notwithstanding the fact that we need the bill and I do not want to stand in the way of its passage. However, at the very moment when I was called to the floor, my staff and your staff were in discussion on the subject. I have the feeling that we are not that far apart that we may not be able to resolve our differences.

So, rather than object to the unanimous-consent request at this point, I would request the chairman of the Finance Committee—and if he did, I would have to object—but I would request that you delay that temporarily because if we could work it out, I would think that the whole matter would fly very rapidly and it would not require much time at all.

Mr. PACKWOOD. Given that, I will not propound it. I want to say that the Senator from Ohio has been very fair on this. He and I actually agree on the substance of the provision I am trying to strike out. I am attempting to do it as a matter of comity to the chairman of the Senate Commerce Committee.

Given that, I will not propose it at the moment. But I do appreciate the fact that the Senator from Ohio has been very open and very fair. I think we may be close to an agreement on this.

But I would like, because I see a number of other Senators on the floor—I am not going to propose the request right now—but I do want to find out if others are going to have objections to the request when it is proposed, unrelated to this issue. So we might have a colloquy on that.

Mr. METZENBAUM. If the Senator will yield further, I would want to indicate some concern. I am not opposed to making the general aviation conditon generic, although I think the whole proposition is a very bad one. I do not think it is a right one and I indicated that the other day. But I still would not object to making it generic provided that the chairman of the Finance Committee would indicate where he is going to pick up that money, because there is a cost of doing that. It is not a tremendous amount, but sometimes we fight out here for about $1 million, $2 million, $5 million. This is about $11 million.

Mr. PACKWOOD. I would be happy to do that while we are discussing the other issues. I will try to find out what objections there may be from other Senators on other issues.

Mr. METZENBAUM. We will be in further discussion with the chairman to see if we can get all issues resolved.

Mr. PACKWOOD. I thank my good friend.

Mr. EXON. Will the chairman yield for a question?

Mr. PACKWOOD. Yes.

Mr. EXON. I want to salute the chairman of the Finance Committee for the outstanding job that he has done all the way through on this. I think he would like to hear some good news. I sense a general feeling from most Senators that this is a tremendously important part of the overall tax bill and it should be passed. I think there is a developing consensus to move just as quickly as possible.

At this particular time, I just have one question that we might clear up now. This Senator has written the Senator from Oregon a letter with regard to one portion of the technical corrections part of this legislation that had to do with what we thought could possibly be an unfair proposition benefiting Louisiana and Texas with regard to some type of promotion with regard to football. I am wondering if that particular part has been removed or will we be required to try to get that removed with an amendment?

Mr. PACKWOOD. That relates to the sky boxes?

Mr. EXON. That is correct.

Mr. PACKWOOD. That is removed.

Mr. EXON. I thank my friend.

Mr. MELCHER. Mr. President, will the chairman yield?

Mr. PACKWOOD. Yes.

Mr. MELCHER. I assume that what is in House Concurrent Resolution 395 is revenue neutral.

Mr. PACKWOOD. No; I think it is not revenue neutral.

Mr. MELCHER. Can the chairman advise me what revenue loss there is?

Mr. PACKWOOD. About $100 million.

Mr. METZENBAUM. How much?

Mr. PACKWOOD. Total, about $100 million. These were, I would say, errors in the tax bill. Had they been included in the tax bill, they would have been within our definition of revenue neutrality in the bill itself. So we are correcting errors. We are directing the enrolling clerk to make these changes in the tax bill.

Mr. MELCHER. Then, am I to interpret the chairman's response that passage of this as it stands would be a loss of $100 million in revenue?

Mr. PACKWOOD. As it stands. Had it been appended to the tax bill, which it was intended to be, and had there not been technical errors, then it would have still been revenue neutral. But, standing by itself, that is correct.

Mr. MELCHER. Well, when this catches up with the tax bill, the outcome of what is over in the House now and already passed by the Senate, in addition to House Concurrent Resolution 395, how would it become revenue neutral?

Mr. PACKWOOD. Because, when we were estimating revenue neutrality over a 5-year period, we tried to come as close as we could to hitting revenue neutrality, realizing that we would be collecting over the 5 years almost $5 trillion. The $100 million that is in this, if it were in the tax bill, would still be within the margin of error we had for revenue neutrality.

Mr. MELCHER. If the chairman would continue to yield, there is an amendment he has proposed and is not before us—I believe an amendment of some 22 pages. Is it revenue neutral?

Mr. PACKWOOD. Pardon me?

Mr. MELCHER. Is the amendment that the chairman would propose revenue neutral?

Mr. PACKWOOD. No, it is not.

Mr. MELCHER. Do we have a figure on that?

Mr. PACKWOOD. Rougly $50 million to $55 million.

Mr. MELCHER. Might I advise the chairman that I have grave concerns about dropping income averaging for farmers that was provided in the bill as it left the Senate. As I recall, the revenue loss was something between $75 million and $100 million; am I not correct?

Mr. PACKWOOD. I thought it was closer to $300 million, but I am now reaching back in my memory and I cannot recall.

Mr. METZENBAUM. I believe it was my amendment and I think that we recommended $250 million over the period.

Mr. MELCHER. Well, I thank the Senator from Ohio for his comments. But I believe we had to revise the amendment before we finally got done with it.

But, at any rate, I must advise the chairman that I would want that considered when this is called up.

Mr. PACKWOOD. Let me say to the Senator from Montana, I do not plan to have it as one of the amendments I will offer. If the Senator from Montana is starting he will object to the unanimous-consent request and will until it is offered, then I think there is no point in going on with the unanimous-consent request and we will pull it down.

Mr. LAUTENBERG. Would the chairman yield for a question?

Mr. PACKWOOD. Yes, I am happy to yield.

Mr. LAUTENBERG. I just wanted to make the chairman aware of an interest that I have, though I understand the unanimous-consent request is not going to be offered at this moment, in a transition rule for a U.S.-flag car carrier vessel. It is one of four that are presently being built. Three would be permitted the opportunity to preserve some investment tax credits. The one that is left out is the vessel of New Jersey-based Marine Transport Lines. I just wanted to make the chairman aware of the fact that I have an interest in this and would appreciate the opportunity to discuss it.

This is not meant to object in advance to a request but just to alert the chairman to my interest.

Mr. PACKWOOD. I would be happy to discuss it again with the Senator from New Jersey. He has been very cooperative in the whole process. I would be happy to discuss it.

Mr. LAUTENBERG. I thank the chairman.

Mr. METZENBAUM. Would the chairman yield for a question?

Mr. PACKWOOD. I would be happy to yield for a question.

Mr. METZENBAUM. There is a new provision in there for WPPSS.

Mr. PACKWOOD. For whom? WPPSS? It is not ours.

Mr. METZENBAUM. It came over from the House. My understanding is WPPSS received favorable treatment in other areas of the bill but noe in the concurrent resolution it would exempt $2 billion for advanced refunding bonds from the State-by-State volume caps and the rule limiting the amount of refinancing bonds to the value of the project.

My question is how much would that cost? It seems to me it looks like a pretty costly procedure.

Mr. PACKWOOD. That is in the House concurrent resolution. It is not in the Senate bill. I will see if I can find out what it does cost.

About $50 million.

Mr. METZENBAUM. Over 5 years.

Mr. PACKWOOD. Yes.

Mr. METZENBAUM. Does it have a continued cost beyond that period?

Mr. PACKWOOD. That I cannot answer. That is in the House bill. It is not in the concurrent resolution we are sending back.

Mr. METZENBAUM. It is not in this concurrent resolution?

Mr. PACKWOOD. Let me correct the mistake. It is in our resolution going back. I apologize.

Mr. METZENBAUM. I guess it only goes to prove that the chairman and I have both can find mistakes. We have bills. We write letters. And sometimes we do not know. There is no problem about that.

But I think we would have some concern about that. We might discuss that further.

Mr. PACKWOOD. That is fine.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I rise as a member of the Finance Committee, and one of the conferees on this legislation, to express to the chairman or perhaps more accurately to the staff of the committee my amazement that the concurrent resolution of technical corrections is only 60 pages long. As the distinguished Presiding Officer knows, this is the most comprehensive change in the Federal Tax Code in half a century. In ways it is the most important event since the introduction of the income tax system in 1913.

It involved a complete revision of the code. And it is a massive document, done under the very normal pressures of time that are associated with the ending of a Congress, and would exist in any event work having to be done.

I would like to say I think it is a good job. It speaks to the quality of the original product. There are mistakes.

I have to note that there is a provision as is well understood, a transition rule in the existing bill to enable the rehabilitation of Carnegie Hall in New York City to go forward with an accompanying development of an office building with the proceeds to be used for the hall. Carnegie Hall is one of the, by general agreement, foremost acoustically near-perfect halls in the world. Everything is known about the quality, but somehow or other we got the address wrong. [Laughter.]

Mr. PACKWOOD. If my good friend will yield, what happened—and I feel sorry for those poor devils that are working on the computers. They have been at it 14, 15 hours a day. We are shoveling material into them. They make 1 mistake in 500 as they are keypunching. Many of them we catch when we read. Some of them we do not. I can appreciate the fact there are relatively few errors in a massive bill made by technicians who were overworked, harassed, and with us calling them up all the time saying, "Why can't you do this faster?"

Mr. MOYNIHAN. Or alternately, we would finish at 2 o'clock in the morning, stumble home, leave it to them to have it ready for us at 8 o'clock the next morning, and they would not go home at all. It turns out Carnegie Hall is at 7th Avenue and 57th Street. That will not be corrected.

These are clerical changes in situations where the meaning of the law was clear, and where I do think there are a number of areas where our clear intention was not in the law. So it is not exactly clerical. As for example, the generic provision on the sale of mortgage discount bonds, we now make that a general entitlement of insurance companies rather than listing the 16 or 17 and leaving out 10 or 12 we did not know about.

Mr. PACKWOOD. I know of no objection to that amendment.

Mr. MOYNIHAN. I know of no objection whatever. We thought we were doing what we now do. So we have changed, Mr. President, and corrected some addresses. We have made more explicit our intention. We have fulfilled our legislative intention with respect to a few matters.

Mr. PACKWOOD. I might pass along a story of the staff. One morning I called over the Finance Committee and I asked for Karen. They said, "Sir, she is not here." I said, "It is 9:15." "Well, she didn't go home until 4 o'clock last night." They said, "Lindy is here. She didn't go home at all."

So indeed we do work morning, noon, and night, and all night on many occasions.

Mr. MOYNIHAN. And with extraordinary devotion from these public servants. None of us who has been

through the experience can have anything but a saddened awareness of what the years have wrought on our capacities, and we see what people 40 years and 30 years younger can do. But also it cheers you up and you might think it is not just entirely age but maybe they are better educated. Even, Heaven knows, although biologists would probably argue, they may even be smarter. But certainly we are in their debt.

Certainly I would like to say to the chairman, and could I ask him? Is it his plan? Are we in a position just to go forward now?

Mr. PACKWOOD. No. We are not. I am going to withhold several hours to see if we can work out two or three questions that were raised by the Senators from New Jersey and Ohio, and see if we can work them out. I would not blindside anybody. I will come back at 2 o'clock or 2:30 to see if we can pose a unanimous consent again. They may flush out somebody else that has a problem.

I will say this. It is now Wednesday. I assume we are leaving Friday or Thursday night or Friday morning or something like that. The Senator from New York has been very good about this. We cannot use this vehicle to start reopening the passage of those provisions and all the other provisions.

If the choice is that or not getting this vehicle through, I would rather not get the vehicle through.

Mr. MOYNIHAN. No. Mr. President, the tax bill has been written and enacted by the Congress. It remains to be signed by the President. We went through 2 years. We do not have it in us to go through again and ought not. The agreement was reached in full and plenary session in both bodies, and for a profound series of changes to be made now under the threat of a deadline would fail in our democratic responsibilities to our colleagues, and to the American citizens who understand that this has happened and now expect to live under this new regimen. I hope they will welcome it as we have sought to make them do.

Mr. PACKWOOD. I thank my friend from New York. Again, I thanked him many times before, and not often enough in public. He was one of the original core group, and stuck with us, and stuck with us, and stuck with us on every vote. I appreciate very much not just his help but his leadership.

Mr. MOYNIHAN. I thank my friend.

Mr. PRYOR addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. PRYOR. Would the distinguished chairman, the Senator from Oregon, yield for a question?

Mr. PACKWOOD. Yes. I would be happy to.

Mr. PRYOR. There are two areas that I frankly do not quite understand, and this point may have been raised previously. I am sorry I was not in the Chamber. One is relative to the issue of airplanes bought in certain States. I am sorry I do not have the language. They are making a copy.

Mr. PACKWOOD. We are going to make that generic. It will cover both Arkansas and Delaware as equally as it covers the planes manufactured in other States.

Mr. PRYOR. For example, more specifically, we have a Falcon jet plant in Little Rock. I think the chairman has been made aware of our stituation.

Mr. PACKWOOD. It will be covered the same as a plant in Kansas would be covered.

Mr. PRYOR. So there would be no plant in the country that would get favorable treatment over another facility?

Mr. PACKWOOD. That is correct.

Mr. PRYOR. I thank the chairman for yielding.

The second question, Mr. President, I have for the Senator from Oregon relates to the issue of athletic scholarships and moneys given to athletic programs.

I talked on many occasions with our athletic director coach, Frank Broyles. He is very concerned and upset with the IRS ruling which precludes deductions from taking place in the athletic programs. I am wondering how this treats that specific area.

Mr. PACKWOOD. The way we are going to treat that is the same as pertaining to band scholarships. You will recall in the bill tuition scholarships are not taxed, but money above tuition is taxed. The same rule will apply whether you have a band scholarship or a football scholarship. To the extent it is above the tuition, it is taxed, but it would be taxed for everybody else also, whether it is athletic or not.

Mr. PRYOR. Is the chairman saying that no specific schools are spelled out?

Mr. PACKWOOD. The only schools that were spelled out related to sky boxes, and that was in Louisiana and Texas. Those are stricken out. That does not relate to scholarships. That related to the sky boxes in their coliseums. They were stricken out.

Mr. PRYOR. I wonder if any thought was given just to repealing the IRS regulation relating to forgiveness. Was any thought given to that?

Mr. PACKWOOD. It was given to it. It had a variety of permutations. One was scholarships. Another was a donor who gives $5,000 to a university and in exchange gets two free athletic tickets.

We went to Boise State on behalf of Senator SYMMS and reviewed their problem. They had a unique problem. The building was built as a principal entertainment center for the city, not just the college. Thought was given to that, but it was not repealed because there was a feeling that you are giving, and in fairness it is probably true, you are giving a fair amount of money but you were getting a quid pro quo back. It was not like a normal charitable contribution. So we did not attempt to repeal that, per se.

Mr. PRYOR. I thank the distinguished chairman. I congratulate the chairman, the Senator from Oregon, for his leadership during this entire year. It has been absolutely something we never thought would happen. I do not think this would have happened without his leadership, patience, and understanding. I know as a member of the committee he always extended me the utmost courtesies and understanding. I know it is a very difficult time.

Mr. PACKWOOD. I thank the Senator.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask that further proceedings under the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LUGAR). Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. DOLE. Mr. President, as I understand, all the principal players are now here on Calendar No. 1007, H.R. 5465, the appliance bill, and I hope that we can get some time agreement on that. I am also hopeful that we could get an agreement on the Executive Calendar. If we could do that, that would dispose of all but three or four nominations, and we are working on those. I think two have holds on this side. We are not going to honor holds. First, let me make the request on H.R. 5465.

I ask unanimous consent that the Senate now turn to Calendar No. 1007, H.R. 5465, the appliance bill, and it be considered under the following time agreement:

That the committee reported amendment be considered agreed to, and there be:

One hour on an amendment to be proposed by Senator GRAMM, for himself and Senator NICKLES, with time to be equally divided between Senator GRAMM and Senator JOHNSTON or his designee. Following the expiration of the hour allotted for debate on the Gramm amendment, I ask that Senator GRAMM be recognized only for the purpose of withdrawing his amendment, and that no amendments be in order, and no intervening motion be in order;

Following disposition of the Gramm amendment, I further ask unanimous consent that no amendments be in order other than two amendments to be offered by Senator McCLURE, and one amendment by Senator EVANS, and that no amendment to these amendments be in order;

Following the disposition of the two amendments described above, I ask unanimous consent that the Senate then proceed immediately with no intervening motion, to third reading, and final passage, without any intervening action or debate, and that no motions to recommit be in order.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, I will not object. This agreement has been carefully agreed upon on this side.

As I understand it, there will be some debate on the fuel use amendment but it will be withdrawn; there will be no vote on it, so I have no objection to the agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY CONSERVATION STANDARDS FOR APPLIANCES

The PRESIDING OFFICER. The clerk will report the bill.

The assistant legislative clerk read as follows:

A bill (H.R. 5465) to amend the Energy Policy and Conservation Act with respect to energy conservation standards for appliances.

The Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources, with an amendment, on page 61, stike line 7, through and including line 11, which reads as follows:

The Federal Energy Regulatory Commission shall, not later than 60 days after the date of the enactment of this Act, issues a final order in ANR Pipeline Company, FERC Docket No. RP 82-80, filed April 30, 1982.

Mr. EVANS addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. Mr. President, I ask unanimous consent that we reverse the order of the unanimous consent agreement to take up Senator McCLURE's and my amendments prior to the time that Senator GRAMM takes up his amendment just in order to save time.

The PRESIDING OFFICER. It there objection? Without objection, it is so ordered.

The Senator from Washington.

AMENDMENT NO. 3406

Mr. EVANS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The Assistant legislative clerk read as follows:

The Senator from Washington (Mr. EVANS] proposes an amendment numbered 3406:

On page 40, line 18, after "regulation" insert the following: "effective on or after January 1, 1992".

Mr. EVANS. Mr. President, this is a technical amendment that brings the date of the television appliances into conjunction with the dates that are set for other elements of the bill.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 3406) was agreed to.

AMENDMENT NO. 3407

Mr. EVANS. Mr. President, I send an amendment to the desk on behalf of Mr. McCLURE, for himself, Mr. KASTEN, and Mr. PROXMIRE, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. EVANS], for Mr. McCLURE and others, proposes an amendment numbered 3407.

Mr. EVANS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

"SEC. 12. FERC REQUIREMENT.

(a) Notwithstanding any other applicable provisions of law, on November 17, 1986, or within 10 working days thereafter, the Federal Energy Regulatory Commission shall, in the case of ANR Pipeline Company, FERC Docket No. RP82-80, filed April 30, 1982, publish a schedule for issuing a final order in such case, which schedule shall provide for such order to be issued not later than February 28, 1987. Such schedule shall include an opportunity for an oral argument prior to issuance of such final order, as requested by one or more of the parties, unless the Commission determines that such argument would not assist the Commission in deciding such case.

(b) Except as expressly provided in subsection (a), nothing in this section shall affect—

(1) any Stipulation and Agreement reached by the parties in such case or any applicable provisions of law with respect thereto;

(2) the right of any party to such case to appeal the final order issued in such case in accordance with the applicable provisions of law; or

(3) any other applicable provisions of law with regard to any such ruling or order."

Mr. KASTEN. Mr. President, I ask the Senator from Idaho, am I correct that subsection 12(a) requires the Commission to publish a schedule for issuing a final order in FERC Docket No. RP82-80 and that such schedule shall include an opportunity for an oral argument in front of the Commission before such order is issued, unless the Commission determines that such oral argument would not assist the Commission in deciding the case?

Mr. McCLURE. The Senator is correct.

Mr. KASTEN. Am I not correct that although this subsection allows the Commission to not hold oral argument before issuing an order in this docket, that it is your understanding and firm belief that oral argument is critical and essential to the Commission's understanding of the case and therefore would be of great assistance to the Commission in deciding this case?

Mr. McCLURE. The Senator is correct.

Mr. KASTEN. With that understanding I believe that this amendment addresses my concerns in this matter.

Mr. PROXMIRE. I agree with the statement of my colleague, and I move the adoption of this amendment.

Mr. KASTEN. I second the motion.

Mr. JOHNSTON. Mr. President, I want to comment briefly on one aspect of the amendment to H.R. 5465 offered by the Senator from Idaho [Mr. McCLURE]. The amendment includes a new section 12 which directs the Federal Energy Regulatory Commission [FERC] to act on a pending rate case. The amendment directs FERC to publish a schedule for issuing a final order no later than February 28, 1987 in the case of ANR Pipeline Co., docket No. RP 82-80.

When H.R. 5465 passed the House of Representatives it included a provision requiring FERC to take action in the same rate case within 60 days after the date of enactment. That provision was dropped when the Energy and Natural Resources Committee considered H.R. 5465 because of our desire to expedite action on the underlying National Appliance Standards Act. The provision has reemerged in the McClure amendment, but in modified form. The modifications are the subject of my comments.

First the amendment requires FERC to include an opportunity for an oral argument prior to issuance of its final order, as requested by one or more of the parties in the pending case, unless the Commission determines that such argument would not assist the Commission in deciding such case. I fully expect the Commission to hold such an oral argument; indeed, I urge them to do so. The case has significant ramifications for the parties involved, and could have the effect of shifting significant costs from customers in one State served by ANR to customers in another State. While I realize that it is rare for FERC to hold an oral argument in rate cases, I believe that an oral argument is justified in light of the fact that we are legislating a dead-

line by which they must make a decision.

The amendment also includes a provision protecting the stipulation and argument entered into by the parties in the case. The amendment requires that the decision FERC makes in the case shall not affect the stipulation and agreement. It is our intent that the decision shall not affect the timing and judicial review provisions that were included in the stipulation and agreement. All of the parties in the case participated in the negotiations that led to it; the Commission itself approved it. We certainly do not intend for it to be upset by the requirement that the Commission issue a final order by the date specified.

The House-passed provision did not have either of these requirements; I believe that both requirements represent a reasonable accommodation between those who would expedite the FERC's decisionmaking process and those who would prefer to have the case drag on. Within this framework, Mr. President, the Commission will have an opportunity to reach an equitable decision in this important matter.

Mr. EVANS. Mr. President, this is an amendment that has been worked out with the Senators from Wisconsin and with the chairman of the committee. I urge its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment.

The amendment (No. 3407) was agreed to.

AMENDMENT NO. 3408

Mr. EVANS. Mr. President, I send an amendment to the desk on behalf of Senator McCLURE and Senator SYMMS.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. EVANS] for Mr. McCLURE and Mr. SYMMS, proposes an amendment numbered 3408.

Mr. EVANS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

"SEC. 13. MISCELLANEOUS.

(a) FERC ORDER.—Notwithstanding any petition filed by the Idaho Power Company on November 26, 1984 with the Federal Energy Regulatory Commission for a declaratory order concerning an Agreement dated October 25, 1984 (Exhibit A, Petition of Idaho Power Company for Declaratory Order, Docket No. EL-85-38-000) relative to the projects of such company specifically referenced in the petition, the Federal Energy Regulatory Commission is only authorized and directed, in lieu of the petition request, to issue an order within 90 days after enactment of this Act under the Federal Power Act that such Agreement shall not be considered by the Commission in any subsequent proceeding before the Commission during the remaining term of the licenses applicable to such projects, to be (1) inconsistent with the terms and conditions of such licenses concerning project property or the utilization thereof; or (2) imprudent for purposes of section 205 of the Federal Power Act.

(b) SAVINGS PROVISION.—Nothing in this section or in any order issued by the Commission pursuant to this section, shall be construed as affecting any stipulation or other agreement entered into with the State of Idaho or the Idaho Power Company prior to enactment of this section relating to any fish and wildlife matters affected by any such project. Except as expressly provided in subsection (a), nothing in such subsection shall affect the application or requirements of section 10 of the Federal Power Act or any other provision of such Act to any person or project."

Mr. McCLURE. This amendment authorizes and directs the Federal Energy Regulatory Commission to issue an order in lieu of the order requested, in its Docket No. EL 85-38-000 that the agreement of October 25, 1984, shall not be found to be inconsistent with the terms and conditions of the existing licenses referenced, concerning project property (including water rights) or the utilization thereof or imprudent for the purposes of section 205 of the Federal Power Act on the basis of the agreement. The agreement of October 25, 1984, was executed by the State of Idaho and Idaho Power Co. It resolved major issues concerning existing and future uses of the resources of the Snake River and will result in the dismissal of pending litigation between the utility and thousands of individual defendants.

The savings provision of subsection (b) makes it clear that the Commission's authority to act on matters not covered in the agreement will not be affected by this section. This section also is intended to be perfectly clear that any basis, other than the agreement, for challenging or changing the term and conditions of such licenses or for the purposes of section 205 of the Federal Power Act is unaffected.

I would like to express my appreciation to my colleagues Senator SYMMS for his help in this matter, as well as the assistance of Congressmen CRAIG and STALLINGS. This is a matter in which the Idaho delegation is unanimous in its support. I would also like to thank representatives of the Idaho Governor's office, the Idaho Attorney General's office and of the Idaho Power Co. for their cooperation. Finally, Congressmen DINGELL and MARKEY and their staff have been instrumental in this process and their efforts are greatly appreciated. I ask unanimous consent that a letter from Chairman DINGELL in support of this amendment be included at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON ENERGY AND COMMERCE,
RAYBURN HOUSE OFFICE BUILDING
Washington, DC, October 9, 1986.

Hon. JAMES A. McCLURE,
Chairman, Senate Committee on Energy and Natural Resources, Dirksen Senate Office Building, Washington, DC.

DEAR JIM: It was a great privilege to work with you in conference on the hydro relicensing bill and the reconciliation legislation. You are an excellent conference Chairman and a good friend.

I understand that in connection with H.R. 5465, the House-passed appliance legislation, Congressman Stallings and you have suggested a germane Senate amendment seeking to settle, on a one-time basis, a petition pending at the Federal Energy Regulatory Commission (FERC) since 1984 concerning several licensed projects in Idaho. As I understand the proposal, it is unique and not precedent-setting. It relates to an agreement that enjoys broad support in the state and will not affect any existing or future actions relative to fish and wildlife resources of the area. Most importantly, it does not affect the application or requirements of section 10 of the Federal Power Act, including existing section 10(a) and the new section 10(j).

The proposal, as worked out with participation of our Committee staff, appears workable, limited, and acceptable. Most importantly, it is not a precedent for similar amendments in the future which is clearly a concern we both share. For these reasons, I can accept it and support it when the bill is returned to the House. I know that Subcommittee Chairman Markey, who also participated in the development of the proposal, shares my view.

I commend you and Congressman Stallings for your joint efforts in working it out and helping to gain passage of the House bill.

With best wishes.

Sincerely,

JOHN D. DINGELL,
Chairman.

Mr. EVANS. Mr. President, this amendment I believe has been cleared by all concerned. I urge its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment? If not the question is on agreeing to the amendment.

The amendment (No. 3408) was agreed to.

□ 1220

Mr. EVANS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRAMM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EVANS. Mr. President, I am pleased that today the Senate is voting on what is almost certainly the most important piece of energy con-

servation legislation in the past decade, H.R. 5465, the National Appliance Energy Conservation Act of 1986.

This legislation really represents the culmination of a process which began in 1975 when Congress passed the Energy Policy and Conservation Act [EPCA] which directed the Department of Energy [DOE] to consider the issue of appliance efficiency standards. In 1978, Congress took an additional step, passing the National Energy Conservation Policy Act [NECPA] which amended EPCA to require that energy efficiency standards be established for each of 13 classes of home appliances which are major consumers of energy. These standards, which were to be designed to achieve the maximum improvement in energy efficiency which the Secretary determines is technologically feasibl and economically justified.

The Department issued proposed standards in 1980 for 8 of the 13 classes of covered appliances. In 1982, the new administration reversed the earlier DOE decision and issued zero-level standard, the so-called no-standard standard. This decision was almost immediately challenged in the courts by the Natural Resources Defense Council [NRDC]. On July 16, 1985, the D.C. Court of Appeals issued a unanimous decision striking down the DOE zero-level standard, and ordered DOE to initiate a new rulemaking to establish substantive standards. The rulemaking is currently underway.

The States also expressed a strong interest in the potential savings which would result from appliance efficiency standards. The most notable example is California, which has developed appliance standards for home appliances which have served as a model for the standards in this bill. I should add that in my own State, appliance efficiency legislation was considered in the State legislature during its last session. I am also aware the current power plan released recently by the Northwest Power Planning Council, there is a provision calling upon the four Northwest States to adopt standards similar to those contained in the bill. Several States have already petitioned DOE for a waiver from preemption from Federal standards, and DOE has granted nearly all of these petitions.

The stage was not set for this legislation and the remarkable coalition which produced it. Manufacturers were faced by the enormous economic difficulties which would result from the fragmentation of the marketplace as each State adopted its own set of efficiency standards. The NRDC and other environmental and conservation groups had long understood the benefits to both the consumer and the environment which would result from substantive standards. Rather than continue to oppose each other, the major appliance manufacturers and the NRDC chose to sit down and negotiate a resolution to the situation. At the end of July an agreement was reached, and the bill now before us represents this marvelous accomplishment.

H.R. 5465 is one of those rare instances when all parties concerned in an issue will benefit from the proposed solution. Under the provisions of the bill, manufacturers will have an achievable, uniform initial standard, and a fixed schedule established for the revision of these efficiency levels, rather than a fragmented, confusing array of changing State regulations. Consumers will also realize significant savings, which have been estimated at nearly $300 per household through the year 2000. Finally, this legislation will provide an important tool to utilities and State regulatory agencies as they anticipate their future energy needs.

Mr. President, I realize that this legislation came at the tail end of our legislative session, but I feel strongly that the benefits which will be achieved by enacting H.R. 5465 make it imperative that we act this year. I remind my fellow Senators that without this legislation, we leave manufacturers and consumers in the worst of all possible worlds. Given past history, it is extremely likely that the standards which are currently scheduled to be released next year by DOE will be challenged in the courts, resulting in increased legal fees and further delays. In addition, it seems certain that more States will move to establish their own efficiency standards, joining the seven States which have already done so. Manufacturers costs will rise dramatically, resulting in increased costs to consumers over and above what they will save from reduced energy use.

Finally, Mr. President, I would like to acknowledge the spirit of cooperation which has characterized the movement of this bill to the floor. I have appreciated the willingness of the chairman of the Energy and Natural Resources Committee, Senator McCLURE, to schedule quick hearings and markup. I would also like to thank the Ranking Member of the Committee, Senator JOHNSTON, whose staff has been very helpful in this effort.

Mr. President, I fully expect that after we act favorably on this bill, the House will join us in approving it, sending a strong message to the President and the American consumer that energy conservation remains truly our most cost-effective energy resource.

DEFINITION OF AFUE

Mr. JOHNSTON. Mr. President, the definition of annual fuel utilization efficiency [AFUE] in H.R. 5465 makes certain assumptions about the locations where furnaces and boilers are installed and about the source of air used by nonweatherized furnaces for combustion and ventilation. Is it the Senator's understanding that these assumptions were made solely so that the meaning of the initial standards for furnaces and boilers prescribed in section 325(f) is clear to the manufacturers who must design products to meet the standards, and to those charged with the enforcement of the standards?

Mr. EVANS. Yes; I assure the Senator that nothing in the act is intended to limit how furnaces or boilers are vented, or to limit the source of air used for combustion or ventilation.

Mr. WEICKER. Mr. President, I rise today in support of H.R. 5465, the National Appliance Energy Conservation Act of 1986. As an original cosponsor of this legislation I am glad to see that 35 of my colleagues have joined together as sponsors in support of this measure and I would urge others to support it as well. H.R. 5465 achieves two broad objectives, either of which, I believe, has sufficient merit to enlist the support of my colleagues. First, H.R. 5465 would establish uniform national appliance energy efficiency standards which would preempt the growing number of separate and conflicting State standards. Such preemption greatly reduces the regulatory and economic burdens that separate State standards placed on the appliance industry. Second, H.R. 5465 would significantly reduce the Nation's demand for electricity. Such a reduction in energy demand will assist the Nation in meeting future energy needs and in reducing our growing dependence on foreign energy resources. H.R. 5465 is needed to strengthen our national energy policy.

The history of H.R. 5465 goes back to 1975, when Congress passed the Energy Policy and Conservation Act [EPCA]. EPCA directed the Department of Energy to consider the establishment of appliance energy efficiency standards in response to the energy crisis which the Nation then faced. Although the energy crisis is not as immediate a problem as it was in 1975, I believe that it remains one of the most serious problems still facing the Nation today.

In 1975 the Congress amended EPCA to require the Department of Energy to establish appliance energy efficiency standards. However, in 1983 the Department ruled that no standards were economically justified. This no-standard standard was challenged in court and in July of 1985, the D.C. District Court of Appeals ruled against the Department and ordered that substantive standards be issued. Unfortunately, it will be at least 2 years before the Department can promulgate new standards. In the meantime, the court ruling and current DOE practice allow the 50 States to establish their own

State regulations regarding appliance energy efficiency. States are increasing their adoption of such regulations, resulting in a growing patchwork of separate and conflicting regulations. This patchwork of State regulations has made a nightmare of the design, production, and marketing plans of the Nation's appliance manufacturers. One excellent example of the problems which have resulted from this patchwork of regulations is a small but growing traffic in smuggled applicances; particularly in my region of the country. Appliance retailers have already found that customers are willing to drive to other States in order to purchase cheaper and less efficient appliances. It is obvious that uniform national standards would substantially reduce the current regulatory and economic burden on the appliance industy.

It was in an effort to develop such national standards that representatives of the appliance industry began negotiations with representatives of the environmental community. H.R. 5465 embodies the agreement reached in those negotiations.

The interest of the environmental community in these negotiations was to assure that EPCA would be strengthened and would provide for actual energy conservation. It is currently estimated that approximately 18 percent of the Nation's energy is consumed by major home appliances. It is difficult to quantify how much energy would actually be saved by enactment of this measure. However, because the legislation would require efficiency improvements on the order of 20 percent for many appliances, it is clear that energy savings would be significant.

An analysis by the American Council for an Energy-Efficient Economy of the energy savings which would result from H.R. 5465 concludes that peak electrical loads in the year 2000 would be reduced by 10 percent, or 22,000 megawatts. These estimates seem optimistic to me. However, savings of even a half or a quarter of this amount would justify enactment of this legislation.

I have often stated my concern that the Nation has failed to develop an energy policy capable of dealing with the Nation's pressing energy problems. As a nation we are once again headed toward an energy crisis similar to that which we experienced in the early 1970's. I believe that energy conservation must become and remain an integral part of our national energy policy. H.R. 5465 is a long overdue addition to that policy.

Mr. President, this legislation has broad support from industry and it has broad support from the environmental community. H.R. 5465 was passed by the House and reported unanimously by the Senate Committee on Energy and Natural Resources. I believe that the reasons for enacting this measure are compelling. H.R. 5465 will reduce the economic and regulatory burdens on the Nation's appliance manufacturers and it will strengthen our Nation's energy policy.

Mr. President, I urge my colleagues to support enactment of H.R. 5465.

AMENDMENT NO. 3409

(Purpose: To revitalize oil and gas production in the United States)

Mr. GRAMM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas [Mr. GRAMM], for himself and others, proposes an amendment numbered 3409.

Mr. GRAMM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new title:

TITLE—OIL AND GAS PRODUCTION REVITALIZATION ACT

SEC. *01. SHORT TITLE.

This title may be cited as the "Oil and Gas Production Revitalization Act".

Subitile A—Oil Provisions

SEC. *11. WINDFALL PROFIT TAX REPEAL.

(a) Chapter 45 of the Internal Revenue Code of 1954 is repealed.

(b)(1) Sections 6050C, 6076, 6232, 6430, and 7241 of the Internal Revenue Code of 1954 are repealed.

(2)(A) Subsection (a) of section 164 of such Code is amended by striking paragraph (5).

(B) Paragraph (3) of section 168(i) of such Code is amended by striking "(A) In general.—" and subparagraph (B).

(C) The following provisions of such Code are each amended by striking "44, or 45" each place it appears and inserting "or 44":

(i) section 6211(a),
(ii) section 6211(b)(2),
(iii) section 6212(a),
(iv) section 6213(a),
(v) section 6213(g),
(vi) section 6214(c),
(vii) section 6214(d),
(viii) section 6161(b)(1),
(ix) section 6344(a)(1), and
(x) section 7422(e).

(D) Subsection (a) of section 6211 of such Code is amended by striking "44, and 45" and inserting "and 44".

(E) Subsection (b) of section 6211 of such Code is amended by striking paragraphs (5) and (6).

(F) Paragraph (1) of section 6212(b) of such Code is amended—

(i) by striking "chapter 44, or chapter 45" and inserting "or chapter 44", and

(ii) by striking "chapter 44, chapter 45, and this chapter" and inserting "chapter 44, and this chapter".

(G) Paragraph (1) of section 6212(c) of such Code is amended—

(i) by striking "of chapter 42 tax" and inserting "or of chapter 42 tax", and

(ii) by striking ", or of chapter 45 tax for the same taxable period".

(H) Subsection (e) of section 6302 of such Code is amended by striking paragraph (2).

(I) Section 6501 of such Code is amended by striking subsection (p).

(J) Section 6511 of such Code is amended by striking subsection (h) and redesignating subsection (i) as subsection (h).

(K) Subsection (a) of section 6512 of such Code is amended—

(i) by striking "of tax imposed by chapter 41" and inserting "or of tax imposed by chapter 41", and

(ii) by striking ", or of tax imposed by chapter 45 for the same taxable period".

(L) Paragraph (1) of section 6512(b) of such Code is amended—

(i) by striking "of tax imposed by chapter 41" and inserting "or of tax imposed by chapter 41", and

(ii) by striking ", or of tax imposed by chapter 45 for the same taxable period".

(M) Section 6611 of such Code is amended by striking subsection (h) and redesignating subsections (i) and (j) as subsections (h) and (i), respectively.

(N) Subsection (a) of section 6653 of such Code is amended—

(i) by striking "Gift, or Windfall Profit Taxes", in the heading and inserting "or Gift Taxes",

(ii) by striking ", or by chapter 45 (relating to windfall profit tax)" in paragraph (1), and

(iii) by striking the comma after "subtitle A" in paragraph (1) and inserting "or".

(O) Paragraph (3) of section 6678(a) of such Code is amended by striking subparagraphs (A) and (C) and redesignating subparagraphs (B), (D), (E), and (F) as subparagraphs (A), (B), (C), and (D), respectively.

(P) Subsection (a) of section 6862 of such Code is amended by striking "44, and 45" and inserting "and 44".

(Q) Section 7512 of such Code is amended—

(i) by striking ", by chapter 33, or by section 4986" in subsections (a) and (b) and inserting "or chapter 33", and

(ii) by striking ", chapter 33, or section 4986" in subsections (b) and (c) and inserting "or chapter 33".

(3)(A) The table of contents of subtitle (D) of such Code is amended by striking the item relating to chapter 45.

(B) The table of contents of subpart B of part III of subchapter A of chapter 61 is amended by striking the item relating to section 6050C.

(C) The table of contents of part V of such subchapter is amended by striking the item relating to section 6076.

(D) The table of contents of subchapter C of chapter 63 is amended by striking the item relating to section 6232.

(E) The table of contents of subchapter B of chapter 65 is amended by striking the item relating to section 6430.

(F) The table of contents of part II of subchapter A of chapter 75 is amended by striking the item relating to section 7241.

(c) The amendments made by this section shall apply to crude oil removed from the premises beginning after December 31, 1986.

SEC. *12. STRATEGIC PETROLEUM RESERVE PETROLEUM ACQUISITION.

Section 160 of the Energy Policy and Conservation Act (42 U.S.C. 6240) is amended by adding after subsection (e) the following new subsection:

"(f)(1) The Secretary shall assure that at least 50 percent, by volume, of the petroleum products acquired for storage in the Strategic Petroleum Reserve during each

fiscal year, exclusive of crude oil produced from the Naval Petroleum Reserves or received in kind as royalties from production on Federal lands, are derived from domestic crude oil production, provided that these domestic petroleum products can be aquired at delivered prices that are no less favorable to the United States than the price of comparable foreign petroleum products available to the Reserve, exclusive of duty.

"(2) If, during the acquisition of domestic petroleum products for the Strategic Petroleum Reserve, the Secretary determines that the requirement in paragraph (1) of this subsection cannot be met, the Secretary may acquire imported petroleum products totaling more than 50 percent of the petroleum products acquired for storage in the Reserve for that fiscal year.

"(3) The Secretary may issue the regulations and directives necessary to carry out this subsection.".

SEC. *13. INVESTIGATIONS BY DEPARTMENT OF COMMERCE.

(a) The Congress finds that—

(1) falling oil prices are encouraging increased consumption of petroleum products while discouraging petroleum exploration and development;

(2) broad sectors of the economy have suffered severe impacts as a result of the sharp decline of the energy industry;

(3) the decline in domestic exploration and development could result in increased dependence on imports of energy resources from unreliable sources;

(4) surplus worldwide production capacity may discourage oil and gas exploration investment, development of alternative sources of energy, and conservation by the United States and its allies;

(5) a healthy domestic energy industry and reliable international energy sources are critical to assure an adequate supply of energy at a reasonable cost, minimize our dependence on unreliable sources, assure free and fair trade in energy products, and attain the goal of energy independence and diversification; and

(6) the Administration has, in response, implemented a number of appropriate changes in Federal energy programs, including a decision to fill the Strategic Petroleum Reserve, revision of natural gas valuation methods to better reflect actual market prices, and implementation of procedures to prevent premature abandonment of producing oil and gas wells, both onshore and offshore, and is seeking to identify further actions to respond to these conditions and assure our national security.

(b)(1) The Congress is deeply concerned about the adverse effects of the current state of the energy industry on the national security and economic well-being of the United States. Therefore the Congress urges the Administration to expand upon the initiatives already undertaken by identifying and using all authority available, consistent with free market principles and protection of the environment, to increase the exploration and development of domestic energy resources. The Congress also urges the President to take whatever actions are necessary and appropriate to protect our national security. To accomplish this, the Congress strongly urges the Secretary of Commerce to undertake immediately, upon fulfillment of the requirements of section 232(b) of the Trade Expansion Act of 1962 (19 U.S.C. 1862(b)), and to complete as soon as feasible a study under section 232 of the Trade Expansion Act of 1962 of the national security effects and implications of the current and projected levels of petroleum imports into this Nation.

(2) The Congress urges the President to evaluate any study conducted by the Secretary of Commerce pursuant to section 232 of the Trade Expansion Act of 1962 and take appropriate action without causing undue adverse effects on our domestic and international economic interests.

(3) The Congress urges the Department of Commerce in conjunction with other affected departments to fully analyze the economic impact of current restrictions on the export of oilfield equipment and drilling technology as required in the Export Administration Act of 1979, as amended. The Congress specifically urges that the required study for 1986 assess the present effect of such restrictions on employment and growth of the United States economy, taking into account the recent domestic change in a number of sectors of the energy industry, and further assess the availability of other similar technologies from Western countries. Due to the particular impact of foreign policy controls on the domestic oil and gas equipment and technology industry the Congress urges that the study be undertaken immediately upon passage of this title.

Subtitle B—Natural Gas Provisions

SEC. *21. TRANSPORTATION OF NATURAL GAS.

(a) Section 311(a) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3371(a)) is amended by—

(1) amended paragraph (1) to read as follows:

"(1) IN GENERAL.—The commission, by rule or order, may authorize any pipeline to transport natural gas on behalf of any person.";

(2) redesignating paragraph (1)(B) as paragraph (2);

(3) striking paragraph (2)(A);

(4) redesignating paragraphs (2)(B)(i), (2)(B)(ii), (2)(B)(ii)(I), and (2)(B)(ii)(II) as paragraphs (3)(A), (3)(B), (3)(B)(i), and (3)(B)(ii), respectively; and

(5) adding a new paragraph (4) to read as follows:

"(4) NON-DISCRIMINATION.—

"(A) A pipeline transporting gas pursuant to this subsection shall do so without discrimination.

"(B) An intrastate pipeline receiving gas pursuant to this subsection shall provide transportation service pursuant to this subsection without discrimination.".

(b)(1) Title III of the Natural Gas Policy Act of 1978 (15 U.S.C. 3361-3375) is amended by adding the following new section:

"SEC. 316. OPEN ACCESS CARRIAGE.

"Upon request by any person, the Commission shall order any interstate pipeline to provide transportation service without discrimination unless the pipeline demonstrates to the Commission that it lacks the physical capacity necessary to render the service. The Commission may implement this section by rule or order, and may attach appropriate terms and conditions consistent with the fullest practicable use of capacity. The rates and charges for transportation service under this section shall be just and reasonable within the meaning of the Natural Gas Act.".

(2) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by adding after the item relating to section 315 the following:

"Sec. 316. Open access carriage.".

SEC. *22. FUEL USE ACT.

(a) The following sections of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 et seq.) are repealed:

(1) sections 103 (a)(16), (a)(18), (a)(19), and (a)(29) (42. U.S.C. 8302 (a)(16), (a)(18), (a)(19), and (a)(29));

(2) sections 201(1) and 202 (42 U.S.C. 8311(1) and 8312);

(3) section 302 (42 U.S.C. 8342);

(4) section 401 (42 U.S.C. 8371);

(5) section 402 (42 U.S.C. 8372); and

(6) section 405 (42 U.S.C. 8375).

(b) The table of contents in section 101(b) of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301(b)) is amended by striking the items relating to the sections repealed by subsection (1) of this section.

(c)(1) Section 102 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301) is amended by striking "major fuel-burning installations" each place it appears.

(2) Section 103 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8302) is amended—

(A) in subsection (a)(13)(B), by—

(i) striking clause (ii)(III);

(ii) striking "; or" at the end of clause (ii)(II), and inserting a period in its place; and

(iii) inserting "and" at the end of clause (ii)(I);

(B) in subsection (a)(15), by striking "or major fuel-burning installation" each place it appears;

(C) in subsection (a)(20), by striking "or major fuel-burning installation";

(D) by redesignating subsections (a)(17), (a)(20), (a)(21), (a)(22), (a)(23), (a)(24), (a)(25), (a)(26), (a)(27), and (a)(28), as subsections (a)(16), (a)(17), (a)(18), (a)(19), (a)(20), (a)(21), (a)(22), (a)(23), (a)(24), (a)(25), respectively;

(E) in subsection (b), by striking "or major fuel-burning installation" wherever this phrase appears;

(F) in subsection (b)(1)(D), by striking everything after "synthetic gas involved" and inserting in its place a period; and

(G) by striking subsection (b)(3), and redesignating subsection (b)(4) as subsection (b)(3).

(3) Section 104 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8303) is amended to read as follows:

"The provisions of this Act shall apply in all the States, Puerto Rico, and the territories and possessions of the United States.".

(4) Section 211 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8321) is amended by striking subsection (c) and redesignating the following subsections accordingly.

(5) Section 303 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8343) is amended by—

(A) striking "or installation" and "or installations" wherever the phrases appear;

(B) striking "or 302" wherever the phrase appears;

(C) striking subsection (a)(3);

(D) amending subsection (b)(1) to read as follows:

"(1) The Secretary may prohibit, by rule, the use of natural gas or petroleum under section 301(b) in existing electric powerplants.";

(E) in subsection (b)(3), striking "or major fuel-burning installation"; and

(F) amending the last sentence of subsection (b)(3) to read as follows: "Any such rules shall not apply in the case of any existing electric powerplant with respect to

which a comparable prohibition was issued by order.".

(6) Section 403 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8373) is amended by striking—

(A) in subsection (a)(1), "major fuel-burning installation, or other unit" and the comma immediately preceding this phrase and "installation, or unit" and the comma immediately preceding this phrase;

(B) in subsection (a)(2), "installation, or other unit" and the comma immediately preceding that phrase, and "installation, or unit" and the comma immediately preceding that phrase;

(C) in subsection (a)(2), the last sentence; and

(D) subsection (a)(3).

(7) Section 404 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8374) is amended by striking—

(A) in subsection (c), "new or' in phrase "applicable to any new or existing electric powerplant"; and

(B) subsection (g).

(8) Section 701 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8411) is amended by striking—

(A) in the last sentence of subsection (b), "or installation";

(B) subsection (c);

(C) in the title of subsection (d), "AND EXEMPTIONS";

(D) in the first sentence of subsection (d)(1), "or any petition for any order granting an exemption (or permit)";

(E) in subsection (d)(1)(B), "or in the consideration of such petition";

(F) in subsection (f), "or a petition for an exemption (or permit) under this Act (other than under section 402 or 404),"; and

(G) subsection (g).

(9) Section 702 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8412) is amended by striking—

(A) in the title of subsection (a), "OR EXEMPTION";

(B) in subsection (a), "or granting an exemption (or permit)";

(C) subsection (b), and redesignating subsection (c) as subsection (b);

(D) in the first sentence of subsection (b)(1) (as redesignated) ", or by the denial of a petition for an order granting an exemption (or permit) referred to in subsection (b),";

(E) in the first sentence of subsection (b)(1) (as redesignated), "such rule, order, or denial is published under subsection (a) or (b)" and inserting in its place "such rule or order is published under subsection (a)";

(F) in the first sentence of subsection (b)(2) (as redesignated), "the rule, order, or denial" and inserting in its place "the rule or order";

(G) in the second sentence of subsection (b)(2) (as redesignated), "(or denial thereof)"; and

(H) in subsection (b)(3) (as redesignated), "any such rule, order, or denial" and inserting in its place "any such rule or order".

(10) Section 711 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8421) is amended by striking in the first sentence of subsection (a), "or major fuel-burning installation".

(11) Section 721 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8431) is amended by striking subsection (c) and redesignating subsection (d) as subsection (c).

(12) Section 723 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8433) is amended by striking subsection (b) and redesignating subsections (c) and (d) as subsections (b) and (c), respectively.

(13) Section 731 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8441) is amended by striking—

(A) "or major fuel-burning installation" wherever the phrase appears; and

(B) "title II or" subsections (a)(1) and (g)(3).

(14) Section 745 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8455) is amended by striking in the first sentence of subsection (a), "from new and existing electric powerplants and major fuel-burning installations" and inserting in its place "from existing electric powerplants".

(15) Section 761 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8471) is amended by striking—

(A) in subsection (a), "any existing or new electric powerplant or major fuel-burning installation" and inserting in its place "any existing electric powerplant"; and

(B) in subsection (b)—

(i) "new or" in the phrase "In the case of any new or existing facility"; and

(ii) "except to the extent provided under section 212(b) or section 312(b)" and the comma immediately preceding that phrase.

(d)(1) Subject to paragraphs (2) and (3), title II of the Natural Gas Policy Act of 1978 (15 U.S.C. 3341-3348) is repealed, and the items relating to title II are stricken from the table of contents of that Act.

(2) A rule promulgated by the Commission under title II of the Natural Gas Policy Act of 1978 shall continue in effect only with respect to the flow-through of costs incurred before the enactment of the Oil and Gas Production Revitalization Act, including any surcharges based on such costs.

(3) The Commission may take appropriate action to implement this section.

SEC. *23. LIMITED ANTITRUST EXEMPTION FOR INDEPENDENT PRODUCER COOPERATIVES.

(a) There shall be available as a defense to any civil or criminal action brought under the Federal antitrust laws as that term is defined in section 2(37) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301(37)), or any similar State law, with respect to action taken to develop cooperative associations of independent producers or actions taken by such cooperative associations to carry out any voluntary agreement or plan of action to market natural gas if—

(1) the action is necessary to market natural gas, and

(2) the action is not taken for the purpose of reducing competition.

(b) For purposes of this section, the term "independent producer" means, with respect to any quarter, any person other than a person to whom subsection (c) of section 613A of the Internal Revenue Code of 1954 does not apply by reason of paragraph (2) (relating to certain retailers) or paragraph (4) (relating to certain refiners) of section 613A(d) of such Code. For purposes of the preceding sentence, paragraphs (2) and (4) of section 613A(d) shall be applied by substituting "quarter" for "taxable year" each place it appears in such paragraphs, and by substituting "$1,250,000" for "$5,000,000" in paragraph (2) of section 613A(d).

SEC. *24. FAIR STANDARD FOR COMPARING COST OF PURCHASED GAS SUBJECT TO COMMISSION JURISDICTION.

Section 4(a) of the National Gas Act of 1938 (15 U.S.C. 717(b)) is amended by adding at the end thereof the following new paragraph:

"In ascertaining whether any amount paid in any purchase of natural gas for resale (other than a first sale of natural gas as defined in section 2(21)) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301) is just and reasonable, the Commission shall consider the full cost of the purchased gas, both demand and commodity rates, it separately stated. Nothing in this section shall affect the jurisdiction of the Secretary of Energy under section 3 of the Natural Gas Act.

Subtitle C—Regulatory Reform Provisions

SEC. *31. REGULATION OF PRODUCTION WASTES UNDER THE SOLID WASTE DISPOSAL ACT.

Section 8002(m) of the Solid Waste Disposal Act (42 U.S.C. 6982(m)) is amended—

(1) in paragraph (1) by adding at the end the following new sentence: "The Administrator shall conduct the study and prepare the report with the participation of the Secretary of Energy; the Secretary of the Interior; representatives of the industries associated with the exploration, development, or production of crude oil or natural gas or geothermal energy; and representatives of the State agencies that regulate these industries."; and

(2) in paragraph (2) by striking "twenty-four months from the date of enactment of the Solid Waste Disposal Act Amendments of 1980" and inserting in its place "January 1, 1989".

SEC. *32. UNDERGROUND STORAGE TANKS.

Section 9001(1) of the Solid Waste Disposal Act (42 U.S.C. 6991(1)) is amended—

(1) in subparagraph (H) by inserting "; well cellars, sumps, or drip collection devices" after "lines" and by striking out "or" at the end thereof; and

(2) by redesignating paragraph (I) as paragraph (J) and by adding after paragraph (H) the following:

"(I) hydraulic lift reservoirs in petroleum marketing operations, oil/water separators in petroleum marketing, production, and refining operations, and sumps in petroleum marketing and refining operations, or".

SEC. *33. FACILITY VARIANCES.

It is the sense of Congress that—

(1) fundamentally different factors variances should be available for any facility that is subject to national effluent limitation guidelines including, but not limited to, the oil and gas extraction point source category; and

(2) applications for fundamentally different factors variances from national effluent limitation guideline requirements for the oil and gas extraction industry may be based upon information and supporting data which had not been submitted earlier to the Administration, but shall be submitted at the earliest practicable time that such information and data exist or is reasonably available to the applicant.

SEC. *34. RECYCLING ACTIVITIES.

It is the sense of Congress that the "mixture" and "derived from" rules in 40 CFR 261.3 were promulgated to address intentional dilution of hazardous wastes—a mismanagement practice designed to avoid regulation. These rules should not be invoked to curtail recycling activities in the petroleum industry designed to conserve resources or minimize wastes when there is no information to demonstrate that the recycling activities pose any threat to human health and the environment.

SEC. *35. LAND TREATMENT SITES.

It is the sense of Congress that—

(1) the Administrator of the Environmental Protection Agency should encourage

continued use of land treatment for petroleum waste to the extent consistent with protection of human health and the environment;

(2) protection of human health and the environment from air emissions at land treatment units under the Solid Waste Disposal Act should be addressed solely through promulgation of standards under section 3004(n) of such Act:

(3) land treatment should be determined to be protective of human health and the environment under subsections (d), (e), and (g) of section 3004 of the Solid Waste Disposal Act when an owner or operator demonstrates there will be no statistically significant increase of hazardous constituents over background to groundwater arising from placement of hazardous waste at the land treatment unit; and

(4) land treatment of petroleum waste should be considered to be a method of treatment which meets the requirements of section 3004(m) of the Solid Waste Disposal Act (42 U.S.C. 6924(m)).

SEC. *36. INDUSTRY ACCOUNTING METHODS.

It is the sense of Congress that—

(1) the full cost method of accounting for oil and gas operations should continue to be recognized as an acceptable financial accounting practice in the United States;

(2) financial statements using the full cost method should continue to be accepted in documents filed with all Federal agencies, including registration statements, reports and other filings with the Securities and Exchange Commission; and

(3) the use of the full cost method should not be limited by action of any Federal regulatory agency.

Mr. GRAMM. Mr. President, I offer this amendment on behalf of myself and Senators NICKLES, MCCLURE, DOLE, STEVENS, COCHRAN, HELMS, MURKOWSKI, SIMPSON, WALLOP, BOREN, DOMENICI, and KASSEBAUM.

Mr. President, we have seen now for 2 years a decline in the price of petroleum products; and while that has caused applause in some segments of the economy, it has caused great problems in other segments of the economy. We have a growing foreign energy dependence. Oil imports are rising. The impact of declining prices is decimating the economic infrastructure of the oil and gas industry, affecting hundreds of thousands of jobs in Texas, Louisiana, Oklahoma, and all the other oil-producing areas of the country. Declining prices represent bad news for producers, and for all those involved in the production process. Declining prices not only affect our energy production for today, but also our future ability to produce energy here at home, to provide domestic fuel for our national defense and for our economic growth.

As a result of this problem, I began about 6 months ago, along with a half-dozen other Members of the Senate, to have meetings with the oil and gas producing associations, with the Department of Energy, the Department of the Interior, and the White House, to try to come up with a comprehensive program to build a national energy policy.

The amendment I have offered today is not going to be voted on because of the debate concerning the Fuel Use Act, which we know would produce a filibuster, thereby holding up the Senate and denying us a vote. We are also aware that while we had hoped to get this adopted in the Senate, our chances of consideration, much less passage, in the House, in what is hopefully the last day or two of the Senate session, are remote.

We decided that instead of bringing it up for a vote today, we would bring it up for debate. We understand that there are those who wish to join as cosponsors today, but we thought it was important to put the bill on the table before the Senate, before the American people, to let those who are concerned about energy know that there is concern in the Senate and in Congress and in the Federal Government.

The bill before us, the Oil and Gas Production Revitalization Act, is, I believe, the first comprehensive effort we have undertaken that has had the support of the White House and that has also had the support of oil and gas producers around the country. The bill has no special uniqueness. The Senate has voted on provisions of the bill—at least some parts. Many Members of this body and many Members of the House have introduced similar measures. Some elements of this bill have been adopted in one form or another by both Houses.

What is significant about the bill is that it is the first successful effort to bring the industry concerns together with the administration concerns and with senatorial concerns in a comprehensive bill.

The Oil and Gas Production Revitalization Act has four basic provisions related to oil.

No. 1, it repeals the windfall profit tax, something that the Senate, in its wisdom, has already done; something that the House, in the next day or two, will vote on as an amendment to the debt ceiling. Their intention is to strip that provision and kill it. I hope thay will not be successful, but that is the intent.

There are many of us who would argue that the windfall profit tax was never good public policy; but if there ever were any windfall profit, that situation long ago has been eliminated, because now there are no profits whatsoever. This confiscatory amendment, while not collecting any revenues today, would come into effect if oil prices rose by $4 a barrel, and today is imposing over $500 million in paperwork costs on oil and gas producers around the country.

The second oil-related provision is to mandate by law that 50 percent of the oil for the strategic petroleum reserve comes from domestic sources.

The third element of the bill is a vitally important one. It asks for an economic and security assessment of oil imports. It asks that the Department of Commerce and the National Security Council conduct a comprehensive analysis of the security and economic impact of rising oil prices, and that all potential remedies be looked at, including an oil import fee. As I am sure my colleagues are aware, we have had much heated debate on this subject. In fact, cosponsors of this bill differ greatly on the issue of an oil import fee.

The purpose of this study is to put all the facts on the table, to have a comprehensive analysis. By getting the facts on the table, we let the facts speak for themselves. I think it is vitally important that we agree on a common set of facts.

Everybody is entitled to his own opinions but everybody is not entitled to his own facts.

For those of us who opposed the oil import fee, if the facts bear out our position, it will be strengthened; if the facts do not bear out our position, obviously we have to go back and look at our position. And the converse is true for those who take the other position.

But I think it is vitally important if we are ever to build a consensus on this important issue to examine what are the security perils of increasing imports, what remedies are available, what those remedies are to cost and what represents the best national policy that can be undertaken by the Congress and the President. One indispensible ingredient of that debate is going to be getting the facts on the table so we can deal with a commonly agreed-upon set of facts.

The fourth and last oil provision has to do with the exportation of oil field equipment and drilling technology. Again, it is vitally important that we get all the facts on the table concerning the export availabilty of oil field drilling equipment and technology from France, Britain, West Germany, and Japan. We need to determine whether or not current restrictions actually prevent American technology from being transfererd to the Eastern bloc and to the Soviet Union, or whether the net impact is merely to transfer American jobs producing oil field equipment and technology from Houston, New Orleans, and other American cities, Western Europe and Japan.

That I submit, Mr. President, is a critical issue, and only by having the facts, an agreed-upon set of facts on the table, can we hope to settle that issue.

The natural gas provisions of the bill break down into five basic areas.

No. 1 is to set out a nondiscriminatory program to require the pipelines to carry gas from small producers to assure their access to markets.

The second provision has to do with fairness in competition, in terms of rate design. It simply requires, in setting a rate design schedule, that in comparing United States and Canadian gas the comparison has to be on a competitive basis where all costs are allocated and where the comparison is on a full and comparable cost basis.

I want to make it clear to my colleagues that there is nothing protectionist about this provision. This provision in no way affects the ability of Canadians to sell gas. It simply requires that in setting a rate structure the allocation between fixed and variable costs must be taken into account and the comparison of purchase of gas and the interstate pipeline has to be on a full and comparable cost basis.

The next provision simply allows antitrust exemption where small independent gas producers can pool their gas into one supply source for sale to a pipeline.

The next provision would repeal the demand restraints of the Fuel Use Act, and the final provision would repeal incremental pricing.

I know the Fuel Use Act demand constraints are very controversial. There are those who are concerned that if we do something to open up a market for natural gas we are going to hurt coal.

I want my colleagues to know that I have had a series of meetings with coal producers and I worked out what I believe can be an effective compromise to allow us, when this bill is introduced next year, to move ahead with the support of the coal industry. In part, that compromise simply entails requiring future boilers that are built to be coal capable; not that we have to build the transportation to bring the coal to the boiler, not that we have to build the scrubbers, but that it simply has to be coal capable so that at some future time if the price ratio should change the transfer could occur.

I think that represents an important step at compromise, and I am hopeful that when the bill comes up early next year we will have the support of the coal industry and those who are concerned about coal.

I submit, Mr. President, there is no reason that there ought to be a conflict between oil and gas on the one hand and coal on the other, what we want is a viable national energy policy and that is in the interest of everybody.

Finally, there are some six provisions that relate to regulatory reform aimed at trying to prevent the heavy burden of regulation from stifling the production of oil and gas here at home at a price the consumer could afford to pay.

Let me say in conclusion, Mr. President, because I know others want to speak, that I think this is an important step forward. There is nothing in the bill that is dramatic. There is nothing in the bill that in and of itself will solve our energy problems, but it is a first comprehensive step forward. It is a step forward that I believe can speed the day when we can make the energy industry competitive.

I submit, Mr. President, that it is in the interest of every American consumer to preserve a viable domestic energy industry.

I submit this amendment to my colleagues. I want to make it clear that this bill will be introduced on the first day of the new session, that we will, in the interim, after Congress adjourns, have major meetings here in Washington and around the country to develop support for this bill.

We hope to work out a comprehensive compromise with the coal industry so that we can have a unity of purpose when this bill is introduced on January 3.

I am hopeful that consideration of this bill with other suggestions that might be developed over the recess will be one of the first orders of business of the new Congress.

I thank my colleagues and those in the administration who have worked so hard to help us get to this point.

I am happy to yield as much time as he might consume to the distinguished chairman of the Energy Committee, Senator MCCLURE.

Mr. MCCLURE. Mr. President, I thank the Senator from Texas for yielding.

I want to thank him, too, for the leadership that he has given to putting together a package that now has the administration's support.

A great many of these single elements we have looked at separately and sometimes in combination, but never before have we been able to put together a package that had broad enough support that the administration would join in support of it.

I commend the Senator from Texas because without his leadership, I do not believe that would have happened.

In the Energy and Natural Resources Committee, we have held a number of hearings over the last several years, most recently less than 60 days ago, looking at world oil supply and outlook.

I am convinced and I think most of the members of the committee are convinced that there is a danger to the military security of the United States and a threat to the economic well-being of the United States in the massive fluctuations of price in the energy market.

We are not the masters of our own fate. The industry is hostage to actions that are taken outside of this country by other people seeking their own self-interest, much less interested in what is good for the United States or good for the industry in the United States.

This package of proposals, which has been put forward in the form of this amendment and of which I am proud to be a cosponsor, would go a short distance towards dampening some of that tremendous price swing in the marketplace which, when it is going down, feels good to some people; when it is going up, feels good to others and exactly it is true while it is going down, feels awful to some people; when it is going up, feels awful to others.

I think there is a reason for us to try to find a way to dampen those swings.

One of the reasons for my support of this package among its several provisions is the study to which the Senator from Texas has made reference, the study of the effect of import fees. I have been among those who have opposed import fees and I am still opposed to import fees, but I will have to say as I look at the tremendous potential for damage that lies in the fluctuations induced by others for other than market reasons that we may have to try to find some mechanism by which we can dampen that swing.

I guess I have a little sense of deja vu. This is where I entered in 1968. As a Member of the other body, I was forced to look at the old oil import quota program that had been designed in the 1950's to protect the U.S. oil industry against a flood of cheap foreign oil, and it had worked. It had worked to preserve a two-price market system in which the U.S. oil producer had a share and foreign producers had another share.

But it had worked for a number of years and it was under test at that time. It was under test growing during 1968, 1969, 1970, 1971, and 1972 as oil imports increased dramatically over that period of time.

We had gotten above 30 percent, 35 percent, oil imports by 1973, and a great many people were concerned about what it was going to mean to the future security of this country.

Mr. President, if you will look at today's facts, we are about where we were in percentages in 1973, with the future looking very much worse than it looked in 1973 because our own domestic oil industry is in a much more weakened position today than they were in 1973.

I think it is time for us to address this problem.

I commend the Senators who have joined in this and who will join in the sponsorship of this particular package for the forward-looking nature of this proposal.

It may well be that we will not get all of this proposal. It may well be that there will be other things added to it before it is completed, but I join with the Senator from Texas in believ-

ing that it is important for us to raise this flag at this time.

I am sorry we will not get a vote on it, I am mindful of the fact that the repeal of the Fuel Use Act, without any protection for the coal industry, would bring about a filibuster. The senior Senator from Kentucky has made very clear that without protection for the coal industry in the Fuel Use Act this bill would not go anywhere. The junior Senator from Ohio has indicated that the antitrust provisions, without being cleared in the Judiciary Committee, would alone be enough for him to filibuster this issue.

So I suppose it is impossible for us today to expect to be able to pass the piece of legislation, as constructive as I believe it to be. I think that is too bad. I wish we could. And perhaps next year we will be able to persuade those Members and others that the better part of wisdom is to permit us to move forward on some kind of legislation that provides a greater degree of energy security for this country with a lower cost to our economy than simply sitting doing nothing.

Again, I thank the Senator from Texas for his leadership and for yielding me this time that I may make these remarks.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, as the unanimous-consent agreement indicated, this amendment will be discussed and then withdrawn. That is necessary because, in the closing hours, neither this nor any other matter of controversy can be effectively considered here on the floor of the Senate.

I think, however, Mr. President, that this amendment serves a very useful purpose by bringing up the whole question of oil and gas, its domestic production, its importation, and the effect upon not only national security but the economy of the country.

Mr. President, it is very unfortunate that neither the American public nor this administration seems to be aware of what is happening to this country. Just on October 9, an article appeared in the Baton Rouge Morning Advocate quoting my friend, the Secretary of the Interior, Donald Hodel. The article reads:

> Oil industry advocated of government help and their political allies have failed to make a case so far with the Reagan administration and the public interior, Secretary Donald P. Hodel said Wednesday.
>
> "They can make that case until doomsday and nobody is going to have any sympathy for them" Hodel told reporters at a lunch sponsored by the Washington Journalism Center."

Mr. President, I ask unanimous consent that a copy of this article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Baton Rouge Morning Advocate, Oct. 9, 1986]

HODEL CITES OPPOSITION TO OIL INDUSTRY BAILOUT

WASHINGTON.—Oil industry advocates of government help and their political allies have failed to make a case so far with the Reagan administration and the public, Interior Secretary Donald P. Hodel said Wednesday.

"They can make that case until doomsday and nobody is going to have any sympathy for them," Hodel told reporters at a lunch sponsored by the Washington Journalism Center.

Anyone proposing to aid the industry better know why you disadvantage one industry to benefit another," he said, and that is a question not yet answered.

The Reagan administration "generally opposes bailouts" for particular industries, and the public does not see the oil industry's problems as a general problem, Hodel said.

"People in the industry are urging the administration to do something," but if the administration agreed, "the reaction of the American people would be, 'Why are you doing this?' "

President Reagan has convened an interdepartmental committee to consider whether the industry's problems pose a threat to national security. The domestic oil and gas exploration and production industry has been devastated by a 50 percent price collapse since last December.

The committee's findings will be essential to lay the groundwork for any aid proposals, Hodel said. The panel has not prejudged the issue, he added; "They could come up and say Don Hodel is wrong."

Deputy Energy Secretary William Martin, chairman of the committee, already has said he is "not an easy sell on the national security argument," Hodel said.

As he has on previous occasions, Hodel said he believed that rising oil imports—4.2 million barrels a day last year and currently more than 6 million barrels a day—could pose a threat to national security by leaving the economy vulnerable to supply interruption.

"If you imagine that the citizens will do without, there will always be enough to run fighter planes," he said, explaining that by harm to national security, he meant "a shortfall in the amount of oil needed to run this economy at the level the people expect or demand."

Even if the committee agrees—and other Cabinet officers remain to be convinced, he said—"solutions that will be offered will not be identical with solutions offered to date. I say that without knowing what the solutions are going to be."

As an example, Hodel said, "If the idea is to protect an oil supply, then there are options that haven't been presented to me yet, such as additional agreements with Canada and Mexico."

On other occasions, Hodel has identified Defense Secretary Caspar Weinberger as one who "wants to see the documentation" for the proposition that the industry's troubles pose a threat to national security.

Mr. JOHNSTON. Mr. President, that indeed is very unfortunate. I find it uncharacteristic of Secretary Hodel that he would speak in terms of no sympathy because I am sure he could not have meant that, considering the personal suffering that is inflicted on my State of Louisiana, I know on Texas, and on Oklahoma and other States. So I am sure he did not mean it in that respect.

Nevertheless, Mr. President, this administration ought to be aware of what is going on in terms of the destruction of an industry, the systematic destruction of the domestic oil and gas industry, bit by bit, piece by piece being dismantled; workers are going to other jobs, and, of course, presently being unemployed and having great difficulty.

But in very short order, Mr. President, in historic terms, in a matter of months, that industry is going to be incapable of producing the domestic oil and gas that it needs to and that it soon will be called upon to do once OPEC gets its act back together.

When OPEC gets its act back together—and who knows how long that will be, perhaps 2 years, perhaps 3 years—but when that happens, and they call upon the domestic oil and gas industry, when the sheiks in the Middle East say, "We want $2 a gallon or $3 a gallon for gasoline," or whatever the unacceptable price is, and we say, "All right, Gulf and Standard Oil and Exxon and independents, produce your domestic oil and gas," and they are unable to do so, then it will not be a question of sympathy, it will be a question of national security, It will be a question of the national economics.

So, Mr. President, we ought to be doing more than we are doing. We ought to start with the one measure that I know the senior Senator from Oklahoma has been so active with, and others on this floor, and that is an oil import fee. It is the one and only really effective thing you can do for the oil and gas industry.

Other things are important. Things in this bill are important. For example, the repeal of the Fuel Use Act ought to be done, should have been done a long time ago. And I guess we will have to do it next year. I think we can muster up the votes to do that and some of these other things next year.

But the most important thing that can be done at this time is an oil import fee. That ought to be done not just because of the revenue it raises, which this country direly needs to go against the deficit, but because it will at least preserve in part the domestic oil and gas industry, so that when the time comes where we will call on them again to do their part for domestic industry, when we call on them to produce that 10 million barrels a day which they have produced in the past, they will be able to do so. If we do not have an oil import fee and if the situation goes on very much longer, they will be unable to respond when called upon.

So, Mr. President, the items in this package are good items. I can only say that I would like much more. I know the distinguished Senator from Texas would like more. Instead of a study, I know he would like to do something about the price of oil and gas. I know he would like to get the package enacted, but we must face political reality as we find it.

So, Mr. President, I am delighted that the package has been brought up for discussion here because it renews our resolve, those of us in the oil and gas-producing States, to be ready next year to fight with renewed vigor a battle that is important and vital not only for us in our States, but for the country as a whole and for the industry as a whole. So it reminds us to be ready for next year for those battles.

Mr. President, I yield whatever time the distinguished senior Senator from Oklahoma may need.

Mr. NICKLES addressed the Chair.

Mr. BOREN addressed the Chair.

The PRESIDING OFFICER. The Chair would indicate that the junior Senator from Oklahoma was seeking recognition first. There is ample time for both Senators.

The Chair will recognize the junior Senator from Oklahoma.

Mr. NICKLES. I will be happy to defer.

The PRESIDING OFFICER. The Chair will recognize the senior Senator.

Mr. BOREN. Mr. President, I thank my colleague for his courtesy.

I am very pleased to join with him and with the Senator from Texas in cosponsoring this proposal, the Energy Revitalization Act, which is before us in amendment form.

I am very pleased that the Senator from Texas has indicated it is his intention to bring this forward as a bill early next year and we can get action on it as soon as possible. I look forward to being a part of that effort.

It is crucial that we begin to move. I think it is important that we set the stage now; that we bring to the attention of our colleagues in the Congress and those across this country the situation that we face.

We speak here not from a parochial point of view. Of course, as everyone knows, the States of Oklahoma and Texas and Louisiana and other energy producing States are suffering terribly at the current time.

□ 1245

We have what can only be called a severe economic recession bordering on a depression in those particular States. But we must also look more broadly at the national interest. It is not in the interest of anyone in the United States of America to destroy the domestic oil and gas industry in this country. It is not in the interest of the American consumer that they should once again be completely at the mercy of the OPEC nations. We will be the hostages of the OPEC nations in terms of the price and level of production which they then will be empowered to set if we destroy our own domestic industry here at home. It is certainly not in the interest of national security and preparedness that we have that kind of dependence upon sources of production that are very, very unreliable and are subject to disruption by forces beyond our control.

The facts are clear. We are becoming more dependent every single day. We have 470,000 wells in this country—stripper wells that produce less than 10 barrels of oil each day. At the price of $15 a barrel, 28 percent of those wells will be shut in. If the prices fall back into the range of $10 which is not beyond the realm of possibility we will lose 41 percent of those wells. That resource will be forever gone; a tremendous waste, wells that have been paid for by the American people, the environmental costs have already been paid as well as the exploration costs.

So we must take some action to prevent it. In September 1985 we were dependent upon foreign sources for only 27 percent of our petroleum needs in this country. Just less than a year later in July 1986 that figure had risen to 39 percent, jumping from 27 percent foreign dependence to 39 percent dependence in less than a year's time.

Imports from Saudi Arabia during this period, for example, have risen from 27,000 barrels a day to over 700,000 barrels a day in less than a year. We are destroying, as has been said by those who have spoken before me, the domestic industry and our ability for that industry to operate.

I think there are people in this country who simply believe that the producers of this country, the industry, the supply and service industry can simply sit back and when the price of oil recovers, we can turn on the water tap again just like going to the sink in the apartment in the kitchen and turning the water back on when it is time. It is not that simple. Once the industry is destroyed, once those wells are plugged, they cannot be brought back into production at anything approaching a reasonable cost. In some cases it is simply not technologically possible to bring them back into production. Once the supply and service industry is gone and those people have sought jobs in other fields, they simply cannot be brought back overnight into oil and gas production, exploration, and the servicing of those particular operations. We cannot expect people in this country to sit aside for 5 or 10 years without employment, without any source of livelihood, simply waiting until the price of oil in this country again reaches the cost of production. It cannot happen.

We are destroying the future talent pool of this country. You look at what has happened in the four great schools of petroleum engineering; the University of Oklahoma, the University of Texas, Texas A&M, and LSU. Two years ago we had over 7,000 students majoring in fields that related to the production and exploration of oil and gas. This year that number has fallen to fewer than 3,000.

We are destroying an industry important to our national security. We are destroying an industry important to the American consumer in terms of having a stable and fair price for a product that they have to have in the future.

So this is a step in the right direction. Repeal of the windfall profits tax has already passed on the floor of the Senate. It should be passed by both Houses, enacted into law, and signed by the President. He has already indicated he would do so. We are spending millions and millions of dollars on useless paperwork that does not produce one thing. If there was an example of a bureaucratic waste, that is continuing the windfall profit tax with hundreds of millions of dollars of cost to the private sector without the Government collecting one single penny, without any person in this country benefiting by one single cent as a result of this additional burden on the private sector.

Repeal of the Fuel Use Act, and incremental pricing is long overdue so we can use the economic resources to shut in natural gas for example that we have already found. We already can produce it. We can use it now, and yet it is being shut in because of the artificial restrictions in the law and not because of market forces.

I hope we can eventually move to an import fee. I think by the time we come back next year the studies that will have been made by the administration and others will find sufficient justification on the basis of national security to take action. I think that will happen. I hope we can incorporate in this package next year the proposal from Senator BENTSEN, and our colleague, Senator GRAMM, has proposed that the President should establish a national energy policy, and should provide that in no case should the United States be dependent on imports for more than 50 percent of our oil needs.

I think that is critically important. It sets a short timeframe in which to have action from this Congress that would keep us below the 50-percent mark. We are well on our way back to that level if we do not take action. We are well on our way to the loss of thousands of marginal wells across this country. We are well on our way to the destruction of an industry in this country. What will it mean when

3 or 4 years down the road the price of oil recovers and we are having to spend, consumers are having to spend millions of dollars more for the energy they need?

It will mean this: those dollars will not go into the pockets of American producers. They will not go into the paychecks of thousands of American workers here at home. They will not go to keep an industry stable so we will have some impact on world price to keep it reasonable. They will go into the pockets of foreign producers and foreign employees who will be exacting a price far greater from the American consumer than would have been exacted if we had kept a competitive industry here in the United States.

So I commend my colleagues for this effort. I am pleased to join with them on it. I hope we will see very, very quick action on this package and on additional steps soon after Congress comes back into session next year.

I thank my colleague for his courtesy in yielding.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The junior Senator from Oklahoma is recognized.

Mr. GRAMM. Mr. President, I yield to the junior Senator from Oklahoma under whose leadership the Senate repealed the windfall profits tax earlier.

Mr. NICKLES. I thank my friend and colleague from Texas. I compliment him on the work that we have done together in putting together this bill, the Oil and Gas Production Revitalization Act.

Mr. President, I will say at the outset I am disappointed we are not going to have a vote on this package today because I think we need it. I think the country needs it. When I say we need it, a lot of people say that is just the Senator from Oklahoma talking about his State. But I am not just speaking for the State of Oklahoma. I am speaking for the country.

Our country needs to wake up to the fact we are growing ever more dependent on foreign sources that are not stable. This is not a free market situation at work today. We have a situation where we have foreign sources that are manipulating the market.

The Presiding Officer knows the OPEC ministers are meeting today in Geneva. They are discussing what type of price arrangements there will be. In other words, they are setting the price. You have manipulated prices set by governments; not a free market price. And if they do not come to an agreement, you will probably see again a real aberration in prices, possibly with oil prices falling down as low as, this Senator might guess if they come to total disagreement, $6 or $7 or $8. If that happens, you are going to have total devastation in the domestic oil and gas industry. We will be making ourselves very much more dependent on foreign sources, even more so than we are today. I think America should wake up to the fact that we are becoming much, much more dependent and we are just standing idly by.

A year ago this country imported 27 percent of its crude oil and products needs. Last month we crossed the 40-percent range. That figure is continuing to accelerate because we are not drilling. We are not replacing the reserves and the production that we found many years ago. A lot of those wells are being depleted. A lot of those wells are being shut in and shut in prematurely as the prices have fallen. They are not economic.

Our lifting costs are much higher than most other countries' costs. So we are shutting down a lot of that marginal production. We have over 450,000 stripper wells which are marginal producing wells. They produce less than 10 barrels per day. And about a third of those right now are not economic. If prices decline much further, as well they might if an accord is not reached in Geneva, we will find even higher and higher percentages of those wells being shut in. If they are shut in, we will be importing more and more and more.

□ 1255

I might remind my colleagues when we had the shortage of 1973 we were only importing, about 35 percent of our oil and refined product needs. In the shortage of 1979, we had the long gaseline lines and we had factories shut in, and we were importing again, about 44 percent. Right now, we just crossed the 40 percent threshold and we are becoming more and more dependent.

So we have not learned from history. There are some things that we ought to be doing to help this industry. I am not talking about having the Government write checks. I am not talking about major subsidies.

The elements in this package were well thought out. They were put together by several of us who were trying to see what we could do to help this industry when it is hurting and it is on its back, really in bad shape. What can we do? Several of these proposals are nothing but common sense. They should have been enacted sometime ago.

I really regret the fact that we are not able to get this bill up for a vote. I know the legislative time schedule is short. I know my good friend, the Senator from Kentucky, has indicated he would speak at great length if we had the coal capability provision put in as it is. I respect his position. But I think we could and should be able to work out a combination to help the coal industry as well as the oil and gas industry. This Senator also happens to have coal production in his State. He is not interested in doing one thing to help one industry to the detriment of another. I really think that economics should be making these fuel choice decisions and not politicians and bureaucrats.

There are several provisions in this legislation that would help, and help today. Repeal the windfall profit tax. We should not have passed the windfall profit tax in 1979, but certainly now there is no justification whatsoever to have a windfall profit tax on the books. There is no windfall profit! The people who are producing oil in my State and throughout the country are losing money. They are not making money. So let us eliminate this ridiculous tax, get it off the books. It is probably the most anti-free enterprise legislation that ever passed Congress. It should be repealed by Congress.

I am pleased that we did repeal it in the Senate. I proposed that amendment. It was repealed by a vote of 51 to 47. It is still pending on the debt limit bill, but most people are saying now that the House will not agree and will strip that provision from the debt limit extension.

I hope that is not the case.

This proposal also calls for an assessment, a study, on the impact and security consequences of the amount of oil that we are importing, which I have already addressed. One of the problems that we have is that we have an industry presently still diverted on an oil import fee. I support an oil import fee. I do not think we should become that dependent on foreign sources.

I also think it is ludicrous that we had a domestic tax called a windfall profit tax, which has only been on domestic producers, not on foreign oil and not on foreign imports. We have had the absurd policy of taxing domestic producers and not taxing imports, thereby hurting our own producers and helping foreign production.

So we have encouraged imports and we have discouraged domestic production. That makes no sense. It makes no sense whatsoever.

I would hope that maybe as a result of this study, we will be able to get some conclusive information together that, yes, we are becoming too dependent on foreign sources. Maybe the minds and powers will agree, and maybe we can get more support throughout Congress, that it really is not to the advantage of this country to become so dependent on unreliable sources, particularly when those sources are Government-controlled and Government-manipulated and very much not in the best interest of the United States in the long term.

We have several other provisions in this proposal that I think will help. We have a transportation provision for natural gas. I know Senator FORD and others have worked on this at some

length in the Energy Committee. We worked on this for a couple of months. This provision basically would help us move gas from the production areas to the consuming area. That is a provision that will help not only the natural gas industry, but also the production industry and the consumers.

In addition, the bill repeals the Fuel Use Act. It makes no sense whatsoever to have politicians and bureaucrats deciding what fuel we will or will not burn. Let us allow the marketplace to make those decisions.

We have several provisions dealing with regulatory reform. We need regulatory reform. Again, this is common sense, with well-thought-out proposals that I think can help the industry and our country.

Mr. President, when we reconvene for the 100th Congress I can say as this Senator, a principal cosponsor of this legislation, I will do everything I can possibly do to enact the legislation. I hope at that time we will be successful. I hope with the meeting in Geneva which is currently occurring, that we are not too late. I hope by the time we are convening in January and February of next year that we will not find the domestic industry of our further decimated.

Mr. President, I rise in support of my distinguished colleague from Texas and the Oil and Gas Production Revitalization Act. As everyone knows by now, our domestic petroleum industry is on the ropes. The energy security of our country is seriously threatened by restrictive laws, declining prices, and imports.

It is high time we got on with the reform measures set forth in this Oil and Gas Revitalization Act. In addition, I believe we need to enact an oil import fee to set a floor on the price of oil in order to keep our marginal wells from being shut in. The economic and security assessment of oil imports provision in this bill will go a long way toward furnishing a basis for such a fee.

Let me recap briefly the symptoms and problems we face in the industry.

RIG COUNT

Rig counts, the tangible test of our energy exploration and development effort, have dwindled from a high of 4,500 rigs in 1982 to 814 nationwide as of yesterday, down from 1,906 a year ago. In my own State, we once had 800 rigs running; today we have only about 100.

OIL PRICES

Prices have dropped to the point where it is no longer economic for many American wells to continue to operate. With west Texas intermediate crude quoted at $14.23 a barrel, stripper wells, which comprise two-thirds of the producing wells in the United States today, have become uneconomic.

At $15 a barrel, the Nation will lose 22 percent of its over 450,000 stripper wells. This means over 100,000 lost wells, 277,000 barrels a day of lost production, and three quarters of a million barrels of lost U.S. reserves.

OIL IMPORTS

Saudi net back arrangements and price cutting have resulted in imports of 5.9 million barrels a day for the last month, up 42 percent above the average a year ago. We are fast reapproaching the reliance levels of the 1970's embargo days. It will not be long until we are 50 percent reliant on foreign oil imports.

JOBS

The fall in oil prices and accompanying increase in imports has had a catastrophic effect on employment in the industry. Studies show that over 51 percent of the oil and gas service industry jobs—some 223,000—have been lost since the beginning of 1985, and another 60,000 to 70,000 additional jobs will disappear by the end of 1986. In my State alone, about 60,000 jobs have been lost.

The loss of jobs has had a ripple effect on the economy. Thirty-three banks have failed in our State in the last 2 years and bankruptcies are up 51 percent.

Mr. President, with conditions such as these, it becomes all the more important that we have an effective oil and gas reform program such as that in our bill. We need to repeal the windfall profit tax as the Senate did a few weeks ago. The industry has paid out $77 billion in the last 5 years and received absolutely nothing in return.

We also need to continue filling the strategic petroleum reserve, preferably with domestic oil. If it ever made sense to buy low and later sell high, now is the time.

We also need to get a strong contract carriage provision in order to get our natural gas to market to keep income up for our producers and save money for consumers. Despite an excess pipeline capacity in the United States, producers in my State are still shut in. The Energy Information Administration predicts that a full implementation of carriage provisions will save the consumer about 30 cents per million cubic feet and stimulate demand for natural gas by about 0.25 trillion cubic feet in the next 3 to 4 years.

Mr. President, the bill contains many other provisions which will help the industry to get back on its feet. Repeal of the Fuel Use Act will allow consumers to choose the least costly fuel available, thus saving the consumer billions of dollars.

In addition, repeal of FUA should further reduce domestic consumption of imported oil. Repeal of incremental pricing will remove legal impediments to the full and efficient use of domestic energy supplies and will further help to reduce the use of imported foreign oil.

Other provisions will help domestic gas to compete with foreign gas imports on an equal basis, encourage the export of oil field equipment and drilling technology, and permit small, independent producers to pool their natural gas for more effective resale to the consumer. In addition, the environmental provisions go a long way toward establishing workable conditions with which the industry can live, while protecting the environment at the same time.

Mr. President, I would ask our distinguished colleagues from the other side of the aisle join us in cosponsoring this bill and making it a truly bipartisan measure with the backing of both parties, as well as industry and the President.

Since it is so late in the legislative year, I promise to work with my colleague and friend from Texas, as well as with my colleague from Idaho, the distinguished chairman of the Senate Energy and Natural Resources Committee, in the coming months to ensure that hearings are held on this landmark legislation and with the distinguished majority leader to ensure that it gets the highest legislative priority in the next Congress.

We owe at least that much and more to the industry and the security of our country.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Who yields time?

Mr. GRAMM. Madam President, I yield such time as the distinguished Senator from New Mexico desires.

Mr. DOMENICI. Madam President, I yield myself 5 minutes.

The PRESIDING OFFICER. There are 4 minutes remaining.

Mr. DOMENICI. I yield myself 4 minutes.

Madam President, obviously, as a Senator from New Mexico, I have a genuine parochial interest in this issue. Frankly, my concern goes well beyond that. I am very concerned about our growing dependence upon foreign oil, and, on the other hand, the significant diminution or lessening of our reserves of both oil and natural gas.

This country is a country that exists on energy. If our country is denied the capability of having enough energy to run its day-to-day life, its industrial life, its business life, if we are denied that even in some small respect as we were in the one boycott that we had, this country just cannot make it.

We can harken back to the days of a very small percentage of the oil that was coming in being denied us by some of the countries in the Middle East who said we could not have any more, but just a very small portion. To show the significance of oil in those days and their derivatives by way of gaso-

line and diesel fuel, we almost had civil strife.

You recall in some of the Eastern States as people waited in line for gasoline starting at 3 or 4 in the morning and sometimes until the evening to get to the pumps, we even had murders occurring in the lines as they waited because of the anxiety and hatred that was generated. I believe in one State a fight occurred and there was even a shooting. We were only talking about a small percentage reduction in the oil necessary for our ordinary daily lives and the operation of this energy-consuming Nation which has received such benefits that our material wealth is unparalleled and unrivaled. They go together. Our material and economic strengths are tied to the fact that we need great quantities of energy every day.

We built that machine around oil and natural gas. Obviously, we have huge quantities of coal and in the electric generating area that is very, very important.

But you see what is happening to the United States today as we have moved in the past few years more toward independence, as we moved away from dependence on imported oil, how strong we began to feel about our future and how confident.

Now, with the precipitous drop in prices, engineered, obviously, because the Middle East countries were no longer capable of managing that market so they created a glut and down came the prices, with it go our hopes of independence and, conversely, our growing dependence on foreign oil. The numbers have all been spoken here today.

The projections into the late part of this decade and the early part of the next have been spoken of in terms of how dependent we will be.

I must say, Madam President, that we do not have the capacity to diversify as we thought. We thought perhaps we would have moved down the line substantially with new technology on converting coal. We have not. We did one of the big programs, synthetic fuels, which went by the boards, for better or for worse; we are still significantly dependent on foreign oil, basically foreign oil in its original form, and we have not broadened our capacity to use coal in diversified ways, in ways that are conversions from the natural state to the extent that we should.

The reason I am here today is I know we are not going to pass this bill.

The PRESIDING OFFICER. May I say to the Senator from New Mexico that he would have to get time from the Senator from North Dakota.

Mr. GRAMM. Madam President, would the distinguished Democratic manager yield me 10 minutes of his remaining 15 minutes?

Mr. BURDICK. I yield to the Senator 10 minutes.

Mr. GRAMM. I thank the Senator.

I yield to the Senator from New Mexico 2 additional minutes.

Mr. DOMENICI. Madam President, I thank both Senators.

I come here not because I believe there is a chance in the waning days of this session to pass this bill, but clearly, I would like to send some hope to those people in my State and surrounding energy States, in particular the oil and gas producers and those who depend upon them for a livelihood, that we have not forgotten about them, that our country understands that we have a real crisis, and that indeed, we must take whatever steps we can consistent with our economic system to alleviate the growing dependence and the tremendous malaise, human and economic, that exists in many of the States that were producing oil and gas in abundance for the United States.

If we passed a windfall profit tax repeal, I am sure it would die in conference. Strategic petroleum reserve—the bill provides for 50 percent of it coming from American production. We know many of the other provisions that have been alluded to. They are good, they are solid, they have a real chance of helping.

I am most pleased with the provision that requires an economic and security assessment of imports and the reliance thereon. I am hopeful that, even without passing this bill, the President and his advisers will do that. The President has the authority to do it and ultimately will have the authority to respond if the study comes out, as we think it will, with some kind of import fees to begin to alleviate the problem that is so rampant in Oil Patch and that will soon be felt across this land if we do not develop more reserves; if we do not get out there and produce more oil for ourselves; and if we continue to grow in reliance, as far as natural gas, on Canadian natural gas and diminished use of it in the United States because we are substituting other products.

I am hopeful that next year, we will get started in a serious way on these items I have enumerated, all those in the proposed bill, many on natural gas, including the repeal of the Fuel Use Act. I compliment the original cosponsors of it. I am pleased to be here to support it and pledge my assistance next year as we attempt to move this kind of measure early in the session so it may reach some kind of fruition and try to do some good for the people in our States and in the United States.

Mr. GRAMM. Madam President, I yield 5 minutes to the distinguished Senator from Wyoming.

Mr. SIMPSON. Madam President, I shall not require that much time. I express my appreciation to the Democratic manager [Mr. BURDICK] for his courtesy in yielding some time to Senator GRAMM.

Madam President, I rise to support the amendment and to commend the efforts of my colleagues, Senator GRAMM, Senator NICKLES, my good friend and fellow Wyomingite, Senator WALLOP, and others who have joined in cosponsoring this very important piece of legislation. This amendment will nicely cover just about all the bases in our attempts to assist the beleaguered oil and gas industry in this country. People, who live outside of the traditional oil and gas exploration States are just starting to realize that our increased dependence on foreign oil imports and our greatly reduced exploration and production activities in this country will result in an unstable and insecure reliance on energy supplies from other countries.

This legislation contains some very important provisions such as the repeal of the windfall profit tax, assessment and review of oil imports from both the economic and security perspective, repeal of the Fuel Use Act and a variety of regulatory reform provisions.

This legislation is a starting point—a good place to begin. It is not perfect, and I trust that all interested parties will take the opportunity to have their voices heard during hearings when this legislation is reviewed both by Congress and by the oil and gas industry.

I will be right there participating in that debate. Many issues will have to be reviewed, such as retaining coal capability to ensure fuel flexibility for new boiler plants. Another issue which needs to receive our serious consideration is the provision which expresses the sense of the Congress that the currently accepted "full cost" and "successful efforts" accounting methods presently used by the oil and gas industry should not be changed. Requiring small independent producers to change from the full cost method to the successful efforts method could affect about 60 percent of the industry and would result in an enormous economic burden during the transition. The successful efforts accounting method would not reflect the business status of independent producers as fairly as would the full cost method. These are but two examples of the provisions that need to be seriously considered and studied and I pledge my support in working hard for the passage of this legislation.

I just want to state, as those of us have from the oil and gas-producing States, that here is an opportunity to do something. We have as yet done nothing.

I do not think people realize what is happening in the oil and gas-producing States. They are pleased with the

lower price of the product. They are pleased with the lower fuel prices and fuel oil prices. It has been covered very well and I shall not be repetitive. I simply say it is a deeply serious problem and I appreciate the recognition of it by our colleagues around the United States.

Madam President, I support the amendment. I know full well we have our time crush upon us. I know it will come before us next year. I am very proud to cosponsor this legislation because I think, finally, it begins to cover all the bases as to what we have to do here. People, as I say, who live outside these traditional States realize this increasing dependence, which presses us back on things that Senator NICKLES so carefully reviewed. But the several things among all the things in this bill that please me the most are the work we do in repealing the windfall profit tax—which is, of course, not in existence right now because there are no profits to windfall. So we do not do it.

There is one provision in here that is particularly good. That is on export of oil field equipment and drilling technology. I think that is one we need to pay attention to. That can help our large construction and machine tool industry. Exporting oil field equipment and drilling technology into China and other countries around the world, I think, will be very, very important and reduce these current restrictions on trade.

The transportation of natural gas portions of the amendment are excellent. The natural gas rate design is something we have needed. The repealing of the demand restraints of the Fuel Use Act is very important; particularly repealing the incremental price requirements of the Natural Gas Policy Act. Those have caused us lots of pain. And decontrol did not lead to increased prices, it led to lower prices.

I hope we will correct all of it. This is a good vehicle to correct all of it and I commend the sponsors for the provisions on waste requirements, underground tanks, land treatment sites, and industry accounting methods.

Madam President, I conclude by urging my colleagues to give this measure consideration during the committee process and during floor debate at the appropriate time. We need to heed the warnings in this country and begin to heal the pain and anguish of the oil and gas industry, which is, indeed, our bread and butter in my State and in the country. I think this is a critically important measure. I commend all the cosponsors of both parties who have been so active on this measure.

I thank the Chair.

Mr. MURKOWSKI. Madam President, I rise today in strong support of the Oil and Gas Production Revitalization Act. I am a cosponsor of this bill and believe that many of its provisions are sorely needed to help our domestic energy industry through these difficult economic times.

This amendment is being offered under a unanimous-consent agreement that provides for the amendment to be withdrawn once a record has been developed on the extreme need for the relief provided by the act. I understand and appreciate the constraints which have forced such an agreement. However, I am disturbed that many Members of the Senate are willing to ignore the very serious situation facing our domestic energy industry.

The ramifications of that situation are extreme—not only to the hundreds of thousands of people who have lost their jobs in recent months because of the decline in oil prices—but to this Nation as a whole.

Mr. President, we are rapidly losing our ability to provide for our own energy needs at a level which ensures any degree of national security. Our reliance on imported oil has increased by 42 percent since last year at this time. And there are plenty of reasons to believe that imports will continue to rise.

The obvious question presented by this scenario is: At what level of imports is our national security put at risk?

This bill provides a clear way to answer that question. It directs the National Security Council and the Department of Commerce to conduct a thorough assessment of the impact of oil imports on national security. Such an evaluation would give us many of the answers that we do not now have.

This bill does other things which would be of great benefit to the energy industry of this country—repeal of the windfall profits tax, repeal of the Fuel Use Act, repeal of incremental pricing of natural gas—just to name a few.

Mr. President, my only objections to this bill is that it does not go far enough. I believe there are other steps we can take to address the problem currently facing us.

An oil import fee proposal comparable to the one introduced by Senator DOMENICI, myself and a dozen other Senators in August would be a welcome addition to this bill. Repeal of the prohibition on the export of Alaska north slope crude oil is another provision that we should be considering in the present context.

I understand the reality of the situation, however, both of those proposals are more controversial than the provisions of this amendment—if that is possible. As a consequence, all that we can do here today is to build a record and hope that we are capable of taking constructive action early next year.

Let me assure my colleagues, Mr. President, that we will be back next year. The problems facing this Nation as a result of the current price of oil will not go away before next year—they will only get worse. Congress must face up to these problems sooner or later, and the sooner the better.

The PRESIDING OFFICER. Who yields time?

Mr. GRAMM. Madam President, under the unanimous-consent request, I yield back the remainder of my time and withdraw the amendment.

Mr. BURDICK. The minority yields back the remainder of its time.

The amendment (No. 3409) was withdrawn.

Mr. JOHNSTON. Madam President, I rise in support of H.R. 5465 , the National Appliance Energy Conservation Act of 1986. I hope the Senate will act promptly to return this bill to the House and that the House will send it on to the President for his signature.

The legislation before us is identical in every provision affecting energy conservation in applicances to the bill the House passed overwhelmingly on September 22. The only difference is the absence of a single section of the House-passed bill affecting a matter being considered by the Federal Energy Regulatory Commission. This provision was deleted by the Committee on Energy and Natural Resources because it is in no way related to appliance energy conservation and because the controversy over the matter could imperil passage of the appliance efficiency legislation that has such widespread support.

These amendments to the appliance efficiency provisions of the National Energy Act are supported by a coalition of more than 40 organizations, running from the National Association of Manufacturers to the Sierra Club and the Methodist Church. The details of the bill establishing national appliance efficiency standards in Federal law for all major appliances are the result of intense negotiations involving representatives of the appliance manufacturers and State and environmental groups. This process is an interesting one and one that we may see more of as long as the current leadership vacuum persists at the Federal level. This legislation was developed by a coalition of private, public interest and local government groups because the current administration, imprisoned in its free market ideology, has abdicated its responsiblities under the existing appliance efficiency law. Ironically, this abdication now threatens the appliance manufacturing industry, and that is the reason we are amending the existing appliance efficiency law to nearly eliminate any substantive administration role in it.

In many respects the provisions of H.R. 5465 resemble the original legislation contained in the 1978 National Energy Act that directed the Depart-

ment of Energy to promulate mandatory appliance efficiency standards.

Then, as now, there was a perception that standards would result in energy savings that the free market would not provide.

Then, as now, States were showing considerable interest in establishing efficiency standards of their own as a way of capturing the benefits of energy conservation for their citizens.

Then, as now, the appliance manufacturing industry was seeking relief from a potential patchwork of State regulation that threatened to make design and marketing of appliances much more costly and difficult.

Then, as now, the quid pro quo for the preemption of State appliance efficiency standards was establishment of uniform, achievable Federal standards.

The policy of the 1970's was never implemented because the administration refused to promulgate the required Federal standards. A clash of conservative ideology led us in a complete 360-degree circle to where we are today. Free-market conservation ideology abhors Federal standards. States-rights conservative ideology abhors preemption of State law.

So the administration completely emasculated the Federal appliance efficiency standards required under the National Energy Act, promulgating a no-standard standard at the Federal level. That was the good news for the appliance industry. The bad news was that the administration has no intention of allowing the Federal no-standard standard to preempt appliance efficiency standards promulgated by States.

The door was open for a system of State regulation of the appliance industry far more extensive than anything that could occur under the most vigorous and lopsided implementation of the National Energy Act. It had taken years to recreate the exact conditions that led to the original appliance efficiency legislation, but this administration had done the job.

We now have States moving agressively to promulgate energy efficiency standards for new appliances. These standards, inevitably, given the vacuum in Federal leadership, will impose a considerable burden on the appliance industry. Meanwhile, consumers have lost years during which the more efficient appliances this legislation would mandate could have been saving them money. And this has happened as a direct and entirely forseeable result of administration policy.

Having recreated the problem, the administration has done nothing to develop the solution to it that is being presented to the Senate today. The administration has simply been irrelevant.

The solution we are considering today has been developed by an extraordinary coalition of industry and environmentalists and other interested parties who, in effect, are playing the role that the administration is supposed to play in our form of Federal Government. This coalition has negotiated a proposal that addresses the national interest in energy conservation, the industry interest in rational regulation and the State interest in protection of its citizens. This coalition has come to Congress with its case for reform because there is no way that an administration that is so beset with contradictory ideological impulses could deal with its problems.

We will deal with them. This legislation will pass, and it will certainly lead to less regulation. Moreover, it will save energy and it will save resources.

It is a shame that, with its ideological blinders so firmly in place, the administration has been able to contribute nothing to these worthy goals.

Consideration of H.R. 5465 in the Committee on Energy and Natural Resources was not without some controversy. It is appropriate that the legislative history reflect that controversy and the manner in which the committee dealt with it. There was a concern on the part of several Members that the rule to be issued by the Department of Energy under the bill to set a standard for small gas furnaces, set a standard for these furnaces that provides a level playing field for gas utilities, especially in the starter homes and multifamily builder markets. First cost—not operating cost—influences builders selecting heating equipment for starter homes and multifamily dwellings. In many cases the consumer does not have a choice because the builder has made it for him. This is a major reason which efficiency standards for appliances achieve benefits for consumers that the free market cannot provide.

According to the American Gas Association, the average annual heating bill for a natural gas home is $457, compared to $1,160 for electric resistance heating. In 1995, the gap may widen. The owner of a natural gas-heated home would pay $404 annually, while an electric-resistance-heated home would require $1,526 annually for heating. Thus, natural gas would seem to be far less costly to operate, offering significant payback advantages over electric resistance heating.

Gas utilities vigorously compete in the marketplace by encouraging builders to add gas water heaters and other gas appliances in the home to provide the ultimate customer with an even greater positive payback.

We were concerned that, if the Secretary establishes a standard for small gas furnaces at 78 percent, as originally proposed, the first cost differential between electric resistance heat and natural gas will increase to the point where builders will not even consider gas heat, particularly in southern areas where heating is a minor part of the overall residential energy requirement. With regard to the first cost, according to AGA, a 71-percent efficient gas furnace costs $475. Electric-resistance-heating equipment costs on an average $350, a difference of $125. By contrast, a 78-percent efficient gas furnace entails additional installation and duct work cost estimated conservatively at $150 to $200. Thus, the builder could save some $500 per living unit by choosing electric resistance heat over a 78-percent efficient gas furnace.

One of the main goals of this legislation is to encourage energy conservation without unduly altering the economics of fuel choices. This goal will be impaired unless the standard for small gas furnaces is set so as to avoid raising the cost of these furnaces to the point where builders are forced to select electric resistance heat instead of a gas furnace purely on the basis of first cost.

That is why I added language in our Energy and Natural Resources Committee report making it clear that the Secretary must pay due consideration to the need for utilities to continue to compete fairly when DOC considers setting the standard for small gas furnaces. I made it clear the committee was concerned that setting a standard for small gas furnaces at or near the 78-percent level mandated in the bill for larger gas furnaces would increase the first cost of the small gas furnace sufficiently to induce a significant switch to electric resistance heating.

The report language goes on to say that the bill will, upon a sufficient showing, "* * * forbid a standard for small gas furnaces being set at a level that would increase the price to the point that the product would be noncompetitive, resulting in minimal demand for the product."

Madam President, I urge adoption of the bill.

Mr. CRANSTON. Mr. President, I am delighted that the Senate today will pass legislation establishing national energy conservation standards for major household appliances, an idea I first authored in S. 1360, introduced in June 1985.

I appreciate the prompt work of Chairman MCCLURE on the latest version of the bill, and want to thank my distinguished colleague from Washington [Mr. EVANS] and the other Senators who have worked so hard for passage of this important legislation.

I have been actively involved with the appliance efficiency issue since the energy crisis in the early 1970's. I realized long ago that the future of our Nation rests, in part, on more efficient use of our energy resources. This bill will result in very large energy savings nationally.

Since S. 1360 was first introduced, extensive negotiations have occurred, and the bill we pass today, which the House has previously passed, has the complete support of the trade associations representing the appliance industry, as well as the National Resources Defense Council and other groups primarily interested in conserving energy and other precious natural resources.

S. 2781, the National Appliance Energy Conservation Act of 1986, is an important step toward ensuring America's energy future. By eliminating the least efficient appliances in the marketplace, this bill will, by 1993, cause major appliances to be at least 15 to 25 percent more efficient than the average appliance sold in 1985. In addition, there are other near-term benefits for the American people.

With national standards and the strong State preemption language in this bill, manufacturers of major home appliances will avoid facing a rapidly multiplying patchwork of varying standards in each State in which they choose to do business, and will have their ability to compete in foreign markets enhanced.

It will benefit consumers who operate new energy-efficient appliances, because they will save money on their electric bills. One-third of the energy we use in our homes operates electrical appliances and this percentage is increasing.

Utility ratepayers and shareholders will benefit, because as consumers use more efficiently the electricity utilities generate, utilities can avoid building expensive new powerplants to meet anticipated demand increases, and can cut use of inefficient, costly to run powerplants. Just replacing with high-efficiency models the 12 million refrigerators and freezers Californians owned in 1982 will enable California consumers to reduce their energy use by an estimated 5 percent, about 1,700 megawatts.

The new appliances will cost consumers about $705 million—much of which people would spend routinely for appliance replacement—while building new powerplants this size to meet increasing demands for electricity would cost more than $6 billion, more than six times as much.

By adopting clear national standards that meet the needs of the States, this bill will satisfy each of these interests.

At the same time, the bill preserves the ability of States to respond to substantial or unusual local energy problems, such as high electricity, gas, high dependence on oil—or fuels whose price is tied to oil—unusual climatic conditions, or adverse environmental or health and safety conditions that can be alleviated by energy-saving appliances, within the regulatory scheme.

The energy savings at stake are very substantial. Before California adopted its appliance efficiency standards, refrigerators and refrigerator-freezers consumed 12 billion kilowatt hours of electricity each year, according to the California Energy Commission.

But in 1983, as a result of the appliance standards on refrigerators and refrigerator-freezers, residential users saved around 213 million kilowatt hours of electricity.

California consumers saved $18 million in operating costs on refrigerators alone.

According to the American Council for an Energy Efficient Economy, this bill will enable the average American household to save over $250, and the economy to save a total of 22,000 megawatts of electricity—the equivalent of the peak output of 22 larger powerplants—between now and the year 2000.

DOE now estimates that new powerplants—which will be needed unless projected electric demand is reduced—could cost utility ratepayers upward of $1.8 trillion by the end of the century.

With efficient appliances much of this capital expenditure and wasteful use of energy resources will be eliminated.

Manufacturers will be able to meet the standards without undue hardship, and consumers, utilities, industry, and the enviroment all will benefit.

National use of efficient appliances will save consumers billions of dollars, ease utility load management problems—especially during peak periods—hold down future energy costs, free capital for other purposes, and permit the rapid and least costly reduction of emissions from coal-fired plants responsible for so much acid rain damage. We can provide for our future energy needs without endangering our environment.

I am very proud of the role I have played in the development of this important legislation.

The PRESIDING OFFICER. All time has been yielded back, is there any further debate?

There being no further amendments to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So, the bill (H.R. 5465) was passed.

Mr. FORD. I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. FORD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHILES. Madam President, I ask unanimous consent that the call for the quorum be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DRUG BILL

Mr. CHILES. Madam President, at 3 o'clock, it is my understanding that the Senate will proceed to a cloture vote on the drug bill. That vote is very important. We know that we are into the last few days of this session, and we know that if cloture is invoked, we would still have 30 hours available for debate under the bill. If cloture is not adopted, there is no limitation of time.

I know there are some 14 Senators on the Republican side who have written the majority leader expressing their disapproval and that they will conduct a filibuster on the bill if the death penalty is included. I know there are perhaps a like number of Senators on the Democratic side who have also expressed this concern.

We find ourselves in this kind of dilemma: We have people with very strong feelings on both sides of the issue of the death penalty, some who are taking the position that this bill without the death penalty is not worth passing and should not be passed. We have some on the other extreme who say that if the bill has the death penalty, there will be no bill. Somewhere in the middle I think is a majority of the Senate, I think a strong majority, which says we find ourselves with the opportunity to pass the most far-reaching bill to deal with drugs that Congress has ever had before it. We have a bill that has been put together within about 2 months—again, it is historical for the Congress to be able to move this quickly.

We have to ask ourselves why has that happened. It has happened because we are a nation under seige. We are under seige with the onslaught of drugs that have come into our country. We are seeing our children become victims of addiction to crack and many other drugs, but now the new wave of crack cocaine that you cannot experiment with; if you try it once, chances are that you will be hooked. If you use it up to three times, we know that you will become hooked, and it is the strongest addiction that we have found. We find again once people are hooked, all they can think about is staying high, that euphoria which they get, but there is a corresponding down that is just as deep in its trough as the high is at the crest of the wave. And so we find that people, when they are addicted, will go out and steal, rob, lie, cheat, take money

from any savings, take refrigerators out of their houses, anything they can get their hands on to maintain that habit.

That, of course, has caused crime to go up at a tremendously increased rate in our cities and in our States—the crimes of burglary, robbery, assault, purse snatching, mugging, those crimes where people are trying to feed that habit. Our local police and our sheriffs have found themselves unable to cope with the crime, and we are finding areas in which drugs are delivered in curb service—you just drive onto certain streets and the peddlers are out there besieging you to show you that they have a better form of rock, a better form of drugs.

Because of that, there has been this feeling that we had to do something about it. I have never seen anything strike the Congress with such impact; virtually during one recess the minds of the Members of Congress changed entirely, recognizing that we have a terrible problem and we must deal with it.

I think we find in this bill something that goes beyond saying that we are going to get tough. To do that we have very strong penalties, mandatory sentences for the use of crack in small amounts; we distinguish crack and make it one of the most dangerous drugs; we deal with designer drugs; we deal with many other areas, so there are very, very tough law-enforcement provisions.

But at the same time, Madam President, this Congress is recognizing there must be some money for education, we must do something on the demand side if we are going to get to the root of this problem. So we virtually double the funds for interdicting drugs, stopping drugs from coming in, and we say we are going to do something to stop the demand for drugs; we are going to do something to encourage every State to provide mandatory programs of education kindergarten through 12, starting at the earliest grades and going through high school, to see that we inform our young people of the dangers of drugs and teach them to be able to say no, to be able to resist those kinds of drugs.

We also are providing some funds for rehabilitation. We recognize that we have a large number of people who are addicted, many of whom we hope will seek and get help if they know it is available. In my State, the waiting list for beds in public rehabilitation centers is over 500. Private facilities are so terribly expensive there is no way they are available to the mass of the people.

We provide funds for those State and local police forces, assistance which has to be matched by some of their own money, so we are not talking about a revenue sharing situation. It has to be new money. We are talking about new efforts they are making, not just helping in some of their additional efforts. So there are major, major features.

However, Madam President, for those people who do not want to seek treatment, who want to continue trafficking in these drugs, we are talking about building the Federal prison space in which to be able to put those people, lock the door for a while, and throw the key away if they resist any kind of treatment or help.

All those features are in this bill, from interdiction to trying to beef up our own Federal effort, our DEA, our Customs effort, Coast Guard, using the military in a better way, then trying to assist the State and local efforts in law enforcement, then trying to work on the demand side, education, rehabilitation, and providing the necessary prison beds.

□ 1330

To my knowledge, it is the most far-reaching bill I have ever seen dealing with drugs. Will this bill in itself solve the problem? No, it will not. It is going to take a lot of effort at the family level and at the local level to be able to deal with this problem. But the Federal Government will be taking its role of being a major player in this and showing how seriously we consider it.

There is a sense of the Senate provision in here urging the States to call special sessions to change their laws to deal with the drug problem, because we know that many of those crimes will be tried in State courts. I am delighted to say my State is already talking about when they are going to call their special session. I think it will be at their organizational session after the elections. They already have a special panel appointed by the committee that is recommending changes in sentencing, changes in rehabilitation, beefing up the rehabilitation program, and the education efforts that must be made. Those efforts are good, and the States should do those. We, the Federal Government, need to be the leader.

So we have this opportunity in the closing days of this session. It would be tragic if we allowed this to slip by, by this fight over the death penalty. I support the death penalty. If I could draw this bill in its entirety—and I have certainly tried to help in adding some items to it—I would include the kind of narrowly defined death penalty that is in this bill. But, at the same time, there is no way I would sacrifice all the good things in this bill by saying that we have to have the death penalty in it. I will try to urge my colleagues who feel so strongly about the death penalty that they should not sacrifice this bill because they have this feeling against it.

So, regardless of how this cloture vote comes out, I hope we will recognize that we have to pass this bill, not only the Senate but the House as well. If the Senate passes the bill, I assume it will be without the death penalty, and it will be sent back to the House, and then we have to be concerned as to whether the House will accept it on that basis.

I say to our brethren in the House that if we are able to pass the bill in the Senate—and that is a stripped-down version of the bill—I hope the House will not allow this bill to die because they would insist on the death penalty.

So we find ourselves in the position where, in our closing days, we have within our grasp a bill that is important, that has many worthwhile features, that literally is sort of devoid of controversy, that the body almost unanimously is for, other than this one provision. It is the purpose of a deliberative body to deliberate, and it is to conclude, and it is to pass a product that could be very valuable for the people of our States, for the people of this great country, to attack this onslaught in which we find ourselves. I hope we will not pass up this great opportunity we have over the issue of the death penalty.

Madam President, I am urging our colleagues to search their hearts and their consciences and to realize that, regardless of their personal feelings on that one issue, this bill contains so many worthwhile provisions that we need to pass it in the Senate and in the House; and we should give this kind of assistance to the people it will help.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR RUSSELL LONG

Mr. BYRD. Madam President, it is with regret that I say farewell to my friend and colleague, Senator RUSSELL B. LONG. He is a Senator whom I have long watched and admired, and for whom I have learned incalculably much since the first day I took a seat in the U.S. Senate. And I will always be inspired and guided by his example after he leaves the Senate.

Senator LONG came to the Senate under a burden that few of us realize—having to follow in the footsteps of his legendary father, Senator Huey Pierce Long. But as all of us know, he has more than succeeded in that task. His accomplishments as a Senator are legion. His performance as the skillful

chairman of the important and powerful Senate Finance Committee for 14 years was masterful. His legacy is monumental.

RUSSELL LONG was first elected to the Senate in 1948. On most of the landmark tax and trade legislation since that time, you can see the imprint of this remarkable Senator.

During his 37 years as a U.S. Senator—time in which he has ever been attentive to the wants and needs of the people of Louisiana and the people of the entire United States—Senator LONG became one of the Senators who is an institution within this institution. He became one of the Senate's most powerful voices on Federal economic and tax policy, and he dominated legislative areas such as trade, health care finance, tax, and Social Security.

During his tenure in the Senate, he served on the Commerce, Science, and Transportation Committee, the Banking and Currency Committee, the Senate Select Committee on Small Business, the Senate Armed Services Committee, the Democratic steering committee, and the Foreign Relations Committee. He also served on the Select Committee on Ethics and the Joint Committee on Taxation.

He further served as the Senate's assistant majority leader, chairman of the Merchant Marine Subcommittee of the Commerce Committee; chairman of the Surface Transportation Subcommittee; and chairman of the Military Construction Subcommittee of the Armed Services Committee.

But it was on January 10, 1966, that Senator LONG was named chairman of the Senate Committee on Finance—and then a legend began. In his 15 years as chairman of one of the Senate's most powerful and important committees, Senator LONG displayed a mastery of the subject matter and such skillful management abilities that his opponents were often in awe.

Senator LONG's legislative achievements included the landmark 1972 and 1976 Federal revenue sharing laws, the 1969 and 1976 tax reform laws, and increases and changes in Social Security and Medicare benefits to ensure that most of this Nation's aged, blind, and disabled citizens would be raised out of poverty and could receive adequate medical treatment.

He was an influential cosponsor of legislation extending the Voting Rights Act in 1984, and he has pressed for a balanced foreign-trade policy to protect American jobs and to save industries that are vital to the security of the United States.

As the Senate Democratic leader, I have witnessed another special quality in Senator LONG that I have long admired and appreciated over the years.

Senator LONG has never failed to revere the U.S. Senate as an institution crucial to the successful working of American democracy.

Senator LONG has been one of those Senators who understands the working of the Chamber. He reveres its rules, its procedures, its precedents, its customs, and its traditions. He knows that if they are ignored or forgotten, American democracy loses, because the carefully balanced system of government established by our forebears is thrown out of alignment.

Time after time, I have seen Senator LONG brace the momentary political winds and whims to ensure that these time-honored traditions and procedures are continued.

It was his respect for the Senate's traditions, and for the role of the Senate in American society and government, that led him to oppose televising Senate proceedings. This is one of the infrequent occasions when he and I disagreed—but even in our disagreement, as usual, I respected his judgment.

As a matter of fact, when I decided that the time had come for television and radio coverage of Senate proceedings, the very first Senator with whom I talked was Senator LONG. I knew of his strong feelings about the matter, and I realized how important it would be if I could persuade Senator LONG to change his position and support television and radio coverage of Senate debate and deliberations. But even though I felt I might not be able to persuade him to change, I felt it was highly important that I discuss it with him and that at least I might help those of us who were going to work for coverage of Senate debates by having such discussions with Senator LONG in advance, and I felt that in some way it would certainly not be time wasted, it would be time well spent whether or not he was persuaded, that it could do our cause no harm but only good. For those reasons I spent considerable time of his and my own in the course of those discussions.

I am not sorry that I did that. Even though Senator LONG did not change his position, I do feel that those discussions were helpful to both of us and in the long run that they were beneficial to the cause which I came to support.

I respected his judgment. At one point, he expressed his oppositon stating:

> The Senate should give stability to the Government, and the Senate is easy enough to stampede the way it is now. The Senate should be something of a citadel where a minority armed with a righteous cause can stand off an angry mob.

His commitment to this principle, Madam President, spanned his tenure of nearly four decades in the Senate. In his maiden speech to the Senate, on March 2, 1949, Senator LONG expressed his opposition to limitation of debate by curbing the filibuster because it would deprive Senate minorities of their rightful protection. Senator LONG has taken another position that I must respect. "Every Senator should decide for himself at what point he thinks he should retire," Senator LONG recently said. And so he will soon leave us.

In his first Senate campaign in 1948, Mr. LONG stressed his desire to vindicate his father and to work in behalf of the "little people."

As all of us know, Senator LONG succeeded remarkably well in both. I know that his father would be proud of his son RUSSELL. And the "little people," as he called them, obviously appreciated him because they kept sending him back to the Senate—most of the time by overwhelming margins—and they have given him an 80 percent approval rating.

And I have never seen RUSSELL LONG falter in his support for the common man and woman—the people who bear the burdens, most of the burdens, of making this Government run, paying the bills, supplying the blood and the sweat and the tears as well as the sons and daughters in time of war. Those are the people to whom RUSSELL LONG was referring and those are the people to whom he has been faithful.

He will be greatly missed in this Chamber. But the legacy of this important and influential Senator will be with us.

When I came to the Senate 28 years ago, there were the following Senators who were here then and who are still here: Senator STENNIS, Senator LONG, Senator THURMOND, and Senator PROXMIRE. Senator LONG will, by his own volition, be leaving the Senate after this session is completed at the end of the 99th Congress.

Mr. wife Erma and I join in best wishes to RUSSELL and his wife Carolyn as they return to his beloved State of Louisiana.

I cannot say, and I will not say, farewell to this distinguished gentleman and outstanding Senator. I simply say, thank you, and may God bless you in the years ahead.

Mr. LONG. Madam President, will the Senator yield?

Mr. BYRD. Yes, I yield. I yield the floor.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Madam President, it has been a heartwarming experience to hear my dear friend, the minority leader, the Democratic leader, ROBERT BYRD, say, those kind words about me as a Member of this body. I will always think of him as a friend from the heart forever. I was once associated with a group of young men in college and we had that description of one another—"friends from the heart forever." That is how I feel about my leader, ROBERT BYRD of West Virginia.

As the Senator knows, it was my privilege to support him for the leadership on this side of the aisle, even against a very dear friend, the late Hubert Humphrey, who, at that time, indicated that he was planning to run for the same thing. And, at that time, it seemed to me it was an inappropriate idea for him to run and BOB BYRD ought to be our majority leader. And I was never disappointed. He has been a great leader.

He has had some difficult decisions to make now and then. I know sometimes the pressure from colleagues from the left and right, tugging for his help on one side or the other, has been very difficult for him to handle, because you cannot please all of your friends, you cannot please all of your troops. But he has done a great job in doing the best he could as his Maker gave him the light to see it.

He is a very principled man. He is a believer in most of the same things I believe in. I love and admire him and I will always feel the same toward our leader as I have always felt toward him down through the years. It is a little late for me to change in that respect, and I do not think I would change my mind about our leader, ROBERT BYRD, of West Virginia.

Thank you for those kind remarks.

Mr. BYRD. Madam President, I thank my friend.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMITTING REGISTERED PUBLIC UTILITY HOLDING COMPANIES TO OWN CERTAIN INTERESTS IN QUALIFYING COGENERATION FACILITIES

Mr. DOLE. Madam President, I ask unanimous consent that the Senate now turn to H.R. 5056, to permit registered public utility holding companies to own certain interests in qualifying cogeneration facilities, now being held at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5056) to permit registered public utility holding companies to own certain interests in qualifying cogeneration facilities.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 3424

Mr. DOLE. Madam President, I send an amendment to the desk on behalf of Senator KASTEN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] on behalf of Mr. KASTEN proposes an amendment numbered 3424. "Strike all of Section 2."

Mr. BYRD. Madam President, I ask unanimous consent, on behalf of Mr. PROXMIRE, that he be made a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Madam President, I urge passage of this amendment to delete from H.R. 5056 the House language requiring the Federal Energy Regulatory Commission [FERC] to issue a final order on docket No. RP82-80.

If approved, this amendment would force FERC to issue a decision on a longstanding case that could have a devastating impact on the State of Wisconsin. An adverse ruling on this case, involving minimum billing for pipeline customers, could cost Wisconsin utilities consumers $30 to $50 million per year.

I believe it is absolutely essential that the Commission carefully consider all the potential cost shifts inherent in this case before a final order is made. The Wisconsin delegation has requested, along with the Wisconsin Public Utilities Commission and representatives of Wisconsin utilities, that FERC hear oral arguments on behalf of Wisconsin ratepayers before issuing a decision in this case. So far, our request has not been granted.

Madam President, the Commission needs time to find a way to mitigate a rate shock for Wisconsin consumers. That cannot be accomplished if we rush FERC into a premature decision.

I believe the reasons outlined above in themselves justify deletion of the "FERC Requirement" language from the bill. However, I would only remind my colleagues that this language in no way pertains to the provisions affecting public utility holding companies. This language has no place in the PUHCA bill, and I urge my colleagues to support this amendment which will delete it from H.R. 5056.

The PRESIDING OFFICER. Is there any further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 3424) was agreed to.

Mr. PROXMIRE. Madam President, I support passage of H.R. 5056, as amended, to delete House language requiring the Federal Energy Regulatory Commission to issue a final order on docket number RP82-80.

This case is the subject of a letter from the entire Wisconsin delegation to the Federal Energy Regulatory Commission [FERC] dated July 23, 1986. In this letter, we state that:

Because Wisconsin gas customers currently have no alternative means for getting gas from pipeline sources other than ANR, any major change in rate design or in ANR's cost allocation among its customers can have a devastating impact on our State.

We urged the FERC to carefully consider docket number RP82-80 and convene an oral argument to ensure that all the costs and impacts of their decision are fully presented. They have not yet acted.

The House amendment would have had a serious impact on Wisconsin consumers, raising prices as much as $30 to $50 million per year and tied the Commission's hands.

Deletion of this language, which is nongermane to PUHCA, both improves the bill and protects our consumers.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The amendment was engrossed and the bill was read the third time.

The bill (H.R. 5056), as amended, was passed.

Mr. DOLE. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. DOLE. Madam President, I hope that we can get an agreement to move to a number of nominations on the Executive Calendar. It is my understanding that the Malone nomination was the problem and that we are now in a position to withdraw that from consideration.

Madam President, let me indicate what we may be doing the balance of the day. At 3 o'clock there will be a cloture vote on the antidrug bill. Following that vote, we are on the drug bill if cloture is obtained. I assume it will be, but, in any event, there is still hope that we can resolve one major issue in that bill, at least postpone final decision on that issue until maybe sometime next spring.

I know the House Members will not be happy with that result. I have just talked with the sponsor of the amendment on the House side who did not seem to be a bit pleased. But I indicated to him that it was fairly obvious to me that if in fact cloture is invoked, that there could be 30 hours to be stretched into a rather long period of time, maybe 3 or 4 days; and that I did not believe that the Senate would

want to have a drug bill fail because of our failure to agree on one provision, though it is a very important provision, one that I support; and that is the death penalty under certain circumstances.

It was suggested yesterday by a number of Senators on each side of the aisle, and on each side of the issue, that one way to resolve that would be to have an agreement that there would be a death penalty provision reported by the Judiciary Committee sometime early next year, in the spring, and that then the minority and majority leaders not knowing who will be in which spot next year could also suggest that we would be willing to schedule that for floor debate sometime next spring.

So that is in the process. We hope that there could be some resolutions of that. If that can be resolved, then I believe we can pass it. There may be one or two or maybe more additional amendments, but I would hope we can get action on the drug bill by 5:30 or 6 o'clock.

Then we need to make a judgment on whether we should wait for the House to act on the CR. I am advised by the Republican leader, Representative MICHEL, it may be midnight or later before they finish the CR. So I suggest they send us another 24-hour extension. It did not seem to me to make much sense to just sit here until midnight and then stay up all night working on the CR if we can come back in early in the morning and accomplish the same result. So I think that may be progress.

In addition, tomorrow we would have the immigration conference report. They are still negotiating on the reconciliation conference report. If the drug bill were disposed of, that would still leave the debt ceiling.

With reference to the debt ceiling, there are one or two options, as I understand, floating. One would be to put in reconciliation for 7 months, 8 months, or 6 months, but not for a full year's time. Another would be to send us a clean debt ceiling from the House but with 1 year and we would send it back for 6, 7, or 8 months, and have those who are concerned about the Gramm-Rudman-Hollings provision, satisfy them in that way, knowing they would have an opportunity next spring again, March, April, or May to approach the debt ceiling extension at that time.

This matter has been discussed with Senators RUDMAN and GRAMM. I know they have been in contact with Senator HOLLINGS. I believe that approach would be satisfactory to them. That would give them some assurance that there would be another vehicle around in early spring.

I guess what I am hoping is we may be able to do all of these things tomorrow, maybe late tomorrow night, but if so, that would certainly help us be out of here by Friday morning.

Mr. STAFFORD. Madam President, will the majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. STAFFORD. I hope the majority leader might have in mind, the Democratic leader as well, that there is a possibility the conference reports on clean water and on water resources might be available for consideration by the House and Senate tomorrow. I do not think either would take much time. But I hope there would be a chance to handle those matters if indeed the conference reports are available.

Mr. DOLE. I would have no problem with that. I doubt the minority leader would.

There would be a number of those. We have been keeping up fairly well with all of the items of that kind. There may be a defense authorization conference report here this afternoon. Senator GOLDWATER has indicated he would like to bring that up. It would not take over 10 minutes. So we certainly will try to accommodate.

There is the question on the Superfund conference report which was raised yesterday by the minority leader and Senator LAUTENBERG. I know it has been raised a number of times by the Senator from Vermont, Senator STAFFORD.

Again I believe if we could give the President some assurance, and I have discussed this with the chairman of the Ways and Means Committee, that we would not be in here next year trying to raise the funding level with additional taxes, it would certainly make it much easier for the President to look upon that legislation favorably.

Mr. STAFFORD. If the majority leader will yield again, I would certainly be willing to give that assurance as far as I am concerned as chairman of the Environment and Public Works Committee. I have signed a letter to that effect.

Mr. DOLE. I thank the Senator.

Mr. BYRD. Madam President, I want to thank the majority leader for continuing to keep in mind the Superfund legislation. That is a piece of legislation that is very important in my State to the chemical industries therein. I would hope we could work out some arrangement whereby the White House would give us assurance that there would be no veto of that important legislation.

I also think the majority leader was wise in suggesting that a short-term CR, continuing resolution, be sent over from the other body rather than sit around here and wait until midnight, waiting on the CR, the long-term CR, from the other body and trying to transact business on that during the rest of the night.

(Mr. HATFIELD assumed the chair.)

Mr. BYRD. It seems to me that the majority leader has chosen the best course in his thinking. I have a feeling however that instead of the Senate completing its business tomorrow, I hope we could at least think in terms of completing the business of the Senate Friday, if not tomorrow.

Mr. DOLE. I thank the distinguished minority leader. I know the Presiding Officer has a great deal of interest in the continuing resolution. As he indicated earlier, if in fact we would have the bill by 7 or 8 o'clock, or even 8:30 or 9 o'clock, it might be worth doing it this evening. But we will continue to check. My latest advice is, or at least suggested advice, is it would be 11 o'clock, midnight or after.

I know the Presiding Officer wants to pass it as quickly as possible. But I would hope we would start early in the morning rather than at 1 a.m. or something.

Mr. BYRD. The distinguished Presiding Officer, the Senator from Oregon, [Mr. HATFIELD], has already saved the Senate at least 2 or 3 days on the continuing resolution when he advised our friends in the other body that they should not attempt to tack on the Fuel Use Act to the continuing resolution. There would have been a point of order raised against that and continuing debate with respect to that measure because for a major piece of legislation like that to be put on to an omnibus appropriation bill in conference, especially when the legislation had not been added to the appropriation bill and to the continuing resolution by either body, just to go to conference, and have it tacked on there I think would be very unwise on the part of the other body. I am happy that they have had some second thoughts.

The distinguished Senator from Oregon, who is the chairman of the Appropriations Committee of the Senate, I think gave some very helpful advise to them in that respect and to all of us because I have no doubt that the Senate would have done well to have completed the continuing resolution this week if that had been the course taken.

I thank the majority leader.

Mr. DOLE. I thank the distinguished minority leader. We will continue to work on the agreement.

On the Executive Calendar, let me indicate again that if we can complete action on all of these matters we have in the agreement, that would leave only three or four nominees on the Executive Calendar.

□ 1405

I think three were being held by Members on this side. We have already advised Members on this side that we are not going to honor holds

at this time, so we can dispose of at least two additional nominees. That will leave, as I recall, a couple of Denmark treaties that will not be taken up this year, Mr. Lawrence to be an Assistant Secretary of Agriculture, and maybe one additional nomination.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1415

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair recognizes the Senator from Nebraska.

Mr. EXON. I thank the Chair.

TRIBUTES TO RETIRING SENATORS

THOMAS F. EAGLETON

Mr. EXON. Mr. President, change is one of the things in life which we know will happen. Many times change is for the better and we must always be ready to accept the desirability or inevitability of change. That is a big part of life and I try to accept or at least deal with change as time goes on.

However, some changes are harder to deal with than others. One very difficult change for me personally will be the retirement of several Senators from this body, all good friends of mine. One of them is the U.S. Senator from Missouri, TOM EAGLETON.

TOM EAGLETON is one of my dearest and closest friends—not just in the Senate, but in life. Few people can combine a high intellect and a fabulous sense of humor as TOM EAGLETON can. Men such as he are rare indeed.

When TOM EAGLETON speaks, I listen. And so do other Senators. Whether the subject is the confirmation of a new Chief Justice of the United States, the complexity of the situation in the Middle East, the future of education, or the fine points of the War Powers Act—I listen. When I want to gain the benefit of a perspective I respect and trust, I go to TOM EAGLETON—and I listen.

It was once said, "A person does not learn anything while he is talking." How true. But we have all learned so much from TOM EAGLETON by listening. I shall continue to seek his advice and counsel in the future even though he will no longer be readily among us every day here in the Senate. However, as a body, we will all miss greatly having the opportunity to sit in our seats in the Chamber or seek him out in the dining room and engage him in a conversation from which we always learn so much.

TOM EAGLETON is truly a fountain of wisdom and knowledge in an institution which needs so much of both qualities. The Senate has been a richer place because of his presence, and the Senate will suffer from his absence.

Now that he will be in St. Louis on a more consistent basis, I suspect he will be able to see the beloved St. Louis Cardinals that he and I have shared so many hours of discussion on and so many hours watching from time to time during the last few years. I shall join him there at every opportunity, to listen to him further and also listen to this discussion of our professional baseball teams.

As this 99th Congress and TOM EAGLETON's 18 years as a Senator come to a close, I want him to know that the 8 years we have shared here together will always be special to me.

TOM, you have made a difference for the better—for your colleagues here, for the U.S. Senate and for our wonderful country.

Godspeed and the best of everything, my friend. You have my admiration, my thanks, and my friendship.

BARRY GOLDWATER

Mr. President, since my arrival in the Senate in 1979, I have served on the Armed Services Committee, where I have had the pleasure and honor of working closely with one of that committee's most respected leaders of all time, my friend, BARRY GOLDWATER.

Long before he became chairman of this committee, BARRY was recognized as one of this body's most knowledgeable Members in the area of national security. In addition to his military career and skills as an aviator, BARRY brought to the Senate much-needed good old, down-to-earth common sense in dealing with the complexities of our defense plans and budget. This was no better demonstrated than in his resounding success in getting a major defense reorganization bill through Congress and made into law.

BARRY GOLDWATER knew what needed to be done and did not hesitate in doing it. As a result, our Nation will continue to benefit from his judgment and hard work for many years to come. He has selflessly dedicated his life to making our Nation strong and I shall miss him greatly in the committee and here in the Senate.

BARRY GOLDWATER has long been known as "Mr. Republican." He has certainly been that. However, I prefer to refer to him as "Mr. National Security." There is not a man or a woman in any of our armed services who does not know that BARRY GOLDWATER is at their side, fighting for them here, in the Halls of Congress. And believe me when I say that, when I am in any kind of a fight, I want BARRY at my side. There is no better testament to a man than that one.

So BARRY, as you return to your beloved Arizona, take with you our thanks for all that you have done for America. The name of BARRY GOLDWATER will always be a part of this institution and of America's history. This Senator, your friend, will miss you very much.

PAUL LAXALT

Mr. EXON. Mr. President, today I rise to pay tribute to retiring Senator PAUL LAXALT.

In the past 8 years, my impressions of Senator LAXALT have been formed from close association and also, sometimes, from a distance. We have not served on the same committees and we do not share the same party affiliation.

Despite those circumstances, I have come to admire the senior Senator from Nevada a great deal. PAUL LAXALT has been a valuable line of communication between this body and the White House. The duties he assumed as "first friend" have been dispatched with unparalleled ability.

Mr. President, there is a common practice here in Washington called, running one up the flagpole. It means to quietly check out a reaction to an idea in a way which, if it proves unpopular or unworkable, the originator of an idea can drop it quietly before the storm hits. PAUL LAXALT has run many ideas "up the flagpole" at the White House for most of us here. It is a double duty which many people outside the Senate do not fully appreciate but which all Senators value and thank him for. His willingness to serve this function is one of the things which makes this Senate work. It is clear to me that his ability to combine personal and professional considerations without compromising either is a trait worth emulating.

When PAUL LAXALT leaves the Senate, the record should be clear that he is admired far beyond his circle of personal and political friends. He has earned the deep respect of many, including this Member of the U.S. Senate.

CHARLES MAC MATHIAS, JR.

Mr. EXON. Mr. President, before coming to this body in 1979, I had already heard of the distinguished senior Senator from the State of Maryland whose reputation for integrity was known to a great many of us from the plains.

CHARLES MAC MATHIAS, Jr. has served his beloved Maryland and this Nation with great distinction. Over the years, MAC MATHIAS has earned the recognition as one of the Senate's truly great thinkers; a man who has shown great strength and fortitude in the many times he has, through conscience, been thrown against the tide. Such times I suggest, were very difficult for him, but MAC always seemed to see through the complexities and far more often than not came down on the side of reason, fairness, and com-

passion. Such abilities, I believe, are inherent in only a few individuals and MAC MATHIAS is one so gifted to be a leader of that pack.

Many Members of this body have taken the floor to pay fitting tribute to Senator CHARLES MAC MATHIAS and his insight into the need to bring the greatest deliberative body in the world into the modern age. During his tenure as chairman of the Senate Committee on Rules and Administration, he was the advocate for and successful in bringing the wonders of the computer age to each of our respective offices and the committees of the Senate. In addition, MAC was a stalwart in his support of bringing the day-to-day activities of the Senate to the American people through radio and television. Such accomplishments only further prove his dedication to the welfare of this body, the public, and to the furthering of democratic ideals.

MAC MATHIAS will soon cast his final vote as the very distinguished senior Senator from the State of Maryland. Though he will leave a great void, he also will leave us with a great legacy; a legacy of conscience and of honor. For this we thank him and wish him God's speed in his days ahead.

GARY HART

Mr. EXON. Mr. President, I rise to pay tribute to the senior Senator from Colorado who will be departing the Senate at the end of this term. I have had the honor and privilege of serving closely with Senator GARY HART on the Senate Armed Services and Budget Committees.

On the Armed Services Committee he has been a strong advocate of building a military machine which "fights smart" and on the Budget Committee he has been a spokesman for fiscal responsibility. As a Senator from a Midwestern State. I have also appreciated the excellent work of Senator HART on the Environment and Public Works Committee. Colorado and Nebraska share many of the same challenges in finding an appropriate balance between developing and preserving our natural resources.

Senator HART has been a valued friend and colleague. The U.S. Senate will miss the clear and thoughtful voice of GARY HART. I have never known him to turn away from a difficult problem or take an easy way out of any situation and never taking an irresponsible position. Senator HART gives thoughtful reflection to each major issue which faces the U.S. Senate and the Nation. While there may have been times when Senator HART and I have disagreed on particular issues, I have always appreciated the keen intellectual analysis that he brought to every debate.

The people of Nebraska hold a special affection for GARY HART. In the spring of 1984, the senior Senator from Colorado stole the hearts of Nebraska Democrats, when he scored an impressive victory in the Nebraska Democratic Presidential primary.

Senator HART leaves the U.S. Senate with an impressive record of accomplishment and the respect of his colleagues. I fully expect that his retirement from the Senate will not be a retirement from politics. I trust that citizens will recognize and realize that GARY HART will continue to offer the Democratic Party and the American people his leadership and new ideas for America's future.

RUSSELL LONG

Mr. EXON. Mr. President, the retirement of RUSSELL LONG will mark the end of a truly outstanding career in the U.S. Senate; probably history will show it to be one of the outstanding careers of all time.

Since my election to this body, I have had the privilege of serving on the Senate Commerce Committee with RUSSELL LONG. There are few Senators who have a better understanding of how this body works and how to get things done. RUSSELL LONG has that rare ability to get right to the heart of any issue.

Being elected to the Senate at the age of 30 and being the son of the legendary Huey Long, RUSSELL LONG had some big shoes to fill. He met those challenges and has established an outstanding record in the U.S. Senate.

Without a doubt, RUSSELL LONG has a better understanding of the Tax Code than any Member of Congress. He has served on the Senate Finance Committee for 34 years and was chairman of that committee for 14 years. In that role, RUSSELL LONG will likely be most remembered as the father of employee stock ownership plans. No Senator has worked harder to expand the free enterprise system and private property ownership among the people of the United States.

RUSSELL LONG has dedicated more than half of his life to serving the people of Louisiana and the United States. To the Senate, he has brought wisdom, humor, and hope. While we will greatly miss RUSSELL LONG here in the Nation's Capital, I am confident that he will find a way to continue to serve the people of his great State.

APPOINTMENT BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER (Mr. BROYHILL). The Chair on behalf of the President pro tempore appoints to the National Commission on Agricultural Finance in accordance with section 501(a) of Public Law 99-205, the following individuals:

Mr. Don C. Steffes, of Kansas, and Mr. Maxie D. Love, Jr., of South Carolina.

DOMESTIC OIL AND GAS INDUSTRY

Mr. DOLE. Mr. President, Congress should not be caught playing our collective fiddle while our national and economic security burns. Make no mistake about it, the United States is an energy-driven economy, and our Armed Forces—the very defense of our country—are energy-driven.

Following the two energy crises which rocked this country during the 1970's, the Congress took aggressive steps to promote alternate fuels, but we have yet to discover the technologies needed to displace oil and natural gas from being the backbone of this country's energy supply. So, whether you think they wear black hats or white hats, we need to ensure domestic oil and gas producers continue to explore for and produce domestic crude oil and natural gas.

IMPORTS

We are now approaching the same level of imports which existed prior to the two oil shocks of the 1970's. Since last October, imports of crude oil and petroleum products have increased 32 percent. Supplies from Arab OPEC countries have nearly doubled in the last 5 months, and now Saudi Arabia, in an effort to regain its market share, has begun to flood the world markets with even lower priced crude. In June of 1985, we bought from the Saudi's only 26,000 barrels of oil per day. In July of 1986, that level had increased to 716,000 barrels of oil per day, putting them into the same category as Mexico and Canada as our top suppliers of oil.

OIL PRICES

I know of no Senator who is proposing a commodity support price program for oil and gas—and do not believe such a program is either warranted or would be beneficial to the domestic oil and gas industry. Unfortunately, it is the price of the commodities that is causing the severe problems now being experienced. Last October, crude oil prices were $24.06 per barrel; today the prices have plummeted to $13, a 46 percent decline. During this same period, 139,600 Americans have lost their jobs in the oil and gas extraction industry—a 25 percent decline.

Three statistics are the best measure for the health of this industry, and all three have been dismal in this past year. Seismic crews, those who look for geologic formations which could hold hydrocarbons, have declined 56 percent. Drilling permits, required prior to any actual exploration, have plummeted 62 percent. Finally, the "rig count," the number of drilling rigs actually exploring for new resources, stands at 814 this week—an all time post-World War II low. The rig count is roughly one-half of what it

was only 1 year ago, and some 3,716 below the level in 1981.

LEGISLATION NEEDED

Clearly, it is time to put to bed the old debate on the black hats versus white hats. The proposal before us today would be an important first step. Time is short, however, and it is impossible to get it enacted into law this year.

It is a good foundation for legislation we will certainly consider next year. Legislation which will be necessary for our economic and national security.

ANIMAL RIGHTS

Mr. HATFIELD. Mr. President, one of the more volatile issues to confront us of late is the growing concern among certain individuals and groups over the use of animals for medical research. The so-called "animal rights movement" has indeed raised some legitimate concerns about the conditions under which biomedical experimentation occurs. Such expressions of concern have resulted in better supervision and more care being taken in the conduct of such research where necessary.

The animal rights effort, however, in the view of a majority of respected academic, medical and scientific leaders, has the potential for seriously impeding our Nation's medical research effort—an effort of which we are extremely proud. Medical research has been of immeasurable benefit to our people in preventing and treating serious illness and injury. The quality of life we now enjoy and the years added to our lives are the direct result of research conducted in the laboratory often utilizing nonhuman subjects.

A recent article appearing in the Washingtonian magazine warns of the potential damage to medical science if extremism within the animal rights movement succeeds in representing the view of all those concerned about the use of nonhuman subjects for medical research. It raises several issues worthy of consideration. To understand the range of views held on this matter, I believe it would be useful to note two letters to the editor responding to the article, one from a respected scientific organization and one from the Humane Society of the United States.

Mr. President, I ask unanimous consent that the article and accompanying letters be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WHO WILL LIVE, WHO WILL DIE

(By Katie McCabe)

"Save the Monkeys!" pleads the sign that has dominated the entrance to the National Institutes of Health since spring. Beside it, a painting of a plaintive, heavily bandaged macaque monkey draws the attention of passers-by along Rockville Pike. On the lawn and sidewalk, demonstrators organized by People for the Ethical Treatment of Animals (PETA) have maintained a round-the-clock vigil, holding rallies and press conferences, trying to force the release of fifteen monkeys five years ago from a Silver Spring research lab accused of animal cruelty.

The protest has become a familiar sight to commuters as well as to viewers of the late-night news—where the scene has usually been accompanied by graphic photos of the monkeys, some with unbandaged wounds and others in seemingly torturous restraints.

Ostensibly at issue is the removal of the monkeys from the care of NIH to a primate sanctuary in Texas, a cause that has garnered sympathy among members of Congress, columnists, and some of the public. But there is much more at stake in the debate than the ultimate residence of fifteen monkeys.

The scene being played out at NIH is merely the most visible manifestation of a growing movement that seeks not just to ensure the humane treatment of animals, but to end the use of animals in medical research.

The "animal rights" movement has grown in the past five years from small groups of radical activists to embrace—and dominate—the spectrum of animal-welfare interests at the local, state, and national levels.

Absent from the humane pleas of the PETA demonstrators at NIH is evidence of the human costs of the activists' efforts. Their activities include midnight raids on animal facilities, the pilferage of documents, and the destruction of labs, which in turn have driven up security costs, driven out researchers, and created what activists themselves have described as a "climate of fear in the research community." They have initiated costly litigation and led mainstream animal-welfare organizations in pushing for well-intended but often restrictive legislation that has greatly increased the costs of research and sapped the time, resources, and will of research scientists.

Out of the public's view, this pro-animal activity has measurably impeded research on AIDS, Alzheimer's disease, heart disease, transplantation, and a host of other areas that depend on the use of dogs, cats, and primates—the animals targeted for immediate elimination from laboratories by animal-rights groups. But the self-professed goal of PETA's leaders does not stop there—it is to bring a halt to animal research altogether. And they are closer to that goal than even they ever thought possible.

To understand what is at stake—and to see what is not apparent on the front lawn at NIH—you can travel across town to Children's Hospital, where four-year-old Kendra Hawthorne wriggles impatiently through lab tests to monitor the level of cyclosporine in her bloodstream. Were it not for that anti-rejection drug—and the animal research that led to its development—Kendra would not have survived the liver transplant performed when she was eighteen months old.

That was three years ago. Today, unless you unbuttoned her pink Oshkosh overalls and saw the surgical scar, you'd never know that Kendra had been sick. In March 1982, five-week-old Kendra was diagnosed as having a rare liver disease called biliary atresia. Her chances for survival were slim, doctors said, without a liver transplant.

For two years, Kendra and her parents waited and hoped in their Gaithersburg home. When a donor organ finally became available, they flew to Pittsburgh University Hospital for the operation that saved Kendra's life.

The fourteen-hour operation was the shortest part of a story that goes back to the late 1950s, when human organ transplantation was still science fiction and medical researchers began the first laboratory trials with animals.

For the next 25 years, researchers approached the many problems associated with liver transplantation, working from every direction to perfect surgical techniques, preserve donor organs, and overcome the body's immune barrier with anti-rejection drugs. Time and again, investigators returned to laboratory animals to work out yet another piece of the puzzle.

For people like Kendra, this research produced miracles. But the real miracle, or luck, was her birth date. Had she been born six months earlier—before the completion of animal trials for the anti-rejection drug cyclosporine—her chances of survival would have been only half as good.

Animal research is important to the thousands of critically ill children like Kendra, and also to the millions of children who do not get sick—those who are vaccinated against polio, tetanus, diphtheria, and whooping cough, who survive strep throat, ear infections, bronchitis, and pneumonia because of antibiotics, all developed—and continuously tested today—in animals. It is the story of 11 million diabetics kept alive by insulin, cancer patients treated with radiation and chemotherapy—in short, of every major medical breakthrough in this century.

And of the breakthroughs to come? That is the question. Kendra Hawthorne's life depended on the use of research dogs, the animal model that, along with swine and monkeys, was critical in developing liver-transplant techniques. All the problems are not solved, particularly those having to do with rejection of alien tissue. Yet important work on the problem in Massachusetts has made the cost of acquiring dogs for research prohibitive.

"When money runs out, you simply stop," says Harvard Medical School professor Dr. Anthony Monaco. "Our work on inducing tolerance in organ grafts has come to a complete halt."

The result? Knowledge and techniques that could save another Kendra's life might come too late—or not at all.

Nothing at 4080-B Howard Avenue in Kensington speaks of such life-or-death consequences. The first-time visitor might miss the unmarked warehouse, tucked between an auto-parts store and plumbing contractor, that is the headquarters of People for the Ethical Treatment of Animals—the country's largest animal-rights group, organizers of the NIH demonstrations. Only the bumper stickers on the cars parked in back—"Liberate Laboratory Animals"—signal PETA's location.

There is no knob on the door, and no bell. The visitor peering through a small, high window, sees a poster tacked to bare studding. "Vivisectors Are Scum," it declares.

PETA co-director Ingrid Newkirk echoes the poster's theme as she ushers the interviewer past several large, friendly dogs. "Don't worry," she laughs, "they're only trained to bite vivisectors." She lays out the animal-rights position.

"Animal liberationists do not separate out the *human* animal," she begins, "so there is no rational basis for saying that a human

being has special rights. A rat is a pig or a dog is a boy. They're all mammals."

This ethic, Newkirk explains, "shakes the whole grubby system of biomedical research, because if you jeopardize an animal one iota in something that doesn't benefit it, you're doing something immoral. Even painless research is fascism, supremacism, because the act of confinement is traumatizing in itself."

Newkirk's views on animal experimentation are part of a broader animal-rights philosophy that has its roots in the 1977 book *Animal Liberation*, by Australian philosopher Peter Singer.

Singer—who has called Newkirk "one of the sharpest strategists in the movement"—argues that all sentient beings have equal moral status and regards humans' use of animals for food, sport, or research as "speciesism"—the moral equivalent of racism.

This philosophy goes beyond the traditional animal-welfare concerns of the older humane organizations. As Newkirk explained in a *City Paper* interview last year with Howard University philosopher Charles Griswold, the movement regards "the right to human life as a perversion," meat-eating as "primitive, barbaric, and arrogant," and pet ownership as an "absolutely abysmal situation brought about by human manipulation."

For now, her attention is focused on vivisection. She charges experimenters with "lying and misleading the public" about the benefits of animal research: "The bulk of experimenters are mucking about with pigs and dogs while people are dying." That statement—literally true, yet profoundly false—is characteristic of the logic that has brought thousands of animal-lovers into league with the radical animal-rights campaign.

PETA, which claims 90,000 members across the country, represents the radical end of a broad animal-interest spectrum encompassing 10 million supporters in more than 400 organizations. Of the 70 interest groups formed during the last two years, the majority are—by title or self-description—radical in their position on animal research. And the PETA philosophy is increasingly influential inside the imposing eight-story office building at 2100 L Street, Northwest, home of the Humane Society of the United States.

The visitor is struck not so much by the differences between 2100 L Street and PETA's headquarters at 4080-B Howard Avenue as by the similarities. The rhetoric is softer, the awareness of public image higher, but the substance of the message is the same.

"The HSUS is definitely shifting in the direction of animal rights faster than anyone would realize from our literature," says the society's director of lab-animal welfare, John McArdle, one of several "ethical vegetarians" on the society's executive staff.

Acknowledging the limited appeal of an uncompromising vegetarian philosophy, McArdle advised delegates at the 1984 HSUS convention to "avoid the words 'animal rights' and 'anti-vivisection.' They are too strange for the public. Never appear to be opposed to animal research. Claim that your only concern is the source of the animals."

McArdle was discussing tactics to use in a "pound seizure" campaign—the top HSUS priority for 1986. It concerns the 10 to 15 million unclaimed cats and dogs put to death in pounds each year. About 2 percent of those animals are sent to research institutions instead of being euthanized at the pound. The HSUS wants the transfers stopped.

The impetus—and the emotionalism—behind the pound-seizure campaign is easy to understand. No one likes to think of pets, even former pets, as subjects for scientific experimentation, and instances of illicit animal sales to research laboratories have fueled efforts to improve regulation of traffic in research animals.

But banning the use of pound animals altogether—and legislation toward that end has been introduced in Congress—can have devastating effects. In Massachusetts, which has the strictest laws against the use of pound animals in research, institutions must purchase animals specifically bred for that purpose—at four times the cost. Because funding has not risen accordingly, and is unlikely to in the age of Gramm-Rudman, critical research—including work on heart, liver, and intestinal transplantation at Harvard University—has stopped. It is a small irony, but a telling one, that prohibiting the use of pound animals in research means that twice as many animals ultimately die.

To animal-rights advocates, who oppose all use of animals for human benefit, the source of research animals is immaterial. But the issue has proved useful in soliciting support. As McArdle explained to the HSUS delegates, "It is an ideal issue for the animal-rights community, as it is the easiest to explain to the general public, who are concerned about their pets [being used in research], and it has the greatest potential for adding new members to animal organizations."

McArdle also pointed out that a successful pound campaign can serve as an opening wedge for introducing other laws to eliminate animal research. That is what happened in Massachusetts in 1983; the day after passage of the state's pound-animal ban, ads placed in the *New York Times* and the *Boston Globe* by the New England Anti-Vivisection Society showed a battle-helmeted dog with the caption, "We've won the battle; now help us win the war."

Like Ingrid Newkirk, John McArdle dismisses the value of animal research. "Most of biomedical research has very little to do with human health," he says. Researchers, he believes, "are up on a pedestal, but we're whacking away at the base of that pedestal, and it's going to fall."

Animal research, McArdle says—again echoing Newkirk—is unnecesary to continued medical progress. A PhD, he is at work on a comprehensive study of alternatives to animal testing, including computer models, cell cultures, and improved statistical methods. His most innovative proposal, McArdle says, is the substitution of brain-dead humans for animals in surgical research. "It may take people awhile to get used to the idea," he admits, "but once they do, the savings in animal lives will be substantial."

That there are alternatives to using live animals in biomedical research is a major tenet of the animal-rights movement—though the goal seems not so much to develop such alternatives as to end the use of animals altogether.

Scientists view computer models and tissue cultures as useful adjuncts to, but not replacements for, live animal models. A recent report on the subject by the Office of Technology Assessment, Congress' in-house scientific think tank, agreed. Current technology, it concluded, is not adequate to eliminate animal research.

In order to study the complex interaction of cells, tissues, and organs, the 430-page report said, research will continue to require live animals. The OTA noted that even tissue-culture studies must eventually be validated with results of whole-animal experiments, and that computer models of living systems cannot simulate all the reactions of a living creature.

For now, McArdle and the animal-rights advocates are concentrating their attacks on the use of large mammals—primates and "companion" animals such as cats and dogs, which provide the closest models for humans in many kinds of research, and also are the species for which the public has the most sympathy.

The HSUS, for example, wants NIH's regional primate-research centers converted to "Centers for the Development of Alternatives to Animal Testing." That effort, if successful, would eliminate the primate center where the isolation of the AIDS virus in monkeys provided the first step in developing a vaccine for the disease. More important, say researchers, it would divert limited funds from research that depends on animal use to a search for alternatives.

Along with his lobbying efforts on national issues, McArdle coordinates and guides local humane societies in taking a more aggressive animal-rights stance. On his desk during an interview is a letter from the Peninsula Humane Society in San Mateo, California, one of the country's wealthiest humane organizations.

According to the December 18, 1985, *San Mateo Times*, a "surprise coup" at the Society by local activists forced the resignation of the board's conservative members, one of whom said, "I am resigning because I do not agree the philosophy of extreme activists."

The radicalization of local humane societies is a nation-wide phenomenon. Says PETA's Ingrid Newkirk: "Humane societies all over the country are adopting the animal-rights philosophy, becoming vegetarian, and working harder to get inside labs."

Other high-profile humane organizations that have shifted from traditional animal-welfare goals to an anti-research stance include the 50-year-old Animal Protection League, the Animal Rescue League, and the American Society for the Prevention of Cruelty to Animals.

Campaigning on many fronts animal-rights activists have generated 80 bills in state legislatures to restrict animal research and have precipitated the shutdown of two major labs. They have radically shifted the federal Animal Welfare Act that regulates lab-animal use and have fundamentally altered the research climate.

How has this come about, especially when 80 percent of the public supports the use of animals in medical research, according to a recent Associated Press poll?

Part of the answer can be found in the PETA demonstration at NIH. Shown there is a videotape shot by PETA codirector Alex Pacheco, who posed for four months as a lab volunteer in Dr. Edward Taub's Institute for Behavioral Research in Silver Spring. The scenes on that videotape depict unsanitary lab conditions and monkeys apparently in need of veterinary care. The pictures of monkeys with atrophied limbs and unbandaged wounds are hard to watch; many people turn away.

It is a natural reaction. It was that videotape, along with other evidence gathered by Pacheco, that led to a police raid on the lab in 1981, removal of the monkeys to NIH, and the prosecution of Dr. Taub for animal cruelty.

The impact of those pictures, which have been used repeatedly on television and in PETA appeals for support, has overshadowed Taub's denial of animal mistreatment, the reversal by the Maryland Court of Appeals of his initial conviction, and his exoneration by a U.S. Public Health Service Board of Appeals in 1984.

But if the pictures tell a 60-second story of animal abuse to viewers of the evening news, the court documents in the case tell another. The major dispute in the Taub trial centered on his handling of the complex problems associated with deafferentation—the severing of nerves, in this case to deprive limbs of sensation in order to simulate human stroke and spinal-cord injury. The two groups who gave expert testimony on the proper treatment for deafferentation disagreed as to whether the monkeys' limbs should have been bandaged.

These scientific and veterinary arguments—on which experts still disagree—have been lost in the five years since the trial, overshadowed by sensational headlines and lurid pictures. Pacheco's pictures cast the final shadow of suspicion over the research community's treatment of animals and gave the animal-rights movement a rallying cry.

The case also has advanced activists' efforts to gain legal standing in behalf of animals. In addition to demonstrating outside NIH, PETA has filed suit—now before the Fourth U.S. Circuit Court of Appeals in Richmond—to force the release of the Taub monkeys from NIH, in whose care they have been since 1981.

The monkeys were moved in June, over PETA's protests, to a private NIH-funded facility in Louisiana, where they will be resocialized and allowed to breed and range freely. Though they will be used only for observational studies there, PETA continues to oppose, on principle, their presence at a research facility of any kind, pressing instead to have them sent to a private primate sanctuary in Texas.

It is an appealing notion, and it has gained the sympathy of columnist James J. Kilpatrick, among others, as well as more than 200 Members of Congress who have cosponsored a resolution calling upon NIH to accede to PETA's request.

But the case involves more than relocation. PETA seeks guardianship rights over the monkeys similar to those granted to guardians of minors and mentally incompetent humans. PETA claims those rights by virtue of the "bonding" that has taken place between the monkeys and PETA members during their weekly visits over the past five years.

Should PETA succeed, the precedent would be set for having courts—rather than scientific review boards—decide on the appropriateness of particular animal models to be used in research, including whether they should be used at all. This would trigger widespread legal action by activists seeking to remove animals from laboratories, generating high litigation costs to researchers and eventually, activists hope, bringing animal research to a halt.

Whatever the outcome of the case, the escalation of the debate to the U.S. Congress and a judicial level one step removed from the Supreme Court is a barometer of a movement that was almost nonexistent in 1981, when Alex Pacheco founded PETA.

Says Pacheco: "We've come so far, so fast. To have done what we've done this year would have been unthinkable ten years ago."

The most effective battles against animal research have been waged on non-legal fronts. PETA, which Ingrid Newkirk describes as an "above-ground abolitionist organization," also provides central organization, legal-defense funding, and media coverage for the Animal Liberation Front, an underground group of separate cells that do not divulge their members' identities to other cells or to outsiders.

Over the last five years, the ALF has taken credit for dozens of lab break-ins, bombings, and threats to animal researchers. Three ALF raids in particular—at the City of Hope National Medical Center in Duarte, California, the University of California at Riverside, and the University of Pennsylvania—have disrupted important research and instilled fear in the research community.

If the Taub incident set the animal-rights movement in motion, the even more widely publicized University of Pennsylvania incident marked a turning point.

ALF members conducted a raid in May 1984 on Penn's Head Injury Clinic where a study was under way in which baboons were dealt brain injuries similar to those suffered by humans in auto accidents.

Sixty hours of videotapes, stolen by ALF and edited by PETA to 30 minutes, revealed technicians smoking and making callous remarks while performing non-sterile surgery on inadequately anesthetized baboons.

The reaction was strong. While PETA members demonstrated at NIH, then-Secretary of Health and Human Services Margaret Heckler ordered funding for the project suspended. A report by NIH's Office for Protection from Research Risks cited the project for "material failure to comply with Public Health Service policy for the care and use of laboratory animals," and the US Department of Agriculture—enforcer of the Animal Welfare Act—imposed a $4,000 civil penalty on the university.

The Penn case marked the first time a Cabinet official had intervened in NIH's management of its grantee institutions. Also for the first time, evidence obtained by ALF was used in Congress to enact tighter animal-welfare legislation, especially regarding the care of primates. Most important, many people wondered whether situations like the one at Penn were the exception or the rule.

Like the photos of Taub's monkeys, the Penn videotapes appealed to the normal desire to see animals treated in a humane way.

Despite researchers' claims that Penn was an exception—that the vast majority of laboratory animals are treated humanely—animal liberationists use the visual evidence from the case to argue that all animal experimentation is cruel, unethical, duplicative, and unnecessary.

"I have gone into research out of a profound respect for life at all levels," says Harvard immunologist Dr. Norman Letvin, whose work at the New England Regional Primate Center recently provided a critical link in AIDS-vaccine development. "It's absolutely ludicrous to think I would use animals callously.

"If I use an animal and it dies, it's painful for me. I give it a great deal of thought and planning."

Most researchers echo Letvin's concern. But many are only now discovering what activists have known all along: that the real issue is not how animals are treated, but whether they are used at all.

There was little discussion of legislative reform, new NIH guidelines, or pet-related issues at a national Animal Rights Coalition conference in Minnesota last September, two months after the Penn experiments were halted. According to a representative of the research community who attended the conference—an account later corroborated by PETA's Lori Gruen to *Newsday* reporter David Zimmerman—"the one legitimate goal of the movement, as endorsed by speakers and accepted by the delegates, is to eliminate completely the exploitation of animals for food, for sport, for fashion, and especially for research."

Speakers made clear that the most effective means toward that end was the support of ALF activities, reported the witness, who insists on anonymity for fear of retribution from animal-rights activists. Guerrilla activities were deemed "extremely useful in getting the movement media exposure," although speakers noted that "there are actually many more raids, pilferings of documents, and acts of terrorism than are reported in the press."

That theme was picked up in a recent "Direct Action Paper" of the New York-based Human/Animal Liberation front. Citing the halting of research at Penn as a landmark victory, the paper urged front members to target other facilities for raids, "preferably universities because security is more relaxed and information on research more readily available." Instructions are given on selecting vulnerable targets by using university bulletins. NIH grant-application listings, and Medline abstracts.

"Choose what seems most redundant, absurd, or offensive, and best concentrate on cats, dogs, and primates so as to ensure public sympathy," the paper counsels members. "It is quite possible to know a tremendous amount on a specific researcher without ever walking into a facility or having inside information. The most important aspect of an action is creativity; do not be afraid of being outrageous. One idea . . . is to block the gates of a research center with animal corpses, stolen or negotiated from local shelters."

In the absence of evidence of widespread animal abuse, liberationists have relied largely on visual evidence, used out of context, to trigger public response. Participants in the Animal Rights Coalition conference in Minnesota were advised that "TV and radio are much more effective than newspapers" and urged to "raise hell, be outrageous, present gory details" in order to "put researchers on the defensive."

Donald Barnes, president of the National Anti-Vivisection Society, counseled misrepresentation of facts, stating that he uses a figure of 70 million animals used in research a year—a figure he knows is too high—and forces his opponents to refute his numbers.

Both the immediate and long-term effects of such tactics are clear to the animal-rights activists, who characterized the research situation this way at the Minnesota conference:

"The climate of fear in the research community is causing them to spend more money on security, reducing the amount of funds available for research. It may also discourage young scientists from going into animal research since they fear their chances of advancement may be jeopardized if they become the target of a liberation. In this way, the actions of the ALF save many more animal lives than the ones that are actually liberated."

The animal liberationists' view is confirmed by researchers. Following an April 1985 raid on the University of California at

Riverside—during which ALF members released animals, damaged computers, poured blood on files, and spray-painted liberationist slogans on laboratory walls—scientists throughout California work in a "siege mentality," says Dr. Thomas Hamm of the Stanford University Medical Center. "We are under constant threat of a break-in," he observes.

Following the Riverside raid, research on infant blindness came to a halt while NIH investigated ALF claims of animal abuse. And although the eight-month investigation exonerated the facility, none of the 467 stolen animals or the $638,000 in damages was recovered.

"Worse than the dollar value," notes Stanford's Dr. Hamm, "are the personnel costs. I see a number of colleagues leaving the field because they can't adjust to the harassment of the activist groups."

For obvious reasons, security has become a major concern—and expense—at research facilities. According to Dr. Arthur Butterfield, director of the Research Resources Facility at Georgetown University's new multimillion-dollar animal-research center, "security was the overriding factor" in the facility's design.

At the University of California at San Francisco—where recent animal-rights activism has cut off the supply of dogs for cardiovascular research—Dr. Joseph Spinelli says, "We are losing some faculty because of the problems with large-animal availability. Younger researchers are not going to go someplace where their work and their chances of advancement are impeded."

Says Dr. Frederick Goodwin, director of intramural research programs for the National Institute of Mental Health: "My people speak more and more of extreme fear and demoralization."

The loss of talented researchers could translate quickly into appalling human health costs, says NIMH neuroscientist Dr. Steven Wise. "If the chain of scientific talent is broken, society won't be able to reverse that trend easily,'" he warns. "In five or ten years, when we desperately need good scientists to solve another health emergency like AIDS, the scientific talent just will not be there."

Between the lurid images of widespread animal torture evoked by anti-vivisectionists and the research community's near-universal claims of concern for animal welfare, the question that remains in most people's minds is: Are lab animals treated humanely?

In a sea of emotionalism, a few facts provide some perspective. Current data from the US Department of Agriculture show that more than 90 percent of the 20 million animals used in laboratories each year are rodents; 2 percent are dogs and cats; less than 1 percent are non-human primates. The remainder are other species, including swine, sheep, calves, pigeons, and reptiles.

According to 1984 USDA figures, 61 percent of the nonrodent species are not exposed to pain at all, while an additional 31 percent receive analgesics or anesthetics. The remaining 8 percent are involved in studies of pain and methods of pain relief; even here, scientific protocols require that pain be minimized in order to separate the pain from other stress.

Researchers argue that, in addition to ethical concerns, scientific and economic factors militate against the mistreatment of animals. They note that unhealthy, stressed animals make poor research subjects. "If we're going to do good research, the variables have to be controlled," says Georgetown's Dr. Butterfield.

To activists' charges that much animal research is trivial or duplicative, researchers counter that the highly competitive way in which research grants are awarded eliminates all but the most meaningful, innovative work. Economic incentives—including NIH's limitation of 15 percent of a grant for animal costs—mean that minimal numbers and alternatives are used whenever possible.

Nevertheless, the ALF raids at the City of Hope National Medical Center and the University of Pennsylvania yielded evidence of animal-welfare policy violations that resulted in the suspension of NIH grants at both institutions. The issue of how extensive such violations are is hard to pin down.

Following the raid on the University of California at Riverside last year, PETA circulated photos of a tiny macaque monkey with its eyelids sewn shut as evidence of abuse. But an NIH report exonerating the facility of all abuse charges cited inconsistencies in the photographic evidence submitted by ALF, suggesting that "the ALF deliberately attempted to misrepresent the facts concerning the living conditions of the macaque money."

As for humane treatment, the report also cited videotape of ALF members using sharp-pointed scissors to cut off the monkey's head bandage, failing to restrain its hands and feet to prevent injuries, and exposing the light-deprived animal to intense light for photograhic purposes. The photos of the monkey, dubbed "Britches" in PETA literature, have been used extensively in the group's public-relations efforts.

Perhaps the closest thing to an objective statistical view of lab-animal treatment came last year when an animal-welfare organization, the Society for Animal Protective Legislation, obtained USDA inspection reports under the Freedom of Information Act to provide data in support of amendments to the Animal Welfare Act. The study sampled 186 of the 1,400 major US research institutions, and found that about 23 percent had problems with sanitation, ventilation, veterinary care, or caging.

In amending the Animal Welfare Act last year, Congress took a number of steps to tighten controls on animal research—some of them too tight, researchers contend—and commissioned the National Academy of Science to conduct a two-year study of animal-research conditions.

All but lost in the shrill exchange between anti-vivisectionists and scientists called upon to justify animal research are the voices of moderation, advocates of the "three Rs" of animal welfare—replacement of animals where feasible alternatives exist, reduction in numbers where possible, and refinement of techniques to minimize pain.

That is the concern of the Scientist's Center for Animal Welfare, a science-based humane organization begun six years ago by former NIH physiologist F. Barbara Orlans. "One of the reasons SCAW got started," she says, "was that we saw these polarized viewpoints, and we wanted to provide a forum for unemotional discussion, to identify what reforms are needed, at the same time defending necessary animal experiments."

Discussion, however, has been muted by the tactics of the animal-rights groups. "Terrorism has sidetracked what was at first a productive heightening of concern for animals," says Stanford's Dr. Hamm.

"The fact of that matter is, the movement is not going away; it's gaining momentum," says Frankie Trull, president of the Foundation for Biomedical Research, which was founded three years ago "to educate the public about the downside ramifications" of eliminating animal research.

Actually, the scientific community—which has seen anti-vivisectionist sentiment rise and fall before—was slow in responding to the current animal-rights campaign, tending to dismiss it as the work of a handful of zealots. The movement's sudden and far-reaching impact on research has left many scientists bewildered.

"Perhaps the threat [was] easier to deny because so many of us applaud the sentiments of the movement," wrote Dr. Thomas Insel, a neuroscientist at the National Institute of Mental Health, to a colleague last year. "We deplore suffering, and we care deeply about the welfare of animals, particularly those used in research," he observed, adding that scientist now "find it hard to believe that so many people are working full-time to abolish our research."

And no area of research is immune. Says Harvard AIDS researcher Dr. Norman Letvin: "We who are doing primate research are targeted by animal-rights groups. The fact that we're working on AIDS in no way protects us."

What does all this mean to human health? Sometimes the translation is remote; often it is frighteningly immediate. AIDS research—in which primates are the research model for vaccine development—is an example. The targeting of primate labs for break-ins and legislative restrictions mean slower development of a vaccine for a disease that has already infected more than 1 million men, women, and children, and is expected to have killed 179,000 people in the US by 1991.

Even the $126 million allotted to AIDS research in 1985 has not buffered research from the large additional costs of security or of new primate-caging requirements established under recently revised NIH guidelines. And depending on regulations now being drawn up, new federal requirements that researchers "insure the psychological well-being of primates" could send costs soaring—with no concomitant increase in NIH funding.

The state-by-state efforts of activist groups may ultimately prove more devastating than national action. Local laws banning the use of pound animals for research, greatly driving up animal costs, have forced some Massachusetts researchers to stop work entirely, according to Dr. John Powell, a cardiologist and professor at Harvard Medical School. In other cases, the time lost in shifting to less appropriate animal species—for which new data bases must be built—will markedly slow the pace of research.

This means that in certain kinds of cardiovascular research—where the canine model provides the closest parallels to man—the answers to heart problems that afflict some 60 million Americans will come much more slowly, or not at all. "We simply won't be able to do critical experimentation in cardiac surgery and coronary care," says Powell.

Among cardiovascular researchers affected by the Massachusetts pound legislation is surgeon and Harvard Medical School professor Dr. Willard M. Daggett. "Cost factors have forced us to curtail much of our research," he says, "and one line of research"—involving techniques for minimizing damage to heart muscles after heart attack—"was completely scrapped."

Nine other states have pound laws comparable to those of Massachusetts, and similar laws are under consideration in twenty others. This spring, New York Congressman

Robert Mrazek introduced legislation prohibiting the use of pound animals in all federally funded research.

Increasing layers of regulation, the result of pressure from activist groups, also pose a threat to research. In a year when Gramm-Rudman will cut $232 million from the Health and Human Services research budget, the costs of complying with new federal regulations will tax research resources even harder.

"Who is going to pay for the immense cost of this new bureaucracy?" asked Dr. Clifford Saper of the University of Chicago in an April 10 letter to the New England Journal of Medicine. The submission of dozens of protocols for each experiment, he maintained, "make it so difficult to perform certain types of experiments that the experiments become impractical." Saper noted that the use of routine anesthetics now requires time-consuming documentation of arcane points about veterinary anesthesia; a new regulation limiting repeated surgical procedures on the same animal has forced investigators to double the number of animals used and made it difficult to monitor their physiological responses over a period of time.

The cumulative impact of all these developments has been "subtle, yet profound," says Dr. Frederick Goodwin, director of intramural programs for the National Institute of Mental Health. "If you stop funding or drive up costs by layers of regulations, nobody on the outside knows it's happening. Research just quietly dies."

Observers NIH neuroscientist Dr. Zaven Khachaturian: "Most of society ignores this issue, and yet the impact is colossal."

"It's not just a question of saving or not saving the animals," asserts Howard University philosopher Charles Griswold. "It's a question of saving or not saving us—not just in the sense of self-preservation, but in our understanding of what it means to be human. The thesis that there is no moral difference between man and a rat amounts to the ethical and moral debasement of man."

Says Laurence McCullough of Georgetown University's Kennedy Center for Bioethics: "We have to look at the consequences of giving animals rights. . . . Are you ready to say to the thousands of human beings in this country who have heart attacks every year that we're more obligated not to use those dogs than we are to you and everybody else to try to reduce the long-term consequences of heart attack?" To "stand by and not attempt to reduce the risk of 100 percent lethality" among AIDS victims, he believes, would be to put animals' rights above those of humans.

When the discussion moves from the philosopher's office to the surgical ward, the tone is more urgent. Dr. Glenn Geelhoed, director of surgical research at George Washington University Hospital, says, "I have to recognize the rights of the patients who come to me, one at a time, and say, 'Please don't let me die.' They are not asking for fine philosophical distinctions. They are asking me to do anything I can to help. And today the most successful thing I can do to help them is to perfect medicine and operations in the animal model."

Yet the connections between animal models and human health are often difficult for the layman to see. "People are uncomfortable with the image of an animal in a cage being used for research," says Carol Sherman of the Association of American Universities. "But we are also uncomfortable about seeing a sick child in bed hooked up to tubes. We are uncomfortable about pain and suffering, and we should be. We're human beings, and that part of our humanity is important. But what's also important is using our heads to understand the whys and effects of doing certain things."

Understanding comes easy in the brightly decorated nursery of an Oakton townhouse, where one-year-old Keith Fernandez lets out a hearty cry. His chances of doing so seemed remote a year ago as he lay in the intensive-care nursery at Georgetown University Hospital hooked to a machine called ECMO, which stands for Extra-Corporeal Membrane Oxygenation.

Keith had been born with a lung disorder that failed to respond to conventional high-pressure ventilation therapy. Two hours after his birth, his lungs were collapsing; he was going to die. "They told us how risky ECMO was, about the danger of brain bleeding," recalls Keith's mother, Brana Fernandez. "But he was exhausting himself trying to breathe. ECMO was his only chance." The machine, acting as an artificial lung, gave Keith's lungs a chance to rest and, in time, to heal.

Keith was the fourth "ECMO baby" since Georgetown started its program in March 1985. For a year before that, teams of doctors and nurses at Georgetown had been perfecting in the animal lab the final details of the complex procedure. Since its conception in 1970 by Dr. Robert Bartlett, animal trials—on sheep—had been critical to its development.

"You just can't predict everything that will happen with such a delicate process," explains Georgetown's ECMO director, Dr. Marty Keszler. "Unless you do the procedures in the animal lab first, you're going to be experimenting on babies."

Born July 10, 1985, Keith Fernandez was just in time for ECMO. He is now one of fifteen babies saved at Georgetown since the program began. Says Brana Fernandez: "I can't imagine what it would have been like if that treatment hadn't been ready for my baby when he needed it."

For every child like Keith Fernandez or Kendra Hawthorne born at the right time for the right medical "miracle," there are thousands, like Salinda Smith, to bring to life what is at stake in the animal-rights debate. The only sign that the two-year-old girl is critically ill is the portable IV apparatus that rolls behind her down the halls of Children's Hospital.

The IV is Salinda's lifeline. She does not have enough intestine to enable her to eat, absorb food, and grow. Thousands of children like Salinda race for time, their bodies struggling for independence from the IV before it fails them, as it inevitably does.

Sustained for two years by the IV, Salinda is just now beginning to absorb nutrition through a tube into her intestine. If this method succeeds in the long term, Salinda will be one of the lucky ones. Otherwise, the only answer is intestinal transplantation, a procedure that is years away.

"When the day finally comes that we can do intestinal transplants in human beings," says surgeon Judson Randolph, "it will only be because of animal research" on surgical techniques to join the intestinal arteries and on the various infection and rejection problems that are far more complicated in the intestine than in other organs.

The question for children like Salinda is when these techniques will be perfected. "We can't keep these children on long-term IV forever," says Dr. Randolph. "When they're six or eight years old and we run out of veins to put the tubes in, we'll have to watch them die."

Yet final-stage work on intestinal transplantion has stopped as a result of the Massachusetts ban on the use of pound animals. "Here we are, ready to translate all our preliminary work—done in rats—to the patients whose survival depends on transplantation," says Dr. Anthony P. Monaco, chief of organ transplantation at the New England Deaconess Hospital. "But without adequate documenation in the dog model, we cannot proceed to the human."

So some dogs will die at the pound instead of being used in research. And some children also will die. For those like Salinda, it is a question of time.

What's at Stake: The Immediate Case for Animal Research

Virtually every major medical advance of the twentieth century has depended on animal research. The major health problems we face today are no different.

CHILDHOOD DISEASES

The specter of polio has all but disappeared in the last three decades with the development of the Salk and Sabin vaccines, both of which used monkeys—to which human poliomyelitis could be transmitted—as test subjects. But the testing could not end there. Dr. Joseph Bellanti, director of Georgetown University's Immunology Center, points out that every new batch of vaccine for polio and other childhood diseases must be tested on animals to make sure that the virus has been adequately inactivated.

For every new vaccine produced, live-animal testing answers the questions "Does it work?" and "Is it safe?" This year those questions will be important to everyone who receives the newly released vaccine for Haemophilus influenza (HIB) and the soon-to-be-released chicken-pox vaccine.

Increased use of synthetic vaccines won't reduce the need for animal testing, Dr. Bellanti explains. "If you have no evidence for their efficacy and safety in the animal model, how can you proceed to the human?"

AIDS

The most crucial search now under way is for a vaccine to combat AIDS, which is expected to have killed 179,000 people in the US by 1991. Only a year ago did scientists at the New England Regional Primate Center succeed in isolating the STLV-3 virus (SAIDS, the simian form of AIDS) in macaque monkeys and inducing it in others.

It is not yet clear whether a vaccine can be made to disable the virus, because the way it infects is unlike that of other diseases. But researchers at the National Cancer Institute recently found that chimpanzees could produce antibodies to the AIDS virus and that those antibodies, when cultured with live cells, protected the cells from the virus. The next step is to vaccinate the chimpanzees. If the vaccine works in them, the reasoning is that it will protect humans.

The chimpanzee is so far the only animal that develops the antibodies indicative of AIDS infection but it doesn't exhibit any symptoms of the disease. Macaque monkeys do, however, which means that the infection process can be tracked in them to develop better understanding of AIDS. That may help pinpoint, for instance, the optimum stage for instituting therapy in AIDS patients. "These question can't be answered in

man," explains Dr. Anthony Fauci, director of the Institute for Allergy and Infectious Diseases, "because AIDS in humans is diagnosed very late."

Efforts to isolate the simian form of AIDS actually began in 1979 when primate researchers observed opportunistic infections and tumors in breeding colonies of macaque monkeys. "We realized seven years ago that it was essential to get to the bottom of the disease for the sake of the monkeys," says Dr. Norman Letvin, immunologist at the New England Regional Primate Center. "Now that the virus has been isolated, we have an animal model in which to develop vaccines for monkeys and for humans."

Letvin adds, "It is possible to learn a great deal more from a very small number of animals in a controlled study than you would from observing hundreds of human AIDS patients."

CANCER

Six years of working with laboratory mice lies behind the discovery, by Dr. Steven Rosenberg and his team at the National Cancer Institute, of Interleukin-2, a natural body substance that has proved highly successful, since human trials began last year, in treating cancerous tumors otherwise untreatable by surgery, chemotherapy, or radiation.

Alternatives, such as computer data analysis and genetically engineered bacteria, complemented the live-animal testing, but none could have substituted for it in proving the safety and efficacy of the treatment, Rosenberg maintains.

ALZHEIMER'S DISEASE

"Eight years ago, we were at ground zero," says Dr. Zaven Khachaturian of the National Institute on Aging. "There has been incredible progress in Alzheimer's research because of our investment in basic research concerning brain functioning going back to the 1930s." The bulk of that research involved animals, Khachaturian notes, and they hold the key to continued progress.

Through studies with primates and other animals, researchers have identified the region of the brain—the nucleus basilis of Meynert—that is critical to the development of Alzheimer's. Though autopsy studies of the human brain provide some information, the disease must be observed during its development of find clues to its origins—and that can be done only in animals.

Attempting to simulate the early stages of Alzheimer's researchers have lesioned the areas of rats' and monkeys' brains believed to be affected by the disorder and evaluated the chemical and anatomical alterations. Within two years, Kachaturian predicts, they will have identified the chemical markers for the disease and will be able to diagnose it early. "In the foreseeable future—the next ten to twenty years," he believes, "we will be able to transplant from cell cultures the kinds of cells necessary for normal functioning of the brain."

Brain research holds promise for medical breakthroughs in other mental disorders, too. This year, animal work by NIMH's Dr. Robert Post provided evidence for the success of a new drug, carbamazepine, in treating manic-depressives who do not respond to lithium—a drug treatment also developed and tested in animals. Because primates share 95 percent of human DNA, explains Dr. Frederick Goodwin, director of intramural programs for the National Institute of Mental Health, they are irreplaceable models in the neurosciences. "If you want to understand the human brain, you must first understand the primate brain," he says.

FEDERATION OF AMERICAN SOCIETIES FOR EXPERIMENTAL BIOLOGY,
Bethesda, MD, August 11, 1986.

JOHN A. LIMPERT,
Editor, the Washingtonian, Washington, DC.

DEAR MR. LIMPERT: Katie McCabe, author of "Who Will Live, Who Will Die?" has written what may be the most trenchant analysis yet of the controversy over using animals in biomedical research. Ms. McCabe's article comes to all the right conclusions: that the use of animals as experimental models is essential to understanding disease in humans as well as animals; that without laboratory animals, progress toward treatments and cures for cancer, heart disease, AIDS and other afflictions would be halted at the expense of human life; and that the goal of the so-called animal rights movement is to stop the use of animals in research entirely.

The animal rightists are surely creating a crisis in health research that eventually could affect everyone of us. Ms. McCabe and the Washingtonian have acted in the best traditions of journalism by providing a clear and insightful article that will help the public better understand what is at stake in this matter.

We who represent thousands of biomedical and biological researchers dedicated to improving human and animal health commend Ms. McCabe and the Washingtonian for performing a most courageous and valuable public service.

Sincerely,

ROBERT W. KRAUSS,
Executive Director.

THE HUMANE SOCIETY OF THE UNITED STATES,
Washington, DC, August 6, 1986.

Letter to the EDITOR,
The Washingtonian, Washington, DC.

DEAR EDITOR: I am utterly amazed that a publication as responsible and respected as The Washingtonian would publish an article as poorly researched and slanted as Katie McCabe's "Who Will Live, Who Will Die?" If this article was intended to be nothing more than a promotion piece for those engaged in laboratory animal research, it was a success. But if it was the desire of your magazine to responsibly inform readers about the questions and issues surrounding the use of animals in research, Ms. McCabe did both you and your readers a great disservice.

McCabe's bias is evident. I am confident that discriminating readers will agree that it is inconceivable that any issue worthy of eleven pages in your magazine could be as one-sided as is set forth in McCabe's article. Few things in life are ever quite that simple, and the use of animals in research is clearly a very complex issue.

Be that as it may, I am even more concened with what will have been less evident to many of your readers—the many inaccuracies, misstatements, manipulations of information, and glaring omissions that pervade the article. I seriously object to the grossly distorted and inaccurate portrayal of The Humane Society of the United States. The HSUS has long been recognized as a rational and responsible force within the animal movement by the public, the Congress, the press, and, with few exceptions, by the scientific community itself.

I also wish to state that The HSUS is not an anti-vivisectionist organization. It does not contend that all research using animals is unnecessary. To quote from our Statement of Policy, "The Humane Society of the United States recognizes that benefit for both animals and mankind has been achieved through some scientific research and testing on animals . . . " and we surely recognize that "this research and testing is not likely to end in the immediate future." We do, however, vigorously support the humane treatment of animals in laboratories and elsewhere, an effective system of accountability on the part of the scientists and facilities utilizing animals, and the development and utilization of alternatives that will reduce and hopefully end the suffering of animals in biomedical research and testing laboratories. I am pleased to enclose a copy of our policy statement on the use of animals in biomedical research and request that The Washingtonian print it in its entirety at the end of this letter. I would also urge all interested readers to contact us for a copy. This policy statement was available to McCabe, as it is to anyone, but she either failed to ask for it or chose to ignore it.

There is neither the time nor the space here to detail the numerous McCabe errors, whether deliberate or unintentional, or to point out each item presented as irrefutable scientific fact that is open to legitimate debate. I do, however, wish to mention the most troublesome.

McCabe refers to "the voices of moderation, advocates of the 'three R's of animal welfare—replacement of animals where feasible alternatives exist, reduction in numbers where possible, and refinement of techniques to minimize pain" and applauds the Scientists Center for Animal Welfare for embracing these reforms. The HSUS not only agrees with the "three R's" concept, but in fact adopted and promoted these reforms as early as 1978, several years prior to the advent of SCAW. They remain fundamental to our current endeavors.

McCabe ascribes to the HSUS spokesperson several quotes from a workshop addressing the use of shelter animals for resarch. She fails to cite her source for those comments and leaves the reader with the impression that they were provided by the HSUS spokesperson himself on the occasion of her interview with him. The language within quotation marks in McCabe's story is, however, identical to that in a document that the research community has been circulating since 1984, entitled "Notes taken from the 1984 Annual Conference of the Humane Society of the United States." The document is not a transcript, the workshop was not taped, and nothing in the document is identified as a direct quotation. In fact, several of the notes use the third-person style, "He believes . . .", etc. McCabe, however, using the *notetaker's* comments, embroiders them with quotation marks and attributes them as direct quotes from the HSUS spokesperson. Even the research community didn't have the audacity to purport that the document they were circulating contained direct quotes, but McCabe had no hesitation to do so. Had she asked for confirmation of the information contained in the document, she would have been provided the corrected version of those comments, which has been in print two years.

McCabe depicts the HSUS and PETA as virtual mirror images of each other. In fact, these organizations are vastly different in both substance and style, as well as in the specific goals and policies each embraces. Within the animal movement, as in any other movement, there is a wide range of organizations, the diversity of which enriches and vitalizes the movement as a whole.

Your readers should understand that not everyone who supports animal protection is necessarily an animal rights activist. And not everyone who embraces the concept of animal rights accepts the proposition that there is no legitimate use of animals by humans.

Both researchers and reporters contend that the search for truth is one of their primary goals. It is sadly ironic that in this alleged report about research, so much truth was lost or distorted along the way.

Sincerely,

JOHN A. HOYT,
President.

ANIMALS IN BIOMEDICAL RESEARCH AND TESTING

The Humane Society of the United States recognizes that benefit for both animals and mankind has been achieved through some scientific research and testing on animals, but that the advancement of medicine and human health has also been hindered by an overemphasis on such animal research, safety testing, and other programs are many and varied, and that this research and testing is not likely to end in the immediate future.

While some of the animals used in research and testing are subjected to procedures that result in only momentary discomfort. The HSUS believes that millions of laboratory animals do suffer severely and needlessly in painful experiments, resulting from exposure to noxious substances and pathogenic organisms, or from cruelty, carelessness, ignorance, and indifference. The HSUS also contends that toxicity testing on live animals, as now required by government agencies to test the safety of serums, drugs, cosmetics, and other chemicals, is often unreliable, inaccurate, and unnecessary and should be replaced as soon as possible by new methods not involving animal suffering. Existing measures intended to ensure humane treatment, including the Animal Welfare Act and its enforcement, have proven inadequate. The Animal Welfare Act should be strictly enforced. Coverage should be expanded to include all vertebrates used, protect animals undergoing the actual research and experimental process, and require prohibition of specific painful invasive procedures.

The HSUS believes that scientists and facilities using experimental animals should be held strictly accountable for their care and use and should keep animals in a manner fulfilling both physical and behavioral needs. Experiments should be rigorously planned, with proper statistical design, so as to minimize the number of animals necessary to be used to achieve reliable results and, through the administration of anesthesia and analgesics and other appropriate medication and veterinary care required, to preclude animal suffering. the HSUS believes that government agencies and relevant professional organizations should encourage and actively support efforts to eliminate animal suffering in the laboratory.

Therefore, The HSUS strongly advocates the development and application of alternative methods of research and testing which could reduce the number of animals required, refine existing techniques and procedures so as to minimize the level of stress endured by an animal, and replace the use of laboratory animals. Refinement and reduction are interim steps towards the ultimate goal of complete replacement of animals in biomedical research and product testing.

Therefore, it is the policy of The Humane Society of the United States to use every means in its power to reduce and end the suffering of animals in biomedical research and testing laboratories by advocating the attitudes and approaches set forth in this statement.

TRIBUTE TO SENATOR LONG

Mr. HATFIELD. Mr. President, I cannot let this 99th Congress draw to a close without paying tribute to my dear friend from Louisiana, RUSSELL LONG. One of the joys of serving in this body is the chance to work with those Senators who seem to possess an extra measure of leadership, wisdom, perspective, and good temperament. With the retirement of Senator LONG from the Senate after 36 remarkable years, we lose such a man.

Mr. President, an oftrepeated observation of the Senate is that it is comprised of too many politicians and too few statesmen. In my opinion, RUSSELL LONG is one of the preeminent Senate statesmen. His delightful sense of humor and easy manner combine with his knowledge of parliamentary procedure and his talent for achieving bipartisan consensus to make him one of this body's most effective legislators. In fact, for 36 years if you had RUSSELL LONG on your side of a bill, you probably won.

During his 15-year tenure as chairman of the Senate Finance Committee, Senator LONG developed a reputation for careful strategy and skillful management, both qualities contributing to his impressive list of legislative accomplishments.

Perhaps the greatest accomplishment of Senator LONG's illustrious career, and one most indicative of his concern for the American worker, was an addition to the Tax Code which created the employee stock ownership plan, or ESOP. I was pleased to join him in this effort beginning in 1973.

As is characteristic of the senior Senator from Louisiana, Senator LONG's motivation for the creation of the ESOP was not partisan, nor was it political. His purpose was simply to bring out the best in our free enterprise system and to grant to those who work to make our economy succeed the opportunity to share in that success. Senator LONG was a visionary in his belief that ESOP's could help diversify capital stock ownership, enable citizens to participate directly in the profitability of their employers, and provide a convenient and available source of capital for companies seeking to expand.

Senator LONG has always been concerned about simple and basic equity and he can take pride and satisfaction that he has left a legacy to the American people which will advance economic growth for years to come.

Mr. President, I take great pleasure in calling RUSSELL LONG my friend. His retirement from the Senate and his return home will be this country's loss, but Louisiana's gain.

COMMENT ON IMPEACHMENT

Mr. MATHIAS. Mr. President Prof. Raoul Berger has observed that while impeachment in this country has been "largely a means for the ouster of corrupt judges," it was in England "the chief institution for the preservation of the government." R. Berger, "Impeachment: The Constitutional Problems" 1 (1973). In the 198 years since it first assembled in New York, the Senate has removed only five civil officers of the United States, all judges. While this supports the observation that impeachment in this country has been used narrowly, we must be mindful of the larger purpose, "the preservation of the government," that is served by the framers' decision to import this English institution into our national charter.

The framers did not specify the procedures which the Senate should use when trying impeachments, other than that the Senate shall have "the sole Power to try all Impeachments," that "[w]hen sitting for that Purpose, [Senators] shall be on Oath or Affirmation," that "[w]hen the President of the United States is tried, the Chief Justice shall preside," and that "no Person shall be convicted without the concurrence of two-thirds of the Members present." (U.S. Const., Art. I, sec. 3, cl. 6). Beyond these requirements, the Constitution grants to the Senate discretion, through its authority to "determine the Rules of its Proceedings," (Art. I, sec. 5, cl. 2), to choose the means of implementing its impeachment trial responsibilities.

The Senate's impeachment procedures must serve three objectives. They must enable the Senate to determine if there is sufficient evidence to convict an officer of the United States of a high crime or misdemeanor. They must enable the officer to defend himself against the accusation of the House of Representatives. Finally, in adopting procedures to aid in "the preservation of the government," the Senate must be careful not to diminish its ability to perform the other functions of the Government which it is seeking to preserve.

In the impeachment trial of Judge Harry E. Claiborne the Senate was called upon to consider the propriety of two procedures, one of which the Senate rejected and another of which it utilized. My purpose in addressing the Senate today is to examine these important decisions.

1. THE MOTION BY THE HOUSE FOR SUMMARY DISPOSITION OF THE THIRD ARTICLE OF IMPEACHMENT

The House exhibited four articles of impeachment. The first and second articles alleged that Judge Claiborne had willfully filed fraudulent tax returns for 1979 and 1980 which failed to report substantial income. The third article alleged that he had been convicted of those offenses in a U.S. district court. The fourth article alleged that Judge Claiborne's willful falsification of tax returns brought disrepute on the Federal courts and the administration of justice.

At the outset of the proceedings before the Impeachment Trial Committee, appointed by the Senate in accordance with Impeachment Rule XI, the House filed a motion for summary disposition of the Third Article of Impeachment. The House noted that Judge Claiborne had been convicted of two felony offenses, and asked "that the Senate recognize this judgment of conviction and determine that it is an adequate basis, under article III of the Articles of Impeachment, for Judge Claiborne's conviction by the Senate and removal from office." (S. Hrg. No. 99-812, at 147-48). The House disavowed any intention, with respect to the third article, to present proof of the commission of the underlying offenses. It stated that it would rest its case in support of the third article on the record of the trial and appellate proceedings in the criminal case. The House submitted the trial transcript solely "as evidence of the regularity of the proceedings." Id. at 149 n.2. The House urged the Senate to credit the final judgment of the judicial branch and not to make an independent determination of the facts.

The Impeachment Trial Committee lacked jurisdiction to rule on the House motion for summary disposition, and it referred the motion to the Senate at the conclusion of its hearings. The committee rejected the companion House motion which requested, in essence, that the committee desist from taking evidence and refer the House summary disposition immediately to the Senate. As chairman of the committee, I explained why I believed that the committee should not disturb the Senate's decision that the committee receive the parties' evidence on all of the articles prior to the Senate's consideration of their legal and factual merit.

In my ruling, I noted that the House argument, which was based heavily on principles of comity, the conservation of resources, and the avoidance of inconsistent results, might have been compelling if the Senate had been sitting simply as another court. The Senate, however, has the "sole" power to try all impeachments, and it has no authority to delegate that power to another branch. The evidence is that the framers deliberately constructed a system which would contemplate, in Alexander Hamilton's phrase, a "double prosecution." "The Federalist No. 65", at 429 (B. Wright ed. 1961). The separation of criminal and impeachment proceedings was designed, in Hamilton's further words, to provide impeached officials of the executive and judicial branches with "the double security intended them by a double trial," Id. at 428. The reverse side of double jeopardy. The need to separate criminal proceedings in the judicial branch from impeachment proceedings in the legislative branch is underscored by the framers' rejection of a proposal to confer on the Supreme Court the power to try impeachments.

The Third Article of Impeachment garnered the support of fewer than half of the 98 Members who were present for voting on the articles: 46 Members voted guilty, and 52 voted not guilty or simply announced their presence. In this manner, the Senate convincingly recorded its conclusion that it should not delegate the impeachment function to the courts by making removal a further and automatic consequence of a criminal conviction. While we may hope that the courts will always be virtuous and correct in their judgments, our special function under the separation of powers does not permit us to reunite, in the judicial branch, powers which the framers thought should be separated.

2. SENATE IMPEACHMENT RULE XI

Members are now thoroughly familiar with the provisions of Senate Impeachment Rule XI. The rule authorizes the Presiding Officer to appoint, if the Senate so orders, a committee to take testimony in impeachment proceedings. Upon the committee's report to the Senate of a certified transcript of its proceedings, the testimonial and documentary evidence received by the committee is to be considered, to all intents and purposes, as having been received and taken before the Senate. The rule reserves to the Senate the right to determine the competency, relevancy, and materiality of this evidence. The rule also preserves the right of the Senate to send for any witness and hear that witness' testimony in open Senate, or by order of the Senate to have the entire trial in open Senate.

What may be less familiar to the Senate is the fact, which is demonstrated by rule XI's English antecedents and the Senate's prior impeachment experiences, that it is not novel for Senators to base their judgments in an impeachment trial on a written record of previously recorded testimony.

THE ENGLISH ANTECEDENTS

In 1916, in support of a proposal that the Senate consider alternatives to the taking of evidence in open Senate, Alexander Simpson, who had been one of Judge Robert Archbald's counsels at an impeachment trial several years earlier, cited as authority a passage in "Jefferson's Manual of Parliamentary Practice." See A. Simpson, "A Treatise on Federal Impeachments" 68. Jefferson had prepared the manual for his guidance as President of the Senate during his Vice Presidency from 1797 to 1801. On the subject of witnesses at impeachment trials, Jefferson, reflecting on English impeachment practice, wrote that

> The practice is to swear the witnesses in open House, and then examine them there; or a committee may be named, who shall examine them in committee, either on interrogatories agreed on in the House, or such as the committee in their discretion shall demand.

Constitution, Jefferson's Manual, and Rules of the House of Representatives," (H.R. Doc. No. 277, 98th Cong., 2d Sess., § 614, at 296 (1985)).

While the choice of impeachment procedures cannot be left exclusively to a study of English practice, the evidence appears to be that, at least for a period of time, committees were used in the House of Lords during the trials of impeachments. In 1620, for example, the House of Lords "appointed a select Committee of themselves, to take Examination of Witnesses" in the trial of Sir Francis Bacon. 2 T. Howell, "A Complete Collection of State Trials and Proceedings for High Treason and Other Crimes and Misdemeanors from the Earliest Period to the Year 1783" (1101 (1816)). The same year the House of Lords appointed a committee to examine witnesses in the trial of Dr. Theophilus Field, Bishop of Landaff. (Id. at 1116.) In 1621, the House of Lords examined witnesses in committees in the trial of Sir Giles Mompesson. (Id. at 1122-24.) Then, in 1624, depositions taken by a committee were read to the House as evidence of impeachment charges against Lord Treasurer Middlesex. (Id. at 1183; 3 H.L. Jour. 350, 352-61, 365.)

I have in my office several volumes of these reports of State Trials which came from an old Maryland law library where I believe they had been since before the Revolution. The Constitutional language "high crimes and misdemeanors" suggests that the Founders were familiar with these reports and presumably with the established practice of employing committees to take impeachment evidence.

The use of committees during impeachment trials in the House of Lords is documented in an article by Prof. Napoleon Williams, which he wrote in response to a brief suggestion to the contrary by Professor Berger. I ask unanimous consent that an excerpt from Professor Williams' article, "The Historical and Constitutional Bases for the Senate's Power to Use

Masters or Committees to Receive Evidence in Impeachment Trials," (50 N.Y.U. L. Rev. 512, 528–32 (1975)), be reprinted as an addendum to my statement today.

These English precedents indicate that, in utilizing Impeachment Rule XI, the Senate is not writing on a blank slate.

THE HISTORY OF RULE XI

While the Claiborne impeachment was the first Senate impeachment trial in which witnesses were examined before a committee and not on the Senate floor, rule XI is not a departure of the practice of receiving evidence through a printed record.

The initial suggestion that a Senate committee receive impeachment evidence was made in 1904 after the House had initiated an investigation of District Judge Charles Swayne. Senator George Hoar proposed an addition to the Senate's impeachment rules to require the Presiding Officer (except in an impeachment of the President or Vice President) to appoint a committee

To take all the testimony on both sides . . . [and] cause all the testimony by them heard to be reduced to writing and reported to the full Senate. 38 Cong. Rec. 3902 (1904)).

The resolution was referred to the Committee on Rules which took no action on it, and the Swayne impeachment trial proceeded in 1905 without the use of a committee.

The suggestion for a committee was renewed in 1912 during the impeachment trial of Circuit Judge Robert Archbald. Senator (later Justice) George Sutherland introduced a resolution to amend the impeachment rules to provide that in all subsequent impeachments, except when the President, the Vice President, a Cabinet member, or a Justice of the Supreme Court is being tried, testimony may be taken by the Judiciary Committee and reported to the Senate. Senator Sutherland compared this procedure to the "reference, in the case of a court of equity, to a master, and in the case of the Senate by reference to a special committee or to a standing committee." (49 CONGRESSIONAL RECORD 698 (1912).)

In the remarks to the Senate, Senator Sutherland paid special attention to the reality that at impeachment trials many Senators learn of all or portions of testimony through a written record rather than by direct observation of witnesses. He noted that because of other business of the Senate,

[m]any of the Senators could not be present to hear the testimony.* * *

Consequently, for those Senators

Of necessity they are obliged to read [the testimony] before they can act. The same result, it seems to me, would be obtained by referring the case in the first instance to the Judiciary Committee to take the testimony and report it to the Senate.

The Senate did not act on Senator Sutherland's suggestion, but his idea and the idea enunciated earlier by Senator Hoar persisted. Several years after the Archbald impeachment, Alexander Simpson, who, as I have indicated, was one of Judge Archbald's counsel, suggested that impeachment evidence be taken by a committee or, preferably in Simpson's view, by U.S. judges, except when the President, Vice President, or a Supreme Court Justice is impeached. Simpson shared Senator Sutherland's observation about attendance during the Archbald trial: "[T]he thing that strikes a common law lawyer most is the few Senators who in fact listen to the evidence. During the Archbald Impeachment the membership of the Senate exceeded ninety, yet rarely over twenty members were present." A. Simpson, A Treatise on Federal Impeachment 67 (1916).

Simpson regretted that few Senators actually heard testimony directly, but he also expressed his understanding that, after periodic quorum calls during the trial, Senators would "return[] from whence they came, leaving the Senate as bare as it had been before. While that result was, and in all such cases must be regretted, yet it is not so much to be wondered at. Most of the work of Congress must now be done by committees, and the Senator who really attends to that work, and is present at the important legislative sessions of the Senate, has all his official time fully occupied." Id.

The impeachment trial in 1933 of District Judge Harold Louderback brought again to the force the problem of attendance at impeachment trials. Three years after the trial, Representative Hatton Sumners, chairman of the House Committee on the Judiciary and one of the managers at the trial recalled the scanty attendance of Senators, noting: "At one time only three Senators were present, and for 10 days we presented evidence to what was practically an empty Chamber." Impeachment No. 13, Time, March 16, 1936, at 19.

In reaction to the Louderback trial and at the urging of many Senators, Senator Henry Ashurst, the chairman of the Committee on the Judiciary, offered in 1934 the resolution which became Impeachment Rule XI following its adoption the next year. Senator Norris, who had experienced impeachment trials as a House manager in 1912 at the Archbald impeachment and as a Senator in 1933 at the Louderback impeachment, related to the Senate, as Senator Sutherland had done 20 years earlier, that most Senators in the final analysis would have to study the evidence in a printed record. In Senator Norris' words,

I think the object of the resolution is to avoid what always takes place in an impeachment trial before the Senate. There are times when there is not a quorum in the Senate present, when a dozen may not be here, when there are less than the number provided as the membership of the proposed committee to take the evidence. There is no use expecting all the Senate, or a quorum of the Senate, to be present every minute while evidence is being taken. Senators have to read the evidence in the RECORD in order to know what it is. 78 CONGRESSIONAL RECORD 9929 (1934).

The use of committees to receive evidence at impeachment trials is a matter, therefore, which has had the attention of thoughtful Senators in this century. In an ideal world we might all prefer that each Senator personally hear all impeachment evidence, just as we might prefer that each Senator personally hear witnesses to every matter bearing upon war or peace or other aspects of the Nation's welfare that we are called upon to consider. However, we are required of necessity to learn through the study of printed records about many of the important matters which compete for our attention.

THE USE OF RULE XI IN THIS IMPEACHMENT

Rule XI, of course, does not require the Senate to receive evidence through a committee nor does it foreclose the Senate, even after evidence has been received by a committee, from calling for some or all of the witnesses to testify in open Senate. The question in any particular impeachment is whether, based on the facts of that impeachment, the rule should be used or used exclusively.

The principal deficiency attributed to rule XI is the contention that the triers of fact, the membership at large of the Senate, are unable to assess the credibility of witnesses. There may, indeed, be cases in which it is essential to observe witnesses directly, and there may be, perhaps, cases in which review of even a videotape is not an adequate substitute for direct observation. While it is not my purpose in these remarks to review in any detail the evidence upon which the Senate convicted Judge Claiborne, I would like to offer several comments about the importance of evaluating the credibility of witnesses in this proceeding.

The point has been urged that the question whether Judge Claiborne wrote to his tax preparer, Joseph Wright, on April 11, 1980, to inform Mr. Wright of his full income from legal fees for 1979 presents an issue of credibility which cannot be determined from the printed record of sworn testimony. The difficulty with this contention is that it assumes that Judge Claiborne had a complete, or at least a compelling, defense if the letter had actually been written.

Of course, if the letter was written after the date it bears, then Judge Claiborne's tax violations would pale beside potential charges of perjury

and the fabrication of evidence. It seemed to me, therefore, that we should begin by assuming that the letter had been written. We could equally assume that, for one reason or another, Mr. Wright had not seen the letter. Ellen Arthur, Judge Claiborne's newly discovered witness, stated in her affidavit that, 2 or 3 days after the judge's secretary had delivered an envelope to Mr. Wright's office, Mr. Wright had stated that the letter could not be found or had been misplaced.

The assumption that the letter was written on April 11, 1980, does not elevate Judge Claiborne to high ground. Rather, the letter confirms an image of Judge Claiborne produced by other evidence. The judge was a person who had a very good sense of his financial situation. He prepared slips to memorialize his legal fee income and he recorded the information from these slips in a financial diary. On or about March 1, 1980, without consulting his detailed records, Judge Claiborne wrote to his accountant that his legal fee income for 1979 amounted to about $46,000. He was off by about $5,000, but he was in the right neighborhood.

Then, if we continue to assume that he wrote the April 11, 1980, letter on the date it bears, Judge Claiborne made a precise calculation of his legal fee income for 1979 on that day. He performed this calculation by totaling, on April 11, 14 separate items of legal fee income, and writing by hand a letter to his accountant which stated the result of this calculation. Judge Claiborne asked the Senate to believe that 19 days later he simply placed this careful calculation out of mind when he spoke to his accountant about the preparation of his 1979 tax return.

Then, 34 days later, when Judge Claiborne filed his judicial financial disclosure report, he again did not use the figure for legal fee income which he had only recently calculated. The disclosure report diminishes the relevance of another credibility issue; namely, whether Judge Claiborne had signed his 1979 return in blank or whether he signed the return in Mr. Wright's office after the return had been prepared. The disclosure report confirms, no matter who is to be believed about the signing of the tax return, that Judge Claiborne knowingly intended to disclose to the Government, both on his disclosure form and on his subsequent tax return, only part of his legal fee income for 1979. These objective circumstances are sufficient to support the conviction on the first article without resolving the credibility of testimony about ancillary matters.

Then, with respect to the second article, it should be recalled that the case presented by the House consisted primarily of documents, including Judge Claiborne's tax return for 1980, and the testimony of an expert. A letter to Judge Claiborne dated April 6, 1981, from his tax preparer for 1980, Jerry Watson, establishes that Judge Claiborne knew that his tax preparer was planning to report a capital loss on the law practice which the judge had abandoned several years earlier. The patently fictitious capital gains transaction on the previously abandoned law practice, which was used to eliminate $88,000 in ordinary income from legal fees, was sufficient to establish a willful failure to report income for 1980.

The demeanor of witnesses may be important in other impeachments, but in this impeachment the critical facts were fairly established based on solely the written record. Furthermore, as Members were aware, videotapes of the committee's hearings were available to any Member who wished to supplement his or her reading of the transcript of the committee's proceedings.

THE SENATE'S OBLIGATION TO "TRY" IMPEACHMENTS

The Constitution provides that the Senate shall have the power to "try" impeachments. If the word "try" imported into the Constitution the exact specifications of a judicial trial, then the Senate might have little latitude to define its rules of proceedings. However, the Framers did not intend to obligate the Senate to replicate all features of a judicial trial. Hamilton recognized that the Senate "can never be tied down by such strict rules, either in the delineation of the offence by the prosecutors, or in the construction of it by the judges, as in common cases serve to limit the discretion of courts in favor of personal security." The Federalist No. 65, at 428 (B. Wright ed. 1961). Justice Story expressed the similar opinion that "it is obvious that the strictness of the forms of proceeding in cases of offences at common law is ill adapted to impeachments." J. Story, Commentaries on the Constitution, § 765, at 532 (3d ed. 1858).

Instead, the requirement that conviction on impeachment be by "trial," I believe, was intended to fulfill the Framers' intent that the Senate act in "judicial character as a court." The Federalist No. 65, at 426 (A. Hamilton). The Framers intended that the Senate perform this judicial function impartially, "to preserve, unawed and uninfluenced, the necessary impartiality between an individual accused, and the representatives of the people, his accusers." Id. at 427 (emphasis omitted).

In my opinion, the Senate performed its judicial task with complete impartiality. There were many outside of the Senate who thought that this impeachment should have taken the Senate only several hours to resolve after the House exhibited its articles in early August. The Senate determined, instead, that Judge Claiborne should have available to him the subpena power of the Senate to bring here witnesses who could testify to the tax transactions in 1979 and 1980. These witnesses were examined and cross-examined by counsel and also questioned by members of the committee over 7 days of hearings. The full Senate received briefs from the parties and then heard closing arguments from the managers, from Judge Claiborne's counsel, and from Judge Claiborne. The Senate deferred its decision whether to hear witnesses in open Senate until it heard and considered these arguments. Senators then deliberated with great care prior to voting. In every sense the Members of the Senate fulfilled their special impeachment oath to "do impartial justice according to the Constitution and laws."

I would like to conclude with a brief note of appreciation. Each member of the Impeachment Trial Committee—the vice chairman, Mr. SARBANES and Mr. HATCH, Mr. WARNER, Mr. RUDMAN, Mr. PRESSLER, Mr. MCCONNELL Mr. HEFLIN, Mr. DECONCINI, Mr. PRYOR, Mr. GORE, and Mr. BINGAMAN—approached the task of the committee with a great sense of purpose and seriousness. The membership of the committee agreed to, and then adhered to, a requirement that a quorum, a majority of the 12-person committee, be present at all times. The committee was presented with important questions about the proper scope of the impeachment proceedings before it, and our ability to resolve those questions, wisely I hope, depended on the intelligence and effort which each Member contributed to our deliberations.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

[New York University Law Review]

THE HISTORICAL AND CONSTITUTIONAL BASES FOR THE SENATE'S POWER TO USE MASTERS OR COMMITTEES TO RECEIVE EVIDENCE IN IMPEACHMENT TRIALS

(Napoleon B. Williams, Jr.)

[Excerpt]

3. THE COMMITTEE PRACTICE OF THE HOUSE OF LORDS

Although the House of Lords turned less frequently to the use of committees in impeachment proceedings than did the Commons, they were at times employed for a variety of purposes. Like the Commons, the Lords occasionally used committees at the pretrial stage of proceedings to search the precedents and to set the proper procedure.[65] More significantly—and despite Professor Berger's assertion to the contrary—even the Lords' power to hear evidence at impeachment trials was at times delegated to a committee,[66] and precedent for this practice was accessible to the American framers.

Jefferson, for example, turned to Selden for "common rules" [67] on examination of witnesses during impeachment trials and

concluded that "the practice is to swear the witnesses in open House, and then examine them there; or a committee may be named who shall *examine them in committee,* either on interrogatories agreed on in the House or such as the committee in their discretion shall demand." [68]

Though Vice President Jefferson's statement postdates the Constitutional Convention, the source on which he relies was cited authoritatively in the colonies as early as 1768.[69] This suggests that the framers were aware of the English practice of using committees in impeachment trials. But more convincing historical evidence is available. Neither Jefferson nor the other Founding Fathers had to rely solely on Selden's version of English trial practice. The *State Trials,* with which the framers were also familiar,[70] reveals a number of English impeachment trials in which the House of Lords used committees to hear evidence.

In 1620, for example, the House of Commons impeached the Lord Chancellor of England, Francis Bacon, specifying in 28 articles its charges of corruption.[71] The Lords then "proceeded to the Examination of the Complaints, and took divers Examinations of Witnesses in the house, and appointed a select Committee of themselves, to take Examination of Witnesses to the Briberies and Corruptions on the Lord Chancellor; which being ended and collected, were ordered to be transcribed with the proofs . . ." [72]

Although Bacon's subsequent confession[73] obviated the need for the Lords to use the committee's evidence, the implication is clear: the Lords felt confident of its power to use transcribed testimony in lieu of examining witnesses before the full House.

In a connected case, the House of Commons impeached the Bishop of Llandaff, Dr. Field.[74] The Lords initally appointed a committee to take evidence on his impeachment and then heard the report of a committeeman, the Earl of Huntingdon.[75] From this report, "a collection was made thereof, which . . . [was] delivered by his lordship into court," [76] *i.e.,* the House of Lords sitting as a high court of impeachment. After this collection was read, the Lords debated the evidence [77] and sent the following declaration to the Commons:

"Whereas the house of commons informed this house of a great misdemeanor committed by Dr. Field . . . and hath also sent since to demand judgment in that cause; the Lords having full examination thereof upon oath, do not find it proved in the same manner as, it seems, they [the Commons] were informed by examinations taken in their house.[78]"

In disputing the Commons's conclusions on the basis of committee testimony alone, the Lords indicated its intention to place committee transcripts on an equal footing with personal examination of witnesses before the bar of the House.

The impeachment of the Lord Treasurer Middlesex [79] in 1624 provided yet another opportunity for the use of committees to take evidence in impeachment trials. Like Sir Francis Bacon, the Lord Treasurer was a man of eminence and prestige. So prominent, in fact, was Lord Middlesex that King James I personally appealed to the Lords on his behalf,[80] urging them to be on guard lest one "man's particular ends bring forth a precedent, that may be prejudical to you all and your heirs after you." [81] Despite the prominence of the respondent and the political significance of the trial, the Lords chose to try the impeachment without having the full House hear testimony, instead relying on depositions taken before sundry committees.[82]

Delegation of authority to a committee in a trial of such importance manifests the ease with which the Lords moved from full house to committees during impeachment proceedings, at least up to the point of final judgment. During the proceedings against Lord Middlesex, for example, a report read before the House of Lords stated that speeches before the examining committee had questioned the honor of the Lord Treasurer, and that he "desired Examinations might be taken, upon oath, for the clearing thereof."[83] The natural response of the Lords was to appoint a "sub-committee . . . constituted to take such Examinations."[84] This committee reported back, and, after some debate, the Lords agreed that yet another committee "should be appointed to draw up the heads of a charge against the Lord Treasurer, out of a brief of the last report, and examinations taken by the former committee."[85] Thus, before the House of Commons had even formulated their own charges, the House of Lords had used three separate committees to investigate and act upon the matter of the Lord Treasurer's honor.

Indeed, the House of Commons subsequently did take cognizance of this matter, deciding at that point to impeach.[86] It asked the Lords for a conference at which the charges in the complaint against the Lord Treasurer were enumerated.[87] The Lords then established a fourth committee, and several days later "the archbishop of Canterbury reported to the house [of Lords], That the Committee appointed to examine into the Complaint against the Lord Treasurer, had met, and examined divers witnesses . . . and had made a collection of Part of said Charge." [88] This collection was disclosed to the Lord Treasurer, who was then asked to present a list of his witnesses.[89] Although there is no direct reference to the forum in which the defense witnesses testified, they too must have been examined in committee,[90] since their testimony was read by the clerk during the trial.[91]

This review of English precedents shows beyond doubt that the House of Lords used committees to hear evidence during impeachment trials in the early 17th century.[92] It is difficult to determine definitively whether this practice continued, as no direct reference to the use of committees during later impeachment trials has been discovered. It is clear, however, that, unlike other practices which were outlawed by affirmative action of the House of Lords, the use of committees to take evidence and examine witnesses has never been banned or disavowed as precedent—as were other impeachment procedures considered to have been wrongly invoked.[93]

Having established the outlines of the English practice with which the framers of the American Constitution were able to become familiar, the extent to which the framers intended to authorize parallel procedures by their use of the term "impeachment" in article I, section 3 of the Constitution must now be determined.

[65] *E.g.,* 4 HATSELL, *supra* note 29, at 174, 185, 210.

[66] *See* text accompanying notes 71-92 *infra.* Professor Berger states that his search of English impeachment proceedings failed to reveal any reference to the Lords' use of committees to hear evidence, BERGER, *supra* note 13, at 171. This may perhaps be explained by his heavy reliance on Hatsell, who overlooked such precedents. Hatsell's shortcomings were known to Vice President Jefferson, who noted that Hatsell "only treated some general heads," making it necessary "to recur to other authorities in support of a number of common rules of practice to which his plan did not descend." JEFFERSON, *supra* note 29, at 432.

[67] The phrase is from the preface to his *Manual of Parliamentary Practice.* JEFFERSON, *supra* note 29, at 432.

[89] *Id.* at 1199.

[90] The report states that the witnesses were to be "examined as the house shall think fit." *Id.* at 1200.

[91] *Id.* at 1228.

[92] The practice of using committees to hear evidence is also demonstrated by practices in several trials which, although analogous to impeachment trials, are not denominated as such in the State Trials. For example, in proceedings against Lord Kimbolton and five members of the House of Commons in 1641, 4 State Trials supra note 30, at 83, the King's Attorney requested that "a Select Committee of Lords . . . be appointed to take the examination of such Witnesses . . . as formerly hath been done in cases of like nature, according to the justice of this house." Id. at 85. The committee was never formed because the case did not reach trial on the merits. The Lords refused to hear the case since, by circumventing and intimidating the House of Commons, the King's manner of proceeding had breached the privileges of the Commons. Id. at 104-10.

The Lords routinely delegated the evidence-hearing functions, not only to committees of their own members but also to tribunals outside of Parliament. In the 1624 trial of Samuel Harsnett for extortion, for example, the Lords heard the complaint of the Commons and the answer of the accused and then entered an order that "in respect to the shortness of time and the multiplicity of business, now depending to be determined, the complaint of the Commons, against the bishop of Norwich, shall be referred to the High Commission, to be examined by them; and they to make report thereof to the house, and then the house will judge of it." 2 id. at 1258. In thus employing the High Commission, an ecclesiastical body created by the English monarchs to perform judicial and nonjudicial functions beyond the competence of ordinary ecclesiastical courts, 1 Holdsworth, supra note 32, at 605-11, the Lords delegated important functions to a forum external to Parliament.

On the same day, the Bishop of Norwich brought a complaint against his accuser before the House of Lords. The complaint, "with the witnesses the bishop produced to prove it, was referred to the examination of the archbishop of Canterbury, who was to make report thereof to the house for their judgment of the matter." 2 State Trials, supra at 1258. The Archbishop of Canterbury, a lord spiritual, may have assumed the function of a master, an advisory or a trier. Unfortunately, no further men-

tion of the proceedings has been discovered so it is impossible to determine exactly what role he played.

[93] An example of a restriction limiting the use of a procedure to the specific trial for which it was adopted occurred in the Lord Middlesex impeachment proceedings. The House of Lords gave the Lord Treasurer permission to answer the Commons's complaint directly in Commons, but ordered "[t]hat no lord of that house shall hereafter without license, answer any complaint in the house of commons." 2 State Trials, supra note 30, at 1185. Had the Lords believed that examination of witnesses in committee was an equally anomalous impeachment trial procedure, it could easily have provided that no precedent would be established by the use of a committee in any particular trial.

POLICY REVIEW ARTICLE OF MAJORITY LEADER BOB DOLE

Mr. SIMPSON. Mr. President, with the Reykjavik meetings so fresh in our minds, I want to bring to the attention of my colleagues an article entitled "Grappling With the Bear: A Strategy for Dealing With Moscow," written by our bright and distinguished Republican leader, Senator DOLE, for the current issue of policy review, the Heritage Foundation magazine.

The article outlines a tough, thoughtful realistic strategy for conducting our relations with the Soviets, and it would be very worthwhile reading at any time. But it seems to me to deserve special mention now. Though written several weeks before Reykjavik, it is remarkably prescient in zeroing right in on the very negotiating trap that Gorbachev tried to spring on this country over the weekend relating to SDI—the trap the President so wisely and courageously avoided. Let me quote briefly from Senator DOLE's article:

We also need to keep firmly in mind the idea that our strategic posture is a very dynamic concept. What we decide today impacts not only on our immediate position relative to the Soviets but where we can be a decade or so down the road. SDI is the prime case in point. While it may turn out to make sense to trade off SDI deployment over the next 7 to 10 years for some immediate concessions on Soviet weapons levels, let's be sure we examine that proposition meticulously before striking any deal. On an issue of such fundamental importance as SDI, it is far more important that any agreement we sign be sound than soon.

Mr. President, I do not know if the President had the good fortune to read Senator DOLE's excellent article before he met with Gorbachev, but it certainly would appear that the President and the majority leader are on precisely the same wave length—and the right wave length—on this critical issue.

Mr. President, I ask unanimous consent that the full text of the majority leader's article appear in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

GRAPPLING WITH THE BEAR—A STRATEGY FOR DEALING WITH MOSCOW

(Senator Bob Dole)

Despite the Daniloff case, 1986 may be a watershed year in U.S.-Soviet relations. We appear to be on track for a second Reagan-Gorbachev summit and to be engaged in the first truly serious nuclear arms control negotiations we have had with the Russians since the early 1970s. Simultaneously, a second level of political contacts continues on a whole range of regional issues—Afghanistan and Kamphuchea among the most prominent—and we are actively exploring new prospects for trade, especially in the agricultural field. In sum, we are dealing with the Soviets at all levels and on a wide range of subjects. So far, the concrete results have been scanty. But there is reason to hope.

As always, it is difficult to know exactly what game the Soviets might be playing. But that very uncertainty makes it all the more important that we take a new, hard-headed look at our overall strategy for dealing with the Russians; at how we can best shape and respond to the way the situation evolves; and at how we can take advantage of all opportunities to advance our interests, while keeping a firm watch on our flanks, to make sure we don't give or bargain away anything important to our national interest.

In the paragraphs below, I want to suggest some general principles for dealing successfully with the Russians, and I want to relate these principles to the real world issues with which the President, the Congress, and the American people will be grappling in the months ahead.

THE MYTH OF DETENTE

In making a judgment on whether and how to deal with the Soviets, we must start by keeping two related facts clearly in mind. First, the U.S.S.R. is fundamentally different from the United States, in system, in goals, in values. The Daniloff case proves that once again. And, second, some of these differences are so profound they are never going to disappear or be negotiable.

Ronald Reagan termed the Soviet Union an "evil empire," and for that expression he was pilloried. And yet, to cite but one example, there is no dispute that the Russians have invaded and occupied Afghanistan, an independent country—surely the classic definition of an empire; and that in Afghanistan they engage in horrible tactics (the use of toy bombs to kill and dismember children is a case in point) to achieve their political goals—tactics which can reasonably be described as evil.

Time and talk are not going to turn the Soviet Union into a liberal democracy or lead it to drop its global imperialist aims. If we conduct our relations with Moscow believing such miracles can happen, then we are doomed to disappointment and, probably, are ripe to be taken to the cleaners.

If we pursue our general relations with the Soviets, and our general affairs in the world, in the illusion that some day we can bridge the vast differences that exist and achieve some fundamental common ground—that our competition with Moscow will end; that there really will be "detente"—then we are in deep, deep trouble.

In fact, detente is a dangerous myth, based upon a phony premise: that there is more to our relations with the Soviets than a sum of parts; that if we cooperate with Moscow in enough ways and sphere, we will create an atmosphere of goodwill that will be self-generating—that is, the Soviets will begin to make concessions not for some specific quid pro quo but to preserve a constructive ambience.

The danger of worshipping the false god of detente is twofold. Belief in detente breeds unrealistic expectations, which invariably lead to shattering disappointment. More important, the illusion that detente is real and valuable in its own right leads to self-imposed pressure for unilateral concessions, to keep the spirit of detente alive. Only if we can put the idea of detente behind us, once and for all, will we have a realistic chance to accomplish what we want with the Soviets.

CHALLENGING THE RUSSIANS

And there is a flip side to this coin—our paranoid fear of defending our own interests or of challenging the Soviets, even where their activities are unwarranted and indefensible and where they are vulnerable, just because we might somehow sour our overall bilateral relations.

In fact, the opposite is true—when we stand up to Moscow, or keep it on the defensive, we will reduce its long-term aggressiveness and often even find a more willing and flexible negotiating partner. We have rights and interests, too, and when Moscow clearly understands our determination to defend those rights and pursue those interests, the world will be a safer, not a more dangerous, place. That is the lesson of, for example, the Cuban missile crisis and of our determined pursuit of a militarily stronger of a violent, armed response. The keys are: (1) moving where we have the advantage and can bring the most effective power to bear; and (2) avoiding direct assaults on fundamental Soviet interests—such as the survival of the Soviet state—which might engender a massive, violent response.

Let me cite one example. While the Russians have ambitious plans in southern Africa, the vital interests of the Soviet state are *not* engaged. Moscow will likely defend its interests vigorously. But it is not going to launch an attack on the United States, or break off all contacts with us, because we pursue our own interests there aggressively.

Make no mistake about it—we do have interests in that region that are just as important, and certainly more legitimate, than the Kremlin's. And we have just as much right as Gorbachev and his cronies to pursue and defend our interests—in Angola, through strong support for Jonas Savimbi's freedom fighters; in Mozambique, by refusing to provide aid and comfort to the Marxist government, at least until it clearly and definitively turns away from Moscow; and in South Africa, by making clear that while we are determined to see an end to apartheid, we also find the African National Congress's Communist links and violent tactics abhorrent and inimical to the real interests of black South Africans.

A BIG STICK

But it is not enough to be assertive. We also must be able to back up what we say to Moscow with real strength, or we're just not going to get anywhere. Building up our strength—and I'm speaking primarily of our military strength but also of our political and economic strength—is not a substitute for, or a rejection of, constructive bilateral relations with the Russians. On the contrary, it is an essential prerequisite for any successful dealings with the Kremlin.

When Ronald Reagan submitted his first, ambitious defense budgets, the hue and cry was intense. Those budgets, we were told, would set off a new arms race which we

would likely lose; would doom any prospects for arms control negotiations; and would usher in a new Cold War.

The opposite, of course, has happened. While the Soviets continue to spend heavily on military development—and, let's face it, that's something they will continue to do, no matter what—there has been no new destabilizing arms race. Thanks to the MX, the B-1, and other promising research and development projects, we have closed the military gap. The Soviets did come back to the Geneva talks, and they now appear to have made the first serious proposal they have offered in a decade and a half. And, as already noted, the final details are being nailed down for another summit.

In fact, we are where we are, not in spite of, but because of, our military buildup. The Kremlin leadership has understood, and I believe in a curious way respected, the Reagan military strategy far better than the liberal American media. They have understood, though presumably not appreciated, that a strong America deprives them of their preferred tactic—getting what they want through blackmail and intimidation—and forces them to choose between only two options: (1) dangerous confrontation with a potent foe, or (2) accommodation. Happily, they appear to be resigned for the time being to the latter.

The corollary, of course, is that they will continue to pursue this course only so long as we make it the only attractive one. If we in Congress, through draconian defense budget cuts, forfeit what the President has achieved in military capability and readiness since 1980, we will compromise any prospects for successful talks with Moscow. If we refuse further development of the MX, emasculate strategic defense (SDI), cap B-1 production, scrap the 600-ship Navy, and do all the other things that many are advocating, we will be sending the President into the poker game of the next summit with all his cards showing and not one so much as a face card.

SETTING THE AGENDA

Another vital element in dealing successfully with the Soviets is to ensure that our agenda, rather than theirs, is on the table when we do deal. The Soviets still view us with pretty much the same mindset they've always had—what's theirs is theirs; what's ours is negotiable. It's time we relegated that concept to the trash can.

Pursuing our own concerns aggressively, of course, is going to set off a new round of handwringing among our faint of heart—we have to be careful; we can't offend the Soviets, if we push too hard, they won't deal. hogwash!

The experience we've had on SDI is instructive. When confronted with a program or an idea they don't like, such as SDI, the Kremlin's automatic reaction—one reinforced by years of Western concessions—is to refuse even to discuss it. But if we are tough enough, and if we have the means—carrot or stick (and SDI could be both)—to make Moscow realize the practical need for talks, then talks will ensue, despite the propaganda, despite the rhetoric.

In the final analysis, the Russians will deal when one or both of two conditions prevail—when there is something in it for them to gain, or when they stand to lose by not dealing. Our goal should be to create an agenda which forces them to deal with our issues, and as much as possible, on our terms.

Of course, not every issue fits every forum. But every important issue deserves, and demands, some forum. Nothing important to us is "too sensitive" to raise with Gorbachev or any other Soviet leader, no matter how embarrassing it may be to them. And nothing in Soviet history suggests they will be angered, or embarrassed, out of further talks if they see those talks as in their interest or if they see the breakdown of such talks as unduly costly.

This list of subjects we should pursue more vigorously is long. One key issue is Soviet violations of existing arms control agreements. That subject must remain on the front burner, in both substantive and propaganda terms. We should never let the world forget Moscow's sorry record of violations and non-compliance. And we should sign no new arms control agreements, period, unless the Soviets have done two things: (1) satisfactorily responded to our concerns on existing violations; and (2) agreed to effective means of verification.

Another central issue is Soviet human rights violations both in foreign countries such as Afghanistan, and at home. We can never close our eyes to Soviet genocide in Afghanistan or imprisonment of dissidents at home. Despite Soviet efforts to make the next summit a one-issue (arms control) meeting, we must use a smmit or any such meeting to keep the pressure on the Kremlin for its inhumane human rights record.

SOME COMMON INTERESTS

I should also note here, too, that—despite the many things that do divide us—there are some issues which both sides have on their agendas which could be the subject of non-hostile, perhaps even cooperative, dealings. Because the Soviets are, essentially, our enemies, does not mean we have no interests in common.

One issue that comes immediately to mind is nuclear non-proliferation. Neither of us has any long-term interests in seeing the spread of weapons-relevant technology and weapons-grade material to the developing world. Both of us, though—to win the political favor of friends or allies, for commercial gain, or because of our fears of the other—do less than we could and should to stop this spread. Engaging the Soviets in an aggressive non-proliferation program ought to be one of the highest priorities of our arms control talks, not just a small sideshow.

RISKS AND RETURNS

In sum, then, it is in our interest to deal with the Russians whenever: (1) they will engage us on the issues on our agenda, and (2) there is some reason to believe they may be prepared to deal in good faith.

But before we actually deal, there is one additional and critical thing we need to do: decide on our own goals and work out a realistic strategy for accomplishing them. It sounds easy, but it's something at which we've been woefully ineffective.

Too often we have approached our relations with the Soviets as a reactive, damage-limiting exercise. We wait for the Russians to act, or for crisis to emerge, and then we rush into the breach with a stop-gap response—using whatever means is most convenient at hand—with little regard for how our response will fit into our broader relations with the Soviets or our broader interests in the world.

The grain embargo of the Soviet Union is probably the classic example—since we got no cooperation from our allies and friends, it had no impact on Soviet policies in Afghanistan or on the economic well-being of the Soviet homeland. It merely cut us out of a market which yielded far more national benefit to us as grain sellers than to the Soviets as grain buyers.

We need to start our search for the right goals and strategy by refocusing on some of the fundamental questions in U.S.-Soviet relations. We needn't necessarily announce to the world how we really feel about these questions. But we certainly need to know in our own minds how we do. And, right now, I'm not sure that we do.

I would cite two issues in particular that our policy makers must address more comprehensively and decisively.

OUR STRATEGIC POSTURE TOWARD THE U.S.S.R.

First, where do we need to be or—perhaps more precisely—where can we realistically aspire to be, vis-a-vis the Soviet Union in strategic military terms? Do we need to be superior in all major categories of weapons? Superior overall but willing to tolerate some areas of equity or even relative weakness? In rough parity, both overall and system-by-system? Of even inferior overall, but with enough retaliatory punch to deter strategic attack?

And, in fact, we need to address more concretely what superiority and parity actually mean. We need to decide to what degree technological superiority can offset numerical superiority (e.g., in strategic missile systems) and adjust our plans—and our negotiation positions—accordingly.

We also need to keep firmly in mind the idea that our strategic posture is a very dynamic concept. What we decide today impacts not only on our immediate position relative to the Soviets but where we can be a decade or more down the road.

SDI is the prime case in point. While it may turn out to make sense to trade off SDI deployment over the next seven to 10 years for some immediate concessions on Soviet weapons levels, let's be sure we examine that proposition meticulously before striking any deal. On an issue of such fundamental importance as SDI, it is far more important than any agreement we sign be sound than soon.

Once we address these basic issues of strategic doctrine, a working strategy for achieving the goals we set flows more naturally—and, equally important, becomes more compelling politically. My own view, for example, is that we must have significant technological superiority over the Soviets in both nuclear and conventional weaponry (though not necessarily in every individual weapons system) to offset Soviet superiority in numbers of weapons and military personnel. We also need to maintain the technological initiative, so that we can nudge military R&D into the areas where we have the relative advantage. That, in fact, is one of the strongest arguments for SDI.

By starting with these kind of clear-cut assumptions and goals, it becomes much easier to decide which weapons systems need aggressive development and which can be given lower priority. Equally important, it should be much easier to sell a cynical and too often partisan Congress on a program—be it SDI or MX or whatever—that fits these clear criteria of where we need to be in national defense.

SHOULD WE TRADE WITH THE U.S.S.R.?

The other fundamental issue we need to reexamine is the nature of our economic relations with the Soviets. We all would agree, I think, that we must do everything we can to deny the Soviets access to national security-related high technology. But even with that stipulation, the remaining range of

policy choices is wide. We could terminate all economic ties with the U.S.S.R., on the grounds that such relations only strengthen a state which has made itself our implacable enemy. We could try to limit our economic relations to those areas where the direct benefit we derive is clearly greater than the advantage accruing to the Soviets (though the Soviets are not likely to be willing to play that kind of game for very long). A third option would be to view and treat trade and investment primarily as means to broader ends, rather than potentially rewarding ends in themselves, chips in a poker game, to be played ad hoc as the cards are dealt on a wide variety of issues, both economic and non-economic—the logic behind such things as the grain embargo and the Jackson-Varnik bill. Or we could drop all barriers (except those clearly and directly relevant to our national security), treating the Soviet Union as just another trading and investment partner.

I think it is high time that we decided what we want, and critically and comprehensively looked at what we stand to gain and lose through our economic ties with the U.S.S.R. No administration in my lifetime has spoken, or acted, clearly on this issue. Yet no issue, except that of our national defense, is more relevant to our country and our competition with the Soviet Union.

Consider the case of our bilateral trade. The Soviets usually have a multitude of potential suppliers eagerly lined up to provide them the non-strategic goods and commodities they want. That's why unilateral U.S. attempts to win Soviet concessions by withholding exports haven't worked, and aren't likely to work as well as we would like them to.

As long as that situation prevails—if our foreign friends can sell all the non-strategic items the Soviets need; if they have no intention of cutting back on their exports, no matter what we do or say; and, on the contrary, if they are actually carving out larger market shares through unfair trading practices—then we are only shooting ourselves in the foot when we alone refuse to compete.

Of course, the reverse logic holds, too. If there are trade items where we are the sole or clearly preferred supplier, or other forms of economic leverage we have over Moscow, then we should not hesitate to use that pressure judiciously in pursuit of important goals, including non-economic goals. For example, we should seriously consider whether we can use current Soviet hard currency shortfalls growing out of the drop in oil prices to wrest concessions from the Kremlin.

Certainly, I have no desire to subsidize the Soviet state. No thinking American does. But I do want to see our economy strong. I do want us to take advantage of all trade opportunities to revitalize our industry and agriculture, as long as we are not simultaneously undermining other U.S. interests.

And, equally important, I do want to see all sectors of our economy treated fairly, both in combating foreign competition and bearing any burdens imposed by the needs of our foreign policy. Let's quit putting this monkey solely on the backs of our farmers or any other single group. That's bad policy toward the Soviets. That's unfair policy toward our own people.

WE CAN DEAL WITH THE SOVIETS

We can deal with the Soviets, in both senses of the word.

We can handle anything they throw at us—militarily, economically, and politically. We just have to get our act together—know where we want to go, have a plan for getting there, stick to that plan and be willing to pay the price.

And we can interact and negotiate with the Soviets with great success on many—though not all—issues. We have some important things to gain, if we can just keep clearly in mind what they are. And we have the resources to achieve those gains—both the "sticks" and "carrots" to bring Moscow around closer to where we want it to be.

VOTING ACCESSIBILITY FOR THE ELDERLY AND HANDICAPPED ACT

Mr. DURENBERGER. Mr. President, the opportunity to step into a voting booth and pull a lever expressing a choice is a right many of us take for granted. For thousands of disabled Americans, exercising that right to vote has meant voting as an "absentee" because the polling place, or the registration site was inaccessible, or it has meant not voting at all.

In November of this year, all Federal polling places will be made accessible to all voters, not only the able-bodied who can climb the stairs to a church hall or school classroom. Public Law 98-435, the Voting Accessibility for the Elderly and Handicapped Act, which I sponsored and passed in the 98th Congress with the able assistance of my colleague, the distinguished majority leader, Senator ROBERT DOLE, mandates accessibility.

The Voting Accessibility Act requires that all Federal-polling places, and registration sites conform to accessibility requirements for the disabled. This includes the provision of large-print instructions and registration materials, and telecommunications devices for the deaf.

With the first Federal election since the law went into effect swiftly approaching, a major educational effort has been launched by the National Organization on Disability and the Easter Seal Society for the benefit of Federal election officials, poll workers, and citizens. My colleague, Senator BOB DOLE, a tireless advocate of the handicapped, has been instrumental in promoting this project. At this point I would like to yield to the distinguished majority leader, Senator ROBERT DOLE.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Minnesota for his comments and would like to add a few words of my own on this important topic. Two years ago I joined Senator DURENBERGER in support of "The Equal Access To Voting Rights Act," legislation which safeguards the voting rights of our disabled, and elderly citizens. It was, and is, sound, long-needed legislation. Since that time, our 50 States have taken action to ensure that disabled citizens are no longer blocked from exercising their constitutional right due to physical barriers.

There are about 36 million persons with disabilities in the United States, and, of that number, a full two-thirds are of voting age. Each year many of our fellow citizens, the disabled, and the elderly, do not vote.

As we soon approach the November elections, let me commend the National Association on Disabilities and the National Easter Seal Society, as well as the myriad of other organizations throughout this country, for their efforts to increase the participation of disabled persons in the election process. Democracy clearly works best when everyone can, and does, participate.

Mr. DURENBERGER. Mr. President, I thank my colleague, Senator DOLE, and I applaud his efforts on behalf of voter accessibility. Public Law 98-435 would not be a reality had it not been for the full support of the Senator from Kansas.

The educational initiative discussed by my colleague will not only allow disabled voters to go to the polls, but will encourage the elderly and handicapped who have not voted, to exercise their rights.

Franklin Delano Roosevelt said, "Inside the polling booth every American man and woman stands as the equal of every other American man and woman. There they have no superiors. There they have no masters save their own minds and consciences."

Mr. President, this body must remain vigilant to its responsibility to ensure that equality. In the past, we have fought to ensure the right to vote for various distinct groups, through constitutional amendment and the Voting Rights Act. Our first step in ensuring the right to vote for the disabled came in the passage of the Voting Accessibility for the Elderly and Handicapped Act.

The education of Federal-polling officials, and volunteers is the vital link in extending the spirit of the Voting Rights Act to all citizens. The National Organization on Disability and the Easter Seal Society must be recognized for their efforts, and commended for their public spirit. Not only the physical barriers will be removed, but through education and understanding the greater barriers of fear and confusion which have plagued the elderly and disabled in the past will be eliminated.

Mr. President, I ask unanimous consent that an informational card entitled, "Disabled Citizens at the Polls," an article from the National Organization on Disability's publication report and a copy of Public Law 98-435 be printed in the RECORD following the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DISABLED CITIZENS AT THE POLLS

As Americans with disabilities increasingly participate in the life of their communities, more of them will want to vote in person at the polls rather than use absentee ballots. To assist election officials, poll workers and disability organizations cooperating with them, the National Easter Seal Society and the National Organization on Disability have produced this information with suggestions for making voting easier for all concerned. You will find suggestions for Common Courtesies & Guidelines and, on the back, a few adaptations at polling places to make them more accessible and usable. The purpose of offering this information is to strengthen a new federal law, the Voting Accessibility for the Elderly and Handicapped Act, effective December 31, 1985, "to promote the fundamental right to vote."

COMMON COURTESIES & GUIDELINES

Be considerate of the extra time it might take for a person who is disabled or elderly to get things done, and give unhurried attention to a person who has difficulty speaking.

Speak directly to the person who has a disability rather than to a companion who may be along.

Speak calmly, slowly and directly to a person with a hearing problem. Your facial expressions, gestures and body movements help in understanding. Don't shout or speak in the person's ear. If full understanding is doubtful, write a note to the person with a hearing problem.

Before pushing someone in a wheelchair, ask if you may do so and how you should proceed.

Greet a person who is visually impaired by letting the person know what and where you are. Provide a guiding device such as a ruler or card for signing forms. When offering walking assistance, allow the person to take your arm and tell him or her if you are approaching steps or inclines.

Be aware that dogs who assist people with disabilities should be admitted into all buildings. Such dogs are highly trained and need no special care other than that provided by the owner.

Be aware that federal law allows voters with disabilities to be accompanied and to receive assistance by another person in the voting booth.

Remember that all voters deserve courteous attention in exercising their right as citizens to vote.

SUGGESTIONS FOR MAKING VOTING PLACES ACCESSIBLE AND USABLE

Use temporary signs to identify handicapped parking and directions to entries for people with disabilities.

Use a temporary ramp if your voting place has steps at the entrance, but be sure the incline is not too steep.

If your voting place has heavy doors, someone should be available to assist those who need help.

A 32" clearance at non revolving doors will enable a person using a wheelchair to enter the building.

Smooth and hard floor surfaces or those covered with a tightly woven carpet with no pad or a thin pad are best for wheelchair users and others.

Tables to be used by people in wheelchairs should have a clear knee space underneath that is at least 29"-34" high.

Printed instructions will enable persons who are hearing impaired to vote. Printed instructions in simple large lettering will help persons who are vision impaired to vote. Pictures or symbols also help everyone. For example, arrows or a hand point are easier for everyone to understand than signs that say "voters entrance at the east side."

For persons not able to operate voting machines, the availability of paper ballots makes voting possible.

At least one punch card machine with enough knee clearance should be available to allow voting from a seated position.

You will increase voter turnout if you inform people with disabilities that voting places are accessible. A public service announcement on radio and TV, as well as in the newspapers, is the most effective way to reach people with all types of disabilities.

When choosing voting locations in your community, select buildings that are more apt to be accessible, i.e., schools, libraries, community centers, firehouses, park buildings, court houses, post offices, other government buildings and places of worship. Polling places can be moved from inaccessible sites to accessible ones.

VOTING ACCESSIBILITY FOR THE ELDERLY AND HANDICAPPED ACT

[An Act to improve access for handicapped and elderly individuals to registration facilities and polling places for Federal elections.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Voting Accessibility for the Elderly and Handicapped Act".

PURPOSE

SEC. 2. It is the intention of Congress in enacting this Act to promote the fundamental right to vote by improving access for handicapped and elderly individuals to registration facilities and polling places for Federal elections.

SELECTION OF POLLING FACILITIES

SEC. 3. (a) Within each State, except as provided in subsection (b), each political subdivision responsible for conducting elections shall assure that all polling places for Federal elections are accessible to handicapped and elderly voters.

(b) Subsection (a) shall not apply to a polling place—

(1) in the case of an emergency, as determined by the chief election officer of the State; or

(2) if the chief election officer of the State—

(A) determines that all potential polling places have been surveyed and no such accessible place is available, nor is the political subdivision able to make one temporarily accessible, in the area involved; and

(B) assures that any handicapped or elderly voter assigned to an inaccessible polling place, upon advance request of such voter (pursuant to procedures established by the chief election officer of the State)—

(i) will be assigned to an accessible polling place, or

(ii) will be provided with an alternative means for casting a ballot on the day of the election.

(c)(1) No later than December 31 of each even-numbered year, the chief election officer of each State shall report to the Federal Election Commission, in a manner to be determined by the Commission, the number of accessible and inaccessible polling places in such State on the date of the preceding general Federal election, and the reasons for any instance of inaccessibility.

(2) Not later than April 30 of each odd-numbered year, the Federal Election Commission shall compile the information reported under paragraph (1) and shall transmit that information to the Congress.

(3) The provisions of this subsection shall only be effective for a period of 10 years beginning on the date of enactment of this Act.

SELECTION OF REGISTRATION FACILITIES

SEC. 4. (a) Each State or political subdivision responsible for registration for Federal elections shall provide a reasonable number of accessible permanent registration facilities.

(b) Subsection (a) does not apply to any State that has in effect a system that provides an opportunity for each potential voter to register by mail or at the residence of such voter.

REGISTRATION AND VOTING AIDS

SEC. 5. (a) Each State shall make available registration and voting aids for Federal elections for handicapped and elderly individuals, including—

(1) instructions, printed in large type, conspicuously displayed at each permanent registration facility and each polling place; and

(2) information by telecommunications devices for the deaf.

(b) No notarization or medical certification shall be required of a handicapped vote with respect to an absentee ballot or an application for such ballot, except that medical certification may be required when the certification establishes eligibility, under State law—

(1) to automatically receive an application or a ballot on a continuing basis; or

(2) to apply for an absentee ballot after the deadline has passed.

(c) the chief election officer of each State shall provide public notice, calculated to reach elderly and handicapped voters of the availability of aids under this section, assistance under section 208 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-6), and the procedures for voting by absentee ballot, not later than general public notice of registration and voting is provided.

ENFORCEMENT

SEC. 6. (a) If a State or political subdivision does not comply with this Act, the United States Attorney General or a person who is personally aggrieved by the noncompliance may bring an action for declaratory or injunctive relief in the appropriate district court.

(b) An action may be brought under this section only if the plaintiff notifies the chief election officer of the State of the noncompliance and a period of 45 days has elapsed since the date of notification.

(c) Notwithstanding any other provision of law, no award of attorney fees may be made with respect to an action under this section, except in any action brought to enforce the original judgment of the court.

RELATIONSHIP TO VOTING RIGHTS ACT OF 1965

SEC. 7. This Act shall not be construed to impair any right guaranteed by the voting Rights Act of 1965 (42 U.S.C. 1973 et seq.).

DEFINITIONS

SEC. 8. As used in this Act, the term—

(1) "accessible" means accessible to handicapped and elderly individuals for the purpose of voting or registration, as determined under guidelines established by the chief election officer of the State involved;

(2) "elderly" means 65 years of age or older;

(3) "Federal election" means a general, special, primary, or runoff election for the office of President or Vice President, or of Senator or Representative in, or Delegate or Resident Commissioner to, the Congress;

(4) "handicapped" means having a temporary or permanent physical disability; and

(5) "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

EFFECTIVE DATE

SEC. 9. This Act shall apply with respect to elections taking place after December 31, 1985.

Approved September 28, 1984.

N.O.D. AND NEW NATIONWIDE COALITION HAVE BEGUN CAMPAIGNS TO INCREASE ROLE OF LARGEST MINORITY IN NATION'S REGISTRATION AND VOTING PROCESS

POINTING TOWARD '86 AND '88 ELECTIONS

(By Mark Lewis)

An extensive and concentrated effort is developing across the country to expand the participation of disabled Americans in the election system.

It is led by the National Organization on Disability (N.O.D.) and a new coalition of more than 30 of the nation's leading private disability groups.

Two intensive and complementary campaigns are being conducted simultaneously on a non-partisan basis; Disabled citizens at the polls and disabled but able to vote.

A major thrust of the Disabled Citizens at the Polls campaign is to assist, educate and train the country's 13,000 election officials and one million poll workers on how to improve the accessibility of polling places and how to make voting easier for disabled citizens.

The simultaneous Disabled But Able to Vote campaign is seeking to increase the registration of disabled voters nationwide.

THE KEY FACTORS

An estimated 35 million Americans have physical or mental disabilities—America's largest minority—and an estimated 20 million of them are eligible disabled voters. According to authorities in the field, most of the eligible disabled voters do not exercise their franchise because of the absence of ramps at voting places, the absence of ballots in braille, lack of interpreters for the deaf, voting machines that are difficult to manipulate, doors too narrow for wheelchairs, signs in small print that are difficult to see and read. As a result, experts suggest, disabled people in many jurisdictions have been discouraged from registering and voting.

"We've been made unwelcome," says Justin Dart, Jr., a member of the National Council on the Handicapped and a wheelchair user.

There are 188,600 polling places in the United States. Many of them, experts report, are not accessible.

NEW FEDERAL LAW

In a speech prepared for delivery in July to a meeting of 500 election officials from across the nation, N.O.D. president Alan A. Reich cited a new federal law as the background for N.O.D.'s Disabled Citizens at the Polls campaign. "Recognizing that America's largest minority, 35 million of us, must be included in the election process, the U.S. Congress passed the Voting Accessibility for the Elderly and Handicapped Act," Reich said.

The new federal law became effective December 31, 1985. Its stated purpose is "to promote the fundamental right to vote by improving access for handicapped and elderly individuals to registration facilities and polling places for federal elections." The law obligates election officials at all levels of government to provide special services for disabled persons. It also requires that the accessibility status of all polling places be reported to the Federal Elections Commission (FEC) by the end of 1986 and that the FEC advise Congress of non-accessible and accessible voting places early next year.

REGISTERING DISABLED VOTERS

The drive to increase registration of disabled voters is being jointly conducted by a Democrat and a Republican: Dr. Philip B. Calkins, community organizer and disability rights coordinator for the Democratic National Committee, and Justin Dart, Jr., disability rights advocate and a Republican who chaired a steering committee for President Reagan's 1984 campaign.

"This is the most extensive coordinated effort ever undertaken to give disabled citizens a voice at the polls," Calkins says. "Without the franchise, you get the business," he adds.

A wheelchair user, Calkins is organizing the campaign from the N.O.D. offices in Washington.

N.O.D. and four other private disability organizations recently joined together as the founding sponsors of the new coalition called Disabled But Able to Vote. The other sponsors of the campaign to increase registration of disabled voters are the Disability Rights Center, Disability Rights Education and Defense Fund, National Parent CHAIN, and Paralyzed Veterans of America. More than 30 other leading disability organizations are participating in the coalition. They include the National Easter Seal Society, United Cerebral Palsy, American Council of the Blind, American Foundation for the Blind, National Association of the Deaf, and the President Committee on Employment of the Handicapped.

OBJECTIVES OF THE CAMPAIGNS

Together, Disabled Citizens at the Polls and Disabled But Able to Vote have interlocking, complementary objectives: To inform disabled citizens of their rights and special services they should expect from the system and urge them to register and vote; To assist election officials and poll workers in expanding the participation of disabled persons in the election process and ensuring equal access; To organize local registration drives in as many states as possible.

HELPFUL TOOLS FOR ELECTION OFFICIALS, POLL WORKERS

To assist election officials and the training of poll workers, N.O.D. has produced a 28-page illustrated manual entitled "Disabled Citizens at the Polls: A Guide for Election Officials." It covers the concerns of disabled persons, the new federal law, the special considerations needed for voting by disabled and elderly citizens, and offers practical suggestions for cost-effective temporary or permanent changes to make polling places accessible, as well as suggestions for assisting disabled citizens at polling places.

"Because there is no financial assistance provided under the new legislation (the Voting accessibility for the Elderly and Handicapped Act), the burden falls squarely on state and local election officials to develop and implement accessibility programs," said N.O.D. president Reich. "So we have produced an illustrated manual to help them," he added.

Copies of the manual are being furnished free of charge to election officials and to the Secretary of State in all states. The manual also has been sent to N.O.D.'s state liaisons, and N.O.D.'s Community Partners can receive limited copies upon request.

Georgia's Secretary of State, Max Cleland, is the Advisory Committee Chairman of the Disabled Citizens at the Polls campaign. Cleland is a triple amputee veteran of the Vietnam war and former director of the U.S. Veterans Administration during the presidency of Jimmy Carter. N.O.D. president Riech is a former senior State Department official during the presidency of Gerald Ford.

In a personal message to the nation's election officials at the start of the manual, Cleland and Reich say: "For most of the estimated 20 million eligible disabled voters, participation in the election process remains an unfulfilled dream."

N.O.D., EASTER SEAL SOCIETY AND AMWAY COLLABORATE

Another tool to assist election officials and guide poll workers has just been jointly produced by N.O.D. and the National Easter Seal Society. It is a small, two-sided flyer, a disabled voter information card. A companion piece to the training manual, the card contains eight suggestions concerning common courtesies at polling places and eleven suggestions for cost-effective temporary adaptations to make voting places more accessible and usable. Through the Cooperation of AMWAY Corporation, one million copies of the card have been printed and copies are being provided free-of-charge to disability organizations and to election officials for the training of poll workers.

STATE MEETINGS TO STIMULATE REGISTRATION

The Disabled But Able to Vote campaign is concentrating on state level meetings where registration drives are planned and organized on a non-partisan basis. Meetings are attended by disabled voters, disability leaders and election officials. The first meeting to organize the registration of disabled voters took place in May in Wilmington, DE. Since then, Dr. Calkins has led meetings in New York, North and South Carolina, Illinois, Pennsylvania, Massachusetts, Rhode Island, New Hampshire, Vermont, Wisconsin, Missouri, Kansas, Kentucky, Ohio, Iowa, and South Dakota. Registration drives in shopping malls are developing in several places, and more state level meetings are planned for 1986.

N.O.D.'s Community Partners are closely linked to the local registration campaigns. They are alerting disabled voters to the Calkins-Dart meetings in their communities and are assisting in the distribution of promotional materials as well as the distribution of the N.O.D. training manual for election officials and the N.O.D.-Easter Seal Society voter information card.

Last year, in response to a survey of the 1800 towns, cities and counties in the N.O.D. Community Partnership Program network, N.O.D.'s local liaisons gave top priority to participation by disabled persons in the election process.

WORKSHOPS FOR ELECTION OFFICIALS

To further train election officials in improving the accessibility of polling places and in assisting disabled voters at the polls, workshops are planned in a half-dozen cities during 1987 and 1988. Workshops for election officials have been conducted in New Orleans, Atlanta and San Diego.

"Disabled Citizens at the Polls is a three-year undertaking," said N.O.D.'s Alan Reich. "Quite naturally, we are pointing toward the General Elections this Fall as the first important goal and then the Presidential election in 1988. We sincerely hope that our new manual and disabled voter information card and the state meetings to organize registration drives will help election officials, poll workers and America's largest minority in our common efforts to make democracy work for everyone.

"Because America's disabled persons have long been non-participants in the voting process," Reich added, "dramatic changes in their voting patterns should not be expected at first. It will take time. Leadership and commitment will make the difference."

This issue of REPORT carries a separate article entitled "What You Can Do To Expand Democracy in Your Community," listing suggestions for supporting the disabled citizens at the polls and disabled but able to vote campaigns.

QUOTABLE QUOTE ABOUT VOTING

"Most of America's 20 million citizens with disabilities don't vote. Deny us this precious constitutional right and you deny our citizenship".—Alan A. Reich, president, N.O.D.

WHAT YOU CAN DO TO EXPAND DEMOCRACY IN YOUR COMMUNITY

Remember that voter registration is a non-partisan activity that can be conducted by members of any non-profit organization without endangering their tax status.

Here are a few things that N.O.D.'s Community Partners and Liaisons and readers of REPORT can do:

1. Form an advisory committee with representatives of local disability groups and develop a plan for registering disabled voters. You may want to set up a booth at your local shopping mall. Have one or more members of your group deputized as registrar.

2. Contact other disability-related groups (Independent Living Center, local chapter of Easter Seal Society, MS Society, etc.) and ask them if they will work with you in 1986 and beyond.

3. Contact your local chapter of the League of Women Voters. In most communities, they are the best source of information on local election laws. Tell them about your local registration drive, the N.O.D. Disabled Citizens at the Polls campaign and ask their cooperation and advice. Limited quantities of the N.O.D. training manual for election officials and the N.O.D.-Easter Seal Society voting information card as a guide for pollworkers are available to N.O.D. Community Partners and Liaisons.

4. Inform your local media about your registration drive and the nationwide Disabled Citizens at the Polls campaign. In some communities, if you provide the background information, local media will support your drive editorially. Background material for the media is available from N.O.D. If your local television and radio stations have Talk Show or interview programs, inform the producers of your registration drive and Disabled Citizens at the Polls.

5. Get on the agenda of your local civic groups' meetings and inform audiences about your campaign or ask the civic group itself to inform its membership and meetings.

6. Inform your local election officials about the project and offer your assistance in implementing the new federal law correctly—the Voting Accessibility for the Elderly and Handicapped Act, enacted by Congress December 31, 1985.

7. Let N.O.D. know how your efforts are progressing and what we might do to assist you.

EDITORIAL

EMPLOYMENT OPPORTUNITIES FOR DISABLED AMERICANS

Senate Majority Leader Robert Dole (R-KS) and Congressman Steve Bartlett (R-TX) have introduced a very important piece of legislation affecting disabled Americans.

The Dole-Bartlett bill is entitled the "Employment Opportunities for Disabled Americans Act." Its purpose is to help remove Federal disincentives to the increased employment of disabled persons.

The bill would make permanent those provisions in the law which currently allow disabled people to work while still retaining Medicaid benefits they are receiving under the SSI program. Medical coverage is a necessary component for employment; it is too often unavailable for disabled persons.

The Dole-Bartlett bill would eliminate barriers to a program known as Section 1619, which is part of the Social Security law. Section 1619 allows disabled persons who are eligible for Supplemental Security Income (SSI) benefits to work while continuing to receive Medicaid benefits. Section 1619 participants may continue to receive Medicaid coverage until their income exceeds a certain amount—it varies by state (in Texas, about $1000 a month). Some participants in Section 1619 may continue to receive Medicaid benefits with higher levels of income when necessary because their medical expenses exceed their state's average.

Of the 1.8 million disabled working age SSI recipients, only 7,210 now participate in Section 1619. Why this low participation? One key factor is that many disabled SSI recipients are either unaware of the 1619 program or fear participating because the program has a termination date. They also may fear loss of reinstatement if they subsequently lose employment. The Dole-Bartlett bill removes those disincentives.

The Section 1619 provision expired in 1983 and remained expired until it was later extended. It is now effective until June 30, 1987. The Dole-Bartlett bill would make the Section 1619 program permanent. And it would also require the Social Security Administration to notify disabled SSI recipients of the program's existence so more people would be aware that they could work without losing Medicaid. Furthermore, the Dole-Bartlett bill woulld provide automatic reinstatement of SSI benefits should a disabled person lose his or her job.

The National Organization on Disability agrees with Senator Dole when he says that "the federal government should be doing everything it can to encourage disabled Americans to lead productive lives." We endorse the Senator's view that the Dole-Bartlett bill "makes good sense economically and socially."

The legislation has two key benefits. It will provide persons with disabilities on SSI with the security they need to accept a job and lead independent lives. And it will provide a cost savings to the federal government as working disabled persons begin paying income taxes to the government rather than collecting SSI benefits from the government.

As Congressman Bartlett has pointed out, "For every person who participates in Section 1619(b) who would otherwise receive a full SSI benefit, the federal government saves a little over $4,000 a year. Thus, for every 10,000 persons who participate in 1619(b), we save $40 million per year."

Major Congressional leaders from both political parties have indicated their support for the Dole-Bartlett bill. We welcome this bipartisan spirit.

The proposed legislation is now before sub-committees, so this is a good time for your voice to be heard in support of this bill. We urge you to let your Senators and Congressmen know that you want to see the Dole-Bartlett bill enacted into law.

JOHN J. COADY NAMED CHAIRMAN OF N.O.D. BOARD, SUCCEEDING RICHARD M. DEVOS

Former Mars, Inc. executive, John J. Coady, has been named new Chairman of the Board of Directors of the National Organization on Disability

He succeeds Richard M. DeVos, president, AMWAY Corporation, who will remain on the Board of N.O.D.

Over more than 30 years, Coady held a number of sales, marketing, administrative and personnel positions at Mars, rising to Group President.

Previously he was chairman of the board and president of Uncle Ben's Rice, Inc. He is presently a Senior Consulting Associate at Food System Associates, Washington, DC.

A World War II Navy submarine veteran, Coady was educated at the University of Minnesota and earned his M.B.A. at Pepperdine University.

Coady, his wife and daughter, who is handicapped, live in McLean, VA.

TOP ADVERTISING EXECUTIVE JOINS BOARD

Newest member of the Board of Directors of the National Organization on Disability is Don Johnston. He is chairman of the board of the J. Walter Thompson Company and chairman and chief executive officer of JWT Group, Inc., founded in 1863. J. Walter Thompson is the nation's oldest advertising agency.

Johnston, 59, has devoted his entire career to J. Walter Thompson. Following graduation from the Michigan State University School of Journalism, he went to work for JWT's Detroit office as a trainee in 1951. A company scholarship to Johns Hopkins University's School of Advanced International Studies led to an M.A. in international economics.

Johnston served J. Walter Thompson in Latin America, Europe, and Japan. He now works in New York and lives in New Canaan, Connecticut.

CHEERS FOR . . .

McDonald's television commercial, "Silent Persuasion," featuring two young people who are deaf and which contains no spoken dialogue—an unprecedented "first." The actors communicate using sign language. The commercial is "open-captioned" for both deaf and hearing audiences.

The Public Broadcasting System's program "Frontline" for its documentary about mentally ill people, "A Matter of the Mind," portraying the mentally ill as human beings rather than as people to be despised.

MATTEL, Inc. for producing a unique new line of dolls designed for children with disabilities, called "Hal's Pals."

PROJECT MATCH, a new employee recruitment project in New York City, designed to link public and private sector employers with disabled college graduates who are seeking employment. Through a consortium of 80 colleges near New York City, PROJECT MATCH now can offer employers access to a centralized database of qualified graduates.

Long Island University (Brooklyn campus) for initiating new fellowship awards at the Master's degree level to enable promising handicapped and minority group students to earn a Master of Public Administration degree or a Master of Arts in Urban Studies. The program was made possible by a grant from the U.S. Department of Education.

IBM, Stroh Brewery, K-Mart, and Prudential for sponsoring closed captioned hours of the ABC-TV broadcast of "Liberty Weekend," the celebration of the Statue of Liberty's Centennial.

Kraft, Inc. for closed captioning of "The Kraft All Star Salute to Ford's Theater," 60-minute special on CBS-TV on June 25. Kraft has captioned selected television specials since 1982 and regularly closed captions its commercials.

Texaco, Inc. for funding the closed captioning of "Bob Hope Birthday Special" on NBC-TV.

The Young Adult Institute of New York, NY for producing a video series about families with members who are mentally retarded or developmentally disabled. "On Our Own" has 26 half-hour shows intended for broadcast by television stations in local areas.

FAREWELL, GOOD LUCK TO OUR JOAN MAYNES

The Coordinator of N.O.D.'s Community Partnership Program and editor of UPDATE, Joan Maynes, has resigned after two and a half years of outstanding service. Joan was married to a British engineer on August 23 and will live in England.

We know that N.O.D.'s Community Partners and liaisons join the staff of N.O.D. in extending our best wishes to Joan. Her ability, friendliness and dedication to improving the lives of disabled persons have left a permanent impact. Her successor is Carol Boyer.

VOTING IDEAS: HOW SOME COMMUNITIES ARE MAKING PROGRESS

N.O.D.'s Community Partners in Buffalo, NY have publicly announced a goal of 10,000 new registered voters in 1986 and have challenged our partners in Cincinnati to top their efforts.

Contact: Tony Serra, Office for the Disabled, 95 Franklin St., Rm. 670, Buffalo, NY 14202, Tel: (716) 846-6215.

In Lansing, Michigan, the Mayor's Handicapped Advisory Committee developed an extensive voter education and accessibility campaign. It included accessibility site reviews, training poll workers, a voter registration drive and special registration efforts for the developmentally-disabled community. A listing of accessible polling sites, upcoming elections, and a special voting information phone number are carried by the local newspapers, Radio Talking Book and captioned news on cable TV.

Contact: Pamala Fowler, Mayor's Office, 9th Floor, City Hall, Lansing, MI 48933, Tel: (517) 483-4141.

The Office of Handicapped Concerns in Oklahoma City designed an accessibility questionnaire to be used in surveying all current polling places. It asks about the accessibility of parking lots, walks, entrances, exits, doors and doorways, and the use of ramps.

Contact: Ernest Simpson, Office of Handicapped Concerns, 4300 North Lincoln Blvd., Suite 200, Oklahoma City, OK 73105, Tel: (405) 521-3756.

The State of Texas has produced a 10-page booklet entitled *"Services Available to Voters with Special Needs."* It includes various methods by which disabled people can vote, the types of assistance available at the polling place and briefly describes the law mandating full accessibility of polling places. The booklet is in English and Spanish.

Contact: Steve Johns, Handicap Services, 1500 Marilla, Suite 7A North, Dallas, TX 75201, Tel: (214) 570-5208.

The N.O.D. Community Partnership Committee of Lake Charles, Louisiana established a Task Force on governmental affairs headed by a member of the League of Women Voters. At pre-election forums, candidates for the state legislature fielded questions on issues of concern to their disabled constituents.

Contact: Beatina O'Carroll, Community Relations Task Force, 715 Ryan St. #200, Lake Charles, LA 70601, Tel: (318) 433-8688.

EDUCATION

The HEATH (Higher Education and the Handicapped) Resource Center in Washington, D.C. has published "Financial Aid and Disabled Students." This fact sheet covers current information for students, parents, counselors and others concerned about how handicapped students can pay for post-secondary education and training.

The fact sheet describes the financial aid system, the process for applying for aid, and the federal financial aid programs. It addresses disability-related expenses and suggests how to include them in a student budget. The roles that both the Vocational Rehabilitation and Social Security systems play in providing financial support and other resources for students with disabilities are covered, as is the necessary cooperation between vocational rehabilitation and campus financial aid offices.

Single copies are free from the HEATH Resource Center, One DuPont Circe, Suite 670, Washington, D.C. 20036-1193, and may be reproduced without prior permission as long as credit is given to HEATH. For information call 800-544-3284.

FUNDRAISING

The 1986-87 edition of the "Handicapped Funding Directory" spotlights a number of new funding sources—such as major corporations and foundations.

The Directory is an important research tool for planners and fund-seekers of programs and services for disabled persons. It contains funding information on more than 700 corporations, foundations, government agencies and associations that fund programs and services for the handicapped. In addition, it contains important guidelines on how to obtain a grant, addresses of state agencies and their directors, and a bibliography of grant-funding publications. Up to date grant information is categorized by disability.

The cost is $25.50 including postage and handling.

Contact: Research Grant Guides, PO Box 10726, Marina del Rey, CA 90295.

RESOURCES

The International Directory of Recreation-oriented Assistive Device Sources" is a 298 page publication filled with recreational devices, useful in sports, games and artistic pursuits. Nicely cross-indexed, it give easy access to ideas drawn from all over the world. Each entry briefly identifies the recreation, disability, problem and activities. It also examines how the device works and lists a source for more information with address and phone number. The price is $29.95 including shipping and handling.

Contact: Lifeboat Press, PO Box 11782, Marina del Rey, CA 90295.

COMMUNITY AWARDS COMPETITION, 1986-87

The fifth annual Community Partnership Awards Program is underway, sponsored by N.O.D. and Westinghouse Electric Corporation. Awards totalling $20,000 will recognize communities for developing local voluntary programs that foster greater participation of disabled citizens in community life. Awards will be presented to 13 communities in the Spring, 1987. Entry materials are being mailed now to N.O.D.'s Community Partners. Candidates will be judged on what has been accomplished in calendar year 1986. The deadline for entering the competition is January 31, 1987.

Prizes will include one top award of $5,000 and two $2,500 awards in the Achievement Category. This means that a community has been working on four different goals. Additionally, there will be ten $1,000 Project Awards, which are given to communities for successfully working on one specific project. A panel of independent judges will select the winners.

Previous CASH award winners are not eligible to compete.

BICENTENNIAL CELEBRATION OF BAYOU LA BATRE

Mr. HEFLIN. Mr. President, I am delighted to rise today to congratulate the citizens of Bayou La Batre, AL, on their bicentennial anniversary. Throughout the month of October 1986, they will join together to celebrate their 200th anniversary. I am certain that it will be a time to remember for many years ahead.

The original settler of the Bayou La Batre community was Joseph Bosarge, a Frenchman who, in 1786, petitioned Stephen Miro, then the Spanish Governor of Louisiana, for a tract of land on the west bank of the bayou. He claimed, in his petition, that he needed "a home to conceal his misery and the poverty of his family from the world." His petition was granted, and he took possession of the property and made improvements. Later, other settlers of French stock joined him. From this humble beginning grew the thriving Bayou La Batre community of today.

Originally, the bayou was called "Riviere D'Erbane"—a name bestowed by Iberville, to commemorate the memory of a Frenchman who was drowned in its mouth. The stream later acquired its present name because the French maintained a battery of artillery on its west bank. They

spoke of the stream as "the bayou of the battery," or in French—"Bayou de la Batre."

The name Bayou La Batre is, therefore, a momento of protective measures provided by the French during their rule in this vicinity. Indeed, a European air has been indelibly instilled into this quaint settlement. Old France is brought to mind not only by the name of Bayou La Batre, but also be many of the old family names. French was the spoken language of the first settlers, and many of the places and streets in the area still have French names. Additionally, Spanish and French influences are seen in the architecture, and in the food. Recipes for gumbo, jumbalaya, and other European recipes are handed down from generation to generation. This influence adds much to the overall atmosphere of Bayou La Batre and of the area. It distinguishes its heritage, and its people.

Since its founding, Bayou La Batre has perhaps been known most for its seafood industry. The bayou and the surrounding gulf waters are rich with all different kinds of delicacies, ranging from oysters, shrimp, and crabs to pompano, redfish, speckled trout, to game fish such as the tarpon and the bluefish. Many people living in Bayou La Batre today are descendants of people who migrated from the Chesapeake Bay country of Maryland in order to work two oyster seasons—the early season in the South and the later season in the North. Since that time, night fishing has been discovered, and the fishing is year round.

In recent years, the total reliance of citizens on fishing has diminished, somewhat, with the discovery of oil and the development of a shipbuilding industry. Additionally, tourism is today an ever-increasing industry. Each year, thousands of tourists from around the State and Nation attend celebrations unique to the area such as "The Blessing of the Fleet." This is a great and unique occasion, indeed, as the Archbishop of Mobile blesses the fishing fleet to ensure a safe and profitable year. The area is also rich with history and beauty. The old live oaks which stand by roadsides and waterside signify the strength of the people of the community. Indian mounds, the sacred burial sites of Indians who once inhabited the area, lie around these oaks. Spanish moss hangs in the trees and seems to signify the mystery of the ages.

The relationship which the citizens of Bayou La Batre have had with the sea and with the gulf coast has been a mixed one. The sea has been Bayou La Batre's primary source of income, food, transportation, and entertainment from the beginning. The earliest travel was done over water, and supplies were brought in from as far away as New Orleans. However, hurricanes have often plagued the citizens of the bayou. These hurricanes have resulted in loss of homes, timber, and personal belongings—not to mention business—and has often frustrated growth and added to a depressed economic state. But, the citizens of Bayou La Batre will never give up. After 200 years of surviving with the sea, of building their homes and businesses, and of raising families, these Alabamians will not be driven away even by the most severe hurricane.

For 200 years, since before the Constitution of the United States was written or the State of Alabama was founded, Bayou La Batre has stood as the home of many great citizens who have made a living with the sea. This bicentennial anniversary is not merely a birthday celebration. Rather, it offers the citizens of Bayou La Batre an opportunity to look into their past and to realize all that they have accomplished. Those successes and rewards which are reaching fruition today were actually initiated some time in the past. The heritage, roots, and history of the citizens of the Bayou should not be forgotten. Keeping one foot firmly entrenched in their present and past, the citizens of Bayou La Batre should step forward to the future.

Now is the time to think of that future. The children of today will be planning for the 250th anniversary of Bayou La Batre in just 50 short years. At that time, the city will have been in existence for a quarter of a thousand years. The dreams of today will grow, take shape and mature between now and then. In the years to come, I am certain that Bayou La Batre will make even greater advances—that it will offer even more to its citizens, its State and its Nation. I am delighted to congratulate the citizens on their bicentennial. And I am very proud to represent each of the citizens of Bayou La Batre.

Thank you, Mr. President.

TRIBUTE TO EUGENE HAMITER GRAVES

Mr. HEFLIN. Mr. President, I am filled with sorrow as I rise today to note the death of Eugene Hamiter Graves, of Eufaula, AL. Mr. Graves, who was better known as Hamp, served the city of Eufaula as mayor for four terms. Throughout his life, he was dedicated to helping the people of Eufaula, and I know that he will be remembered and respected for his great efforts and achievements. I will always remember and respect his memory as a warm close friend.

Hamp Graves was born and raised in Eufaula, where his father also served as mayor. After graduating from the University of Alabama Law School, he worked in Washington, DC, as the administrative assistant to the late Congressman George Andrews. He then settled in Eufaula and established a private law practice.

Perhaps the most memorable qualities of Hamp Graves were his sense of humor, and his informal, easygoing manner. These attributes made him a great favorite with his supporters and opponents alike. I am told that each day he would walk through the streets of Eufaula and stop to talk and joke with each citizen that he saw. This personable, genuine manner distinguished him as the gentleman that he was.

As mayor, Hamp Graves served his constituency with great dedication and loyalty. He provided fair and equal representation to all citizens. Because of his personality, and the diplomatic skills with which he was endowed, he could successfully diffuse any explosive situation until reason prevailed. His death is a great loss to the people of Eufaula and of Alabama. He was a valued and tireless spokesman for their welfare and interests, and a trusted servant who would go to great lengths to perform any task.

I know that many people share the grief of the passing of Hamp Graves. In their sorrow, I hope they will remember the good that Mayor Graves did, and the contributions he made to his city.

Mr. President, I ask that an article which appeared in the Eufaula Tribune be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Eufaula (AL) Tribune, Sept. 4, 1986]

MAYOR HAMP GRAVES LOVED "HIS PEOPLE"

(By Joel P. Smith)

Few politicians are as close to their constituents as was Mayor Hamp Graves. His death caused by a heart attack shocked and saddened Eufaula because the four-term mayor knew and loved so many Eufaulians personally.

The hundreds of people he knew on a first-name basis weren't just constituents—he affectionately called them "my people." And they were.

He was frequently called upon—both as a practicing attorney and as Mayor—to help individuals with their multitude of problems. And he often found a way, but he always took the time to listen. His nickname of Hamp better suited him than Hamiter because he was such a friendly, informal, likeable person.

He was a familiar figure along Broad Street. It often took him 30 minutes or longer to walk from his law offices next door to Eufaula Bank & Trust to the Post Office, which are in the same block. He loved people, especially his people. He took the time to stop and talk.

It bothered some more business-like citizens that he often found great flexibility in city regulations. While Eufaula city fathers had enacted an ordinance years ago regulating signs downtown, as mayor he often made exceptions and accommodated a mer-

chant. Everybody was his friend—even his political opponents.

He indeed came to the aid of people who needed help. The poor, the uneducated had a friend in Hamp Graves. They supported him, and they didn't hesitate to call when they needed help.

"Hamp was an individualistic man," the Rev. Bill Willis said at his funeral Sunday. "He brooked little sympathy for sham and pretense. Wherever you saw him he was just Hamp Graves. His philosophy might have been: if a man does not keep pace with his companions, perhaps it is because he marches to a different drummer. Let him step to the music which he hears, however measured or far away."

He was perfectly content practicing law and serving as mayor in his beloved hometown, after graduating from the University of Alabama and serving as administrative assistant to the late Congressman George Andrews in Washington.

Though the son of a mayor, E.H. Graves Sr., and a member of an old, established Eufaula family, he was a progressive in politics, not a conservative. Perhaps his black constituents didn't really feel they had to have a member of their race sit on the city council because they knew they had the mayor's attention.

Rich or poor he knew and appreciated them all. No doubt, his attitude was significant in dispelling racial tension during trying times. He was truly the people's mayor.

Hamp was also one of Eufaula's delightful characters. His tremendous sense of humor served him and the town well. He was good company, and he was an excellent public speaker. As a ceremonial mayor, he was without peer, save perhaps George Little.

His secretary and patient, devoted wife, Gracelyn, is well named. She also served Eufaula, as the mayor's wife, with grace and charm. She shared his interest and concern for our town.

And children loved the mayor. He took the time to learn our town's children's names. He appreciated—and enjoyed—them as individuals.

Eugene Hamiter Graves Jr. loved Eufaula. And Eufaula loved Hamp.

A CENTURION CELEBRATION—TROY STATE UNIVERSITY, 1887-1987

Mr. HEFLIN. Mr. President, I am very pleased to rise today to congratulate the students, faculty members and alumni of Troy State University on their centennial anniversary. During the last 100 years, Troy State has emerged as a cornerstone of educational progress and activity in Alabama. All who are involved with the university should be proud of its history of achievements and accomplishments.

The roots of Troy State University can be traced back to the beginnings of teacher training in Alabama with the opening of the normal school in Florence in 1873. The 1882 establishment of normal schools at Jacksonville and Livingston gave such a school to each quarter of the State except the southeast. Interest among citizens and town leaders in locating a State normal school in Troy grew, until on November 15, 1886, the House Representative from Pick County, S.J. McLeod, wrote and introduced a bill in the State legislature calling for its creation. The bill passed the House on February 18, 1887, the Senate on February 25, and was signed into law by Gov. Thomas Jefferson Seay on February 28, 1887.

The bill required the city of Troy to provide a suitable home for the school. On May 26 of that same year, a contract was let to Mr. M.M. Tye, an Ozark contractor and builder, to build a two-story, eight-classroom brick building in downtown Troy which would house the Troy Normal School. The cornerstone was set on August 24, 1887. Joseph M. Dill, who had served as principal of the Troy Male High School since 1885, was one of the prime movers in gaining the school for Troy, and was appointed president of the new school.

Thus, the first of many distinguished chapters in the history of the school was written. When Troy Normal School opened its doors on September 19, 1887, the faculty consisted of Dill and 11 others. According to Dill's records, a total of 80 normal school students were enrolled the first year. The new building to house the school was completed around the first of February, 1888, and Troy Normal School was complete. The school saw three graduates that first year.

In June of 1888, the board of directors of the new school announced the hiring of a new president, Edwin R. Aldridge. Aldridge worked to expand the school, and in 1893 the State legislature amended the charter of the Troy Normal School, changing its name to the Troy Normal College and authorizing it to grant degrees. However, some of the faculty charged that Aldridge was undertaking more than school facilities could handle, and that the quality of education was suffering. In 1899, the board of directors voted to replace Aldridge with Edward Shackleford, who had served as professor of English and science since the school's founding. Shackleford served as college president for 38 years.

During his term, the school grew to a point where new facilities became necessary. On July 31, 1922, a deal was closed which allowed for the purchase of a site of about 300 acres in the southeastern section of Troy upon which to build a new campus. The first building erected on the new campus was Kilby Hall, which served as a lab school where Normal College students could practice teach. The school began using Kilby Hall in 1924, busing its teachers and students from the downtown site to the new campus. Finally, on September 15, 1930, with completion of Bibb Graves Hall, the administration and classroom building, and Shackleford Hall, a girl's dormitory, the newly named Troy State Teachers College moved to its new campus. After a long, distinguished career, Shackleford retired on the school's 50th anniversary in 1937. By that time, the faculty had grown to 40, and total enrollment for the year approached 2,000 students.

Charles B. Smith took over the president's office in November of 1937. It was Smith's stay in office, which lasted until 1961, that saw much of the physical growth of the university facilities. The curriculum offered by the college also expanded greatly under Smith's guidance. In 1937, major programs in history and english were offered. Beginning with the 1947-48 school year. Troy State Teachers College began offering a specialized degree in business education. By 1961, the program had grown into a department of the school offering a degree in business. A medical technology program was introduced in 1959, in cooperation with St. Margaret's Hospital in Montgomery, where the nursing students could intern. A year later, the administration launched major programs in mathematics and science.

Another major step in the development of the curriculum during Smith's tenure was the addition of the master's program in the education department. Smith retired in 1961, to be replaced by Frank P. Stewart, who held the office of president until his death in March of 1964.

On August 3, 1964, the State Board of Education appointed Ralph W. Adams as the new president of Troy State College. Adams, whose title is now chancellor, has seen Troy State grow into a liberal arts institution offering a wide range of programs. The University was completely reorganized in 1971, taking its current form then. The university now consists of several distinct divisions each administered by a dean. It offers specialization under the Sorrell College of Business and Commerce, the College of Arts and Sciences, the School of Education, the School of Nursing, the Hall School of Journalism, and the College of Fine Arts.

Under the outstanding leadership of Chancellor Adams and a fine board of trustees, Troy State University has dedicated itself to the improvement of education, knowledge, and the appreciation of life among all people. By providing an environment conducive to excellence in education, and encouraging students to learn by their own initiative in addition to learning under the tutelage of instructors, TSU is developing not only college graduates, but responsible citizens and leaders who will usher Alabama into the future. The contributions of each of the citizens of Troy cannot be overlooked, for it is through their extended, consistent support that Troy

State has developed in the manner that it has.

Mr. President, one of the few constants in our ever changing society is the value of an education. Education is the key to employment, and to economic progress. It is the key to the preservation of individual liberties. It is the key to understanding the vast world around us, and to the appreciation of all which is encompassed by that world.

I am, indeed, proud to congratulate Troy State University for all that it has done in the last 100 years. The lives of its many students have been improved and enriched by the instruction and attention which they have received from their many outstanding professors. I am certain that in the next 100 years Troy State University will continue to expand, and that its instruction will continue to benefit citizens throughout Alabama and throughout America.

NOT-FOR-PROFIT COMPETITION WITH SMALL BUSINESS

Mr. WEICKER. Mr. President, at the recently concluded White House Conference on Small Business, over 1,800 delegates representing small businesses from every jurisdiction in the United States assembled to review the over 350 recommendations submitted for their consideration from the various State delegations and to forward the top 60 to the Congress and the President for consideration and action. And of all the recommendations upon which small business in America by an overwhelming majority could agree, only two were considered more significant than the proposal to prohibit unfair competition from nonprofit tax-exempt organizations which use their tax-exempt status in direct competition with forprofit companies. The conferees urged that tax-exempt entities should not be permitted to use their tax status or postal rates to compete with commercial providers of products and services.

I believe that this is a noteworthy suggestion and one which I, as chairman of the Small Business Committee intend to pursue through hearings and investigations during the next Congress. Our Government should not be in the business of subsidizing companies which under cover of their not-for-profit status exploit this advantage to the detriment of forprofit concerns unaided by any government largess. We must ask ourselves whether organizations that, as a regular feature of their activities, engage in commercial enterprise in direct competition with forprofit companies should be granted tax-exempt status. Where is the rationale in taxing one company which engages in a commercial activity for a profit while exempting the earnings of another company engaged in the exact same commercial activity because it has been awarded 501(c)(3) status. Not only do we deprive the Treasury of earnings which under the logic of our Tax Code it deserves, but we do a disservice to the forprofit companies by giving their competitors an unfair advantage. And I think that even a casual review of our Tax Code and other laws will provide glaring examples of this type of practice. I am heartened that even the chairman of the Ways and Means Committee intends to study the inequities of the current situation and noted in a recent announcement that "in recent years, exempt organizations have become more aggressive in undertaking commercial or entrepreneurial activities. Forprofit businesses have complained that tax-exempt organizations are provided an unfair competitive advantage under present tax law." He has asked for a comprehensive review of the income-producing activities of tax-exempt organizations and I welcome that announcement.

As an example of the type of unfair treatment that has become commonplace, I note that buried in the Tax Reform Act of 1986 is an onerous provision which found its way into the bill at the conference table despite the fact that it had not been included in either the House or Senate versions of H.R. 3838. Section 1605(c) of the bill is a transition request, in essence special interest legislation, which benefits research corporation, a 501(c)(3) organization, which engages in technology transfer, the selling or marketing of technological discoveries and developments to the private markets. As such it is in direct competition with a small, forprofit business in my home State of Connecticut. Section 1605(c) would permit research corporation to fund a new technology transfer organization by transferring a substantial portion of its assets to that entity in exchange for debt, without the imposition of private foundation penalty excise taxes that would otherwise apply. Such a transaction would generally be taxed as either an act of self-dealing, as an excess business holding, as an investment which jeopardizes charitable purpose, or as a taxable expenditure, depending on the precise nature of the proposed transfer. It also might constitute a termination of private foundation status requiring the payback of past tax benefits from exempt status.

The private foundation excise taxes were adopted by Congress in 1969 to curb abuses by private foundations and were intended to subject a private foundation such as research corporation to either the termination tax or other penalty taxes if it transferred its assets out of charitable solution. There is no information in the public record that would warrant a relaxation of the rules to make a special exception for research corporation.

Mr. President, this is the type of provision which does a disservice to our Tax Code. It is special interest legislation which harms a private, forprofit small business. Instead of hampering small business which is the lifeblood of the economy and the primary source of new jobs in the United States, we should be assuring small business a level playing field. I intend to investigate the pervasiveness of this type of Government intrusion on small business early in the next Congress.

RETIREMENT OF SENATOR RUSSELL LONG

Mr. MITCHELL. Mr. President, I have had the rare and educational privilege of serving on the Senate Finance Committee for almost 6 years with the distinguished senior Senator from Louisiana, Senator RUSSELL LONG.

It was with real regret that I heard him announce his retirement at the end of this Congress. Senator LONG's retirement is more than the retirement of an individual Senator. In a very real way, it is the end of a historic American political odyssey.

Senator LONG's role in shaping our Nation's tax policy over the years is too well known to require lengthy discussion. His work in two other areas is less widely recognized, but, to me, symbolizes much of what Senator LONG has stood for in his Senate career.

The interest Senator LONG has devoted to the concept of employer stock ownership plans is squarely in the finest tradition of American populism. It is the means by which working people can earn a real piece of the American pie. And it is due to Senator LONG that they have been able to do so. ESOP's today do not play as large and significant a role in our economy as do other forms of workers investment, such as pension programs, but I believe Senator LONG's predictions of their future role will be proven correct.

Today the economic plight of divorced and single mothers of small children is well known. The statistics that inform us of the feminization of poverty are well documented. The fact that as many as half of all American children will spend part of their growing years in a one-parent household is accepted fact—as is the deprivation that the majority of those children will experience.

When Senator LONG first set out to make people recognize that children all have two parents, both of whom have a financial as well as moral responsibility toward their children, it was not a popular position. Indeed,

many thought it reflected a punitive outlook and that financial support for children would be an unfair and onerous burden to place on absent parents.

What few people saw then was that regardless of the difficulties facing parents, the hardships and unfairness facing their children were infinitely more serious and more damaging to the children. Senator LONG set out to correct that. And with the enactment and subsequent operation of laws that require and enforce the payment of child support by absent parents, he has helped children all around the Nation be better clothed, better housed, and better fed. Few legislative efforts have as happy an outcome. Senator LONG deserves the thanks of every single parent for taking the time and the trouble to pursue this issue when few others would. And he has earned the gratitude of countless children whose growing years are bettered because of his efforts.

It has been a privilege to work with Senator LONG. His influence and presence will be sorely missed.

RETIREMENT OF SENATOR THOMAS F. EAGLETON

Mr. MITCHELL. Mr. President, with the retirement of Senator TOM EAGLETON this year, the Senate loses more than a single Member: It loses part of its history.

It was Senator EAGLETON's pathbreaking effort in the early 1970's which finally led the Congress to cut off the funds which fueled the widening of the war in Southeast Asia.

And it was his early and determined effort to reinvigorate the constitutional demand that, in our Nation, only the Congress may commit Americans to war, which led to the enactment of the War Powers Act of 1973.

During his service on the Senate Committee on Environment and Public Works, he was instrumental in forging and enacting the fundamental environmental laws in our Nation—the Clean Water Act and the Clean Air Act. His commitment to them has never wavered.

His faith in the ultimate success of enlightened and effective governmental action has been a constant factor in his career. And his work has seen that faith vindicated.

From his appointment to the chairmanship of the Committee on the District of Columbia, he worked for and saw enactment of the home rule statute which gave the citizens of the Nation's Capital their first real chance at self-government in over a century.

In his tireless efforts on behalf of the beleaguered Chrysler Corp., in the mid-1970's, he saved 300,000 jobs for Americans and helped ensure the survival of one of our Nation's major corporations.

In developing the inspector generals legislation, long before others considered Government waste and fraud an issue, he demonstrated that grasp of the fundamentals of the Senate role as a legislative body which epitomizes the Senate at its best.

And throughout his long career in public service, a career which began with his election in 1956 at the unprecedently young age of 27 to become the chief prosecutor for the city of St. Louis, TOM EAGLETON has shown a degree of dedication to the public interest which has been reciprocated in the strong victories that have returned him to the Senate.

There is no doubt that if he had not chosen to retire from the Senate, the people of Missouri would once again have returned him to the Senate by a wide margin, and his colleagues, among whom I am proud to number myself, would have warmly welcomed his return.

His decision to retire will mean he can share the accumulated wisdom of his years in public life through teaching, as he intends. His departure will impoverish this body, but he will enrich the lives of those fortunate enough to have a chance to learn from him.

THE HONORABLE BARRY GOLDWATER'S RETIREMENT

Mr. BINGAMAN. Mr. President, as we move toward adjournment, I would like to take a few minutes to honor BARRY GOLDWATER, my chairman on the Armed Services Committee, who will complete 30 years of service in the Senate this year. His contributions to the Armed Services Committee, to this body, and to our country are innumerable and I will not attempt to recount them here. I will, however, comment briefly on his contributions to my own education in the Senate over the past 4 years.

Perhaps the most refreshing thing about BARRY GOLDWATER is his willingness to call a spade a spade without any embellishment or circumlocution. At one of the first hearings I attended on the Armed Services Committee in 1983, I recall BARRY telling a Navy witness that he could build A-6E attack planes "in his garage" at the same rate the Navy was proposing to build them, six a year. Even back then when defense budgets were still growing rapidly, he was bluntly warning that we could not afford the inefficiency of having so many Navy aircraft production lines operating at low rates. On that issue, as on many others, time is proving BARRY right.

But whether right or wrong on specific issues, BARRY has been right for the Senate. Every once in a while, one encounters the term "whale" when it's used to describe certain Members of the Senate. It is a term of affection and respect. It describes those people of character, legislative skill, leadership ability and personal vision who have made a difference to this place and to the country over a long period of service. I suggest, Mr. President, that if anyone from the Arizona desert can be compared to the magnificent water dwelling mammal, it is Senator BARRY GOLDWATER. I am proud to know him.

SENATOR GARY HART

Mr. BINGAMAN. Mr. President, for the last 12 years the Senate has benefitted greatly from the skill and vision of GARY HART. At the close of this session, Senator HART will leave this body to apply that skill and vision to other pursuits. His efforts to bring together the "world of ideas and the world of practice" will continue in another arena, and we will all be the richer for them.

Any time a close friend and neighbor moves on, Mr. President, we all feel the loss. We miss the frequent contact and the regular communication such a relationship holds. We expect to hear a great deal from and about GARY HART in the next few years. While he will certainly be visible and vocal elsewhere, we will miss him in the Senate. I will miss his very substantial and thoughtful contributions to the work in this Chamber and wish him well as he concludes this period of distinguished service in his career.

SENATOR PAUL LAXALT

Mr. BINGAMAN. Mr. President, PAUL LAXALT is retiring from the Senate at the close of this Congress. His home State of Nevada, the Senate and the country have all been well-served by him. His genial, intelligent presence in this Chamber will be missed by all of us who have had the pleasure of serving with him.

The respect he has earned on both sides of the aisle is a credit to his personal reputation as a man of his word and his political reputation as an articulate spokesman for the principles of his party.

SENATOR THOMAS F. EAGLETON

Mr. BINGAMAN. Mr. President, I take this opportunity to join my colleagues in recognizing the contributions of the senior Senator from Missouri, TOM EAGLETON. Before I was even elected to the Senate, I was welcomed here by TOM EAGLETON. He was a source of great encouragement during my campaign and, after the election, provided me with a place to hang my hat and make my phone calls during the transition. We became good friends.

We all know people, Mr. President, who contribute simply by being. I

think TOM EAGLETON is one of those people. His public accomplishments are legion and his political career is a distinguished and enviable one. But it is the man himself and his example of personal courage, deep conviction and sense of values that I so admire. He is a man who listens closely and speaks well. When he does speak, he is heard.

Even though Senator Eagleton is retiring and taking that voice of reason and strength out of this Chamber, I suspect that all of us who know him will be able to hear it whenever we come up against thre great issues, the votes that make a difference, the questions of conscience. With all my colleagues, I wish him Godspeed as he proceeds to a new phase of his honored career.

SENATOR RUSSELL LONG

Mr. BINGAMAN. Mr. President, in the last few weeks we have heard a great deal about tax reform. I am sure we will hear even more in the weeks to come but at this time, I have a comment to make on the tax bill and it has to do with RUSSELL LONG. Much has been said in recent days about the importance of Senator LONG's contribution not only to the bill but to the process by which it was achieved. The fact of the matter is that RUSSELL LONG has forgotten more about tax legislation than most of us will ever know. His firm and steady hand has been present in guiding the development of our tax laws for more than a generation. It will be missed.

Mr. President, Senator LONG's knowledge and skill are legendary. So are his good cheer, keen mind and nimble use of language. His interest, his courtesy and his kindness when I first arrived in the Senate made a great impression on me. I admit that I was a little overwhelmed when I realized that this senatorial hospitality was given by a man who had entered the Senate in the class with Lyndon Johnson, Estes Kefauver, Hubert Humphrey, and New Mexico's Clinton Anderson. Like them, Senator LONG has achieved remarkable prominence because of remarkable service. It will always bring me pleasure to say that I, too, served in the Senate with RUSSELL LONG, a true touchstone to the history of the Senate and to the development of our Nation.

SENATOR CHARLES McC. MATHIAS

Mr. BINGAMAN. Mr. President, I rise to offer a few words on the occasion of the retirement from the Senate of our friend and colleague, MAC MATHIAS. Because of the recent impeachment proceedings, I had an opportunity to work more closely with him than at any other time since I have been in the Senate. I am grateful to have had the experience, Mr. President, to see this man of fairness and compassion at close range.

Mr. President, Otto von Bismarck is reported to have remarked, "Politics ruins character." Mr. President, Bismarck never considered the possibility of a man like MAC MATHIAS being a politician and giving the lie to that opinion.

As he departs from the Senate at the close of this session, Senator MATHIAS leaves a legacy of integrity and a standard of principle to be admired and emulated. Not given to the whims of fashion, his sense of what is right and his deliberate nature create a formidable character which works its way in a dignified manner. His devotion to the people of Maryland and the land on which they live has guided his actions and earned him their respect, affection and gratitude. They will miss his leadership and so will the Senate.

CLOTURE VOTE ON THE ANTI-DRUG BILL

Mr. LAUTENBERG. Mr. President, I am going to vote for cloture on the Anti-Drug Abuse Act of 1986, despite my strong opposition to the death penalty provision of the bill.

This has been a very difficult decision for me. I oppose the death penalty. But, I am concerned that if cloture is not invoked, the drug bill could be lost for this year. A great deal is at stake in this bill. Our children, our cities, our elderly citizens are daily exposed to crime because of the drug menace in our country. I hear from the mayors in many of the cities in my State of New Jersey about the need for action on the drug problem. In Paterson, Jersey City, Newark, Camden, and other cities, they cannot wait another year, and should not have to, for help. This bill is a commitment to them to provide assistance. I have to weigh this desparate need against my own views on the dealth penalty.

Drugs are a scourage in our society. They are ruining the lives of too many of our young people. Drugs distort people's values, sap their energies, and steal their futures. The ready availability of drugs in the schools and on the streets of our cities is a shocking disgrace. We should not adjourn for the year without addressing this issue—now the No. 1 concern of the American public.

To fight this scourge, we need to make the costs of drug dealing unacceptable to those who exploit our young in a cyncial attempt to profit. Drugs cannot be tolerated. Those who would sell them illegally must be stopped. And those who turn to them, either out of unhappiness or from other causes, must be treated. Our young people, at a very early age, must be taught to say no to drugs. The legislation before us gives us the tools to make this fight.

The battle against the tragedy of drugs must be fought on many fronts—no one program, no one proposal will win this war. Every reasonable weapon must be brought into this fight. The bill we are considering today recognizes the multifaceted nature of the drug problem. It is not a perfect bill. But, with the exception of the death penalty provision, I support this bill and believe that it is time to move forward with it. For this reason, I will vote to invoke cloture.

However, Mr. President, I want to make clear my position on the death penalty. I have opposed capital punishment in the past and continue to do so. I hope that the Senate will have an opportunity for a vote, yes or no, on whether to include the death penalty in this bill. Given this chance, I will vote "no" on the death penalty.

The issue raised by the death penalty is whether it is an effective, acceptable form of punishment for use in our society, consistent with our moral and religious values. There are many crimes that our society finds especially abhorrent. Certainly murders associated with illegal drugs fall into that category. A natural reaction to such crimes is outrage and a desire for the strongest possible punishment as an expression of that outrage. The imposition of the death penalty responds to the need to express that view.

But the killing of another person is an awesome act, with no recourse. One violent act cannot wipe out another. Our criminal justice system is fair, but it does make mistakes. People are wrongly convicted. When a mistake is made in a capital punishment case, there is no way to rectify the error. And, Mr. President, it is not clear that the death penalty is an effective deterrent. The fear of a death sentence does not appear to dissuade the people who commit the vicious, dastardly crimes that would be the target of the death penalty.

Swift and certain punishment is the best way for a civilized society to maintain order and to perpetuate its values. The increased penalties for drug-related crimes responds to this dicta. In fact, for certain drug-related murders, I think life imprisonment is in order.

So, Mr. President, I hope that the death penalty will be eliminated from this bill. This legislation reflects a strong commitment by Congress to combat the scourge of drug abuse. For that reason I will vote to allow its consideration.

CAPITAL PUNISHMENT

Mr. WEICKER. Mr. President, I rise in opposition to the amendment which would establish procedures for the im-

position of capital punishment. In ignorance, disregard, or defiance of the authority of the Supreme Court to interpret the Constitution we are considering legislation which violate in varying degrees our proper role as the legislative branch. In our haste to demonstrate to the American people that the U.S. Senate means to do something about drug abuse, we will be setting precedents we will deeply regret in the future. I dearly hope, Mr. President, that the Senate today will summon its courage and wisdom and say, "enough."

In a body sworn to uphold the Constitution of the United States, it should not have to be argued that a question of constitutionality should be decided in the courts. A majority of the Supreme Court has ruled that capital punishment in certain carefully prescribed circumstances is not cruel and unusual punishment and, therefore, is not prohibited by the eighth amendment. In my view, Mr. President, the only situation in which I could support establishing a death penalty is the narrow circumstances of the murder of a law enforcement officer. Those special individuals who we have singled out to protect us deserve that protection. However, recognizing that "the penalty of death is qualitatively different from a sentence of imprisonment, however long," the Supreme Court insists:

> That a State . . . has a constitutional responsibility to tailor and apply this law in a manner that avoids the arbitrary and capricious infliction of the death penalty. (Woodson v. North.)

No less of an obligation rests on the Federal Government. This amendment carelessly ignores many of the guidelines the Court has established to prevent "arbitrary and capricious" executions on the State level.

In Godfrey against Georgia, the Supreme Court wrote:

> In Furman v. Georgia, the court held that the penalty of death may not be imposed under sentencing procedures that creates a substantial rish that the punishment will be afflicted in an arbitrary and capricious manner. Gregg v. Georgia reaffirmed this holding: "Where discretion is afforded a sentencing body on a matter so grave as the determination of whether a human life should be taken or spared, that discretion must be suitably directed and limited so as to minimize the risk of wholly arbitrary and capricious action." A capital punishment scheme must (the Court writes) provide a "meaningful basis for distinguishing the few cases in which (the penalty) is imposed from the many cases in which it is not."

The amendment provides that after a conviction for an offense for which a penalty of death is authorized, the court will hold a separate hearing on whether to impose the death penalty. At this hearing the jury or judge would make a determination as to the existence of statutory aggravating and mitigating factors as a basis for proceeding to an ultimate determination for capital punishment. The five mitigating factors are enumerated in the bill.

The aggravating factors are also enumerated in the bill.

The procedures included in this legislation for considering and weighing both mitigating and aggravating factors may on the surface sound as if the amendment "minimizes the risk of wholly arbitrary and capricious action." However, a closer reading of the language reveals that it does not. For example, one of the aggravating factors to be considered by the sentencer is that the offense was committed in an especially heinous, cruel or depraved manner. In fact a death sentence which was imposed on the basis of language similar to the language of this amendment was overturned by the Supreme Court in Godfrey v. Georgia because it provided virtually no guidance to the sentencer.

Mr. President, where is the safeguard against arbitrary and capricious action if the legislation fails to provide adequate guidance in distinguishing those offenses which are punishable by death from those which are not. The Supreme Court has ruled consistently that a fundamental prerequisite of any capital punishment scheme is that it provide guidance to the sentencer in deciding on a rational basis who should live and who should die. To require the sentencer to find the existence on certain aggravating and mitigating factors which are themselves so broad and vague that is provides no guidance is clearly unconstitutional.

And what of the provisions included in this bill, Mr. President, of requiring the sentencer to consider only those mitigating factors which it finds to exist by a preponderance of the evidence. In Eddings against Oklahoma, the Supreme Court made it clear that the Constitution not only requires that the defendant be permitted to offer any evidence in mitigation, but that the sentencer consider that evidence. As the Court held in Eddings, although the sentencer may determine what weight to give certain evidence of mitigating factors, it is not free to refuse to consider such evidence altogether.

Mr. President, this legislation raises other constitutional questions about the bases for appeal and to whom an appeal is made. There is no requirement that the independent courts of appeal review the cases presented before them to determine whether the imposition of the death penalty is in proportion to other sentences in similar circumstances. In Coker, the Court stated that an appellate court must look at the death penalty sentence to determine whether it is out of proportion to the severity of the crime.

The constitutional question raised in this legislation should be enough to make us pause and reflect on the dangerous flaws we may be about to enact into law and include in the legislative history of this matter. The statistics, which reveal that the institution of a death penalty will not deter violent crime in the future, should lead us to honestly question what this amendment is all about.

Mr. President, the fact that the Supreme Court has ruled that capital punishment is permissible does settle a significant constitutional question for now. And that ruling gives to us as Members of the Congress and others as members of State legislatures a solemn responsibility to craft statutes within this narrow constitutional framework. Mr. President, this legislation falls short of the mark.

And so, Mr. President, instead of responding to the Supreme Court, instead of navigating the shoals of the Constitution in the matter of capital punishment, this legislation at this period of election-year passion, is a broad bay through which can pass the most imprecise, the most undefined and the most ill-equipped.

Anyone who has listened to this debate over the last several years has been confronted by the Senator from Michigan and others with the reality of the fallibility of our criminal justice system. Mistakes have been made, are being made, and will continue to be made in the process of convicting citizens of capital crimes. I believe the case has clearly been made that such mistakes are not isolated incidences but a systematic reality. Police, prosecutors, witnesses, juries, and judges are human beings and will err. Out of this recognition grows the presumption of innocence, the right of appeal, and all of the due process protections which elevate our criminal justice system above any on this planet. But that we would entrust the power to end a human life with such a system is the supreme act of human arrogance.

Distinguished British Jurist Sir William Blackstone stated: "It is better that the guilty persons escape than one innocent suffer."

What ratio of innocents executed to murderers freed should we as a nation deem morally acceptable: 1 to 10? 1 to 100? 1 to 1,000? How can we preach the sanctity of life and state that even a single innocent life taken is worth whatever "benefit" society derives for executions?

Finally, Mr. President, capital punishment is not the hallmark of a civilized nation. Government, in the American tradition, has taken on the role of teacher and example to our people. What lesson do we convey by sanctioning Government execution? Our polite, legalistic reasons not withstanding, capital punishment is based on the desire for revenge: One group settling its grievance by harming an-

other. Have we not risen above that ancient and barbaric standard? We have no way of knowing the price we pay for the spreading of this subtle, moral teaching throughout our land.

The final indictment, Mr. President, is the list of nations with whom we are associating ourselves with a policy of capital punishment, the likes of Afghanistan, Iran, Iraq, Syria, Libya, the Soviet Union, and South Africa.

In closing, Mr. President, I would like to read the words of Justice Benjamin N. Cardozo. Cardozo says:

> The death penalty will seem to the next generation, as it seems to many even now, an anachronism too discordant to be suffered, mocking with grim approach all our clamorous professions of the sanctity of life.

If that is to be the case, Mr. President, if the death penalty is to be a memory in 2 or 20 generations of this country, let that memory be of a constitutional system that wasted no effort in guaranteeing the due process of law.

EXPLANATION OF VOTE ON DRUG BILL—CLOTURE MOTION

Mr. DURENBERGER. Mr. President, I rise to indicate that my vote against the motion to restrict debate on this amendment is an expression of my opposition to the death penalty provision which it contains. If the Senate votes to invoke cloture, the American people will be denied the full and careful debate that a change in law of this gravity requires. Such would be a serious miscarriage of the legislative process on the one hand and the rights of individuals in our society on the other.

As I said on this floor previously, Mr. President, I can only give limited support to the drug package before us. In my analysis it remains a law enforcement bill, with only a secondary interest in the urgent public health issues raised by abuse of both drugs and alcohol. If even a fraction of the number of people with a drug or alcohol problem in the United States came forward today for treatment, the existing facilities would be hopelessly overwhelmed. Private health plans rarely cover such rehabilitation services and the Federal Government, as an employer, does a poor job of helping out its employees. Amendments which I offered on this bill during Senate consideration of the drug package make a start in that direction and I thank the bipartisan leadership for including my language in the pending amendment. Reducing the demand for drugs must be our primary concern.

Mr. President, I would view it as a travesty, however, if the Congress, in its rush to judgment and adjournment, included an unprecedented and hastily considered death penalty in this package. I believe in the sanctity of human life. Consistent with that view, I believe Government has the obligation to protect all life, whether it is in a mother's womb or in a Federal penitentiary. The dignity and worth of all life is at the foundation of our democracy and our advocacy for freedom around the world. For us to take even the limited step proposed here calls that basic commitment into doubt and sows the seeds of its destruction.

It is a rare occasion on this floor when our votes hinge on a clear moral question, when we are asked to choose between right and wrong, as our own consciences guide us. This is one. I will cast my vote, and use the 1 hour allotted to me under cloture if it comes to that, to prevent this Congress from making an ill-considered and wholly unnecessary assault on the sanctity of human life.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair recognizes the Senator from Michigan.

Mr. LEVIN. I thank the Chair.

THE RETURN OF PJETER IVEZAJ TO THE UNITED STATES

Mr. LEVIN. Mr. President, I have just been informed that Pjeter Ivezaj of Sterling Heights, MI, has returned to the friendly shores of the United States. My colleagues might recall that last Wednesday, Mr. Ivezaj who is a United States citizen, was sentenced by a court in Yugoslavia to 7 years in prison.

He had been charged with participating in a peaceful protest in the United States and belonging to an organization in the United States which the Yugoslav Government regarded as hostile. In other words, he was convicted in Yugoslavia and sentenced in Yugoslavia for activities that are perfectly legal under the laws of the United States and which occurred in the United States. It was an outrageous sentence, and Mr. Ivezaj's incommunicado detention for the 6 weeks between his arrest and trial was completely contrary to accepted diplomatic custom.

Only after tremendous pressure was exerted in Congress and after our U.S. Ambassador in Yugoslavia, John Scanlan, became personally involved in the case, was Mr Ivezaj freed last Friday. And only a few minutes ago did he actually arrive home. His plane arrived at Kennedy Airport, as I said, just a few moments ago. Mr. Ivezaj's wife, daughter, and mother-in-law will be coming on a later flight from Yugoslavia. We all look forward to celebrating Pjeter's release with his entire family in Sterling Heights one day soon.

But for the moment I simply wish to welcome Pjeter Ivezaj back to the United States.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

The Chair recognizes the majority leader.

Mr. DOLE. Mr. President, at 3 o'clock there will be a cloture vote; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. I understand there has now been unanimous consent request which I will propound that has been cleared on both sides with reference to certain nominations. I would like to propound that request before the cloture vote.

Mr. LONG. Reserving the right to object, would the Senator tell me what is the request?

Mr. DOLE. I am not going to make it until the minority leader is here. It is on the Executive Calendar nominations.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1515

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. DOLE. Let me further ask unanimous consent, Mr. President, that the Senate go into executive session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate Democratic leader has called for order. The Chair agrees. The Senate majority leader will suspend until we get order.

The majority leader is recognized.

UNITED NATIONS

Mr. DOLE. Mr. President, I ask unanimous consent, as in executive session—this will be a long request, I think—that the Foreign Relations

Committee be discharged from further consideration of the nomination of Helen Marie Taylor, to be a representative of the United States to the United Nations General Assembly, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination will be stated.

The legislative clerk read the nomination of Helen Marie Taylor, of Virginia, to be a representative of the United States of America to the 41st session of the General Assembly of the United Nations.

There being no objection, the Senate proceeded to consider the nomination.

The PRESIDING OFFICER. The Chair asks if there is any debate on the nomination.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

NOMINATION OF HELEN MARIE TAYLOR TO BE U.S. REPRESENTATIVE TO THE 41ST SESSION OF THE U.N. GENFRAL ASSEMBLY

Mr. PELL. Mr. President, although I question the nomination of Helen Marie Taylor to be a U.S. Representative to the 41st Session of the U.N. General Assembly, I have chosen not to use procedural devices to block the Senate's consideration of her nomination. I am allowing this nomination to proceed in order to facilitate the Senate's consideration of a number of worthy nominations for other positions.

Mr. President, the administration, since 1982 has been unsuccessfully submitting Mrs. Taylor's name for confirmable positions in the U.S. Government. On each occasion, for various reasons, the Senate Committee considering her monination failed to take action thereby causing her nomination to be returned to the President.

During the Committee on Labor and Human Resources' consideration of her nomination to be a member of the National Council on Humanities, Senator KENNEDY and I submitted a number of questions to her concerning her background and views—all of which she failed to answer. That was a major contributing factor in the committee's failure to act on her nomination.

I have no doubt that Mrs. Taylor may be an excellent actress, political activist, private investor, or architectural and planning consultant. However, I have strong reservations about her nomination. It has not been adequately demonstrated that she has the necessary qualifications to hold this very important post.

Mr. President, I ask unanimous consent that a chronology of Mrs. Taylor's Presidential appointments be printed in the RECORD at this point along with two articles from the Richmond News Leader.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HELEN MARIE TAYLOR—CHRONOLOGY OF PRESIDENTIAL APPOINTMENTS

12/10/82—Member, Board of Directors of Corporation for Public Broadcasting (Commerce Committee).

12/27/82—Returned to President.

1/26/83—Member, Board of Directors of Corporation for Public Broadcasting.

8/8/83—Returned to President.

4/19/84—Member, National Council on the Humanities (Labor Committee).

10/18/84—Returned to President.

7/25/84—Member, National Council on the Humanities.

10/12/84—Returned to President.

1/3/85—Member, National Council on the Humanities returned to President upon August recess.

9/9/85—Same position.

8/12/86—Withdrawn.

9/19/86—U.S. Representative, 41st session, U.N. General Assembly.

[From the Richmond (VA) News Leader, Dec. 12, 1985]

DEMOCRATS HAVE QUESTIONS FOR MRS. TAYLOR

(By Peter Hardin)

WASHINGTON.—Helen Marie Taylor's struggles with Congress soon could enter a new phase.

Democratic Sens. Edward M. Kennedy and Claiborne Pell yesterday submitted 10 pages of lengthy questions they want the conservative Richmond, Va., activist to answer about her background and allegiances as they consider her nomination to the National Council on the Humanities.

Kennedy asked a number of questions about Mrs. Taylor's involvement with Western Goals Foundation, a private anti-communist group based in Northern Virginia and founded by the late Rep. Lawrence P. McDonald, D-Ga., a John Birch Society leader killed in 1983 when Soviet fighters shot down Korean Air Lines Flight 007 near Japan.

Mrs. Taylor said in a telephone interview today she hadn't received the questions yet. Based on a reporter's summary of the questions, she suspected that they were based on political opposition to her, she said.

A spokesman for the Senate Labor and Human Resources Committee, where Mrs. Taylor's nomination has been bottled up, said the Democrats' questions "more than likely" are an effort to stall Mrs. Taylor's confirmation.

Although the committee hasn't acted on Mrs. Taylor's nomination, she has served on the council through an appointment made by President Reagan during a congressional recess in August 1984. That appointment will expire when Congress goes home for the year, which could occur this week or next.

It is extremely unlikely that the committee will consider Mrs. Taylor's nomination to a full six-year term before Congress finishes its work for 1985, Senate sources said. Those sources pointed out that Reagan could make another recess appointment of Mrs. Taylor next year.

Kennedy, D-Mass., top-ranking minority member on the Senate committee, asked Mrs. Taylor her opinions on cultural exchanges with the Soviet Union in light of a 1983 New York Times advertisement by Western Goals.

The advertisement, following the shooting down of KAL 007, said "we must not socialize with uncivilized barbarians."

Kennedy also questioned Mrs. Taylor, who he said is a board member for Western Goals, about litigation in California involving the group and the American Civil Liberties Union of Los Angeles.

Lawyers for the ACLU alleged that the Northern Virginia organization conspired illegally to receive confidential Los Angeles police records as part of a computerized data bank source of information for individuals and law enforcement agencies.

Other questions involved Mrs. Taylor's association with a number of conservative groups such as Coalition for Peace through Strength and the Eagle Forum.

He asked her to discuss a remark from a Washington Post story in 1981. Mrs. Taylor was quoted as calling herself "a soldier in the Judeo-Christian movement."

Kennedy also asked Mrs. Taylor to elaborate on her views on the civil rights movement and voting rights. A Richmond News Leader article in 1969 said Mrs. Taylor had suggested that welfare recipients not be allowed to vote. Pell, D-R.I., inquired about Mrs. Taylor's views on UNESCO and the U.S. withdrawal from that agency, to which she once was a delegate.

Reagan first nominated Mrs. Taylor and six others to the 26-member advisory council in 1984. When the Senate failed to take action, Reagan placed the new members on the council by recess appointment. The other appointees have subsequently been confirmed.

The 1984 appointment followed a defeat a year earlier. Reagan had nominated Mrs. Taylor to the Corporation for Public Broadcasting board of directors, but the nomination eventually was dropped after Republican Sen. Barry Goldwater balked.

Mrs. Taylor, an outspoken woman who once stepped before a paving machine to halt the laying of asphalt on Richmond's historic Monument Avenue, has blamed the controversies over her appointment on politics.

Mrs. Taylor has homes in Richmond and Orange County, Va.

[From the Richmond (VA) News Leader, Sept. 14, 1986]

MRS. TAYLOR AT POST WITHOUT CONFIRMATION

(By Peter Hardin)

WASHINGTON.—Helen Marie Taylor recently has attended United Nations events and has stayed in an East Side New York hotel at taxpayers' expense although the Senate hasn't confirmed her appointment as a representative to the General Assembly.

Mrs. Taylor, a conservative activist from Virginia, belongs to a small group of diplomats, legislators and public citizens appointed to the U.S. delegation to the U.N. General Assembly. Many group members have participated in delegation duties with the expectation their nominations would routinely be confirmed later.

This week, however, the Senate Foreign Relations Committee delayed action on Mrs. Taylor's nomination and there were signs the appointment was facing serious trouble there.

The controversy over her newest nomination took an unusual turn late yesterday when the White House, according to a Senate Foreign Relations Committee aide, told Mrs. Taylor she shouldn't be acting in an official capacity in New York City.

The White House contacted Mrs. Taylor a day after the Senate committee learned she was in New York. The panel told the State Department Mrs. Taylor hadn't been confirmed and shouldn't be handling official roles, the aide said.

Richard C. Hottelet, spokesman for the U.S. Mission to the United Nations, said he was "astonished" to learn from a reporter about the questions regarding Mrs. Taylor's status.

Later, after discussing the situation with various officials, Hottelet said, "Pending her confirmation, Mrs. Taylor will have no official assignments."

Reached twice yesterday in New York through the U.S. Mission offices, Mrs. Taylor said little about her situation.

At midafternoon, she told a reporter she was busy talking on another telephone line. Somewhat later, she again she was very busy and had to catch a shuttle flight.

"As soon as I know anything, I'll let you know—I sure will," Mrs. Taylor told The Richmond News Leader.

Mrs. Taylor maintains homes in Richmond and in Orange County.

Because Congress is expected to adjourn next week, time is running out for Senate confirmation of Mrs. Taylor's appointment, which was sent to the Senate Sept. 19. However, President Reagan could make a recess appointment of Mrs. Taylor after Congress goes home.

The Senate foreign affairs panel so far has approved nine of the delegation appointments but the full Senate hasn't acted, the committee aide said.

Hottelet said Mrs. Taylor has used the U.N. Plaza Hotel, where a bloc of rooms is reserved for U.N. General Assembly representatives. He guessed, but wasn't certain, that Mrs. Taylor probably had used the hotel since at least Sept. 22, when general debate started in the new General Assembly session.

No taxpayer money has been wasted, Hottelet said, because the rooms are reserved and paid for no matter which individual representative uses them.

Delegates to the General Assembly session receive a daily stipend, Hottelet said. The payment usually is made retroactively. He didn't know whether Mrs. Taylor would receive a stipend.

The stipend is calculated from a top government official's annual salary of about $70,000, but Hottelet said he didn't know the precise daily payment.

All duties of the appointed public delegates have been ceremonial so far, Hottelet added.

Each year several members of the general public are named to the delegation—which usually numbers 10 persons, and numbers 12 this year—"to get the input of people who are not professional diplomats and can contribute from their own professional background," Hottelet said.

The scrap over Mrs. Taylor's status and appointment is the latest episode in a series of struggles.

On Wednesday, Sen. Claiborne Pell, D-RI, asked the Senate Foreign Relations Committee to delay its vote on Mrs. Taylor's nomination. The committee could meet again next week, although no date has been set.

The White House submitted the latest nomination of Mrs. Taylor, a wealthy donor to conservative groups and causes, after withdrawing her name twice in the past three years for other appointments.

Her nomination to the National Council on the Humanities was withdrawn in August, and her 1983 appointment to the Corporation for Public Broadcasting board of directors also was withdrawn.

Pell, along with Sen. Edward M. Kennedy of Massachusetts, sent Mrs. Taylor a long list of questions last year about her involvement with a number of conservative groups including Western Goals Foundation, Coalition for Peace through Strength and the Eagle Forum.

Mrs. Taylor didn't answer the written questions. To do so, she said later, would have resulted in denial of the hearing she had requested.

Sen. Paul S. Trible Jr., R-Va., and a member of the Foreign Relations Committee, said Mrs. Taylor's chances of winning Senate confirmation to the U.N. assignment are dim.

"I've talked to both Pell and (Committee Chairman Sen. Richard) Lugar and they say there is no way she will be confirmed," Trible said.

Mrs. Taylor has telephoned him and others "raising hell" about the Senate's failure to confirm her nomination, said Trible, who was named as an alternate representative to the U.N. General Assembly.

A State Department spokesman said representatives to the U.N. General Assembly routinely serve during the period before their appointments are confirmed.

Mrs. Taylor was asked not to handle more official duties out of courtesy to the Senate, the spokesman said.

A White House press spokesman was unfamiliar with the situation and had no comment yesterday.

NOMINATION OF HELEN MARIE TAYLOR

Mr. PRESSLER. Mr. President, I rise to thank my colleagues for their support of Helen Marie Taylor who I know to be a hard worker and a dedicated American. By moving her nomination today, we are improving the effectiveness of our U.N. team. I recently spoke with our U.N. Ambassador, Vernon Walters, and he emphasized the need to complete these nominations. As a member of the Foreign Relations Committee, I am pleased that we have worked this out successfully.

The PRESIDING OFFICER. Is there further debate on the nomination? If not, the question is on the confirmation of the nomination.

The nomination was confirmed.

SENIOR FOREIGN SERVICE

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the nomination of Edwin G. Corr, which is now placed on the Secretary's desk, on the Executive Calendar.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The nomination will be stated.

The legislative clerk read the nomination of Edwin G. Corr, placed on the Secretary's desk, in the Senior Foreign Service.

The PRESIDING OFFICER. Is there debate on the nomination? If not, the question is on the confirmation of the nomination.

The nomination was confirmed.

DEPARTMENT OF STATE

Mr. DOLE. Mr. President, I now ask unanimous consent that the Foreign Relations Committee be discharged from further consideration from the nomination of Elinor Greer Constable, of New York, to be Ambassador to Kenya, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The nomination will be stated.

The legislative clerk read the nomination of Elinor Greer Constable, of New York, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Kenya.

There being no objection, the Senate proceeded to consider the nomination.

The PRESIDING OFFICER. Is there debate on the nomination? If not, the question is on the confirmation of the nomination.

The nomination was confirmed.

Mr. DOLE. I thank the Presiding Officer.

EXECUTIVE CALENDAR

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed in executive session to consider the following nominations on the Executive calendar:

Calendar No. 1052, Calendar No. 1053, Calendar No. 1054, Calendar No. 1055, Calendar No. 1057, Calendar No. 1058, Calendar No. 1059, Calendar No. 1060, Calendar No. 1061, Calendar No. 1062, Calendar No. 1063, Calendar No. 1064, Calendar No. 1066, Calendar No. 1123, Calendar No. 1124, Calendar No. 1125, and Calendar No. 1126.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. There is no objection.

Mr. DOLE. Mr. President, I ask unanimous consent that the nominations just identified be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I think I inadvertently left out Calendar No. 1056.

Mr. BYRD. Yes. Mr. President, there is no objection to Calendar No. 1056. We are ready to proceed.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed are as follows:

DEPARTMENT OF STATE

L. Paul Bremer III, of Connecticut, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador at Large for Counter-Terrorism.

David C. Fields, of California, a Career Member of the Senior Foreign Service,

Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Central African Republic.

Alexander Fletcher Watson, of Maryland, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Peru.

Charles J. Pilliod, Jr., of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mexico.

James Daniel Phillips, of Kansas, a Career Member of the Senior Foreign Service, Class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Burundi.

Peter O. Murphy, of the District of Columbia, for the rank of Ambassador during the tenure of his service as Special Negotiator for United States-Canada Trade and Investment Issues.

James Roderick Lilley, of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Korea.

Ronald DeWayne Palmer, of the District of Columbia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mauritius.

David A. Korn, of the District of Columbia, a Career Member of the Senior Foreign Service, Class of Minister—Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Togo.

James Wilson Rawlings, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Zimbabwe.

Everett E. Bierman, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Papua New Guinea, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Solomon Islands.

Everett Ellis Briggs, of New Hampshire, a Career Member of the Senior Foreign Service, Class of Minister—Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Honduras.

Theodore E. Gildred, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Argentina.

Frank Shakespeare, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Holy See.

James Edward Nolan, Jr., of Maryland, to be Director of the Office of Foreign Missions, with the rank of Ambassador. (New Position)

Donald K. Petterson, of California, a Career Member of the Senior Foreign Service, Class of Minister—Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Tanzania.

Walter Edward Stadtler, of New York, a Career Member of the Senior Foreign Service, Class of Minister—Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Benin.

Edward Joseph Perkins, of Oregon, a Career Member of the Senior Foreign Service, Class of Minister—Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of South Africa.

FRANK SHAKESPEARE TO BE UNITED STATES AMBASSADOR TO THE HOLY SEE

Mr. MOYNIHAN. Mr. President, I rise today to express my wholehearted support for the nomination of Frank Shakespeare to be U.S. Ambassador to the Holy See.

He has had an eminent public career. He continues it. There cannot be many occasions in which the Senate can be more confident in giving its advice and consent.

Since 1985, Mr. Shakespeare has served with distinction as our Ambassador to the Republic of Portugal, where his skill in representing American interests—and in understanding the complexities of Portuguese politics—has been invaluable.

Mr. Shakespeare served with equal distinction as Director of the U.S. Information Agency from 1969 to 1973. Together with his experience as Chairman of the Board for Internatioal Broadcasting, and his service in private industry—including a 9-year term as president of RKO General—Frank Shakespeare has built a record of both dynamism and integrity. And I have had the honor of his friendship for many years.

Mr. President, the post of Ambassador to the Vatican is an important one; but never has the Senate faced an easier task in offering its advice and consent.

AMBASSADOR FRANK SHAKESPEARE

Mr. PRESSLER. Mr. President, I rise in support of Mr. Frank Shakespeare, who has been nominated by President Reagan as the second U.S. Ambassador to the Holy See.

Mr. Shakespeare has served his country well in many positions in the public and private sectors. He has held key executive posts in major corporations, including the presidencies of CBS and RKO General. Mr. Shakespeare was also the executive vice president of Westinghouse.

He also has served the Nation effectively as Director of USIA from 1969–73, after which time he returned to the private sector. He has represented the United States admirably in his current post as Ambassador to Portugal.

Ambassador Shakespeare is also the recipient of honorary doctorates from the Colorado School of Mines, Pace University, and the Delaware Law School.

His interest in public affairs has extended to contributions to the debate on some of the most critical issues of our time. This participation includes his active involvement on the boards of various journals and research institutes. He is currently vice chairman of the board of the American Spectator, a director of National Review magazine, chairman of the Heritage Foundation board of trustees, a director of the American Council on Germany, a Director of the National Strategy Information Center, and a member of the Wilson Council—Woodrow Wilson Center. He participated in preparing a response to the economic letter of Catholic bishops, and has worked closely with Cardinal Cooke within the Roman Catholic Church on drug problems.

I am proud that the President has chosen to nominate Frank Shakespeare to the important post of American Ambassador to the Vatican. I will vote to confirm him, and I urge our distinguished colleagues to give Frank Shakespeare the overwhelming vote of confidence he so richly deserves. He is an exceptionally well-qualified individual who will continue to serve our Nation in the most effective manner possible. We are lucky to have such a man in the service of our Nation.

NOMINATION OF EDWARD JOSEPH PERKINS

Mr. HATFIELD. Mr. President, the tremendous attention focused in recent months on sanctions against South Africa has distracted us from a very serious issue: the United States does not now have a viable policy toward South Africa. Carefully crafted sanctions are not in place, but the task of framing a viable policy into which they fit lies ahead. Given our moral and strategic stake in that troubled nation, I believe that task ought to be among our top foreign policy priorities in the coming months.

I am therefore delighted to find before the Senate the nomination of Oregonian Edward Perkins to be U.S. Ambassador to South Africa.

Ambassador Perkins is a career Foreign Service officer with vast experience from which to draw. And he is no stranger to complexity and controversy: Ambassador Perkins has spent much of his career in Southeast Asia, a region fraught with both moral and strategic dilemmas. He has also spent several years in West Africa, first as U.S. Counselor for Political Affairs in Ghana, and most recently as the U.S. Ambassador to Liberia. In Liberia, where he has served as Ambassador since 1985, Ambassador Perkins has been charged with the difficult task of upholding human rights in the exciting context of a developing democracy.

The South Africa to which Ambassador Perkins will soon go is a nation torn by racial injustice and violence. The voices raised in South Africa are diverse and often contradictory. The impetus and indeed the inevitability of change in South Africa is clear. When that change will come and what will become of South Africa after the dust settles are anything but clear. But instead of seeing South Africa as a confused and ultimately hopeless nation, it is my hope that Ambassador Perkins

will go to South Africa with the energy and creativity to see the nation as a land of opportunity for the United States, as well as for the people of South Africa.

Our debate over sanctions has concluded, but the history of a post-apartheid South Africa has just begun to unfold. We will have a great many more decisions to make in future months, and without a coherent policy, we will be left to answer them on an ad hoc basis. Mr. President, I am deeply troubled by that prospect because I think the influence of the United States, both in and on South Africa, could be much stronger if we had a policy behind our actions.

The appointment of Ambassador Perkins offers me hope, however. Working with dedicated men like Undersecretary of State Chester Crocker and Secretary of State George Shultz, Ambassador Perkins has an opportunity to go beyond ad hoc decisionmaking to a viable and constructive United States policy toward South Africa. In that opportunity, Mr. President, lies our hope for a vital and friendly post-apartheid South Africa.

NOMINATION OF CHARLES J. PILLIOD, JR., AMBASSADOR TO MEXICO

Mr. GLENN. Mr. President, it is a distinct honor and pleasure to speak today on behalf of the confirmation of my good friend, Chuck Pilliod, as U.S. Ambassador to Mexico. I have known Chuck Pilliod since our college days and can recommend him to my colleagues without reservation or qualification. Chuck has had a distinguished career with Goodyear Tire and Rubber Co., of Akron, OH, rising through the ranks to become chairman and CEO. A good portion of his time at Goodyear was spent in the international division where he served in Panama, Peru, Colombia and Brazil. Chuck is fluent in Spanish, an undeniable asset in the challenging post he has accepted.

Chuck Pilliod is a man of integrity and ability. I know he will serve our country well in this very important position. Our relationship with our neighbor to the South is one of our most critical bilateral relationships and the Nation can rest assured that we will be most ably represented with Chuck Pilliod as our Ambassador. I congratulate the President on an excellent choice and urge my colleagues to confirm that choice by unanimous vote.

Mr. DOLE. Mr. President, I ask unimous consent that it be in order to move to reconsider the votes by which the nominations were considered and confirmed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I move to reconsider the votes by which the nominations were considered and confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, let me thank the distinguished minority leader, and all others. We have been conferring on this list. This will almost complete the Executive calendar. I understand there are three or four others that have now been cleared. We can act on those later in the day. But I thank all my colleagues on each side.

CLOTURE MOTION

Mr. DOLE. Mr. President, we are now prepared to vote on the cloture motion.

The PRESIDING OFFICER. The Senate will give attention to the fact that the hour of 3 p.m. having already arrived, under the previous order, the clerk will report the motion to invoke cloture.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to concur in the House amendment with a further amendment to H.R. 5484, the omnibus anti-drug bill.

Bob Dole, Strom Thurmond, Paul Trible, W.L. Armstrong, Mitch McConnell, Malcolm Wallop, Paula Hawkins, Chic Hecht, Don Nickles, Paul Laxalt, Al Simpson, Pete Wilson, Orrin G. Hatch, J. Warner, Chuck Grassley, James T. Broyhill, and Lawton Chiles.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the motion to concur in the House amendment, with further amendments to H.R. 5484, the omnibus antidrug bill, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Dakota [Mr. ANDREWS], the Senator from Nevada [Mr. LAXALT], the Senator from Alaska [Mr. STEVENS], and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

I further announce that, if present and voting, the Senator from Idaho [Mr. SYMMS] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 58, nays 38, as follows:

[Rollcall Vote No. 346 Leg.]

YEAS—58

Abdnor	Ford	Murkowski
Armstrong	Garn	Nickles
Baucus	Goldwater	Nunn
Bingaman	Gramm	Packwood
Boren	Grassley	Pell
Bradley	Hatch	Pressler
Broyhill	Hawkins	Quayle
Bumpers	Hecht	Riegle
Byrd	Heflin	Roth
Chiles	Heinz	Rudman

NOT VOTING—4

Andrews	Stevens
Laxalt	Symms

□ 1540

The PRESIDING OFFICER. On this vote, the yeas are 58, the nays are 38. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I have indicated to a number of Senators that on this one issue, we would like to have a brief meeting in my office now before we do anything else on the bill. Therefore, I suggest the absence of a quorum.

Mr. LONG. Mr. President, before we do that, if the Senator will yield, I would like to say a word on this point.

Mr. DOLE. I would be happy to have him say a word, but not to offer an amendment.

Mr. President, I yield without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana is recognized.

Mr. LONG. Mr. President, a number of us, the two Senators from Louisiana and a number of others, voted against cloture on this measure because we are

opposed to the matter involving the tax checkoff on this antidrug measure. Otherwise, we would favor the Senator's proposal.

We are strongly in favor of the provision now in the law that has to do with the $1 checkoff as regards Presidential elections. The $1 donation matter involved in the bill before us is a checkoff system which is prejudicial and works against, perhaps undermines, the checkoff system for financing Presidential election campaigns.

HOW THE CHECKOFF WORKS

The Dole amendment to the House-passed amendment to the Drug Enforcement Act of 1986 (H.R. 5484) would include a tax-return checkoff for taxpayers to use to donate money to the Federal Government for drug-related expenditures. The provision would provide taxpayers with the option of letting the Government keep a portion of their tax refunds and put the donation into the Antidrug Trust Fund. Amounts in the trust fund would be expended to carry out the purposes of the Drug Enforcement Act. Amounts contributed would not be deductible.

CHECKOFF UNDERMINES PUBLIC FINANCING OF PRESIDENTIAL CAMPAIGNS

The drug checkoff would confuse taxpayers and undercut the effectiveness of the Presidential election campaign checkoff. The election checkoff is not a donation and does not increase a taxpayer's taxes. Instead, it designates a portion of taxes paid for the specified purpose. The drug checkoff works the opposite way; checking the box for the drug fund would cost the taxpayer money out of pocket. This would lead many taxpayers to believe the campaign checkoff worked the same way. They would refrain from checking the campaign box because they would think that all checkoffs cost them money.

DRUG CHECKOFF DONATIONS NOT DEDUCTIBLE

Contributions made to the Antidrug Trust Fund through an individual's tax return would not be deductible. This would cause considerable confusion. The general rule is that contributions for public purposes are deductible. It might even be argued that the drug checkoff is a trick on the American people, since contributions to the Federal Government for public purposes are deductible under section 170(c)(1) of the Tax Code.

REVENUE RAISED IS INSIGNIFICANT

It is impossible to justify the degree of confusion which this provision would cause in light of the fact that it will raise only negligible revenue. The Joint Tax Committee estimates that this provision would raise less than $5 million per year.

CHECKOFF TRIVIALIZES ANTIDRUG EFFORT

The fight against drugs is not optional. If we want to leave funding to voluntary contributions, we should leave the programs to volunteer organizations. The Government gets involved in solving a problem because it can do things that the private sector cannot do. If a problem is important enough for the Government to get involved in, it is too important to fund on a voluntary basis.

THE TAX RETURN SHOULD NOT BE USED TO SOLICIT DONATIONS

The tax return system is not the appropriate mechanism for raising voluntary contributions for public causes, no matter how laudable. The tax collection process is designed to collect taxes. Attempts to use it for fund-raising efforts which the Federal Government is not willing to fund through taxation will only serve to confuse taxpayers. It would also create a feeling that certain Federal policies need only be supported on an optional basis.

HOW COULD WE SAY NO TO OTHER CHARITABLE EFFORTS?

We should be careful not to establish the precedent of making the Internal Revenue Service the collector of contributions for various causes. It is better to keep all solicitations for donations off of tax returns than to create a situation where hundreds of other worthy causes will argue for equal treatment. It would also be a bad precedent to provide that a new Government program be funded through a tax return checkoff. If it can be done for drugs now, it can be done for dozens of new programs in the future, and the tax return will wind up looking like a Chinese menu.

Mr. KENNEDY. Mr. President, I share the concerns of the Senator from Louisiana. The worst idea in the drug bill is the notion that we ought to pass the hat via the Internal Revenue Code to pay for the war on drugs. There are very good reasons why we use the dollar checkoff for Presidential campaign financing. Neither political party will trust a partisan Congress to appropriate the necessary funds fairly. And Congress itself is reluctant to appropriate tax dollars for political campaigns.

The dollar checkoff solves this dilemma by permitting taxpayers to make the decision to pay for clean elections. And the miracle of the checkoff is that enough taxpayers care enough about clean elections to fully fund the provision for public financing of Presidential campaigns.

That idea is unique, and it works—singlehandedly, it has taken Presidential elections off the auction block.

For years, we've held the line against using the tax form to raise funds for other worthy causes, and we should not break that precedent now. The most ridiculous aspect of the provision in the bill is that the revenue estimate is so small—only $5 million a year. We will be violating a very important principle for a very small return.

The most insidious feature of the provision is that it may turn out to be a Trojan Horse to kill the dollar checkoff for Presidential elections. President Reagan tried to repeal the dollar checkoff as part of tax reform. But Congress turned him down. Funding for the checkoff has always been precarious. Only one-fourth to one-third of taxpayers use the checkoff, but their dollars are now sufficient to fully fund the program. There is no justification for adding another checkoff for the war on drugs that will only confuse taxpayers and jeopardize the existing checkoff.

We talk a lot about new ideas. But Senator RUSSELL LONG's dollar check is a "genuine original," a new idea that worked, and is working well today. Let's protect it for the future, by deleting the provision from the bill.

If we accept this dubious concept now, what next? Will we start using the checkoff to pay for the Superfund? For Star Wars? For Deficit Reduction?

All of us can understand the frustration over our inability to find a way to fund the war on drugs. But let us face that issue honestly, not with gimmicks on the tax form that jeopardize other valid goals. I urge the Senate to delete this controversial and unjustified provision from the drug bill, and I am proud to cosponsor the Senator from Louisiana's amendment to accomplish that goal.

□ 1550

Mr. LEVIN. I move to reconsider the vote, Mr. President.

Mr. EVANS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I have asked about four or five Members on each side if they could meet briefly in my office to discuss the death penalty, and I hope that we would not take any additional action on the bill until we have had that meeting, so I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Will the Senate be in order?

ORDER OF PROCEDURE

Mr. GOLDWATER. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. GOLDWATER. What is the business before the Senate?

The PRESIDING OFFICER. The pending business is the motion of the majority leader to concur in the amendment of the House with an amendment to the drug bill.

Mr. GOLDWATER. Further parliamentary inquiry. Has the conference report on the fiscal year 1987 Department of Defense authorization bill come over from the House?

The PRESIDING OFFICER. That matter is at the desk.

Mr. GOLDWATER. Pardon?

The PRESIDING OFFICER. The answer to the Senator is in the affirmative. That conference report is at the desk.

Mr. GOLDWATER. Would the Senator from Arizona be out of order if I asked unanimous consent that that become the pending business?

The PRESIDING OFFICER. The Senator could make that request if he desired to do so.

Mr. GOLDWATER. Well, the Senator makes it.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1600

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF DEFENSE AUTHORIZATION — CONFERENCE REPORT

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the conference report of fiscal year 1987 Department of Defense authorization bill, which has been reported by the House, be made the pending business.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. SIMPSON. Mr. President, reserving the right to object, we have a problem with regard to time. I had understood that the matter would be brought before us and we would proceed, without a time agreement, for 20 or 25 minutes. That is not the case.

Right now, the leader is involved in a very serious negotiation on the drug bill, as to whether we can resolve the death penalty issue in the drug bill, and all the principals are involved in that particular meeting.

I have not the slightest idea to detract from what Senator GOLDWATER is doing, but I do know that if we go to this matter, we are going to get into some protracted discussion. That is my impression.

Is that not correct?

Mr. GOLDWATER. Mr. President, that is not true. I doubt that there will be a total of 15 minutes in discussion.

Mr. SIMPSON. I inquire of Members who I have been advised wish to speak on this as to how much time might be involved, so that I might withdraw my objection.

Mr. NUNN. If I judge the tone of the Senator's voice correctly, the shorter we speak, the more likely it is that he will withdraw his objection. Is that correct?

Mr. SIMPSON. That sounds like a remarkable surmise.

Mr. NUNN. I will adjust my remarks to whatever time the Senator will accord us. I can put my statement in the RECORD.

Mr. SIMPSON. I inquire of the Senator from California as to his intent.

Mr. WILSON. About 5 minutes. But I am for the Senator from Georgia not to put his remarks in the RECORD. I think they are of critical importance, and they should be heard by the Members, not simply relegated to the written record, and he should use whatever length of time he chooses.

Mr. SIMPSON. Are there other colleagues who are going to participate in this particular conference report?

Mr. QUAYLE. Two or three minutes.

Mr. WILSON. About 5 minutes.

Mr. STENNIS. Mr. President, as I understand it, the proposal is to agree to a very small amount of time for debate on this bill. The bill is really enormous. it has everything in it. It involves billions of dollars. My point is, let us not leave out the Members who are not here now. They are at another conference. They should be notified before you close the door on their time.

Mr. SIMPSON. Mr. President, I think we all realize the importance of this. I have had indications that there would be very few minutes of debate.

I ask unanimous consent that we do proceed to this conference report for action.

Mr. GOLDWATER. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, I submit a report of the committee of conference on S. 2638 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legisative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 15, 1986.)

Mr. GOLDWATER. Mr. President, I rise to report the actions of the joint House/Senate conference on the fiscal year 1987 Department of Defense authorization bill, S. 2638. This is the last defense conference bill I will report to the Senate, and it is with mixed emotions that I make my report today—mostly happy.

While the President requested $320 billion for defense in 1987, the Congress has decided to provide only $291.9 billion in this bill—a reduction of more than $28 billion. I wish to go on record today, stating in the clearest way I can, we are cutting too much from defense. I remind my colleagues that last year, instead of providing for some reasonable growth in the defense budget, we actually had negative real growth of nearly 4 percent. And this year, we have again set a level of funding which provides negative real growth of almost 3 percent. Let us not kid ourselves. Anyone who thinks we can go on cutting the defense budget to the point where we actually have declining growth rates of more than 3 percent a year, without undermining our defense posture, is indulging in a happy but entirely unrealistic and crazy delusion.

□ 1610

Our defense budgets over the last 2 years have set in motion a dangerous trend which, if not reversed, may have profound consequences on our future. I have a terrible sense that we are returning to the irresponsible policies of the late 1970's.

I remind my colleagues that despite the fact that Soviet leaders have recently acquired a new and more sophisticated public relations strategy, there is no reason to believe the objectives of that totalitarian government are any different nor any less threatening now than were the objectives of their less artful predecessors. And I suggest that before anyone gets carried away by the new Soviet image, we first look very carefully at Soviet actions around the world. Until those actions are consistent with Soviet rhetoric, I suggest we pay more attention to their deeds, and less to their words.

Mr. President, I am not at all pleased that we have had to cut so much from defense. However, we have

complied with the budget resolution targets adopted earlier this year; and at the same time, have tried to minimize the adverse consequences on our Nation's security. This has been a very difficult task.

Our conference during the last 3 weeks has been, without question, the most difficult conference in which I have ever participated. The House leadership, in an attempt to guarantee the outcome on several important issues—most of which were not even germane to our bill—stacked the conference with several groups of exclusive conferees, any one of which had the ability under the rules to block a final conference report. Despite this effort to rig the conference, we were able finally to resolve all issues in disagreement. I would like to point out that there were more than 1,600 funding differences to be resolved, and more than 400 language differences; that is the greatest number of issues we have ever had to resolve in a defense conference.

Before I highlight some of the major provisions in the conference report, I would like to first thank my friend and colleague, Senator NUNN, for his invaluable help in completing the conference. As always, his sound judgment and close cooperation were essential in our efforts to reach agreement with the House conferees. As I said earlier, this was an unusually difficult conference, and it would not be over yet were it not for SAM NUNN's negotiating skills and perseverance. SAM, I am deeply and sincerely grateful to you for your untiring efforts and steadfast support.

Mr. President, I would not be honest with myself, my conscience, or you if I did not mention JOHN WARNER of Virginia in the same vein.

Senator NUNN and Senator WARNER started to work this thing out about 4 days ago and by staying up all day, all night they did reach a point late yesterday where we could reach agreement.

I am totally indebted to JOHN WARNER for having made this conference report possible.

I would also like to express my great appreciation to the chairmen and ranking minority members of each of the subcommittee of the Armed Services Committee for their diligent efforts in resolving the differences within their subcommittee jurisdictions. And my special thanks to those committee members who negotiated with the House the many diversified issues in the conference—from foreign policy to child nutrition. Their efforts consistently went above and beyond the normal call of conference duty.

And I just want to mention at this point in my remarks that beginning with last night or whenever the Air Force desires we have lost the services of Jim McGovern. He will become the Deputy Secretary of the Air Force, and I could not express my feelings of loss in any words that I have. Jim has been a very valued head of our staff for many years and all I can say is that the Air Force is getting some real good help and we are going to miss him. But I have appointed Carl Smith—these are both Navy aviators. I do not know why I am extolling these guys so much.

You can put your thumb down. In fact they are now Marine aviators. That is worse.

Mr. President, as I noted earlier, this is my last defense authorization bill. It is also the last one for Gerald D. Strickler, the committee's printing and documents clerk who is retiring at the end of this year after 31 years of Government service.

I want the Senate to know that since 1975 Gerry Strickler has been the one we have depended on to work printing miracles. This extraordinarily professional printer is a former marine—the Marines are taking the place over—who has willingly taken on countless, seemingly impossible missions under the most arduous conditions and has never failed us. Gerry is a gentleman who is respected and admired by all on the committee. We will miss him. I want to say thank you, Gerry, and wish you and your lovely wife, Hilda, every happiness in the years ahead. You have earned it.

At this time, I would like to briefly highlight the major provisions of the conference report:

SDI. The conferees agreed to provide a total of $3,530 million for SDI, splitting the difference between the Senate and House positions on Department of Defense and Department of Energy funding for SDI.

Binary chemical munitions. The conference report provides full funding for the 155 mm binary artillery shell and provides $35 million for Bigeye production after October 1987.

Peacekeeper (MX). The conference report funds procurement of 12 missiles in fiscal year 1987.

Asat. The conferees agreed to continue the moratorium on Asat tests against an object in space through the end of fiscal year 1987.

Small ICBM. The conferees agreed to provide $1,200 million for the small ICBM.

Bomber modernization. The conferees provided the full amount requested for the advanced technology bomber and advanced cruise missile.

M-1 tank. The conferees approved procurement of 840 M-1 tanks.

F-15 and F-16. The conference report provides for the procurement of 180 F-16 aircraft and 42 F-15's for the Air Force.

A-6. 11 A-6 aircraft were approved by the conferees.

F/A-18. 84 Navy F/A-18 fighter aircraft were approved by the conferees.

AH-64 Apache. The conferees approved the procurement of 120 Apache helicopters.

Airlift aircraft. The conferees approved the procurement of 21 C-5B and 8 KC-10A aircraft, and initial procurement funding for the new C-17 airlifter.

Shipbuilding. The conferees approved $10.6 billion for the construction of 18 new ships and 3 conversions.

Military pay raise. The conferees approved a 3-percent raise in basic pay, basic allowance for subsistence, and basic allowance for quarters to be effective on January 1, 1987.

Operation and maintenance. The conferees approved $78.6 billion of O&M and $0.9 billion for revolving and management funds. The combination of these two are required to sustain the recent improvements in the readiness and sustainability of our Armed Forces.

Mr. President, this summarizes the highlights of key provisions in our conference report. I ask unanimous consent that the remainder of my statement be submitted in the RECORD.

STRATEGIC FORCE ISSUES

The conference committee resolved net differences of over $5.6 billion between the Senate and House involving strategic programs. While adjustments were made in a number of programs due to budgetary constraints, the conferees agreed to maintain the momentum of the strategic modernization program.

Arms control. The conferees agreed to nonbinding language expressing the sense of the Congress on SALT II compliance. The conferees also agreed to drop the House provision on nuclear testing moratorium above 1 kiloton, and to accept a sense of the Congress regarding ratification of the threshold Test Ban Treaty and Peaceful Nuclear Explosions Treaty.

Strategic defense initiative. The Senate bill provided $3.597 billion for the President's strategic defense initiative [SDI] within the Department of Defense without allocation. The House amendment provided $2.830 billion, and specifically allocated this reduction against each of the five major program elements. The Senate and House had approved $356 million and $279 million respectively for SDI related activities of the Department of Energy. The conference committee remained strongly supportive of a vigorous research effort under the strategic defense initiative, with its goal of determining the feasibility of developing strategic defenses for the United States and its allies. The conferees recommended an authorization of $3.213 billion for SDI activities in the Department of Defense in fiscal year 1987, and $317 million for the Department of Energy. The allocation of the

reduction was left to the discretion of the program manager.

Binary Chemical Modernization Program. The conference committee took another important step toward restoring a credible U.S. chemical deterrent capability. Resolving the difference between the two bills on this program was one of the most difficult issues faced by the conferees. The final agreement, which required concessions from both sides, fully funded the 155mm binary artillery shell and restricted the funding for the procurement of the Bigeye bomb—including components—and the associated production facilities. The conferees agreed to provide $35 million for Bigeye in fiscal year 1987 with the provision that no funds be expended for procurement until October 1, 1987, and that no funds be expended for final assembly until October 1, 1988. The conferees agreed that fiscal year 1986 funding for facilities be fenced until a Presidential certification that facility planning was complete and that proceeding with construction was in the national security interest. In addition, the conferees agreed to drop a provision in the House amendment that would have prohibited withdrawal of existing chemical munitions in Europe until replaced with binary munitions stored in at least one NATO country.

Peacekeeper (MX) missile. The conferees provided $1.114 billion for the procurement of 12 MX missiles in fiscal year 1987, and fully funded the request for initial spares.

Antisatellite weapons. The conference report adopts statutory language from the House amendment that continues the prohibition on testing of the U.S. Space Defense System miniature homing vehicle antisatellite [ASAT] system against objects in space until the President certifies that the Soviets have tested a dedicated ASAT system against an object in space. This provision does not prevent testing against "points" in space using celestial bodies. The conferees provided $200 million for space defense system research and development, provided that no funds be expended for production verification. In addition, the conferees denied the request for advanced procurement, and zeroed military construction funds associated within ASAT operational facilities.

Navy strategic communications. The Senate bill fully funded the administration's request of $143.3 million for Navy strategic communications research and development, and $329.3 million for the procurement of 3 E–6A submarine communications relay aircraft and associated spares. The House amendment contained $50 million for research and development and $107.2 million for procurement of 1 E–6A aircraft. In view of the importance the conferees attach to the sea-based leg of the U.S. strategic triad, and their judgment that this leg can be no more survivable or effective than the communications systems that support it, the conferees agreed to provide full funding for procurement of 3 E–6A aircraft, $113.3 million for strategic communications research and development, and $35.8 million for research and development on satellite laser communications, which could potentially complement the TACAMO system.

Advanced technology bomber and advanced cruise missile. The conferees agreed to provide full funding for these programs in fiscal year 1987. The actual funding levels are classified.

ICBM Modernization. The Senate bill provided $322.3 million for MX research and development, $675 million for the small ICBM and $201 million for follow-on basing research. The House amendment provided $200 million for MX, fully funded small ICBM at $1,375 million, and provided no funds for follow-on basing. The conferees agreed to provide $290 million for MX, $32.3 million below the request; $1,200 million for small ICBM: and $120 million for follow-on basing research, $269 million below the request. The conferees expressed their continued strong support for a triad of strategic forces, including modern, survivable ICBM's. The conferees adopted a Senate provision requiring the Department of Defense to provide an ICBM modernization roadmap early in 1987, and a provision that would repeal existing legislation linking the deployment of MX with ICBM development program when the ICBM enters full-scale engineering development.

MANPOWER AND PERSONNEL ISSUES

The most significant differences between the Senate and House were in the end strength levels of military forces; in reform of the military health care system; and in military pay.

Military pay raise. The conferees approved a 3-percent raise in basic pay, basic allowance for subsistence, and basic allowance for quarters to be effective on January 1, 1987.

Selected Reserve. The conferees agreed to authorize end strength for the Army National Guard of 452,681; for the Army Reserve of 318,011; for the Naval Reserve of 149,486; for the Marine Corps Reserve of 43,470; for the Air National Guard of 113,767; for the Air Force Reserve of 79,562; and for the Coast Guard Reserve of 12,850.

Active duty. The conferees agreed to an active duty end strength of 780,000 for the Army; 587,000 for the Navy; 606,850 for the Air Force, and 188,600 for the Marine Corps.

Military health care. The conferees agreed to provisions which will authorize the most significant reform of the military health care system in a number of years. The conference agreement authorizes the demonstration of a Department of Defense proposal called the CHAMPUS reform initiative [CRI], which involves contracting for all or most of the health care needs of a segment of the CHAMPUS beneficiary population from at-risk contracts. In the first year, CRI could be demonstrated with not more than one-third of the CHAMPUS beneficiary population. Following that demonstration, the Secretary of Defense would be authorized to further implement CRI over the remaining two-thirds of the beneficiary population over a 2-year period. The conferees agreed to a number of other significant changes in the military medical system designed to improve care and enhance the delivery of quality care to military beneficiaries.

TACTICAL WARFARE ISSUES

Both the House and Senate Armed Services Committee continue to place strong emphasis on the modernization of our conventional forces. The agreements reached by the conferees will continue—and in some cases accelerate—the modernization of those forces.

Army. The conferees agreed on the procurement of 840 M–1 tanks in 1987, and provided advanced procurement funds for another 840 tanks in 1988.

The conferees expressed strong support for the development of remotely piloted vehicles [RPV's], but expressed concern over the Army's current PRV program, the Aquila. Recognizing the cost and performance problems that have hampered the Aquila program, the conferees agreed to the Senate language directing that the program be capped and meet Army specifications prior to production.

Navy. For the Navy the conferees agreed to authorize 11 A–6 medium attack aircraft. A total of 84 F/A–18 aircraft were approved for 1987, along with advanced procurement funds for 84 aircraft in 1988. The conferees also approved the procurement of 15 F–14D fighter aircraft. The conferees expressed strong support for the protection of weapons inventories. The Harm missile was fully funded in the Navy and the Phoenix, Sparrow, and Sidewinder missiles were reduced to levels which reflect prior year savings.

The conferees agreed to a funding level of $386.9 million for the development of Navy/Marine Corps V–22 tiltrotor aircraft. The V–22 Osprey is expected to begin replacing CH–46 assault helicopters in 1991.

Air Force. The conferees agreed to the Senate funding levels for the procurement of 180 F–16 and 48 F–15 fighter aircraft. The conferees approved the request for air defense fighters and accepted the House provision allowing a multiyear contract for

the winner of the air defense competition.

The conferees also agreed to the requested funding levels for research and development of the advanced medium range air-to-air missile [AMRAAM]. Production funds of $537.3 million and advanced procurement of $73.1 million were approved with the understanding that these funds would be utilized to proceed into low rate initial production if the missile meets Air Force specifications. The conferees reduced the Air Force request for the Harm missile $100 million but protected the procurement of the Sidewinder and Sparrow in the Air Force weapons accounts.

The conferees consolidated electronic warfare funding throughout the service accounts, reduced the funding request by 11 percent and directed the newly appointed Under Secretary of Defense for Acquisition to manage the electronic warfare programs for the Department of Defense. The conferees agreed to fund the JSTARS Program at $300 million which was $55.7 million below the administration's request.

SEA POWER AND FORCE PROJECTION ISSUES

Shipbuilding. The conferees approved $10,607.1 million for 18 new construction ships and 3 conversions. The conferees agreed to fund one Trident ballistic missile submarine, 4 SSN-688 class nuclear attack submarines, three CG-47 class Aegis cruisers, three DDG-51 class Aegis destroyers, one AOE fast combat support ship, and two TAO fleet oilers. In addition, the conferees authorized initial procurement funds for the new SSN-21 Seawolf attack submarine. The conferees also encouraged the Navy to move forward with expanded helicopter support facilities for the DDG-51 class destroyers.

Antisubmarine warfare aircraft. The conferees authorized 17 Lamps Mark-III—Sea Hawk—helicopters, 7 SH-60F CV ASW helicopters, and 6 LAMPS Mark-I—Sea Sprite—helicopters. The conferees agreed that this will be the final year for procurement of LAMPS Mark-I Sea Sprites.

The conferees also authorized nine P-3 Orions and again provided the Secretary of the Navy with the discretion to shift some funds authorized for new aircraft into a program to upgrade older ones.

Airlift aircraft procurement. The conferees agreed to continue funding for the final year of procurement of C-5B cargo aircraft and KC-10A advanced tanker/cargo aircraft. Twenty-one C-5B and eight KC-10A aircraft will be purchased in fiscal year 1987. The conferees also authorized initial procurement of the new C-17 airlifter.

MILITARY CONSTRUCTION ISSUES

The conferees authorized $8.4 billion for military construction and family housing for nearly 1,700 projects at 700 locations worldwide. The Defense Department requested $10 billion. Although I believe a higher level of funding is warranted, the approved construction program will substantially improve our military bases, enchancing both our readiness posture and quality of life.

The conferees provided $425 million for new construction of 4,925 family quarters, $283 million to lease 42,573 family quarters and $165 million to improve existing family quarters. The conferees agreed to extend section 801, build-to-lease family housing program for 2 years with authority to lease an additional 1,000 quarters for each military service. The conferees also extended section 802 rental guarantee family housing program, for 4 years with authority for each service to contract for an additional 600 quarters.

The conferees provided $53 million for the new Navy homeport at Staten Island, NY, and $44 million for the new homeport at Everett, WA. $180 million was included to continue work on the light infantry division at Fort Drum, NY, and $73 million was authorized to initiate construction for the light infantry division at Fort Wainwright, AK. The conferees authorized $45 million in new construction at strategically important naval and air bases in the Philippines.

PREPAREDNESS ISSUES

The conferees approved $78.6 billion for the operation and maintenance of the Armed Forces in fiscal year 1987, including civilian salaries, base operations, and training. The conferees' action represents a reduction of $7.2 billion from the administration's February request of $85.8 billion and $0.2 billion less than the fiscal year 1986 funding level. With this large reduction, the conference report expresses concern whether we can maintain the improvements that have been made in the readiness and sustainability of our Armed Forces over the past several years.

Substantial reductions were made in both the O&M finance and program requests. The resulting impact on readiness and sustainability is difficult to determine at this time. With the current increasing force structure, a number of reprogramming actions will be required during the fiscal year to minimize the readiness reversals.

Humanitarian assistance. The conference report continues the provision which provides assistance to refugees. The provision provided $17 million for transportation of humanitarian relief supplies to Afghan refugees.

Revolving and management funds and other operation and maintenance related issues. The Department of Defense working capital funds were reduced by $289 million; and funding support for the 10th Pan American Games was provided.

ACQUISITION POLICY ISSUES

As part of the conference report, the conferees adopted the Defense Acquisition Improvement Act of 1986. The act has provisions dealing with many aspects of the defense acquisition process and is intended to address recent high-visibility problems. The following major provisions were adopted to improve the process by:

Adoption of the recommendation of the Packard Commission for establishing an Under Secretary of Defense for Acquisition to be the full-time manager of acquisition in the Department of Defense.

Adopting other Packard Commission recommendations including provisions designed for greater program management stability through milestone authorization as well as shorter management lines of authority in defense systems acquisition.

Establishing a preference in law for the use of nondeveloped items to meet the needs of the Department of Defense and thereby reduce costs in defense acquisition.

Clarifying congressional intent with regard to commercial pricing certification, work measurement requirements, rights in technical data, and the requirements under the truth in negotiations act.

Expanding measures to prevent conflict of interest among Department of Defense employees and members of the Armed Forces involved in the negotiation and administration of defense contracts.

Prohibiting the award of defense contracts to companies which are controlled or owned to a significant degree by countries which support worldwide terrorism.

Establishing new protections from reprisals for contractor employees for disclosure of violations of the law.

Preventing the abuses of undefinitized contract actions in the Department of Defense by placing new restrictions on the use of this contracting method; and

Requiring the use of competitive prototype strategies in major defense systems acquisition.

We all owe a debt of gratitude to David Packard and the other distinguished members of the President's Blue Ribbon Commission on Defense Management for pointing out the proper path to address the causes of most of the serious procurement deficiencies in the Department of Defense.

FOREIGN POLICY ISSUES

In the foreign policy area, the conferees adopted a number of provisions designed to improve the defense of NATO and facilitate arms cooperation with our friends throughout the world.

Southern flank modernization. The conferees took an important step forward in assisting the modernization of

NATO's southern flank by adopting a provision that authorized the President, during fiscal years 1987 and 1988, to transfer excess defense equipment to Greece, Portugal, and Turkey free of charge. The administration is expected to request that this authority be made permanent during the fiscal year 1988 foreign aid authorization process. The conferees recognized that the widespread obsolescence of the military forces of Greece, Portugal, and Turkey has serious consequences for the overall defense of NATO. It is the intent of the conferees that the United States assist the modernization efforts of these allies by transferring equipment which is dated by U.S. standards, but which could still make a military contribution to the defense of NATO's southern flank.

Arms cooperation. In the NATO area, the conferees expanded on last year's action to enhance NATO armaments cooperation by facilitating the Department of Defense's ability to enter into cooperative logistics arrangements with our NATO allies under the aegis of the NATO maintenance and supply organization In the non-NATO area, the conferees adopted provisions designed to increase the Department of Defense's participation in cooperative research and development efforts and cooperative projects with our major non-NATO allies. In addition, the conferees agreed to extend the 1980 NATO Mutual Support Act to certain other countries in an effort to remedy the difficulties the United States is encountering in exchanging logistical support, supplies, and services with these countries.

I yield.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, as a member of the Armed Services Committee I want to thank the chairman of that committee and Senator NUNN and Senator WARNER. These people were the main people who worked so hard. The rest of us played other roles in this conference report.

Certainly the chairman is to be saluted for his dedicated leadership.

That was the most difficult conference that I have ever been a part of since being in the U.S. Senate, and were it not for the dedication of those leaders the report would not be on the floor of the Senate right now.

It is a fitting tribute to Senator BARRY GOLDWATER. This is his last conference report as chairman of the Armed Services Committee. Once again he did an outstanding job under the most extreme circumstances.

I would simply say that I hope that somehow, although it may not be in the rules, we can come up with some kind of an understanding with the House of Representatives that never again would they ever appoint a group of conferees as they appointed in this instance. I do not believe that the U.S. Senate cares nor should it attempt to dictate who are the conferees representing the other House. But I simply wanted to say for the record that the chairman of the conference, who was Senator GOLDWATER, and all of us had a most difficult time because we found ourselves trying to deal unsuccessfully time after time with some 160 or 170 or more Members of the House of Representatives who paraded in and out of the room as if it were some kind of circus trying to deal with the full 19 members of the Senate Armed Services Committee.

There was really no way that we could provide the give and take that is necessary to settle disputes by compromise in conference when time after time we found ourselves in a position of being at a stalemate on an issue because there were one or two members of the Foreign Relations Committee or some other committee that had no jurisdiction whatsoever as far as we were concerned in dealing with the important issues that supposedly are to be resolved between the members of the U.S. Senate Armed Services Committee and the committee of the same essential name on the other side.

It was something that is totally difficult to explain and bring any sense to.

Once again I salute the chairman and the leadership that he has already mentioned for hammering out this that I think basically is a good bill. I salute once again the chairman and wish him Godspeed in his retirement.

Mr. GLENN. Mr. President, I join the distinguished Senator from Nebraska in wishing to express our appreciation and our admiration to the distinguished Senator from Arizona.

I concur in his remarks that this was by far the most difficult conference that I have been a part of in 12 years here in the Senate, largely because of some of the difficulties with the House conference organization.

□ 1620

But the distinguished chairman of the committee, in his usual, straightforward fashion, has brought us through. We are going to miss his leadership around here and I am sorry he has chosen to retire at the end of this term.

Mr. President, I want to comment on two parts of this conference report. The first is the conference itself and the issues that came to be considered in this conference and what I think we should do in the future; and, second, I wish to come back and revisit the subject of SDI research for a few moments, something that was knocked out during the conference. I want to make some comments about that. I am certainly not going to suggest that we resubmit the bill with instructions on that particular issue, but I do feel strongly about where SDI research is conducted and I wanted to have my thoughts on record here on the floor today.

No. 1, as to what was addressed in conference, we found that foreign relations, for the first time in my recollection, became one of the major, if not the major, stumbling block in getting the conference report out.

I have advocated for the last couple of years, not formally, and not in a fashion put forward in a way that would alter the way the Senate does its business, but I have expressed that we no longer can bear the luxury of having a separate Foreign Relations Committee and a separate Armed Services Committee. The two functions overlap too much. I think in the next Congress we should probably consider combining those two committees. I know that is a big order. I know this will strike terror in the hearts of many subcommittee chairmen who have their subcommittees all lined up.

But I, for the life of me, having watched this from the foreign relations aspect, having been on that committee for nearly 10 years, and now, having been on the Armed Services Committee for 2 years, I do not see how we can possibly make foreign policy without intimate knowledge of our military posture that we have available to us around this world and that of our allies; nor do I see, on the other hand, how we can continue to operate just as an Armed Services Committee without taking into very close consideration what the foreign policies of this country are.

Now, that sounds very general, but I have seen it in operation too many times. I do not see how we can keep these functions apart. We either have to combine for a series of meetings a number of times each year and do it on a regular basis in order to have a better understanding of the operation of each other's operation, or it seems to me we should combine the two committees. That would certainly be a very large committee, but the Armed Services Committee cannot perform effectively without these foreign policy considerations nor can the Foreign Relations Committee make policy or consider the policy of the administration without having a much broader knowledge of what our actual military strength is and where we are going with it and that of our allies.

So I bring that up because I think in this conference, more than any time I have seen, we had to consider those matters because the House brought them in. And while we resented that, and I resented it, as the committee chairman did and all the Members on the Senate side resented the House bringing in so many of the foreign policy considerations that had to be resolved, they called in a number of

people from the House, in fact, who were not even members of their military committee over there. They brought in their foreign policy people and appointed them as conferees for the first time. Now, that is something new and different. We have not run into that before.

But maybe we should be grateful to the House. Maybe we should be grateful to the House in that they have finally pointed out that foreign policy considerations are intimately involved with military decisions. And maybe we should react to that on the Senate side in a positive way by saying that we, too, are going to consider these things in a more carefully coordinated way than we ever have in the past; and, yes, we are going to organize to see that we are prepared to deal with that.

So I toss this out here today, Mr. President, with the idea that we have to consider this in the future. The House has brought this to a head by what they did during this conference.

Now, the second item that I want to address concerns the strategic defense initiative research program and where this research is conducted. When we were considering this legislation the first time through here in the Senate, I proposed an amendment that passed here in the Senate 64 to 33. That is a 2-to-1 margin.

What that amendment did was to prohibit the award of SDI research contract awards to foreign governments and firms unless the Secretary of Defense certified to the Congress in writing that the work to be performed under the contract could not reasonably be performed by a U.S. firm. In other words, it would do the research in this country, in America. That amendment was passed on a voice vote by the Senate after a tabling motion was defeated by a vote of 33 to 64. So I had a 2-to-1 vote on that, and the Senate was on record as to what they wanted.

Now, I am sorry that this amendment was, as I view it, given away in the conference. I think it is a mistake.

Why do I think it is a mistake? Let me be a little philosophical for a moment or two about our history in this country. If we were asked to choose two items that we think made this Nation what it is, I do not know what two items you would pick but I know the two that I would pick.

I would say that education was No. 1. We set out to have education not just for the kids from the castle or the rich or politically influential, we set out to have education for all of our people. That was one key, fundamental tenet. That is not at issue here.

The second item that I believe made this Nation strong—basic research—is at issue. We are a curious, questing people. We put more into basic, fundamental breakthrough, Nobel laureate, seminal-type research than any Nation in the history of this world. We learned the new things first. We put together the laboratories and the technicians and the scientists and the people that were to do the research in the laboratories. And it was mainly Government-sponsored research, too.

The President recently said that if research is worth doing, let us do it privately. Let us let private business and industry do it. Yet the very history of our Nation shows that we did it through a dozen or so major, rational laboratories where we did the breakthrough research; at the colleges and universities of our Nation; or by private research institutes. More importantly, most were funded using Federal funds and although the dollar amounts compared to our overall Federal budget were small, they were absolutely vital to the long-term future of our country.

A couple of years ago, I conducted a survey where we sent out questionnaires to the Nobel laureates in this country and asked them if they would be willing to share with us where they got the research support, where they got the funding for their research that enabled them to be Nobel laureates. I think there were 85 or 86 percent of them that said without Federal Government help at the college or university they were assigned, or at the national laboratory at which they worked, they could not have conducted the kind of research that enabled them to win the Nobel laureate prize.

Now, that just indicates that this is seminal; it is key to the future of this country.

Where do we see ourselves standing now? We find ourselves now having recovered from World War II. We helped the nations around the world to reach a position after World War II where they can be technologically competitive with us to the point where we now have a trade deficit for this year around $170 billion—$170 billion in 1986.

And what are they doing? They have seen the goose that laid the golden egg in this country of ours and they are beginning to outcompete the United States of America in certain selected areas.

What does that mean in relationship to star wars and the research that is going to be categorized, and channeled into certain areas. What do we do with star wars? We say we are going to give some of that specialized research to foreign governments.

This at a time when our basic research institutions in this country, when our colleges and universities are crying for research funds. Overall, the basic research funding for this Nation was cut about 29 percent in the first year of this administration. Although the administration has been adding back small increments ever since, but the overall cuts have greatly reduced our basic research expenditures.

Now, the private industry approach the President talks about is a valid thing for some companies, but it is tiny compared to the overall research needs of this country. We have some companies that have been exemplary in putting money into long-term research, not the 3- to 5-year research aimed at the bottom-line payoff for a particular chief executive officer; but the kind of research we are talking about are the 10, 15, 20-year research programs.

□ 1630

Those are the ones we are talking about. Blessings on those companies that do that—and we have a few. We have Bell Labs, Monsanto, 3-M, IBM, and a few companies like that. But our basic research moneys for this Nation, the really basic things from which come all the new industries and whole new lines of employment, development and all of that, came basically in the past from Government-oriented research.

Where do we find ourselves now vis-a-vis our colleagues in Europe? Well, the President proposed star wars in 1983 and waited 2 years and got very poor support from our allies around the world—practically none. They basically talked against it. They were not for it. So 2 years later, the President came up with this idea, and I do not blame him. He essentially said, OK, we will share this research money with you. We will let you share in SDI research.

Then that turned them around somewhat and they started talking about participating because they were going to enjoy considerable benefits. In effect, we were buying political support. It is like a kid standing in the schoolyard with a big bag of candy, passing out the candy. He is going to have a lot of kids around. He will be very popular for a while because of what he is giving out.

What does this do to our own research establishments here? It sends money abroad so they can outcompete us even more. We doubted that for a long time. We listened to the words of Helmut Kohl in Germany, who made the point that one of the reasons he wanted to support SDI was because of the civilian spinoffs that would come from this program.

We are talking about huge expenditures of money in optics, computer technology, laser-powered transmission, and other research areas in which there will undoubtedly be enormous civilian spinoffs. These are long-term research projects. They let people build up all the technicians, scientists, laboratories, the scientific community to back all of this up.

You put another factor into this, too. At least most of us on this floor have been trying to encourage, our allies around the world to be more cooperative in burden sharing. Indeed, the distinguished minority member of our Senate Armed Services Committee, Senator NUNN, even proposed an amendment here on the floor 2 years ago, I think, part tongue-in-cheek, and I voted for it part tongue-in-cheek, proposing to take our troops out of Europe unless our allies share more in the burden.

We are procuring carrier task forces at $13 to $15 billion per group to help keep the sealanes open for our allies as well as ourselves. We keep over 350,000 troops in Europe all the time.

We had a commitment from the Europeans for a 3-percent growth in their defense expenditures, but most of them are not living up to that in any consistent fashion since the pledge was made.

We see burden sharing by and large as having been one-sided. Yet we are going to provide SDI research money at a time period when our allies have not been willing to assume their burden sharing obligations in the way we think they should.

In spite of all the history of this, in spite of seeing what research does for a nation over the long term, now we are going to send more research money overseas. I would ask how much money have the Germans, Japanese, French, British, and others sent to this country to help build up our laboratories in years past? They do a lot of procurement in this country and we appreciate it. But we are talking about the research seed money for the long-term future. We are talking about seed money that is going to have a civilian application as well as a straight application in star wars.

We have many, many places in this country, many colleges and universities, the National Science Foundation, the National Academy of Science, private industry research institutes, like Battelle in my State, fully capable of doing this research if we but have them do it.

That is what I think we should do and that is what my amendment addressed when it was presented to the conference committee.

I proposed the original amendment here in the Senate because I believed that the SDI Program involves revolutionary, state of the art, technological research which is very likely to have a significant spinoff capability to our country in many other areas. So at a time when our research base is hurting I believe we should use SDI research dollars for building up our own research infrastructure and not that of our economic competitors. Further, I believe the administration's obvious but unstated policy of buying our reluctant ally support for the SDI Program does not supersede our need to keep defense dollars for SDI research in the United States whenever possible.

I also feel we should not permit our allies unlimited opportunities to bid on this important national security research project at a time when most of our NATO allies have not lived up to their commitment to annually increase by 3 percent in real terms their defense expenditures.

The second amendment I proposed after we were in conference, which modified my first amendment somewhat, made it even more advantageous to the President. It was not as stringent a restriction as I had originally proposed. What it did was to state that no more than 3 percent of annual DOD SDI appropriations could be used for foreign contracts.

It appears that we are not expecting to go above that level anyway so why not cap it at that level? That is what my amendment will do.

It would also state that if our allies are at least willing to share 50 to 50 the burden of that research, then, fine, we go ahead with that kind of contracting without the 3 percent caps and at least we are getting some burden-sharing.

My amendment would also not effect contracts awarded before enactment, nor would it affect funds appropriated specifically for research, development, test and evaluation in connection with the antitactical ballistic missile. That was a program of special concern for our allies.

Also, exempted are contracts performed within the United States.

We even included a provision that ensures that the Bayh amendment would apply to foreign contracts within that 3-percent cap. The Bayh amendment goes back to fiscal 1973 when the Department of Defense Appropriations Act provided that no DOD research and development contracts may be awarded to foreign firms if a U.S. entity is equally competent to carry out the work and willing to do so at a lower cost.

Just a brief, summary on how the amendment would impact the SDI research program. It is helpful, I think, to look at SDI contract awards to date. This information comes from the SDI office.

Foreign contracts awarded are as follows: United Kingdom, fiscal year 1986, $16.7 million; West Germany, $11.7 million; Israel, $1.1 million; France, $1.1 million, and Italy, $0.5 million. So we put out $31.1 million in SDI contracts for fiscal year 1986.

In fiscal 1986 the Department of Defense was authorized $2.75 billion for the SDI Program. Therefore, had this amendment as modified been enacted prior to 1986, it would have permitted the award of $82.5 million in DOD's SDI-related contracts with foreign governments and firms in fiscal 1986. That is $51 million more than what was actually awarded.

As previously noted, my amendment would have permitted additional foreign contract obligations in excess of $82.5 million if you include ATBM research.

I strongly believe that this amendment, as modified, would not place a major burden on our allies or the SDI Program, yet it would signal our clear intent to emphasize our own research base. It would give the Congress a specific and important continuing control mechanism to enforce that intent. That was the intent of it. That was the way I hoped it would be carried out.

I am disappointed that the Senate acceded to the House in the DOD authorization conference on this particular issue, particularly after the will of the Senate had been expressed 2-to-1 in favor of the amendment. Indeed, I even modified it to make it less onerous to the administration and the House by the change I made in committee.

□ 1640

So that was the basic goal I was trying to accomplish with my amendment. I was not trying to be obnoxious to our allies. In fact, I have had some long and lengthy discussions in my office with one ambassador after another and administration representatives on this subject since my first amendment passed 2 to 1 here on the Senate floor. They are very disturbed about it.

When I asked, however, why there was not European support for this program prior to the passing out of SDI dollars for research, they were silent. In fact, as I said before, Helmut Kohl even said civilian spinoffs is one of the main things he used to sell this program to his own people. I want to see those civilian spinoffs go to the United States of America, not to some foreign country.

So I am sorry that my amendment was defeated in conference after such a big win here on the floor of the Senate. I think it was a big mistake and I have every intention to revisit this on later legislation either in the remaining days of this Congress or early next year.

NUCLEAR ENVIRONMENTAL ISSUE

Mr. GLENN. Mr. President, another provision in the conference report that I feel compelled to bring to the attention of my colleagues concerns the Department of Energy's compliance with Federal environmental laws.

The conference report contains a provision that initially exempts the Department of Energy from having to pay any penalties for violation of Federal environmental laws. It also relieves DOE from having to perform

work or services required by another Federal agency or a State in excess of the "amount specifically appropriated to DOE to comply with such environmental requirement."

Just 2 weeks ago, I released the fifth in a series of studies done by the GAO at my request documenting the serious environmental contamination problems of DOE nuclear defense facilities. I also introduced a resolution calling on DOE to, among other things, raise environmental protection to the same level of priority as production of nuclear materials.

The DOD conference report flies in the face of the facts that have been uncovered about groundwater and soil contamination at DOE facilities, and the resulting potential threat to human health.

Consequently, I intend to offer legislation at the beginning of the 100th Congress to correct this unsatisfactory situation.

So I yield the floor.

Mr. STENNIS. Mr. President, will the Senator yield to me for less than half a minute?

Mr. GLENN. Certainly.

Mr. STENNIS. I want to commend him and thank him too for a very fine presentation here. It is something he is familiar with and worked on as have some other members of the committee. I think the Senator is foretelling the future. We must do these things. I commend the Senator very highly.

Mr. GLENN. I thank the distinguished Senator from Mississippi very much for his remarks.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. NUNN. Mr. President, I commend the Senator from Ohio for his outstanding work on this bill. He has done a splendid job. He spends an extraordinary amount of time on national defense issues. He is our ranking Democrat on our Manpower Subcommittee. He gets involved in all realms of the defense authorization bill and his expertise in foreign policy and his military experience have been invaluable to our committee.

I want to commend also the Senator from Ohio for his leadership.

I might say the Senator from Michigan has done an outstanding job on this bill and one of our most valued Members. We are grateful for his tremendous leadership, particularly in the procurement area. That was one of the most difficult areas we had this year. The Senator from Michigan as well as the Senator from Indiana have done a marvelous job of working out very, very thorny and controversial details there. So I commend both the Senator from Michigan and the Senator from Indiana for their great work on this bill.

Mr. President, I am pleased to join my colleague, the distinguished chairman of the Armed Services Committee, Senator GOLDWATER, in bringing the conference report on S. 2638, the Defense Authorization Act for fiscal year 1987, to the floor.

There were times during the last month when I doubted that we would ever reach a conference agreement on this bill. There were approximately 2,000 differences between the House and Senate bills which the conferees had to resolve—1,600 dollar or funding issues and another 400 differences in language. There were several major areas—such as arms control policy and defense acquisition policy—where there were deep and fundamental differences between the House and Senate bills. This has been an extremely difficult conference with very intense negotiations, certainly more so than any I have seen since I have been in the Senate.

Frankly, Mr. President, it is imperative that the first order of business next year be major changes in the way Congress provides oversight for our national security. The President has signed into law the sweeping changes in the organization of the Pentagon in the Goldwater-Nichols bill. Chairman GOLDWATER and I said at the outset that DOD reorganization without parallel major changes in congressional procedures would be incomplete.

This conference is just another example—the most recent example—of why Congress has to get its act together and its house in order.

We cannot continue the duplicative, redundant and thrice yearly debate on DOD programs. We cannot repeat the situation this year when the Senate Armed Services members were essentially conferring with House Members who did not have an institutional stake in finalizing our bill.

I must say on the Senate side that we have to do something about germaneness. I am not suggesting a rule change at this stage. But I do believe if the defense authorization bill each year becomes the dumping ground for every other piece of legislation that has not found a home we just will not ever get through. The Senate is reinforcing the worst tenets of the House because every time we put a nongermane amendment they appoint outside conferees. Every time they appoint outside conferees we have a situation where we reach an impasse. The combination of the two is lethal to the authorization process.

Mr. President, it was in a spirit of compromise and cooperation on which we finally prevailed to pass this conference report in the conference itself. I hope it will be approved here this afternoon. This is a tribute to the leadership of Chairman GOLDWATER of our committee and Chairman ASPIN and Congressman DICKINSON of the House Armed Services Committee.

I must also pay particular tribute to the Senator from Virginia for leading the Senate team in the arms control negotiations as well as many other negotiations because without his outstanding leadership we could not be here with this product today.

Also I have already mentioned the Senator from Michigan, Senator LEVIN, and Senator QUAYLE from Indiana. I also want to pay tribute to Senator COHEN from Maine. Senator COHEN has been one of our most valuable Members. He is an outstanding student of the overall defense posture of our Nation, the challenges we face in the world, and also an outstanding student of arms control issues. So I pay particular tribute to him.

If anyone who has ever been in a conference recognizes that the only way one resolves profound differences is when Members on both sides of the conference have a stake in getting the bill passed. What we have had this year, and we have had in the past, but this year has been the most intense—we have had a number of outside conferees who had a stake in only one provision of the bill. But they could veto the whole conference by holding up that one provision. That means you just cannot get the bill through. That means an authorization process itself in my view which will be impossible to complete in the future if we continue to have this done on the House side.

As the 99th Congress comes to a close, I want to point out that this has been one of the most productive years for the Armed Services Committee since I came to the Senate.

This is the fourth major piece of legislation that the Armed Services Committee has brought before the Senate this year. The President has already signed into law the Military Retirement Reform Act of 1986, which was included as a separate title in the fiscal year 1986 Supplemental Defense Authorization Act.

The Supplemental Act was made necessary in part by many of these frustrations that I have alluded to in this statement this afternoon.

In the last 2 weeks, the President signed the landmark Goldwater-Nichols Department of Defense Reorganization Act of 1986.

I am prone to say here this afternoon that I would like for our colleagues to recognize that has now become law. It became a product of consensus before it was over, although it was one of the most controversial pieces of legislation that we have passed through this body concerning defense in the last 40 years. But the product of consensus meant that when it finally was signed into law nobody knew it. Our friends in the news media, rightly so I am sure, report mainly items that are in controversy. This item was not in controversy when

it was signed by the President but it is the most sweeping reform of the Defense Department we have had since the Defense Department was created in the late forties. Again I want to pay tribute to Senator GOLDWATER for his outstanding work in this regard as well as Congressman NICHOLS.

This conference report on the fiscal year 1987 Defense Authorization Act is the final major piece of legislation produced by the Armed Services Committee this year.

Mr. President, the substantial legislative achievements of the Armed Services Committee this year are due in large part to the outstanding leadership of our chairman. The Senate and the country are fortunate to have a chairman of the Armed Services Committee as experienced, as knowledgeable, and as committed to a strong national defense as is Senator GOLDWATER. It has been a privilege and honor to serve as the ranking member of the Armed Services Committee under Chairman GOLDWATER's leadership during this Congress. His firsthand knowledge of just about every military system, his insight and his wisdom are invaluable and irreplaceable.

His retirement means that the Senate is losing one of the true giants of this body.

Mr. President, Chairman GOLDWATER has outlined the details of the conference agreement, and I will not repeat what he has said. I would just like to highlight the resolution of what I consider some of the more important issues before the conference which will have a major policy impact.

I will just ask again that our colleagues refer to some of the statements in the RECORD on this legislation because it is, as the Senator from Mississippi has already observed, enormously important. It has a tremendous number of legislative initiatives as well as funding, so I commend this bill to careful study as Congress concludes.

Mr. President, I want to also pay tribute to Jim McGovern, the staff director for the majority.

□ 1650

He is leaving us now after this session of Congress and going over to greener fields—at least he thinks so—in the executive branch. He has done a tremendous job for our committee. He goes with our best wishes. I think that is spoken for both sides of the aisle.

I also thank my right arm here, Arnold Punaro, who has worked night after night, day after day, and done a tremendous job for us.

I also want to pay tribute to our senior Senator from Mississippi [Mr. STENNIS], who is on the floor. He has been our link to the chairman in the past years. He has kept our process going. All these frustrations and redundancies between the committees and all the problems we have would have been insurmountable if it were not for the guidance, the patience, the wisdom, and the experience of the Senator from Mississippi. We tip our hats to him as we have so often in the past.

NATIONAL DEFENSE BUDGET SUMMARY

Mr. President, returning to my explanation.

The total amount authorized for defense appropriations in this conference report is $216.9 billion. When the personnel levels authorized by the committee, as well as the remaining elements of the national defense function, are included, the conference report results in a total of $291.9 billion in budget authority for the national defense function in fiscal year 1987 unless the contingency reductions which I will discuss in a moment go into effect. This is very close to the $292.2 billion in national defense budget authority for fiscal year 1987 provided in the fiscal year 1987 budget resolution.

The outlay situation is different. When the Armed Services Committee first brought this bill to the floor in August, we pointed out that the committee just could not meet both the $292.2 billion budget authority and the $279.2 billion outlay figures for national defense. These targets meant we had to reduce the President's budget request by $28.0 billion in budget authority and $17.5 billion in outlays, which would have required us to get 63 cents in outlays out of every $1 of budget authority we cut.

This is totally unrealistic. We pointed out that to legimately meet the budget resolution outlay target, we would have had to cut much deeper in the faster-spending personnel and readiness accounts than we did, or we would have had to cut the overall national defense authority much lower than $292.2 billion.

We found ourselves in the same position in conference. The conferees found it impossible to legitimately meet both the budget authoriy and outlay targets for national defense in the fiscal year 1987 budget resolution without making disproportionate cuts in the personnel and operations and maintenance accounts.

There was a way for the conferees to ease the pain of hitting the budget resolution outlay target, and that was by using budget gimmicks. We did not choose that route.

There are a number of these gimmicks that have surfaced in recent months. Some of them have even been proposed and endorsed by the Defense Department. One gimmick would slip the military payday next September from the last day of the month to the first day of the next month, thereby slipping one military payday—and $2.9 billion in outlays—from fiscal year 1987 to fiscal year 1988. Another gimmick would reduce the level of monthly progress payments to defense contractors.

None of us in the conference liked these budget gimmicks. These gimmicks do not make any real contribution to deficit reduction; they just postpone legitimate spending from one fiscal year to another. Using these gimmicks also undermines our credibility with our colleagues in Congress and with the American people.

The conferees agreed at the start of the conference that we would try to hit the budget authority and outlay targets of the budget resolution honestly, without using any of these gimmicks.

We did not succeed, Mr. President. We hit the budget authority target in the budget resolution, but the overall outlay figure for national defense with our conference report is approximately $281.5 billion, or $2.3 billion above the $279.2 billion outlay target in the budget resolution.

Rather than make up this $2.3 billion in outlay reductions with budget gimmicks, the conferees adopted a contingency authorization. This contingency authorization would reduce the authorizations in the conference report by an amount necessary to hit the budget resolution outlay target only if the final fiscal year 1987 Defense Appropriations Act does not include a provision to delay the military payday by 1 day or to reduce progress payments for defense contractors.

Mr. President, we know that the final fiscal year 1987 Defense Appropriations Act will probably contain both of these provisions, and therefore this contingency will not go into effect. We are not trying to embarrass our colleagues on the Appropriations Committee because they used budget gimmicks and we didn't. The ratio of budget authority to outlay reductions required by the budget resolution put them in an impossible position. The reason our conferees included this contingency authorization reduction was to demonstrate to our colleagues and to the American people the types of reductions in defense programs that would be necessary to meet the $279.2 billion outlay target in the budget resolution honestly, with no gimmicks.

There are a number of ways we could have made the necessary reductions. The contingent reductions adopted by the conferees were allocated across all areas of the defense budget.

If the fiscal year 1987 Defense Appropriations Act does not include one of the budget gimmicks I mentioned above, the contingency in this conference report would:

Reduce the military pay rise from 3 percent on January 1 to 2 percent;

Reduce the authorization for procurement by $3.0 billion;

Reduce the authorization for RDT&E by $1.2 billion;

Reduce the authorization for O&M and Stock Funds by $1.6 billion;

Reduce the authorization for military construction and family housing by $166 million; and

Reduce the Department of Energy National Security Programs by $167 million.

Altogether, the contingency reduction would reduce the fiscal year 1987 defense budget authority authorized in the conference agreement by $6.6 billion in order to save the $2.3–2.9 billion in outlays necessary to hit the $279.2 billion outlay target in an honest, "no gimmick" fashion. This would mean a fiscal year 1987 national defense budget authority level of approximately $285.1 billion, which is below the fiscal year 1986 level of $286.1 billion.

Other than reducing the military pay raise from 3 percent to 2 percent, the contingency reductions are not program-specific. The reductions would simply be general reductions by title Procurement, R&D, O&M, Military Construction, and the Department of Energy programs.

The reductions required by this contingency would be very damaging to our national defense. In procurement, for example, the $3 billion reduction would require the following types of cuts: 1 Aegis cruiser; 1 Trident submarine; 12 F-15 fighters; 36 F-16 fighers; and 120 M1 tanks.

In R&D, we could cut $1300 million out of the ATB bomber; terminate the SRAM II missile, the advance tactical aircraft and advanced technology fighter; cut $200 million out of the SSN-21 new attack submarine; and $300 million out of SDI. However, there is already $1.7 billion of undistributed cuts in the R&D accounts in the final conference report, so these kinds of cuts would be painful on top of these undistributed reductions. I am giving these cuts as an example only. The list could be replaced by similar cuts.

In O&M, there would be larger reductions in depot maintenance programs. Equipment overhauls would be delayed, and operating tempos—flying hours, steaming hours, and field training—would be reduced.

The point of this contingent authorization is to demonstrate what many of us have been saying for several months: The budget authority and outlay targets for national defense in the fiscal year 1987 budget resolution were very unrealistic. We cannot go on adopting a budget authority target for national defense that satisfies most people, then cutting the outlay target far below what can realistically be achieved. By showing the types of cuts that are really and honestly necessary to reach the outlay target in fiscal year 1987, we hope to avoid this situation next year. All of the conferees expressed the hope that the budget resolution for fiscal year 1988 will have a more realistic combination of budget authority and outlay targets that does not force Congress to choose between disproportionate reductions in faster-spending personnel and readiness accounts and the use of budgetary gimmicks that make no meaningful contribution to deficit control.

ARMS CONTROL

By far the most controversial issues in the conference were in the area of arms control. Despite our many differences in this area, though, the discussions between the House and Senate conferees were guided by our mutual interest in establishing a strong bipartisan consensus on arms control prior to the President's meeting last weekend with General Secretary Gorbachev in Reykjavik. I know of no one—Democrat or Republican—who believed that our Nation's interests would have been well served if the President were to have met the leader of the Soviet Union against the backdrop of a sharp, divisive dispute back in Washington on the very issues that were at the heart of the summit agenda.

At another time, I will have more to say about the Reykjavik summit and its implications for national security and United States arms control policy. It is important to note, though, that however history judges the outcome of the summit—whether in retrospect it will be seen as a failure or as an important advance toward an improved United States/Soviet relationship—President Reagan was able to begin his meetings in Iceland with a strong impetus provided by the sound compromise on arms control issues which we struck here in Washington on Friday.

In the final package on arms control that emerged from our discussions, neither the House nor the Senate came away with a clear victory. I am sure that there are many Senators and many in the administration who believe we had to yield too much to the House. And I know there are many in the House who feel quite strongly that the House came away with too little. But that is the nature of conferences. Any compromise, by definition, means that both sides had to give.

Let me briefly outline the major elements of the arms control package.

First, the centerpiece of our discussions involved the nuclear testing issue. The problem we faced was that the President clearly would have vetoed the House's binding moratorium, yet the House insisted on more than just the Senate's nonbinding language. I believe that we were able to find a middle ground between these two positions which is consistent with the broad purposes of both Houses, protects our national security interests, and advances longstanding U.S. arms control objectives with respect to a comprehensive test ban.

As part of this overall arrangement, the President sent a letter, dated October 10, to Chairman GOLDWATER and Chairman ASPIN in which he made two significant pledges. First, he promised to request, as a first order of business next year, the advice and consent of the Senate to the ratification of the Threshold Test Ban and Peaceful Nuclear Explosions Treaties [TTBT/PNE]. The President indicated that if the Soviets will in the next few months agree to United States proposals for an improved set of verification procedures for these treaties, that understanding could be submitted as a protocol to the treaties which the Senate could consider during its ratification proceedings. If, however, the Soviets do not agree to these improved procedures, then the President will work with the Senate in drafting a reservation to the treaties dealing with verification.

Although the United States has been observing the 150 kiloton ceiling on nuclear tests established in these treaties, there are important provisions that have never been implemented since the treaties have not been ratified. For example, the PNE Treaty provides for onsite inspection of nuclear detonations at Soviet PNE sites.

Second, the President pledged that as soon as these two treaties enter into force, he will immediately propose new negotiations on further limits on nuclear testing, leading to a total ban. This program of step-by-step reductions in nuclear testing would proceed in parallel with our arms reduction efforts in Geneva.

Taken together, these two pledges represent a significant change in administration policy on nuclear testing—one which the President acted on in Reykjavik. From the administration's postsummit briefings, we have learned that the United States and the Soviet Union reached a tentative agreement on nuclear testing that included ratification of the TTBT/PNE Treaties with improved verification procedures, to be followed by new negotiations on a step-by-step approach to a total test ban. I regret that this potential agreement fell victim to the final disagreement over SDI, but I hope the Soviets will agree to delink nuclear testing from SDI and permit us to go forward with the sensible approach the two leaders agreed to in Reykjavik.

The other major elements of the arms control package include:

Nonbinding language urging the President to continue to observe the central numerical sublimits of the SALT II Treaty as long as the Soviet

Union continues to observe those same sublimits. This strong expression of the sense of Congress should be carefully considered by President Reagan in the weeks ahead.

For SDI, $3.53 billion—DOD and DOE combined—a figure which split the difference between the House and Senate levels in the authorization bills. This figure is a $1.8 billion reduction from the President's request but more than a 15-percent real increase over last year's SDI funding level.

For Midgetman, $1.2 billion, which will protect the option of going into full-scale engineering development in fiscal year 1987 if the Defense Department agrees later this year to stick with the 37,000-pound, one-warhead baseline design.

Full funding for the 155 millimeter binary chemical artillery shell and the deletion of the House-passed provision that would have blocked the removal of existing unitary stockpiles from Europe. The conferees also agreed to put the procurement of the Bigeye chemical bomb on hold for another year and to prohibit any final assembly of the bomb prior to October 1, 1988, though the establishment of the production facilities can go forward if the President certifies that production of Bigeye is in the national security interests of the United States and that all design, planning, and environmental requirements for the production facilities have been met.

The Senate conferees also reluctantly agreed to extend for another year the ban on testing the United States F-15 ASAT system against an object in space as long as the Soviet Union does not conduct a test of a dedicated ASAT system against an object in space. However, we agreed to provide $200 million for continued research and development of the F-15 ASAT system.

Mr. President, I commend all of the Members of the Senate and House who were involved in the difficult negotiations on these issues for the past month.

STRATEGIC PROGRAMS

In the major strategic programs, this conference agreement authorizes the Trident submarine requested in the fiscal year 1987 budget; keeps the Trident II SLBM development on track; provides full funding for the advanced cruise missile and the advanced technology bomber; and puts to rest all options for more than 100 B-1B's.

The conference agreement also keeps all of our options open on the third leg of the Triad, ICBM modernization. This area continues to be filled with controversy and strongly held views on all sides. The conferees agreed to keep open for 1 more year the option for the administration to identify a more survivable basing mode for additional MX missiles, as was implicit in last year's MX agreement.

At the same time, the conferees provided funds for the Air Force to vigorously pursue the small ICBM, or Midgetman missile should the upcoming DOD Program review support proceeding with a single-RV missile or less than 40,000 pounds on a hard mobile launcher. In sum, we have agreed to keep a number of options open on how best to modernize ICBM's, until the Defense Department completes various ongoing studies and reviews, and we have provided enough funds and enough flexibility to keep the Congress from being an inadvertent obstacle.

SDI AND THE BALANCED TECHNOLOGY INITIATIVE

The strategic defense initiative was also a central concern of the conferees. The Armed Services Committee's recommendation of $3.95 billion for SDI in fiscal year 1987 emerged from our committee with a margin of only a vote. That number survived two additional amendments on the Senate floor to seek lower numbers by a single vote each time. In conference, we faced a substantially lower House number, essentially 3 percent above last year's funding. Moreover, during our conference, our Senate appropriators marked their bill some $200 million below the Senate authorized level. Nonetheless, as I previously mentioned, we were still able to agree on a figure, $3.53 billion, which split the difference between the House and Senate levels in the authorization bills.

I am also very pleased that the conferees accepted the balanced technology initiative [BTI], which Senator COHEN and I sponsored during our committee markup. The BTI is an effort to get DOD to focus the same kind of broad-based, innovative technological research on the problems of conventional defense that has been developed in strategic defenses. It is an effort to redress the imbalances in R&D that have arisen as SDI has begun to consume an inordinate percentage of our military R&D dollars. Indeed, a recent Defense Science Board task force found that, in terms of armor and antiarmor capability, the United States was a full decade behind the Soviets, and falling farther behind on both armor and antiarmor. Yet next year's budget request just for the SDI was projected to be larger than the R&D budget for the entire Department of the Army.

The Senate endorsed a proposal made by Senator COHEN and me that transferred $453 million from SDI into the balanced technology initiative for research on how to "leapfrog" a variety of conventional warfare advantages that the Soviets now enjoy. Our colleagues in the House had similar concerns, although the focus of their conventional defense initiative [DCI] was somewhat nearer-term, and heavily focused on taking advantage of items being developed by our allies. I am pleased to report that the agreement encompasses all of the BTI funds that were in our bill, and also funds $162 million of the House's DCI. This will be an important first step in redressing our deteriorating conventional capabilities in NATO and elsewhere around the globe.

Finally, Members will recall that the report of our committee on SDI provided new guidance and direction to the SDI Program. Our language cited four important reasons for supporting a robust SDI Research Program: to better understand defense technologies to aid us in understanding Soviet capabilities in the strategic defense area; to examine near-term deployment options as a hedge against Soviet ABM breakout or a failure of current restraints on offensive force growth; to explore the technical feasibility of highly effective and survivable strategic defenses that are also cost-effective at the margin; and to continue leverage that this program has provided our arms control negotiators at Geneva.

Our committee's report language further directed that the major emphasis of the SDI henceforth should be focused on the development of options for enhancing the survivability of our retaliatory forces and command, control, and communication systems, rather than toward leakproof or astrodome-type population defenses, which, if feasible at all, are likely to be decades away. That language also suggested that, if we are to capitalize on the historic opportunities in arms control created in part by the SDI, we should be prepared to consider adjustments to the pace and scope of SDI if the Soviet Union agrees to significant, stable, and verifiable reductions in strategic offensive forces. I am pleased to report that the conferees have agreed to adopt the Senate's language on SDI in full.

CONVENTIONAL FORCES

In the area of conventional forces, I am afraid that the conference agreement continues the unfortunate and inefficient practice of stretching out the production rates of major weapons system. The conference report includes serious production rate stretchouts for AH-64 helicopters, M2 fighting vehicles, F/A-18, F-15, and F-16 fighter aircraft. These systems which were stretched out were the few systems that are being produced at relatively efficient rates, and the conferees decided to cut them back.

The conferees did not cut any of the systems that have extremely inefficient production rates because you cannot cut them back without driving unit costs up exorbitantly, and no one is prepared to terminate these pro-

grams. So we are forced to stretch out the efficient programs. This is one of the most serious problems we face in acquisition and we have postponed the solution again.

Even more disconcerting is the fact that all of the major new start programs—the light helicopter in the Army, the V-22 tiltrotor aircraft, advanced tactical aircraft, and SSN-21 new attack submarine in the Navy, and the C-17 transport and advanced technology fighter in the Air Force—were funded with only minor changes. The same year we cut 78 combat aircraft, aircraft that were requested because we cannot afford to buy that many, we start 6 major new programs.

Both the Pentagon and the Congress need to reverse our current practice of starting more programs than we can afford to buy efficiently and cutting back on already inefficient production lines to pay for these new starts.

OPERATIONS AND MAINTENANCE

In the important area of operations and maintenance, the conference agreement includes reductions of approximately $7.2 billion from the original fiscal year 1987 budget request of $85.7 billion.

This authorization level for operations and maintenance is $2.3 billion below the level in the Senate bill, and $3.0 billion below the level in the House bill. The conferees took the unusual step of authorizing a level below both bills only after it became clear that the pressures to meet the budget resolution outlay target would result in a final appropriated level for the operation and maintenance accounts that was well below the levels of either House or Senate authorization bill. In the face of this reality, the conferees agreed to authorize a level of funding for operations and maintenance by account that equalled the higher of the two levels recommended in the House and Senate versions of fiscal year 1987 Defense appropriations bill. The conference report also includes a provision authorizing higher levels of spending for readiness programs in these accounts, if appropriated.

For the past several years, Mr. President, Congress has done a good job of protecting the important readiness programs funded through the operations and maintenance accounts from the affects of budget cuts. I am not sure we can make that claim this year.

The authorization for operations and maintenance in this conference report represents zero real growth over the fiscal year 1986 level. Large amounts of new equipment purchased 3 to 4 years ago is starting to be delivered to the troops, with the result that the costs of operating and maintaining the existing force structure continues to grow. Approximately 80 percent of the operations and maintenance budget goes to meet the fixed costs of stationing and operating our forces. The discretionary and variable parts of the operations and maintenance accounts are largely composed of programs that make a direct contribution to readiness—flying hours, steaming time, depot maintenance and real property maintenance.

It is very probable that the level of operations and maintenance funding approved by the Congress will cut into some of these discretionary areas of the operations and maintenance budget, and readiness could suffer.

We will have to closely watch this area of the Defense budget in the coming year.

DEFENSE MANPOWER

In the area of Defense manpower, the conference report authorizes only half (6,850) of the requested 13,730 increase in active duty military strength. Most of this increase will go to the Navy to man new ships coming into the fleet.

Part-time strength for the Reserve components was increased by 43,021, or two-thirds of the original request, while full-time Reserve strengths were increased by only 4,000, or one-third of the 12,750 requested increase.

The conferees agreed to extend for 1 additional year the current test program which allows the Department of Defense to operate without an end strength on civilian personnel.

The conference report authorizes a 3-percent pay raise for military personnel effective January 1, 1987, which is consistent with the assumptions of the budget resolution. The conference report also includes legislative authority to enable the Defense Department to pursue alternatives to the current CHAMPUS System for providing health care to military beneficiaries.

Finally, the conferees agreed to a modification of a provision in the Senate bill which will reduce the size of the officer corps in the Department of Defense by 6 percent at the end of the next 3 fiscal years. This provision will help reverse the recent disproportionate and unjustified growth in the size of the military services' officer corps over the last 5 years.

DEFENSE ACQUISITION POLICY

Both the Senate and House bills contained a number of provisions in the area of Defense acquisition policy. Some of these were controversial and were very difficult to resolve.

Both bills contained provisions which would implement a number of recommendations by the President's Blue Ribbon Commission on Defense Management, the so-called Packard Commission. Among these provisions was the delineation of duties of the newly established Under Secretary of Defense for Acquisition. The conferees also adopted the Senate provision providing a deputy for the new Under Secretary.

After much discussion and debate, the conferees agreed to the House provision requiring the Director of Operational Testing and Evaluation to continue to report directly to the Secretary of Defense. As my colleagues will recall, there was a very close vote on this issue on the Senate floor.

The conferees implemented a number of other Packard Commission recommendations, including the creation of Defense Enterprise Programs with more streamlined procedures allowing greater flexibility and authority for program managers; milestone authorization procedures; requirements for greater use of off-the-shelf or "non-developmental" items; and greater use of prototyping when appropriate.

On the subject of post-employment activities of Department of Defense employees, or the "revolving door," the conferees agreed to a 2-year ban for those persons with a personal and substantial involvement in defense procurement with specific contractors.

Last year's bill included a "should cost" or "work measurement" provision which established a requirement that defense contractors record certain labor and material costs for contracts over $100,000. The conferees clarified the provision enacted last year by saying that DOD officials should have access to contractor records concerning labor costs and measurement standards in the form and manner that they are kept. The conferees went on to confirm that in no way should this provision cause any new data to be recorded and that Defense officials can get access only to information which contractors choose to record.

Finally, the House bill contained two provisions dealing with protection for contractor and military "whistle-blowers." The conferees adopted a provision which addressed the right of contractor whistleblowers to pursue grievances through the judicial process. However, in the absence of hearings on these issues, action on military whistleblowers was postponed. Many of the conferees felt adequate avenues of recourse for military members already exist, and they were also concerned about the effect of additional remedies on the unique structure of the military system.

In closing, Mr. President, I want to add a personal note of thanks to the Senator from Arizona for his service in this difficult conference. Senator GOLDWATER's knowledge and grasp of the entire range of issues affecting our national security have been an invaluable asset for our Committee, for the Senate, and for the Nation. The Senate and the Nation are indeed fortunate to have a man of his wisdom and experience serving as chairman of the Armed Services Committee.

I also want to thank all of the members of our committee for their diligent work in this conference and throughout the year in bringing us to the point of passing this conference report. I want to particularly note the outstanding leadership of Senator HART and Senator WARNER of the Strategic Subcommittee; of Senator KENNEDY and Chairman GOLDWATER on tactical issues; of Senator EXON and Senator COHEN on the Seapower and Force Projection Subcommittee; of Senator GLENN and Senator WILSON on the Manpower and Personnel Subcommittee; of Senator DIXON and Senator HUMPHREY of the Preparedness Subcommittee; and of Senator BINGAMAN and Senator THURMOND on the Military Construction Subcommittee. The leaders of our Defense Acquisition Subcommittee, Senator LEVIN and Senator QUAYLE, deserve a special commendation for their work in a very difficult and controversial area.

I also want to thank the staffs of both the House and the Senate Armed Services Committees for their untiring and professional efforts. Led by Kim Wincup and Steve Conver in the House and Jim McGovern and Arnold Punaro in the Senate, the staffs of the Armed Services Committee provide superb support year round. I particularly thank our Democratic staff, Bill Hoehn, Jeff Smith, David Lyles, John Hamre, Bob Bell, Patty Watson, Russell Miller, Colleen Getz, Kathy Bognovitz, Shelly Turner, Pamela Powell, and Monica Chavez for their work on this bill and throughout the year. I want to add a special note of thanks to Hugh Evans of the Senate Legislative Counsel and Bob Cover of the House for their support in writing the bill. Hugh and Bob have been doing this work for our committee as far back as I can remember and they do a superb and extremely professional job. And finally, Mr. President, I want to pay a special tribute to Mr. Jerry Strickler, our committee's printing and documents clerk, who will be retiring at year's end, Jerry has been with our committee over 10 years and is capping a long and dedicated career of Government service.

Mr. President, this conference report represents the culmination of a great deal of hard work by many Senators. I urge my colleagues to support it.

Mr. LEVIN. Mr. President, the defense authorization bill we will hopefully pass this afternoon is a special bill. It is BARRY GOLDWATER'S last defense authorization bill. Those words are hard to say, and even harder to accept. BARRY GOLDWATER has meant so much to this institution, to this country, and to the very fiber of its defense. His fairness and his toughness may well be unduplicatable, but they will always be remembered by this Senator and by a legion of admiring friends and colleagues. While this bill will no doubt be his last major legislative act, it is the Goldwater-Nichols Department of Defense Reorganization Act of 1986 which will no doubt be his most enduring legacy to this country's security.

Those of us who have worked the defense authorization bill over these past many weeks must view the presence of this bill on the floor today as a minor miracle. For this I am grateful. The authorization bill plays an integral and vital role in the direction and management of the Nation's security programs. We would have been remiss if we had failed to meet this obligation regardless of the extreme difficulty in coming to terms with the House.

The mere existence of this bill, however, may be its greatest virtue. The bill is unbalanced. We are buying too many weapons at below economical production rates. There is too much for procurement of new and questionable weapons systems. There is too much in research and development for star wars. There is much too little in our operations and sustainability accounts to keep our forces at the level of readiness necessary and desirable to meet our worldwide obligations. We are on the narrow edge in supporting these programs. Next year we will face this challenge again. Next year we will need different and better answers or we will face a critical readiness crisis.

The constraints placed on the authorizing committees by the Budget Committee in terms of budget and outlay authority were artificial and contradictory. The relationship between budget authority and outlays is complex. We need to work with the Budget Committee to develop a model for these relationships that can be used in the authorizing process. We need to clarify our relationships with the Appropriations Committee. The structural imbalances among these committees are serious.

Mr. President, before I speak at greater length on what I consider to be two most important aspects of the bill—changes in the procurement and acquisition processes and the compromise between the President and the Congress on nuclear testing—I want to note with satisfaction two minor provisions of the bill which have been adopted at my urging.

I was deeply concerned to learn this past April that warnings of the terrorist attack at the Berlin disco were not passed to the appropriate authorities by the most expeditious means. This bill directs the Secretary of Defense to insure that terrorist warnings are routed by the most expeditious means to the concerned commands.

I am troubled that despite their obvious military utility that there are no barriers or fortifications in central Germany to give some temporary protection against a sudden attack from the East. To clarify the reasons for the lack of barriers and fortifications, the Secretary of Defense has been directed to submit an explanation to the Congress next year. I look forward to his reply with anticipation.

I served as the ranking Democrat on the acquisition policy package of this bill and am pleased to have worked closely with my good friend from Indiana, DAN QUAYLE, the chairman of the Acquisition Policy Subcommittee on developing a reasonable compromise. We engaged in long and intense negotiations with the House on 50 separate items, and while it was indeed difficult at times, I think the final outcome is one we can all support.

I would like to take a minute to highlight some of the issues.

The first one is the section which establishes the duties and authorities of the Under Secretary of Defense for Acquisition, or the USDA. There were several hotly contested issues relative to the USDA, namely whether or not the Director of Operational Test and Evaluation should report to the USDA or to the Secretary of Defense as provided by current law; whether the USDA should have the authority to direct the Service Secretaries and to take precedence over the Service Secretaries in acquisition matters; whether the Inspector General's statutory role in audit policy should be preserved. The Conference was able to both maintain the Senate's view of the significant responsibility and authority of the USDA in acquisition matters while at the same time preserving the roles of the Director of Operational Test and Evaluation and the Inspector General in the acquisition process.

While the Senate receded to the House in allowing the Director of Operational Test and Evaluation to report directly to the Secretary of Defense, the conferees agreed that the reports of the Director should be sent directly to the USDA and that the Director would serve as the principal adviser to the USDA on matters of operational test and evaluation. I do not think anyone doubts the necessity of having a close working relationship between the USDA and the Director of Operational Test and Evaluation. The sharing of information between the two offices is critical to any analysis of the future of a weapon system program. However, the conferees agreed to retain the right of the Director to report directly to the Secretary of Defense. The USDA may of course request the Director of OTE to conduct tests needed by the USDA.

Mr. President, on the matter of the authority of the USDA to direct the Service Secretaries on acquisition matters, the conferees faced this question again and again, but repeatedly came down on the side of giving the authority to the USDA. The repeated discussions of this issue and the consequent

decisions to abide by the Senate language demonstrate the congressional resolve in giving the USDA the authority to do the job. And what is that authority? No one expects the USDA to participate in the execution of acquisition policy on a daily basis, since the USDA's attention will necessarily usually be paid to the overall picture and not to the day-to-day implementation. But, where that day-to-day implementation is not in keeping with USDA policy or directives, in the opinion of the USDA, then there is no question but that the USDA has the authority to direct the Service Secretaries to take a procurement action in line with the policy. This authority is critical, Mr. President, in making this USDA more than the so-called acquisition executives of the past. We are counting on a lot from the USDA; we do not want business as usual. The chairman of our committee, Senator GOLDWATER, has discussed at length, the instances in which he has seen needless duplication of major purchases by the three services, and it is my hope that the USDA, with this authority to direct the Service Secretaries, will finally be able to get a handle on the duplication and put a stop to it. If one helicopter can adequately perform the same function for each of the three services, then let's purchase one helicopter and not have three different helicopters for each of the three services. This is the authority we are giving to the USDA, and we hope he will not be reluctant to use it and that when he does, he will use it wisely. As the proponent of this language, I am gratified by its inclusion after much discussion and debate.

The conferees spent lengthy discussions on the section of the bill containing the House provision on the so-called revolving door. At the beginning, we were far apart—the House wanted to cover any Department of Defense employee at the GS–13 and O–4 level or higher who participated personally and substantially and in a decisionmaking way in a procurement function through contact with a contractor. The estimate of the number of persons who would be covered by such language was approximately 25,000. The Senate wanted to stay with the current law requiring recusal by Department of Defense employees from work on a contract involving a contractor with whom the employee has had any employment discussion. That provision was enacted into law last year, and the Senate believed that there had not been sufficient experience with it in order to fairly judge its effectiveness.

After considerable discussions and negotiations, as I mentioned earlier, Senator QUAYLE and I agreed to the value a bar on future employment might have for those Department of Defense employees who spend most of their time working on a contract involving one contractor or working at the site of one contractor's facility. The employment of these persons by the companies with whom they have worked so closely for a majority of their time readily creates an appearance of a conflict of interest whether or not one actually exists. And so, the conferees were able to draft language which would create a 2-year bar for these limited types of individuals.

Again, the bar pertains to those procurement employees who spend a majority of their time over the 2-year period preceding their termination with the Department of Defense at the site of a defense contractor or the majority of their time on a contract involving a major weapon system through contact with the contractor. This is expected to prohibit a covered individual from going to work with no more than one contractor. However, it is possible that where the individual has been working over the past 2 years on an equal basis with two contractors on the same weapons system that it would be impossible to distinguish which one involved a majority of the individual's time. In that case, it would be expected that the individual would be barred from working for either company.

The 2-year bar would also apply to the very high officials—Senior Executive Service and O–7 and above—who serve as the primary representative in the negotiation or settlement of a contract or unresolved claim in the amount of $10,000,000 or more. This provision was included to cover those situations where a senior Department of Defense official is called upon to reach a settlement or negotiate a contract. This would be an unusual case, where there is probably high visibility of the employee's involvement in the matter and with the contractor. Here, too, is the possibility of an appearance of a conflict of interest relative to a select number of persons which would be eliminated by the 2-year bar, and that is why the Senate conferees were able to support it.

In order to make this provision fair in its application, because it is so difficult to identify clearly just which situations are covered and which are not, the conferees agreed to establish a conclusive presumption on behalf of the departing employee—or a former employee who during the 2 years after his termination from the Department of Defense decided to work for a defense contractor—that employment with the subject contractor is permitted if the agency ethics officer has so determined in writing. We also agreed that it would be more fair to make any violation of this statute punishable by a civil fine instead of a criminal fine.

Finally, I want to mention a few words about the section in this bill which raises the threshold for notification of contact solicitations. The current threshold above which Federal agencies are required to publish notice in the Commerce Business Daily is $10,000. This bill would increase that to $25,000. I have been a long time supporter of public notice of Federal contract solicitations. I was able to get the notice requirement amended several years ago, through the Competition in Contracting Act and another piece of legislation, to require notification of even sole source contracts in order to encourage competition. And I know how important adequate notice is to the many small businesses who participate in the contract actions under $25,000.

However, I am also aware that notice in the Commerce Business Daily costs precious time, and can really tie the hands of the procuring officer when you're talking about a small purchase. Moreover, the $10,000 threshold for notification has not been changed in over 10 years to reflect the effects of inflation. I became convinced, therefore, that an increase in the threshold was appropriate, provided an alternative method of notification is required. The conferees agreed to mandate the posting of a notice for contract solicitations between $10,000 and $25,000 at the contracting facility and to provide such notice at least 10 days prior to closing. We also agreed to continue to require notice in the Commerce Business Daily of sole source contracts between $10,000 and $25,000. Lastly, the House provision also increased the threshold for the small business reserve—those contracts which are to be exclusively offered to small businesses—from $10,000 to $25,000, which I also support.

In sum, Mr. President, on this issue of contract solicitation notification, I think the conferees were able to reduce administrative burdens while keeping the value of notification for small businesses.

Mr. President, as I stated earlier, I think the acquisition portion of this bill is a good one. It clarifies existing law in many cases; in others it enhances the procurement system; and in others it makes important new contributions to greater efficiency and better management of the defense procurement budget.

Finally Mr. President, one provision in the Conference Report on the Defense Authorization bill needs to be clarified, so that there is a clear legislative history. The matter I refer to is the Minesweeper Hunter Program.

During the past 4 years the Navy has been working to overcome serious shortcomings in this Nation's mine countermeasures capabilities. Two new classes of ships—mine countermeasure ships and minesweeper hunter ships—were authorized for construction. Both classes of ships have had trou-

bles, but they are making great progress on the mine countermeasure ships.

The Minesweeper Hunter Program is another story. The Navy planned to build the new minesweeper using advanced composite materials. The first ship failed critical shock tests, which is unacceptable for minesweepers, obviously. The Navy decided to terminate the program. Rather than start from scratch by designing a new ship, the Navy decided to shorten the acquisition process by procuring a foreign-designed minesweeper.

The Senate passed authorization bill contained a provision (sec. 102(e)) at the Navy's request that would authorize the Secretary of the Navy to procure from one or more allied foreign countries a lead minesweeper hunter ship. Follow on ships of the same design were required to be built in the United States, which is consistent with current law.

During floor consideration of the authorization bill, I sponsored an amendment which modified the committee-reported bill. My amendment, which was cosponsored by Senator KASTEN, prohibited the Secretary of the Navy from proceeding until he certified that no U.S. shipbuilder has the demonstrated capability to meet the requirement to build the new design ships in a timely fashion.

During the intervening months the Navy changed its acquisition strategy. Where originally they intended to have the first ship built in a foreign shipyard, they now intend to have the lead ship built in the United States.

The conference report notes that the Senate receded from the original provision on minesweepers. This means that the Navy must conform with existing law, and build the lead ship and all follow on ships in the United States. It also means that there must be competition for those ships among competing U.S. shipbuilders.

MILITARY DEPENDENTS PROTECTION PROVISION

Mr. BRADLEY. Mr. President, title IV of the National Defense Authorization Act of 1987 contains a measure to assist military dependents that I introduced last March. I thank my colleagues, Senator GLENN and Senator WILSON, who introduced this bill with me and who have worked to insure its inclusion as part of this bill.

This legislation remedies serious problems experienced by dependents of military members who have been discharged under less than honorable conditions, with special consideration for those dependents who additionally have suffered abuse at the hands of the military member.

This issue came to my attention when I tried to help one of my constituents, a military wife, whose husband had sexually abused their children. When she reported the sexual abuse through appropriate military channels, court martial proceedings were initiated. She then discovered that after many years in the service with her husband, she and her children were going to lose all benefits, including those that would help them cope with the immediate crisis of family violence. In addition they would have to immediately vacate their military housing. She felt that she had no choice but to plead for leniency for her husband. Despite the fact that he had sexually abused their children, his punishment would not improve conditions for his children, but would cause them further difficulties.

The most immediate problem for dependents of a military member discharged under less than honorable conditions is that these families must vacate military housing, but are not entitled to movement of their household goods. Currently, a sympathetic base commander may allow the family to remain in military housing a bit longer than permitted, or the Red Cross may step in with assistance. Since military dependents frequently relocate with the military member, they deserve the security that if their spouse or parent violates the law, they will not be abandoned in a place far from their original home and their support networks. This legislation will give the Secretaries of the service branches discretion to ensure that such families are able to move back to their homes, where they can resume their lives. In the special circumstance of family violence, the service Secretaries may authorize a move other than to the home of record if it is in the best interests of the family.

Mr. President, dependents who have been physically or sexually abused by a member of the military are in further jeopardy. Many choose to endure the abuse rather than report it and face, not only the shame of being victimized, but also the loss of benefits critical to cope with this crisis. Loss of the breadwinner is a major disincentive in the civilian population that frequently deters mothers from reporting spousal abuse as well as abuse of their dependent children. Military dependents are even more vulnerable. Military families are isolated from kin and frequently without the longer term friendships and supports that families outside of the military can establish in their communities. Frequent moves, over which they have no control, leaves the military spouses with few opportunities to develop their own careers and independent economic security.

Mr. President, the military has made great strides in recent years to address the problems of child and spousal abuse. Victims of family violence must not be allowed to fall through the cracks of both military and civilian communities when the military member is discharged under less than honorable circumstances. In addition to loss of income and moving benefits, these victimized dependents currently are denied access to necessary medical treatment. Research and clinical evidence on family violence shows that victims need psychiatric counseling. These families need, at the very least, to have their medical needs attended to for a transitory period until they can reestablish themselves in the civilian community. Physically and sexually abused children can be helped, but only if they are provided with appropriate intervention. Without help, the abused children of today are more likely to become the abusive parents of tomorrow. This legislation gives the Secretaries of the military departments discretionary authority to provide dependents who have suffered intrafamilial physical and sexual abuse up to a year of care in a military medical facility or under CHAMPUS.

When I was first made aware of this problem, it seemed impossible that we would allow military families to be punished and abandoned by our Government. While this is current law, it doesn't have to be. If the military member has behaved badly, and has been separated from the service as a result, it is not fair to jeopardize the future of innocent family members. This legislation makes help possible.

Mr. President, this legislation would assure family members who have made a commitment to accompany and support our military forces that they will not be abandoned by our Government. I thank the Subcommittee on Manpower and Personnel for including this important provision in the 1987 National Defense Authorization Act.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, the conference report that we are considering today is the result of 9 months of work by the Senate Armed Services Committee. While we are relieved that the task is complete, we should note that this is the last defense authorization bill that will be acted upon in the 30-year career of BARRY GOLDWATER.

As the chairman of the Armed Services Committee, Senator GOLDWATER has provided excellent leadership and direction in an era in which defense spending is declining rapidiy in real terms. Although I support passage of this conference report, I am concerned about the trends that we are setting in place.

Mr. President, this is the second consecutive year of negative real growth in the defense budget. Because Congress focuses on the defense budget in 1-year increments, we fail to under-

stand the long-term consequences of our actions.

The President requested $320 billion for defense, and we have reduced that amount by more than $28 billion. A downward trend in our readiness and sustainability is already evident. The comparability of military pay has dropped to about 12 percent behind the private sector, and this is in a period of declining manpower availability.

To protect major weapon systems procurement, we have not adequately funded the spare parts accounts for the last 2 years. The United States could very likely find itself in a defense posture in 1990 very similar to that of 1980 if the Congress continues to authorize and appropriate funds that are insufficient to meet our defense needs.

Mr. President, we began our review of the defense budget last January, and the committee members have put in many long hours to bring us here today. We held numerous hearings, markup sessions, and many conference meetings to produce that final product.

Mr. President, as chairman of the Subcommittee on Military Construction, let me summarize the conference action. The conferees authorized $8.4 billion for military construction and family housing for nearly 1,700 projects at 700 locations worldwide. The Defense Department had requested $10 billion. Although I believe a higher level of funding is warranted, the approved construction program will substantially improve our military bases, enhancing both our readiness posture and quality of life.

The conferees provided $425 million for new construction of 4,925 family quarters, $283 million to lease 42,573 family quarters and $165 million to improve existing family quarters. The conferees agreed to extend section 801, the Build to Lease Family Housing Program, for 2 years with authority to lease an additional 1,000 quarters for each military service. The conferees also extended section 802, the Rental Guarantee Family Housing Program, for 4 years with authority for each service to contract for an additional 600 quarters.

The conferees provided $53 million for the New Navy homeport at Staten Island, NY, and $44 million for the new homeport at Everett, WA; $180 million was included to continue work on the light infantry division at Fort Drum, NY and $73 million was authorized to initiate construction for the light infantry division at Fort Wainwright, AK. The conferees authorized $45 million in new construction at strategically important naval and air bases in the Philippines.

Mr. President, I would like to commend some of the members who worked very hard to bring about this conference report. Our committee chairman, BARRY GOLDWATER, provided his able leadership to keep us working together when it often looked like there could be no agreement. Senators JOHN WARNER and SAM NUNN negotiated the resolution of a very difficult group of arms control related issues. Senators DAN QUAYLE and CARL LEVIN solved the controversial defense acquisition provisions. Senator BILL COHEN provided his leadership in resolving issues designed to improve our special operations capabilities. Senator PHIL GRAMM rendered valuable assistance in negotiations concerning homeporting and other matters. Senator PETE WILSON rendered great assistance in many matters during the negotations. Senator JEFF BINGAMAN worked with me to resolve the many disagreements in the military construction account.

Mr. President, as I stated earlier, I am very concerned about the future of our defense capabilities, but I fully support this conference report, and I urge all of my colleagues to do so.

Mr. President, I feel that under the circumstances, we have a very good bill. It is not all we wanted but we feel that it will serve our country well.

Mr. QUAYLE and Mr. WILSON addressed the Chair.

The PRESIDNG OFFICER. The Senator from California.

Mr. WILSON. Mr. President, without losing the floor, I wish to engage my friend from Georgia in a colloquy if he is willing.

First let me concur in the customary eloquence with which he has visited the well-deserved praise on our colleagues. I particularly agree with the comments in praise of the distinguished and deeply beloved and admired chairman of our committee, BARRY GOLDWATER.

Let me then invite the attention of my friend from Georgia to what will unhappily be one of the chairman's last words in connection with the great work he has done so long and so well in defense of America. I refer to the press release which Chairman GOLDWATER issued on the culmination of the conference.

In the section of the press release relating to arms control and specifically that relating to SALT II, the statement is made by Chairman GOLDWATER: "This provision preserves the President's flexibility to take whatever action with respect to the SALT II Treaty that he judges to be in our national security interest."

It is my understanding that that reference to the nonbinding effect of the SALT II provision contained in the conference product is one with which the Senator from Georgia is in full concurrence.

Mr. NUNN. Mr. President, I say to my friend from California, first, that I appreciate the great work the Senator from California has done in the manpower arena. He is chairman of our Manpower Subcommittee. I think that he does a very commendable job there on an extremely difficult issue.

In answer to the Senator's question, I have not seen the chairman's press release, but it is my understanding from what the Senator from California said that the chairman is saying there is nothing binding in this language on SALT II; that the President of the United States still has the leeway to make his own choice about whether to comply or not to comply with those subceilings on SALT II.

Is that a fair statement of the Senator's statement?

Mr. WILSON. That is a correct statement, Mr. President. Let me read the provision. I was under the impression that the Senator from Georgia had seen the release. It says:

> The House agreed to drop its provision binding the United States to the numerical sublimits for the unratified and expired SALT II agreement. Instead, the conferees adopted nonbinding sense-of-the-Congress language urging the President to remain within these sublimits. This provision preserves the President's flexibility to take whatever action with regard to the SALT II Treaty that he judges to be in our national security interest.

Mr. NUNN. I say to my friend from California that generally is correct. The President has the flexibility, if he chooses to do so, to breach the subceilings on SALT II. I would add, though, that it would be in defiance of the sense of Congress as expressed in this bill and in this resolution. Because the clear sense of Congress, and I read this section quoted, "It is the sense of Congress that it is in the national security interest of the United States to continue voluntary compliance with the central numerical sublimits of the SALT II treaty as long as the Soviet Union complies with the sublimits."

□ 1700

Now, the way I would analyze it is that the President is not bound by this sense-of-the-Congress language. He can take what action be believes to be in our national security, but if he does breach those sublimits, he will be doing it in spite of the Congress strong feeling as expressed here that it is in the national security interest of the United States to comply with those sublimits. So that is the way I see it.

Mr. WILSON. I thank the Senator from Georgia.

Mr. President, the reason that I sought to establish by this colloquy the nonbinding effect of the language dealing with the SALT II provisions in the conference product is because it is of enormous importance there be a clear understanding that the President of the United States is not bound by that language.

Mr. President, the final outcome of this conference is a very mixed bless-

ing. As he has indicated, this was the most difficult conference within the memory of Chairman GOLDWATER. The distinguished ranking member, Senator NUNN, and many other conference participants have agreed. I think the final result of the conference makes clear why they feel as they do. It is because the final product of this conference is, to a far, far greater extent than in most conference efforts, a very mixed bag. There is much that is good in it and I join in commendation not only of the chairman but of the ranking member and of the senior Senator from Virginia, Mr. WARNER, who has done yeoman's service in negotiating for the Senate the arms control provisions of this conference in the face of a very, very difficult and dangerously unwise House position.

Mr. President, in the interest of time, I will confine my remarks to a brief criticism of what I think wrong with the final arms control decisions of the conference and then concentrate upon the fundamental issue that almost caused this conference to founder and did cause the President of the United States to threaten, publicly, a veto if certain provisions were adopted by the conference.

We might discuss how unwise it is to impose a total ban of ASAT testing. We might decry the inadequate funding of the Strategic Defense Initiative. At some point soon we must reject explicitly rather than impliedly, as others have done on this floor, what can only be characterized as usurpation by the House of Representatives of the responsibility of the President of the United States, assigned to him exclusively by the Constitution, for the conduct of foreign policy and specifically for the negotiation of treaties, including arms control treaties. That brings us back, Mr. President, to this conference's SALT II provision.

It is a matter of public record that the President threatened to veto language as proposed by the House of Representatives that would bind him to continued observance of the SALT II Treaty.

Yet the SALT II language from the House presumes to do just that—not by binding language as the House first insisted—but by a sense-of-the-Congress expression urging continued adherence to the numerical limits of the unratified and expired SALT II Treaty. I submit to you that any conference involves a great deal of bargaining and often everyone leaves the conference unhappy.

What is at stake in this is critical.

It is clear, as a matter of law, that the President is not legally bound by a sense-of-the-Congress expression. In my judgment, neither is he bound politically or morally. Some of us were at pains to express to the House negotiators, specifically through Senator WARNER, who carried that burden for us, that we would regard this as in effect expressing a sense of the House, because this body is simply not of the same mind as the House of Representatives.

There has been a very different course of history in the Senate. By the narrowest margin in committee by a vote of 10–9, language was passed which parallels the House sentiment, but a unanimous committee vote added to it Senator QUAYLE's clear statement that the United States should not continue to adhere to treaties which the Soviets have violated.

Very simply stated, Mr. President, the President of the United States in my view is under no obligation of any kind to deviate from his announced intention to make ALCM conversions which will exceed the limits imposed by the unratified and expired SALT II Treaty. The President himself made clear to the conferees before they acted that would not feel bound and that he did not intend to be bound in any way, and that if the Congress were to pass binding legislation, or, to put it accurately, legislation which would create a constitutional conflict by seeking to bind him legally, he would veto that legislation.

It is more than unfortunate that we have come to this pass. Perhaps we should have faced that constitutional conflict and had it resolved in a different way than by avoiding it through the device of a nonbinding conference expression. But when the President does, as he has announced he will, act to exceed the numeric limits of SALT II, it will not be in violation of the letter of the law.

And when the President does so, neither his act nor our support of his action will violate any obligation accepted by those members of this conference who have made clear our sharp and emphatic disagreement with the language expressed in this spectacularly presumptious and ill-advised sense-of-the-Congress resolution.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Maine.

Mr. COHEN. Mr. President, based upon the recent remarks of the Senator from California, I think you can probably get at least a small glimpse of the kind of diversity of opinion that prevailed during the course of the debates not only here on the floor of the Senate but also in the House and in the House-Senate conference committee. There are those who did not support the SALT II Treaty but nonetheless feel it is not in our interest to exceed the central numerical limitations but abide by those provisions of the unratified treaty, which make sense for us from a military point of view, from an economic point of view, and certainly from a policy point of view.

So I do not think anyone should be under the impression that we have given the green light to the President of the United States to go ahead and exceed the limitation contained in that particular agreement. In fact, it is just the contrary. I think both the House and the Senate have passed a sense-of-the Congress resolution urging the President to abide by those limitations while not binding him to that. So I do not think that we should construe this as giving the President the green light to go ahead and put all the ALCM's on the bombers, to breach those limits and give the Soviets some excuse to exceed them well beyond our capacity to match it.

Mr. President, I would like to draw attention to the legislation contained in the authorization bill to enhance the capabilities of the United States to combat terrorism and other forms of unconventional warfare.

At the present time, U.S. special operations forces are underfunded and scattered among the services. There are serious problems in the way we are organized to conduct the planning of special operations and the necessary personnel and equipment. The United States also lacks the necessary coordination among different Government organizations to implement a coherent strategy for combating unconventional warfare.

The legislation we are passing today will not solve all the ills. We must, however, go to the root of the problem and revamp the organization on which our special operations forces are built.

This legislation establishes a joint military organization for special operations forces, creates a structure within the National Security Council to coordinate planning for low-intensity conflict, and establishes an office in the Department of Defense, headed by a high-level official, to ensure that funding needs and policy considerations related to low-intensity warfare are factored into U.S. planning. Together, the provisions of this legislation should:

Provide central direction and close civilian oversight for low-intensity conflict activities.

Provide a diversity of views to civilian decisionmakers concerning possible military responses to low-intensity conflict threats.

Improve interagency planning and coordination for low-intensity conflict; and

Enhance U.S. capabilities for conducting special operations.

I would like to thank Senators NUNN, RUDMAN, DURENBERGER, STEVENS, and CHILES, for their efforts in behalf of this legislation. Their support was critical in helping to overcome unending Pentagon resistance to necessary reforms.

Mr. President, I simply point out that in this bill we have for the first time tried to take some major steps to address the needs of conducting special operations which currently lack the necessary personnel and equipment and doctrine and indeed advocacy within the Pentagon itself.

I would also like to praise the efforts of Senator NUNN. As I indicated in an earlier statement, I feel the bill that has been signed as the Goldwater-Nichols reorganization bill should be the Goldwater-Nichols-Nunn reorganzation bill because of his skills that were so instrumental in bringing that to fruition.

Finally, a couple of words about the Senator from Arizona. As has been said on the floor several times now, this is BARRY GOLDWATER'S last appearance on the Senate floor in bringing to his colleagues a conference report. Those of us who are present witnessed a typical BARRY GOLDWATER performance: his speech was short, it was delivered with a good deal of energy and honor and honesty, with just a touch of anger, a touch of anger about the drift toward reducing our defenses in the fact of a growing threat. I could not help but think, as he was speaking and some of that old fire was coming through, of what was said about Harry Truman at one point. They said "Give em hell, Harry." And Truman responded to his crowd of supporters, "I never give them hell; I just tell them the truth and they think it is hell."

I think that is basically what BARRY GOLDWATER has been doing for a long, long time now—telling the truth and some, unfortunately, feel he is always giving us hell.

□ 1710

There is also a familiar expression, that a pygmy standing on the shoulders of a giant will see further than the giant. Senator GOLDWATER has allowed me to stand on his shoulders and to gain the benefit of his experience and understanding of the complexities of military and intelligence issues. If I ever differ with him, it is perhaps because this pygmy can see a little further as a result of having stood on his broad shoulders.

I will conclude with a quotation that I think many in this Chamber could identify with, by William Butler Yeats, who wrote:

How many loved your moments of glad grace,
And loved your beauty, with love false or true,
But one man loved the pilgrim soul in you,
And loved the sorrows of your changing face.

Senator GOLDWATER has suffered a number of sorrows over the years, and perhaps none greater than the loss of his wife during the past year. But he sits here today and remains today a pioneer, an aviator, an explorer, a patriot, and a pilgrim soul who continues to have a fierce love affair with life.

Mr. WARNER. Mr. President, I, too, join those in expressing our praise and admiration for our chairman. The manner in which I would like to express my thoughts would be that as I look at the history of the Armed Services Committee of the U.S. Senate, we have been fortunate to have leadership unparalleled. We have here in the Chamber a distinguished former chairman of the Armed Services Committee, the Senator from Mississippi, Mr. STENNIS, followed by Mr. Jackson of Washington, then Mr. Tower of Texas. It is in that mold that we shall always remember and respect BARRY GOLDWATER, for he has carried on the tradition of the greats who have directed this committee.

I reserve one name for the last, that of Richard Russell, for today his spirit and leadership are embraced in our distinguished colleague, the ranking minority member, Mr. NUNN. I witnessed that in the past several days when, entrusted with certain responsibilities by all members of the committee, particularly the chairman, we were able together to work the will of the committee in resolving the many differences.

I also note the presence on the Senate floor of our distinguished colleague from Colorado, with whom I have had the privilege of serving on subcommittees dealing with research and development, and now he serves as the ranking minority member of the Strategic Subcommittee. We shall miss him. While I have not always shared the same philosophical approach, nevertheless his wisdom, his determination, and his ability to express his thoughts are hallmarks of a great man and one we will remember and miss.

Those of us serving on the committee have a very special fraternal feeling among ourselves, for this committee has really nonpartisan goals, and we achieve those goals through bipartian efforts. As we worked this conference, we tried carefully to take into consideration the desires of all Members, and I think we did as well as we could, under the leadership of our distinguished chairman, Mr. GOLDWATER.

Mr. President, I share the thoughts of all in expressing our belief that the wisdom of BARRY GOLDWATER remains with us as we look to the uncertain challenges of the future. We wish him the very best. We hope he will come back often to share with us not only his wisdom but also his sense of humor and his sternness and determination.

Mr. President, in the aftermath of last weekend's meeting in Iceland between President Reagan and Soviet General Secretary Gorbachev, there is likely to be an even greater interest—both in the public and in the Congress—in the President's Strategic Defense Initiative [SDI] Program.

As was clear in President Reagan's speech to the Nation last night, a great deal of progress was made on a wide range of arms control issues in Reykjavik. And while the President was unwilling to sacrifice essential elements of the SDI Program in exchange for the promise of reductions in Soviet strategic offensive forces, the business of negotiating deep reductions in nuclear weapons continues between United States and Soviet negotiators in Geneva. I share President Reagan's view that the SDI Program has been the driving force behind the Soviet willingness to discuss deep arms reductions, and that we should continue to vigorously pursue this important program.

As these events increase the level of interest in the SDI Program, there will be a great deal of discussion about the program's goals and objectives. I remain somewhat skeptical about the feasibility of strategic defense that will make nuclear weapons impotent and obsolete in the near future. However, the answer to this issue is one of the goals of the SDI Research Program. And while there has been a great deal of attention paid to this more ambitious vision of SDI, insufficient attention has been paid to the potential contribution to our security of more limited defensive options. It is important to note that these limited initial defensive options can and should be consistent with the development of more comprehensive defenses in the long term.

In this regard, I commend to the attention of my colleagues a recent article by Senator DAN QUAYLE that appeared in the Wall Street Journal on October 2, 1986. In this thoughtful article, my friend and colleague from Indiana discusses some of the possible military missions that SDI could address in the near term. These include defense against limited or third-party attacks, as well as theater defense against short-range ballistic missiles which threaten our allies in Europe, the Middle East, and Asia.

As a member of the Subcommittee on Strategic and Theater Nuclear Forces of the Senate Armed Services Committee, Senator QUAYLE has been a strong and effective advocate for the programs required to maintain our Nation's security. The SDI Program is at the top of his priority list. I might add that Senator QUAYLE was the driving force in the Senate behind the initiation of an anti-tactical ballistic missile [ATBM] system within the SDI Program this year. I believe that an ATBM system is an excellent example of how the SDI Program can make positive contributions to our security and that of our allies in the near term.

I ask unanimous consent that the text of his article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BEGIN TO DEPLOY INCREMENTAL SDI WHERE POSSIBLE

(By Dan Quayle)

The Strategic Defense Initiative faces a number of threats. The Soviets want to negotiate it out of existence. The Hill wants to slash its budget, and the President wants to bargain with it in the coming Soviet Summit.

None of these threats, though, even begins to compare to the problems created by the popular assumption that a total attack is what SDI is supposed to counter. As long as a total attack (whether it be against cities or silos) is SDI's first or sole objective, SDI will always appear to be too expensive, too controversial, and militarily of too little value to bother with.

Changes in our approach will have to take place. If we are serious about promoting SDI, we must not only ask that it be deployed in the near-term, but also demand that it be focused on significant threats other than total attacks.

In specific, SDI should be directed to focus on the shorter range Soviet tactical ballistic missile threat now posed against our allies and troops abroad, the threat of a limited Soviet strike against our national command authority or some other valuable military asset, the Soviet anti-satellite weapon (ASAT) threat, and the Soviet threat to jam or confuse our surveilliance and communications systems in Europe or Asia.

Each of these threats is technically less stressful than any all-out attack against our military or population but militarily critical if our country is to remain safe. Each would require the development of SDI components critical to the working of a more complete defense scheme but none would necessarily violate the ABM Treaty. All of them should raise bipartisan concern.

First, the Soviets have deployed accurate tactical ballistic missiles (SS-21s, 22s and 23s) that pose a serious threat against our allies and troops abroad. Although these missiles can carry either nuclear or conventional warheads, they are expected to become accurate enough by the late 1980s to knock out nearly all of NATO's key military assets with conventional warheads alone.

To answer this threat, development of an anti-tactical ballistic missile system is necessary. This system would not violate the ABM's Treaty because it could not destroy strategic missiles aimed against either the U.S. or the Soviet Union. But it could teach us a considerable amount about the interceptors, radars and other sensor systems that defenses against-strategic missiles would require.

Second, we need defenses now to defend against an accidental launch or a limited intentional strike designed to disrupt our national command authority. An attack against our national command authority is especially frightening since this could be done without physically harming a single American citizen. All that would be required to make our generals deaf, dumb and blind would be the detonation of only a handful of submarine-launched weapons at very high altitude over the U.S. A defense against such a limited attack could be begun with mid-course and terminal interceptors deployments under the ABM Treaty's 100-launcher limit. The third threat is Soviet ASATs. The Soviets can already threaten most of our key military satellites in low-earth orbit. By only upgrading their ASATs, the Soviets could soon threaten our satellites in higher orbits. These satellites are critical to our military, providing strategic and tactical warning, surveillance, communication, weather information, and the most sensitive military intelligence.

Yet, against Soviet ASATs we still lack the satellite surveillance and tracking capabilities necessary just to track a possible attack. Two key systems designated to provide such surveillance from space are being developed as the critical eyes for SDI—the Boost Surveillance and Tracking System and the Space Surveillance and Tracking System. If we are at all serious about arms control in space or defending against ASATs, these efforts should be accelerated.

The last threat is the Soviet effort to defeat the conventional, deep-strike "smart" weapons we are developing for the emerging automated battlefield by denying us our ability to find and track targets on the battlefield and by jamming or disrupting our command and communications systems. To counter this, we don't need smarter weapons, but rather more sensitive, survivable and powerful communications, surveillance and tracking systems to ensure these weapons arrive on target and on time. These technologies include new, powerful SDI heat-seeking sensors, high resolution radars based on inexpensive satellites, new powerful battle management computer systems, non-jammable communication satellites and the like.

None of these threats, of course, is as dramatic as countering an all-out attack against our missile fields or cities but if they are not addressed, they can limit our ability to deter or prevail in either strategic or conventional war. More importantly, this approach to SDI is incremental. Certainly, if SDI cannot meet these threats, it is highly unlikely that it can counter more stressing total strategic attacks. On the other hand, if SDI can, it will be able to sustain popular support both in the near and long term.

Mr. QUAYLE. Mr. President, I, too, want to join in the accolades to my dear friend from Arizona, whom I have known for quite some time because I spent about 6 or 7 years of my life in Arizona.

As a matter of fact, one of the first political things I did was to pass out the GOLDWATER literature at the Arizona State Fair in 1958 for his overwhelming reelection.

I can say that being in the U.S. Senate today would not have been possible for me, personally, without BARRY GOLDWATER. Not the fact that he raised a lot of money for me, not the fact that I went in on the GOLDWATER coattails in 1980. But what BARRY GOLDWATER stood for and wrote and said in 1964 and thereafter was a tremendous inspiration for those of us in high school at that time. We were in high school, and we knew of BARRY GOLDWATER. We read about him. We went on to college and to law school, and some of us were fortunate enough to make it into elective office, to carry the GOLDWATER torch forward: His commitment to national security, his understanding of this country's problems, and particularly an understanding of the direction in which this country is heading. BARRY GOLDWATER is a man we have all learned to respect.

He is here today on his last bill, and I can only say that it is with a great deal of emotion that we pay our final tribute to Senator BARRY GOLDWATER for his outstanding public service. I know his commitment to his family; I know his commitment to the State of Arizona; but he always put the country ahead of everything. The country was No. 1, and the country always will be deeply indebted to the public service of BARRY GOLDWATER.

Having said that, Mr. President, it is with a bit of irony, unfortunately, that we have this budget before us, with the man who stood for the strongest national defense of anybody, somebody to whom I am deeply indebted. But we are seeing things change. We have had the strong GOLDWATER years; we have had his leadership on the Armed Services Committee; and we will certainly miss him.

BARRY GOLDWATER had a very good companion in SAM NUNN, and the two of them did the best they could under tremendous problems and situations that are confronting us in the budget.

Unfortunately, this is the second year in a row where defense spending is declining. Yet, you can see an increase in the threat. This was probably the most unique and most difficult conference we have had. It has been said by others, and I want to underscore that.

I hope we can come to some resolution with the House of Representatives on how we are going to have a conference. We simply cannot go on like this. They had over 70 conferees. Half were not even members of the Armed Services Committee. That made it almost impossible. As a matter of fact, if it had not been for BARRY GOLDWATER's leadership, I am sure we would not be here today. He and SAM NUNN and, particularly on the arms control issue, JOHN WARNER deserve an extraordinary amount of credit. He did yeoman service to bring about this compromise. This is a compromise. It is one with which I am not terribly satisfied, one that has been debated back and forth here.

I think the continuation for the second year of the ban on ASAT is a wrong decision. I think it is bad public policy. There is no doubt that the Soviet Union already has an operational ASAT capability and the United States does not.

□ 1720

I think continuing this ban in the spirit of compromise was wrong, but a compromise indeed.

As to the compromise language on the testing, I think we will see what happens down the road. The President, according to letters, is committed to sending up a couple of treaties with stipulations concerning verification on testing.

I think that will be one of the issues that we will be discussing quite intensively and not only in the Senate Armed Services Committee but also in the Senate Foreign Relations Committee, which has primary jurisdiction over this issue. How are we going to be able to verify these tests is something of extraordinary importance and what we can in fact do I think would go a long way in being perhaps a step forward.

The one that was perhaps the most controversial and the one still being debated on the floor today happened to deal with the SALT language. The SALT language that was put in there is a sense of the Congress that the President should abide by the unratified SALT II Treaty.

Mr. President, it is only a sense of the Congress. The President is perfectly free to do anything that he sees in the national interest concerning the SALT Treaty.

The SALT Treaty has been much debated. It was debated in the Chamber and has been debated for a number of years either directly on the floor or indirectly through speeches. It was never ratified, never ratified for very good reasons, and that is that it never had the support of the Senate to ratify it.

I dare say if we even brought the SALT II Treaty up today and called it up under procedure that would be available it probably would not have sufficient votes to be ratified today on its face. I do not believe anybody is calling for ratification. If that would resolve the issue, maybe we ought to bring the treaty up and see where it may be.

We may be beyond that because the President this last summer did, in fact, announce that he had gone the extra mile and fully intended not to have the limitations of the unratified SALT treaty that had not been ratified and that, in fact, he did not feel bound by that and has announced that he will go forward with the 131 ALCM carrier and the B-52 bomber sometime this year.

I fully anticipate the President doing that. He said that. He is a man of his word and certainly he is heading in that direction.

But I can remember when the President announced that decision that he was going to go ahead and not feel bound by this unratified treaty, there was a great hue and cry saying, boy, this is the end of the arms control process, where it is not simply not going to be able to negotiate with the Soviet Union if the President would do this and not go along with this unratified treaty, chaos was going to break out.

I dare say, Mr. President, that is certainly not the case. The case is that the arms control process is going forward. It went forward with a great deal of vigor.

The stumbling block at Reykjavik was not the SALT treaty. The stumbling block happened to be the strategic defense initiative.

To those who say this is somehow going to be injurious to the arms control process, I say the last 6 months speaks for itself and it is simply not the case nor do I think it is the case, and I think the President has every right to do that. He feels it is within the national security interests to go ahead with retaliatory forces and bomber forces, second-strike forces. He thinks he is going to improve our national security. He also feels that what one senses as far as getting real negotiations and agreement—if you are going to simply put a treaty around the United States that has not been ratified that perhaps the Soviets would like to see us comply with, but yet they do not comply with—a unilateral compliance is something we take seriously in the Senate.

Unfortunately, our House of Representatives does not take it very seriously. I was quite struck by their insistence on dropping an amendment I had adopted in the Senate Armed Services Committee on a unanimous vote, a strong bipartisan vote, that in essence said that it was the sense of the Senate that consistent with international law it is not in the national interest of the United States to continue compliance with any strategic arms agreement that the Soviet Union has clearly violated.

That is a rather straightforward simple statement that had unanimous support of the members of the Senate Armed Services Committee.

The Senate Armed Services Committee is a reflection of this entire body of the Senate, and I say had that been offered on the floor we would have had a similar vote—perhaps there would be a couple who would have not voted for it—but a very similar vote.

But the House of Representatives were adamant that this not be included in the final language. In other words, what they are saying is we did not want to have any language that said or made it incumbent upon the Soviet Union to comply with the treaties, and that was certainly what the intent of this amendment was that said you just simply cannot have unilateral compliance, that we have to have either mutual compliance or it simply is not going to be a contract and they simply cannot expect a treaty to be adhered to where you are going to have to have one country violate the essence and the ingredients and the elements of these treaties.

But the House of Representatives in negotiations that were in closed session—because of national security reasons we have always had Senate Armed Services conference in closed sessions—made sure that we could not have this language in the bill.

Well I would hope that once this comes to light that many in the House would see fit to take to the floor and say certainly we agree with the Quayle language that we ought to have compliance with these treaties; if you do not have compliance then in fact it would not be in our national interest to have only unilateral compliance. It is not that difficult a proposition.

But it evidently was a very difficult proposition for those who were negotiating for the House of Representatives because they could not allow this language in there.

I dare say if this would become public and it would be debated in the House of Representatives we would probably have a very similar result as we did in the U.S. Senate.

Mr. President, I think that as we look at this Senate Armed Services Committee bill and look at where we are going perhaps the point that we will be discussing today and will be discussing tomorrow and will be discussing certainly when we come back is where we go on the strategic defense initiative.

Events over the weekend have focused and highlighted SDI. There is no doubt that the debate is going to be more focused and I welcome that debate. I think it is a very important debate.

I have been one of those who has been encouraging the administration to come forward and be more specific on what they are going to do in SDI. I am one of those who believes there is probably ways that we could begin to have incremental deployment of SDI. You could have deployment within the ABM Treaty. You could see where we are there and then we are going to have to take a close examination of that treaty. Even within the treaty we can in fact have research and have testing and have development.

I think that needs to be spelled out very, very clearly of what we can do and what we should be doing in SDI. I believe that the administration is going to have to be far more specific on this. I think we are going to have to refocus and rethink what is going on about SDI. This now has captured the attention of America. This has the attention of the world.

This is the strategic defense initiative. What it stands for is going to have to be clearly defined and I hope that we will find strong bipartisan support for this.

But I do think that the administration, and as one who is as strong a supporter of the administration as perhaps anybody, I call upon them once again that we are going to have to clearly define what our focus is, clearly define are we talking about the long term, are we talking about the short term, what can we do in those years, 5 or 7 years or now between the years of zero and 10 years, what should we be doing in not only research, but what should we be doing in testing and development, what kind of system do we want to deploy. Are we only talking about deployment beyond the turn of the century? I say no, I do not think so.

I think we are going to be talking about deployment much earlier but we are going to have to have answers to those questions.

I and others are going to be asking those questions and looking forward to responses. We certainly know the importance of SDI to the Soviet Union. Make no mistake about it. They think it is important. They certainly went to Reykjavik to kill SDI. They did not get that.

So now they are trying to assess the blame on the President of the United States. That did not get more than about 28 or 48 hours of review in this country, but now that we sort things out we are finding out actual progress was made. The process is going on. Talks are going on in Geneva.

But we do know one thing, Mr. President, and that is that the Soviet Union places a strong importance on the strategic defense initiative.

Since they place a great deal of importance on it, I hope we will in fact take our time to figure out exactly what we want to do.

I quite agree with some of the people who have been critical of SDI that it has not been as clearly defined as it should be, that we need to focus and see where we are in fact going.

So this is just the beginning of that debate and one that I certainly look forward to with anticipation and hopefully will be able to come to a consensus, a consensus that we can have not only in discussions with the Soviet Union but a consensus we can have in discussion with our own constituents in the United States of America.

Finally, Mr. President, as the chairman of the Acquisition Subcommittee, I want to report that we have in fact not only compromised but we have in fact worked out an issue concerning the revolving door that will at least take this beyond the next year.

My comrade in arms, Senator LEVIN, has been very instrumental in working out with the House a number of negotiations and number of compromises.

It was not a terribly pleasant conference because we had again a number of conferees there that we were having to deal with and had to satisfy each and every one of them. Many of the conferees, though nice and very interesting to debate, discuss the issues, were not members of the Armed Services Committee. It was a very complicated process to a certain degree and one that we hope not to have to revisit it.

I hope we do not have to revisit it.

We have to wait and see what the House of Representatives does.

But the acquisition matters are about 50 items of disagreement, significant disagreement on where we are going to go in the area of procurement.

I think we made a major step forward in getting enterprise zones and implementing much of the Packard recommendation, implementing the under secretaries of acquisition that will be under control of the policy yet see the discussion of that policy be done on a decentralized basis and with our service secretary.

But the revolving door issue, which was back once again, to become our old friend, we have revisited each and every year.

□ 1730

We have resolved that. We have resolved it basically saying those people that work onsite and spend a majority of time with one contractor would be prohibited from going to work with that contractor. We also say that an employee that spends a majority of the time on a system dealing with just one contractor would be prohibited from going to work for that one contractor.

Third, we said that anybody that negotiates a settlement of a weapons system of over $10 million with a contractor is also prohibited from going to work for that contractor.

So I believe that we have done is to define the perception and the apperance of conflict of interest, the majority of time that one has to spend and if they do spend a majority of that time then they are going to be prohibited from going to work for that contractor.

Mr. President, in conclusion, I just want to say that this bill, like other bills that go to conference, is a compromise and that it is certainly the best we can do under very difficult circumstances.

Mr. DOLE. Mr. President, I will just take a minute or two. I wanted to indicate first of all that we are trying to negotiate some problems in the drug bill. We have a number of Senators meeting on that at this moment. So we would still like to complete action on that this evening.

This conference report is the result of great effort by the Senate conferees. They were determined to complete action on this very important legislation, which encompasses many high visibility issues. And considering that the cards were heavily stacked against them from the very start, our conferees have done a good job producing an acceptable final product.

The overall spending level of $292 billion is disappointing. It provides only a small increase over fiscal year 1986 spending, less than we should have to meet both the ever-expanding Soviet threat and our security responsibilities throughout the world. But it is probably the best that we can do this year. I hope—though without any great optimism—that we can do better next year funding our Nation's defense.

Arms control issues were probably the biggest challenge our conferees faced. It was clear that most of the House conferees were determined to enact their own arms control agenda, ignoring the fact that we have a President, elected by the people, who is given just that job by our Constitution. So the Senate conferees had to compromise, accepting an unfortunate restriction on Asat testing and underfunding the SDI Program, which has once again proven in Reykjavik to be the key to real nuclear arms reductions. But, on balance, they forged an acceptable compromise arms control package that permitted the President to face Gorbachev in Reykjavik with at least some strong cards to play.

In sum, this is not a perfect package—far from it. But it is worthy of our support. I will vote for it, and I encourage all my colleagues to vote for it, too.

Mr. President, I wish to associate myself with the remarks of Senators WILSON and QUAYLE with reference to trying to comply with the unratified SALT agreement that has never been before the Senate, never been called up. It has been reported out, but never called up. Some would think it was written in stone around this place. I hope the President understands that it is only a sense-of-the-Senate resolution.

I would like to take just a few moments to ask some questions of the distinguished chairman of the committee, Senator GOLDWATER. It is my understanding that the fiscal 1987 defense authorization conference report provides no authorization for the procurement of the Air Force T-46 trainer aircraft. Is that correct?

Mr. GOLDWATER. That is absolutely correct. We already have an airplane to fulfill that mission until a better one comes along, and we did not authorize the T-46 aircraft. In fact, the Air Force does not want it.

Mr. DOLE. My understanding is that the Air Force did not request procurement of the T-46, is that correct?

Mr. GOLDWATER. That is correct. And I just verified that about a half an hour ago in a telephone call to the Chief of the Air Force. He said, "We

don't want it. We don't want it. We don't want it." And yet we have people in this Congress playing unadulterated politics in an attempt to get an airplane that the Air Force does not want.

Mr. DOLE. Could I also ask what the specific intention of the authorization conference language is and was there an understanding between conferees regarding your compromise position being accepted by the appropriations conferees?

Mr. GOLDWATER. Well, this came up, naturally, in our conference because, let us face it, the T-46 is made in New York and New York has a lot of Representatives. They are all running for reelection, so they all want this airplane built regardless of the fact that the Air Force does not want it.

Now, we came to an agreement, though, that enabled us to get past this hurdle. No funds may be obligated or expended until the Secretary of the Air Force conducts a competition evaluating the cost and performance of the T-46, the existing T-37, and the modified T-37. Any other aircraft capable of meeting Air Force training requirements, such as the Navy T-34C or the T-45, would fit in there. And the competition shall include a fly-off between the candidate aircraft. The funds authorized and appropriated in 1986 for the T-46 aircraft are authorized to be appropriated for research and development for the purpose of conducting the competition.

Finally, no funds are authorized to be appropriated in fiscal year 1987 for the procurement of the T-46 aircraft.

Now, Mr. President, I know this is not called for, but I have flown the T-46. I have flown the T-37 many, many times. The T-46 is not a bad airplane, but that is not the question. The question that we cannot seem to get through the heads of people on our Appropriations Committee or the people on the House Appropriations Committee is the Chief of the Air Force, sitting over there in the Pentagon, does not want this airplane. In fact, he told me the other Chief that just retired said: "If the Congress buys that airplane for me, I'm going to put it in a junk pile out in Tucson, AZ."

We do not want to have that happen. I cannot understand it, except for purely political purposes, that it is made in New York and everybody in New York in the Congress wants to have the airplane purchased, even though the do not want it.

It would be a lot like us saying, "Well, let's build an aircraft carrier. The Navy does not want it, but let's build it and give it to them."

I cannot understand for the life of me how people in this Congress can get so hard up for politics that they allow themselves to be pushed into buying something that nobody wants.

Mr. DOLE. I agree with the distinguished chairman of the committee. But I understand the continuing resolution, notwithstanding everything that has been said, does provide funds in fiscal year 1987 for the procurement of the T-46 aircraft. Is it your understanding that the continuing resolution language is inconsistent with and undercuts the authorization conference report?

Mr. GOLDWATER. The continuing resolution language, as I understand it, now has language put in by our body, the Senate, and put in by the House to buy this airplane. It goes much past that. It would bail this manufacturer out.

I would like to report to my friend from Kansas, and I will speak on it probably tomorrow, that the manufacturer of this airplane cannot complete the contract that it was originally given. He is supposed to deliver 10 aircraft to the Air Force. He delivered one. All that was wrong with that, it had a cracked spar. Well, other little things happened that came along, and most aircraft have trouble when they are first brought out.

But he has only delivered two aircraft. Now, if the Air Force says to the manufacturer, "deliver 10," he will go bankrupt. He does not have the money.

But our Appropriations Committee and the House Appropriations Committee want to bail him out, buy up the contract, bail him out and not have any more competition. Just give him a contract to go on.

I think it is absolutely the stupidest thing I have ever heard in my 30 years in this body. I have never known an Appropriations Committee to buy something that nobody wants. I hope we can defeat it with an amendment at the proper time.

Mr. DOLE. I thank the distinguished chairman of the committee.

The only reason I asked was because I thought I heard and read correctly what the authorization committee did and I thought there was some reason for authorization committees. I thought they served some purpose. But, apparently, the Appropriations Committee, if they have the votes, they have the power to override anything that the authorization committee might do. And what they did in this case was direct the Air Force to recompute the T-46A production contracts. They also directed the Secretary of the Air Force to negotiate a reform contract.

Mr. GOLDWATER. That is right.

Mr. DOLE. And a lot of other things that I do not know that you even discussed in the authorization bill. And I though it should be brought to the attention of our colleagues. I hope that there will be an appropriate disposition of this provision in the CR when it comes to the floor tomorrow.

Mr. GOLDWATER. I might point out to my friend, the majority leader, we complained about this very bitterly last year. We are getting to the point, in my opinion, where you can do away with committees. The Appropriations Committee is all you need. They have a subcommittee on there for military purposes. They do not have the expertise. They only have one or two people on the committee.

We spend 9 months arguing about military affairs and they spend a couple of days. I begged them not to put this money in. And yet, by golly, they go ahead and do it.

I think we have to take a hand to that sometime. I do not think we should have two committees on this floor doing the same thing. And the authorization committee, the committee that is supposed to study and understand these things, said no. But the Appropriations Committee, probably at the urging of some politicians from New York, said yes. I think it is wrong.

Mr. DOLE. As I recall, we had a vote on this issue in the authorization bill and the vote was 79 to 14.

Mr. GOLDWATER. It was pretty good. And it is going to be pretty good again.

Mr. GORE addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. GORE. Mr. President, I wish to make a statement on the provisions relating to SALT II. But before I do so, I will yield briefly, without losing my right to the floor, to the senior Senator from Colorado.

Mr. HART. Mr. President, I thank the distinguished Senator from Tennessee. I appreciate his courtesy very much.

Mr. President, as the author of the language in the Senate authorization bill which has made its way to the floor in this conference report urging the President to continue his policy of abiding by the terms of SALT II, I want to thank all those, the chairman of the committee, the distinguished Senator from Mississippi, and the distinguished Senator from Georgia, for their efforts in protecting and defending the Senate position.

This language is dismissed or minimized as simply a sense-of-the Congress resolution. I would think, in a matter of this sort, the Congress does not speak simply. It speaks very loudly.

□ 1740

And it is because it is in the interest of the U.S. national security to continue to abide by those restrictions and limits in that treaty. It is the reason this President who is ostensibly against the treaty has continued to do so because it is in this country's interest. I hope this administration pays

very, very close attention to this language.

Mr. President, last week, the Senator from Colorado addressed the Senate for what he—and others, I am sure—hoped would be for the last time.

On the eve of the Iceland Summit, I appealed to the Senate and the Nation to recapture something fundamental we have lost these last 6 years.

To recapture our 40-year commitment to the control of nuclear weapons.

To remember that national strength can be expressed as forcefully at the negotiating table as in the laboratory, the battlefield or the situation room.

To work for a future freed from the haunting arsenals of destruction on Earth and to ensure their deadly companions do not occupy orbits in space.

I issued that appeal, quite frankly, out of a sense of frustration and concern. Frustration with a buildup in search of a strategy. Concern that the buildup would leave the country bankrupt and enmeshed in nuclear insecurity. But finally, I issued that appeal out of a sense of anger that for 6 years this administration would not engage in serious arms control.

For some time, Mr. President, patience has been running short in this Congress as Congressmen and Senators, Democrats and Republicans waited vainly for progress in arms control negotiations. Ultimately, many of us decided we could wait no longer. We sought enactment of unprecedented arms control language in the Defense Department authorization and appropriations bills.

Earlier this year, the Senate Armed Services Committee adopted language I introduced urging the President to comply with the SALT II Treaty and a provision to cap the MX missile deployment. If I might say so, this required some persuasion on the part of the Senator from Colorado—the committee's leadership, drawn as they are from the President's party, has supported his program.

The House of Representatives adopted even stronger language. They cut off funds from systems which, if built, would cause us to violate the SALT II limits. They denied the President's SDI funding request, providing only an inflation adjustment. They continued the 17-year ban on nerve gas production and the ban on ASAT tests. In the absence of Presidential leadership on arms control, many of us believed that Congress would have to show leadership instead. The nuclear arms control issue was too important to be left to arms control agnostics.

I joined House and Senate conferees in an attempt to write a good defense bill for fiscal year 1987. I strongly believed we could produce a bill that was good for national security and good for arms control. Toward the end of those discussions, it was announced the President would go to Iceland for what was advertised as a planning session. This session would lead to an adult summit between President Reagan and General Secretary Gorbachev.

Even though arms control was ostensibly not on the agenda for this weekend in Reykjavik, the administration, Democratic and Republican Members of the Congress, made a personal determination. They decided the very progressive measures contained in the defense legislation represented "handcuffs" on the President's negotiating position. They agreed these provisions would be diluted considerably in advance of the President's meeting with the Soviet leader.

The so-called compromise which emerged from that meeting was made in good faith—I know that. But with the events which transpired in Iceland, it is this Senator's opinion that compromise has fallen through. That compromise was made in exchange for assurances from the administration that it was at long last serious about arms control. But if the events in Iceland tell us anything, that claim is very much in doubt.

There is no subtle way to put this Mr. President, but I must say this. President Reagan turned down the most significant and comprehensive arms control agreement in the history of the nuclear era. On the negotiating table were deep reductions in offensive forces, the elimination of missiles in Europe, increased Soviet emigration, and regional conflicts. Extensive reductions were in the offing, and the complete elimination of nuclear missiles was on the horizon. After 6 years of drift in United States-Soviet relations, one weekend of good faith negotiations could have set this relationship back on course.

Nuclear peace could have been President Reagan's legacy—but he has chosen to be remembered for star wars instead. It was the President's inflexible attachment to the development of star wars that became the central obstacle to what might have been the most promising arms control agreement ever proposed.

Three years ago, when the President discovered the ongoing research on strategic defenses—classified research which I and many others supported for years—many of us issued a warning. The technology is speculative at best. The technology is going to be costly. An excessive reliance on what is still lines on the chalkboard, computer programs unwritten, and hardware not yet conceived would be dangerous. And it was not then—and it is not now—a substitute for deep reductions in offensive missiles.

But this President does not understand that. I commend former Secretary of Defense James Schlesinger for stating what I believe to be the case: By refusing to make the sweeping arms control agreement in Iceland, the President missed the opportunity of a generation.

So, this DOD authorization comes to the Senate stripped of most of the effective arms control provisions it could and should have had. There is now no new summit in the offing. SDI has become a central obstacle in United States-Soviet relations. It is a real tragedy.

But what of the future? On or about November 11, the President must decide whether he will violate the SALT II Treaty. If he equips the 131st B-25 bomber with an air-launched cruise missile, we will violate the SALT II Treaty. Such a decision would put out of reach for the foreseeable future. I urge the President not to violate SALT II.

What of the future of United States-Soviet relations? I urge both President Reagan and General Secretary Gorbachev to set a firm date for a summit.

What of the future for all of us. I said in my remarks last week, we must reelevate arms control progress to the very top of this Nation's agenda. There is a time imperative and a moral imperative. We have seen through the breakdown in Iceland the consequences of lost opportunities for arms control. We cannot repeat this mistake again. The consequences are too awful to contemplate.

I thank the distinguished Senator from Tennessee once again.

Mr. GORE. I am certainly honored to do so.

Mr. President, before addressing the SALT II language, I would like to associate myself with the remarks of others with regard to the distinguished service of the chairman of the committee, Senator GOLDWATER. And without belaboring the point, I want to say I hope very much that any who might read the CONGRESSIONAL RECORD for this day years from now would know full well that these sentiments even when expressed by one of the most junior Senators not even on the committee are very heartfelt, and are shared by every single Member of this body.

We are going to miss his hard work, wisdom, and guidance very much in this body. And all of us indeed wish him very well.

With respect to the ranking minority member, it is also redundant to keep on praising but that sentiment is also one unanimously shared in this body. I have learned a great deal from my colleague, the Senator from Georgia, during the brief 2 years I have been privileged to serve in this body. I look forward to working with him even more closely in the future.

I would also like to commend every single member of the committee for

the hard work which obviously went into this bill.

Mr. President, I would like to single out that portion of the bill which relates to the SALT II Treaty. The language included in the bill does not refer to the sentiments of only one House of Congress. It expresses the sense of this House of Congress as well as the other body that it is in the national security interests of the United States to continue voluntary compliance with the central numerical sublimits of the SALT II Treaty as long as the Soviet Union complies with such sublimits.

Mr. President, it goes into some detail. And on the following page specific reference is made to heavy bombers carrying air-launched cruise missiles. That central numerical sublimit which might be exceeded by the United States a few days after the election if the President carries through with his earlier statement of intent—that particular sublimit is specifically referenced in this bill—is an aggregate of more than 1,320 launchers described in paragraph 2 and heavy bombers equipped for air-launched cruise missiles capable of a range in excess of 600 kilometers.

Again, Mr. President, we state categorically our view. Speaking for the American people, both Houses of Congress, say it is in the national security interests of our country to continue complying with the numerical sublimits.

Mr. President, President Reagan will be hounded by some in his party who feel we ought to violate this treaty and exceed the numerical limits; to go ahead and do so in November or later this year. But, Mr. President, I feel very strongly that if President Reagan decides to follow through on that course of action it may very well be judged by history as the worst mistake of his Presidency. There are several reasons for that. I am not going to belabor all of them on this occasion.

Let me just single out one or two. The Soviet Union is in a far better position to take advantage of a SALT-free environment than are we. There are 309 SS-18 missiles deployed already with 10 warheads each. They could very quickly deploy an additional four warheads on each one of those SS-18's and given a little more time, many more than that on each one of those SS-18's.

That would not be in our national security interest. There are also other ways that the Soviet Union could quickly take advantage of a decision by our country to exceed the numerical limits and sublimits expressed in the SALT II treaty.

Mr. President, ironically, in the atmosphere created after the breakdown of discussions at Reykjavik, the Soviets might even feel they could escape world opprobrium by quickly proliferating the number of offensive missile warheads they have deployed. If in this post-Reykjavik atmosphere, we in the United States took it upon ourselves to exceed the central limits in SALT II, we would magnify the problem that we have in Western Europe and elsewhere in the world that we have already created by the sequence of events at Reykjavik.

We are witnessing new pressures on our allies right now, with the opponents of Chancellor Kohl in the Federal Republic and Prime Minister Thatcher in England being moved even further to the left, bringing the prospect of new strains on the NATO Alliance. And if we follow up Reykjavik with a unilateral decision to exceed the central limits in the SALT II treaty, we would shake the very foundations of NATO and cause for ourselves an extremely serious problem in terms of public opinion in Western Germany and elsewhere. Divisions here at home in our own country on this most important issue would be heightened at a time when we so desperately need to build a consensus that would allow the strengthening of our military might and our ability to protect our national security interests.

When President Reagan announced is intention to exceed these limits back in June, he stated that one of his criteria for reconsidering that tentative decision was whether or not the Soviet Union showed a desire to be more forthcoming in arms control negotiations. Can the President of the United States say after Reykjavik that the Soviet Union has not shown a desire to be more forthcoming in arms control negotiations?

I would submit, Mr. President, that one of President Reagan's key criteria has been met. Both President Reagan and General Secretary Gorbachev have both said that the tentative agreements arrived at in Reykjavik are all still on the table ready for continued negotiations.

Yes, they have been more forthcoming as in some respects have we. So that criterion has been met.

If, in the post-Reykjavik atmosphere——

Mr. WILSON. Will the Senator yield?

Mr. GORE. Yes; I will be glad to yield, but only briefly, if I may yield briefly without losing my right to the floor because I would like to complete my statement. Of course, I will yield at this point.

□ 1750

Mr. WILSON. I thank my friend from Tennessee for his graciousness.

I do not want to occupy much of his time, but I do want to ask a question. As I listened to him, and I know the depth of his conviction, I heard him state that one of the conditions that should require the President to continue an adherence to SALT II, the unratified and expired treaty, is more forthcoming behavior on the part of the Soviet Union, and then he made the observation that at Reykjavik the Soviets had indeed been more forthcoming than, in some respects, we had been.

Is the Senator aware, as I am certain indeed he must be, that it was the United States that advanced the proposal for the first 5 years, the elimination of half of all strategic offensive weapons, and in the second 5 years the elimination of all ballistic missiles, the remaining balance?

In agreement for that, we would agree to forego deployment for 10 years of those elements of the strategic defense initiative outside the treaty.

Is he aware that when that proposal was made by the United States, which I would characterize as being distinctly forthcoming and, in fact, a generous offer, that at the last minute it was General Secretary Gorbachev who attached a condition that he had to know, which was unacceptable, and that that condition was that there be laboratory research only with regard to SDI activity?

If the Senator is aware of that, would he not agree that what happened is that the Soviets had their bluff called and found a way to scuttle the deal by making a demand that they knew the United States simply could not accept? Research only relegates SDI to the ash heap.

Incidentally, the Soviets, clearly by their conduct at Reykjavik attached as great a significance to SDI as does the President, I suspect in no small measure because of their own longstanding and very vigorous activity with regard to developing their own ABM capability, one that exists and one—and I think we violate no intelligence or classified information in saying—one that exists and one that is capable of some breakout to a primitive system.

Mr. GORE. I appreciate my colleague's statement. I wish to return to the issue of SALT II. Before doing so, I will respond to my colleague, without engaging in a lengthy postmortem of Reykjavik.

My understanding of what happened is that tentative agreements were reached with regard to a number of issues, including intermediate nuclear forces or the so-called European missiles, and the issue of nuclear testing, but that when the subject of strategic weapons came up there was not a tentative agreement that was halted only by a last-minute dispute over SDI, because there is some confusion in the administration's presentation of exactly what was involved there.

The President and Secretary Shultz have said that we proposed, as the Senator from California points out, a

reduction of 50 percent in all strategic nuclear weapons. Counting rules favorable to us were agreed to by the Soviet Union. And in the second 5-year period, there would be a further reduction down to zero not of all nuclear weapons, but only of ballistic missiles.

Mr. WILSON. That is correct.

Mr. GORE. Under this proposal, we would keep 50 percent of our bombers, including Stealth. And 50 percent of the Soviet bomber fleet, I might add, would be a tiny fraction of that.

We would keep half of our air-launched cruise missiles and half of our sea-launched cruise missiles.

I asked the question, was that the tentative agreement on strategic weapons that was halted at the last minute with the arguments over the SDI?

"No," came the response in briefings from the administration. The Soviets had a different version and it was unclear what the tentative agreement on strategic weapons was.

I would submit that it is a matter of some import whether the world is going to have nuclear weapons or not.

Mr. NUNN. Will the Senator yield.

Mr. GORE. I would be delighted to yield.

Mr. NUNN. There is some confusion on this point, and I am hoping that the story being put out today that our offer was only ballistic missiles is an accurate story.

There is a difference between ballistic missiles and all strategic offensive arms. The latter term includes our present cruise missiles and other types of bomber-delivered weapons.

I would have to say, though, that in the briefing we had at the White House yesterday, we were specifically told that our offer was ballistic missiles going to zero, and the Soviets came back with strategic offensive arms. Then there was a compromise so that we put ballistic missiles and strategic offensive arms. That was all oral. It was certainly all tentative.

What that would have done would have taken the United States and the Soviet Union down to zero in strategic offensive arms and ballistic missiles by 1996. I would hope that that tentative oral agreement, if there was one, and we were told there was one, has been taken from the table. I do not believe that has been thought through by our Government. I do not believe the implications of that are clear, as far as NATO, as far as conventional weapons, as far as the severe imbalance there would be between the United States and the Soviet Union, unless we have some additional conventional weapons agreements that bring down the Soviet forces which are much greater.

Mr. WILSON. Will the Senator yield?

Mr. GORE. I have the floor. I will yield to the Senator from California in a moment. Let me comment on the statement made.

I, too, hope that the clarification from the White House coming out today is a truer picture of what happened.

I personally find it somewhat incredible that we have three or four different statements from the administration about a point as central in importance as whether or not the world is going to have nuclear weapons or not have nuclear weapons; whether or not the United States is going to have a significant advantage in the strategic balance after this proposed 10-year period or not.

This is not a minor matter. It is disturbing to me that our team would come back here to the United States and be all over the lot in describing what the tentative agreement was.

Yesterday, Secretary Shultz said on this very point, when I sought clarification, it was not clear, it was not clear.

I conclude from that, and I would like to continue—I will be glad to yield further briefly to the Senator from California but on this point I want to continue—on this point I conclude from that that there was not a mutually understood agreement on strategic weapons that was stopped at the last minute merely by the disagreement on SDI.

I await further clarification from the White House.

I want to go on with the rest of my speech but out of courtesy of course, Mr. President, I will again yield without losing my right to the floor to my colleague from California.

Mr. WILSON. I thank the Senator for his courtesy. I will try not to detain him and other Members very long.

I do think it is important on this precise point to point out that yesterday in the briefing which has been referred to, the briefing was conducted by Secretary Shultz, where all Senators attended, right off this Chamber in S-207, when asked for clarification on this point the Secretary of State produced from his pocket the document which he said had been read to the Soviets as part of that negotiation.

In that statement, as he read from that document, what was offered was the elimination of 50 percent of all strategic weapons in the first 5 years and in the second 5-year period the elimination of the remaining balance only of ballistic missiles, not of all strategic weapons as the Senator from Georgia has been concerned.

□ 1800

Second, in an on-the-record briefing yesterday to members of the Department of Defense arms expert staff, Secretary Perle made the comment that what happened—and he went through a long, detailed narrative of events that comprised the negotiating record there in Reykjavik—he said that what happened was that in the end, General Secretary Gorbachev made a demand. The demand was that strategic defense initiative activity on the part of the United States be restricted to, and the phrase that was used was "research within the four walls of the laboratory."

The other night, on a national talk show, Mr. Gerasimov, the Soviet spokesman, confirmed that that was true. He said, "What is keeping us apart is one word—'laboratory.'"

Mr. GORE. If my colleague will let me get back to this point——

Mr. WILSON. I am delighted to let the Senator get back to his point. He has been most generous with his time, but I think that point should be made.

Mr. GORE. I shall get back to my point but let me yield first to the Senator from Georgia.

Mr. NUNN. Mr. President, I was not talking about the Secretary of State yesterday afternoon. I was in and out of that briefing, as the Senator from California knows. The briefing I was referring to was the briefing of congressional leaders by the President and the Secretary of State.

I specifically raised the point after the point was made that our point was offensive ballistic missiles. The Soviets came back and said they wanted to include all strategic nuclear arms. We were told, the leadership, that the compromise was that both of those terms were going to be used. I specifically asked the question on that because I felt it had profound implications on the whole question of conventional defense.

The reason I say this is because this whole area has been briefed all over town and this whole area is being talked about. I normally do not even talk about things that go on in a closed meeting, whether in the Senate or the White House. But everything that has been said is on the public record.

Mr. President and the Secretary of State said they wanted it all out on the record. I think this is an important point because what I am hoping is that the stories that are being briefed today, where we never agreed to that, are correct. But what we were told specifically, and it was reiterated yesterday morning, was that both of those terms were being used. That is why I have been under the impression that we had orally and tentatively agreed that we were going to eliminate all strategic offensive arms by 1996.

I am hoping that has been corrected, that we did not agree to that orally or tentatively, but that even if we did, we shall withdraw that from the table because we have not thought through that. All of us would like to arrive at that point some day, but we would like

to arrive at it in a sensible way, conventional arms control, bring it down to NATO armies, tank forces, and so on. We do not want to have all of our efforts in strategic nuclear weapons come to the final fruition of making the world safe for a massive conventional war. I think everyone would agree with that.

Mr. WILSON. I would agree. I think that is why the Secretary of State produced a document from his pocket and read into the record, if you will, in that briefing of the Senators yesterday after the meeting that they had at the White House.

Mr. NUNN. Let me say this: The documents were on pieces of paper back and forth. But the agreement was after those documents supposedly—if there was an agreement—had been swapped back and forth and it was oral. So the documents will reflect both sides of the position, but the oral agreement, if there was one, was tentative.

Again, my finest hope is that it has been withdrawn from the table or will be and is not going to be binding on us.

Mr. GORE. Mr. President, I hope that the administration understands and remembers what it agreed to tentatively in Reykjavik. Maybe they ought to check the bathtub in Hofdi House to see if they left the memorial of understanding over there at 4 o'clock in the morning.

Let me address the other point with regard to Reykjavik on the ABM Treaty. The fact of the matter is that what our side proposed with regard to the ABM Treaty, as I understand it, was that we would continue research, development, and testing as permitted not by the treaty as both sides understood it clearly at the time it was ratified, but research, testing, and development as the administration's new interpretation of the treaty permits.

The administration earlier announced what many feel is a preposterous change in the meaning of the ABM Treaty. What we were proposing to the Soviets was a period of 10 years during which we would comply with this totally new interpretation of the treaty. What the Soviets were proposing was an even broader change in the language of the treaty. They were indeed, as I understand it, seeking an amendment to the ABM Treaty that would tightly restrict the kind of research that might be allowed.

The point is this: From the standpoint of each set of negotiators, the proposal of the other set of negotiators embodied a change in the ABM Treaty. Perhaps the old interpretation of the ABM Treaty might serve as a middle ground in an effort to find some area of compromise on this key point.

On this point, Mr. President, one of the things I do not understand at all about the developments at Reykjavik is, when they reached an impasse on the subject of what research, development, and testing might be permitted during the 10-year period, why did the negotiations and discussions stop there?

Why did President Reagan pick up his papers and walk out of the room at that point? We have known for more than 2 years that in this negotiation, where the rubber meets the road is the kind of research and development allowed under the ABM Treaty. Where do you draw the line between research on the one hand and development and testing on the other hand? We have known that is the key area in dispute.

Both sides made major concessions and changes in their positions and arrived at this impasse involving what research and development is permitted under the ABM Treaty. Why stop there? What not say, Let us get some sleep and come back tomorrow? Then let us see if there is some way to find an area where we can agree on research that allows the United States and the Soviet Union to prove out the concepts that need exploration in order to answer the key unanswered questions with regard to SDI and, at the same time, disallows development and testing of a kind that pushes the program so far down the road toward deployment that deployment becomes a virtual fait accompli and both nations have to anticipate imminent deployment at the conclusion of the 10-year period.

□ 1810

Why did we not explore that critical area?

So I would stand by my earlier characterization of what happened at Reykjavik and the relationship between arms control and SDI. The relationship between SALT II and SDI comes up in another context as well. General Abrahamson, the respected head of the SDI Program, has himself said that in order for SDI to be effective, if it ever is, it will require arms control. The extent to which offensive missiles are reduced by arms control will make any conceivable SDI Program more feasible than it would otherwise be.

So if we are moving toward the deployment of an SDI type system, why scrap the only existing limitation on the kind of weapons that SDI is intended to defend against? It is crazy, it is absolutely crazy, and I hope that the President of the United States takes the occasion of the Soviet Union's demonstrated forthcomingness at Reykjavik to reconsider his earlier announced intention to exceed these sublimits, and I hope that he understands very well that both the House and the Senate are saying in unmistakably clear terms, representing the American people, we believe it is in our national security interest to continue abiding by these SALT II limits.

Let us not be fooled in the post-Reykjavik atmosphere into believing the big public relations campaign that is being mounted now to convince everyone that this was a great success over there. Let us not fool ourselves on this point. Let us keep clearly in mind the fact that the post-Reykjavik atmosphere is one in which the United States has to proceed very carefully with respect to arms control.

Before the Reykjavik meeting, the House of Representatives had a provision in this bill requiring compliance with these sublimits. They were willing, as I understand what happened, to surrender that provision only hours before the meeting began in order to give the President the maximum ability to come home with a success, and with the clear anticipation that what happened at Reykjavik would give new momentum to a possible follow-on strategic agreement.

That is as if they were a trapeze artist leaving one swing in clear anticipation of another one on its way in the form of a follow-on strategic agreement. Now, that other swing is nowhere in sight, or at least we must recognize the clear possibility of a long hiatus before a follow-on strategic agreement is in place, and there is no net.

Do we not want to let go of the only existing strategic arms limitation that we have when it limits the Soviet Union far more than it limits us? I certainly hope not.

We have heard quiet statements from some in the administration that SALT II did not come up in Reykjavik, so maybe the Soviets are not that interested in it.

Why, of course, they want to keep their options open because, Mr. President, if the United States simultaneously says two things to the Soviet Union, if the United States says, first, "We are going to go full speed ahead with SDI even to the exclusion of arms control if necessary," and then we simultaneously say, "We are going to exceed the limits in the SALT II Treaty on offensive weapons," the combination of those two things results in a simple one word message to the Soviet Union—build, build, offensive missiles and deploy them, because the easiest, cheapest and most feasible way to overcome SDI, when and if it is deployed, is to proliferate the number of offensive weapons.

Here we have a treaty in place, and both sides are abiding by its central elements; a treaty that constrains the Soviet Union's ability to so respond. And yet, while we are going forward with SDI, we are going to tell them, "We are going to exceed that limit. Don't you worry about it; go ahead,

build up all those warheads on the SS-18's, make full use of your other advantages in throw-weight and offensive missiles."

It would be absolutely mindless for the United States to take that course of action. I hope the President of the United States takes full notice that both a majority of the House and Senate feel that way.

Mr. President, I appreciate the indulgence of my colleagues and I yield the floor.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I will take just one moment. I am not sure exactly what the Senator from Indiana said about the provision in this bill that was known as the Quayle amendment that has now been deleted. It is not part of the conference report, but I want to make sure that it is understood. In the original Senate Armed Services bill was a provision that was inserted in committee stating that "It is the sense of the Congress that consistent with international law it is not in the national interest of the United States to continue compliance with any strategic arms agreement that the Soviet Union has clearly violated."

That was an amendment which was originally proposed in the Armed Services Committee by the Senator from Indiana, with the words "consistent with international law" not in it. Those words were added by amendment in the committee and then that total paragraph, with those words, was adopted without any dissent. I believe it was a unanimous vote.

Now, those words were important, and it is important for us to understand the context, even though this is not in the bill, because that is a general statement of our rights under international law.

Now, what does international law tell us we are supposed to do if an agreement is breached? The general response is supposed to be proportionate response, and of course that is a matter of subjective judgment. But I did want to make this record clear as to what the original amendment was as proposed, what was done in the committee, and the fact that amendment is not in this provision relating to SALT II.

The SALT II language has been inserted by the conference based on an agreement between the House and the Senate conferees that we would insert strong but nonbinding language in terms of the SALT II Treaty.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, may I first express my admiration for the remarks of the junior Senator from Tennessee, who spoke with such clarity about the imminent decision the United States has to make—and this Senate has to be part of that choice—as to whether we will continue to abide by an arms control agreement which is far more restraining on the Soviets than it is on us, or whether in a pattern of near absentmindedness make an extraordinary mistake.

We have seen our negotiators in Reykjavik with the greatest of good intentions nonetheless find themselves in almost bizarre negotiating positions. I do not want to say unthought-out positions, but certainly very novel positions with huge implications being presented almost spontaneously, as if to maintain the spirit of the occasion, and not at all the spirit in which we though the occasion had been convened. At some levels they were carried far beyond the consultative process that takes place within the executive branch when considering matters of that magnitude.

The Senator from Georgia has spoken with great clarity about some of the implications of the proposals that were made. Let us be much more deliberate as we approach this fateful decision.

□ 1820

Mr. President, earlier, the distinguished majority leader and my beloved former colleague on the Intelligence Committee, the senior Senator from Arizona, spoke of the provision for the T-46-A trainer in the bill before us, the authorization bill. A number of statements were made which I will not dispute, because we have discussed these before, and our respective positions are well known, and I need not hold up the Senate. But for the record, I would like to say two things.

One is that the Air Force approval of this trainer is elemental, in that we must have a new trainer soon. A new trainer, the T-46-A, has been developed, has been flown, and has proven very successful. The Air Force needs a new trainer; Fairchild's got a good one.

The indefatigable and indomitable Senator from Arizona has flown it, and is here to tell the tale, as have all manner of Air Force officials. The existing plane, the T-37, is a good 25 years old now and cannot be developed into a new plane. To do so would involve a tremendous waste of defense dollars simply to extend its service life a few years. This is not a good plan.

In discussing the next generation trainer, we are talking about a piece of equipment which we expect to be working order well into the second decade of the next century, and a prudent and careful process has taken place whereby the Fairchild Republic Co. was chosen to build it. It is only right that Fairchild keep this duly awarded contract.

Earlier this year, the distinguished majority leader asked the General Accounting Office to report to him and to us on the general subject of aircraft procurement and the development and production of the T-46-A aircraft. I found the GAO report encouraging, as did the workers and managers at the Fairchild firm. I will read just one paragraph:

> The Air Force System Programs Officer and Flight Test Center officials, as well as the contractor test pilot, said that the T-46-A's performance test have been successful. They also said that technical tests have been outstanding, and reliability and maintainability significantly better than predicted. They believed that the T-46-A's airworthiness is excellent.

Mr. President, to the other, technical point: The continuing resolution which we will be dealing with tomorrow, I hope, provides funds in the amount of $151 million for the production of the trainer in fiscal 1987, and specifically provides for the release of $169.9 million that has already been appropriated for fiscal 1986 but not released. That is in the continuing resolution. That is a measure we will pass, and it will become law.

I hate to say something I have not ever said before, I believe, on the floor—that it must pass as it is now written, or I cannot anticipate the time when we will be able to vote on it.

For the moment, however, we consider authorization bill, in which there was admittedly an effort by the Senate conferees to specifically bar the T-46-A. The compromise agreed to in conference would be fatal to Fairchild Republic. The company earned the contract and deserves to keep it. The provisions in the continuing resolution are the wise and fair course.

Mr. President, I hope we will end this discussion. The passage of the continuing resolution will do it.

I see that my distinguished friend is rising, and, not without some trepidation. I await his remarks.

Mr. GOLDWATER. Will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. GOLDWATER. Mr. President, I will not delay the Senate. I have spoken on this before.

I say to my friend from New York that the only question here is that the Air Force does not want the airplane. It is that simple. If you get the Commander of the Air Force to pick up the phone and say, "Goldie, I want that airplane," I will be the first one to vote for it.

Mr. MOYNIHAN. That would be characteristic.

Mr. GOLDWATER. I have flown it. It is a nice airplane. It has some problems. Every airplane that is new always has problems. I am not going to get into the company. The company is in real trouble. The Senator knows that.

If the Air Force asks Fairchild as it is now constituted to complete the original contract, it would not be able to do so. They have built only 2 airplanes, and they are supposed to have delivered 10 by now. I think they have about $170 million left, and completing the contract would bankrupt the company.

I want the Senate to know these things. I am not opposed to the airplane. I have to accept the wishes of the Air Force when they say they do not want it. I will be glad to go to the phone and talk to him, if he wants to change his mind.

Mr. MOYNIHAN. Mr. President, I thank the Senator from Arizona for his gracious, forthright, and absolutely unimpeachable, persuasive statement. What he says is so.

There is more than one Air Force at a given time, as he has learned to his great weariness over a distinguished career on this floor. We will go forward with the continuing resolution.

Mr. KENNEDY. Mr. President, I join my colleagues on both the Senate and House Armed Services Committees in recommending the approval of the conference report on S. 2638, the Defense Authorization Act for fiscal year 1987.

It is a tribute to the hard work and determination of Chairman GOLDWATER, Senator NUNN, House Armed Services Committee Chairman ASPIN, and ranking minority member Congressman DICKINSON that we were able to complete this conference, given the many differences between the Senate and House bills. The betting outside the conference committee is that we would never be able to bring a bill to the floor. My congratulations to all the members on both committees who, against all odds, were able to resolve their differences and complete work on this important piece of legislation.

The submission of this conference report is also a victory for the Senate Armed Services Committee and the entire defense authorization process. While the Appropriations conferees have not yet completed their work, it appears that differences between the final defense authorization and Appropriations products will be for less than in years past. This is encouraging.

The successful completion of the 1987 Defense Authorization Act is also a fitting cap on the long and distinguished career of Senator BARRY GOLDWATER. Throughout this year, BARRY has been riding herd on this committee and on several conferences. The result is the achievement of several major pieces of legislation: The Military Retirement Reform Act, the 1986 Supplemental Defense Authorization Act, the Goldwater-Nichols Department of Defense Reorganization Act, and, now, the 1987 National Defense Authorization Act.

I want to express my deep personal gratitude to BARRY for the leadership he has provided to this committee and to the Nation and for the many years of friendship he has given me. The senior Senator from Arizona will be sorely missed by this committee and this Senate.

While I have signed the conference report, I believe there are both good and bad aspects to this bill.

The conference marked to a budget authority of $291.9 billion for national defense. This is quite close to the level arrived at in the continuing resolution. However, the conference was less successful in achieving outlay savings, having marked to a level of $281.5 billion, $2.3 billion above the budget resolution.

In order to reach the outlay targets, the conference set up a contingency reduction that would reduce the military pay raise, and implement other across-the-board reductions if the Appropriations conferees refrain from using budgetary gimmicks to achieve required outlay savings. I wholeheartedly endorse the authorization conference's decision not to achieve the outlay targets through "gimmicks" like moving the pay date. Nevertheless, I part company with some of my colleagues who suggest that achieving these outlay targets requires making cuts in programs in a manner that will harm our national defense.

I believe that $279.2 billion in outlays is more than enough to provide for the national defense and keep America strong with a military force second to none if the money is properly allocated and distributed. Unfortunately, the 1987 National Defense Act follows historical patterns by distributing a disproportionate amount of the reductions in areas, like operations and maintenance, that can least afford it. It also reflects an unwillingness or inability to make the tough decisions and terminate new, unneeded or redundant weapons systems. Only a handful of "new starts" were cut, while spare parts accounts for aircraft, combat vehicles, and other systems were cut back drastically from administration requests that had already been reduced back at the Pentagon. Even after all the blood was spilled, the strategic defense initiative received a whopping 15 percent over last year. Unneeded and dangerous weapons like the MX, antisatellite and chemical munitions continue to be funded at the expense of less glamorous but far more critical defense items. In this Senator's view, such actions reflect a flawed ordering of priorities.

In addition, if current deficit projections are accurate, we will probably face a similar situation during consideration of the 1988 Defense Authorization bill. The budgetary constraints the Congress will be under in allocating funding for the military next year will be even more severe. We cannot continue to defer tough decisions on research and development, procurement, and especially new starts, and sacrifice operations and maintenance and the readiness of our Armed Forces. It is a method for achieving defense budget cuts that will come back to haunt us if we should ever have to go to war.

Finally, I want to say a few words about the arms control provisions in the bill which became the focus of so much controversy during this conference and, indeed, had national security implications extending far beyond the conference.

I disagree with those on the committees who feel that the House amendments and provisions had no business being in our bill. The administration's flawed arms control policies have had tremendous consequences for our overall national security, and it was perfectly appropriate for the House to seek to implement the will of the American people in retaining those few limits remaining on nuclear forces and seeking ways to end the nuclear arms race.

I commend my House colleagues for their steadfastness and determination in standing tough on these important amendments. I know that many are disappointed on the final outcome of the conference and the decisions to remove binding language on SALT II and nuclear testing. I opposed both decisions and fully supported the House language binding the administration to adhere to the SALT II sublimits and limit nuclear testing.

But this administration is now on notice. The Congress and the American people will no longer tolerate year after year of phony promises, stalemated negotiations, and an escalating arms race. The eyes of the Congress and the American people remain fixed on this administration and its lack of a coherent arms control policy. The Congress cannot legislate arms control, but we can and will expect and demand results.

FISCAL YEAR 1987 DEFENSE AUTHORIZATION ACT—CONSENSUS LEGISLATION TO STRENGTHEN THE NATIONAL SECURITY

Mr. BYRD. Mr. President, I had hoped to speak briefly in support of the fiscal year 1987 Defense Authorization Act before its passage, but I was distracted by other matters and was unable to do so. I did not want to delay passage of the act. But I will make just a few comments at this point with reference to that Authorization Act.

Mr. President, I commend the distinguished Senate managers of the fiscal 1987 defense authorization for their role in shaping a final version of this legislation, which makes a significant contribution to our national security.

The conference report now before us is a special tribute to the lifelong legislative contributions by our esteemed colleague from Arizona, Senator GOLDWATER, the chairman of the Armed Services Committee, to strengthen our security.

The Senate respects and greatly relies upon the judgment of Chairman GOLDWATER on defense matters, and I hope we continue to receive his candid guidance, even after his retirement at the adjournment sine die of the 99th Congress.

It is with much pleasure that I note that this conference report contains an authorization for a scholarship fund named in honor of Senator GOLDWATER. The Barry Goldwater Scholarship and Excellence in Education Foundation will assist worthy students to pursue studies in science and mathematics—a special interest of Senator GOLDWATER's and one which further contributes to our overall security.

This conference report also testifies to the leadership and skill of our distinguished colleague from Georgia, Senator NUNN, the ranking minority member of the Armed Services Committee, and of all other members of that committee. They have combined their talents to produce a legislative package worthy of Senate endorsement.

Mr. President, any conference report represents an attempt to reach reasonable compromises between the different positions of the Senate and House of Representatives. As such, some provisions gain more favor than others, and some components cause more concern than others.

This certainly is true for the present legislation. However, on balance, the total package is a step forward in Congress' endeavors to maintain and improve our national defenses in the most militarily effective manner, and within reasonable budget levels.

The arms control provisions of this package, and the procurement and research programs associated with those sections, have attracted the most attention and controversy. But it also should be remembered that the final bill provides the funding needed to enhance our military posture in the more unglamorous areas of conventional forces modernization and research, daily combat readiness, and military personnel force levels, pay and benefits.

The conference report continues the leadership Congress has demonstrated to ensure that our National Guard and Reserve Forces receive the funding and equipment resources they deserve as an essential component of our total defense posture. As a strong supporter of our Guard and Reserve Forces, I am most pleased that the conferees agreed to recommend authorization of $563.5 million for additional procurement for these components.

Our distinguished colleague from Mississippi, Senator STENNIS, who is the dean of defense matters in the Senate, I should say, deserves high praise for his initiatives to promote the interests of the National Guard and Reserves.

Regarding the arms control matters and related procurement and research programs in the conference report, there are several positive recommendations which should be highlighted.

First, the conferees provided full funding for the advanced technology, or Stealth bomber, and for the advanced cruise missile. These two programs are critical to modernizing the air-breathing element of our strategic nuclear deterrent forces.

I also am gratified that the conferees agreed to accept my amendment to protect these programs from any attempt to divert funding from them, and to prohibit any funds in the fiscal year 1987 defense budget from being used to buy more than 100 B–1B bombers.

Second, the final bill contains $1.2 billion to permit the Midgetman Small Mobile Intercontinental Ballistic Missile Program to begin full scale engineering development in fiscal year 1987. The Midgetman may be our country's best alternative to modernize our land-based deterrent forces in a survivable manner which contributes to a stable nuclear balance.

Third, the conference report recommends a total of about $3.53 billion for the strategic defense initiative [SDI]. These funds provide a 13-percent real increase in the SDI Program, compared with its fiscal year 1986 budget. In this day of staggering Federal deficits and extremely tight fiscal constraints, this recommended funding is a much more appropriate amount than the 71-percent real growth sought by the Pentagon.

Fourth, the conferees made major advances in both arms control and responsible defense program management in the areas of nuclear testing, binary chemical weapons, and antisatellite systems.

In a demonstration of statesmanship to support the President at the Iceland summit, a compromise also was reached on the matter of the SALT II "no undercut" policy. This conference report, in important sense of the Congress language places both Houses of Congress firmly on record in support of continued United States compliance with the central numerical sublimits of offensive strategic arms agreements, as long as the Soviets continue to observe these sublimits.

This compromise is important as both the United States and Soviet Union try, at the Geneva talks, to capitalize on the arms control progress made in Reykjavik, and to avoid the pitfalls which led to the summit meeting's final disappointing outcome. I hope that the administration understands fully that this bipartisan, and bicameral, support for continued U.S. SALT compliance is based on the considered judgment that American national security is best served by such a "no undercut" policy.

Continued United States compliance, later this year, with SALT's central numerical sublimits denies the Soviets both military and propaganda advantages which work against our security. In addition, if either side were to scuttle these key elements of existing offensive arms control agreements, it would cast a dark shadow over the atmosphere in which both nations will strive to pick up the pieces of the Iceland smmit.

Thus, there are compelling national security reasons for the United States not to abandon a SALT "no undercut" policy. This conference report recognizes and underscores these reasons, and the President would well serve our own Nation, and our allies, if he maintains this policy.

On another SALT-related matter, the conference report also gives final approval to my amendment requiring the Joint Chiefs of Staff to provide Congress with a detailed assessment of the military impacts on the United States of abandoning the SALT "no undercut" policy.

Congress needs such information and the American people need such information through their elected representatives and in a timely manner, to assess the full security implications of abandoning U.S. treaty compliance. The Chairman of the Joint Chiefs, Adm. William J. Crowe, Jr., indicated he could submit this report by October 1, and that he would do so as soon as this bill, or the fiscal year 1987 continuing resolution which also contains the requirement, becomes law. Both Houses of Congress are expected to pass both conference reports, so I would hope the admiral would not delay submitting this report, since Congress should receive it before adjournment sine die.

Finally, Mr. President, the conference report adopts my amendment to increase the processing of certain ferroalloys in our national defense stockpile during the next 7 years. These metals are critical components in many weapons systems, and maintaining a national production base is necessary for both security and industrial competitive reasons. My amendment was designed for this purpose.

Mr. President, I urge adoption of this conference report to meet our essential national security requirements.

Again, I commend Mr. GOLDWATER and Mr. NUNN for their outstanding leadership in promoting, developing, and bringing this legislation to its final passage.

Mr. President, I yield the floor.

Mr. GOLDWATER. Mr. President, I wonder if we might complete action on the conference report.

THE PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. I thank the Presiding Officer (Mr. DURENBERGER). He is a very generous man. I will go home and pray for him.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

OMNIBUS DRUG ENFORCEMENT, EDUCATION, AND CONTROL ACT

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A motion to concur with a further amendment, as modified, to the House amendment to the Senate amendment to H.R. 5484, the Antidrug Abuse Act of 1986.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. Who seeks recognition?

The Chair, in his capacity as a Senator from Minnesota, suggests the absence of a quorum.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1830

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, earlier I made reference to the concurrent resolution, House Concurrent Resolution 395, which is better described as the tag correction bill following the tax bill.

I am not at the moment going to propose a unanimous-consent request so that both sides can have a chance to run a hotline on what it is I will propose.

I have talked to a number of Senators who raised questions before. I talked to Senator LAUTENBERG of New Jersey and alleviated the question he had. I talked to Senator WALLOP, and I talked to Senator METZENBAUM.

If there are other Senators who have objections, I do not know about them, but the reason I am going to announce now what I am going to do and subsequently make the unanimous-consent request is so if there is objection, they can come to the floor and let the objections be known.

I will say again what I said before. I will not reread the list and take the time of the Senate, but there are about 25 to 30 States that are affected—Carnegie Hall in New York is affected—with minor transition provisions that were by and large errors.

Mr. MOYNIHAN. It was clerical. If I may ask the manager to yield for a question?

Mr. PACKWOOD. Yes.

Mr. MOYNIHAN. In the specific case of Carnegie Hall.

Mr. PACKWOOD. It was a wrong address.

Mr. MOYNIHAN. Wrong address. Seventh Avenue.

Mr. PACKWOOD. The House has sent a correction bill over. There was some new material in it and we have taken out the new material that they requested be taken out.

When I make the request it will be as follows: To delete the market discount bond provisions which are limited to 15 life insurance companies now and to add a revenue neutral generic rule that allows all insurance companies of whatever size to purchase and sell the bonds; to retain the current law for State legislator expense. The House bill terminates, sunsets it at the end of 1990. It is to liberalize the low-income housing transition relief for rural project assisted under the Farmers Home Administration and clarify the at risk rules that apply to real estate generally and will apply to low-income housing projects eligible to the low-income housing credit. Change the effective date for the employer-owned life insurance provisons from June 20, 1986, to the date of enactment of the Tax Reform Act; to reinstate the Senate-passed rule on trucking company transition rule or limit the value to $8.5 million which is half of the full value; to delete the custom broker freight forward provision.

I might say the Senator from Ohio has been generous in this. It is a good provision. It was put in the bill inadvertently. It is in the jurisdiction of the Commerce Committee, and we all agreed it would be taken out and have hearings in the Commerce Committee and give it full and fair treatment next year.

We would make the general aviation transition rule generic but limit it to purchases on or after August 16.

We delete the transition rule to charitable contributions to certain universities. That is LSU and Texas A and M, the skybox situation. So one of my friends from Nebraska can say all the teams can play on a level playing field. That will be deleted.

We deleted new starters that the House put in and limit the cost of physicians mutual provision to $300,000 per year.

As far as I know there are no objections to any of those provisions.

So at an appropriate time, and I hope it will not have to be too long, I will make a unanimous-consent request which will be a unanimous consent that there be one amendment. I will offer the amendment that will have all of these provisions in it—I think it has been cleared all around—and that there be no other amendments, and we will move to the consideration of the House concurrent resolution, although the vote on it may occur in the morning, but we would try to get a time limit.

With that I am prepared to yield the floor. But I would encourage any Senators who have questions.

Mr. MOYNIHAN. Before the Senator yields the floor, will he yield for a question?

Mr. PACKWOOD. Yes.

Mr. MOYNIHAN. The subject of the address of Carnegie Hall has come up. Is he aware of that ancient New York folk story about the Texas couple who got lost in the subway system and come up in Brooklyn somewhere in Greenpoint? He saw an old bearded gentleman standing by a small shul and the Texan said "Say, good old buddy, could you tell us how you get to Carnegie Hall?"

The old gentleman thought a moment and said, "Practice."

Mr. PACKWOOD. No, but we will include it as a transition rule in the bill.

I yield the floor, Mr. President.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that I might proceed for 5 minutes as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

LATIN REPORTER ARRESTED

Mr. MOYNIHAN. Mr. President, we read in this morning's New York Times an account of still another foreign visitor to the United States, here in this case by invitation, seized by immigration authorities and literally put into prison under the provisions of the old McCarran Act, which haunts us as if from another era.

This case concerns a Miss Patricia Lara, who is a graduate of the Columbia School of Journalism and is a reporter for El Tiempo. El Tiempo is the most prestigious newspaper of Colombia.

She was coming to the United States to participate in an award ceremony which takes place each year, in which the Maria Moors Cabot prizes are awarded to persons who have distinguished themselves in journalism in the Western Hemisphere. Recipients are awarded a gold medal and an honorarium. For 48 years these awards have been given and they go this year

to the Washington bureau correspondent of the Miami Herald; the South American bureau chief of Time; and a number of other distinguished journalists from South America in addition to Miss Lara.

Miss Lisa arrived for the Cabot awards ceremony on October 14, 1986. She had been in the United States twice in the spring of 1986. She has a master's degree from the Columbia School of Journalism. Suddenly she is arrested under section 235C of the Immigration and Nationality Act. She is arrested, put in effect in prison in Varick Street in Manhattan and not told why.

A spokesman for the Colombian Ambassador to the United States very sensibly informed the New York Times that "Our Embassy has issued a diplomatic note to the U.S. State Department, requesting an explanation and also stating our surprise." That spokesman, Virginia Verela, added with I think every reason and right that "In Colombia we have free press."

It is dismaying, Mr. President, that we behave in this way, and that we cannot explain what we do. I would suppose if the Immigration and Naturalization Service wished to give the maximum attention to its serious difficulties with this statute, it would arrest and imprison a journalist from the most distinguished newspaper of Colombia coming to an award ceremony at the Columbia University School of Journalism. And as I learned today, the INS is intent upon making a further resolution of the case Friday morning, the morning after the evening ceremony.

□ 1840

It makes one weep. What could possibly possess the United States to act in this manner? You could almost become cynical. I have seen no less a person, Mr. President, than the Secretary of State himself fraternizing with known Communists in a foreign country over this past weekend. I have seen persons with access to the highest levels of secret information, such as only the Presiding Officer—as chairman of the Select Committee on Intelligence—would have access to, in close congruity with known agents of the Soviet Union. I mean, heavens, the President of the United States has offered the General Secretary of the Communist Party of the Soviet Union to share with him all of our secrets concerning the strategic defense initiative.

And we have a young lady in the slammer on Varick Street who had no reason in the world to expect she would be in prison. She was here last March and April. Perhaps there was a computer malfunction then, but this time, off she goes to prison.

That is no way to treat a fellow American—we are all from the Americas—and a graduate of one of our distinguished institutions, as well as a reporter from one of the distinguished papers of the hemisphere. It makes no sense. It exposes our country, this Republic, to ridicule. It requires the spokesman for the Colombian Embassy to say Colombia has a free press, not implying but allowing people to read the suggestion: "Does the United States?" Well, of course we do. But then why are we arresting people at Kennedy Airport?

Mr. President, I think this legislation needs to be reviewed. It comes out of an era nearly two generations past. It was enacted by persons who perhaps did not know what they were doing, but their provisions expose the United States of America to ridicule. These provisions do nothing whatever that I can see to maintain our security. If there ever was such an occasion where our security was maintained, I am not aware of it and in my years on the Intelligence Committee never heard of one.

It really does behoove the administration and the Congress to ask that in the next Congress, the 100th Congress, we ought to examine the statute and see how it can be made to reflect what is best in our country and what is free and current and contemporary in our country, and not what comes from us in the legacy from a past which is as little honored in the present time as was the period of the Alien and Sedition Acts in the last decade of the 18th century. We are perfectly capable of protecting our security interests without embarrassing our Nation.

Mr. President, may I further add, however, that I have spoken today with the Commissioner of the Immigration and Naturalization Service and got the fullest cooperation from him. He had not been aware of the matter. That does raise a question as to how the Commissioner could not be told of something of this consequence, where friendly embassies from democracies of the Western Hemisphere send notes to our Government, and when an important story appears in the New York Times. Somehow it may be that the bureaucracy over there does not know what difficulties they are making for their nation. I cannot imagine they would intend to do so. But I do wish to report the Commissioner's cooperation and express my appreciation for it.

Mr. SIMON. Mr. President, I was over in my office and heard my colleague from New York speak on this thing where we go through this again and again and again embarrassing ourselves needlessly. And it is interesting to me that the Attorney General of the United States—and I have asked the Attorney General—and the Secretary of State both have said we ought to change the law. And somehow, we ought to do it.

I had an amendment here 6 months ago or 8 months ago to change the law. Unfortunately, it was defeated. This was before both Attorney General Meese and Secretary of State Shultz came out on the other side.

But if you were to look at the list of people who have been on, you know Pierre Trudeau, Graham Greene——

Mr. MOYNIHAN. Farley Mowat.

Mr. SIMON. Yes. It is just absolutely ridiculous. And he was on that list because he objected at one point to the B–52's flying over his timbered land. And so we put him on some kind of an enemy's list who should not be permitted in the United States.

You know, we are a free country. I always remember when I was in the Army, I visited Hyde Park in London where everyone gets up on the soapbox to speak about whatever you want to speak about. This Moscow Communist leader was speaking. And while he was speaking, this little lady, with a cockney accent, asked, "Why can't we speak in Moscow like you're speaking in London?" And everyone laughed and cheered and jeered.

Of course, that is the essence of the difference in our systems. We ought to be people who welcome people. You can speak out in Canada against United States policy and still be welcomed here, or in Chile or anywhere else, from the right, left or in between. My colleague from New York is absolutely right. Again, I commend him.

Mr. MOYNIHAN. Would my friend from Illinois yield for a question?

Mr. SIMON. I am pleased to yield.

Mr. MOYNIHAN. He most assuredly did bring this matter to the floor of the Senate this year and we were not successful, but then we had not gotten the support of the Attorney General and the Secretary of State. You cannot imagine George Shultz or Edwin Meese wanting anything to do with the nuttiness of the detention of Patricia Lara. Imagine George Shultz, with all he has on his mind, receiving a note from the Ambassador of Colombia saying: "Sir, what are you doing?" And the Director of the Naturalization Service does not even know about it; nobody thinks it important enough to tell officials in Washington.

At least the Service could have said, "Sorry, ma'am, you have to take the next plane back." But, put her in jail?

Would it not be useful to think of a group of us getting together and really pressing legislation in the next session, asking the administration to help so as to stop embarrassing the President of the United States and his country and our country?

Mr. SIMON. Absolutely. And I hope we can do that.

Let me add, our colleague who heads the Immigration Subcommittee, Senator SIMPSON, also believes that a change is needed.

Mr. MOYNIHAN. I cannot doubt but he does.

□ 1850

And we ought to be able to get together next year and fashion something that causes less embarrassment to us and causes us to live up to the ideals that we profess. Again, I commend my colleague from New York. I hope we will move in that direction.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HECHT). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FARM CREDIT SYSTEM LEGISLATION

Mr. COCHRAN. Mr. President, the House has passed a budget reconciliation bill containing the Farm Credit Amendments Act of 1986. This is legislation which has been developed in concert with members of the Senate Agriculture Committee, the House Agriculture Committee, particularly the chairman of that subcommittee, Congressman ED JONES of Tennessee.

I am asking that we look very carefully at this proposal, and give it the support which it ought to have if we are going to get some relief for borrowers from the Farm Credit System, relief from the high interest rates they are having to pay.

There is a disproportionate share of the burden for sustaining some past practices and decisions by the Farm Credit System that are being imposed on the borrowers. That relief can be provided by the passage of these Farm Credit Act amendments that are included in the reconciliation bill.

There was an article in the Washington Post just in the last few days criticizing these amendments unjustly. I have a copy of that article here, Mr. President. I am going to ask unanimous consent at the appropriate time that it be made a part of the RECORD.

I also have a copy of a letter, Mr. President, which I think Senators should notice which has been sent to the chairman of our Agriculture Committee here in the Senate, Senator HELMS. A copy was sent to this Senator, and also to the distinguished Senator from Nebraska, Mr. ZORINSKY, pointing out the widespread support for this legislation by agriculture groups all over the country.

Mr. President, the Farm Credit Act Amendments of 1986, as included in the Budget Reconciliation Act and as passed by the House in H.R. 5635, represents a bold, self-help program for the financially troubled Farm Credit System [FCS] and its borrowers. Passage of this legislation by this Congress is important because it makes adjustments in the Farm Credit Amendments Act of 1985 necessary to provide FCS the best possibility of remaining a dependable source of agricultural credit at competitive interest rates without an infusion of Federal funds. With this legislation FCS will be able to lower its operating cost and have the flexibility to lower interest rates.

There is, however, some concern that since the legislation does not mandate a minimum interest rate reduction for borrowers, the Farm Credit Administration, the regulator, will insist on having benefits accrue only to FCS member institutions. I want to assure my colleagues that it has been my objective from the initial phase of developing this legislation that the primary purpose was to find a way to have FCS offer more competitive interest rates to its borrowers especially considering today's availability of much lower cost funds. Furthermore, to support the conclusion that this legislation, the Farm Credit Act Amendments of 1986, is capable of providing FCS with the opportunity to lower interest rates to its borrowers, I ask unanimous consent to include in the RECORD an article by John M. Berry, Washington Post, October 12, 1986, that reports in part as follows, "According to Naylor—Frank Naylor, Chairman of the Board, Farm Credit Administration—the maneuver would reduce the FCS cost of funds by enough to allow it to reduce the interest rates its borrowers are paying by between 1½ and 2 percentage points." Another comment in this article suggests that such an interest rate reduction would amount to approximately $1 billion savings in interest expense to borrowers.

I also ask unanimous consent to include in the RECORD a letter to the chairman of the Committee of Agriculture, Nutrition, and Forestry, Senator HELMS, supporting immediate passage of this legislation. The letter is signed by the following agricultural groups: American Soybean Association, National Cattlemen's Association, National Cotton Council, National Milk Producers Federation, National Association of Wheat Growers, National Corn Growers Association, National Grange, and National Pork Producers Council.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 12, 1986]

FARM CREDIT SYSTEM READY TO PAPER OVER ITS RED INK

(By John M. Berry)

With the quiet acquiescence of the Reagan administration, Congress is on the verge of authorizing the Farm Credit System to pretend that it is making money instead of chalking up the largest losses of any financial institution in history.

The Farm Credit System, or FCS, comprises 37 banks and hundreds of local "associations." Last year the system lost a staggering $2.7 billion, and there was another $1 billion loss in the first half of this year.

Many farmers continue to be unable to make payments on the $65 billion worth of loans the system has outstanding and losses are still mounting. In a gamble to hold onto more creditworthy borrowers who could get loans elsewhere, FCS last summer began cutting the variable interest rates it charges to more competitive levels, and in the process added roughly $200 million to this year's losses, which FCS officials expect to hit at least $1.7 billion. The General Accounting Office has warned that the system is in such bad shape that the final 1986 figure could be as much as $2.9 billion.

In a two-year period this borrower-owned cooperative system will have lost, by these estimates, upward of $4.4 billion, with more to come. Remarkably, the system in previous years had accumulated a large enough surplus to cover these losses without dipping into its basic capital, virtually all of which has been provided by borrowers, who are required to buy stock in the system when they get a loan.

To protect the farmers and other rural residents who own that stock, Congress last year gave the system authority to borrow money directly from the U.S. Treasury if needed.

In return for honoring what had long been regarded as an implicit federal guarantee of FCS liabilities, Congress directed the system to clean up its lax management and accounting practices and to submit to serious, arms-length regulation by a revamped Farm Credit Administration. In prior years, the FCA had operated more like a part of the system than a regulator of it, Congress' concern is more for the borrowers, mostly farmers, than for the Farm Credit System itself.

Thus, last year's legislation protected the value of the cooperative banks' stock owned by the borrowers. And this election year, as the losses mounted and it seemed that FCS would soon be knocking on the Treasury's door, the legislators are again moving swiftly to aid the borrowers.

With federal budget deficits so high and the Gramm-Rudman-Hollings deficit reduction law setting ever smaller targets for federal red ink, representatives of FCS proposed some creative accounting changes to postpone the day of reckoning for the system. Reversing some strict provisions of last year's law, including one that FCS must use generally accepted accounting practices, the House last week approved the changes.

The Senate is expected to attach them as an amendment to a pending budget reconciliation bill that likely will pass this week.

Without spending a dime that will show up in the budget, FCS losses likely will be turned into reported profits.

Meanwhile, Congress has made it clear that to the maximum extent possible, the resulting savings are supposed to be passed on to FCS borrowers through lower interest rates.

The theory behind it all is one of postponing recognition of actual losses until American agriculture and the Farm Credit System are in better shape to bear them.

The accounting changes will allow FCS to show much lower current-year costs and thus charge their borrowers lower interest rates.

The system is losing money for several reasons, including:

Depressed commodity prices and plunging farmland values which have left many borrowers without either the current income out of which to make loan payments or valuable assets that can be sold to reduce to pay off the loans.

A very high cost of acquiring funds to relend to borrowers, a cost that is much higher for FCS than its competitors, including commercial banks and some insurance companies.

Unusually high overhead that, according to Frank Naylor, head of the Farm Credit Administration, is partly the result of the system's traditionally decentralized operations through many small local offices.

After a $762 million second-quarter loss, FCS had a little more than $2 billion left in the surplus account built up from prior profits, but the surplus is expected to dwindle fast.

Losses are likely to continue since FCS at mid-year still had $7.6 billion worth of so-called nonaccrual loans—loans on which payments were not being made and on which the value of the land or other collateral was so doubtful that the system was no longer bothering to add overdue interest to the amount that was due. In addition, FCS labeled another $4.7 billion worth of loans "high risk."

At the same time, the system's current cost of funds—about 10.6 percent—is so high, Naylor says, that FCS has a negative interest rate spread. That is, the system is paying more to borrow money than it is receiving on its loans. That means FCS has no cushion at all out of which to absorb provision for loan losses, which are normally treated as a current cost, or even to cover normal operating overhead.

The system's current cost of funds is so high because it has outstanding more than $38 billion worth of securities on which it is paying interest rates in excess of 9 percent. These securities were issued several years ago when interest rates were generally much higher than they are today, and they do not have any provision under which they can be retired early. Another roughly $25 billion worth of FCS securities carry lower interest rates.

At the time the high-yielding bonds were issued, the Farm Credit System set rates on its loans according to its average cost of funds, which in those days was still being held down by a preponderance of older, lower-yielding, securities. Now many of those older bonds have matured but they have not been replaced with a new set of lower-yielding bonds of the same magnitude. The reason is that the size of FCS, and therefore its need for new money, has been shrinking rapidly.

Total outstanding loans, for instance, have dropped by nearly $15 billion in the past year and a half. And because of greatly increased provisions for loan losses, the net amount of loans outstanding has dropped by an even larger $17 billion.

One major feature of the proposed creative accounting that the new legislation would allow is, in effect, pretending that the FCS's $38 billion worth of high-yielding securities are paid off by issuing new bonds. The system would have to incur a one-time loss estimated by system officials at $2.8 billion to buy and retire the high-yielding bonds, if it were possible to do so. Naylor believes the actual market premium would be much higher. But instead of recording that loss all at once, the system would be allowed to write it off over a 20-year period—that is, at the rate of $140 million a year. The difference to the system's income statement would be much greater, however. According to Naylor, the maneuver would reduce to allow it to reduce the interest rates its borrowers are paying by between 1½ to 2 percentage points.

A 2 percentage point reduction in rates on the roughly $50 billion worth of FCS loans that are still in the "performing" category would reduce actual system income by $1 billion a year. But the new accounting procedure would reduce the system's reported interest expense by even more, only the latter reduction is only on paper.

The accounting gimmickry does not stop there, however. The legislation also would allow the system a similar 20-year writeoff period for any loan losses incurred between last June 30 and the end of next year in excess of one-year of 1 percent of total outstanding loans.

Here is how that would work. System officials currently estimate that FCS will lose an additional $1.8 billion over that 18-month period, with much of it due to provisions for loan losses.

Suppose outstanding FCS loans remained at $65 billion. Half of 1 percent of that figure would be $325 million.

If loan losses were, say, $1.325 billion over the period, then the system would report loan losses during the six quarters of only $325 million. The remaining $1 billion would be written off at the rate of $50 million a year.

In this example, this accounting device would reduce reported FCS losses by nearly $700 million in 1987. The losses would still be there, of course.

The resulting better-looking balance sheets for the banks in the 12 FCS regions around the country would also temporarily relieve another major source of strain within the system. The healthier regions, such as those served by the Farm Credit Banks in Maryland, Massachusetts and Texas, would no longer be sending cash to Omaha, Wichita, Kan., and Spokane, Wash., among others, to keep them afloat.

A number of suits have been filed challenging the 1985 law, which required the system to transfer resources from health banks to those in deep trouble before seeking Treasury assistance. While the law itself and various regulations issued by the Farm Credit Administration to implement it generally have been upheld by the courts, the whole idea of transfers remains under fire.

The legislation would bar the FCA from requiring that FCA banks get its permission before lowering interest rates, as is now the case.

The legislation, if it becomes law, won't solve the Farm Credit System's fundamental problems, which are rooted in its past mismanagement and the current depression on America's farms.

As one member put it on the floor of the House, the legislation is intended to place FCS on "more or less of a holding pattern until we can confront this issue head-on next year. . . ."

The administration, no more anxious than anyone else to add cash to FCS right now, passed the word that it has no objection to the new legislation.

Reagan officials want nothing to increase the already huge budget deficit, and as one noted last week, "It was hard to say no when we have already let the savings and loans do it."

OCTOBER 10, 1986.

Senator JESSE HELMS,
U.S. Senate, Washington, DC.

DEAR SENATOR HELMS: The undersigned agricultural commodity groups and general farm organizations who have endorsed the Farm Credit Act Amendments of 1986 are concerned by last minute efforts to block passage of this legislation.

As you know, our support was predicated by the need to reduce interest rates for farmer-borrowers, and resolve the high cost embedded debt plaguing the Farm Credit System (FCS). We recognize that the Cochran-Jones legislation is the only feasible alternative to achieve these goals at this point due to budget constraints.

The apparently unsolicited October 6, 1986, General Accounting Office (GAO) letters to you and Chairman de la Garza are troublesome. The GAO statement that FCS could greatly overstate earnings is sobering but largely unsubstantiated. Fears of undisciplined accounting practices and loose credit analysis and approval would appear to be groundless considering the strengthened FCS bank examination procedures of the 1985 amendments, which remain unaffected by this legislation.

In order for farmers to receive lower interest rates prior to the 1987 operating season, the provisions of this legislation must be passed and implemented immediately. This cannot be simply interpreted by FCA as a standby authority.

We strongly urge immediate passage of the legislation in order to provide much needed interest rate relief to our nation's farmers. We appreciate your continuing leadership as we all work together in an effort to resolve the farm credit crisis faced by American agriculture.

Respectfully,

American Soybean Association.
National Association of Wheat Growers.
National Cattlemen's Association.
National Corn Growers Association.
National Cotton Council.
National Grange.
National Milk Producers Federation.
National Pork Producers Council.

Mr. COCHRAN. Mr. President, I urge my colleagues to support this legislation, the Farm Credit Act Amendments of 1986, when the Senate considers the Budget Reconciliation Act later this week.

I hope Senators can support this legislation as a part of reconciliation because without it, we are going to see the farm credit system slide right off the cliff and self-destruct. We cannot have that. Borrowers cannot stand that. We can do something about it by passing this bill.

I thank the Chair.

□ 1900

REAFFIRMING OUR FRIENDSHIP AND SYMPATHY WITH THE PEOPLE OF EL SALVADOR FOLLOWING THE DEVASTATING EARTHQUAKE OF OCTOBER 10, 1986

Mrs. KASSEBAUM. Mr. President, on behalf of myself, Mr. LUGAR, Mr. PELL, Mr. DOLE, Mr. BOREN, Mr. DURENBERGER, Mr. DOMENICI, Mr.

DODD, Mr. BIDEN, Mr. CRANSTON, Mr. SARBANES, Mr. KENNEDY, Mr. TRIBLE, Mr. HELMS, Mr. MURKOWSKI, Mr. CHAFEE, Mr. ABDNOR, Mr. KASTEN, Mr. LEAHY, Mr. KERRY, Mr. SASSER, Mr. LEVIN, Mr. NICKLES, Mr. WILSON, Mr. HEINZ, Mr. INOUYE, Mr. DECONCINI, Mr. BRADLEY, Mr. HARKIN, Mr. MATHIAS, Mr. NUNN, Mr. EVANS, Mr. BOSCHWITZ, Mr. MATTINGLY, Mr. BYRD, Mr. COCHRAN, Mr. SIMPSON, Mr. GARN, Mr. GORTON, Mr. PRESSLER, and Mr. HECHT, I send a joint resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 427) reaffirming our friendship and sympathy with the people of El Salvador following the devastating earthquake of October 10, 1986.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

Mr. BYRD. Mr. President, there is no objection. I am happy to state that this matter has been cleared on this side of the aisle. I compliment the distinguished Senator from Kansas [Mrs. KASSEBAUM]. I urge that the joint resolution be passed forthwith.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time at length and the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the joint resolution.

Mrs. KASSEBAUM. Mr. President, the United States has always responded compassionately to the suffering caused by devastating earthquakes in Mexico and in Central America, including Guatemala and Nicaragua. Today we are joining with those countries, and with other nations throughout the world, in helping El Salvador, the most recent victim in this chain of disasters.

Since the earthquake struck in densely populated areas of San Salvador, it killed and injured thousands of people. Over 900 died, and up to 10,000 people were injured. Tens of thousands are suddenly homeless.

The seasonal rains have begun. These storms have added to the suffering of approximately 150,000 people who are living in the streets or in makeshift shelters. Many young children are ill as a result of exposure to the torrential downpours.

The international response has been prompt and generous. The United States has sent 16 plane loads of emergency relief and supplies, including tents, sheets of plastic, and roofing materials, food and water, medicine, and medical teams. However, these efforts need to be expanded and donor coordination improved if the aid is to reach all of the victims.

Secretary of State George Shultz will be going to El Salvador tomorrow in order to express the concern of the United States and offer our assistance in this time of urgent need. Mr. President, I believe that a joint resolution by Congress would also be very helpful in this crisis. It will convey to the people of El Salvador the sympathies of the American people. It is a simple but timely proposal, and I ask for its unanimous approval.

Mr. President, the essence of this joint resolution, which has many cosponsors, is just reaffirming our support and assistance to the people of El Salvador as they face this great tragedy.

Mr. President, I am pleased that there are so many cosponsors. I would like to call attention to it. The joint resolution will be at the desk until the close of business today so that others who wish to, might join as cosponsors. The joint resolution has been cleared on both sides.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 427) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 427

Whereas on October 10, 1986, El Salvador suffered a devastating earthquake resulting in heavy loss of life and injuries to many of its citizens;

Whereas the prolonged and extreme hardship of the people of El Salvador as a result of civil conflict has been deepened by this natural disaster;

Whereas the assistance of many governments, as well as international and nongovernmental organizations, for the people of El Salvador has been prompt and generous;

Whereas Secretary of State Shultz will visit El Salvador during this emergency in order to convey the solidarity and friendship which link the peoples of our two nations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Government of the United States, on behalf of the citizens of the United States, extends to the people and Government of El Salvador our most profound sympathies in this time of tragedy.

SEC. 2. The President should provide all appropriate relief and rehabilitation assistance to help prevent further loss of life, alleviate suffering, and safeguard the public health in El Salvador.

SEC. 3. The United States, in consultation with the Government of El Salvador, is prepared to cooperate with El Salvador in long-term efforts to recover from the effects of the earthquake.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 1910

SENATOR THOMAS F. EAGLETON

Mr. BYRD. Mr. President, a few years after being elected to the U.S. Senate on July 24, 1972, Senator THOMAS EAGLETON told Time magazine that he had become "fascinated" with politics at an early age. "The way other kids wanted to be farmers or firemen or cowboys, I wanted to be a politician," he explained.

Mr. EAGLETON did become a politician. In fact, well before his election to the Senate, his political abilities and talents had already been vividly demonstrated.

In 1956, at age of 27, he became the youngest circuit attorney in the history of St. Louis.

Four years later, in 1960, at the age of 31, he became the youngest State attorney general in the history of Missouri.

Four years after that, in 1964, he celebrated his 35th birthday by winning an election to become Missouri's youngest Lieutenant Governor.

By this time, the Saturday Evening Post in 1961, had already put him in its gallery of "people on the way up," and Life magazine, in 1962, had cited him as being one of America's top 100 young leaders. To the people of Missouri, he was the State's liberal "boy wonder."

He has also been a "wonder" in the U.S. Senate where he has been a most effective public official for the people of Missouri and of all the United States. Since taking a seat in the Chamber in 1969, Senator EAGLETON has served on the Senate Foreign Relations Committee; the Labor and Public Welfare Committee; and the District of Columbia Committee. He has also served on the Special Committee on Aging, the Select Committee on Intelligence, and the Appropriations Committee. He is currently the ranking Democrat on the Governmental Affairs Committee.

As a U.S. Senator, THOMAS EAGLETON has been a dedicated and forceful advocate of legislation to improve the well-being of all Americans—especially the poor and powerless. Consequently, he has had a significant role in nearly all of the significant social legislation of the past decade. For example, he was largely responsible for the establishment of the National Institute on Aging, and for the expansion of the services available to the elderly under the Older Americans Act.

He has helped obtain Federal grants for the States to provide nutritious meals for the elderly, supported tougher drug control legislation, and helped draft amendments to the Clean Air Act.

For his efforts in areas of social and human welfare, he has been the recipient of numerous awards including the UPI Missouri Man of the Year Award, the Missouri Association of Social Welfare Award for Outstanding Service, the National Association of Independent Colleges and Universities Distinguished Service Award, and the National Council of Senior Citizens Special Award.

In the area of foreign policy, Senator EAGLETON performed a valuable service for the Nation as an early and effective critic of the war in Southeast Asia, and, with Senators STENNIS and JAVITS, introduced the war powers bill.

He proved beyond any doubt his dedication to his work as a public servant, and his determination to accomplish great things for the people of his State and of the United States. The respect and admiration that all of us have for this conscientious and energetic Senator and our profound respect and admiration for him know no bounds.

Mr. President, the July 24, 1971, issue of Time quoted Senator EAGLETON as saying: "I'd like to . . . hear James Reston or David Brinkley say some day, 'He's a pretty good Senator. He works hard at it.' "

I am not James Reston and I am not David Brinkley, but I consider myself to have some credentials for making an assessment of that sort. I say without the slightest fear of contradiction that Senator EAGLETON worked very hard at being a Senator. I will not say that he was a "pretty good Senator" because he has been so much more than that—he has been one of the most able and conscientious Members to have served in the U.S. Senate during the nearly 30 years I have been a Member of this body.

I know that he has said that he plans to teach and perhaps practice some law. I wish him well in those endeavors, certainly. But I cannot help but express my strong hope that he will make himself available for some form of public service after he leaves this Chamber. Our Nation's need for public servants with his energy, imagination, and conscience is too great for me to feel otherwise—and what TOM EAGLETON has to offer is also too great.

Wherever he is and whatever he is doing, TOM EAGLETON will have the satisfaction of knowing that, to his colleagues who watched him most closely, he is a friend in the truest sense of the word and a model for the devotion to duty and purpose which are essential to this unique body.

My wife Emma and I have only the very best wishes for him and his wife, Barbara, as they move on to the next stage in their lives. May providence continue to watch over and guide them along life's pathway of service to others.

Mr. President, I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1940

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCURRENT RESOLUTION RELATING TO TAX REFORM ACT OF 1986

Mr. PACKWOOD. Mr. President, I am ready to soon propound the unanimous-consent request on the concurrent resolution, House Concurrent Resolution 395, which is the tag tax bill for the Senate.

It will include an amendment to be offered by Senator MELCHER limited to 30 minutes equally divided, relating to income averaging for farmers and an amendment that I will offer that includes all of the other amendments that we have talked about and have been cleared on all sides, and I know of no objection to it.

The unanimous consent will suggest we start at 9 o'clock in the morning on the concurrent resolution.

I am not yet ready to propound it because I am waiting for the minority leader to appear so that I can show it to him, but I will say if it is not agreed to, it is not my intention to propound it again tonight and I think probably not tomorrow, and the concurrent resolution simply will not be taken up this session.

Mr. DURENBERGER. Mr. President, I rise in support of the amendment offered by the distinguished chairman of the Finance Committee. By this amendment, the chairman has ensured the integrity of the resolution before us which is designed to "correct errors in the enrollment of the bill H.R. 3838."

Mr. President, when I examined the resolution adopted by the House, I was appalled to find that the resolution contained a provision repealing section 162(h) of the Internal Revenue Code at the end of 1990.

Section 162(h), which was adopted in the Economic Recovery Tax Act of 1981, allows State legislators to elect to treat their residences in their legislative districts as their "tax homes" for purposes of computing the deduction for living expenses. This provision allows State legislators to claim a deduction for living expenses incurred while the State legislature is in session.

The deduction permitted is far from lavish. Under section 162(h), a State legislator can either deduct the per diem rate permitted to U.S. Government employees or the amount generally allowed to an employee of the executive branch of the State. However, the State per diem cannot exceed 10 percent of the Federal per diem.

Although State legislators are allowed to claim this deduction even if they do not stay away from home over night, the deduction is not permitted for any State legislator whose actual home within the district represented is 50 miles or less from the State capitol building.

Is this a worthwhile provision? I think it is. There are many State legislators who are paid very little for performing important State legislative responsibilities. Nearly all of them must give up more remunerative jobs during the period that the State legislature is in session.

The section 162(h) tax deduction recognizes the special circumstances that many legislators from rural areas face. Many of them return home frequently and do not stay overnight in the State capital. That is just a fact of life, and that is one of the reasons that we adopted this provision in 1981.

In my own State of Minnesota, nearly half of the 67 members of the State senate—33 senators—live more than 50 miles from the State capital. And nearly half of the 134 members of the Minnesota House must travel more than 50 miles to reach the capital. Many of these legislators are small businessmen or women who have taken on the responsibility of representing their rural communities because they believe in public service.

The per diem deduction allowed these legislators under section 162(h) helps these people make ends meet. If we in Congress decided to end this special deduction, by adopting the pending resolution without the chairman's amendment, I can assure you that many well-intentioned people would opt to leave public service because they just cannot afford the cost of being State legislators.

Mr. President, rural America is under enormous economic pressure in the 1980's. The combination of economic depression and economic deregulation has revised the costs of public service and reduced the rural revenue base. Now more than ever rural America needs to be represented by its best and most committed. The House addition would discourage such representation.

But, Mr. President, we are not here to debate the merits of section 162(h). Whether a good provision or an unreasonable provision is not the question. The simple question is: What is it doing in this resolution and how did it get here?

As I read the resolution, it is supposed to "correct errors in the enrollment of the bill H.R. 3838." There is not a single reference in the 925 pages

of H.R. 3838 to section 162(h). There is not a single reference in the 885 pages of the conference report to section 162(h). This provision never appeared in the House tax reform bill nor in the Senate tax reform bill.

In the months of hearings and markup of the tax reform bill in the Finance Committee and in the Ways and Means Committee, not a single minute that I am aware of was devoted to discussing the pros and cons of section 162(h).

Mr. President, repeal of a substantive provision of the law, using a vehicle designed to correct inadvertent drafting errors in the tax reform bill, demeans the legislative process.

Moreover, in this instance, the coincidence between the time for proposed repeal of this provision and the next scheduled State redistricting, strikes me as a blatant attempt at political blackmail against State legislators by the Members of the House.

I applaud the chairman of the Finance Committee for his decision to strike this offensive provision from the resolution.

Mr PACKWOOD. Mr. President, Senator DURENBERGER has made an excellent speech on the subject of State legislators and how their residents are treated for purposes of homes. The House sunsetted the treatment that State legislators now get. The concurrent resolution solution, as it will go through the Senate, if it goes through the Senate, retains the current law and does not sunset it.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I have heard objection will be raised to my propounding this at this moment. I, therefore, indicate it will not be propounded tonight, nor will it be propounded again this session.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1950

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WILSON). Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, the Senator who had indicated previously he might object to this has indicated he will no longer object. I want to cover the ground just once more what it is we are doing.

The tax bill has some errors in it, technical errors—the transition rule for Carnegie Hall, a wrong address for Carnegie Hall. So that there are provisions in the concurrent resolution to correct many, many errors.

They include the States of Arizona, California, Colorado, Connecticut, Delaware, the District of Columbia, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Utah, Vermont, Virginia, Washington, and Wisconsin. These are noncontroversial transitions, technical changes.

In addition the amendment that I will propose will offer the following: One, to delete the market discount bond provisions which are limited to 15 life insurance companies and their affiliates and add a revenue neutral generic rule so that all life insurance companies can participate in the selling of the market discount bonds. That was put in the original tax bill. It turns out these 15 companies, they are the largest life insurance companies. They probably sell 65 to 70 percent of these bonds or handle them. But there are several thousand other small companies located throughout the country that handle them and would have been left out. They will all be treated equally.

We retain the current law for travel expense for State legislators.

We liberalize the low-income housing transitional relief for rural projects, and we clarify the at-risk rules which apply to real estate generally and also will apply to low-income housing.

We change the effective date of the employer life insurance provisions from July 18, 1986, to date of enactment of the Tax Reform Act.

We reinstate the Senate-passed rule on the trucking company transitional rule but limit its value to $8.5 million, which is half of the value.

We delete the custom broker freight forwarder provision.

We make the general aviation transitional rule generic by limiting it to the purchase on or after August 16.

And we delete the transition rules for charitable contributions to the universities. That relates to Louisiana State and I think Texas A&M that has some special provision in the tax bill as it relates to the sky boxes. Those are eliminated and all colleges are treated the same.

We delete the provisions in the House concurrent resolution for three new starters that the House put in and limit the cost of the Physicians Mutual provision at $300,000 a year.

□ 2000

Now, Mr. President, I would like to ask unanimous consent—this is one package, and I am asking for consent for the whole package—that at 9 a.m., on Thursday, October 16, the Senate proceed to the consideration of House Concurrent Resolution 385, making technical corrections in the tax conference report, and it be considered under the following agreement. The following amendments be the only amendments in order, and that they be first-degree amendments and limited to the following time agreements:

An amendment to be offered by Senator PACKWOOD limited to 20 minutes equally divided in the usual form, and that following the conclusion or yielding back of time the amendment be considered agreed to; an amendment to be offered by Senator MELCHER limited to 30 minutes to be equally divided in the usual form dealing with income averaging for farmers.

I further ask unanimous consent that following the disposition of the Packwood and Melcher amendments the Senate proceed without intervening action, motion, or debate to final passage of House Concurrent Resolution 395, as amended.

Finally, I ask unanimous consent that no motions to recommit with or without instructions be in order.

The PRESIDING OFFICER (Mr. COHEN). Is there objection?

Mr. HARKIN. Mr. President, reserving the right to object, if I might inquire of the proponent of the unanimous-consent request, do I understand that under the unanimous consent there would only be two amendments offered and no other amendments would be allowed?

Mr. PACKWOOD. Actually it is only two amendments, one of which I will offer, which is a generic package, which I alluded to, which has numerous amendments in it, which I think are not very controversial. The other would be an amendment by Senator MELCHER relating to income averaging by farmers, which was a subject we voted on before. It was voted on in the original tax bill on a controverted subject. Those would be the only two amendments in order.

Mr. HARKIN. Mr. President, further reserving the right to object, we are reaching the end of the session when the opportunities for Senators to offer amendments are extremely limited and circumscribed. The technical corrections to the tax bill is a bill that would indeed allow certain amendments to be offered that would have no budget impact but on which I believe the Senate would like to express itself.

I have such an amendment relating to requiring the President to submit a report to the Congress prior to February 1, 1987, containing a full and complete accounting of all of the advice, logistical support, or any other assistance provided by U.S. Government personnel to the recent aircraft and crew downed over Nicaragua.

I believe it is important for us to get that kind of information to the Congress. If we do not require that report now, as this Congress is about to adjourn, and we go home, it will be the first of the year, and then we will be forced to wait for a new session of Congress before considering this issue.

I believe there is enough evidence on the face of it right now to warrant a report to Congress by this administration as to just where that plane originated, where the crew came from, who was paid, and if any involvement by U.S. personnel took place. If so, there could be direct violations of the law that Congress has passed.

I know the Senate and the House have spoken on Contra aid. Quite frankly, I wish to revisit that issue. I suppose I could draft an amendment that way. But Congress has spoken, and we will see what happens now with the new involvement with the CIA, and the U.S. Armed Forces in the Contra war.

It appears that we have evidence that U.S. personnel probably are involved, and where there may have been involvement of the National Security Council. I believe, if you will pardon the expression, there is a smoking gun that points directly at the National Security Council. We should express ourselves on whether or not we want a report from the administration on whether it obeyed the law.

My amendment is drafted as such that if there are secret or confidential parts of the report they could go to the appropriate committees, the Intelligence Committees. If the entire report were secret, it could be reported solely to the Intelligence Committees, and Senators would of course have freedom to review that report.

Mr. President, I have the greatest respect and admiration for the Senator from Oregon, for the great work that he has done on the tax reform bill; the hours, the days, the weeks, the great amount of his life that he has put into it. The technical corrections have been cleared to place the tax bill in line with the intent of what we voted on previously. However, I also feel very strongly and very deeply about the issue of United States involvement in the Contra war in Central America.

I am not asking for the Contra aid issue to be revisited. I am asking for a report from the President detailing whether or not any United States personnel were involved in this recent incident in Nicaragua.

So while I really do not want to object to the unanimous consent offered by the distinguished Senator from Oregon, I find myself in the situation where, because of the press of business on the Senate floor and because of the lack of opportunity, I will have to object. Obviously, if this incident had happened a month ago or a month and half ago, I would have had plenty of opportunity to have offered this on other pieces of legislation. I have asked my staff, and others, to see if there is some appropriate vehicle on which I might attach this amendment prior to the Senate adjournment. I am aware of none other than this bill.

I had hoped that perhaps the distinguished Senator from Oregon would allow me to offer this amendment. I do not mean to take much time. The amendment is clear on the face of it. I would be most agreeable to a time limit of 15 or 20 minutes, followed by a vote. If this arrangement could be made, of course, I would not object. So it is not my intent to really hold up this resolution, but it is my intent to do whatever I can to see that my amendment is considered before adjournment.

When I visited Iowa this weekend, I have to tell the distinguished Senator from Oregon that time after time in my home State people came up to me and said, "What are you going to do to get the administration accountable, to hold it accountable for this incident in Nicaragua or at least get it to come forward with the facts and the data as to whether or not it violated the law."

So I have to hold faith with my constituents. I have to hold faith with how I feel very strongly about this issue. And without any assurance from the distinguished Senator that I could offer this amendment, Mr. President, I am constrained to object.

The PRESIDING OFFICER. Objection is heard.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I regret the distinguished Senator from Iowa has to object. He says he wants to do those things for his constituents. That is fine. I think we all have to do that. But I am sitting down there in Kentucky. That is not the richest State in the Nation. We have put together bond pools to give us an opportunity to do those things in our communities, sewer, water, those sort of things that are important to our communities. We need this technical correction bill in order for our communities to participate in something we worked on for over a year.

We have had a hard time getting this legislation in place. The distinguished Senator from Oregon has worked hard to accommodate those of us that have this problem. In my State in some of the counties 50 percent of the county budget was revenue sharing. We have lost revenue sharing. Now we have to go to bond pools in order to have matching money, and do those things for the communities. But we stand here tonight and deny at least 11 States the opportunity to participate because one Senator wants to object.

Why does he not put it on something that does not have to do with our communities, our ability for sewer, water, and structures that are important to our community? No. He stops that. He stops that. And then I think it is regrettable that he would object to this time agreement. He can put it on anything else. But do not deny my community the ability to work on its own. He stands there and says that this is what his constituents are telling him to do. My constituents are telling me we need these bond issues. We need that opportunity to go to the well and to build things for our community. When the Senator objects, he is saying to my people that Nicaragua, the report by the President which he is not going to get from that side—he knows he is not going to get it from that side. Why does he not take his foot off the rest of us and give us an opportunity to take something home that is important to our communities and to our State?

□ 2010

I implore the Senator not to object based on this amendment. There will be other vehicles where he might be able to place it. We will have the debt ceiling. For goodness sake, do not put us in the posture of saying no to those communities who have worked so hard, the Municipal League in my State and the Association of Counties having worked hard to put this together. What you are doing is denying us that opportunity. I regret that my side of the aisle is objecting.

Mr. PACKWOOD. Mr. President, the Senator's State has two of the biggest bond transactions that we have had in this legislation. This resolution has been here for 10 or 11 days. I have had, perhaps 30, 40, maybe 50 Senators come up wanting to add things. In some cases they wanted to undo the alternative minimum tax, or the corporate minimum tax. But I have had at least 10 to 15 who have asked to add something to it that they said was not controversial. It turns out it usually is. It is very seldom that something is totally noncontroversial. And that they only needed 5 or 10 minutes on a side and that it did not cost any money.

I told them all we were not going to have new starters on this, it was all going to be related to the tax bill.

I say that in good faith to all the others who wanted 10 or 15 minutes apiece. Of course, if the Senator from Iowa wants to object that is his right

and I do not harbor any objections to that, but it is not my intention to bring up the concurrent resolution again for the rest of the session.

Mr. EXON. Mr. President, I have been listening to the discussion and I hope we can work something out here. There are many of us who have very important pieces of legislation on the continuing resolution. I would say that the chairman of the Finance Committee has been very helpful. I know he has thrown some irons in the sand on that side. I do hope this can be worked out.

At the same time, I have to put myself in the position of my colleague from Iowa. He has an amendment which he thinks is important. I guess what he is doing is looking down the line and seeing what possible piece of legislation would he be able to offer this on. We all have had experience with a situation where the railroad is there and the train is leaving the station. We always seem to get into a posture toward the time of a sine die adjournment where the trains are all so loaded or they cannot be touched, you cannot put one more piece of freight on the train.

It would seem to me that there should be some way that we can work out something with the help of the leadership on both sides to guarantee a chance for at least an up or down vote on the proposition being offered by the Senator from Iowa on something coming down the line. I think we would agree to that. Then we could move ahead.

Is there someway we can at least guarantee him a vote on this measure?

Mr. PACKWOOD. I have no objection if the Senator from Iowa wants to propose a unanimous-consent request tomorrow for a freestanding resolution. I do not know whether it is in the form of a resolution. I would not object. But I could not in good faith put it on this one when I have turned down so many Senators on both sides of the aisle on things that were so important to them. I have to say it has been 10 days and I have tried to work it out day by day with each Senator.

Senator LAUTENBERG wanted to bring up something and he agreed to back off. Other Senators have been concerned about their problems. Senator METZENBAUM had a number of things he wanted stricken from the bill that are not stricken.

I would like to pass it. There are about 30 States in this that have something of interest, legitimate, that no one that I know of objects to. I hope we can get to it but we can only do it with a unanimous-consent agreement.

Mr. EXON. I hope we can, too, and still protect the rights of the Senator from Iowa.

Mr. HARKIN. Mr. President, I want to make it clear that I am not objecting to bringing up the concurrent resolution. I do not object to that. What I am objecting to is the time agreement and the unanimous-consent agreement on the amendments themselves.

Mr. FORD. Will the Senator yield without losing his right to the floor?

Mr. HARKIN. Yes.

Mr. FORD. The quesiton, then, is if you object, then we lose the unanimous-consent agreement, then we lose the ability to bring that up, and, in essence, you are then killing it. Is that correct?

Mr. HARKIN. I would respond to the distinguished Senator from Kentucky by saying that is not correct. Obviously, unanimous-consent propositions can be amended or changed, to permit consideration of other amendments. Perhaps something else can be worked out here.

As I said, it is not my intent to object to bringing up the concurrent resolution, I am objecting only to the parameters under which it is being brought up.

Mr. FORD. By virtue of the fact that he is objecting to the whole measure by objecting to the unanimous-consent agreement, therefore, those of us who have a vital interest in this piece of legislation are denied the right of having this legislation voted on and helping our communities based on his objection.

Mr. HARKIN. I would respond to the distinguished Senator from Kentucky that if, in fact, the time agreement stays the same, he is right. But that is not the intent of my objection.

Mr. DURENBERGER. I wonder if my colleague from Iowa might respond to a question by way of clarification.

I came to the floor after I heard the Senator from Iowa describe briefly his concern for what he described as a study or a report, I believe, from the administration or the President relative to something going on in Nicaragua. So I come here with two concerns: one, because I have spent the better part of the last 2 years of my life on this tax bill, not as much time as our colleague from Oregon but over that long a period of time. So I have concerns that we all share in that regard. But I am also here as chairman of the Intelligence Committee, someone who has more than a passing concern that I share with the Senator from Iowa, and probably everybody in the committee, for what may or may not be going on in Nicaragua.

I would just perhaps explore a little bit with my colleague from Iowa precisely what kind of information it is that he thinks the President could bring to us and the American public, through this vehicle, through some amendment to the technical corrections bill, that might not be achieved in some other manner. For example, if the Senator from Iowa made a request through the Foreign Relations Committee or if the Senator from Iowa made a request through the Senate Select Committee on Intelligence, for specific information relative to Nicaragua, I would expect that, as in the case of similar requests with regard to certain Central American countries in the past, the chairs of both those committees might be willing to honor that kind of request.

I cannot make any particular representation as to my position or that of the Intelligence Committee members without knowing a little more about what kind of information it is that my colleague from Iowa is looking for.

If he wants to explore that line a little bit so that we might potentially see our way clear to bringing up the tax bill, I would be glad to explore that with my colleague.

□ 2020

Mr. HARKIN. If the distinguished Senator would yield for my response.

Mr. DURENBERGER. I would be delighted to.

Mr. HARKIN. Let me read the proposed amendment. It is very short. I shall read it in its entirety to the chairman of the Select Committee on Intelligence.

SEC. —. (a) On or before February 1, 1987, the President shall prepare and transmit to the Congress a report containing a full and complete accounting of all advice, logistical support, or any other assistance provided by United States Government personnel to Eugene Hasenfus, Max Gomez, William J. Cooper, Wallace B. Sawyer, Jr., Corporate Air Services, Southern Air Transport, and any other American citizen providing assistance to the Nicaraguan democratic resistance, except for assistance authorized by section 105 of Public Law 99-169 and except for humanitarian assistance to the Nicaraguan democratic resistance authorized by Public Law 99-88.

(b) As used in section (a), the term "United States Government personnel" means—

(1) any member of the United States Armed Forces who is on active duty or is performing inactive duty training; and

(2) any officer or employee of any department, agency, or other component of the executive branch of the United States Government; and

Mr. DURENBERGER. If I understand, and maybe the Senator can correct me, I understand that he is looking for a report which would indicate what kind of advice or logistical support might have been supplied by U.S. officials to certain named Americans outside the parameters of existing law or exceptions to existing law.

Mr. HARKIN. Would the Senator repeat that question?

Mr. DURENBERGER. My understanding of the amendment is that what the Senator from Iowa is looking for from the President is enumeration of advice and logistical support provided by U.S. Government officials—or U.S. personnel, I think was the word

he used—to certain named American citizens. I heard at least four of the names. Does that fairly summarize the Senator's request?

Mr. HARKIN. Yes, Mr. President.

Mr. DURENBERGER. I think it is obviously an appropriate request. It is the kind of request the Senator from Minnesota, who chairs the Intelligence Committee, has in effect already made without being quite that specific. I do not have a precise response from the administration at this point. My interests were slightly professional. I had been concerned that the Central Intelligence Agency is taking a lot of heat for what is going on under the auspices of the United Nicaraguan Opposition and the military branch of the FDN. As yet, I do not have a precise response.

If I formalize that request in some way, I can tell the Senator the response that I expect I would get. That is none. I would expect that that would be the response. Or it might be clarified and amplified as follows: That to the best of the knowledge of anyone in the administration, Eugene Hasenfus and Mr. Gomez and others were employed by the United Nicaraguan Opposition or by some other organization, and that the specifics regarding advice or logistical support from United States personnel are that none exists; that whatever advice or logistical support they got came from or through the United Nicaraguan Opposition.

Where we could take it from there given the protections, constitutional and otherwise, around the Office of the President, this Senator is a little less clear about.

Let me make one other point and that is as to the utility of the information. I think it is appropriate to find out whether or not any U.S. personnel or Government officials are involved in violations of law in one way or another. That is an appropriate request. It is the kind of request that the Intelligence Committee and perhaps the Foreign Relations Committee might, during the course of their review of Nicaragua, make anyway.

I want to make another point to my colleague from Iowa and probably to some others on the floor, that seems to have gotten lost in some of this publicity over what has been going on in Nicaragua. That is, when you vote for the continuing resolution, if you decide to vote for the continuing resolution, all of this sort of thing is relatively moot unless you are concerned retrospectively about who may have provided some advice or some logistical support. Because when, on the morrow, we vote to approve the continuing resolution, we will also vote to approve the $100 million aid package to the United Nicaraguan Opposition and to the Contras.

At that point, in effect, you get to replace Eugene Hasenfus; you get to replace Mr. Gomez; you get to replace the airplanes and the AK-47's and the ammunition and everything else. So whatever some of these privateers may have been doing on contract with or on behalf of the Contras over the last year or so, your Government will now undertake to do.

So, while I do not mean to belittle the Senator's request and I do not mean at all to belittle the concern that the American people have for the flight that went down and maybe other flights or supplies, the fact of the matter is that within a week or two, that is all over with. They may well be out of money now. There probably have not been many flights since that particular C-123 model K went down. That is all over with.

Starting a week or two from now, the U.S. Government supplies the financing for the airplanes, for the equipment, and so forth. If you think there were problems regarding Mr. Hasenfus and other people, I suspect you are going to have substantially more to concern yourself with when we get back here in January.

I say that, Mr. President, so that to the degree that the Senator's concern and mine are the same—I do not think we should be down there providing 100 million dollars' worth of aid. I do not think Eugene Hasenfus or anybody else should be sent in there to carry on these kinds of activities. I question the value at this state of the game, other than to determine whether or not someone deliberately set on a course to violate the law——

Mr. HARKIN. That is it.

Mr. DURENBERGER. I question the value of the Senator's using this particular vehicle to try to get to the heart of a problem that is not going to go away regardless, because whatever was done in the past, potentially illegally, is going to be done in the future legally.

Mr. HARKIN. Will the Senator yield on that?

Mr. DURENBERGER. I am glad to yield.

Mr. HARKIN. I thank the Senator. He is very correct in everything he says. There is not one bit of that that I disagree with.

The PRESIDING OFFICER. The Senator will suspend. The Senate is not in order.

Mr. HARKIN. I thank the Chair.

The Senator from Minnesota hit the nail on the head when he said the value of this report would be to determine whether or not the administration did indeed violate the law that was passed by Congress. I believe that has value to us. I think it will have value to the next Congress as it reconvenes in January to determine whether or not it will continue on the path this Congress has set on aid to the Contras. If, in fact, it becomes clear that the administration has indeed violated the law, I think that says something about the conduct of our operations in Central America down there heretofore and says something about the goals and methods this administration pursues in supplying aid to the Contras.

□ 2030

It has value for the American people to know whether or not their trust has been violated, that law has been broken, particularly if that trust has been violated by their government. Therein lies the value of this. The Senator is absolutely right; in another week after we pass the continuing resolution we become the suppliers of the Eugene Hasenfuses. We become the ones who send in the aircraft. We become the ones who send in the arms, not some privateer or not the National Security Council or whoever may have been operating this program. But that is what the law will provide. Now I am interested in whether or not the administration has violated the current law. I believe it has value to the American people to know whether or not that has occurred.

Mr. DURENBERGER. I do not disagree with the potential for value, but I would argue that the American people have become either a little cynical or at least somewhat doubtful of the policy and who is telling the truth and where we are headed regardless because by a vote of both the House and the Senate, which will be reconcurred in here tomorrow, we are endorsing whatever policy the administration has followed and whatever program they have selected to implement that policy.

I do not think the President of the United States has ever made any bones about the fact that he is encouraging the kinds of activities that take place here, obviously within the law. I suspect that any investigation that is undertaken, whether it is in connection with this bill or in connection with the specific request, which I am certainly willing to consider presenting to the members of the Intelligence Committee, I am sure you are going to find out that while the administration may in some way have been generally familiar with the activities of the Contras and their resupply activity, they avoided the specifics of direct involvement in the actual supply.

I am not sure that there is the capacity in this body—and I know there is not the legal or the technical capacity in the Intelligence Committee—for us to conduct an independent investigation of who said what to whom. So I would suggest to my colleague that while it may seem very important today, if we looked at it a week or two

or three or certainly 3 or 6 months from now when this report may have been made, compared to what is going on at that particular point in time in Nicaragua, compared to what you will observe by way of your investment and my investment in the Contras at that given point in time, whatever involvement we may have—and I suspect it is relatively minor—it will seem like practically nothing.

I would like to be able to assure my colleague that our concerns are as deep as his, particularly those of us who have never agree that this was an appropriate approach to the problem and that obviously in carrying out our responsibility as it relates to the authorized activities, such as they may be, of the intelligence agencies and other related U.S. agencies we will make the kinds of inquiries about which the Senator from Iowa is concerned.

Mr. President, I have a deep concern for the passage of this bill. I have a deep concern for bringing the 99th Congress to a close, but I also have a deep concern that I share with my colleague from Iowa relative to the situation in Nicaragua. I do not think our concerns are at all disparate. I think, however, I have to disagree with him on the course he would suggest we use in the particular case of determining what involvement the Government may have had with the so-called privateer.

Mr. President, I will be glad to yield the floor.

Mr. HARKIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 2050

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ILOPANGO AND THE CONTRA SUPPLY NETWORK

Mr. HARKIN. Mr. President, after listening to the denials of the White House, Vice President Bush, and retired General Singlaub, I found myself wondering whether the Hasenfus incident ever occurred.

First, the administration knows nothing of the C-123 downed over Nicaragua. The Central Intelligence Agency disavows any association with it, and even retired Major General Singlaub, who has been completely forthcoming about his ties with the Contra supply network, does not own it.

Yet, that same plane was used in a DEA drug sting in 1984; and the CIA put on that C-123 the camera that took the picture of the Nicarguan official cited by President Reagan in an earlier television broadcast.

Second, neither the White House nor Singlaub claim any ties to Hasenfus and his associates. Disregard the fact that Hasenfus's wife, Sally, has stated that her husband works for the CIA. Hasenfus's own statements notwithstanding, our Government was not involved. So, the White House would have us believe.

Third, Max Gomez, former CIA agent charged as the coordinator for Contra supply operations in El Salvador, is not really involved in the Hasenfus and other secret missions. According to the Vice President, Gomez is really a secret employee of the Salvadoran Air Force with responsibility for directing Salvador's war against its Communist guerrillas. In fact, Gomez is so secret an agent that El Salvador's President and the Chief of Staff of its military do not know about his activities.

In other words, he is supposed to be an employee of the Salvadoran Air Force. Yet, both the President of El Salvador and the Chief of Staff of his military say they do not know anything about his activities.

It seems that the administration would like us to believe that the entire incident did not occur, that there is no such person as Eugene Hasenfus, and that the C-123 cargo plane seen on TV screens on evening news shows over the past week never even flew over Nicaragua.

The fact is, Mr. President, that there is an Eugene Hasenfus, that the remnants of a C-123 are strewn across southern Nicaragua and more alarming for the administration, that reports keep surfacing of Hasenfus, Max Gomez, and their associates ties with the United States and Salvadoran Governments.

And in its rush to recess, the Congress should not avoid this issue either. As I said yesterday, nothing less than the laws of this land, and the integrity of the Congress, which wrote those laws, are at stake.

Today's New York Times gives greater detail to Contra supply missions flown out of Ilopango Air Base in El Salvador.

The Times piece paints a picture of a shadow operation, where phantom American guests travel in and out of the Ilopango base, with the knowledge and consent of Salvadoran Air Force Chief of Staff, Rafael Bustillo.

Many of the guests are never officially in the country. Yet, according to news stories, agents from the CIA and the U.S. Military Group of our Embassy in San Salvador, are deeply involved in the operation.

Supply flights to the Contras, according to the Times, began in the spring of 1983, with at least seven CIA agents, a private propeller-driven plane and the loan of some of the Salvadoran C-47's bought with American aid. Sometime in 1984, the Salvadoran Air Force began to permit Contra forces to launch air and sea attacks from Ilopango. The flights out of Ilopango have continued; and earlier this year, a plane laden with supplies for the Contras crashed soon after takeoff from Ilopango.

Mr. President, I believe the New York Times article of this morning contains very serious allegations as to possible U.S. involvement in aiding and supplying the Contras, in contravention to the laws passed by Congress.

Mr. President, I ask unanimous consent that the article be printed in its entirety at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SALVADORAN AIR BASE IS CALLED CENTER FOR C.I.A. OPERATIONS

(By Lydia Chavez)

SAN SALVADOR.—Behind the high concrete-block walls that keep the Ilopango air base here from the public's view is a drab two-story building. Over the last three years, the building has served as the waiting room for agents working for the Central Intelligence Agency, leaders of the Nicaraguan rebels, mercenaries and American military advisers, according to American officials and Nicaraguan rebel sources.

Now more than ever the base is the center of C.I.A.-supported operations to supply Nicaraguan rebel forces, according to an American shot down in a supply plan over Nicaragua.

American men in civilian clothes often pass through the base's gates and American official says privately that it is the center of C.I.A. and other clandestine operations here.

Many American visitors to the base, on the eastern edge of San Salvador, are never "officially" in the country. The honor code of silence prevails.

The base is run by the politically conservative and staunchly independent Gen. Juan Rafael Bustillo. One of the general's most recent phantom guests was the longtime C.I.A. agent, known by the Alias Max Gomez, who directed the contra supply flight shot down by Nicaraguan soldiers last week, according to two highly reliable sources with close C.I.A. contacts here and Eugene Hasenfus, the American captured in Nicaragua.

Vice President Bush said this week that he had met Mr. Gomez three times. He said Mr. Gomez was an adviser in counterinsurgency who worked in El Salvador with the approval of President José Napoleón Duarte and the armed forces.

Despite Mr. Bush's statements, both Mr. Duarte and the armed forces chief, Gen. Aldolfo O. Blandón, deny knowing Mr. Gomez or approving his work.

"The Air force is very jealous of its independence," said Mauricio Salvador Hernández, a spokesman for the armed forces, in trying to explain why Vice President Bush and not the Salvador high command might be ready to acknowledge that Mr. Gomez was an air force adviser.

Although the other branches of the armed forces have often baffled American officials, the air force has always been considered closer to the American way of operating. Nearly all of its pilots have trained in

the United States and most speak fluent English. In addition, the air force has never been accused of lacking discipline.

The air force's military and political importance, as well as its key role in supplying the Nicaraguan rebels, have made it a favorite of the C.I.A. station here, according to Western diplomats.

"The agency loves the air force," one diplomat said.

On a recent afternoon at the air base, an American who identified himself as an adviser sat behind his desk watching a pet parrot jump from the edge of a coffee cup to the desk.

"I HAVE NOTHING TO SAY"

An American sitting with him, dressed in levis and a T-shirt and carrying a radio, declined to identify himself. A third American who walked into the office dressed in an olive-green flight suit and a U.S.S. Iowa cap turned and left when he saw there was a visitor.

"I have nothing to say about what is going on," the adviser said, and quickly invited the reporter to leave his office.

Many men who claim to have no direct link to the American Embassy and little reason for being in El Salvador can be seen in Salvadoran restaurants and hotels. Americans who refuse to identify themselves are among them.

They are not counted among the 55 American advisers based permanently in the country or the more than 100 who are generally here on any one day on temporary assignments. These will readily identify themselves as advisers attached to the United States Embassy. The others will simply say they are passing through or are here "on business."

At a news conference in Managua after his capture, Mr. Hasenfus said that at least 25 people were working with him to supply rebels out of the Ilopango air base. Flight logs from the downed plane list more than 30 crew members who do not have Latin names.

FLIGHTS BEGAN IN 1983

Mr. Hasenfus and the two American crew members killed when the plane was shot down in southern Nicaragua on Oct. 5 carried Salvadoran Air Force cards signed by General Bustillo identifying them as American military advisors here. The American Embassy denied they were advisers.

The tight security around the base and the discipline within made it the perfect place to run covert American operations, American officials who have lived in El Salvador said.

The supply flights to the contras in Nicaragua began in the spring of 1983 with at least seven C.I.A. agents, a private propeller-driven plane and the loan of some of the Salvadoran C-47's bought with American military aid, according to two American officials living in El Salvador at the time.

The spring of 1983 was a busy time at Ilopango and the activity underscored both the power and the independence of General Bustillo.

The longtime air force commander, who likes fast cars and generally dresses in a flight suit, threatened mutiny unless Alvaro Magana, the provisional President at the time, dismissed Defense Minister Jose Guillermo Garcia. The Defense Minister was quickly replaced, confirming General Bustillo's position as one of the most powerful men in the armed forces.

AIR FORCE BUILDUP BEGINS

The spring of 1983 also marked the beginning of an air force buildup that has made it the most crucial service in fighting the war against the leftist insurgents, according to American officials.

At the time it had 10 helicopters, several C-47's and a few propeller planes in 1983; now it has more than 60 helicopters 12 helicopter gunships, at least five AC-47 gunships and more than 10 combat jets.

In using the air base to run supply flights to the contras in Nicaragua in 1983, the C.I.A. was operating without the Congressional restrictions imposed in August of 1984 that prohibit any help to military or paramilitary groups fighting the Nicaraguan Government.

When news of the flights were leaked to the press in October 1983, General Bustillo, a colonel at the time, dismissed a chief aide, but the flights continued until the Congressional restrictions were imposed, American officials said.

Sometime in 1984, the air force also began to premit contra forces to launch air and sea attacks from Ilopango. At the time, Eden Pastora Gomez, a contra leader who has since retired from the battle, was a frequent visitor at the base, according to American and contra sources.

(Mr. DANFORTH assumed the Chair.)

Mr. HARKIN. Mr. President, congressional restrictions on U.S. officials providing direct and indirect military aid to the Contras still apply. Yet, recent news reports tie officials in the Vice President's office to the secret supply operation. According to reports, Max Gomez, who coordinates the Contra missions at Illopango, was introduced to General Bustillo of the Salvandoran Air Force by Mr. Donald Gregg, the National Security Adviser to the Vice President.

The Vice President claims that Gomez is assigned to counterinsurgency work in El Salvador. Yet President Duarte and the chief of staff of the Salvadoran military deny any knowledge of Gomez or his activities.

Mr. President, I repeat my questions of the past week, questions which I have repeated every day on the Senate floor and which I will continue to repeat as long as the Senate is in session this year: who is Max Gomez? What are his activities in El Salvador? On whose payroll is he? What kind of advice and assistance and direction is he getting from the Vice President or from Donald Gregg or from other members of the National Security Council? I ask these questions of Vice President BUSH, his national security adviser, Mr. Gregg, and of the Salvadoran Government.

What role, if any, has the Central Intelligence Agency played in the Contra supply flights flown out of Illopango Air Base since 1984? What assistance, if any, have members of the U.S. Milgroup in San Salvador given to these Contra supply missions?

What assistance, if any, has been provided these missions by the United States Embassy in El Salvador, and what knowledge does our Embassy have of the supply flights run out of Ilopango?

As I pointed out the other day, Mr. President, to the best of my knowledge and understanding, before any U.S. citizen can get in and out of Ilopango Airport, that person must have a clearance by the U.S. military group there. It is obvious on the face of it that Mr. Hasenfus and his pilot and copilot had those clearances. If they were issued by the U.S. military group at Ilopango, who ordered them to do so? That would constitute direct assistance to the Contras and I submit in contravention of the law passed by Congress.

Mr. President, the Hasenfus mission raises another series of questions regarding the role of the Salvadoran Government in transporting arms from its borders to the Contras fighting inside Nicaragua.

Since 1981, the Reagan administration has explained the Contras as a vehicle to halt the transshipment of arms from Nicaragua to the Salvadoran guerrillas. Now, if recent stories are correct, the Salvadoran Government has secretly supported the shipment of arms to the Nicaraguan Contras.

It seems very odd to me that the President, on the one hand, would be arguing we have to stop all supplies of arms from Nicaragua to the Salvadoran guerrillas, but it is perfectly fine for the Salvadorans to supply arms to the Contras fighting in Nicaragua. Evidently, it appears to be permissible for the administration to circumvent the law passed by Congress prohibiting our involvement in that.

What role has the Salvadoran Government and the Salvadoran Air Force played in the Contra supply operations? Has the Salvadoran air base at Ilopango been used to store arms destined for the Contras and to fuel planes carrying those arms and to house people flying those planes? What ties has Salvadoran Air Force Chief of Staff, General Bustillo, maintained with the United States Central Intelligence Agency and the station chief at the United States Embassy in San Salvador?

Mr. President, what may be happening here, again not only in contravention of the laws passed by Congress but also in contravention of our agreements with other nations in Central America, is an escalation of the conflict to the point where we are involving the Salvadoran Government in conducting a proxy war against the Nicaraguan Government, a government with which, I might point out, we have full diplomatic relations and with which we are at peace.

I raised those issues the other day as to the possible violations of the Neutrality Act because of the fact that we are at peace with Nicaragua and we do

maintain diplomatic relations with them.

But do we see here the beginning of a breakdown in the relationships between the Salvadoran Government and the Nicaraguan Government with, I submit, the Honduran Government caught right in the middle?

Will we see more and more reports come out that we have put pressure on the Salvadoran Government or the Salvadoran military or both to involve itself very heavily in the proxy war against the Nicaraguan Government? If so, I suggest that this administration has led us down a very dangerous path and has placed the Salvadoran Government in a very precarious position, not only with Nicaragua but with all of its neighbors and allies in not only Central America but all of Latin America.

We may be, because of these actions, unwittingly—maybe even wittingly—undermining the beginnings of a fragile democracy in El Salvador.

I could see the scenario develop that as more and more of this information comes out, as this administration denies its role in this mission and in other missions, as more and more blame is placed on the Salvadoran Air Force, at the Ilopango Air Base, on General Bustillo, that the Salvadoran military and Government will be drawn into direct conflict with Nicaragua.

I do not believe that President Duarte wants that outcome nor do I believe that the Salvadoran people want it. I doubt whether the Salvadoran military wants that either.

□ 2110

We put that very tenuous democracy in El Salvador at risk. At risk from whom? From the Nicaraguans? No, not at all. But at risk from the right-wing elements and the militarists in El Salvador who have never much cared for democracy anyway and who would just as soon see a return to military dictatorship in El Salvador. They would use this involvement as the pretext for taking such action.

The downing of the C-123 and the capture of Mr. Hasenfus has implications that none of us would like to imagine. That is why it is so critical, Mr. President, that we have a full accounting from this administration. That is why I took the floor this evening to object to the unanimous consent proffered by the distinguished Senator from Oregon earlier, because I believe it is in our national interests, I believe it is in the best interests of the civilian Government of El Salvador, and I believe it is in the best interests of the Contadora peace process to insist and ensure that our Government provides a full accounting on this matter.

Quite frankly, I would have hoped that neither our Government nor our administration would have circumvented the laws. And I would hope that the El Salvadoran military had not been sucked into this operation. I believe that by insisting that this administration make a full and complete accounting to the Congress that we can find out whether or not our administration was involved in the Hasenfus and similar missions and if so to what extent. Then perhaps we can help the government of Duarte in El Salvador.

We must not permit the escalation of the war in Central America until Congress and the American public receive all the facts on this secret private war being waged out of Ilopango.

We must not permit it to be said that Congress slept while the laws were broken and while America's credibility was being destroyed.

We must not let it be said that once again an administration broke the law and Congress did not demand a full accounting.

Mr. President, I yield the floor.

Mr. DOLE. Mr. President, I thank the Senator from Iowa.

OMNIBUS DRUG ENFORCEMENT, EDUCATION, AND CONTROL ACT

Mr. DOLE. Mr. President, we have had a number of our colleagues on both sides and very competent staff working on the closure vote—I cannot remember precisely when that was—to try to reach some agreement on this antidrug bill so we could pass it, get it back to the House, and make certain we have a drug bill this year.

I am going to propound a unanimous-consent agreement. I think it has been cleared. Let me explain just a couple of provisions.

There will be an amendment offered by myself and I think the minority leader which would modify the pending leadership amendment to strike the death penalty, and insert in lieu thereof a provision worked out by Senators LEVIN, KENNEDY, HATCH, THURMOND, BIDEN, and people on both sides of the issue, which is life imprisonment with no probation or parole under certain conditions. That has been agreed to.

There would also be some technical amendments and clerical amendments offered by the leadership and which has been cleared on both sides. They are technical I am advised because I want to see a drug bill passed and not spend another half a day trying to determine what we are going to do.

I have agreed that I would withdraw the voluntary checkoff provision. My own view is it is a good idea. Senator LONG has a different view and feels very strongly about it. We could probably engage in several hours of debate and have a vote. In the meantime, we might lose the drug bill.

We can raise that at another time. I think the important thing is to get the provisions that have been worked out in a bipartisan way up and down the line, and pass them. We can address the death penalty next year. We have had assurances from members of the Judiciary Committee that they would see to it that we would have a chance to do that sometime this spring.

So no other amendments would be in order. We have to stop the nongermane amendments or we are never going to pass the drug bill. So I would now propound that request with that explanation.

I ask unanimous consent that once the Senate resumes consideration of the House message to accompany the drug bill, H.R. 5484, it be considered under the following agreement: That the following amendments by the only amendments in order to the motion to concur and they be limited to 10 minutes each equally divided in the usual from; one amendment to be offered by Senators DOLE and BYRD of their designees dealing with the death penalty—I have explained what this is; one amendment to be offered by Senator DOLE and BYRD or their designees making technical an clerical changes in the drug bill; one amendment by Senator DOLE to withdraw the checkoff provision as requested by Senator LONG; that no other amendments be in order; that following the disposition of the above-mentioned amendments the Senate proceed to vote without any intervening motion or debate to adoption of the motion to concur in the House amendments with further amendments identified above.

Finally, I ask unanimous consent that no motions to recommit with or without instructions be in order, that adoption of the motion to concur with the above-mentioned agreements occur no later than 12 noon on Thursday, October 16.

Mr. BYRD. Mr. President, reserving the right to object, I shall not object, the distinguished majority leader has accurately stated what the various actions will accomplish. He has indicated that while we will be offering a substitute amendment to the death penalty, he has made clear that that substitute amendment would provide for a mandatory minimum of life imprisonment without probation or parole. He has also indicated that the checkoff provisions to which Senator LONG objects will be dropped.

I think this will be a good agreement. We, I think, can pass this bill this evening, possibly by voice vote, in the interest of saving time and realizing that it still has to go back to the House. If there were a rollcall vote on the bill, it would probably have to be put off until tomorrow because there are Senators on both sides who would

want to be here, and we would want to protect them.

I, like the majority leader, favor the death penalty. But it is a situation in which we can make our choice. We can get a drug bill which has a minimum mandatory life sentence in it without probation or parole but without a death penalty, or we can get neither a death penalty nor a bill. So I think it is very clear as to what our choice would be.

I have no objection. I understand Senator LEVIN is on his way up and wants to be here before the consent is finally ordered by the Chair.

Mr. DOLE. Mr. President, let me indicate that I have had a request by the Senator from Colorado, Senator ARMSTRONG. His request is unless we can provide for an amendment on so-called antistrike force, as a result of the Clairborne impeachment, that he would want to offer it to this bill. I can assure Senator ARMSTRONG we will bring it up as a freestanding amendment sometime tomorrow or Friday. I think that will satisfy his request.

Mr. BYRD. I remove my reservation.

The PRESIDING OFFICER. Is there objection to the request?

Without objection, it is so ordered.

□ 2120

AMENDMENT NO. 3464

Mr. DOLE. Mr. President, I send an amendment to the desk on behalf of myself, and Senator BYRD, and other Senators who are working on this proposal.

Mr. President, this is the amendment which modifies the present death penalty provision by requiring under certain conditions there be mandatory life imprisonment with no probation and no parole. I ask unanimous consent that the amendment contained in the motion to concur with an amendment be modified, and I send that amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself and Mr. BYRD, proposes an amendment numbered 3464.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out subtitle U and insert in lieu thereof the following:

SUBTITLE U—MANDATORY LIFE IMPRISONMENT WITHOUT POSSIBILITY OF PAROLE FOR CERTAIN OFFENSES

SEC. 1951. LIFE IMPRISONMENT WITHOUT POSSIBILITY OF PAROLE FOR CERTAIN CONTINUING CRIMINAL ENTERPRISE DRUG OFFENSES.

(a) ELEMENTS OF OFFENSE.—Section 408(a) of the Controlled Substances Act (21 U.S.C. 848(a)) is amended—

(1) by striking out "(a) Any" and inserting "(a)(1) Except as otherwise provided in this section, any" in lieu thereof;

(2) by striking out "; except that if" and inserting ". If" in lieu thereof; and

(3) by adding at the end the following:

"(2) If an individual in the course of a continuing criminal enterprise:

"(A) intentionally killed the victim;

"(B) intentionally inflicted serious bodily injury which resulted in the death of the victim; or

"(C) intentionally engaged in conduct intending that the victim be killed or that lethal force be employed against the victim, which resulted in the death of the victim;

then such individual shall be subject to a sentence of life imprisonment without possibility of parole in accordance with this section.

(b) PROCEDURE APPLICABLE WITH RESPECT TO A SENATOR OF LIFE IMPRISONMENT.—Section 408 of the Controlled Substances Act is amended by adding at the end the following:

"HEARING REQUIRED WITH RESPECT TO A SENTENCE OF LIFE IMPRISONMENT

"(f) A person shall be subjected to life imprisonment without possibility of parole for any offense under this section only if a hearing is held in accordance with this section.

"NOTICE BY THE GOVERNMENT IN LIFE IMPRISONMENT PENALTY CASES

"(g)(1) Whenever the Government intends to seek a sentence of life imprisonment without possibility of parole for an offense under this section for which one of the sentences provided is life imprisonment without possibility of parole, the attorney for the Government, a reasonable time before trial or acceptance by the court of a plea of guilty, shall sign and file with the court, and serve upon the defendant, a notice—

"(A) that the Government in the event of conviction will seek a sentence of life imprisonment without possibility of parole; and

"(B) setting forth the aggravating factors which the Government will seek to prove as the basis for a sentence of life imprisonment without possibility of parole.

"(2) The court may permit the attorney for the Government to amend this notice for good cause shown.

"HEARING BEFORE COURT OR JURY

"(h)(1) When the attorney for the Government has filed a notice as required under subsection (g) and the defendant is found guilty of or pleads guilty to an offense under subsection (a)(2), the judge who presided at the trial or before whom the guilty plea was entered, or any other judge if the judge who presided at the trial or before whom the guilty plea was entered is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. The hearing shall be conducted—

"(A) before the jury which determined the defendant's guilt;

"(B) before a jury impaneled for the purpose of the hearing if—

"(i) the defendant was convicted upon a plea of guilty;

"(ii) the defendant was convicted after a trial before the court sitting without a jury;

"(iii) the jury which determined the defendant's guilt has been discharged for good cause; or

"(iv) after initial imposition of a sentence under this section, redetermination of the sentence under this section is necessary; or

"(C) before the court alone, upon the motion of the defendant and with the approval of the Government.

"(2) A jury impaneled pursuant to paragraph (1)(B) shall consist of 12 members, unless, at any time before the conclusion of the hearing, the parties stipulate with the approval of the court that it shall consist of any number less than 12.

"PROOF OF AGGRAVATING AND MITIGATING FACTORS

"(i) Nowwithstanding rule 32(c) of the Federal Rules of Criminal Procedure, when a defendant is found guilty of or pleads guilty to an offense under subsection (a)(2), no presentence report shall be prepared. In the sentencing hearing, information may be presented as to any matter relevant to the sentence and shall include matters relating to any of the aggravating or mitigating factors set forth in subsections (l) and (m), or any other mitigating factor. Where information is presented relating to any of the aggravating factors set forth in subsection (m), information may be presented relating to any other aggravating factor. Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to such mitigating or aggravating factors may be presented by either the Government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury. The Government and the defendant shall be permitted to rebut any information received at the hearing and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any of the aggravating or mitigating factors, and as to appropriateness in that case of imposing a sentence of life imprisonment without possibility of parole. The Government shall open the argument. The defendant shall be permitted to reply. The Government shall then be permitted to reply in rebuttal. The burden of establishing the existence of any aggravating factor is on the Government, and is not satisfied unless established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless established by a preponderance of the information.

"RETURN OF FINDINGS

"(j) The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return special findings identifying any mitigating factors, and any aggravating factors set forth in subsection (m), found to exist. If one of the aggravating factors set forth in subsection (m) is found to exist, a special finding identifying any other aggravating factor may be returned. A finding of any aggravating or mitigating factor by a jury shall be made by unanimous vote. If no aggravating factor set forth in subsection (m) if found to exist, the court shall impose a sentence, other than life imprisonment

without possibility of parole authorized by law. If one or more aggravating factors set forth in subsection (m) are found to exist, the jury, or if there is no jury, the court, shall then consider whether the aggravating factors found to exist sufficiently outweigh any mitigating factor or factors found to exist, or in the absence of mitigating factors, whether the aggravating factors are themselves sufficient to justify a sentence of life imprisonment without possibility of parole. Based upon this consideration, the jury by unanimous vote, or if there is no jury, the court, shall return a finding as to whether such sentence is justified.

"IMPOSITION OF SENTENCE

"(k) Upon a finding that a sentence of life imprisonment without possibility of parole is justified, the court shall sentence the defendant to such sentence. Otherwise the court shall impose a sentence, other than life imprisonment without possibility of parole, authorized by law.

"MITIGATING FACTORS

"(1) In determining whether a sentence of life imprisonment without possibility of parole is to be imposed on a defendant, the following mitigating factors shall be considered but are not exclusive:

"(1) The defendant was less than 18 years of age at the time of the crime.

"(2) The defendant's capacity to appreciate the wrongfulness of the defendant's conduct or to conform the defendant's conduct to the requirements of law was significantly impaired, but not so impaired as to constitute a defense to the charge.

"(3) The defendant was under unusual and substantial duress, although not such duress as constitutes a defense to the charge.

"(4) The defendant is punishable as a principal (as defined in section 2(a) of title 18 of the United States Code) in the offense, which was committed by another, but the defendant's participation was relatively minor, although not so minor as to constitute a defense to the charge.

"AGGRAVATING FACTORS

"(m) If the defendant is found guilty of or pleads guilty to an offense under subsection (a)(2), the following aggravating factors shall be considered but are not exclusive:

(1) The defendant has previously been convicted of another Federal offense or a State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute.

"(2) The defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury upon another person.

"(3) The defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the distribution of a controlled substance.

"(4) In the commission of the offense or in escaping apprehension for a violation of subsection (a)(1), the defendant knowingly created a grave risk of death to one or more persons in addition to the victim of the offense.

"(5) The violation of this chapter in relation to which the conduct described in subsection (a)(2) occurred was a violation of section 405.

"(6) The defendant committed the offense in an especially heinous, cruel, or depraved manner.

"(7) The defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value.

"(9) The defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value.

"(10) The defendant committed the offense against a judge, a law-enforcement officer, or an employee of a penal or correctional institution, while that victim was performing official duties or because of that victim's status as a public servant of the United States, or a State or political subdivision of the United States. For purposes of this paragraph the term 'law-enforcement officer' means a public servant authorized by law to conduct or engage in the prevention, investigation, or prosecution of an offense.

"INSTRUCTION TO JURY ON RIGHT OF THE DEFENDANT TO JUSTICE WITHOUT DISCRIMINATION

"(n) In any hearing held before a jury under this section, the court shall instruct the jury that in its consideration of whether a sentence of life imprisonment without possibility of parole is justified it shall not consider the race, color, national origin, creed, or sex of the defendant, the victim—the jury shall return to the court a certificate signed by each juror that consideration of race, color, national origin, creed, or sex of the defendant or the victim was not involved in reaching his or her individual decision.

"SENTENCING IN CASES IN WHICH A SENTENCE OF LIFE IMPRISONMENT IS NOT SOUGHT OR IMPOSED

"(o) If a person is convicted for an offense under subsection (a)(2) and the court does not impose a sentence of life imprisonment without possibility of parole, the court may impose a sentence of life imprisonment or any other sentence authorized by law.

"APPEAL

"(p)(1) In any case in which the sentence of life imprisonment without possibility of parole is imposed under this section, such sentence shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal must be filed within the time prescribed for appeal of judgment in section 2107 of title 28 of the United States Code. An appeal under this section may be consolidated with an appeal of the judgment of conviction. Such review shall have priority over all other cases.

"(2) On review of the sentence, the court of appeals shall consider the record, the evidence submitted during the trial, the information submitted during the sentencing hearing, the procedures employed in the sentencing hearing, and the special findings returned under this section.

"(3) The court shall affirm the sentence if it determines that—

"(A) the sentence of life imprisonment without possibility of parole was not imposed under the influence of passion, prejudice, error of law, abuse of discretion, or any other arbitrary factor; and

"(B) the information supports the special finding of the existence of every aggravating factor upon which the sentence was based, together with the failure to find sufficient mitigating factors as set forth or allowed in this section.

In all other cases the court shall remand the case for reconsideration under this section. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence.".

Mr. DOLE. Mr. President, on September 30 the Senate adopted a rational, responsible, drug-abuse package. I am committed, as I believe most of my colleagues on both sides of the aisle are, to approving drug legislation before we adjourn this week. As a recent survey shows, while most drug use is leveling off, cocaine and "crack" usage is on the rise.

Congress cannot by fiat wipe out drug abuse. But the Government can respond to the problem—respond through law enforcement, through cooperation with foreign governments, and through limited use of our military, through education and rehabilitation. Those are the areas the Senate's legislation addressed.

Congress should not give the American people a placebo. Whatever we approve should have the potential for doing some real good—the potential for having a significant impact on drug use in America. I believe the final Senate product will accomplish that goal.

After passing a wide-ranging and extremely expensive bill, the House has wisely decided to accept most of our drug control package. But it has made several substantive changes.

In response to these, we have offered a bipartisan amendment to the House version, which we believe corrects the deficiencies in the House position.

There are four major subjects addressed in the amendment.

Title I deals with enforcement. The House accepted most of the Senate's provisions. However, our amendment will reflect the Senate's position that judges be given the ability to reduce sentences in exchange for cooperation, and it reinstates authority to give rewards for information regarding the killing or kidnaping of Federal drug agents.

Our amendment would also modify provisions on asset forfeiture and money laundering.

Title II addresses international narcotics control. Our amendment restores the original Senate language on the Mansfield amendment, which would allow U.S. law enforcement officers to be present at the arrest of individuals overseas in all countries except those where the President certifies it would be against the U.S. national interest to do so.

In provisions dealing with Mexico, rather than withholding money in narcotics assistance from Mexico, as the House bill would, the Senate amendment lists measures Congress might consider next year should Mexico's pledges of cooperation in narcotics enforcement not be fulfilled.

Title III contains provisions dealing with the military interdiction. In substantive terms, the most important difference in our amendment is how to fund the military aspects of the bill. The Senate's position is that the money should be new money, not funds from existing Department of Defense programs.

Finally, title IV relates to prevention, treatment, and education. There would be minor changes relating to Federal evaluation of State efforts, mental health research on the elderly.

The funding level for education has been increased from the original Senate bill, but it is lower than the House version.

Mr. President, as I said at the outset, the revisions to the House package contained in this amendment were arrived at on a bipartisan basis. There is nothing in this amendment that should be considered controversial. And I hope we will unanimously and quickly adopt it.

Mr. BYRD. Mr. President, I believe that it is critical that the 99th Congress enact a comprehensive antidrug bill.

We have invested a great deal of time and energy on both sides of the aisle in this body toward producing a strong, comprehensive measure. If we fail to enact this bill, it will be personally frustrating to those of us who have labored so long and so hard on this legislation.

But the real losers will be the American people who want—and urgently need—help in combating the drug epidemic ravaging persons of all ages throughout our Nation.

We are very close to enacting this legislation. The Senate passed a good, strong bill. The House earlier passed its own version, incorporating several very controversial provisions that were extremely troublesome to a number of our colleagues on both sides of the aisle in the Senate. In passing our measure late last month, we successfully avoided those issues. The House, however, insisted on attaching to the Senate bill one of those emotionally charged issues—the death penalty.

I believe it is this provision alone, now, which has the potential to snarl this bill and prevent enactment of a sound, thorough drug bill. I personally support the death penalty provision the House attached to the antidrug bill. I have supported broader death penalty legislation that has come before this body.

But just as strong as my support for the death penalty is my understanding that inclusion of this particular provision in this bill could spell the doom for the whole measure.

Mr. President, I want to pass an antidrug bill. The people of this Nation need and expect us to pass an antidrug bill.

The opposition to the death penalty provision is bipartisan—just as support for the drug bill is strongly bipartisan.

I ask all my colleagues, whatever their position on the death penalty provision, to join in this effort to free the drug bill from this issue which could sink our whole effort.

The American people are looking to us to act responsibly, swiftly, and surely to address the drug abuse epidemic. We must not shirk this responsibility.

We can and will return on another day to confront the death penalty. Today, I hope we will do what is both worthwhile and possible, and pass this major antidrug bill.

Mr. BIDEN. Mr. President, I compliment both leaders and Senator CHILES on working this out. The reason why there was suggested a minimum of life imprisonment without parole was to get us out of the impasse but to also keep these so-called kingpins off the street and there would be no way to get back on the street. It is my hope that the House will agree with this position.

Mr. President, I rise today in support of the bipartisan Senate amendment to H.R. 5484. I would like to note from the outset, that although this amendment was drafted by Senators from both sides of the aisle, and as such represents a bipartisan effort, it does not address the death penalty issue, which we have not been able to resolve.

Opposition to the death penalty comes from both sides of the aisle, Republicans and Democrats alike. It is an issue we have debated many times in this body, and given the time constraints we face in completing this session, I think it is an issue better left for another day.

I raise these issues today because comprehensive legislation aimed at reducing drug abuse in America is imperiled over the death penalty. For almost 1 month, bipartisan negotiations have been underway to draft an effective and timely legislative response to America's drug habit. From the outset, it was understood that there was not a clear consensus on every single issue. These differences were basic, philosophical differences, including the death penalty, modification of the exclusionary rule, the role of the military in drug control and the need for a drug czar; a single official responsible for the Federal drug control effort, a proposal I have been advocating since 1982.

But as is so often the case, when we are dealing with problems that effect this Nation in such a profound, and this case adverse way, it is impossible for every Member of this body to agree on every specific provision. Instead, often we must leave the larger battles for another day, so that we may move those initiatives upon which we can all agree and which can move us closer to our goal, in this case a drug-free America.

This is exactly the approach that the leadership from both sides of the aisle adopted in moving drug legislation the last time around. The differences among Members were no less deep seated at that time than they are today. But it was clear that these differences could not be resolved by the end of this session. The question then became, how serious was this body about passing comprehensive drug legislation in the 99th Congress? The answer was not surprising. The Senate passed a bill that would have provided the most sweeping revision to the Federal drug control strategy in almost two decades; a bill that passed 97 to 2, and that should have sailed through the other body.

Today, we are in a similar position. The House of Representatives once again has included a death penalty provision in the drug bill they sent back to us. As a result, the debate accompanying the drug bill has been focused on one single, controversial issue. I can assure you that this debate will involve lofty political rhetoric and more than enough hyperbole. And once again, it is up to the Senate leadership to act responsibly in moving drug legislation.

This time around, the differences are no more nor less than they were the last time. We are all on record as to our positions on this issue. And like last time, the question is not whether we think this is the perfect piece of drug legislation. Rather, the question is how sincere are we in our desire to move this country toward a solution to drug abuse in America? How sincere are we in our belief that we must educate our children, our most precious resource, about the dangers and consequences of drug abuse? How sincere are we in our resolve to increase the possibility that drug traffickers are caught, sentenced, and serve their time in jail?

I am mindful of the argument on the other side. Briefly, this argument says that if we are really serious about doing "something" about drug abuse in America, than we should include a death penalty provision in this bill. But this line of thinking is unending, as we have seen in the debate over this bill. It starts with, "If we are really serious about doing something about drug abuse then . . ." and some ill-conceived, though possibly well intentioned, proposal follows, like the use of the military or changes to the exclusionary rule. We must not get caught up in this game of chicken. The stakes are much to high to allow this type of politicing to prevail.

Drug abuse in America is a problem of staggering proportions. Half a million Americans are addicted to heroin;

4-5 million regularly abuse cocaine. And over 20 million Americans regularly use marijuana. And drug abuse threatens our most precious resource: our young people; 61 percent, let me repeat—61 percent, almost two-thirds—of the 1985 high school seniors had used an illicit drug; 17 percent of the graduating seniors had tried cocaine, the highest rate ever in the 11 years the sample has been taken.

On the overall issue, there is a clear consensus. Congress must respond to this Nation's seemingly insatiable demand for illicit drugs. But that is not all. We agree on many of the specifics, like the need to eradicate abroad, in order to decrease drug production at the source. We agree on the need to interdict more than the 10 percent of the drugs at the border. We agree on the need to enact tough new sentencing provisions for drug traffickers, so that the punishment they receive is proportionate to the crimes they commit. And we agree on the need to educate our young people about the hazards of drug abuse, so that they will be able to "just say no." In fact, we agree on much, much more, and this bill contains provisions reflecting this widespread agreement. Where we do not agree is on the death penalty. And we probably will not reach agreement before the end of this session.

In too many instances in the drug debate, one's sincerity has been measured in terms of the extremes one will advocate in order to demonstrate a "commitment" to doing something about drugs. The fallacy of this approach should be clear. We must set aside our own individual agendas, in order to move those initiatives on which there is a consensus. We must be mindful of the enormous responsibility on our hands. Drug legislation is needed, and it is needed now.

As I mentioned before, the question is: How serious are the Members of this body in moving comprehensive drug legislation? Legislation that is, with one notable exception, a product of extensive bipartisan negotiations. Legislation that includes resources to interdict drugs at the border, to beef up law enforcement in our cities and communities, and to educate our children. Legislation that could move this country toward the goal upon which we all agree: A drug free society.

The situation we face is not new to this body. In 1984, we moved legislation that enacted the most sweeping reform of the Federal criminal law in this Nation's history. In fact, many of the issues are the same, including the death penalty. But there were too many areas upon which there was agreement to let the legislation die because of a few differences. I urge the Members of this body to adopt a similar approach today. There are too many essential areas of agreement to let this legislation die in this body. Let us leave the bigger battles for another day, and let us move drug legislation before the end of this session.

Mr. CHILES. Mr. President, I think this idea was a good idea. I think it is a way of moving this bill along. So many of us feel that there are so many positive aspects to this bill that there is no way we can allow it to die on the basis of the fact that the death penalty is important and a lot of people would like to see it in, including myself. That would have been the death penalty to the bill. This is a way out.

I compliment Senators on both sides of the issue, those who are very strong for the death penalty and those who are not, who have helped us work this language out. Senator EVANS and Senator LEVIN were certainly helpful, along with Senator MATHIAS and Senator HATCH and his staff, and many other people. I am glad that we have this amendment.

Mrs. HAWKINS. Mr. President, I, too, would like to add my congratulations to the leaders who have worked so tirelessly with our bipartisan group to make sure that we get the drug bill this year. It is far-reaching legislation and will serve many generations which will reap the harvest from those problems that we have resolved. No one is 100-percent happy with it but it is a pretty good piece of legislation. Senator BIDEN has given great leadership in helping us reach a solution to the impasse of the death penalty. In my State of Florida, we want the death penalty and feel keen about it.

We are going to try this as a first step.

I must say that the Preamble to the U.S. Constitution lays out the very basis for which the rest was written. That reads:

WE THE PEOPLE of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

I might say as I reread that today, I thought that all Senators involved in this major piece of legislation are taking a giant step toward defeating the enemy within and without. We have really declared war on the enemy, the war on drugs.

Mr. MATTINGLY. Mr. President I would like to add my congratulations to the majority and minority leaders for their success in getting together a group this afternoon in order to come to an agreement with respect to final passage of this important piece of legislation.

We all know that the death penalty was the major impasse to final passage of this drug bill. The death penalty had prevailed in the House of Representatives by an overwhelming vote. I think there were only 23 votes against the recent version which contained the death penalty provision.

In the U.S. Senate it should have prevailed as the vote of 60 to 25 against the tabling motion to my death penalty demonstrated. It is unfortunate that we are at the end of a Congress, or we would have been successful in obtaining the death penalty for the drug kingpins. I believe not only the majority of the people in the Congress support the death penalty, but the people in the United States do as well. Pragmatism has prevailed this evening. The Congress needs to adjourn soon. So tonight, in order to pass this bill, we must settle for a mandatory life sentence without parole for drug kingpins.

We need a strong drug bill to make certain that we have forceful weapons in this war on drugs going on in the United States. This drug problem is attacking young people. It devastates our population on every side.

I think that the agreement we have arrived at tonight will enable us to pass this drug bill successfully.

I would like to congratulate everyone who has worked so hard on the issue and especially my colleague, Senator HAWKINS, from Florida, who has been very instrumental in bringing the Senate's attention to this important issue.

Mr. DOLE. Mr. President, let me thank all my colleagues. We had a decision to make today. We had a very close vote on cloture. In my view it did not make any difference how the cloture vote came out. Had we invoked cloture we would have a problem and had we not invoked cloture we would have a problem. The cloture vote was really not of significance in the sense that it would change anything we might do.

We have been discussing this with those mentioned. Senator MATTINGLY was out front in the so-called death penalty provision on the Senate side. He agreed because he wants a drug bill. I think that is the attitude we have had on both sides. We are not going to solve all the problems in this one piece of legislation.

I want to thank Senators MATTINGLY, HAWKINS, CHILES, BIDEN, and the many others who were there this afternoon, Senator LEVIN, Senator EVANS, Senator HATCH, Senator THURMOND, and members of our staff. We had a very good discussion with the distinguished Member of Congress from Pennsylvania. It was his provision in the House. I am not certain he will run for the Senate since he sat in on a discussion with Senators. I explained we do not have a Rules Committee here. We cannot say, "We will have a death penalty vote in 30 minutes."

We hope we have spelled it out in the right way. I appreciate the help of all of our colleagues.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, this is not only the right solution out of an impasse but it is also the right solution on the merits, to provide a mandatory life sentence without parole for people who perpetrate drug-related murders during the course of continuing criminal enterprise. We made a number of other important changes in this language and I will mention those in a moment.

First, let me again thank Senators DOLE and BYRD, Senators MATHIAS, BIDEN, THURMOND, EVANS, KENNEDY, HATCH, and CHILES—all those who were on both sides of this question who finally played the critical role in drafting the solution which, again, is not only important so that we can get on with the drug bill, and all of us believe we want a drug bill, but also which we believe provides some very stiff, strong, mandatory life sentences without parole for those who would perpetrate any kind of a drug-related killing during the carrying out of one of these enterprises.

To the staffs, in particular, who have been working for the last 3 or 4 hours, and who missed the playoff game, may I add a special thanks.

This amendment follows the basic procedural format of the earlier death penalty provisions in this bill and in S. 239, the death penalty bill reported out by the Senate Judiciary Committee, with a number of very important exceptions.

For instance, intent is now an element of the offense and not just an aggravating factor as the bill originally provided for. I believe this is an important provision which is consistent with the Senate Judiciary Committee bill. It also makes clear that this very strong penalty will only be imposed on people who intended the murder. It thus makes this a strong penalty with proper procedural safeguards.

Second, this amendment adds a safeguard by requiring a jury to certify that it did not consider the race, color, national origin, creed, or sex of not only the defendant, but also of the victim in its sentencing deliberations. There is a very real concern about the possibility of consideration of any of these factors with respect to the victim on sentencing. This amendment makes an important statement to our people and our courts that any consideration of these extraneous factors is impermissible.

Further, this amendment strikes the word substantially from the provision in the bill passed by the House which provided that information relative to mitigating and aggravating factors can only be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury. By striking the word "substantially," it makes clear that no evidence the probative value of which is outweighed by such prejudicial or misleading factors can be considered in support of the showing that mitigating or aggravating factors are present. Again, this modification is an appropriate safeguard in light of the very strong penalty of life imprisonment without the possibility of parole provided for in this section.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, the leaders deserve to be congratulated on what is only a beginning, but a very good beginning, and what must be sustained over a long period of years if it is to be "successful and justified," the term so many have employed, in the war on drugs.

In order to be successful, to be vigorously prosecuted, this war is going to require the commitment of adequate resources and not just lipservice. One way that we can in part achieve that, not as a substitute for voting the kind of appropriations that are necessary, is to do a little poetic justice and take the ill-gotten gain from the hands of the traffickers and see to it that it is spent to combat them. One of the so-called technical amendments will do that by lifting the caps on seized assets and those taken from convicted drug traffickers.

It is past time this was done. It will add at least a small amount to what is actually required in order to equip those who are to wage this war on drugs so that the odds can be at least somewhat equal, in terms of the very sophisticated equipment used by aerial smugglers and others in bringing this poison into the country.

I join with others in congratulating the majority leader, and the minority leader, and all who have taken part in this, and those who have, against their own wishes, decided that it is much better to go forward with an imperfect bill than with no bill at all since we are late in coming to the passage of this measure.

□ 2130

Mr. MURKOWSKI. Mr. President, I wish to join my colleagues in the efforts of the Senate today with regard to the compromise drug bill. As has been stated, it is not necessarily what we would all desire to see, but the United States and the communities and the citizens of our country are watching to determine just how their elected representatives would respond to this challenge. I think we have met the charge.

As a member of the Senate Caucus on International Narcotics, I certainly commend the Senator from Florida [Mrs. HAWKINS]. She has done an extraordinary job, as have a number of others.

I think we can all take pride in the fact that we have considered the situation, particularly in those small communities. Now they are looking for specifics with regard to the amount of funding for law enforcement, for the specifics in regard to education, and, lastly, Mr. President, for assistance and rehabilitation.

I thank the Chair.

Mr. BYRD. Mr. President, will the distinguished majority leader say whether or not Senators need expect any further rollcall votes tonight?

Mr. DOLE. No, Mr. President, I think we can safely assume that there will be no more rollcall votes tonight. We would like to pass this bill on a voice vote. We need to get it to the House this evening. They are working on a continuing resolution. We would like to have our drug bill there tomorrow morning. We are not going to be able to do that if we cannot have an agreement to have a voice vote. I do not know of any requests.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment.

The amendment (No. 3464) was agreed to.

AMENDMENT NO. 3465

Purpose: To strike Anti-Drug Trust Fund.)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 3465.

On page 542 of the amendment
Strike lines 21–24.
Strike page 543.
Strike page 544.
Strike page 545.

Mr. DOLE. Mr. President, this is the amendment that strikes out what I think is a good idea. It is the checkoff system where, if you had a refund coming, you could contribute some of that to solving the problem of drug abuse. I think it would raise millions and millions of dollars, but Senator LONG has a sharp disagreement. Rather than have a big debate tomorrow on this one provision, which is not really that significant in the overall frame of reference, this will strike that provision from the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3465) was agreed to.

AMENDMENT NO. 3466

Mr. DOLE. I ask unanimous consent that the Senate proceed to consider the amendment containing the motion to concur with the amendment modi-

fied by the proposal which I now send to the desk on my behalf and on behalf of the distinguished minority leader. These are technical corrections and have been cleared on both sides.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 3466.

Mr. DOLE. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is printed in today's RECORD under "Amendments Submitted."

Mr. WARNER. Mr. President, I respectfully inquire of the leadership if there is an appropriate time when I might address the leadership on an amendment in the nature of a technical amendment. It is at the desk. I do not mean to interrupt them, but I wish to make inquiry.

Mr. President, I ask the leadership to consider a technical amendment that has been at the desk as a part of the package. I shall be bound by the judgment of the leadership.

Mr. DOLE. If the Senator could advise what the amendment is, I do not know if it has been cleared on the other side.

CLARIFYING THE PERMISSIBLE LIMITS ON MILITARY INVOLVEMENT IN CIVILIAN LAW ENFORCEMENT ACTIVITIES

Mr. WARNER. Mr. President, I am submitting this amendment to the omnibus drug bill, H.R. 5484, which would ensure the preservation of the spirit and intent of the Posse Comitatus Act.

For well over a century, this landmark law has very effectively served to govern the relations of the military departments and the civilian law enforcement departments, Federal and State.

I am concerned that the Congress, in our need to respond effectively to the worsening drug problem which threatens the very foundations of our society, might fail to take into account the historic, proven principles underlying the Posse Comitatus Act.

The bill authorizes the military departments to provide personnel "to facilitate the enforcement" of certain drug and customs laws, and to provide transportation to civilian law enforcement departments in connection with their enforcement.

Such transportation, however, is limited to locations outside the United States, except for certain "hot pursuit" situations which originate outside the United States and transgress across our borders.

The bill also authorizes, in emergency circumstances, the use of military equipment and personnel for the purpose of intercepting vessels and aircraft outside the United States for the purposes of identifying, monitoring, and locating them.

The authority to declare an emergency circumstance requires joint approval by the Secretary of Defense, the Secretary of State, and the Attorney General.

While this new authority is intended to be used only in clearly delineated and restricted circumstances, I am concerned that this provision not be interpreted to constitute a weakening of the time-tested Posse Comitatus Act.

That law protects the tradition of our military forces not to become involved in civilian law enforcement activities.

The Posse Comitatus Act has served us well for over 100 years, through economic and political crises and through two world wars in which public fears were heightened and civilian police forces substantially reduced by wartime requirements.

It is important to note that, in these stressful times of our history, Congress resisted any dimunition of the principles embodied in the Posse Comitatus Act.

Congress must continue to resist any erosion of the principles of the Posse Comitatus Act.

Some of the proposals, submitted and rejected, during the consideration of this legislation would have constituted a serious erosion of our civil rights.

Further, to the extent we involve the military and commit assets, there is an impact on morale and readiness of our armed forces, both active and reserve.

The vast majority of military personnel are not trained, equipped or dispersed for the purpose of law enforcement, most specifically to perform arrests.

It seems to me to be unwise to consider sending the young men and women in our Guard and Reserve out in hot pursuit, armed against drug traffickers and authorized to perform arrests.

An amendment, proposed but rejected, would have established this authority.

The question of the permissible extent of military involvement in civilian law enforcement is one which has deep roots in our history.

The Supreme court, in the case of ex parte Milligan in 1866, involving the trial of a civilian by a military commission during the Civil War, warned that the issue of military power over civilians "involves the very framework of the government and the fundamental principles of American liberty."

That Court also warned us against the temptation to suspend or alter individual liberties in times of crisis; "Such a doctrine," wrote Mr. Justice Davis, "leads directly to anarchy or despotism."

The turbulent years following the Civil War gave rise to the consensus in Congress that military government, and military enforcement of civilian law, were antithetical to the genius of American institutions.

Accordingly, the 1878 Army Appropriation Act contained a provision prohibiting the use of the Army as a posse comitatus, which, only slightly altered, is the Posse Comitatus Act codified today at 18 U.S.C. 1385.

The act provides:

Whoever, except in cases and under circumstances expressly authorized by the Constitution or Act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined not more than $10,000 or imprisoned not more than two years, or both.

While the act only mentions the Army and the Air Force, judicial construction has made it clear that the Navy and the Marine Corps are included as well. The Coast Guard is not subject to the act.

For over a century, Congress has consistently adhered to the policy embodied in the act. Time and experience have proven the wisdom of the congressional consensus.

The first change in the act occurred 103 years after its enactment, as the worsening drug problem began to receive substantial attention.

In 1981, the distinguished Senator from Georgia, [Mr. NUNN], and I sponsored legislation which authorized limited military assistance to civilian authorities. I hasten to point out that our legislation did not amend the act; rather we granted a specific authority permitted by the act:

First, it allowed information collected in the course of military operations to be used by civil law enforcement authorities; second, it authorized the Secretary of Defense to make available equipment or facilities under his jurisdiction, and training in their use, to such authorities; third, it authorized the Secretary of Defense, in the cases of certain drug, immigration, and customs laws, to assign military personnel to operate military equipment to monitor and follow air and sea traffic; and fourth, in an emergency circumstance, determined to be such under explicit criteria by the Secretary of Defense and the Attorney General, it authorized the use of military equipment and personnel outside the United States as a base by civilian officials, and their transportation by military personnel. It did not authorize the use of such equipment or personnel for the interdiction of air and sea traffic.

All of these provisions were subject to a general requirement that the military preparedness of the Nation not be adversely affected. And, clearly, no power of arrest was conferred on the military.

Experience under this 1981 statute during the ensuing 5 years has proven it to be a success. The Department of Defense has been able to provide assistance of significant value of civilian officials, and military readiness has not been adversely affected.

The present bill, in a similar way, is not an amendment to the Posse Comitatus Act. Rather is seeks to expand authority of the military within terms of the act.

It does three things: First, transportation of civilian officials into the United States may be made by military personnel in hot pursuit cases which begin outside our territory; second, one of the criteria for an emergency determination is relaxed, although State Department participation in the determination is now required; third, in an emergency circumstance, military equipment and personnel may be used to intercept vessels and aircraft outside the United States for the limited purposes of identifying them and monitoring their locations until civilian authorities can take over.

While I believe these modifications will increase the effectiveness of our drug interdiction without adversely affecting military readiness or threatening our liberties, we must continue to closely monitor all military involvement in civilian law enforcement activities.

I am concerned by the attempt of some, which have thus far been rejected, to press the Armed Forces into more active involvement in domestic law enforcement.

I think there should be no doubt as to the intent of Congress that the involvement of the Armed Forces in law enforcement be strictly circumscribed.

Accordingly, I am offering an amendment to the bill to preserve the Posse Comitatus Act.

Specifically, this amendment will codify the traditional understanding, itself upheld by the Senate in floor action on this bill, that the authority bestowed in this legislation does not include direct participation by any member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, and seizure involving violations or alleged violations of the statutes for which limited military assistance to civilian authorities is authorized under chapter 18 of title 10, United States Code.

This amendment should not be controversial; it restates a time-tested principle of America law.

I ask my colleagues for their support.

Mr. BYRD. Mr. President, the agreement was that there would be no further amendments.

Mr. WARNER. I do not mean in any way to contest the unanimous-consent agreement, Mr. President. I came as quickly as I could. I just wonder if at this time, since it has been at the desk, it might be considered in the group of technical amendments being sent forward.

Mr. BYRD. Mr. President, I have no better friend in this body than the distinguished Senator from Virginia, but this agreement embodied no other amendments and I am afraid if we open it up to this technical amendment at this time, we are going to have to run this amendment and see if there is any objection.

Mr. WARNER. I respect the wishes of the minority leader. I was not certain as I listened to this request whether the package of technical amendments was established in their entirety or they were being put together.

Mr. DOLE. I am in sympathy with the amendment, Mr. President, but I think the minority leader is correct. Had we had this amendment earlier, we probably would have adopted it. There is a strong sentiment expressed here. I think it might be well if we had the amendment read.

Mr. WARNER. I think it is at the desk at the moment. It is amendment No. 3455.

The legislative clerk read as follows:

On page 217, after line 25, insert the following:

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

Mr. WARNER. Mr. President, this is essentially my interpretation of the bill as amended. As Members of this body well know, the Posse Comitatus Act has served this Nation well for over 105 years. In an earlier version of this legislation, there were attempts, primarily in the other body although, to some extent, in this body, to include within this legislation the authority to have military personnel perform arrests. At that time, I strongly objected. The Senator offering the amendment in large part amended it, then subsequently the Senate rejected the amendment.

I think it is my interpretation of the bill now pending before the Senate that the essence of my amendment is presently in the bill. I wondered if the majority leader and minority leader might give me their views.

Mr. DOLE. I share the view expressed by the distinguished Senator from Virginia that that is the intent, at least. We had a very strong vote on that issue. Four or five to one, as I recall. I think we made some legislative history that might serve here.

Mr. BYRD. Mr. President, I am advised that the bill in no way authorizes or permits direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code. That being the case, and I am confident I can rely on the advice that has been given, the distinguished Senator's amendment will not be necessary.

□ 2140

The bill's provisions would be in keeping with the intent and substance of the amendment. I am further advised then, to make myself more clear perhaps, that there is no problem with this amendment from the standpoint of substance. It would not add anything because the bill does not provide to the contrary.

We do have this procedural problem, however, in that we have entered into the agreement which provides against any other amendment, and if we were to allow this amendment in now, I am concerned that we might have problems in the future getting agreements in similar situations.

Mr. WARNER. Mr. President, I thank the distinguished minority leader and the majority leader. In essence, it is their interpretation of the bill that the purport of this amendment is covered and that it could easily have been added had I been present a little earlier and asked for its inclusion.

So, Mr. President, that satisfies my purpose and I do not think it is necessary for me to withdraw the amendment because I did not ask for its consideration in view of the unanimous-consent request. We have established the legislative history that I felt was necessary.

Mr. BYRD. I thank the Senator.

Mr. WARNER. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the majority leader.

The amendment (No. 3466) was agreed to.

Mr. LEAHY. Mr. President, the House amendments to the Freedom of Information Act provisions in the Senate-passed drug bill were generally technical in nature and I would have accepted them without change. However, I am happy to join my friend, the distinguished chairman of the Constitution Subcommittee, Senator HATCH, in making minor changes in two of the House amendments and restoring original Senate language in place of a third House modification to our provisions.

The first minor change involves a House amendment clarifying our provision authorizing the assessment of review costs. As explained by Representative ENGLISH, in his statement in the CONGRESSIONAL RECORD of October 8, 1986, the House amendment was intended to establish a limitation on

review costs similar to the one that was included in S. 774, the FOIA reform legislation which was passed by the Senate in the 98th Congress, and in H.R. 6414, a bill which was introduced by Representative ENGLISH, along with Representative KINDNESS, in the same year. Our addition to the language of the House amendment is merely intended to conform it more closely to the language of the earlier legislation; it is not, in any way, intended to indicate any disagreement with Representative ENGLISH's statement regarding the purpose and meaning of the House amendment.

The second minor change which Senator HATCH and I have agreed to would simply establish an effective date of 180 days after enactment for the fee and fee waiver provisions in section 1803 of the drug bill, in place of the House provisions which would have established an effective date of 90 days after enactment.

Our final change to the House amendment of the FOIA provisions in the Senate-passed drug bill would simply restore the original language of section 1802(a) in the Senate version amending section (b)(7)(C) of the FOIA exemption for law enforcement records. The Senate-passed version of this amendment, as I explained in my earlier statement in the CONGRESSIONAL RECORD of September 30, 1986, was based upon an identical amendment in S. 774 designed to clarify the degree of risk of harm from disclosure which must be shown to justify withholding records under that subparagraph of the law enforcement records exemption. Again, let me emphasize that this change in the statutory language substantially reflects current judicial interpretations and would not appreciably alter the meaning of the affected provision in its practical application.

Although the sponsors of the House amendments were concerned that such a change from the current statutory language could create problems with regard to interpretations of a related personal privacy exemption in paragraph (b)(6) of the FOIA, I am confident that the courts will recognize this change as simply codifying their present objective approach to assessing the degree of risk, rather than calling for a departure to a less rigorous standard.

Let me just say that I was pleased to find that both Representative ENGLISH and Representative KINDNESS share my understanding of the purpose and meaning of the FOIA amendments contained in the omnibus drug bill. I concur with their views, as stated in the CONGRESSIONAL RECORD of October 8, 1986, finding them consistent with my own earlier comments on these provisions.

Mr. KERRY. Will the Senator yield for a question?

Mr. LEAHY. I am happy to yield for a question.

Mr. KERRY. As a member of the Foreign Relations Committee, and Senator from a State proud to be home to some of the Nation's pre-eminent research institutions and libraries, I am concerned about the proposed changes in the Freedom of Information Act regarding the fees which can be charged under the act. A week ago the Senate passed by voice vote an amendment to the drug bill (amendment 3066) which I understood to have the effect of correcting the current narrow interpretation of the act's intent by Federal agencies, and making waivers and reductions of fees available to all requesters when the information released contributes to public understanding of the Government. I understood the amendment's chief sponsor, the distinguished Senator from Vermont, to explain in his explanation of the amendment, that any requester engaged in the dissemination of information to the public could also qualify for waiver or reduction of fees.

Therefore, I am perplexed to find additional remarks in the record raising doubts about the status of a certain category or requester—"organizations seeking to establish private repositories of public records" or "this type of private library of public documents." In my lengthy experience in public life, these kinds of organizations are precisely the kinds of groups that should receive every benefit of the Freedom of Information Act. By seeking out documentation on important public policy issues from inside the Government, these organizations have not only saved the taxpayers billions of dollars by helping to expose waste and fraud, bad decisions and misdeeds, but they also have proven essential to public education and the proper functioning of our democracy. The use of the adjective "private" also puzzles me, since the gathering of government documents into a library or repository open to the public can only assist further research and public education. I am sure that the research librarians at "private" institutions in Massachusetts, like Harvard University or Boston College, and at other less-renowned repositories of public records, see their mission as fulfilling the intent of the Freedom of Information Act.

If I may ask my distinguished colleague from Vermont, was it not the intention of this amendment to make more generous the FOIA's fee waiver provisions for the news media and public interest users, not to restrict them? And was it not the intention of this amendment to qualify for fee waivers and reductions all requesters engaged in the dissemination of information to the public, where the information contributes to public understanding of the Government and its policies, and where disclosure is not primarily in the commercial interest of the requester?

Mr. LEAHY. My distinguished colleague from Massachusetts understands the amendment perfectly. Any statements in the record which give a more restrictive meaning to the amendment with regards to the waiver and reduction of fees conflict with the clear language of the amendment itself. With this amendment, we have sought to remove the roadblocks and technicalities which have been used by various Federal agencies to deny waivers or reductions of fees under the FOIA to the news media and public interest users of the FOIA. Information released under the FOIA which contributes to public understanding of the Government clearly qualifies for waiver or reduction of fees, as long as it is not primarily in the commercial interest of the requester. Where disclosure is primarily in the commercial interest of the requester, and the records are requested for a commercial use, the requester will pay search, duplication and review charges under this amendment. FOIA requesters engaged in the dissemination of information to the public—and that of course is the primary function of libraries and repositories of public documents—would qualify for waiver or reduction of fees under the FOIA.

Mr. KERRY. I thank my distinguished colleague, the Senator from Vermont, for his clarification, and for his efforts to assure the free flow of information that is so vital to an informed citizenry and the continued success of our democracy.

Mr. LEVIN. In terms of procedure, the new section providing for a life sentence without parole follows the basic format of the earlier section providing for the death penalty, but with a few significant modifications. For the most part, these modifications are designed to make the provision before us today more consistent with the procedural format of S. 239, the death penalty bill reported out by the Senate Judiciary Committee earlier in this Congress, that was the death penalty provision which was passed as part of the bill by the other body.

I would ask the majority leader, who, along with Senator BYRD, is the principal sponsor of this amendment whether it is his understanding that the moving of the intent requirement from being one of the required aggravating factors which would have had to have been found for imposing the death penalty under the original bill to being an element of the offense punishable by life imprisonment without parole under this modification means that in order to satisfy the elements of the offense, the defendant must reasonably have foreseen that

the defendant's conduct in the course of the commission of the offense resulting in death for which the defendant was convicted, would cause, or would create a grave risk of causing, death to any person? By implication, therefore, the defendant's showing that he could not have foreseen these consequences is a defense to the charge that his actions included the requisite intent. Is that also the majority leader's understanding of the effect of these changes?

Mr. DOLE. I agree with the interpretation of the Senator from Michigan. In meeting the requirement of intent as an element of the offense in this amendment, the defendant must reasonably have foreseen that the defendant's conduct in the course of the commission of the offense resulting in death for which the defendant was convicted, would cause, or would create a grave risk of causing, death to any person. Without such reasonable foreseeability, the elements of the offense would not be satisfied. On another matter, Senator LEVIN, I would like to clarify that mandatory life imprisonment without parole means that an individual who is sentenced pursuant to these strict procedures will serve the duration of his life in prison. I understand that the law which created the Sentencing Commission last Congress also provided for the abolishment of parole. Is your understanding that the abolishment of people will not affect in any way the intent of the language "life imprisonment without parole? In other words, will an individual convicted and sentenced under this procedure serve the duration of his life in prison without chance of release under any circumstances?

Senator LEVIN. That is indeed my understanding. There will be no procedure for release of an individual sentenced to life imprisonment without parole under this law.

Mr. HARKIN. I would like to ask Senator BIDEN a question with regard to the bill which is before us. As you know, I am a strong supporter of the efforts to curtail the interdiction of illegal drugs into this country and I have supported measures to halt the resultant widespread trafficking and use of such drugs. I supported the original Senate bill on this subject and intend to vote in favor of the measure which is now before us.

However, it has come to my attention that we may be including in the bill a section which could have a detrimental effect on the legitimate import operations of countless American companies. Specifically, I am looking at one section of the bill which causes me concern.

If I might ask a question with regard to section 3111(5)(m) which defines "controlled substances" as "merchandise" which cannot be imported without a license or permit. As I read this bill, legitimate goods which are controlled by quotas or other legal restrictions could be included in this definition. Is it the intent to include such items in this bill?

Mr. BIDEN. No. The focus of this bill is to attack the importers of illegal substances not legitimate importers. The intent was not to include legal merchandise under the definition of controlled substances, rather the intent of the bill was to control the importation and trafficking of illegal drugs in this country. Further, we did not intend to put more hurdles before or cause more problems for those Americans who are in a legitimate import business.

DEATH PENALTY

Mr. DOLE. Mr. President, since the 1972 Supreme Court decision, numerous attempts have been made in the Senate to repair the constitutional defects found by the Court in existing Federal death penalty legislation. Unfortunately, the House refused to move on the issue.

Now, at long last, the other body has included a death penalty provision—limited to certain drug offenses—in its version of the drug bill. While I applaud this initiative, the House provision did not go far enough.

Federal legislation restoring the death penalty is needed for the most heinous of Federal crimes—crimes that endanger innocent life or compromise our national security. It was my feeling that the Senate should substitute broader death penalty provisions for the House language and insist on its inclusion in the final version of the legislation. However, it does not look like that's in the cards.

The Senate was considering the narrower version. Even with this very limited proposal it was necessary for a cloture petition to be filed. Again it is the same small group of Senators who have objected to the death provision in the drug bill who have consistently opposed proposals such as S. 239. While I have no quarrel at all with those who oppose the death penalty on philosophical grounds, it is most regrettable that cloture had to be invoked in the closing days of this session of the Congress.

The arguments in support of this measure closely parallel the rationale for the broader proposal. First, is the deterrent effect of capital punishment. Although there is no conclusive evidence one way or the other, it is highly likely that penal sanctions beyond those now on the books are necessary to deal with the ever-growing problem of drug trafficking.

Our prisons and jails are bulging with drug offenders. Almost a quarter of the Federal inmate population is incarcerated on drug-related offenses. Many face stiff minimum mandatory terms, yet the flow into the prison system not only continues unabated, but is steadily increasing. Under these circumstances, the ultimate sanction seems appropriate. If minimum mandatories don't work to deter drug criminals, then let's apply the ultimate deterrent.

Second, the death penalty is an instrument of incapacitation. Its effect is obvious. It is clear that those who have been executed are unable to commit similar crimes in the future. Too many drug offenders return to this highly profitable illicit enterprise upon release. They are incorrigible, antisocial, and have proven to be dangerous to society for the rest of their lives. In the institutional setting they are chronic threats to fellow inmates and correctional officials.

Third, there is the matter of retribution. These individuals are directly responsible for the degradation or destruction of hundreds of our young people.

Mr. President, this Senator strongly supports the death penalty, and believes a broad death penalty should have been included. Under the bill as modified those who would have been subject to this penalty will now receive a mandatory life sentence with no chance of probation or parole.

Mr. BYRD. Mr. President, the Senate should feel a fine sense of accomplishment for our work on this bill.

There is no question that drug abuse in the United States is a problem of vast and growing proportions. Millions of Americans use illegal drugs or diverted legal drugs. Over 4 million Americans use cocaine at least once per month. Twenty million Americans use marijuana at least once per month. These statistics are alarming.

The specter of drug abuse is not selective. It affects all segments of society, all classes of citizens, all age ranges. Babies born to drug addicts come into this world as addicts. Elementary school children not only abuse drugs—sixth grade students report peer pressure to smoke marijuana—but they often become "employees" in drug distribution networks, for they are the pushers' agents of choice as "lookouts" or "delivery boys."

Drug abuse is commonplace among American high school and college age students. And adult Americans are by no means immune from its scourge. Its victims run the gamut from the unemployed person, to the assembly-line worker, to the "preppie" professional, all the way into the executive suites of major banks and corporations. Federal experts estimate that between 10 and 23 percent of U.S. workers use dangerous drugs on the job.

We must be cognizant of the reality that drug abuse affects much more than the individual drug user. It also affects families, communities, and entire nations. Drug abuse reaches vir-

tually every aspect of American life: Public safety—law enforcement officials report a high correlation between drug abuse and street crime; the workplace—it is estmated that in 1983, drug abuse caused $33 billion in productivity losses; the integrity of school and professional sports; and on and on. Drug abuse is epidemic in America's large urban areas, but it is also common in our small cities and in rural areas.

Drug abuse in America is a national disgrace. It ruins individual lives, drains billions of dollars each year from American society, and erodes the Nation's quality of life. The source of these illegal drugs—drug trafficking—is the most widespread and lucrative organized crime activity in the United States. It accounts for almost 38 percent of all organized crime activity across the country and generates an income estimated to be as high as $110 billion annually.

It goes without saying that we cannot afford to ignore the drug abuse crisis facing our Nation. In our action tonight, the Senate is saying strongly, with a clear voice, that we will not ignore it.

The bill before us as modified by the bipartisan amendment is a strong, comprehensive bill. It not only represents a compromise consensus on both sides of the aisle in this Chamber, but also reflects informal negotiations with Members in the House Chamber.

It contains all the important elements already agreed to when the Senate passed its bill late last month. It contains urgently needed education and treatment funds, State and local law enforcement assistance funds, funds for eradication and interdiction efforts and international cooperation efforts, and, most importantly, it contains significantly enhanced penalties for drug crimes. It requires minimum mandatory sentences, with no parole, no probation. And it provides for life sentences for major criminals—the drug "king pins."

And while the compromise reached over the controversial death penalty provision has resulted in a minimum mandatory life sentence for career drug criminals whose crime results in the death of another person, I do not believe the Senate has diminished the strength of this bill. We are saying to these career criminals that their lives will never be their own again once they are apprehended and convicted—there will be no parole, no probation, no possibility whatsoever that they will be free to perpetrate their heinous crimes again on the American public. That is strong—some might even say that is merciless. Frankly, Mr. President, I do not believe these criminals deserve mercy. They deserve due process under our system of justice. But if they are duly convicted, I say, "Throw away the key."

Mr. President, I urge all my colleagues to support this extremely important and responsible bill. And I fervently hope that the House of Representatives will accept it and send it to the President.

ALLOWING MERGERS OF RAILROADS AND TRUCKING COMPANIES

Mr. SIMON. Mr. President, I rise in opposition to the provision included in the drug bill in title III, section 3403.

This section of the drug bill has nothing to do with drugs, but was added at the last minute in the other Chamber to the omnibus drug bill. It has not had any hearing in either Chamber; the concept was not introduced in any committee for consideration; it has not even been debated on the floor of either Chamber. A circuit court of appeals ruled that the Interstate Commerce Commission did not have the jurisdiction to decide that such a merger could take place, based upon a strict interpretation of the law. Here we are deciding on an issue which would overturn that decision, as well as the court's interpretation of the law.

This addition to the omnibus drug bill would allow three mergers to take place immediately in spite of the fact that a court ruling was recently handed down, disallowing a merger of this sort. This provision is included to allow those mergers now pending to take place and, purportedly, to give the committee of jurisdiction time to hold hearings on the issue next Congress and decide how the law should be amended—if, indeed, it should be amended. This is simply not a good way of doing business. Certainly next year more rail companies will want to merge and will want an exemption, and the committee will be pressured to agree to amend the law even if it truly should not be amended.

Just recently, a circuit court of appeals decided that this type of merger should not be allowed in the context of present law. We cannot, as a matter of course, legislatively overturn court rulings. This borders on an imbalance of powers.

Ultimately, a major concern of mine is that this is not just a transportation issue. It is also a labor issue. There are two different bodies of law affording protections to railroad workers and trucking company workers. The Railway Labor Act and the National Labor Relations Act are two very different laws. Which law would protect the employees of these newly merged companies? Or would they be given no protections?

I believe that this issue is much more complicated than the proponents of this provision realize. I believe that the Labor and Human Resources Committee and the Commerce, Science and Transportation Committee—and perhaps the Judiciary Committee—should be given an opportunity to truly review the effects of this type of legislation. Let's not rush into accepting a change like this before we truly know the effects of such a change.

While I object to this provision, I have agreed to withhold my amendment to strike the section due to the agreement offered by the majority leader which prevents any further amendments to the Senate amendment. I am still concerned about this type of legislative activity and I hope the Senate will not view this provision as prohibiting future debate on the important employee collective bargaining rights and present legal protections afforded employees of railroads and trucking companies.

Mr. MATTINGLY. Mr. President, I am pleased that the House has once again overwhelmingly approved comprehensive antidrug legislation. As my colleagues know the House legislation includes a provision allowing for the imposition of the death penalty for drug kingpins who kill in the course of their continuing criminal enterprises. Twice the House has considered the issue, and twice the Members of the House have resoundingly affirmed that they believe the death penalty is an essential element of any serious drug enforcement measure. I agree. The majority of our Senate colleagues agree, as they demonstrated when they failed to table my death penalty amendment by a strong vote of 25 to 60 during Senate consideration of the bipartisan drug package. And, I firmly and sincerely believe, the majority of the American people agree. They desire the death penalty for these killers. For this reason, I am disappointed that the Senate cannot, this evening, approve such a provision. As the cloture vote earlier today demonstrated, that is not possible. And this legislation is far too important to delay any further.

I have stated before that the drug problem is the most serious this country faces. The effects of illegal drugs on our citizens is devastating. Too often, we think in terms of statistics. But it is individual lives we are talking about.

I would like to share one conversation with my colleagues. Early one morning last week my office received a phone call from a woman in Georgia. She had heard on the radio that the Senate was considering an omnibus drug bill. She strongly favored the death penalty and she called my office to say she was willing to come to Washington if necessary to appeal to Members of the Senate on this matter. The message she would have brought is this: Major drug dealers are nothing more than murderers in three-piece suits, driven by the unquenchable desire for filthy lucre. They seek only to destroy. Those were her words.

Drugs have destroyed her family. The oldest of her three sons is a drug addict. Before he got hooked on drugs, he had been the captain of the football team, a forward on the basketball team, a straight "A" student. Now, at 19, he is in his fourth month of hospitalization in a rehabilitation program. To finance his rehabilitation, the family sold their home and everything they had. The emotional damage done to that young man and his parents and brothers was impossible to describe. It was irreparable, she said.

The story this mother told is not an isolated one. It is repeated again and again in families across this land everyday. Mr. President, the facts are undeniable. Drug dealers are merchants of destruction and despair, the enemies of the American people. Those who show wanton disregard for the lives of others, must know that society will not tolerate their actions. Although the bill does not contain the death penalty that I and that mother hoped to be included, this legislation, with its enhanced penalty provisions does accomplish that goal.

Mr. President, I have spoken before about the merits of the bill the Senate passed and have remarked on the various other provisions in our package. So I will be brief this evening and not repeat those comments. But I will say once more that I am pleased the Congress has committed itself to a comprehensive, bipartisan effort to solve the drug problem. With this bill, we will not win the war on drugs. The battles will be long and hard. But we will better arm those on the frontlines of the war on drugs—law enforcement officers, prosecutors, and others. We will make funds available for important education, prevention and treatment programs. We will send a strong signal to other nations that the United States is serious in fighting the drug menace. We will hamper those who attempt to launder their filthy profits. In short, we will make a landmark beginning and demonstrate our national resolve to make America drug free.

Let us act responsibly and approve a strong bill.

Mr. DANFORTH. Mr. President, the Senate amendment contains a title that is essentially identical to the "Commercial Motor Vehicle Safety Act of 1986," which was passed as an amendment to the "Antidrug Reorganization and Coordination Act of 1986" on a voice vote. This title is also very similar to legislation favorably reported by the Senate Commerce Committee, S. 1903, the "Commercial Motor Vehicle Safety Act of 1986."

Mr. President, I will not repeat here my earlier remarks about the serious truck and bus safety problems that exist in this country or my discussion of how this legislation would remedy those problems. I want to explain, however, that the Senate amendment based on the Senate passed commercial motor vehicle safety legislation is a stronger weapon to fight unsafe truck and bus drivers and equipment than the approach taken by the House. It is stronger because it prohibits its truck and bus drivers from consuming any alcohol while on duty. Under the Senate approach, a truck or bus driver found to have a 0.04-percent or greater blood alcohol content [BAC] would lose his license for a year the first time he is caught and permanently for the second violation. The 0.04 BAC standard is already applied in the railroad industry and to airline pilots and flight attendants. The same standard is needed here. A driver should not be able to drink and get behind the wheel of a 40-ton truck or a bus carrying dozens of innocent passengers. The Senate approach is also stronger because States receiving Federal grants under the Motor Carrier Safety Assistance Program would have to observe and, where articulable suspicion exists, test drivers who are under the influence of drugs or alcohol.

Finally, the Senate approach is stronger because it does not allow the serious truck and bus safety problem to go unchecked for years to come. Currently 20 States will issue a person a license to drive an 18-wheeler with two trailers provided he passes a driving test in a subcompact car. The Senate approach would require truck and bus drivers to be road tested in the type of vehicle they plan to drive and other testing requirements by 1990. The House version would not require such testing until 1994.

Mr. President, as I noted the Senate motor carrier safety provisions are essentially identical to legislation previously passed by the Senate. They are different only in the sense that they incorporate several of the safety enhancing features in the House legislation. I turn now to a description of those provisions.

One serious motor carrier safety problem is the driver who habitually drives in a reckless manner or at speeds 15 or 20 miles per hour over posted limits. This disregard for the law can lead to tragic consequences. For example, in May of this year, a bus driver drove off the side of a mountain in Walker, CA, killing 21 elderly people and injuring 20 more. That bus driver reportedly had 8 speeding tickets for driving buses in excess of 70 miles per hour. The Senate has accepted the House provision which would establish standards under which such a driver would be disqualified by the Secretary of Transportation or by the State issuing his license. In addition, the driver would be required to notify his employer, or if he is self-employed his State of licensure, of all moving violations or face civil penalties.

Moreover, to combat the drug problem in the motor carrier industry the Senate has accepted the House requirement that any driver who is convicted of using a truck or bus in the commission of a felony involving drugs will lose his commercial license permanently. This will help deter those who brazenly buy and sell drugs over the CB radio at virtually every truck stop in our country. In addition, the Senate has incorporated the House requirement that within 90 days of this act's enactment the Secretary of Transportation must eliminate the rule permitting drivers of big trucks to disconnect their front brakes. Testing dating back to the mid-1970's demonstrates this dangerous practice increases truck stopping time 30 to 35 percent.

Mr. President, I want to point out two technical changes that have been included in the Senate amendment. First, effective July 1, 1987, no commercial driver could have more than one commercial license. In the earlier Senate amendment the Secretary was to promulgate by March 1, 1988, a prohibition against multiple licenses. This provision will help accelerate the end of the notorious practice of using multiple licenses

Second, the Secretary of Transportation may waive application of the new licensing requirements if she determines that the waiver promotes the public interest and does not diminish safety. For example, the Secretary might waive application of the requirement to an operator of a public safety vehicle, such as the driver of a fire engine.

Mr. President, I urge all my colleagues to support the Senate provisions to end the needless death and injury caused by unsafe truck and bus equipment and drivers.

Mrs. HAWKINS. Mr. President, I have lived for 6 decades in the United States. In the early part of my life America was threatened by the Great Depression and her values were threatened by debasement by mass poverty and unemployment. In the third and fourth decades of my life, America was faced with threats from fascism and naziism and needed to rally to fight against that menace.

In the fourth and fifth decades of my life America had to fight communism and turn to face an enemy that confronted us militarily and confronted us with subversions throughout the globe but, today we face an even more incidious enemy. We face truly the enemy within—the drug crisis. We will make no progress on educating our youth as long as drugs dominate their culture. We will make no progress in protecting our citizens as long as drugs motivate crime.

We will make no progress in improving the quality of life for our senior citizens as long as they are threatened

by the ravages of those in search of funds to buy narcotics. Until we realize that drugs are confronting America with a crisis of values as fundamental as any we have ever faced in our history, we will be coping inadequately with the problems of the drug crisis.

The issues we are going to deal with today all hinge on one central fact; do we recognize that drugs are a fundamental causal problem of a great many of the ills which we face in our society, or will we treat drugs as an isolated problem confined to a pigeonhole of its own with limited resources and limited commitment.

Today there are those in the Senate that say we should not force the military to become involved with police actions against drug dealers and against drug distributors. To suggest that drugs are a police action is equivalent to saying that World War II was a police action or that the Korean war was indeed a domestic police action as opposed to the international police action to discipline communism that it really represented.

The military threat that drugs pose to America are as much a military action to us as they were to China in the opium wars in the close of the nineteenth century. If America's military, are fundamental coercive power to protect our country, is not enlisted in the battle to control drugs then what do we have our arms for? If our planes are not sent up to interdict foreign planes coming into the United States carrying drugs, why do we have them?

If American ships are not used on the high seas to intercept those ships that carry cargos of death to our ports, why do we have those ships? If American soldiers are not used to patrol our borders and to invade drug fields and to eradicate narcotics, why do we have them? If we do not use our foreign aid as leverage to prevent countries from growing drugs and sending them across our borders, why do we have foreign aid?

If America is unwilling to harness its resources and its powers to protect its people from so fundamental a crisis as we face today, then when will we rise up and what are we willing to protect?

Others in the Senate today will say we should not use the death penalty against drug pushers. Well, I ask if we do not use the death penalty against those who commit mass murder the genocide of narcotics, then when would we use the death penalty? If we use the death penalty for an isolated murder on a rural street, then what about murder by the tens of thousands from the importation of mass amounts of narcotics.

There are those who say that we should not have mandatory minimum sentencing for drugs because we overcrowd our prisons and we should not spend the extra money that it takes to build the prisons to house the new inmates that the drug culture will put there. Well I say to them, if our prisons are not going to be used for drug peddlers, what do we have cells for?

If our funds are not to be used to build prisons to keep drug dealers out of circulation then why do we spend money on law enforcement? The fundamental crisis that confronts American justice and American values is narcotics. Its causal and triggers all of the other problems we face.

If we only give the death penalty or mandatory minimum sentences for those who are the effects of crime, the symptoms of crime—the murderers; the rapists; the robbers; the burglars, but we do not give out equivilent punishment to those who cause those crimes—the drug dealers, then where is the justice in that system?

There are those who say that we are spending too much money on education and drug prevention programs. But, I ask you if we do not spend billions of dollars today to explain the evils of drugs to our children and deter them from becoming ensnared in the drug culture, then of what use are the tens of billions of dollars spent on public education?

Why should we pay a teacher, pay for the construction of the school building; pay for a principal; pay for custodians; and pay for school buses all to transport students to class when their minds are all befuddled by narcotics? Of what use is it possibly to approve higher education standards when we are teaching students who cannot possibly focus on the subject matter if they are too high on drugs.

The money that we are spending on drug education today is a prerequisite to all other spending that we are committing to education. It represents a fundamental trigger which must be pulled if the other money that we are putting in education at the State, local, and Federal level is going to be effective.

Finally, I hear those today who say that we must turn away from a program of drug testing. That we have no right to ask all Government workers to take drug tests. I ask them, if we have no right to ask that workers for the Federal Government are straight and sober and not high, then what do we have a right to ask them?

If we have no right to ask them when we pay them, we pay them to give their efforts fully to their jobs as opposed to dividing those efforts between the never, never world of drug addiction and their jobs. Finally, American Government must take the initial step of providing help to those who are afflicted by the drug culture.

Unless we do that, and unless we are able to provide rehabilitation to those Government workers we find are ensnared in drugs then the American Government is failing its duty to its employees and in turn failing its duty to the American people.

The central issue that we face today in the U.S. Senate is if we are going to take drugs seriously, or if we will continue to let it off with a slap on the wrist and give something less than a major national commitment to the effort. Were we at war with a foreign power, we would harness our military and our educational system, or criminal justice system and everything we were capable of, to defeating that enemy, that is the equivalent that I call for in the drug war.

Mr. HATCH. Mr. President, I would like to clarify the intent of the formula for distributing new treatment funds. The need criteria will be measured by the latest available data a State may have. It is not our intent that new funds be made available only to those States who have comprehensive data collection systems. We in Congress recognize there is a great need for treatment funding and the extent of that need may not be fully documented. However, it is our hope that States will develop the capacity to measure the demand for such services.

Mr. MOYNIHAN. Mr. President, I agree with my colleague the Senator from Utah, with respect to his concern that States develop data-collection techniques for purposes of documenting need under the treatment formula.

I would add that those States most in need of additional treatment and rehabilitation resources because of a high incidence of drugs and alcohol abuse are more likely to have such data-collection procedures in operation. It is our desire to ensure that the portion of funds to be distributed on the basis of need criteria are used just for that—those States which are experiencing the greatest difficulty in accommodating the demand for treatment and rehabilitation services by drug and alcohol abusers.

Mr. President, the Omnibus Drug Enforcement Act of 1986, marks an important turning point in the war against drug abuse in this country. At last, we have turned from talk to action.

I have been involved in the drafting of this bill ever since my colleague, the minority leader, Senator BYRD, appointed me to the Democratic Working Group on Drugs in early August. And I note, Mr. President, that the law enforcement provisions, and the treatment and rehabilitation provisions of this legislation are based on S. 15, the bill I introduced on the first day of the 99th Congress. I am pleased that as we draw near to the end of this session, the provisions of this bill will indeed become law.

The law enforcement provisions of this bill will assist State and local authorities in combating drug traffick-

ing. Specifically, the legislation we consider today calls for $230 million to be distributed in the form of grants to State and local governments to assist them in apprehending, prosecuting, and incarcerating drug pushers and traffickers.

I have personally heard from many of these local authorities, ranging from the Erie County sheriff's department, to the New York City mayor's office, thanking me and my colleagues for finally giving them the ammunition with which to wage this long and continuous battle.

Law enforcement is only half of the armaments needed in the war against drugs. Treatment is just as critical in any effort to combat illegal drug use. We must treat people who need help and we must do so with the most recent and effective methods available. Thus we must give States with the highest incidence of drug abuse a significant share of the funds. That is why I insisted on the distribution of treatment funds based on both population and need.

Permit me to explain. In the Senate version of this bill, recognizing that some areas of the country are in greater need of assistance than others, we provided that 75 percent of the $175 million grant program be allocated on the basis of need, and 25 percent allocated on the basis of population.

The language substituted by the House states that 100 percent of the money for treatment programs be allocated on the basis of State population between ages 15 through 65, weighted by the State's relative per capita income, regardless of need.

Fortunately, a compromise was reached, and the bill before us today guarantees that over one-half of the money is allocated on the basis of need, with the rest allocated on the basis of population—not weighted by per capita income. This arrangement benefits those States, like New York, which have a disproportionate number of drug abusers in need of treatment, while ensuring that each State will receive at least some of the funds.

Mr. President, one aspect of treatment that holds some promise is the development of chemical antidotes and narcotic antagonists. According to Dr. Herbert D. Kleber and Dr. Frank H. Gawin, both with the Yale School of Medicine and affiliated with the National Institute on Drug Abuse, the key component of treatment of drug abuse is preventing an addict from relapsing into old habits after successfully withdrawing from his or her addiction.

Narcotic antagonists do just that.

I have spoken to the Director of the National Institute on Drug Abuse, Dr. Charles Schuster, on this very subject. He informed me that we do have a drug that is available and which successfully blocks the effect of heroin. However, we do not currently have such antagonists for cocaine.

That is why I urged the inclusion of specific language in this bill directing NIDA to increase and intensify its research into these and other forms of chemical treatments for drug addiction.

Again, let me reiterate how proud and pleased I am to have played an active role in bringing this major antidrug abuse initiative to the floor of the Senate and seeing it passed here today. Since 1969, when I served as President Nixon's Special Assistant for Urban Affairs, I have been immersed in the efforts to stop both the supply of drugs into America, and to reduce the demand. Today, we have finally proven to the people of this country that we are serious, and committed to curing the plague of drug abuse that infects every sector of our society.

COMMENDING STEVEN GERSTEN, A STUDENT AT THE UNIVERSITY OF SOUTHERN CALIFORNIA, FOR HIS EFFORTS AGAINST DRUG PARAPHERNALIA

Mr. WILSON. Mr. President, I rise today in support of the bill, the Anti-Drug Abuse Act of 1986.

Among the bill's important provisions is a section containing the text of a bill that I introduced last year, S. 713, which will ban the import, export, and interstate shipment of drug paraphernalia.

Since introducing the Mail Order Drug Paraphernalia Control Act, community groups and public officials from across the country, including a number of Governors, have contacted me to express their support for this legislation. Among those supporting the bill is the Governor of my own State of California, Gov. George Deukmejian, as well as Californians for Drug-Free Youth and the California Parents and Teachers Association. I am extremely pleased that the bill has been included in the historic antidrug abuse legislation now before us.

Thirty-eight States have laws to regulate the sale of drug paraphernalia at local "head shops" or to regulate the sale of such items to minors. But these laws often are to no avail, because young people can order drug paraphernalia through magazines and mail order catalogs. My bill, as incorporated in this omnibus legislation, will prohibit such mail order sales of drug paraphernalia, which have grown drastically in recent years.

Catalogs and publications promoting drug use, such as High Times, which has a reported circulation of approximately 4 millon, advertise numerous types of drug paraphernalia, including so-called bongs and cocaine spoons. These products glorify the use of drugs, thereby serving to undermine efforts to educate young people about the real dangers of drug abuse. By eliminating mail order sales of drug-related products, this legislation will help discourage drug abuse among teenagers and young adults.

Mr. President, I would like to express my sincere thanks to Steven Gersten of Los Angeles, CA, who first brought the mail order paraphernalia problem to my attention. Steven is a senior at the University of Southern California, majoring in political science and minoring in chemistry. He is active in a number of organizations concerned about drug abuse, including Californians for Drug-Free Youth, the National Federation of Parents for Drug-Free Youth, and Tough on Drugs.

Steven's involvement in the antidrug movement began through his work as a reporter for his high school newspaper. When a fellow student offered drugs to Steven, he turned down the offer and asked the other student if he would be willing to grant an interview. Through the interview, Steven became aware of the drug paraphernalia industry and its advertising. Realizing the impact that the availability of paraphernalia had had on his fellow student, Steven decided to investigate the industry further. During what became a 5-year study, Steven made some frightening discoveries. Most significantly, he became aware of the deceptive methods used by drug paraphernalia companies in their attempts to communicate to our Nation's youth that getting high is "cool," normal and even lawful.

Mr. President, these parasitic, unscrupulous merchants are preying on our young people. Their products enhance or aid consumption of illegal drugs, glorify their usage, and enrich those who would victimize our youth through mind-destroying drugs. If we are to curb the drug abuse problem in this country, we must outlaw such devices. By attacking the drug paraphernalia industry, we are effectively attacking the abuse of drugs.

Mr. President, Steven Gersten, by pressing the need for Federal drug paraphernalia legislation both with the Congress and officials throughout the country, has proven once again that a single individual, young or old, can make a difference—both in the legislative process and in the fight against drugs.

Mr. BIDEN. Mr. President, I rise today in support of the forfeiture amendment. As the author of the provisions establishing the new special forfeiture fund, I believe that the amendment will in no way undermine or hinder the effectiveness of the forfeiture provisions included in this bill.

In establishing the new special forfeiture fund, our intent was to provide that the proceeds from seized and forfeited assets be used to fund a major portion of the Nation's Drug Control Program. Under existing law, the Department of Justice and the Customs

Service each has a forfeiture fund. These funds are used to reimburse the seizing agencies for costs incurred in forfeiture and seizure operations. In this way, agencies have an incentive to rigorously pursue forfeiture operations.

However, any moneys remaining in the forfeiture funds at the end of the year are returned to the General Treasury. With the creation of the special forfeiture fund, 90 percent of the moneys remaining in the Justice and Customs forfeiture funds will be transferred to the new special fund. These moneys will be disbursed by the Attorney General as the Chairman of the National Drug Enforcement Policy Board for Drug Control Efforts at the Federal and State level, including both law enforcement and drug abuse prevention and treatment programs.

The amendment offered by the distinguished chairman of the Budget Committee simply provides that the moneys disbursed from this special fund would be specified in appropriations acts. I would like to note that the provision which establishes this new fund explicitly provides that all moneys disbursed from the special fund would not be used to supplant existing funds, but would be used to supplement any moneys that would otherwise be available. I am confident that the members of the Appropriations Committee will comply with this language, so as to insure that the purposes of this legislation are fully carried out. The oversight role of Congress is one of its most important responsibilities, and I think this amendment will help in insuring that the congressional intent of this legislation is fully implemented by the executive branch.

Finally, I would like to note that it is my expectation that the Attorney General, as Chairman of the Drug Policy Board, will submit a detailed appropriations request for the use of the moneys in the special forfeiture fund. This responsibility is entirely consistent with the role the Policy Board Chairman is supposed to play. In fact, the National Narcotics Act of 1984, which created the Policy Board, explicitly provides that the Policy Board is responsible for coordinating the Federal drug control effort, including the development of budgetary priorities. Unfortunately, the Attorney General, to date, has failed to develop such priorities. In fact, the President's Organized Crime Commission noted with alarm that the Policy Board has failed to undertake the essential task of developing budgetary priorities for the overall Federal drug control effort, despite the clear responsibility the Policy Board has in this area. It is my hope that the Attorney General will develop such priorities in the near future, and that these priorities will be reflected in the appropriations request submitted pursuant to this legislation.

It is about time that drug traffickers begin to pay for the damage they inflict upon our society. This legislation will provide that all moneys derived from seized and forfeited assets will be used to fund drug control efforts. In addition, I support the amendment by the Senator from New Mexico. I am confident that the members of the Appropriations Committee will insure that moneys in the new special forfeiture fund will be used to supplement, and not supplant, otherwise available moneys. I urge my colleagues to support this amendment.

The PRESIDING OFFICER. The question is on the motion to concur with amendments.

The motion was agreed to.

Mr. DOLE. I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, will the distinguished majority leader ask unanimous consent that all Senators may have the right to insert their remarks in the RECORD?

Mr. DOLE. Right. I will make that request, that all Senators may have the right to insert their remarks with reference to the bill or any part thereof in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, let me again thank the staff. I hope now we have improved this to the point where the House will find it so attractive they will just zip it on through tomorrow. But there is some rumor that they may send us another bill tomorrow, and that is another reason we would like to have this one on its way so it will be there to greet them in the morning.

I thank all my colleagues. I know there are one or two who wanted a rollcall vote, but in nearly every case those who requested a rollcall vote voted for almost the same bill earlier so they are on record. I thank my colleagues for moving rather expeditiously once we got started.

Mr. BYRD. Mr. President, I think everyone has been thanked here this evening except the majority leader, and I wish to express my thanks and commendations to him for persistence and his urging that action be taken this evening. That has been taken and I hope the majority leader will say, "Well done, we can all go home."

Mr. DOLE. There will be no more votes and I do plan to recess in just a few moments. I want to make one inquiry on the House side. I am advised by counsel that the continuing resolution will be passed in the morning and as long as it is delivered and signed by the President by noon the Government will not shut down. So we will make certain we have that for him.

SENATE CONCURRENT RESOLUTION RELATING TO TAX REFORM ACT OF 1986

Mr. DOLE. I yield briefly to the Senator from Oregon for an announcement, I hope a temporary announcement.

Mr. PACKWOOD. I do not know if it is temporary or not, Mr. President. I have been on the floor for 6½ hours trying to get a unanimous-consent agreement on the concurrent resolution. We do not have one and we will not get one tonight, and it is what I feared. The longer we delayed, the worse it got.

I just took a phone call from the distinguished junior Senator from Louisiana [Mr. JOHNSTON], who wanted to know if we could offer an amendment he wanted. I said we could not. He was gracious. He said he understood. I have got two other phone messages in my pocket from Senators I have not returned but I will wager I know what they are when I call them. In the meantime I have already advised the distinguished minority leader we have another Democratic objection to any unanimous-consent agreement on this night so there is no point in pursuing it any further tonight.

Mr. BYRD. Mr. President, may I say tomorrow morning I hope new rays of bright sunlight will clear the air in many ways and that we will be able to proceed expeditiously with action on the technical amendments.

□ 2150

AUTHORIZATION FOR FILING STATEMENTS WITH RESPECT TO IMPEACHMENT TRIAL OF HARRY E. CLAIBORNE

Mr. DOLE. Mr. President, I ask unanimous consent that Senators may have until the close of business tomorrow, Thursday, October 16, to file their written statements with respect to the impeachment trial of Harry E. Claiborne.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE METS' VICTORY IN THE NATIONAL LEAGUE PLAYOFFS

Mr. MOYNIHAN. Mr. President, earlier this evening, the New York Mets scored an extraordinarily impressive 7-to-6 victory in the sixth and deciding game of the National League playoffs, defeating the Houston Astros in an almost unprecedented 16-inning contest. While the Senate debated the details of the concurrent resolution, millions of fans, among them a large number of my constituents, witnessed

this marathon baseball game. Anyone who saw the game knows that that was "baseball like it oughta be."

This game, Mr. President, was the culmination of a tremendous season for the Mets, who won a team record 108 games. I salute Davey Johnson, the Mets' irrepressible manager, and the entire Mets organization on an inspiring win. Jesse Orosco—the winning pitcher in three games in the series, including tonight's game—Darryl Strawberry, Gary Carter, and Keith Hernandez—the heart and conscience of the team—Dwight Gooden, Ron Darling, Wally Backman—one-half of the "Partners in Grime"—Mookie Wilson, Ray Knight, Rafael Santana, Bob Ojeda, "HoJo" Howard Johnson, Sid Fernandez, Rick Aguilera, Danny Heep, Roger McDowell, Lenny Dykstra—the other half of the "Partners in Grime"—Ed Hearn, Tim Teufel, Kevin Elster, Kevin Mitchell, Doug Sisk, Lee Mazzilli, Randy Niemann, and Rick Anderson—they have done themselves and New York proud.

Mr. President, as we await the outcome of the American League Championship, I take this opportunity to thank and congratulate the New York Mets for giving us a thrilling season. We look forward to an equally exciting series. Let's go Mets!

TRIBUTE TO TOM EAGLETON

Mr. LAUTENBERG. Mr. President, I rise today to pay tribute to a friend and colleague, Senator TOM EAGLETON. After three distinguished terms in the Senate, TOM EAGLETON is leaving to return to his native State to practice law, teach, and write. He will be missed. His voice, which was often sounded as a kind of conscience of the Senate, will be hard to replace.

His opposition to the war in Vietnam was vocal and strong. It was the Eagleton amendment to cut off funds for the bombing of Cambodia that ended the United States combat role in Southeast Asia. He is rightly proud of that legislative achievement.

Senator EAGLETON maintained a strong interest in foreign affairs throughout his Senate career. In the 99th Congress, he chose a seat on the Foreign Relations Committee, a fitting final assignment.

Fairness and justice have marked TOM's actions in domestic legislation as well as foreign affairs. Through his work on the Labor and Human Resources Committee, TOM influenced education, child nutrition, and social services legislation over the years. His work on reestablishing a separate program of desegregation aid is but one recent example.

As ranking minority member of the Governmental Affairs Committee, Senator EAGLETON played an important role in developing the new civil service retirement system. TOM EAGLETON has also been one of the few Senators who maintained an interest in District of Columbia affairs and understood the importance of home rule for the Nation's Capital.

But, Mr. President, his role as the voice of conscience can be seen most clearly in his work on matters of ethics and nominations. In the recent fight over the nomination of Daniel Manion to the appeals court, Senator EAGLETON spoke out about the unsuitability of Manion's qualifications to be a judge. He also reminded us of the permanence of a judicial nomination, and therefore the gravity of the confirmation process. He helped all remember that a Senator's role is not to mindlessly accept all Presidential nominations, but to truly engage in the advise and consent process.

Mr. President, others of our colleagues who have known TOM EAGLETON for more years than I can recount the highlights of his career with greater authority, but no one has more respect than I for the kind of contribution he has made to the Senate and our country. He has made a difference in his 18 years in this body. I salute TOM EAGLETON, and say I hope this is not goodbye and that we will see and hear from him in the years to come.

TRIBUTE TO SENATOR GARY HART

Mr. PELL. Mr. President, at the conclusion of this Congress Senator GARY HART will be leaving the Senate having decided to end his service here after 12 years of distinguished representation of the people of the State of Colorado. During these years Senator HART has made unique and significant contributions to the work of the Senate and to the welfare of the Nation. I am delighted to join my colleagues in congratulating Senator HART on this outstanding record of service.

GARY HART has brought to the Senate the ability to recognize and identify the principal problems confronting our society, and the ability to examine those problems with a fresh eye, producing new, thoughtful and productive approaches to solving those problems.

When GARY HART first came to the Senate in 1973, our Nation was awakening to the need for effective Government action to protect our air, water, and Earth from pollution. It was in response to that challenge that Senator HART founded and served as the first chairman of the Congressional Environmental Study Conference, an organization that continues today to play a major role in assuring that the Congress gives informed and proper consideration to the protection and improvement of the environment.

Similarly, Senator HART was among the first in the Senate to see clearly the need for a fresh look at the organization and functioning of our military defense establishment. To meet that need he led the way in forming the Congressional Military Reform Caucus, and served as its first chairman. Through its constructive, responsible and thoughtful work, the caucus gained the respect not only of critics of the Pentagon but also of those in the military establishment who recognized the need for changes to provide a more efficient, effective and economical military defense system. The Military Reform Caucus, founded by Senator HART, has had a profound and beneficial impact on defense organization, procurement, and personnel policies.

Senator HART and I share a strong continuing interest in one of the keystones of our current military personnel policy—the volunteer armed services. I am the principal cosponsor with Senator HART of legislation requiring a study of a different approach that would require a year or two of national service by every young American, with the service to be performed either in the armed forces or in civilian nonprofit organizations and activities. Senator HART is an articulate proponent of this concept and I will miss his support for it here in the Senate.

We all know that GARY HART's public service to the Nation will not end with his departure from the Senate. In the coming years he will be playing a prominent role in focusing and illuminating public debate over the future course of our Nation. His abilities will be missed here in the Senate, but it is good to know that they will continue to be available to the American people. I know, speaking personally that I shall miss him very much.

SENATOR LAXALT WILL BE MISSED

Mr. PELL. Mr. President, I rise to pay tribute to one of our colleagues who has decided not to seek reelection to a third term in the U.S. Senate after a lifetime devoted to public service.

I am referring to our colleague and friend, the senior Senator from Nevada [Mr. LAXALT], who has made a lasting contribution to the Senate as a leader of his party, as a legislator and counselor, and as a source of wit and wisdom.

PAUL LAXALT attributes his outlook to the fierce independence of his father, a Basque sheepherder.

President Reagan and PAUL LAXALT are friends, a fact that has not escaped public notice. They met back in 1964 and they became friends while serving as Governors of neighboring States. PAUL subsequently became chairman of Ronald Reagan's 1976 and 1980 Presidential campaigns.

He also served as General Chairman of the Republican National Committee during the 98th Congress and, at the same time, was one of the chief architects of a major crime reform bill during that Congress.

The senior Senator from Nevada has been recognized publicly as a key counselor in such important Reagan administration decisions as pulling the Marines out of Lebanon early in 1984, abandoning the multiple-launch basing mode for the MX missile and helping resolve the Marcos Philippines crisis.

He has a proven knack for bringing us together, regardless of political philosophies. He has been quoted as saying: "I have made it a point never to let political differences become personal." I can attest to the success of that axiom I know how much I like and respect him personally.

PAUL LAXALT is a valued friend and colleague. I know we shall miss him and that we all wish him well.

BARRY M. GOLDWATER: PROFILE IN CONSCIENCE

Mr. PELL. Mr. President, when the 100th Congress convenes next January one of our most colorful and forceful colleagues will be absent from the Senate Chamber. After 30 years of distinguished service in the Senate, BARRY M. GOLDWATER is retiring and returning to his native Arizona.

I have been privileged to serve with Senator GOLDWATER for the last 22 years of his service in this body. During that time I have grown to admire and respect his integrity, his passion for freedom and individual rights, and, above all, is candor and unsurpassed ability to "call them as he sees them."

BARRY GOLDWATER began his political career in 1949 when he was elected to the Phoenix City Council on a reform ticket. Three years later he pulled off one of the greatest political upsets in Senate history when he defeated Senate Majority Leader Ernest McFarland. In 1964, BARRY GOLDWATER took on another giant when he opposed incumbent President Lyndon B. Johnson. Although he was defeated in that election by a wide margin, he won the respect of the American people for his refreshingly candid style of political campaigning. Many of the concerns he raised in that campaign—and several of the more controversial positions he adopted—today represent the mainstream views of the American people. As he enjoys what I hope will be a long and healthy retirement, BARRY GOLDWATER will savor the knowledge that he was truly the political and ideological grandfather of the so-called Reagan Revolution of the 1980's.

It was after the 1964 presidential campaign that many Americans living and working abroad told BARRY GOLDWATER of their frustration in not being able to vote. When he returned to the Senate in 1969, BARRY GOLDWATER and I began to work on securing absentee voting rights for Americans temporarily living abroad. Our effort took 9 long years, but—as in every other task he approached in the Senate—BARRY GOLDWATER never gave up. I was privileged to serve as chairman of the Rules Committee, the authorizing committee for this legislation, when the Overseas Voting Rights bill became Public Law 95-593 in 1978.

Senator GOLDWATER capped his career in the Senate by serving as chairman of the Senate Armed Services Committee. No other role could have been more appropriate for BARRY GOLDWATER. He has served and loved the military throughout his entire life, beginning in 1930 when he was commissioned a second lieutenant in the Army infantry reserve. Following active duty service in World War II, Senator GOLDWATER organized the Air National Guard. In 1967, he retired as a major general in the U.S. Air Force Reserve. Every man and woman serving in uniform today owes a debt of gratitude to BARRY GOLDWATER and his unflinching commitment to improving our armed forces.

The range of BARRY GOLDWATER's career in the Senate reveals the diversity and depth of the man. He is a former member of the Senate Aeronautical and Space Sciences Committee and has devoted a great deal of time to aviation problems. He is known as Mr. Communications for his dedicated work on telecommunications legislation and tenure as chairman of the Communications Subcommittee of the Senate Commerce Committee. Senator GOLDWATER's keen interest in photography, centered on the beautiful landscapes of Arizona, prompted his work in protecting the environment and preserving the cultural contributions of native American Indians. He and I have had the pleasure of serving together on the Smithsonian Board of Regents.

Senator BARRY GOLDWATER is a man who has always loved his native land of Arizona and the other lands of the Southwest. His dedication to preserving individual freedoms is an outgrowth of his Southwestern background, his prominent business career before entering politics, and his happy and enriching family life, all of which have been sources of inspiration throughout his public service. BARRY GOLDWATER is not a Senator who will be easy to replace, and our deliberations next year will be diminished in the absence of his feisty and colorful spirit. My wife, Nuala, joins me in wishing BARRY GOLDWATER a long, healthy, and productive retirement in his beloved Arizona.

FREEDOM OF INFORMATION ACT CHANGES

Mr. HATCH. Mr. President, several sections of this important bill will make important changes in the Freedom of Information Act, particularly those which will considerably enhance the ability of Federal law enforcement agencies such as the FBI and the DEA to combat crime, including drug offenses.

At this juncture, the Senate has made three technical amendments in this part of the bill. First, we have restored the originally intended language of exemption 7(C) to provide that that exemption applies to information which "could reasonably be expected to" cause harm to personal privacy interests. This language comports with the other changes being made to other subparts of exemption 7 in this bill. It also is precisely the language that was contained in the earlier Senate-passed bill, S. 744, from which it was agreed all exemption 7 amendments would be taken for purposes of this bill.

Similarly, we have corrected the apparently inadvertent deletion of a phrase in the "review costs" portion of the bill, section 1803, subparagraph (4)(A)(iv). As corrected, the language now reads: "Review costs shall include only the direct costs incurred during the initial examination of a document for the purposes of determining whether the documents must be disclosed under this section and for the purpose of withholding any portions exempt from disclosure under this section." This language is precisely what was contained in the draft bill negotiated between the Justice Department and the staff of the House Subcommittee on Government Information, Justice and Agriculture this year, which I understand was what was intended to be employed for purposes of this bill and is certainly most appropriate.

Third, we have changed the effective date contained in section 1804(b)(1) of the bill to specify a more realistic 180-day effective date. This change is necessary to permit a more reasonable period of time in which the Office of Management and Budget and, in turn, Federal agencies, need promulgate new fee regulations. I am certain that no one in this body or in the other House intends that the assessment of any properly applicable FOIA fee be impaired by any difficulty or delay encountered in the development and promulgation of new fee regulations.

As Chairman of the Judiciary Committee's Subcommittee on the Constitution, which held primary responsibility for considering FOIA reform legislation during these past several years, and as a principal author of much of this bill's FOIA reform sections, I would like to emphasize sever-

al things about the nature of these important provisions and what they are intended to accomplish.

First, it is expected that the law enforcement provisions will greatly enhance the ability of all Federal law enforcement agencies to withhold additional law enforcement information necessary for them to maximize the effectiveness with which they perform their critical functions. As Representative TOM KINDNESS has already observed in the House, the important alterations to the language of exemption 7 that are made by this bill serve to modify the scope of this exemption. There should be no misunderstanding that, as they derive precisely from the provisions of S. 774, they are intended to broaden the reach of this exemption and to ease considerably a Federal law enforcement agency's burden in invoking it.

For example, I do think it should be noted particularly that the bill's substantial broadening of exemption 7(E) is designed to permit agencies to withhold without question all "guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law." As such, it will directly overrule any lingering effect of the D.C. Circuit's decision in *Jordan* v. *Department of Justice*, 591 F.2d 753 (D.C. Cir. 1978) (en banc). Because of the great sensitivity of such guidelines in the law enforcement context, and the very significant harm threatened to prosecutorial effectiveness if they were to be freely available under the FOIA, this important modification should be applied where necessary to protect critical law enforcement interests, regardless of the extent of their availability within the law enforcement community.

As for the additional law enforcement provisions of the bill, there likewise should be no misunderstanding that they will logically operate as exclusions—not as mere exemptions—to be applied whenever the special circumstances specified in them are found by the agency to exist. Thus, while the effect of these provisions will be somewhat analogous to the situation in which an agency neither confirms nor denies the existence of responsive records—colloquially known as glomarization—their operation, both administratively and in court, will of necessity be different. An agency invoking one of these special exclusions will necessarily do so without the specific knowledge of the requester—because anything else would defeat the very intention of the exclusion—and any requester who wishes to challenge an agency's possible application of an exclusion can expect the agency to defend against such a challenge with the automatic filing of an in camera affidavit, regardless of whether the exclusion was in fact employed in that case.

In addition to these critical law enforcement amendments, which should be broadly applied in future FOIA cases to achieve their intended law enforcement protection effects, the bill changes and clarifies the FOIA's provisions regarding fees and fee waivers.

A number of points should be noted regarding these provisions, lest there be any misunderstanding about their agreed-upon intended effects. First, as I mentioned in my brief floor statement on September 30, the Senate made a number of specific changes to the fee and fee waiver provisions for specific reasons. As modified here in the Senate, these provisions are not intended to permit a fee waiver to any requester simply on the basis of his status as a disseminator of public information. In fact, the dissemination of Government information as part of a commercial enterprise is not an activity that should be subsidized by the Government, especially in this time of fiscal shortages, and it is not intended that these provisions have such an effect. Nor is it intended to specially favor the speculative possibility that a free-lance writer or hopeful author might be able to disseminate requested information. Of course, a true "media" requester, in the traditional and common sense meaning of that term, should be treated otherwise, as is clearly provided for in the plain language of the bill.

As a matter of fact, it should be noted that the bill's fee and fee waiver language, as modified here in the Senate, is phrased in very clear and plain terms, which should be construed and applied according to their ordinary and common meanings. Certainly no extraordinary meaning is intended to be conveyed by use of terms such as "commercial" and "media." Similarly, the bill's language providing for the continued viability of fees chargeable under "a statute specifically providing for setting the level of fees for particular types of records" is plainly intended to preserve the fee structure of any such statute, such as those which are part of the National Technical Information Service [NTIS] statutory scheme, without any particular other limitation.

As for the bill's new general fee waiver standard itself, it should be likewise taken to mean exactly what it says, which is not so very different from the fee waiver standard found in existing law. The new standard should serve to clarify the law in this area and to permit agencies, under the regulations of the Office of Management and Budget and the guidance of the Department of Justice, to make less controversial fee waiver determinations.

For example, this change will give greater effect to the administrative judgment belatedly reached in the case of *Better Government Association* v. *Department of State*, 780 F.2d 86 (D.C. Cir. 1986), in which the agency erroneously failed to apply a proper "public interest" standard at the administrative level. It is quite significant that the bill's clarified general fee waiver standard, as modified in this particular regard here in the Senate, retains the most important touchstone of the previous statutory standard: Both provide, most fundamentally, that a fee waiver is to be granted only where to do so will be in the "public interest." Agencies should keep this standard uppermost in their minds in making determinations under this revised formulation. It is certainly not intended that any waiver be granted under circumstances in which the public's interest is not being served through the FOIA request.

Indeed, this standard focuses on only those disclosures determined "likely to contribute significantly to public understanding of the operations or activities of the Government," which establishes a considerable standard to be satisfied. It is intended that the word "significantly" in this formulation be given its common force and weight in application and that the qualifying word "public" be applied so as to require a breadth of benefit beyond any particularly narrow interests that might be presented.

It is also quite significant that the reformulated fee waiver standard retains the firm requirement that, regardless of any other consideration, waivers not be granted where disclosure would be "primarily in the commercial interest of the requester." The term "commercial" here, as elsewhere, should of course be given its common meaning, so that information vendors, data brokers, and other second-hand disseminators of documents who do so at a price as the means of their economic self-sufficiency, should not qualify under this language. Such requesters, of course, would hardly qualify under any reasonable construction of the term "media"; indeed, such requesters should be required to pay the new review costs provided for in this bill.

Finally, it is not intended that the general approach of the Justice Department's 1983 fee waiver guidelines be repudiated by this bill's alteration of the general fee waiver standard. Those guidelines logically required agencies to make careful determinations about the circumstances surrounding a FOIA request before determining that a waiver was warranted under the statutory standard. That task will fundamentally be no different under this bill, because agencies will continue to have the responsibility of reaching the judgment, based upon all information provided by re-

questers, as to the propriety of a waiver. Requesters, in turn, should expect to fully document and, where necessary, attest to, the facts which they say warrant the expenditure of public funds on their immediate behalves.

PROFILE OF A UNIQUE RHODE ISLAND FAMILY

Mr. PELL. Mr. President, the Providence Journal recently profiled a very talented and unique family, that of Matthew and Laura Lopes of East Providence. Their five children have excelled in athletics and academics, and brought credit not only to their proud parents but to their entire community. I ask unanimous consent that the text of the article, entitled "East Providence Lopes': They're solid athletes . . . and solid citizens" be printed in full in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EAST PROVIDENCE LOPES': THEY'RE SOLID ATHLETES AND SOLID CITIZENS

(Bob Leddy)

East Providence—Families, say the sociologists, are the backbone of a society. Cohesiveness.

You don't need experts to see cohesiveness at work in the Lopes household of East Providence. The ties that bind Matthew and Laura Lopes with their five children are not only those of respect, but, in the case of three of the Lopes offspring those of sports, too.

Yes, there are some bona fide good sports in the Lopes clan.

Consider: son Phil Hazard was arguably one of the best sprinters ever to don an East Providence High track uniform. A 1974 E.P. grad, Hazard still owns the state's 100-yard record, a 10.6 clocking in his senior year.

White a Townie, the 6-foot-1, 175-pound Hazard also captured All-State honors in the 220-yard dash outdoors, and in the 50- and 300-yard dashes indoors.

He also played football, where he was a wide receiver.

Hazard went on to Boston College, where he saw football action, but continued his starring role on the track. In his freshman year he was the IC4A indoor champ in the 60-yard event.

Now 30, Hazard is married, the father of four children and a systems engineer for IBM.

Youngest son Matt, Jr. A 1980 Townie grad, Matt was an All-State kicker on coach Bill Stringfellow's football squad. Lopes saw action on the 1979 Super Bowl club.

Like his older half-brother, Phil, Matt Lopes Jr. was no slouch in track, either. He was state indoor champ in the 300, and was king of the hill outdoors in the 220-yard dash.

While at Dartmouth, Lopes also played football and ran track. Now 24, the 5-10, 180-pounder is a third-year law student at the University of Pennsylvania.

And let's not forget youngest daughter Laurie.

She's now 20 and a senior at Dartmouth. But when Laurie Lopes was at East Providence, she was the person to catch in the 100 and 220 dashes. She was All-State in those two events for three years.

In addition, Lopes also played basketball for the Townies. She graduated from high school in 1983.

But Matt Lopes Sr. is also very quick to point to the accomplishment of his other two children—daughters Phyllis, 32, and Carol, 21. As with their other siblings, they too followed in the Townie tradition. Carol, in fact, was a cheerleader. Both Carol and Phyllis are Providence College graduates.

Sitting in the comfortable living room of his Woodward Avenue home, Matt Lopes Sr. is talking about his family. His pride in his children and their achievements is evident.

"Listen, I'd never stop talking if I really started talking about my kids . . . any of 'em. They're good people, good citizens."

Lopes, a youthful-looking 60, was born in Warwick and grew up in Providence's Fox Point section. He graduated from Central High, where he played some sports.

"I was the sixth man on the varsity basketball team," he says. "I always liked sports, and I had a lot of fun at Central."

In the 1950s Lopes returned to athletics, coaching the Providence "Agmacs" a semi-pro basketball team.

Lopes, a man deeply committed to his community, is also familiar with its sports scene. He's a regular at East Providence events and has nothing but praise for the school's coaching staff.

"Billy Stringfellow (AD and head football coach), (track coaches) Ed Cronin and Billy Poland and (girls' basketball pilot) Ginny Duarte. They all treated my kids right. The high school was very supportive to my kids."

Lopes also speaks fondly of those people who coached Matt Jr. and Phil during their youth: George Gennari of the East Providence Boys' Club and Joe Deschene of the Mohawks pre-teen football program. "These people . . . they were there," says Matt Sr.

And while he acknowledges that sports have done much for his children who played games, "academics is important. It's all important!"

Casting an upward glance at a wall lined with his kids' plaques and trophies, Matt Lopes Sr. nods. "I look at all that," he says, "but, you know, I'm more proud of what they're doing now."

TRIBUTE TO SENATOR RUSSELL LONG

Mr. PELL. Mr. President, the conclusion of this 99th Congress will mark also the end of a remarkable 38 years of service in the U.S. Senate by our distinguished colleague, Senator RUSSELL LONG of Louisiana.

It is remarkable when we realize that Senator LONG's service in the Senate spans nearly one-fifth of the entire 198-year history of the U.S. Senate. It is remarkable when we consider that he has served under eight Presidents of the United States, beginning with Harry S. Truman, who was in the White House when Louisiana voters first sent RUSSELL LONG to the Senate in 1948.

The length of RUSSELL LONG's tenure here in the Senate is matched by the quality of his service to the Nation and to his State of Louisiana. Serving for 14 years as the chairman of the Senate Finance Committee, he was and is the Congress' foremost expert on our Nation's tax laws. Tax bills, because they have the potential to touch directly the economic status of every person, industry, and economic sector, always have been the most difficult and contentious pieces of legislation to steer through the Senate to passage. In that difficult art, Senator LONG gained a well-earned reputation as a superb tactician and floor manager who occasionally lost a skirmish, but never a battle.

Over the years, I found myself in basic agreement with Senator LONG on a broad range of tax policy questions, including, for example, his effective advocacy of tax incentives for employee stock partnership plans.

We have not always agreed. Over the years, RUSSELL LONG as a Senator from an oil-producing State, and I as a Senator from an oil-consuming State, understandably found ourselves having differing views over tax, import, and trade policies affecting petroleum. But those differences never prevented RUSSELL LONG from giving a fair consideration, and at times, valuable support to proposals that I had made in other areas. As a member of the Senate Commerce Committee, for example, he was always helpful and forthcoming in his support for programs such as rail passenger service improvements in the Northeast corridor and for the National Sea Grant College Program.

Senator LONG's substantive achievements, his knowledge, and his leadership have earned him the respect of all of his colleagues. Beyond that, his unique and effective style of debate has won him the affection of his colleagues. We all have come to look forward to those moments when debate was most heated and when RUSSELL LONG would both break the tension and make a telling point drawing upon his endless supply of anecdotes.

It is difficult, after all of these years, to imagine the U.S. Senate without RUSSELL LONG. He and his lovely wife, Carolyn, will be sorely missed by me and all his colleagues.

ASYLUM PRACTICES AND PROCEDURES AT THE INS AND STATE DEPARTMENT

Mr. SPECTER. Mr. President, the General Accounting Office has given me a preliminary report on a study I requested on April 4, 1985, examining the asylum practices and procedures at the Immigration and Naturalization Service and at the State Department. The object of the study was to try to determine whether applicants for asylum were being fairly treated, regardless of their country or origin, with a particular focus on Central American refugees. The preliminary report appears to back up my concerns about politicization of the asylum

process and at least the appearance of a bias against refugees from Central America.

The GAO reviewed files of applicants from El Salvador, Nicaragua, Poland, and Iran. It found that those seeking political asylum from Central American countries have a much lower approval rate from the INS than those from other countries, even when their claims are similar. Aliens who stated on their applications that they were arrested, imprisoned, had their life threatened, or were tortured had much lower approval rates if they were from El Salvador and Nicaragua than if they were from Poland and Iran. For example, those who described torture to support their asylum request had an approval rate of 4 percent in El Salvador cases, 15 percent in Nicaragua, 80 percent in Poland, and 64 percent in Iran.

The study also provides evidence that the process is far more controlled by the State Department, and thereby subject to political pressures based on foreign policy concerns, in Central America cases. Justice [INS] changed its original decision to agree with the State Department in 100 percent of the Salvadoran cases and 98 percent of the Nicaraguan cases, compared to 78 percent of the Iranian cases.

Moreover, the study found that among the files of the four countries of origin examined, only applicants from El Salvador had actually been deported.

I am very troubled by the findings in this preliminary report, and am anxious to see the final product later this month. While it is clearly too late to respond legislatively this session, I intend to work with Senator SIMPSON and other interested Senators during the next couple months to determine the appropriate congressional response to these disturbing revelations.

My interest in the plight of Central American refugees dates back to my visits to that region in May and August 1983. I was an early cosponsor of what is now known as the DeConcini-Moakley bill, first introduced on November 17, 1983, calling for a temporary halt of deportations of Salvadorans pending the outcome of a study into the conditions of displaced refugees and the risks of return to their country.

This longstanding concern was heightened on January 14, 1985, when 60 undocumented aliens were arrested across the country, including a Guatemalan family in Philadelphia, in an effort to crack down on the Sanctuary movement. After meeting with the Guatemalan family, Mr. and Mrs. Morelos and their 3-year-old daughter, I wrote INS Commissioner Nelson and Secretary of State George Shultz complaining about the practice of arresting aliens without making a thorough investigation of the basis for doing so, including an investigation into possible defenses, such as a claim for asylum. It was my strong sense that Mr. Morelos would have qualified for asylum, considering his allegations of torture corraborated by scars I personally observed.

As I looked into this matter further, discovered that the approval rates for Guatemalan and Salvadoran refugees were shockingly low, given the social unrest in those countries and the activism of many of their citizens. Only four-tenths of 1 percent of the Guatemalans applying for asylum are granted it, and only 2.5 percent of the Salvadorans.

I raised this issue with Elliot Abrams, then Assistant Secretary of State for Human Rights and Humanitarian Affairs, in a hearing before the Foreign Operations Subcommittee on March 14, 1985, noting the apparent unfairness of the process. He agreed that a GAO study of the process would be a good idea.

On April 4, 1986, I submitted the request for a report to the Comptroller General. The final report is not due until the end of this month, but a preliminary report has been provided and I ask unanimous consent that it be printed at this point in the RECORD, along with additional background correspondence.

There being no objection, the material was ordered to be printed in the RECORD, as follows.

ASYLUM

(The following information is based upon a preliminary compilation of data on the application of asylum eligibility standards. It has not been fully reviewed within GAO nor subjected to GAO's quality assurance standards and is, therefore, subject to revision. In addition, some of the data is projected from a sample to a universe. When a sample is used, each result contains some degree of imprecision. The extent of the imprecision for the following data has not been calculated at this time.)

BACKGROUND

United States law allows aliens in this country legally or illegally to apply for asylum. To be granted asylum, an alien is required to demonstrate a well-founded fear of persecution in his or her home country or country of habitual residence because of race, religion, nationality, political opinion, or membership in a social group.

The Refugee Act of 1980

In response to the rapid increase in the number of refugees entering the United States from around the world, Congress enacted the Refugee Act of 1980. The act provided, for the first time, a comprehensive U.S. refugee policy, and it created a systematic and flexible procedure for the admission of refugees of special humanitarian concern to the United States. The act was a product of widespread dissatisfaction with the ad hoc legislative and administrative actions that made up this country's response to refugee problems over the previous 30 years.

The Refugee Act established the authority for any alien present in the United States, or at a land border or port of entry, to apply for asylum irrespective of the alien's immigration status. The act authorizes the Attorney General in his discretion to grant asylum to an alien who meets the definition of a refugee and requires that the Attonery General establish a uniform procedure for determining the eligibility of an asylum applicant. The Attorney General has delegated his authority to grant asylum to INS district directors and EOIR immigration judges. The Attorney General, by regulation, requires INS district directors and immigration judges, to request an advisory opinion from State on the applicant's eligibility.

According to the House Conference Report 96-78; the act brought the United States into conformity with its treaty obligations under the United Nations Protocol on the Status of Refugees. The act incorporates the internationally accepted United Nations definition of a refugee as a person who is unable or unwilling to return to his or her home country because of a well-founded fear of persecution on account of race, religion, nationality, political opinion or membership in a particular social group. One of Congress' primary objectives in adopting this definition of a refugee was to eliminate past discrimination on the basis of outmoded geographical and ideological consideration. Prior to the act, United States asylum policy favored refugees from communist countries and the Middle East. The House Judiciary Committee felt the previous definition of refugee was clearly unresponsive to the existing diversity of refugee populations and did not adequately reflect the United States' traditional humanitarian concern for refugees throughout the world.

During deliberations on the act, Congress considered expanding the United Nations definition of a refugee to include displaced persons fleeing civil strife. The United Nations (U.N.) guidelines to countries regarding refugee status determinations set forth that persons compelled to leave their country of origin as a result of international or national armed conflicts are not normally considered refugees under the U.N. Protocol. The Senate bill, however, contained a definition that included persons who have been "displaced by military or civil disturbances" or "uprooted by arbitrary detention and unable to return to their usual place of abode." The House bill contained only the U.N. refugee definition. The conference committee adopted the House's definition of a refugee, not the Senate's.

OBJECTIVES, SCOPE, AND METHODOLOGY

The objectives were to: (1) provide information on the standards and criteria being applied in granting and denying requests for asylum, (2) determine whether DOJ and the State Department are applying the same standards and criteria across the board, regardless of the asylum applicant's country of origin, and (3) provide information on the status of denied asylum applicants.

Work was performed at the headquarters of the Department of Justice's Immigration and Naturalization Service (INS), and Executive Office for Immigration Review (EOIR); the State Department; the United Nations Office of the High Commissioner on Refugees; and INS district offices in New York City, Los Angeles, Miami, Houston, San Francisco, Chicago, Newark, Baltimore and Washington, DC. The work included: conducting interviews with DOJ and State Department officials; observing asylum interviews and deportation hearings and visiting detention facilities; researching appli-

cable legislation, regulations and operating instructions; reviewing existing studies of the asylum adjudication process; and conducting an analysis of approved and denied asylum applications nationwide.

To analyze the asylum applications, we drew a stratified random sample of 2,023 of the 32,426 advisory opinions issued by the State Department during calendar year 1984. We sampled advisory opinions from the four countries with the highest volume of asylum applicants (El Salvador, Nicaragua, Poland, and Iran). These four countries accounted for 82 percent of the total number of cases processed by INS in fiscal year 1984. We randomly selected an approximately equal number of favorable and unfavorable advisory opinions for each of the four study countries in order to do a comparative analysis of the characteristics associated with approved and denied applications. Our sample also included a random selection of 336 advisory opinions irrespective of the applicant's country of origin to provide an overview of worldwide trends.

The advisory opinions rendered in calendar year 1984 included asylum applications filed with INS and EOIR from 1980 to 1984. We requested asylum applicants' files for the 2,023 advisory opinions from INS district offices nationwide to review the applications and supporting documentation. Twenty-eight percent, or 573 files, were either not located, incomplete, or pending an INS action, and were not available at the time of our review.

In reviewing the 1,450 [1] files provided to use, we collected demographic, immigration and persecution information. In extracting data contained in each applicant's file, we made a judgment and categorized the basis of each asylum request using the five categories set forth in the Refugee Act (persecution feared on account of race, religion, nationality, political opinion, or membership in a social group), and another category of internal civil or military strife. This information provides insights regarding the basis of the applicants' requests based on the contents in the files, but does not represent an assessment of the applicant's credibility or eligibility under the statutory standard for asylum. We also requested EOIR docket cards for aliens awaiting deportation or exclusion hearings to determine the current status of each application.

The information was collected and compiled into a computerized data base and weighted. We then analyzed the information and projected to the universe of 32,426 asylum applicants. When a sample is used, each result contains some degree of imprecision. The exact amount of imprecision can be calculated statistically, and we are performing these calculations at the present time. Until the amount of error associated with each value is determined, we advise caution in drawing inferences from the findings reported here. Confidence intervals are at the 95 percent level for the projections.

THE ASYLUM PROCESS

An alien may apply for asylum in any of the following ways.

An alien may apply to the INS district director having jurisdiction over the alien's place of residence if exclusion or deportation proceedings have not been instituted.

An alien may apply for asylum to an immigration judge in EOIR during deportation or exclusion proceedings with an immigration judge.

An alien who was previously denied by an INS District Director may renew his or her asylum request during a deportation hearing.

The application may include the alien's spouse and children under the age of 21.

In order to qualify for asylum, an applicant must satisfy each of the following four conditions contained in the statutory definition of a refugee: (1) the alien must have a fear of persecution, (2) the fear must be well-founded, (3) the persecution feared must be on account of race, religion, nationality, membership in a particular social group, or political opinion, and (4) the alien must be unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution. Any person who ordered, incited, assisted or participated in the persecution of others is not eligible for asylum.

The asylum applicant bears the burden of (1) proving the truth of the facts that form the basis of his or her claims, and (2) demonstrating that the supporting facts meet the statutory standard for asylum. No uniform standards or criteria have been established, however, for the type of evidence an applicant needs to prove he or she meets the definition of a refugee and is eligible for asylum.

Applying to the INS District Director

An estimated seventy-seven percent of the asylum applicants (24,856 of 32,426 aliens) applied for asylum by submitting an application form and other supporting documents to an INS district office.

Once an application is received at a district office, an INS examiner interviews the applicant under oath. The applicant's interpreter and/or attorney may be present. The interview is conducted to give the applicant an opportunity to explain in detail the reasons for requesting asylum and to give the examiner an opportunity to assess the credibility of the applicant.

Some of the INS examiners we talked with stated that after the interview they routinely make a preliminary decision which they forward to State. Other examiners said they routinely do not. (See tables I.5 and I.6.) Regardless, the INS examiner sends the application to the Bureau of Human Rights and Humanitarian Affairs (BHRHA) in the Department of State for an advisory opinion before a final determination is made on each case. Based upon their knowledge of conditions prevailing in the applicant's home country, BHRHA gives on opinion on whether the applicant has demonstrated a well-founded fear of persecution.

After the advisory opinion is received, the INS district director may approve or deny the application. The district director states in a letter to the alien whether the applicant has or has not met the burden of proof to establish that he or she qualifies for asylum.

If the application is approved, the alien is granted asylum status for a period of one year and is considered an asylee. After having been physically present in the United States for at least one year, the asylee is eligible to apply for legal permanent residence status. The Refugee Act established that not more than 5,000 asylees may be granted legal permanent residence status in each fiscal year. During fiscal years 1984 and 1985, the 5,000 limit was met and waiting lists were created.

The denied applicants cannot appeal the district director's decision. They can, however, renew the application during deportation hearings before an immigration judge.

Applying for asylum before an immigration judge

Approximately 23 percent of the asylum applicants (7,570 of 32,426 aliens) applied for asylum after being either apprehended at a U.S. land border or port of entry, apprehended through various INS investigative operations, or referred to deportation proceedings from other INS units or law enforcement agencies. These aliens were considered to be in the country illegally. INS takes such aliens into custody and serves them a warrant of arrest and an "order to show cause" why the alien should not be deported. The "order to show cause" outlines the factual allegations and the charges against the alien and initiates the deportation process.

By regulation, INS must advise apprehended aliens of their right to representation by counsel at no expense to the government, and the availability of free legal programs through non-profit organizations. In *Orantes* v. *INS* a decision is expected in early 1987 as to whether INS officials must advise apprehended aliens of their opportunity to apply for ayslum. The INS district director, at this or her discretion, may maintain custody of the alien or release the alien on bond or conditional parole. A hearing is held before an immigration judge to determine whether or not the alien should be deported. If an alien indicates to the judge an interest in applying for asylum, deportation hearings are recessed to permit the alien time to prepare and submit an application.

After the application is received, it is sent to the BHRHA for an advisory opinion. The judge is not required to send for a BHRHA opinion if a previous opinion has been received unless circumstances have changed substantially. Most judges, however, routinely request opinions. After the advisory opinion is received, the immigration judge conducts a hearing. The applicant may have legal counsel and may present evidence and testimony at the hearing. An INS trial attorney is assigned to each proceeding to present evidence, cross-examine the applicant and witness, and otherwise represent the Government at the hearings.

The judge receives evidence, including that gained from the examination of the alien or any witnesses. By regulation, immigration judges must discuss the evidence pertinent to the asylum application and record the reasons for granting or denying the request when rendering a decision.

An immigration judge's decision can be appealed to the Board of Immigration Appeals. The board's decision can be appealed to the U.S. Court of Appeals, and that court's decision can be appealed to the U.S. Supreme Court. Less than one percent of the applicants, or 312 aliens, appealed the judge's decision to the board, and none appealed their cases to the U.S. Court of Appeals or U.S. Supreme Court.

APPLICANT MUST PROVE THAT FEAR OF PERSECUTION IS WELL-FOUNDED

The Refugee Act of 1980 did not define a well-founded fear of persecution or specifically identify how an alien must prove his or her fear is well founded. DOJ regulations and Board of Immigration Appeals decisions establish that the applicant must demon-

[1] El Salvador—126 favorable and 256 unfavorable opinions; Nicaragua—125 favorable and 256 unfavorable; Poland—154 favorable and 145 unfavorable; Iran—164 favorable and 147 unfavorable; Iran—164 favorable and 147 unfavorable; other than the four study countries—15 favorable and 62 unfavorable.

strate that the fear or persecution is more than a purely subjective or conjectural fear. The applicant is required to prove that his or her fear has a sound basis in personal experiences with objective facts or events that show there is a "clear probability" or "realistic likelihood" (greater than fifty percent chance) of persecution. An applicant's broad assertions and undocumented statements are generally not enough to prove that a well-founded fear of persecution exists. The "clear probability" standard was used prior to the Refugeee Act in deciding whether to withhold deportation of an alien for fear he or she may be persecuted upon return to his or her home country.

General conditions existing within a country, such as civil strife, national disasters or political unrest, do not alone provide the evidence needed for granting asylum. The alien must demonstrate that he or she will be singled out or targeted for persecution on the basis of the five categories in the act because of a belief or characteristic which distinguishes the applicant from the population at large. The applicant must show that the persecutor will inflict suffering or harm in order to punish the alien for differing in a way the persecutor deems offensive.

According to the Board of Immigration Appeals, well-founded fear will not be established if (1) the persecutor is not aware, or could not easily become aware, that the alien possesses the characteristic that is the basis for persecution, (2) the persecutor lacks the capability to carry out persecution, or (3) the persecutor has no inclination to punish the alien.

Standard of proof for "well-founded fear of persecution" to be evaluated by the U.S. Supreme Court

To date, federal courts have not agreed upon a common standard of proof for a "well-founded fear of persecution." Several U.S. Courts of Appeals decisions have differed over whether the "clear probability" standard is the same as the "well-founded fear of persecution" standard, or whether the well-founded fear standard is more generous to the alien. Aliens are required to meet the "clear probability" standard to avoid deportation on the grounds of persecution.

The Court of Appeals for the Second Circuit held in *Stevic* v. *Sava* that "asylum may be granted and deportation withheld upon showing far short of a clear probability that an individual will be singled out for persecution." In *INS* v. *Stevic*, DOJ appealed the Second Circuit Court decision. The Supreme Court reversed the decision finding no support for the Second Circuit Court's conclusion in either the language that preceded the Refugee Act, the structure of the amended Act, or the legislative history. The Supreme Court deliberately avoided any attempt to state the governing standard for asylum. Instead, it confined its analysis to the standard that applies for withholding of deportation. The Supreme Court decided withholding of deportation requires evidence establishing it is more likely than not that the alien would be subject to persecution on one of the specified grounds.

The Court of Appeals for the Third Circuit, concluded that the "well-founded" and "clear probability" standards are identical. According to the court, an alien must present "some objective evidence establishing a realistic likelihood that he would be persecuted in his native lands." The Court of Appeals for the Ninth Circuit, on the other hand held that the government could not deport a Nicaraguan asylum applicant as long as she had "some objective basis" for fearing persecution upon return to her home country. The Ninth Circuit Court found that the "clear probability" standard was not applicable to asylum claims. The Court described the "well-founded fear" standard as one based on some objective but not conclusive facts. The government appealed this decision to the Supreme Court, and urged the Supreme Court to rule that aliens are not entitled to asylum unless they can show it is more likely than not that the alien would be subject to persecution. The Supreme Court will hear the case in October 1986.

REASONS FOR INS ASYLUM DECISIONS NOT ALWAYS DOCUMENTED

The Departments of Justice and State have little data to determine whether asylum admission standards are being uniformly applied. INS officials, and State Department officials in rendering advisory opinions, are not required to explain the specific reasons why the facts that form the basis of the asylum application are or are not sufficient to meet the statutory standard of eligibility for asylum.

Immigration judges are required by regulation to give an oral or written decision which includes a discussion of the evidence pertinent to the asylum application and the reasons for granting or denying the request. However, INS district directors and the State Department Office of Asylum Affairs director usually only state that the applicant has or has not met the statutory standard of eligibility. There is generally little or no elaboration of the applicant's specific circumstances as it relates to the law, regulations, or precedent decisions, and there is usually no reason given for the approval or denial of the application. Approval and denial letters sometimes included whether the district directors' decisions were based on the State Department's advisory opinion and a copy of the opinion.

We found that 14 percent of the INS files contained documentation including INS examiner notes and opinions on a case which provided reasons and insights regarding the basis of the decision on the asylum application. However, the examiner notes and reasons were not written or prepared in a uniform format. The remaining 86 percent of the files did not contain any explanation of the decisions beyond the determination and statement that the applicant had or had not met the statutory standard for asylum eligibility.

Five district directors told us that they do not routinely write out the reasons for their decisions because there is no requirement to do so. They stated that the burden of proof is incumbent on the applicant and that INS approves or denies an application at its discretion. INS headquarters officials stated that because asylum decisions by district directors are not applicable and asylum applications may be renewed for consideration by immigration judges, there has been no reasons for detailed explanations of decisions by district directors.

Our case file analysis showed that cases such as the applicant being denied because he or she circumvented the refugee processing system or because the applicant was firmly resettled in a third country before arriving in the United States, usually contained reasons for the denial. Three district directors stated that writing the reason for their decisions would be helpful in their management and review of the asylum process, but they did not have the resources to accomplish this.

Ninety percent of the applicants denied by INS, or 19,216 aliens, were denied because they did not prove their eligibility for asylum to the satisfaction of INS officials. With no requirement to document decisions it is uncertain as to whether all applicants were treated fairly and were held to the same standards.

INS study cites lack of uniformity in asylum decision procedures

A 1983 nationwide INS study of asylum decisions concluded that a lack of uniformity in the procedures used for asylum decisions sometimes result in a district or an officer rejecting a claim that another officer or district would accept. The study stated that there are few guidelines to enable examiners to apply the standard of proof uniformly in each district. The report recommended that INS should, among other things, develop a monitoring and qualify control mechanism to ensure uniformity and consistency among districts.

Since the issuance of the 1983 report, INS has made improvements in managing its asylum workload by clearing the backlog of applications, increasing asylum adjudication training, and encouraging district directors to designate certain INS examiners for the handling of asylum cases thereby improving subject matter expertise. INS headquarters staff have visited several district offices and reviewed cases. However, any review of asylum decisions would be difficult because INS does not require that the applicant's file contain the specific reasons for approving or denying the application. According to INS headquarter officials, as of September 1986, DOJ was considering new asylum regulations that would provide for a centralized system of asylum adjudication. A corps of asylum officers, who would not report to district directors, would be established. This in turn would likely result in more specific guidelines for the adjudication of claims as well as administrative review. INS officials said that no significant change can be made in this area without rulemaking, therefore, they have concentrated efforts on developing new regulations setting forth procedures which promote greater consistency and quality in the decisions.

APPROVAL RATES FOR ASYLUM REQUESTS

We analyzed asylum applications and other available documentation to determine approval rates in a variety of circumstances, identify factors associated with approvals and denials, and determine whether DOJ decisions and the State Department advisory opinions agreed. This analysis reveals differences in approval rates between the four countries in our study, but are not indicative of a bias in the application of asylum standards. Our analysis of 1450, asylum filed projected to a universe of 32,426 applicants is discussed below.

Approval rates vary by country

Of the 32,426 asylum applications worldwide, 25,167 (78 percent) were from El Salvador, Nicaragua, Poland and Iran. Approval rates for El Salvador (two percent) and Nicaragua (7 percent) were many times lower than approval rates from Poland (49 percent) and Iran (66 percent). The worldwide approval rate was 24 percent.

At the completion of our case file analysis in 1986, DOJ had not decided 4,646 of the asylum applications, of which 68 percent (or 3,156 requests) were from the four countries we studied. Requests from El Salvador made

up 53 percent of the undecided cases. Detailed information on the decisions for the cases is presented on table I.1.

Asylum applicants entered the United States legally and illegally

Worldwide, fifty-eight percent (18,723) of the asylum applicants entered the United States legally, predominantly on visitor visas (40 percent) or student visas (12 percent) before applying for asylum. Thirty-eight percent of the applicants were approved. The approval rate was 30 percent for those entering with visitor visas and 58 percent for those entering with student visas. Asylum applicants who entered without inspection (illegally) were approved at a rate of 1.6 percent worldwide.

Approximately 87 percent of the applicants from Iran and Poland entered legally with visitor or student visas and made up most of the approved asylum requests from the four countries. Applicants from Iran entered predominantly on visitor visas (45 percent) and student visas (43 percent), and applicants from Poland entered the United States usually using visitor visas (86 percent). Applicants from Nicaragua also entered legally at a high rate (65 percent) but were approved at a much lower rate (9 percent) than legal entrants from Iran (67 percent) and Poland (49 percent). Almost all applicants from El Salvador entered illegally (87 percent) without inspection, of which .4 percent were granted asylum. Salvadorans who entered legally had approval rates of 11 percent—13 percent for those entering on visitor visas and two percent for those entering on student visas. See table I.2.

Asylum requests to INS or EOIR

Approval rates for cases filed with INS district directors are higher (27 percent) than those originating at the EOIR (6 percent) and those initially denied by INS and renewed before EOIR (11 percent).

Worldwide, 77 percent of asylum requests were filed only with an INS district director, while 16 percent were filed with the EOIR, and 7 percent were denied by an INS district director and renewed before an EOIR judge. Sixty-five percent of the Salvadoran applications and nine out of 10 asylum applications from Iran, Poland and Nicaragua were filed only with an INS district director. See Table I.3.

Asylum requests for fear of persecution because of religion

Worldwide, 4,759 (15 percent) of the asylum applicants claimed fear of persecution because of religion. These applicants were approved at a rate of 82 percent. Most of them, 3,849 (81 percent), were from Iran, with an 87 percent approval rate.

INS and State Department officials stated that the applicants who submitted claims based on fear of persecution because of religious beliefs had the highest approval rate because the applicants' claims were well-documented and persecution of religious groups is well known in Iran. Our analysis support these observations and shows that the claims based on religious beliefs contain supporting documents such as baptismal certificates or letters from clergy. The documents submitted to support a fear of persecution on the basis of religion specifically mentioned the applicant in 86 percent of the cases. See table I.4.

Asylum requests for fear of persecution because of race, nationality, political opinion and membership in a social group

Fear of persecution because of political opinion was claimed by 16,358, or approximately one-half, of the applicants worldwide. About 18 percent of these requests were approved. Close to 90 percent of the Nicaragua and Poland requests were based upon political opinion. Poland political opinion requests were approved at a rate of 51 percent, and Nicaragua requests were approved at a 7 percent rate.

Less than two percent of the applicants worldwide claimed a fear of persecution because of race, nationality, or membership in a social group. Because of the small numbers involved, approval rates cannot be reliably projected to the universe of applications.

Feared mistreatment because of internal strife

Worldwide, 7,643 (24 percent) of the asylum applicants did not fall under the five categories within the refugee definition and feared harm based upon conditions of internal civil or military strife. Eighty-seven percent of these applicants were from El Salvador. All of the requests involving internal strife were denied.

In categorizing asylum claims, we noted that these applications did not always include documentation, and the applicants claimed neutrality in a conflict between the government and guerrilla forces. The applicants seldom belonged to any organizations, and frequently mentioned persons other than themselves as being the victims of mistreatment.

Severity of mistreatment described by applicants.

Asylum applicants described a wide range of mistreatment to themselves and others in support of their requests for asylum. Applicants from different countries who claimed to have suffered similar mistreatment did not have similar approval rates. Aliens who stated on their applications that they were arrested, imprisoned, had their life threatened, or were tortured had much lower approval rates if they were from El Salvador and Nicaragua than if they were from Poland and Iran. For example, those who described torture to support their asylum request had an approval rate of four percent in El Salvador, 15 percent in Nicaragua, 80 percent in Poland, and 64 percent in Iran, See Figure I.1. However, because we did not look at the combined influence of factors on approval rates (such as documentation and severity of mistreatment), those statistics should be viewed with caution.

Justice and State Departments agree on asylum decisions

DOJ's decision to approve or deny an asylum request and the State Department's advisory opinion agreed in 96 percent of the 32,46 applications worldwide. For the four countries, the percentage of agreement was: El Salvador—99 percent; Nicaragua—99 percent; Poland—96 percent; and Iran—87 percent.

In 2,051 applications worldwide, INS received advisory opinions that differed from the INS examiners' preliminary decisions and INS changed its preliminary opinion and concurred with the State Department in 91 percent of the cases. For the four countries, when the State Department's advisory opinion disagreed with INS' preliminary decision, DOJ's final decision agreed with the State Department in 100 percent of the Salvadoran cases, 98 percent of the Nicaraguan cases, 83 percent of the Polish cases, and 78 percent of the Iranian cases. See table I.5 and I–6.

FEW DENIED ASYLUM APPLICANTS ARE DEPORTED

There is a widespread perception that the denial of an asylum application is tantamount to deportation and the potential for a denial applicant to become a victim of persecution upon return to his or her home country. Our analysis, however, shows that few denied asylum applicants are actually deported. See table I.7.

Of the 21,033 alians who were denied asylum, 312 applicants (11.5 percent) where deported to their home country (none of the deported applicants were from Poland, Iran, or Nicaragua); 2,405 applicants (11 percent) were awaiting a hearing before an immigration judge or the Board of Immigration Appeals; 915 applicants (4 percent) were able to remain in the United States because they obtained U.S. residency through non-asylum provisions such as marriage to a U.S. citizen; few applicants (less than one percent) had left the United States on their own; and 16,785 applicants (80 percent) had uncertain immigration status because INS had not initiated deportation proceedings and there was not evidence of their departure in INS's files.[2]

The status of the remaining aliens denied asylum could not be be determined. As our analysis shows, there is a large backlog of denied asylum applicants awaiting deportation perceedings. During our visits to INS district offices, we identified a backlog of approximately 30,000 denied applicants in three cities (Los Angeles, Miami, and San Francisco). INS district officials stated that they do not have sufficient investigative resources to determine whether the aliens have left the United States and, if not, to complete the necessary documents (the "order to show cause") to initiate deportation proceedings.

In June 1985, the INS Commissioner sent a memo to all regional commissioners with instructions to issue OCRs on all denied asylum applicants who are ineligible for discretionary relief and to clear the backlog of these cases. INS district officials we met with stated, however, that they would need a considerable amount of staff time and a reassessment of priorities to accomplish this.

An INS official in San Francisco stated that it would take all of his 30 investigators 2½ months of full-time work to clear their backlog of almost 8,000 cases. He estimated that the EOIR court in San Francisco, which was setting hearing dates for November 1987 at the time of our discussion in September 1986, would be forced to set hearing dates into the 1990s if INS cleared the backlog. INS Los Angeles district officials stated that if their backlog of 12,000 cases were referred for deportation hearings, it would add another year to the court calendar.

While INS officials said that many of the denied asylum applicants who make up this backlog are still present in the United States, they do not have the information to demonstrate this. INS does not collect and summarize information regarding how many denied applicants (1) where deported, (2) voluntarily left the country, (3) remain in the country under other immigration provisions, (4) remain awaiting appeal, and (5) remain in the country awaiting follow-up action by INS.

[2] Some denied asylum applicants were granted "extended voluntary departure" at the discretion of the Attorney General and were not required to leave the United States. However, we could not determine the number.

TABLE I.1.—GAO ASYLUM STUDY CASELOAD ESTIMATES FOR CALENDAR YEAR 1984 ADVISORY OPINIONS

GAO study country	Advisory opinion requested		Undecided cases [1]		Granted cases		Denied cases		Approval rate (percent)
	Number	Percent	Number	Percent	number	Percent	Number	Percent

[1] Current Status as of February 1, 1986 for INS cases.
Current Status as of April 30, 1986 for EOIR cases.

U.S. SENATE,
Washington, DC, January 15, 1985.

Mr. LYLE L. KARN,
District Director, Immigration and Naturalization Service, Philadelphia, PA.

DEAR MR. KARN: After reading accounts about the arrest of a Guatemalan family in Philadelphia yesterday, I have reviewed this matter in some detail. I have spoken with the U.S. Attorney's office, agents from your office, attorneys for the family, sponsors of the family, and the family itself.

Based on my review, I believe that the more appropriate way to have dealt with this matter would have been to interview the persons involved after the issuance of a notice or summons to appear rather than having them arrested and taken into custody.

As you know, the Immigration Act defines the standard for asylum as a showing that the person "has a well-founded fear of persecution on account of race, religion, nationality, membership in a particular social group or political opinion."

Based upon the information supplied to me, it appears that the Philadelphia family that was taken into custody would categorically qualify for asylum.

I would appreciate it if you would review this matter as quickly as possible and contact me regarding your findings.

Sincerely,

ARLEN SPECTER.

U.S. SENATE,
Washington, DC, January 15, 1985.

Hon. BOB KASTEN,
Senate Hart Office Building, Washington, DC.

DEAR BOB: I request that our subcommittee, the Foreign Operations Subcommittee of the Appropriations Committee, conduct a hearing on the action of the U.S. Immigration and Naturalization Service on January 14, 1985 in arresting more than 60 aliens including residents of Philadelphia, Pennsylvania. I am especially concerned that the Philadelphia residents were arrested and taken into custody instead of being given a notice, or summons, to appear, which was done with individuals who were indicted in Arizona.

Based upon information provided to me, it appears that the Philadelphia residents that were taken into custody would qualify for asylum.

In any event, it seems to me that federal authorities ought to make an inquiry as to whether there is a valid claim for asylum before making an arrest and initiating legal procedures, instead of putting the burden on the applicant to apply for asylum where such aliens do not understand the complexity of the law and subject themselves to deportation procedures when they file for asylum with the Immigration and Naturalization Service.

In addition, the subcommittee should consider whether a temporary stay of deportation, such as that proposed for Salvadoran refugees in S. 2131, which was introduced in the 98th Congress and which I cosponsored, would be appropriate for Guatemalans. The humanitarian concerns which inspired the "sanctuary" movement that is the focus of these arrests should be explored. These kinds of concerns have prompted the Attorney General to halt the deportations of nationals from a number of countries over the years, and such action may be appropriate today for Guatemalans or other Central American refugees.

These alternatives under the Refugee Act should be considered, and arrest used as a last resort and under proper and just procedures that reflect the unique situation of a

foreign national unfamiliar with our language and process.

Thank you for your consideration of this request.

Sincerely,

ARLEN SPECTER.

U.S. SENATE,
Washington, DC, January 30, 1985.

Hon. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR ALAN: Thank you for agreeing to hold hearings at my request to look into issues on immigration policy and procedures raised by the recent arrest of some 60 aliens across the country and particularly by the arrest of a Guatemalan family in Philadelphia, Pennsylvania on January 14, 1985.

I am enclosing copies of letters I have sent to Immigration and Naturalization Commissioner Alan Nelson and Secretary of State Shultz expressing my concern and detailing the issues I think should be explored.

In terms of witnesses for the hearing, I suggest calling Commissioner Nelson, the Assistant Secretary for Human Rights and Humanitarian Affairs, Elliott Abrams, the Director of the Lawyers' Committee for International Human Rights, and the Guatemalan family arrested in Philadelphia.

I look forward to working with you on this important hearing.

Sincerely,

ARLEN SPECTER.

U.S. SENATE,
Washington, DC, February 1, 1985.

Hon. ALAN C. NELSON,
Commissioner Immigration and Naturalization Service, Washington, DC.

DEAR COMMISSIONER NELSON: I am deeply concerned about the policy and procedures involved in the recent arrest of some 60 aliens across the country and particularly about the arrest of a Guatemalan family in Philadelphia, Pennsylvania on January 14, 1985.

According to information provided to me, a warrant of arrest was issued for a husband and wife, Mr. and Mrs. Morelos, on grounds of illegal entry. The wife and a three-year-old child were then taken into custody. Later, Mr. Morelos surrendered to Immigration and Naturalization authorities when he found out that his wife and child were in custody.

On the facts as presented to me, Mr. Morelos has a valid claim for asylum on the basis of a well-founded fear of persecution bases on his prior political activities and expressions of political opinions in Guatemala. Mr. Morelos' contention of torture was corroborated by scars which I personally observed on his body.

When I discussed this case with an INS agent in Philadelphia, I was advised that a warrant of arrest was issued because Mr. Morelos had not made an application for asylum.

In my judgment, a law enforcement agency like INS should not issue a warrant of arrest for a person until an investigation discloses a violation of law without a valid defense. As District Attorney of Philadelphia, I made it a stringent rule to inquire as to the surrounding circumstances to find out about potential defense before obtaining warrants of arrest or taking people into custody.

As a matter of fundamental fairness, it is my opinion that the Government of the United States should not take people into custody unless there is a valid basis for doing so after a thorough investigation including potential defenses. It seems to me that it is not sufficient to justify the INS action on the basis that Mr. Morelos had the burden of filing an application for asylum. He is an alien and does not really understand the intricacies of the law; and, if he did, he could hardly be expected to file such an application considering the fact that virtually no such applications are granted and the filing itself would doubtless activate an enforcement proceeding against him.

The action of the Immigration and Naturalization Service was particularly offensive in taking his wife and child into custody. It is an horrendous experience to be arrested and the three-year-old child who was subjected to the arrest will doubtless bear the scars of the incident for many years, to say nothing of the trauma on the mother.

I strongly urge that you as the Director of the Immigration and Naturalization Service review your procedures so that legal proceedings are authorized only where an investigation discloses a violation without a valid defense. If legal proceedings are instituted, a summons rather than a warrant of arrest should be used unless there is valid reason to believe that the person will flee or that bail is realistically necessary to guarantee the appearance of that individual at the next proceeding. In the case of the Morelos family, there was no such reason to be concerned about flight since the Immigration and Naturalization Service had known of their whereabouts since September 1984. In any event, the posting of the $3,000 in bail by other parties was hardly any guarantee of the appearance of the Morelos family for the next proceeding so that the justification for the warrant of arrest was not at all well-founded.

As to the filing of asylum petitions, I urge you to adopt procedures which maintain confidentiality (*in camera proceedings*) so that foreign governments will not know of the contentions of their nationals so as to avoid reprisals and fear of filing such applications.

Beyond these procedures, I am also troubled by the applicable policies which, as I understand it, lead to only 0.4 percent of Guatemalan applications for asylum having been granted in 1984 and only 2.5 percent of the applications for asylum from Salvadorans having been granted in 1984. In light of the social unrest in those countries and the activism of many of their citizens, it strikes me as a shockingly low figure to have such a small number of applications for asylum granted. I would be interested to know what standards are used and whether Mr. Morelos would have qualified, under existing standards, considering his contentions of torture which were corroborated by his scars.

I would be further interested to know whether consideration has been given to halting deportations of Guatemalans through a grant of extended voluntary departure or any other procedure. It seems to me that extended voluntary departure would be appropriate for Guatemalans as it has been applied for those who have fled from other countries with such pervasive social unrest affecting so large a segment of the citizens.

I would very much appreciate your prompt response to the questions raised in this letter.

Sincerely,

Arlen Specter.

U.S. SENATE,
Washington, DC, February 1, 1985.

Hon. GEORGE P. SHULTZ,
Secretary, Department of State, Washington, DC.

DEAR SECRETARY SHULTZ: I am deeply concerned about the policy and procedures involved in the recent arrest of some 60 aliens across the country and particularly about the arrest of a Guatemalan family in Philadelphia, Pennsylvania on January 14, 1985. While the arrests were carried out by the Immigration and Naturalization Service, the procedures employed are inexorably intertwined with our immigration policies in which the State Department plays a key role.

According to information provided to me, a warrant of arrest was issued for a husband and wife, Mr. and Mrs. Morelos, on grounds of illegal entry. The wife and a three-year-old child were then taken into custody. Later, Mr. Morelos surrendered to Immigration and Naturalization authorities when he found out that his wife and child were in custody.

On the facts as presented to me, Mr. Morelos has a valid claim for asylum on the basis of a well-founded fear of persecution based on his prior political activities and expressions of political opinions in Guatemala. Mr. Morelos' contention of torture was corroborated by scars which I personally observed on his body.

When I discussed this case with an INS agent in Philadelphia, I was advised that a warrant of arrest was issued because Mr. Morelos had not made an application for asylum.

In my judgment, as I have written INS Commissioner Alan Nelson, a law enforcement agency like INS should not issue a warrant of arrest for a person until an investigation discloses a violation of law without a valid defense. As District Attorney of Philadelphia, I have made it a stringent rule to inquire as to the surrounding circumstances to find out about potential defenses before obtaining warrants of arrest or taking people into custody.

As a matter of fundamental fairness, it is my opinion that the Government of the United States should not take people into custody unless there is a valid basis for doing so after a thorough investigation including potential defenses. It seems to me that it is not sufficient to justify the INS action on the basis that Mr. Morelos had the burden of filing an application for asylum. He is an alien and does not really understand the intricacies of the law; and, if he did, he could hardly be expected to file such an application considering the fact that virtually no such applications are granted and the filing itself would doubtless activate an enforcement proceeding against him.

This is where the State Department's involvement is particularly relevant. I am troubled by the applicable policies which, as I understand it, lead to only 0.4 percent of Guatemalan applications for asylum having been granted in 1984 and only 2.5 percent of the applications for asylum from Salvadorans having been granted in 1984. In light of the social unrest in those countries and the activism of many of their citizens, it strikes me as a shockingly low figure to have such a small number of applications for asylum granted. I would be interested to know what standards are used in the State Department's review of applications and whether Mr. Morelos would have qualified, under existing standards, considering his contentions

of torture which were corroborated by his scars.

In addition, I urge you to work with Commissioner Nelson to adopt procedures that maintain the confidentiality of asylum applications (*in camera* proceedings), so that foreign governments will not know of the contentions of their nationals so as to avoid reprisals and fear of filing such applications.

I would be further interested to know whether consideration has been given to halting deportations of Guatemalans through a grant of extended voluntary departure or any other procedure. It seems to me that extended voluntary departure would be appropriate for Guatemalans as it has been applied for those who have fled from other countries with such pervasive social unrest affecting so large a segment of the citizens.

I would very much appreciate your prompt response to the questions raised in this letter.

Sincerely,

ARLEN SPECTER.

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, DC, February 26, 1985.

Hon. ARLEN SPECTER,
U.S. Senate, Washington, DC.

DEAR ARLEN: I thank you for your letter concerning hearings on present INS procedures for arresting illegal aliens and adjudicating asylum applications. I also appreciate the copies of the letters you sent to Secretary Shultz and Commissioner Nelson. Let me take this opportunity to express some thoughts with you on this subject.

You are aware of my position on "blanket" suspension of deportation or "EVD" status for the nationals of any Central American country. However, let me reiterate some of the major points on this debate. First, a large portion of Salvadorans here today are not fleeing persecution but are seeking economic opportunity. This is supported by the fact that more than half of the estimated 500,000 to 600,000 Salvadorans here today illegally came before the escalation of the conflict; that Salvadorans have been the second most commonly apprehended illegal immigrant on the southern border since the 1970's; and that all Salvadorans must travel 2,000 miles through a country devoid of violence or persecution—Mexico—before arriving in the U.S. The economic motivation simply cannot be summarily dismissed.

Second, conditions have improved greatly in El Salvador, and there still is no evidence that Salvadorans are persecuted upon return to their country. While civilian deaths in 1980 were high (9,000 according to press reports compiled by the U.S. Embassy), the death rate has decreased dramatically. In 1984, there were 800 civilian deaths reported by the Salvadoran press. Of those civilian deaths, Tutela Legal (the human rights agency affiliated with the Catholic Church) attributed 205 to death squads and 55 to guerrilla assassinations. While I do not approve of any level of violence, it is safe to assume that nearly all of El Salvador's five million residents are not affected by either random or organized violence. In addition, neither a bipartisan Immigration Subcommittee staff report nor a State Department survey of 482 returned Salvadorans was able to detect the political persecution or victimization by violence of Salvadorans who are sent back to El Salvador.

Finally, there are several alternatives to a blanket relaxation of our immigration laws which still recognize the humanitarian needs of Salvadorans and other Central Americans. We currently have an agreement with ICM—the International Committee on Migration—to check on the fate of Salvadorans who are returned from the U.S. As of Dec. 1 of 1984, an ICM representative meets every returned Salvadoran at the San Salvador airport and assesses his or her need for food and shelter, travel arrangements, proper documents for internal travel, and possible referral to displaced persons camps. In addition, these ICM representatives have followed up on the returnees with questionnaires on their safety once they have come home. The responses have shown that no one has felt that safety was a problem, but many have mentioned a lack of employment opportunities. At the end of the 98th Congress, we authorized a doubling of U.S. aid to displaced persons camps—from $10 million per year to $20 million per year. This money will help improve security and living conditions in these camps, and enable them to receive Salvadorans returned from the U.S., if necessary. In addition, I have suggested the following measures: (1) discussions with the government of Honduras and the UNHCR to see if fearful Salvadorans may be returned to UNHCR camps in Honduras, and (2) the creation of guidelines by the INS which would identify certain classes of Salvadorans who might be eligible for an individual review of the need for EVD. There is evidence that Salvadoran teachers and medical personnel may warrant this.

I understand that your interests focus on how the INS apprehends illegal aliens from the countries of Central America, but the recommendations you make certainly affect the broader questions of EVD. How are we to expect INS to "weigh the defenses" and then "issue a summons" for illegal aliens? A summons would simply alert the alien that the INS is aware of his illegal status and encourage him to disappear. With 3.5 to 6 million illegal aliens in the country, the INS does not have the manpower to then go out for the search. INS is already granted the ". . . power without warrant . . . to arrest any alien in the U.S. if (INS) has reason to believe that the alien is in the U.S. in violation of any law or regulation." (Sec. 287(a)(2) of the INA.) "Reason to believe" has been interpreted to mean "probable cause," so there you have it: a clear authority for the arrest and a probable cause standard for the arrest. In this light, it would seem that INS arrests of aliens are quite appropriate and justified. In addition, there is no question of fact when someone enters illegally—and thus, no "defense" to take into account. Whether someone is summoned or arrested, they still have an identical right to request political asylum and have a proper hearing on that request. However, it is most important to bear in mind that U.S. law requires the alien to establish his right to a particular status, whether it be that of asylum, refugee, immigrant or non-immigrant. The burden of proof is always on the alien, not the Government.

I think we might agree, Arlen, that the situation in El Salvador and the proper response in the U.S. is less simplistic than some would suggest. While I respect the compassion that those who argue for EVD display, I believe it is misplaced and likely to have many negative results—such as Americans becoming unwilling to accept the true refugees in the future. I know you are a thoughtful, reasonable guy, and I hope that we might be able to discuss the issue further. It would certainly not serve either of us to react to this issue in an emotional way. There is enough of that surrounding the question already, and I fear that when we legislate based strongly on emotion—then poor law and sometimes extreme reactions are the result. I am certain that neither of us wish to see this result.

I look forward to working with you on this matter.

With best personal regards.

Most sincerely,

ALAN A. SIMPSON,
U.S. Senator.

U.S. DEPARTMENT OF STATE,
Washington, DC, March 1, 1985.

Hon. ARLEN SPECTER,
U.S. Senate.

DEAR SENATOR SPECTER: Thank you for your letter of February 1, 1985 expressing your deep concern about the arrests of some 60 illegal aliens and in particular about the arrest of a Guatemalan family in Philadelphia, Mr. and Mrs. Morelos and their child.

We note in your letter your belief that Mr. Morelos has a valid claim for asylum based on a well-founded fear of persecution because of his prior political activities and opinions in Guatemala. You also urge us to work with I.N.S. Commissioner Nelson to adopt procedures that maintain the confidentiality of asylum applications.

The Department keeps the contents and its views on asylum applications confidential in order to protect the applicant or his relatives. Attorneys for asylum applicants are particularly insistent upon the need for strict confidentiality, and we must maintain this policy. We are confident that the I.N.S. maintains a similar policy.

With respect to the asylum claim by Mr. Morelos and his family, we will be prepared to review the case when the record and file are sent to us by I.N.S. Philadelphia, in accordance with established procedures in these matters. You may be assured that at such time we will take fully into account your views on the validity of the asylum request. However, since we have not had an opportunity to review the application and any supporting documents, we are not in a position to comment on the merits of the case.

We will continue our careful review of applications for asylum on a case-by-case basis, and monitor developments and conditions in the region. This is not always an easy task. However, the procedures for a considered and just determination of asylum requests for Central Americans are in place, and they are applied by our officers in a compassionate and understanding manner.

Sincerely,

J. EDWARD FOX,
Acting Assistant Secretary, Legislative and Intergovernmental Affairs.

U.S. DEPARTMENT OF STATE,
Washington, DC, March 8, 1985.

Hon. ARLEN SPECTER,
U.S. Senate.

DEAR SENATOR SPECTER: Thank you for your letter of January 18, 1985 in which you state your deep concern about the arrests of illegal aliens on January 14, 1985. You inquire about asylum procedures, the granting of extended voluntary departure to Guatemalan and Salvadoran aliens in this country, and you refer to the "sanctuary" movement as the target for arrests.

We realize that violence is an enormous problem in Central America, and that many have fled their country to avoid civil strife. There is also a long history of migration to

the United States by aliens seeking work. Many try to remain here by applying for asylum or seeking extended voluntary departure (EVD) status, which temporarily suspends deportation.

The reason most often cited for granting EVD to Salvadorans, or any other Central American, is the claim that those who have been deported have suffered persecution on the return to their country. However, repeated studies of the treatment and condition of deported Salvadorans have disclosed no such pattern. In the most recent U.S. Embassy survey of about 500 El Salvadoran deportees, not a single case of physical abuse or murder was found. Many deportees could not be located because they had given fictitious or incomplete addresses, and some 39 people had already returned illegally to the United States. Despite the problem in locating some deportees, the study simply does not suggest a pattern of targeted persecution of the deported Salvadorans.

In 1983 the Attorney General and the Secretary of State carefully considered the question of EVD status for Central American aliens and determined that such status was not then appropriate. Their views are still valid at this time and I enclose copies of their letters.

In addition, there is a program in place in El Salvador, conducted by the Intergovernmental Committee for Migration (ICM), a highly respected international organization. ICM meets every Salvadoran who has been sent home by the United States, and each is offered resettlement assistance. Each returnee reports to ICM once a month for six months, discussing any difficulties which he or she may have. If any returnees had been harmed or disappeared, it surely would be made known publicly.

Our international commitments do not permit the forced expulsion of a refugee to a country or frontier where persecution is likely to occur. In addition, the Refugee Act of 1980 provides for the granting of asylum status to those who establish a well-founded fear of persecution upon return to their country of nationality for reasons of race, religion, nationality, membership of a particular social group, or political opinion. By law, the responsibility for establishing a well-founded fear of persecution rests with each applicant. The Department of State reviews each and every asylum application and renders an advisory opinion on the merits of the application. However, the decision on the asylum request is made by the I.N.S. director concerned who takes into consideration our advisory opinion. Since the decision on the asylum application is a matter for I.N.S., you may wish to consult with that Service to ascertain the statistical data on these cases.

The United States is well aware of its legal and treaty obligations and responsibilities, including the prohibition against the forced expulsion of refugees. We have a long-standing record of support for relief activities on behalf of refugees and a generous resettlement policy. No other country has provided as much assistance, or as many resettlement opportunities, to refugees as the United States.

We cannot concur with the position taken by some churches to harbor or conceal illegal aliens from Central America or elsewhere. Our conduct in this matter should be guided by the rule of law. Since the question of harboring or concealing illegal aliens may involve a breach of federal law, you may also wish to consider requesting the Department of Justice to comment on the implications of the actions.

We will continue our careful review of applications for EVD and asylum on a case-by-case basis, and monitor developments and conditions in the region. This is not always an easy task. However, the procedures for a considered and just determination of EVD and asylum request for Central Americans are in place, and they are applied by our officers in a compassionate and understanding manner.

Sincerely,

J. EDWARD FOX,
Acting Assistant Secretary,
Legislative and Intergovernmental Affairs.

U.S. SENATE,
Washington, DC, April 4, 1985.

Hon. CHARLES A. BOWSHER,
Comptroller General, General Accounting Office, Washington, DC.

DEAR MR. BOWSHER: I am writing to request a GAO study into the practices and procedures of the Immigration and Naturalization Service and the Department of State for judging claims for asylum in the United States, especially concerning Central America.

The civil strife in Central America has displaced thousands of inhabitants. In visits to Central America in May and August of 1983, I witnessed first-hand the breakdown of justice in El Salvador, and when I returned I succeeded in getting the Congress to withhold 30% of our aid to that country until the guardsmen charged with the murder of the four churchwomen were tried. In addition, I have seen to it that $9 million in aid was earmarked for judicial reform in El Salvador so that the rule of law can begin to replace the reign of terror perpetrated by rampant illegal killings.

It is essential that we treat the displaced victims of the civil strife in Central America fairly and with compassion. I was an original cosponsor of legislation to halt the deportation of Salvadorans pending a study of the circumstances and condition of displaced Salvadorans in Central America and here in the U.S. I have cosponsored this legislation again in the 99th Congress.

I am also deeply concerned about the policy and procedures involved in the arrests of some 60 displaced aliens—mostly Salvadorans and Guatemalans—across the country earlier this year in an effort to crack down on the Sanctuary movement, and particularly about the arrest of a Guatemalan family in Philadelphia on January 14, 1985. I have written Secretary of State George Shultz and Immigration and Naturalization Commissioner Alan Nelson complaining about these arrests and the fundamental offensiveness of taking a Guatemalan mother and her three-year-old child into custody, as was done in Philadelphia.

I have also requested Senate hearings on the issues raised by the INS arrests, and Senator Simpson, Chairman of the Judiciary Subcommittee on Immigration and Refugee Policy, has agreed to schedule such hearings in the near future.

I met with the Guatemalan family arrested in Philadelphia in January—and, on the facts as represented to me, the father, Mr. Morelos, has a valid claim for asylum on the basis of a wellfounded fear of persecution based on his prior political activities and expressions of political opinions in Guatemala. Mr. Morelos' contention of torture was corroborated by scars which I personally observed on his body.

I am troubled by the applicable policies which, as I understand it, lead to only 0.4 percent of Guatemalan applications for asylum having been granted in 1984 and only 2.5 percent of the applications for asylum from Salvadorans having been granted in 1984. In light of the social unrest in those countries and the activism of many of their citizens, it strikes me as a shockingly low figure to have such a small number of applications for asylum granted.

On March 14, 1985, I questioned Elliott Abrams, Assistant Secretary of State for Human Rights and Humanitarian Affairs, about this remarkably low approval rate in 1984 for asylum applications filed by Salvadorans and Guatemalans, and whether it could reflect an appropriate application of a fair standard. Mr. Abrams suggested that a GAO study of the asylum process would be "a good idea."

I am attaching a list of specific areas the GAO report should cover. This kind of thorough analysis is long overdue.

If you have any questions, please contact me, or have your staff contact Suzanne Spaulding at 224-5863.

I appreciate your prompt consideration of this request.

Sincerely,

ARLEN SPECTER.

AREAS REPORT SHOULD COVER

Specifically, I request that the GAO report include the following information:

1. The standard and criteria being applied by INS in considering claims of asylum;

2. Whether the same standard and criteria is applied across the board of asylum applications regardless of the home country of the applicant; if not, please examine and report the differences and reasons for deviance;

3. Whether the approval rate for asylum applications generally and/or by country varies significantly from one INS district office to another, and the reasons for any such variation;

4. The standard and criteria applied by the State Department in recommending approval or denial of asylum applications;

5. Whether the same standard and criteria is applied by the State Department to all applications, regardless of the home country of the applicant, and is applied in the same manner, e.g., same requirements for corroboration and objectives evidence, same criteria for severity of threat, etc., and the nature of and reasons for divergence; and

6. Whether the same procedures are consistently followed within the State Department and the INS, respectively, when considering all asylum applications. If not, describe circumstances under which procedures vary and cite the nature of and reasons for divergence.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Emery, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—MESSAGE FROM THE PRESIDENT—PM 180

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

I hereby transmit for the information of the Congress the Twenty-first Annual Report of the Department of Housing and Urban Development, which covers calendar year 1985.

RONALD REAGAN.

THE WHITE HOUSE, *October 15, 1986.*

MESSAGES FROM THE HOUSE

At 3:15 p.m., a message from the House of Representatives, delivered by Mr. Allen, one of its clerks, announced that the House has passed the bill (S. 2453) to designate the U.S. Post Office to be constructed in Barnwell, SC, as the "Solomon Blatt, Sr., Post Office Building," with amendments, in which it requests the concurrence of the Senate.

The message also announced that the House recedes from its disagreement to the amendment of the Senate to the bill (H.R. 4613) to reauthorize appropriations to carry out the Commodity Exchange Act and to make technical improvements to the act; and agrees thereto, with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.".

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

At 4:59 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 209. An act to amend section 3718 of title 31, United States Code, to authorize contracts retaining private counsel to furnish legal services on the case of indebtedness owed the United States;

S. 1895. An act for the relief of Marlboro County General Hospital Charity of Bennetsville, SC;

S. 2266. An act to establish a ski area permit system on national forest lands, and for other purposes;

S. 2506. An act to establish a Great Basin National Park in the State of Nevada, and for other purposes;

S. 2750. An act to establish a property tax fund for the Houlton Band of Maliseet Indians in furtherance of the Maine Indian Claims Settlement Act of 1980, and for other purposes;

H.R. 2032. An act entitled the Government Securities Act of 1986;

H.R. 2205. An act to authorize the erection of a memorial on Federal land in the District of Columbia and its environs to honor members of the Armed Forces of the United States who served in the Korean war;

H.R. 2722. An act to amend title 13, United States Code, to eliminate the requirement relating to decennial census of drainage;

H.R. 2921. An act to authorize the Secretary of Agriculture to issue permanent easements for water conveyance systems in order to resolve title claims arising under acts repealed by the Federal Land Policy and Management Act of 1976, and for other purposes;

H.R. 3559. An act to amend the act establishing a Commission on the Bicentennial of the Constitution of the United States to clarify the status of employees of the Commission, to raise the limits of private contributions, and for other purposes;

H.R. 4116. An act to extend and improve the Domestic Volunteer Service Act of 1978;

H.R. 4354. An act to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1987, and for other purposes;

H.R. 5299. An act to amend title 38, United States Code, to increase the rates of compensation and dependency and indemnity compensation for veterans and survivors, and to improve veterans' health-care, education, employment, housing, and national cemetery programs, and for other purposes;

H.R. 5626. An act to make technical corrections in the Federal Employees Retirement System Act of 1986, and for other purposes;

S.J. Res. 169. Joint resolution to commemorate the bicentennial anniversary of the first patent and the first copyright laws;

S.J. Res. 232. Joint resolution to designate October 6, 1986, through October 10, 1986, as "National Social Studies Week";

S.J. Res. 299. Joint resolution to designate the week of December 7, 1986, through December 13, 1986, as "National Alopecia Areata Awareness Week";

S.J. Res. 304. Joint resolution to designate the week of November 16, 1986, through November 22, 1986, as "National Arts Week";

S.J. Res. 306. Joint resolution to designate the week beginning November 23, 1986, as "National Adoption Week";

S.J. Res. 308. Joint resolution to designate March 25, 1987, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy";

S.J. Res. 311. Joint resolution to designate the week beginning November 9, 1986, as "National Women Veterans Recognition Week";

S.J. Res. 322. Joint resolution to designate December 7, 1986, as "National Pearl Harbor Remembrance Day" on the occasion of the anniversary of the attack on Pearl Harbor;

S.J. Res. 392. Joint resolution to designate the month of December 1986 as "Made in America Month";

S.J. Res. 396. Joint resolution to designate the week October 26, 1986, through November 1, 1986, as "National Adult Immunization Awareness Week";

S.J. Res. 410. Joint resolution to designate the period commencing February 9, 1987, and ending February 15, 1987, as "National Burn Awareness Week";

S.J. Res. 414. Joint resolution to designate March 16, 1987, as "Freedom of Information Day".

S.J. Res. 418. Joint resolution to designate February 4, 1987, as "National Women in Sports Day".

The enrolled bills and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

At 7:50 p.m., a message from the House of Representatives, delivered by Mr. Allen, one of its clerks, announced that the House has passed the following bill, without amendment:

S. 2351. An act to revise the boundaries of Olympic National Park and Olympic National Forest in the State of Washington, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1200) to amend the Immigration and Nationality Act to effectively control unauthorized immigration to the United States, and for other purposes.

The message further announced that the House agrees to the amendment of the Senate to the bill (H.R. 5056) to permit registered public utility holding companies to own certain interests in qualifying cogeneration facilities.

The message also announced that the House agrees to the amendments of the Senate to the following bills:

H.R. 4873. An act to authorize certain transfers affecting the Pueblo of Santa Ana in New Mexico; and

H.R. 5465. An act to amend the Energy Policy and Conservation Act with respect to energy conservation standards for appliances.

The message further announced that the House has passed the bill (S. 2534) to authorize the acquisition and development of a mainland tour boat facility for the Fort Sumter National Monument, SC, and for other purposes, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the bill (S. 386) to confirm a conveyance of certain

real property by the Southern Pacific Transportation Co. to Ernest Pritchett and his wife, Dianna Pritchett, with amendments, in which it requests the concurrence of the Senate.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 412. Concurrent resolution to make a correction in the enrollment of the bill S. 1200.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3857. A communication from the Secretary of State, transmitting, pursuant to law, a request that $50 million in emergency assistance for El Salvador be included in the continuing resolution for fiscal year 1987; ordered to lie on the table.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 2314. A bill to amend the Newspaper Preservation Act (with additional views) (Rept. No. 99-539).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations:

Noel Gross, of New Jersey, to be an Alternate Representative of the United States to the Forty-first Session of the General Assembly of the United Nations.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. EVANS (for himself and Mr. DURENBERGER):

S. 2926. A bill to establish more uniform eligibility and benefit levels under the aid to families with dependent children program and the medicaid program, to provide for greater Federal financial responsibility for such programs, to enhance the employment prospects of recipients of aid to families with dependent children, to provide for a reduced Federal role with respect to certain activities, to provide transitional fiscal capacity grants to States, and for other purposes; to the Committee on Finance.

By Mr. MURKOWSKI:

S. 2927. A bill for the relief of the Homer Society of Natural History of Homer, Alaska; to the Committee on the Judiciary.

By Mrs. KASSEBAUM (for herself, Mr. LUGAR, Mr. PELL, Mr. DOLE, Mr. BOREN, Mr. DURENBERGER, Mr. DOMENICI, Mr. DODD, Mr. BIDEN, Mr. CRANSTON, Mr. SARBANES, Mr. KENNEDY, Mr. TRIBLE, Mr. HELMS, Mr. MURKOWSKI, Mr. CHAFEE, Mr. ABDNOR, Mr. KASTEN, Mr. LEAHY, Mr. KERRY, Mr. SASSER, Mr. LEVIN, Mr. NICKLES, Mr. WILSON, Mr. HEINZ, Mr. INOUYE, Mr. DECONCINI, Mr. BRADLEY, Mr. HARKIN, Mr. MATHIAS, Mr. NUNN, Mr. EVANS, Mr. BOSCHWITZ, Mr. MATTINGLY, Mr. BYRD, Mr. COCHRAN, Mr. SIMPSON, Mr. GARN, Mr. GORTON, Mr. PRESSLER, and Mr. HECHT):

S.J. Res. 427. Joint resolution reaffirming our friendship and sympathy with the people of El Salvador following the devastating earthquake of October 10, 1986; considered and passed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BYRD (for Mr. LEVIN (for himself and Mr. COHEN)):

S. Con. Res. 168. Concurrent resolution authorizing a technical correction to be made in the enrollment of the bill S. 2250; considered and agreed to.

By Mr. WILSON:

S. Con. Res. 169. Concurrent resolution saluting the tuna man for his contributions to the city of San Diego, the Nation, and the world; to the Committee on the Judiciary.

By Mr. CRANSTON:

S. Con. Res. 170. Concurrent resolution designating jazz as an American national treasure; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. EVANS (for himself and Mr. DURENBERGER):

S. 2926. A bill to establish more uniform eligibility and benefit levels under the aid to families with dependent children program and the medicaid program, to provide for greater Federal financial responsibility for such programs, to enhance the employment prospects of recipients of aid to families with dependent children, to provide for a reduced Federal role with respect to certain activities, to provide transitional fiscal capacity grants to States, and for other purposes; to the Committee on Finance.

(The remarks of Mr. EVANS on this legislation appear earlier in today's RECORD.)

By Mr. MURKOWSKI:

S. 2927. A bill for the relief of the Homer Society of Natural History of Homer, AK; to the Committee on the Judiciary.

RELIEF OF HOMER SOCIETY OF NATURAL HISTORY

● Mr. MURKOWSKI. Mr. President, I am introducing a private relief bill to compensate the Homer Society of Natural History for the loss of a $100,000 check from the National Endowment for the Humanities (Endowment) that occurred as a result of an alleged violation of certain savings and loan insurance regulations through no fault of the society.

The society is a nonprofit membership corporation which operates the Pratt Museum in Homer, AK. The society and museum are devoted to the study and preservation of the natural and cultural history of the Katchemak Bay region of southcentral Alaska.

The society had three accounts with Peninsula Savings & Loan Association of Homer, AK. In its general account were the funds from various sources, including the city of Homer, designated for the maintenance and operation of Pratt Museum. The society's building fund account contained funds designated for the renovation and expansion of the museum. The third account contained a relatively small amount collected through a raffle.

On August 4, 1986, the society deposited a Treasury check for $100,000 that it had received from the endowment in its building fund account.

On August 8, 1986, the Director of the Division of Banking, Securities and Corporations of the Department of Commerce and Economic Development of the State of Alaska issued an order closing Peninsula. On that same day, the Federal Home Loan Bank Board appointed the Federal Savings and Loan Insurance Corporation [FSLIC] as sole receiver for Peninsula.

On the day of default Peninsula's records indicated that the society had $212,879.98 invested in its accounts. The general account contained $89,231.53; the building fund account contained $122,522.07, including the $100,000 from the endowment; and the raffle account contained $1,126.38. On August 13, the FSLIC issued its initial insurance determination.

Based upon Peninsula's records, the FSLIC initially determined that the society had $212,879.98 invested in its three accounts on the date of default and that those funds were insured for a total of $100,000, leaving $112,879.98 uninsured.

To appeal FSLIC's initial insurance determination, the society must file a request for reconsideration by October 10, 1986. At the society's request, FSLIC has given it a 30 day extension for appeal until November 10, 1986. Under FSLIC's regulations a decision on the appeal could take as long as 300 days.

Mr. President, while the society pursues its legal remedies I have introduced legislation in the form of a pri-

vate relief bill to compensate the society for the loss of its $100,000 endowment money. The equities of the society's circumstance warrants this body's immediate attention of this bill.

Four days before Peninsula was closed, the society deposited its $100,000 endowment check into a separate building fund account at Peninsula. The society did so in good faith. Unbeknownst to the society, Peninsula was financially troubled at the time of deposit. The society was also unaware that the money would not be insured in case of default, despite the fact that it believed that each of their accounts were insured up to $100,000.

The $100,000 endowment was not fully insured due to FSLIC's determination that Peninsula violated certain alleged savings and loan account insurance requirements. The society is now left to argue on its own that their money was insured. To date it has spent approximately $10,000 in legal fees to recover their $100,000. The society may have to wait up to 1 year to find out where they stand in a very uncertain outcome.

If the society does not recover the $100,000, it may have to forfeit or forego other State of Alaska and endowment grant money already received for the renovation and expansion of the museum. Other money for the museum is hanging in the balance as the society has received over $600,000 from the community of Homer.

Mr. President, due to the timing of the society's deposit, the society's good faith, the loss of the society's money as a result of technical bankng regulations beyond the society's knowledge and control, the potential loss of other moneys for the museum, and the overwhelming support of the community of Homer for the museum, I respectfully offer a private relief bill for the society.●

ADDITIONAL COSPONSORS

S. 2454

At the request of Mr. MURKOWSKI, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 2454, a bill to repeal section 1631 of the Department of Defense Authorization Act, 1985, relating to the liability of Government contractors for injuries or losses of property arising out of certain atomic weapons testing programs, and for other purposes.

S. 2651

At the request of Mr. DECONCINI the name of the Senator from Missouri [Mr. EAGLETON] was added as a cosponsor of S. 2651, a bill to reduce Federal liability for the relocation of certain Navajo Indians through the exchange of certain lands between the Hopi and Navajo Indian Tribes, and for other purposes.

S. 2770

At the request of Mr. COCHRAN, the name of the Senator from Virginia [Mr. TRIBLE] was added as a cosponsor of S. 2770, a bill to amend the Farm Credit Act of 1971 to provide the opportunity for competitive interest rates for the farmer, rancher, and cooperative borrowers of the Farm Credit System, and for other purposes.

S. 2909

At the request of Mr. D'AMATO the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 2909, a bill to provide for adherence with the MacBride Principles by U.S. persons doing business in Northern Ireland.

SENATE JOINT RESOLUTION 112

At the request of Mr. PELL, the names of the Senator from West Virginia [Mr. BYRD], the Senator from North Carolina [Mr. BROYHILL], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 112, a joint resolution to authorize and request the President to call a White House Confenece on Library and Information Services to be held not later than 1989, and for other purposes.

AMENDMENT NO. 3284

At the request of Mr. LONG, the names of the Senator from West Virginia [Mr. BYRD] and the Senator from Massachusetts [Mr. KENNEDY] were added as cosponsors of amendment No. 3284 intended to be proposed to H.R. 5484, a bill to strengthen Federal efforts to encourage foreign cooperation in eradicating illicit drug crops and in halting international drug traffic, to improve enforcement of Federal drug laws and enhance interdiction of illicit drug shipments, to provide strong Federal leadership in establishing effective drug abuse prevention and education programs, to expand Federal support for drug abuse treatment and rehabilitation efforts, and for other purposes.

SENATE CONCURRENT RESOLUTION 168—AUTHORIZING A TECHNICAL CORRECTION IN THE ENROLLMENT OF S. 2250

Mr. BYRD (for Mr. LEVIN, for himself, and Mr. COHEN) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 168

Resolved by the Senate (the House of Representatives concurring), That, in the enrollment of the bill (S. 2250) to prohibit kickbacks relating to subcontracts under Federal Government contracts, the Clerk of the Senate shall make the following correction:

In the first sentence of section 5(a)(2) of the Anti-Kickback Act of 1986 (as it appears in section 2(a) of the bill), insert "employee," between "whose" and "subcontractor".

SENATE CONCURRENT RESOLUTION 169—SALUTING THE TUNA INDUSTRY

Mr. WILSON submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 169

Whereas the tuna fishing industry is inextricably tied to the economic, cultural, and historical development to the City of San Diego;

Whereas through the ingenuity and tenacity of the tuna man, technological innovations which revolutionized the fishing industry were developed, applied, and perfected;

Whereas through perseverance and mastery, the tuna man built an industry without parallel, an industry which at its height represented the state of the art in tuna fishing, shipping, canning, and marketing;

Whereas their skill and dedication led the San Diego tuna fishermen to become the most efficient and productive in the world;

Whereas the tuna fleet played a significant role in supply and reconnaissance missions in the Pacific Ocean during World War II, sacrificing many lives and vessels;

Whereas many tuna men gave their lives while performing their duties and advancing the tuna industry; and

Whereas Captain Anthony Mascaranhas had the vision and will to conceive, finance, and commission the sculpting of a noble memorial to honor the men of the tuna industry, a memorial to be dedicated on October 26, 1986: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the people of the United States salute, honor, and remember the tuna man for his innumerable and priceless contributions to the City of San Diego, the Nation, and the world.

SENATE CONCURRENT RESOLUTION 170—DESIGNATING JAZZ AS AN AMERICAN NATIONAL TREASURE

Mr. CRANSTON submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 170

Whereas jazz has achieved preeminence throughout the world as an indigenous American music and art form, bringing to this country and the world a uniquely American musical synthesis and culture through the African-American experience;

Makes evident to the world an outstanding artistic model of individual expression and democratic cooperation within the creative process, thus fulfilling the highest ideals and aspirations of our Republic;

Is a unifying force, bridging cultural, religious, ethnic and age differences in our diverse society;

Is a true music of the people, finding its inspiration in the cultures and most personal experiences of the diverse peoples that constitute our Nation;

Has evolved into a multifaceted art form which continues to birth and nurture new stylistic idioms and cultural fusions;

Has had a historic, pervasive, and continuing influence on other genres of music both here and abroad; and

Has become a true international language adopted by musicians around the world as a music best able to express contemporary realities from a personal perspective;

Whereas this great American musical art form has not yet been properly recognized nor accorded the institutional status commensurate with its value and importance;

Whereas it is important for the youth of America to recognize and understand jazz as a significant part of their cultural and intellectual heritage;

Whereas inasmuch as there exists no effective national infrastructure to support and preserve jazz;

Whereas documentation and archival support required by such a great art form has yet to be systematically applied to the jazz field; and

Whereas it is in the best interest of the national welfare and all of our citizens to preserve and celebrate this unique art form: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that jazz is hereby designated as a rare and valuable national American treasure to which we should devote our attention, support and resources to make certain it is preserved, understood and promulgated.

Mr. CRANSTON. Mr. President, today I submit Senate Concurrent Resolution 170, proclaiming jazz as an American national treasure. An identical measure in the House is sponsored by Hon. JOHN CONYERS, JR.

If there is anything more American than apple pie, it's jazz. The qualities of jazz as an art form mirror the qualities of the American Nation—improvisation, cultural fusion. It soars with the wondrous freedom of the human spirit. Yet ironically, jazz is a product of an era of human bondage in this country, when the chants and tribal rhythms of a distant homeland became the field hollers and gospel music of American slaves.

The first thread of jazz in the fabric of American music appeared at the turn of the 20th century, as ragtime. Scott Joplin, and others, linked the classic musical tradition of Europe with African rhythms. In the late twenties Louis Armstrong and Earl Hines nursed the fledgling ragtime into the serious art form that came to be known as jazz. The uniqueness of the new form stemmed from improvisation, and the musical magic created by an individual differing from—but yet supported by and, in fact, enriching—the musical group.

Over the years, jazz has become universal, influencing musical traditions everywhere. Appreciation of this unique American contribution has flourished throughout the world, and especially in Europe. Jazz has made a considerable mark behind the Iron Curtain, as well. Yet many Americans, especially the young, would be hard put to recognize significant jazz artists and their compositions.

Through the concurrent resolution I submit today, we can begin to spotlight the rich and vibrant gift that American jazz has made to world music. We can begin, through this modest congressional action, to encourage public and private support for jazz artists and nonprofit jazz organizations. We can begin, also, to celebrate the towering American figures—most of them black Americans—whose inspiration and artistry brought forth a glorious new language of the human heart and soul.

AMENDMENTS SUBMITTED

ANTI-DRUG ABUSE ACT OF 1986

EVANS AMENDMENT NO. 3346

(Ordered to lie on the table.)

Mr. EVANS submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill (H.R. 5484) to strengthen Federal efforts to encourage foreign cooperation in eradicating illicit drug crops and in halting international drug traffic, to improve enforcement of Federal drug laws and enhance interdiction of illicit drug shipments, to provide strong Federal leadership in establishing effective drug abuse prevention and education programs, to expand Federal support for drug abuse treatment and rehabilitation efforts, and for other purposes, as follows:

Subsection (n) of section 408 of the Controlled Substances Act as added by section 1951(b) of the Senate amendment as modified, is amended by inserting "or the victim" after "or sex of the defendant" each place it appears.

DOMENICI AMENDMENT NO. 3347

(Ordered to lie on the table.)

Mr. DOMENICI submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

In the amendment, strike section 1152 and insert in lieu thereof the following:

SEC. 1152. ASSET FORFEITURE FUNDS.

(a) DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.—Subsection (c) of section 524 of title 28, United States Code, is amended—

(1) by inserting at the end of subparagraph (A) of paragraph (1) the following: "such payments may also include those, made pursuant to regulations promulgated by the Attorney General, that are necessary and direct program-related expenses for the purchase or lease of automatic data processing equipment (not less than 90 percent of which use will be program related), training, printing, contracting for services directly related to the processing of and accounting for forfeitures, and the storage, protection, and destruction of controlled substances;";

(2) by inserting after subparagraph (A) of paragraph (1) the following new subparagraph and renumbering the subsequent subparagraphs appropriately;

"(B) the payment of awards for information or assistance directly relating to violations of the criminal drug laws of the United States;";

(3) by amending newly designated subparagraph (F) of paragraph (1) to read as follows:

"(F) for equipping for drug law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the Drug Enforcement Administration, the Federal Bureau of Investigation, the Immigration and Naturalization Service, or the United States Marshals Service; and";

(4) by striking out in paragraph (4) "remaining after payment of expenses for forfeiture and sale authorized by law" and inserting in lieu thereof ", except all proceeds of forfeitures available for use by the Secretary of the Treasury or the Secretary of the Interior pursuant to section 11(d) of the Endangered Species Act (16 U.S.C. 1540(d)) or section 6(d) of the Lacey Act Amendments of 1981 (16 U.S.C. 3375(d))";

(5) by striking out paragraph (8) and renumbering paragraph (9) as paragraph (8); and

(6) by adding at the end of the subsection the following new paragraph:

"(9)(A) If any funds deposited in the Department of Justice Assets Forfeiture Fund or the Customs Forfeiture Fund (19 U.S.C. 1613a, 1613b) are not expended or obligated prior to thirty days after the end of the fiscal year, 90 percent of such funds (not to exceed amounts specified in appropriation Acts) shall be transferred into a Special Forfeiture Fund.

"(B) The funds in the Special Forfeiture Fund shall be disbursed (not to exceed amounts specified in appropriation Acts) during the fiscal year in which they are transferred into the Special Fund, by the Attorney General, after consultation with the Secretary of the Treasury, the Secretary of Health and Human Services, and the Secretary of Education, to enhance the following efforts:

"(i) Federal drug law enforcement agencies and programs;

"(ii) Federal drug abuse agencies and programs relating to drug abuse education, prevention, treatment, rehabilitation, and research;

"(iii) State, local, and nonprofit agencies with drug abuse responsibilities; and

"(iv) State and local law enforcement agencies for drug law enforcement efforts, under subtitle M of title I of the Omnibus Crime Control and Safe Streets Act of 1986 (42 U.S.C. 3721 et seq.).

"(C) Funds disbursed from the Special Forfeiture Fund shall not be used to supplant existing funds, but shall be used to supplement funds that are otherwise available.

"(D) The Attorney General shall report annually to the Congress on all disbursements made under the authority of subparagraph (B).".

(b) CUSTOMS FORFEITURE FUND.—

(1) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613a) as added by Public Law 98-473, is amended—

(A) by amending paragraph (3) of subsection (a) to read as follows:

"(3) for equipping for law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the United States Customs Service; and"; and

(B) by striking out subsection (h).

(2) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613b) as added by Public Law 98-573, is repealed.

WILSON AMENDMENT NO. 3348

(Ordered to lie on the table.)

Mr. WILSON submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

In Amendment No. 3275, as modified, strike out section 1152 and insert in lieu thereof the following:

SEC. 1152. ASSET FORFEITURE FUNDS

(a) DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.—Subsection (c) of section 524 of title 28, United States Code, is amended—

(1) in paragraph (1) before subparagraph (A) by inserting "Trust" after "Forfeiture";

(2) by inserting at the end of subparagraph (A) of paragraph (1) the following: "such payments may also include those, made pursuant to regulations promulgated by the Attorney General, that are necessary and direct program-related expenses for the purchase or lease of automatic data processing equipment (not less than ninety percent of which use will be program related), training, printing, contracting for services directly related to the processing of and accounting for forfeitures, and the storage, protection, and destruction of controlled substances;";

(3) by inserting after subparagraph (A) of paragraph (1) the following new subparagraph and renumbering the subsequent subparagraphs appropriately:

"(B) the payment of awards for information or assistance directly relating to violations of the criminal drug laws of the United States.

(4) by amending newly designated subparagraph (F) of paragraph (1) to read as follows:

"(F) for equipping for drug law enforcement functions any government owned or leased vessels, vehicles, and aircraft available for official use by the Drug Enforcement Administration, the Federal Bureau of Investigation, the Immigration and Naturalization Service, or the United States Marshals Service; and";

(5) by striking out in paragraph (4) "remaining after payment of expenses for forfeiture and sale authorized by law" and inserting in lieu thereof ", except all proceeds of forfeitures available for use by the Secretary of the Treasury or the Secretary of the Interior pursuant to section 11(d) of the Endangered Species Act (16 U.S.C. 1540(d)) or section 6(d) of the Lacey Act Amendments of 1981 (16 U.S.C. 3375(d))"; and

(6) by amending subparagraph (8) to read as follows:

"(8) Such sums are authorized to be appropriated from the fund as may be necessary for the purposes described in paragraph (1). Any sums remaining in the fund at the end of the fiscal year shall remain in the fund and available to be appropriated.".

(b) CUSTOMS FORFEITURE FUND.—

(1) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613a) as added by Public Law 98-473, is amended—

(A) in subsection (a) before paragraph (1) by striking out "for the United States Customs Service that shall be entitled the 'Customs Forfeiture Fund'" and inserting in lieu thereof "to be known as the 'United States Customs Service Assets Forfeiture Trust Fund'";

(B) by amending paragraph (3) of subsection (a) to read as follows:

"(3) for equipping for law enforcement functions any government owned or leased vessels, vehicles, and aircraft available for official use by the United States Customs Service; and"; and

(C) by amending subsection (h) to read as follows:

"(8) Such sums are authorized to be appropriated from the fund as may be necessary for the purposes described in subsection (a). Any sums remaining in the fund at the end of the fiscal year shall remain in the fund and available to be appropriated.".

(2) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613b) as added by Public Law 98-573, is repealed.

LEVIN AMENDMENT NOS. 3349 THROUGH 3368

(Ordered to lie on the table.)

Mr. LEVIN submitted 20 amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3349

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

Page 171, lines 12 and 13, strike "A finding of any aggravating or mitigating factor by a jury shall be made by unanimous vote." and insert in lieu thereof the following:

"A finding of any aggravating factor by a jury shall be made by unanimous vote, and a finding of any mitigating factor by a jury shall be made by a majority vote."

AMENDMENT No. 3350

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

Page 172, line 15, insert after "." the following:

"The defendant was youthful, although not under the age of eighteen"

AMENDMENT No. 3351

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

Page 172, at line 7 after the word "death" insert:

"Provided that a sentence of death shall not be imposed upon an individual who is unable to understand his impending execution or the reason for it."

AMENDMENT No. 3352

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

On page 170, line 12, strike "substantially".

AMENDMENT No. 3353

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

Amendment to paragraph (m) 173: Strike lines 12, 13 and 14.

Insert the following: "only the following aggravating factors shall be considered:"

AMENDMENT No. 3354

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

Page 167, strike lines 14 through 16, and insert in lieu thereof the following: "intentionally killed any other individual, intentionally inflicted serious bodily injury which resulted in the death of any other individual; or intentionally engaged in conduct intending that any other individual be killed or that lethal force be employed against any other individual, which resulted in the death of such individual, the individual so engaging in conduct during the course of a continuing criminal enterprise shall be subject to the death penalty in accordance with this section."

AMENDMENT No. 3355

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

On page 173, after line 9, insert the following new section:

(6) The defendant had not previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the distribution of a controlled substance.

AMENDMENT No. 3356

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

On page 173, after line 9, insert the following new section:

(6) The defendant had not previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury upon another person.

AMENDMENT No. 3357

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 173, after line 9, insert the following new section:

(6) The defendant had not previously been convicted of another Federal offense, or a State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute.

AMENDMENT No. 3358

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 174, after line 5, strike "one" and insert in lieu thereof the following "two"

AMENDMENT No. 3359

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 174, after line 11, strike "one" and insert in lieu thereof the following "two"

AMENDMENT No. 3360

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

Beginning on page 173, strike line 23 through line 2 on page 174.

AMENDMENT No. 3361

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 174, strike lines 3 through 8.

AMENDMENT No. 3362

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 174, strike lines 3 through 13.

AMENDMENT No. 3363

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 174, strike lines 9 through 13.

AMENDMENT No. 3364

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 168, line 10, strike "." and insert in lieu thereof "; and

"(C) describing any evidence in the possession of the government which could be used by the defendant to support any or all of the mitigating factors set forth in subsection (m.)"

AMENDMENT No. 3365

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On Page 175, strike lines 20 through 24 and insert in lieu thereof

"creed, or sex of the defendant or the victim. The jury shall return to the court a certificate signed by each juror that consideration of race, color, national origin, creed or sex of the defendant or the victim was not involved in reaching his or her individual decision."

AMENDMENT No. 3366

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

Page 172, strike line 4 through line 9 and insert in lieu thereof the following:

"finding as to whether a sentence of death and/or of life imprisonment without the possibility of parole is justified. The jury, or if there is no jury, the court, shall return a finding as to whether a sentence of death is equally as justified as a sentence of life imprisonment.

'Imposition of Sentence'

(k) Upon a finding that a sentence of death is justified, the court shall sentence the defendant to death, provided, however, that upon a finding that life imprisonment without the possibility of parole is equally as justified as a sentence of death, the court shall sentence the defendant to life imprisonment without the possibility of parole. Otherwise the court shall impose a sentence, other than death or life imprisonment with the possibility of parole, as authorized by law."

AMENDMENT No. 3367

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

Page 168 after line 10 insert:

"(C) The Government shall also notify the defendant of the evidence it intends to introduce in support of each aggravating factor."

AMENDMENT No. 3368

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 170, line 4, strike "." and insert in lieu thereof the following:

"which have been identified by the government as required in subsection (g)."

DOLE AMENDMENT NOS. 3369 THROUGH 3377

(Ordered to lie on the table.)

Mr. DOLE submitted nine amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3369

Strike out section 5052 of the amendment.

AMENDMENT No. 3370

Strike out section 3451 of the amendment.

AMENDMENT No. 3471

Strike out section 4031 of the amendment.

AMENDMENT No. 3472

Strike out section 3142 of the amendment.

AMENDMENT No. 3373

Strike out title X of the amendment.

AMENDMENT No. 3474

Strike out subtitle T of title I of the amendment.

AMENDMENT No. 3375

Strike out subtitle K of title I of the amendment.

AMENDMENT No. 3376

Section 1552(c)(1)(c) of the amendment is amended by striking the proposed paragraph (6) and inserting in lieu thereof the following:

"(6) There are authorized to be appropriated $115,000,000 for fiscal year 1987, $115,000,000 for fiscal year 1988; and $115,000,000 for fiscal year 1989, to carry out the programs under part M of this title."

AMENDMENT No. 3377

Section 3141(b)(1)(c) of the amendment is amended by striking $171,050,000 and inserting in lieu thereof the following: "$85,545,000."

Section 3141(b)(1)(c)(i) of the amendment is amended by striking "$93,500,000" and inserting in lieu thereof the following: "$47,750,000."

THURMOND (AND OTHERS) AMENDMENT NO. 3378

(Ordered to lie on the table)

Mr. THURMOND (for himself, Mr. HATCH, Mr. MATTINGLY, Mr. GRAMM, and Mr. DENTON) submitted an amendment intended to be proposed by them to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

On page 167, of the amendment line 1, strike all through page 177, line 8; and insert in lieu thereof the following:

That title 18 of the United States Code is amended—

(a) by adding the following new chapter after chapter 227:

"CHAPTER 228—DEATH SENTENCE

"Sec.

'3591. Sentence of death.

"3592. Factors to be considered in determining whether a sentence of death is justified.

"3593. Special hearing to determine whether a sentence of death is justified.

"3594. Imposition of a sentence of death.

"3595. Review of a sentence of death.

"3596. Implementation of a sentence of death.

"3597. Use of state facilities.

"3591. Sentence of death.

"A defendant who has been found guilty of—

"(a) an offense described in section 794 or section 2381 of this title;

"(b) an offense described in section 1751(c) of this title, if the offense, as determined beyond a reasonable doubt at the hearing under section 3593, constitutes an attempt to kill the President of the United States and results in bodily injury to the President or comes dangerously close to causing death of the President; or

"(c) any other offense for which a sentence of death is provided, if the defendant, as determined beyond a reasonable doubt at the hearing under section 3593—

"(1) intentionally killed the victim;

"(2) intentionally inflicted serious bodily injury that resulted in the death of the victim; or

"(3) intentionally participated in an act, contemplating that the life of a person would be taken or intending that lethal force would be used in connection with a person, other than one of the participants in the offense, and the victim died as a direct result of the act;

shall be sentenced to death if, after consideration of the factors set forth in section 3592 in the course of a hearing held pursuant to section 3593, it is determined that imposition of a sentence of death is justified; provided that no person may be sentenced to death who was less than eighteen years of age at the time of the offense.

"§ 3592. Factors to be considered in determining whether a sentence of death is justified

"(a) MITIGATING FACTORS.—In determining a sentence of death is justified for any offense, the jury, or if there is no jury, the court, shall consider each of the following mitigating factors and determine which, if any exist:

"(1) the defendant's mental capacity was significantly impaired, although the impairment was not such as to constitute only a defense to prosecution;

"(2) the defendant was under unusal and substantial duress, although not such duress as would constitute a defense to prosecution; and

"(3) the defendant was an accomplice whose participation in the offense was relatively minor.

The jury, or if there is no jury, the court shall consider whether any other mitigating factor exists.

"(b) AGGRAVATING FACTORS FOR ESPIONAGE AND TREASON.—In determining whether a sentence of death is justified for an offense described in section 3591(a), the jury, or if there is no jury, the court, shall consider each of the following aggravating factors and determine which, if any, exist:

"(1) the defendant has previously been convicted of another offense involving espionage or treason for which either a sentence of life imprisonment or death was authorized by statute;

"(2) in the commission of the offense the defendant knowingly created a grave risk of substantial danger to the national security; and

"(3) in the commission of the offense the defendant knowingly created a grave risk of death to another person.

The jury, or if there is no jury, the court, may consider whether any other aggravating factor exists.

"(c) AGGRAVATING FACTORS FOR HOMICIDE AND FOR ATTEMPTED MURDER OF THE PRESIDENT.—In determining whether a sentence of death is justified for an offense described in section 3591 (b) or (c), the jury, or if there is no jury, the court, shall consider each of the following aggravating factors and determine which, if any, exist:

"(1) the death, or injury resulting in death, occurred during the commission or attempted commission of, or during the immediate flight from the commission of, an offense under section 751 (prisoners in custody of institution or officer), section 794 (gathering or delivering defense information to aid foreign government), section 844(d) (transportation of explosives in interstate commerce for certain purposes), section 844(f) (destruction of Government property in interstate commerce by explosives), section 1118 (prisoners serving life term), section 1201 (kidnaping), or section 2381 (treason) of this title, or section 902 (i) or (n) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1472 (i) or (n)) (aircraft piracy);

"(2) the defendant has previously been convicted of another Federal or State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute;

"(3) the defendant has previously been convicted of two or more Federal or State offenses, punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury or death upon another person;

"(4) the defendant, in the commission of the offense, knowingly created a grave risk of death to one or more persons in addition to the victim of the offense;

"(5) the defendant committed the offense in an especially heinous, cruel, or depraved manner;

"(6) the defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value;

"(7) the defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value;

"(8) the defendant committed the offense after substantial planning and premeditation to cause the death of a person or commit an act of terrorism; or

"(9) the defendant committed the offense against—

"(A) the President of the United States, the President-elect, the Vice President, the Vice-President-elect, the Vice-President-designate, or, if there is no Vice President, the officer next in order of succession to the office of the President of the United States, or any person who is acting as President under the Constitution and laws of the United States;

"(B) a chief of state, head of government, or the political equivalent, of a foreign nation;

"(C) a foreign official listed in section 1116(b)(3)(A) of this title, if he is in the United States on official business; or

"(D) a Federal public servant who is a judge, a law enforcement officer, or an employee of a United States penal or correctional institution—

"(i) while he is engaged in the performance of his official duties;

"(ii) because of the performance of his official duties; or

"(iii) because of his status as a public servant.

For purposes of this subparagraph, a 'law enforcement officer' is a public servant authorized by law or by a Government agency or Congress to conduct or engage in the prevention, investigation, or prosecution of an offense.

"(10) the violation of Section 848 of Title 21 of the United States Code in relation to which the conduct described in Section 848(c) occurred was a violation of sections 405, 405A, or 405B of the Controlled Substance Act.

The jury, or if there is no jury, the court, may consider whether any other aggravating factor exists.

"§ 3593. Special hearing to determine whether a sentence of death is justified

"(a) NOTICE BY THE GOVERNMENT.—If, in a case involving an offense described in section 3591, the attorney for the government believes that the circumstances of the offense are such that a sentence of death is justified under this chapter, he shall, a reasonable time before the trial, or before acceptance by the court of a plea of guilty, or at such time thereafter as the court may permit upon a showing of good cause, sign and file with the court, and serve on the defendant, a notice—

"(1) stating that the government believes that the circumstances of the offense are such that, if the defendant is convicted, a sentence of death is justified under this chapter; and

"(2) setting forth the aggravating factor or factors that the government, if the defendant is convicted, proposes to prove as justifying a sentence of death.

The court may permit the attorney for the government to amend the notice upon a showing of good cause.

"(b) HEARING BEFORE A COURT OR JURY.—If the attorney for the government has filed a notice as required under subsection (a) and the defendant is found guilty of an offense described in section 3591, the judge who presided at the trial or before whom the guilty plea was entered, or another judge if that judge is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. Prior to such a hearing, no presentence report shall be prepared by the United States Probation Service, notwithstanding the provisions of Rule 32(e) of the Federal Rules of Criminal Procedure. The hearing shall be conducted—

"(1) before the jury that determined the defendant's guilt;

"(2) before a jury impaneled for the purpose of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury that determined the defendant's guilt was discharged for good cause; or

"(D) after initial imposition of a sentence under this section, reconsideration of the sentence under this section is necessary; or

"(3) before the court alone, upon the motion of the defendant and with the approval of the attorney for the government.

A jury impaneled pursuant to paragraph (2) shall consist of twelve members, unless, at any time before the conclusion of the hearing, the parties stipulate, with the approval of the court, that it shall consist of a lesser number.

"(c) PROOF OF MITIGATING AND AGGRAVATING FACTORS.—At the hearing, information may be presented as to any matter relevant to the sentence, including any mitigating or aggravating factor permitted or required to be considered under section 3592. Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to a mitigating or aggravating factor may be presented by either the attorney for the government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is substantially outweighed by the danger of creating unfair prejudice, confusing the issues, or misleading the jury. The attorney for the government and the defendant shall be permitted to rebut any information received at the hearing, and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any aggravating or mitigating factor, and as to the appropriateness in the case of imposing a sentence of death. The attorney for the government shall open the argument. The defendant shall be permitted to reply. The attorney for the government shall then be permitted to reply in rebuttal. The burden of establishing the existence of any aggravating factor is on the government, and is not satisfied unless the existence of such a factor is established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless the existence of such a factor is established by a preponderance of the information.

"(d) RETURN OF SPECIAL FINDINGS.—The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return a special finding as to each mitigating and aggravating factor, concerning which information is presented at the hearing, required to be considered under section 3592. The jury must find the existence of a mitigating or aggravating factor by a unanimous vote, although it is necessary that there be a unanimous vote

on any specific mitigating or aggravating factor if a majority of the jury finds the existence of such a specific factor.

"(e) RETURN OF A FINDING CONCERNING A SENTENCE OF DEATH.—If, in the case of—

"(1) an offense described in section 3591(a), an aggravating factor required to be considered under section 3592(b) is found to exist; or

"(2) an offense described in section 3591(b) or

(c), an aggravating factor required to be considered under section 3592(c) is found to exist;

the jury, or if there is no jury, the court, shall then consider whether all the aggravating factors found to exist sufficiently outweigh all the mitigating factors found to exist to justify a sentence of death, or, in the absence of a mitigating factor, whether the aggravating factor alone are sufficient to justify a sentence of death. Based upon this consideration, the jury by unanimous vote, or if there is no jury, the court, shall return a finding as to whether a sentence of death is justified.

"(f) SPECIAL PRECAUTION TO ASSURE AGAINST DISCRIMINATION.—In a hearing held before a jury, the court, prior to the return of a finding under subsection (e), shall instruct the jury that, in considering whether a sentence of death is justified, it shall not consider the race, color, national origin, creed, or sex of the defendant. The jury, upon return of a finding under subsection (e), shall also return to the court a certificate, signed by each juror, that consideration of the race, color, national origin, creed, or sex of the defendant was not involved in reaching the juror's individual decision.

"§ 3594. Imposition of a sentence of death

"Upon a finding under section 3593(e) that a sentence of death is justified, the court shall sentence the defendant to death. Upon a finding under section 3593(e) that a sentence of death is not justified, or under section 3593(d) that no aggravating factor required to be found exists, the court shall impose any sentence other than death that is authorized by law. Notwithstanding any other provision of law, if the maximum term of imprisonment for the offense is life imprisonment, the court may impose a sentence of life imprisonment without parole.

"§ 3595. Review of a sentence of death

"(a) APPEAL.—In a case in which a sentence of death is imposed, the sentence shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal must be filed within the time specified for the filing of a notice of appeal. An appeal under this section may be consolidated with an appeal of the judgment of conviction and shall have priority over all other cases.

"(b) REVIEW.—The court of appeals shall review the entire record in the case, including—

"(1) the evidence submitted during the trial;

"(2) the information submitted during the sentencing hearing;

"(3) the procedures employed in the sentencing hearing; and

"(4) the special findings returned under section 3593(d).

"(c) DECISION AND DISPOSITION.—(1) If the court of appeals determines that—

"(A) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; and

"(B) the information supports the special finding of the existence of an aggravating factor required to be considered under section 3592;

it shall affirm the sentence.

"(2) In any other case, the court of appeals shall remand the case for reconsideration under section 3593.

"(3) The court of appeals shall state in writing the reasons for its disposition of an appeal of a sentence of death under this section.

"§ 3596. Implementation of a sentence of death

"A person who has been sentenced to death pursuant to the provisions of this chapter shall be committed to the custody of the Attorney General until exhaustion of the procedures for appeal of the judgment of conviction and for review of the sentence. When the sentence is to be implemented, the Attorney General shall release the person sentenced to death to the custody of a United States marshal, who shall supervise implementation of the sentence in the manner prescribed by the law of the State in which the sentenced is imposed. If the law of such State does not provide for implementation of a sentence of death, the court shall designate another State, the law of which does so provide, and the sentence shall be implemented in the latter State in the manner prescribed by such law. A sentence of death shall not be carried out upon a woman while she is pregnant.

"§ 3597. Use of State facilities

"A United States marshal charged with supervising the implementation of a sentence of death may use appropriate State or local facilities for the purpose, may use the services of an appropriate State or local official or of a person such an official employs for the purpose, and shall pay the costs thereof in an amount approved by the Attorney General.";

(b) by repealing sections 3566 and 3567;

(c) in the chapter analysis of part II, by adding the following new item after the item relating to chapter 227:

"228. Death sentence ..... 3591";

and

(d) in the section analysis of chapter 227, by amending the items relating to sections 3566 and 3567 to read as follows:

"3566. Repealed.

"3567. Repealed.".

SEC. 2. Section 34 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the section.

SEC. 3. Section 794(a) of title 18 of the United States Code is amended by changing the period at the end of the section to a comma and by adding immediately thereafter the words "except that the sentence of death shall not be imposed unless the jury or, if there is no jury, the court, further finds that the offense directly concerned nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large-scale attack; war plans; communications intelligence or cryptographic information; or any other major weapons system or major element of defense strategy.".

SEC. 4. Section 844(d) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 5. Section 844(f) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 6. Section 844(i) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 7. The second paragraph of section 1111(b) of title 18 of the United States Code is amended to read as follows:

"Whoever is guilty of murder in the first degree shall be punished by death or by imprisonment for life;".

SEC. 8. Section 1116(a) of title 18 of the United States Code is amended by striking the words "any such person who is found guilty of murder in the first degree shall be sentenced to imprisonment for life, and".

SEC. 9. Chapter 51 of title 18 of the United States Code is amended—

(a) by adding at the end thereof the following:

"§ 118. Murder by a Federal prisoner

"(a) Whoever, while confined in a Federal correctional institution under a sentence for a term of life imprisonment, murders another shall be punished by death or by life imprisonment without the possibility of parole.

"(b) For the purposes of this section—

"(1) 'Federal correctional institution' means any Federal prison, Federal correctional facility, Federal community program center, or Federal halfway house;

"(2) 'term of life imprisonment' means a sentence for the term of natural life, a sentence commuted to natural life, an indeterminate term of a minimum of at least fifteen years and a maximum of life, or an unexecuted sentence of death;

"(3) 'murders' means committing first degree or second degree murder as defined by section 1111 of this title."; and

(b) by amending the section analysis to add:

"1118. Murder by a Federal prisoner.".

SEC. 10. Section 1201 of title 18 of the United States Code is amended by inserting after the words "or for life" in subsection (a) the words "and, if the death of any person results, shall be punished by death or life imprisonment".

SEC. 11. The last paragraph of section 1716 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the paragraph.

SEC. 12. Subsection (c) of section 1751 of title 18 of the United States Code is amended to read as follows:

"(c) Whoever attempts to kill or kidnap any individual designated in subsection (a) of this section shall be punished (1) by imprisonment for any term of years or for life, or (2) by death or imprisonment for any term of years or for life, if the conduct constitutes an attempt to kill the President of the United States and results in bodily injury to the President or otherwise comes dangerously close to causing the death of the President.".

SEC. 13. The second to the last paragraph of section 1992 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the section.

SEC. 14. Section 2031 of title 18 of the United States Code is amended by deleting the words "death, or".

SEC. 15. Section 2113(e) of title 18 of the United States Code is amended by striking the words "or punished by death if the ver-

dict of the jury shall so direct" and inserting in lieu thereof the words "or if death results shall be punished by death or life imprisonment".

SEC. 16. Section 903 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1473), is amended by striking subsection (c).

SEC. 17. The provisions of chapter 228 of title 18 of the United States Code, as added by this Act, shall not apply to prosecutions under the Uniform Code of Military Justice (10 U.S.C. 801).

"SECTION 18. Subsection (a) of Section 1203 of title 18 of the United States Code is amended by striking '.' and inserting in lieu thereof: 'and, if the death of any person results, shall be punished by death or life imprisonment.'."

SEC. 19. Amend Section 408 of the Controlled Substances Act (21 U.S.C. 848) by adding the following:

"If an individual intentionally engages in conduct during the course of a continuing criminal enterprise and thereby knowingly causes the death of any other individual, the individual so engaging shall be subject to the death penalty in accordance with this section.".

DOLE (AND OTHERS) AMENDMENT NO. 3379

(Ordered to lie on the table.)

Mr. DOLE (for himself, Mr. THURMOND, Mr. HATCH, Mr. MATTINGLY, Mr. GRAMM, and Mr. DENTON) submitted an amendment to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra; as follows:

On page 167 of the amendment, line 1, strike "all through", page 177, line 8 and insert in lieu thereof the following:

That title 18 of the United States Code is amended—

(a) by adding the following new chapter after chapter 227:

"CHAPTER 228—DEATH SENTENCE

"Sec.
"3591. Sentence of death.
"3592. Factors to be considered in determining whether a sentence of death is justified.
"3593. Special hearing to determine whether a sentence of death is justified.
"3594. Imposition of a sentence of death.
"3595. Review of a sentence of death.
"3596. Implementation of a sentence of death.
"3597. Use of state facilities.

"§ 3591. Sentence of death

"A defendant who has been found guilty of—

"(a) an offense described in section 794 or section 2381 of this title;

"(b) an offense described in section 1751(c) of this title, if the offense, as determined beyond a reasonable doubt at the hearing under section 3593, constitutes an attempt to kill the President of the United States and results in bodily injury to the President or comes dangerously close to causing the death of the President; or

"(c) any other offense for which a sentence of death is provided, if the defendant, as determined beyond a reasonable doubt at the hearing under section 3593—

"(1) intentionally killed the victim;

"(2) intentionally inflicted serious bodily injury that resulted in the death of the victim; or

"(3) intentionally participated in an act, contemplating that the life of a person would be taken or intending that lethal force would be used in connection with a person, other than one of the participants in the offense, and the victim died as a direct result of the act;

shall be sentenced to death if, after consideration of the factors set forth in section 3592 in the course of a hearing held pursuant to section 3593, it is determined that imposition of a sentence of death is justified; provided that no person may be sentenced to death who was less than eighteen years of age at the time of the offense.

"§ 3592. Factors to be considered in determining whether a sentence of death is justified

"(a) MITIGATING FACTORS.—In determining whether a sentence of death is justified for any offense, the jury, or if there is no jury, the court, shall consider each of the following mitigating factors and determine which, if any, exist:

"(1) the defendant's mental capacity was significantly impaired, although the impairment was not such as to constitute a defense to prosecution;

"(2) the defendant was under unusual and substantial duress, although not such duress as would constitute a defense to prosecution; and

"(3) the defendant was an accomplice whose participation in the offense was relatively minor.

The jury, or if there is no jury, the court, shall consider whether any other mitigating factor exists.

"(b) AGGRAVATING FACTORS FOR ESPIONAGE AND TREASON.—In determining whether a sentence of death is justified for an offense described in section 3591(a), the jury, or if there is no jury, the court, shall consider each of the following aggravating factors and determine which, if any, exist:

"(1) the defendant has previously been convicted of another offense involving espionage or treason for which either a sentence of life imprisonment or death was authorized by statute;

"(2) in the commission of the offense the defendant knowingly created a grave risk of substantial danger to the national security; and

"(3) in the commission of the offense the defendant knowingly created a grave risk of death to another person.

The jury, or if there is no jury, the court, may consider whether any other aggravating factor exists.

"(c) AGGRAVATING FACTORS FOR HOMICIDE AND FOR ATTEMPTED MURDER OF THE PRESIDENT.—In determining whether a sentence of death is justified for an offense described in section 3591 (b) or (c), the jury, or if there is no jury, the court, shall consider each of the following aggravating factors and determine which, if any, exist:

"(1) the death, or injury resulting in death, occurred during the commission or attempted commission of, or during the immediate flight from the commission of, an offense under section 751 (prisoners in custody of institution or officer), section 794 (gathering or delivering defense information to aid foreign government), section 844(d) (transportation of explosives in interstate commerce for certain purposes), section 844(f) (destruction of Government property in interstate commerce by explosives), section 1118 (prisoners serving life term), section 1201 (kidnaping), or section 2381 (treason) of this title, or section 902 (i) or (n) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1472 (i) or (n)) (aircraft piracy);

"(2) the defendant has previously been convicted of another Federal or State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute;

"(3) the defendant has previously been convicted of two or more Federal or State offenses, punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury or death upon another person;

"(4) the defendant, in the commission of the offense, knowingly created a grave risk of death to one or more persons in addition to the victim of the offense;

"(5) the defendant committed the offense in an especially heinous, cruel, or depraved manner;

"(6) the defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value;

"(7) the defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value;

"(8) the defendant committed the offense after substantial planning and premeditation to cause the death of a person or commit an act of terrorism; or

"(9) the defendant committed the offense against—

"(A) the President of the United States, the President-elect, the Vice President, the Vice-President-elect, the Vice-President-designate, or, if there is no Vice President, the officer next in order of succession to the office of the President of the United States, or any person who is acting as President under the Constitution and laws of the United States;

"(B) a chief of state, head of government, or the political equivalent, of a foreign nation;

"(C) a foreign official listed in section 1116(b)(3)(A) of this title, if he is in the United States on official business; or

"(D) a Federal public servant who is a judge, a law enforcement officer, or an employee of a United States penal or correctional institution—

"(i) while he is engaged in the performance of his official duties;

"(ii) because of the performance of his official duties; or

"(iii) because of his status as a public servant.

For purposes of this subparagraph, a 'law enforcement officer' is a public servant authorized by law or by a Government agency or Congress to conduct or engage in the prevention, investigation, or prosecution of an offense.

"(10) the violation of Section 848 of Title 21 of the United States Code in relation to which the conduct described in Section 848(c) occurred was a violation of sections 405, 405A, or 405B of the Controlled Substances Act.

The jury, or if there is no jury, the court, may consider whether any other aggravating factor exists.

"§ 3593. Special hearing to determine whether a sentence of death is justified

"(a) NOTICE BY THE GOVERNMENT.—If, in a case involving an offense described in section 3591, the attorney for the government believes that the circumstances of the of-

fense are such that a sentence of death is justified under this chapter, he shall, a reasonable time before the trial, or before acceptance by the court of a plea of guilty, or at such time thereafter as the court may permit upon a showing of good cause, sign and file with the court, and serve on the defendant, a notice—

"(1) stating that the government believes that the circumstances of the offense are such that, if the defendant is convicted, a sentence of death is justified under this chapter; and

"(2) setting forth the aggravating factor or factors that the government, if the defendant is convicted, proposes to prove as justifying a sentence of death.

The court may permit the attorney for the government to amend the notice upon a showing of good cause.

"(b) HEARING BEFORE A COURT OR JURY.—If the attorney for the government has filed a notice as required under subsection (a) and the defendant is found guilty of an offense described in section 3591, the judge who presided at the trial or before whom the guilty plea was entered, or an other judge if that is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. Prior to such a hearing, no presentence report shall prepared by the United States Probation Service, notwithstanding the provisions of Rule 32(e) of the Federal Rules of Criminal Procedure. The hearing shall be conducted—

"(1) before the jury the determined the defendant's guilt;

"(2) before a jury impaneled for the purpose of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury that determined the defendant's guilt was discharged for good cause; or

"(D) after initial imposition of a sentence under this section, reconsideration of the sentence under this section is necessary; or

"(3) before the court alone, upon the motion of the defendant and with the approval of the attorney for the government.

A jury implaneled pursuant to paragraph (2) shall consist of twelve members, unless, at any time before the conclusion of the hearing, the parties stipulate, with the approval of the court, that it shall consist of a lesser number.

"(c) PROOF OF MITIGATING AND AGGRAVATING FACTORS.—At the hearing, information may be presented as to any matter relevant to the sentence, including any mitigating or aggravating factor permitted or required to be considered under section 3592. Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to a mitigating or aggravating factor may be presented by either attorney for the government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is substantially outweighed by the danger of creating unfair prejudice, confusing the issues, or misleading the jury. The attorney for the government and the defendant shall be permitted to rebut any information received at the hearing, and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any aggravating or mitigation factor, and as to the appropriateness in the case of imposing a sentence of death. The attorney for the government shall open the argument. The defendant shall be permitted to reply. The attorney for the government shall then be permitted to reply in rebuttal. The burden of establishing the existence of any aggravating factor is on the government, and is not satisfied unless the existence of such a factor is established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless the existence of such a factor is established by a preponderance of the information.

"(d) RETURN OF SPECIAL FINDINGS.—The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return a special finding as to each mitigating and aggravating factor, concerning which information is presented at the hearing, required to be considered under section 3592. The jury must find the existence of a mitigating or aggravating factor by a unanimous vote, although it is unnecessary that there be a unanimous vote on any specific mitigating or aggravating factor if a majority of the jury finds the existence of such a specific factor.

"(e) RETURN OF A FINDING CONCERNING A SENTENCE OF DEATH.—If, in the case of—

"(1) an offense described in section 3591(a), an aggravating factor required to be considered under section 3592(b) is found to exist; or

"(2) an offense described in section 3591 (b) or (c), an aggravating factor required to be considered under section 3592(c) is found to exist;

the jury, or if there is no jury, the court, shall then consider whether all the aggravating factors found to exist sufficiently outweigh all the mitigating factors found to exist to justify a sentence of death, or, in the absence of a mitigating factor, whether the aggravating factors alone are sufficient to justify a sentence of death. Based upon this consideration, the jury by unanimous vote, or if there is no jury, the court, shall return a finding as to whether a sentence of death is justified.

"(f) SPECIAL PRECAUTION TO ASSURE AGAINST DISCRIMINATION.—In a hearing held before a jury, the court, prior to the return of a finding under subsection (e), shall instruct the jury that, in considering whether a sentence of death is justified, it shall not consider the race, color, national origin, creed, or sex of the defendant. The jury, upon return of a finding under subsection (e), shall also return to the court a certificate, signed by each juror, that consideration of the race, color, national origin, creed, or sex of the defendant was not involved in reaching the juror's individual decision.

"§ 3594. Imposition of a sentence of death

"Upon a finding under section 3593(e) that a sentence of death is justified, the court shall sentence the defendant to death. Upon a finding under section 3593(e) that a sentence of death is not justified, or under section 3593(d) that no aggravating factor required to be found exists, the court shall impose any sentence other than death that is authorized by law. Notwithstanding any other provision of law, if the maximum term of imprisonment for the offense is life imprisonment, the court may impose a sentence of life imprisonment without parole.

"§ 3595. Review of a sentence of death

"(a) APPEAL.—In a case in which a sentence of death is imposed, the sentence shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal must be filed within the time specified for the filing of a notice of appeal. An appeal under this section may be consolidated with an appeal of the judgment of conviction and shall have priority over all other cases.

"(b) Review.—The court of appeals shall review the entire record in the case, including—

"(1) the evidence submitted during the trial;

"(2) the information submitted during the sentencing hearing;

"(3) the procedures employed in the sentencing hearing; and

"(4) the special findings returned under section

3593(d).

"(c) DECISION AND DISPOSITION.—

"(1) If the court of appeals determines that—

"(A) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; and

"(B) the information supports the special finding of the existence of an aggravating factor required to be considered under section 3592;

it shall affirm the sentence.

"(2) In any other case, the court of appeals shall remand the case for reconsideration under section 3593.

"(3) The court of appeals shall state in writing the reasons for its disposition of an appeal of a sentence of death under this section.

"§ 3596. Implementation of a sentence of death

"A person who has been sentenced to death pursuant to the provisions of this chapter shall be committed to the custody of the Attorney General until exhaustion of the procedures for appeal of the judgment of conviction and for review of the sentence. When the sentence is to be implemented, the Attorney General shall release the person sentenced to death to the custody of a United States marshal, who shall supervise implementation of the sentence in the manner prescribed by the law of the State in which the sentence is imposed. If the law of such State does not provide for implementation of a sentence of death, the court shall designate another State, the law of which does so provide, and the sentence shall be implemented in the latter State in the manner prescribed by such law. A sentence of death shall not be carried out upon a woman while she is pregnant.

"§ 3597. Use of State facilities

"A United States marshal charged with supervising the implementation of a sentence of death may use appropriate State or local facilities for the purpose, may use the services of an appropriate State or local official or of a person such an official employs for the purpose, and shall pay the costs thereof in an amount approved by the Attorney General.";

(b) by repealing sections 3566 and 3567;

(c) in the chapter analysis of part II, by adding the following new item after the item relating to chapter 227:

"228. Death sentence ..... 3591";

and

(d) in the section analysis of chapter 227, by amending the items relating to sections 3566 and 3567 to read as follows:

"3566. Repealed.

"3567. Repealed.".

SEC. 2. Section 34 of title 18 of the United States Code is amended by changing the

comma after the words "imprisonment for life" to a period and deleting the remainder of the section.

SEC. 3. Section 794(a) of title 18 of the United States Code is amended by changing the period at the end of the section to a comma and by adding immediately thereafter the words "except that the sentence of death shall not be imposed unless the jury or, if there is no jury, the court, further finds that the offense directly concerned nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large-scale attack; war plans; communications intelligence or cryptographic information; or any other major weapons system or major element of defense strategy.".

SEC. 4. Section 844(d) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 5. Section 844(f) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 6. Section 844(i) of title 18 of the United States Code is amended by striking the words "as provided in section 34 of this title".

SEC. 7. The second paragraph of section 1111(b) of title 18 of the United States Code is amended to read as follows:

"Whoever is guilty of murder in the first degree shall be punished by death or by imprisonment for life;".

SEC. 8. Section 1116(a) of title 18 of the United States Code is amended by striking the words "any such person who is found guilty of murder in the first degree shall be sentenced to imprisonment for life, and".

SEC. 9. Chapter 51 of title 18 of the United States Code is amended—

(a) by adding at the end thereof the following:

"§ 1118. Murder by a Federal prisoner

"(a) Whoever, while confined in a Federal correctional institution under a sentence for a term of life imprisonment, murders another shall be punished by death or by life imprisonment without the possibility of parole.

"(b) For the purposes of this section—

"(1) 'Federal correctional institution' means any Federal prison, Federal correctional facility, Federal community program center, or Federal halfway house;

"(2) 'term of life imprisonment' means a sentence for the term of natural life, a sentence commuted to natural life, an indeterminate term of a minimum of at least fifteen years and a maximum of life, or an unexecuted sentence of death;

"(3) 'murders' means committing first degree or second degree murder as defined by section 1111 of this title."; and

(b) by amending the section analysis to add:

"1118. Murder by a Federal prisoner.".

SEC. 10. Section 1201 of title 18 of the United States Code is amended by inserting after the words "or for life" in subsection (a) the words "and, if the death of any person results, shall be punished by death or life imprisonment".

SEC. 11. The last paragraph of section 1716 of title 18 of the United States Code is amended by changing the comma after the word "imprisonment for life" to a period and deleting the remainder of the paragraph.

SEC. 12. Subsection (c) of section 1751 of title 18 of the United States Code is amended to read as follows:

"(c) Whoever attempts to kill or kidnap any individual designated in subection (a) of this section shall be punished (1) by imprisonment for any term of years or for life, or (2) by death or imprisonment for any term of years or for life, if the conduct constitutes an attempt to kill the President of the United States and results in bodily injury to the President or otherwise comes dangerously close to causing the death of the President.".

SEC. 13. The second to the last paragraph of section 1992 of title 18 of the United States Code is amended by changing the comma after the words "imprisonment for life" to a period and deleting the remainder of the section.

SEC. 14. Section 2031 of title 18 of the United States Code is amended by deleting the words "death, or".

SEC. 15. Section 2113(e) of title 18 of the United States Code is amended by striking the words "or punished by death if the verdict of the jury shall so direct" and inserting in lieu thereof the words "or if death results shall be punished by death or life imprisonment".

SEC. 16. Section 903 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1743), is amended by striking subsection (c).

SEC. 17. The provisions of chapter 228 of title 18 of the United States Code, as added by this Act, shall not apply to prosecutions under the Uniform Code of Military Justice (10 U.S.C. 801).

SEC. 18. Subsection (a) of Section 1203 of title 18 of the United States Code is amended by striking "." and inserting in lieu thereof: "and, if the death of any person results, shall be punished by death or life imprisonment.".

SEC. 19. Amend Section 408 of the Controlled Substances Act (21 U.S.C. 848) by adding the following:

"If an individual intentionally engages in conduct during the course of a continuing criminal enterprise and thereby knowingly causes the death of any other individual, the individual so engaging shall be subject to the death penalty in accordance with this section.".

MATHIAS AMENDMENT NOS. 3380 THROUGH 3383

(Ordered to lie on the table.)

Mr. MATHIAS submitted four amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3380

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

In subsection (p)(3), subparagraph (A), after "factor", insert: "or error of law or abuse of discretion".

AMENDMENT No. 3381

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

In subsection (p)(2), strike the period, and add "regardless of whether any alleged error therein was noted at trial."

AMENDMENT No. 3382

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

In subsection (p)(1), strike the last sentence.

AMENDMENT No. 3383

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

In subsection (p)(1), strike "subject to review," and insert "reviewed", and strike the second sentence.

SIMON AMENDMENT NOS. 3384 and 3385

(Ordered to lie on the table.)

Mr. SIMON submitted two amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3384

On page 177 between lines 4 and 5 insert the following:

"For the purposes of this act, the sentence of death shall not be implemented by hanging. In the event that hanging is the method used in the State in which the sentence is imposed, the court shall designate another State, the law of which does not use hanging."

AMENDMENT No. 3385

On page 177 between lines 4 and 5 insert the following:

"For the purposes of this act, the death sentence shall not be implemented by firing squad. In the event that firing squad is the only method used in the State in which the sentence is imposed, the court shall designate another State, the law of which does not use a firing squad."

MATHIAS AMENDMENT NO. 3386

(Ordered to lie on the table.)

Mr. MATHIAS submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

Subsection (m) of section 408 of the Controlled Substances Act, as added by section 1951(b) of the Senate amendment as modified, is amended by inserting "the defendant knew" after "while" in the first sentence in paragraph (10).

DOLE AMENDMENT NOS. 3387 THROUGH 3396

(Ordered to lie on the table.)

Mr. DOLE submitted 10 amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3387

Strike out section 4111(a) and insert in lieu thereof the following:

(a) For the purpose of carrying out this subtitle, there are authorized to be appropriated $100,000,000 for fiscal year 1987.

AMENDMENT No. 3388

Strike out section 4219(a)(2) and 4216(b)(2).

AMENDMENT No. 3389

Strike out section 4229(c).

AMENDMENT No. 3390

Strike out section 4301(c) and insert in lieu thereof the following: "(c) There is to be authorized to be appropriated to carry out programs under Part C of Title I of this Act $10,000,000 for the fiscal year 1987.

AMENDMENT No. 3391

Strike out section 4227(b).

AMENDMENT No. 3392

Strike out section 4218(b).

AMENDMENT No. 3393

Strike out section 4023.

AMENDMENT No. 3394

Sec. . Subsection 505(c) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(c)) is amended by adding at the end thereof the following new paragraph:

(4) For the purposes of this section, approval means written notification to an applicant that a new drug meets all prerequisites under this section for immediate introduction into interstate commerce for commercial sale. A notification authorizing the introduction into interstate commerce for commercial sale only after further conditions under this section are met does not constitute approval, until such time as all conditions are satisfied. For the purpose of this subsection, a requirement that the applicant submit prior to the marketing of the new drug labeling for a new drug that conforms with the terms of a notification is a further condition the satisfaction of which occurs only when such labeling is submitted by the applicant and approved by the Secretary.

AMENDMENT No. 3395

Section 1552(c)(1)(C) of the amendment is amended by striking the proposed paragraph (6) and inserting in lieu thereof the following:

"(6) There are authorized to be appropriated $230,000,000 for fiscal year 1987, $230,000,000 for fiscal year 1988, and $230,000,000 for fiscal year 1989, to carry out the programs under part M of this title."

Strike out subsection (d) of section 3053 of the amendment as modified.

Section 3401(c)(2) of the amendment is amended in the quoted matter by striking "such aircraff" and inserting "such aircraft".

After the heading for subtitle H of title III, insert the following:

SEC. 3421. ADDITIONAL FUNDS FOR THE DEPARTMENT OF JUSTICE.

There are authorized to be appropriated to the Department of Justice for fiscal year 1987, in addition to any other amounts authorized to be appropriated to the Department for such fiscal year, $7,000,000 for helicopters with forward looking infrared radiation detection devices for drug interdiction operations in Hawaii.

SUBTITLE I—FEDERAL COMMUNICATIONS COMMISSION

Section 3451 of the amendment is amended—

(1) in the first sentence by striking "shall revoke any license" and inserting "may revoke any private operator's license"; and

(2) in the second sentence by striking "shall" and inserting "may".

After section 3451, add the following:

TITLE IV—DEMAND REDUCTION

Section 12003(4) of the amendment is amended by striking "self-proposed" and inserting "self-propelled".

Section 12006(2) of the amendment is amended by striking "section 12005" and inserting "section 12004".

Section 12007 of the amendment is amended—

(1) in subsection (a)(1) by striking "section 6 of this Act" and inserting "section 12006 of this title";

(2) by striking paragraph (8) of subsection (a);

(3) in subsection (b)(1) by striking "Act" and inserting "title"; and

(4) in subsection (b)(5)(D) by striking "section 1 of this Act" and inserting "section 12006 of this title".

Section 12014 of the amendment is amended by inserting "and" after the semicolon in clause (2).

Strike out title 13 of the amendment.

In the table of contents of the amendment, strike the items for title 9 and title 13.

AMENDMENT No. 3396

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by Subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows.

On page 173, strike line 23 and insert in lieu thereof the following:

"(2) The defendant has previously been convicted of another"

SIMON AMENDMENT NOS. 3397 AND 3398

(Ordered to lie on the table.)

Mr. SIMON submitted two amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill, H.R. 5484, supra, as follows:

AMENDMENT No. 3397

On page 177 of the amendment between lines 4 and 5 insert the following:

"For the purposes of this act, the death sentence shall not be implemented by firing squad. Authority shall not be available for execution by firing squad until the state provides for transfer of prisoners so sentenced to a jurisdiction where alternative execution methods are available.

AMENDMENT No. 3398

On page 177 of the amendment between lines 4 and 5 insert the following:

"For the purposes of this act, the sentence of death shall not be implemented by hanging. Authority shall not be available for execution by hanging until the state authority provides for transfer of prisoners so sentenced to a jurisdiction where alternative execution methods are available.

DOLE (AND DURENBERGER) AMENDMENT NO. 3399

(Ordered to lie on the table.)

Mr. DOLE (for himself and Mr. DURENBERGER) submitted an amendment intended to be proposed by them to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484 supra; as follows:

Delete section 2016 of the amendment.

Mr. DOLE. Mr. President, the effect of my amendment would be to delete section 2016 of the Senate amendment. This section pertains to intelligence support to combating the drug problem. In particular, this section would have directed the Director of Central Intelligence to make support to anti-drug efforts a "Level One" priority in his national intelligence strategy. This section would also have required the DCI to improve the collection of drug-related intelligence to the level necessary to meet the reporting requirements of section 481(e) of the Foreign Assistance Act of 1961, which requires drug production data for each country which is a major producer of illicit drugs.

In introducing this amendment, Mr. President, I would like to engage my colleague from Minnesota, Senator DURENBERGER, the chairman of the Select Committee on Intelligence, in a short colloquy.

First, Mr. President, I would ask the Senator from Minnesota to explain the function of the national intelligence strategy.

Mr. DURENBERGER. I am happy to respond to the Senator from Kansas.

The national intelligence strategy is a document the Director of Central Intelligence provides to the Intelligence Committees at the time he presents his annual budget request. The strategy outlines the DCI's vision for U.S. intelligence. That is, in the strategy the DCI lists the missions that he has assumed for the intelligence community, the priority he assigns to each of these missions, and his plan for carrying them out.

Mr. DOLE. I would assume that gathering intelligence that is necessary to combat the importation of illicit drugs is one of these missions. Is that correct?

Mr. DURENBERGER. Yes; indeed it is. Bill Casey specifically identified combating the importation of narcotics as one of his chief missions.

Mr. DOLE. As chairman of the Select Committee on Intelligence, what is your view of the priority assigned to this mission?

Mr. DURENBERGER. The DCI has already assigned the systems necessary to provide the intelligence needed for combating the drug trade his highest priority. Of course, we cannot go

into the details in open session, but this information can be made available to the Members

Generally, though, the select committee has preferred not to give the Director of Central Intelligence specific instructions on how to task national intelligence systems. The DCI is better equipped to evaluate and staff the details of these operations, subject to oversight by the intelligence committees and direction through their classified reports on the annual Intelligence Authorization Act.

Mr. DOLE. This would not, I assume, preclude the select committee from seeing to it that the provisions of section 481(e) of the Foreign Assistance Act are carried out. Am I correct?

Mr. DURENBERGER. Yes. The select committee fully expects the DCI to meet these requirements, and that, if these requirements are not being met now, Mr. Casey will take the necessary steps to ensure that they are in the future. We believe, therefore, that a specific directive is not needed at this time.

Mr. DOLE. I would thank my colleague from Minnesota for that clarification and trust that the select committee will monitor this situation in the future.

Mr. DURENBERGER. I am certain the committee will actively oversee this area of intelligence activities in the future.

Mr. DOLE. Thank you.

DANFORTH AMENDMENT NO. 3400

(Ordered to lie on the table.)

Mr. DANFORTH submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

In section 12004(a) of the amendment:

(1) strike "and" at the end of paragraph (9);

(2) strike the period at the end of paragraph (10) and insert in lieu thereof a semicolon; and

(3) add immediately after paragraph (10) the following:

(11) establish requirements for the disqualification of any person operating a commercial motor vehicle for a period of not less than 60 days who, in a 3-year period, is found to have committed two serious traffic violations, involving a commercial motor vehicle operated by such person; and

(12) establish requirements for the disqualification of any person operating a commercial motor vehicle for a period of not less than 120 days who, in a 3-year period, is found to have committed three serious traffic violations involving a commercial motor vehicle operated by such person.

DOLE AMENDMENT NO. 3401

(Ordered to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

Strike out subtitle U of title I of the amendment.

INTEREST ON OVERDUE FEDERAL PAYMENTS

ROTH AMENDMENT NO. 3402

Mr. CHAFEE (for Mr. ROTH) proposed an amendment to the bill (S. 2479) to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes, as follows:

On page 12, line 6, insert ", except section 3905 of this title," after "chapter".

On page 12, line 9, strike out "as" and all that follows through "manual" on line 10.

On page 12, line 25, strike out "1988" and insert in lieu thereof "1989".

On page 13, line 14, strike out "and".

On page 13, line 16, strike out "15" and all that follows through line 17, and insert in lieu thereof "10 days after the date on which such payment is made; and".

On page 13, between lines 17 and 18, insert the following:

"(D) makes a written demand, not later that 40 days after the date on which such payment is made, that the agency pay such a penalty,

On page 16, line 8, strike out "agency;" and insert in lieu thereof "agency for work performed by the subcontractor under that contract;".

AUTHORIZATION OF APPROPRIATIONS FOR CERTAIN FISHERIES ACTIVITIES

DANFORTH AMENDMENT NO. 3403

Mr. CHAFEE (for Mr. DANFORTH) proposed an amendment to the amendments of the House to the bill (S. 991) to provide authorization of appropriations for certain fisheries activities as follows:

In lieu of the matter proposed to be inserted by the House amendment to the text of the bill, insert:

TITLE I—FISHERIES CONSERVATION AND MANAGEMENT

SEC. 101. UNITED STATES RIGHTS AND AUTHORITY REGARDING FISH AND FISHERY RESOURCES WITHIN THE EXCLUSIVE ECONOMIC ZONE.

(a) DEFINITION OF EXCLUSIVE ECONOMIC ZONE.—Section 3 of the Magnuson Fishery Conservation and Management Act (hereinafter in this title referred to as the "Act") (16 U.S.C 1802) is amended—

(1) by striking out paragraph (8);

(2) by redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively; and

(3) by inserting immediately after paragraph (5) the following new paragraph:

"(6) The term 'exclusive economic zone' means the zone established by Proclamation Numbered 5030, dated March 10, 1983. For purposes of applying this Act, the inner boundary of that zone is a line coterminous with the seaward boundary of each of the coastal States.".

(b) AUTHORITY REGARDING EXCLUSIVE ECONOMIC ZONE.—Title I of the Act (16 U.S.C. 1811-1813) is amended to read as follows:

"TITLE I—UNITED STATES RIGHTS AND AUTHORITY REGARDING FISH AND FISHERY RESOURCES

"SEC. 101. UNITED STATES SOVEREIGN RIGHTS TO FISH AND FISHERY MANAGEMENT AUTHORITY.

"(a) IN THE EXCLUSIVE ECONOMIC ZONE.—Except as provided in section 102, the United States claims, and will exercise in the manner provided for in this Act, sovereign rights and exclusive fishery management authority over all fish, and all Continental Shelf fishery resources, within the exclusive economic zone.

"(b) BEYOND THE EXCLUSIVE ECONOMIC ZONE.—The United States claims, and will exercise in the manner provided for in this Act, exclusive fishery management authority over the following:

"(1) All anadromous species throughout the migratory range of each such species beyond the exclusive economic zone; except that that management authority does not extend to any such species during the time they are found within any foreign nation's territorial sea or exclusive economic zone (or the equivalent), to the extent that that sea or zone is recognized by the United States.

"(2) All Continental Shelf fishery resources beyond the exclusive economic zone.

"SEC. 102. EXCLUSION FOR HIGHLY MIGRATORY SPECIES.

"The sovereign rights and exclusive fishery management authority asserted by the United States under section 101 over fish do not include, and may not be construed to extend to, highly migratory species of fish.".

(c) CONFORMING AMENDMENTS.—The Act is amended—

(1) by amending section 2—

(A) by amending paragraph (1) of subsection (b) to read as follows:

"(1) to take immediate action to conserve and manage the fishery resources found off the coasts of the United States, and the anadromous species and Continental Shelf fishery resources of the United States, by exercising (A) sovereign rights for the purposes of exploring, exploiting, conserving, and managing all fish except highly migratory species, within the exclusive economic zone established by Presidential Proclamation 5030, dated March 10, 1983, and (B) exclusive fishery management authority beyond the exclusive economic zone over such anadromous species and Continental Shelf fishery resources;"; and

(B) by amending paragraph (5) of subsection (c) to read as follows:

"(5) to support and encourage active United States efforts to obtain internationally acceptable agreements which provide for effective conservation and management of fishery resources.";

(2) by striking out "fishery conservation zone" each place it appears therein and inserting "exclusive economic zone"; and

(3) by amending the entry for title I in the table of contents to read as follows:

"TITLE I—UNITED STATES RIGHTS AND AUTHORITY REGARDING FISH AND FISHERY RESOURCES

"Sec. 101. United States sovereign rights to fish and fishery management authority.

"Sec. 102. Exclusion for highly migratory species.".

SEC. 102. FOREIGN FISHING PERMITS.

Section 204(b) of the Act (16 U.S.C. 1824(b)) is amended—

(1) by adding at the end of paragraph (1) the following new sentence: "No permit issued under this section may be valid for longer than a year; and section 558(c) of title 5, United States Code, does not apply to the renewal of any such permit.";

(2) by striking out ", upon its request" in paragraph (4)(C);

(3) by amending paragraph (6) by inserting ", or he may disapprove all or any portion of the application" immediately before the period at the end of subparagraph (A); and

(4) by amending paragraph (12) to read as follows:

"(12) SANCTIONS.—(A) If any foreign fishing vessel has been used in the commission of any act prohibited by section 307, or if the owner or operator of the vessel has committed such an act, the Secretary may, or if any civil penalty imposed under section 308 or any criminal fine imposed under section 309 has not been paid and is overdue, the Secretary shall—

"(i) revoke such permit, if any, issued for the vessel under this subsection, with or without prejudice to the right of the foreign nation involved to obtain a permit for such vessel in any subsequent year;

"(ii) suspend such permit for the period of time deemed appropriate;

"(iii) deny a permit under this subsection to the vessel; or

"(iv) impose additional conditions and restrictions on the approved application of the foreign nation involved and on any permit issued under that application.

Any permit which is suspended under this subparagraph for nonpayment of a civil penalty shall be reinstated by the Secretary upon the payment of such civil penalty together with interest thereon at the prevailing rate.

"(B) The Secretary may temporarily deny or suspend the permit of any foreign fishing vessel pending the outcome of any administrative proceeding respecting a violation of section 307 of this Act if the Secretary determines that—

"(i) based upon information available to the Secretary, there are reasonable grounds to believe that the vessel has been used in the commission of such violation;

"(ii) immediate suspension of fishing privileges would serve the purposes of this Act; and

"(iii) either—

"(I) the violation presents a serious threat to the public interest,

"(II) the violation presents a serious threat to the achievement of any purpose or policy of this Act, or

"(III) the owner or operator of the vessel has been involved in a prior violation of this Act.

In applying this subparagraph—

"(I) the Secretary must notify the vessel owner of the proposed denial or suspension and give the owner a reasonable opportunity, not longer than 10 days from service of notice, to respond in writing or otherwise;

"(II) if a permit is denied or suspended under this subparagraph, any administrative proceeding respecting the violation at issue must be held as promptly as possible; and

"(III) if another permit application is pending for such vessel on or after the date of the violation, the Secretary need not act on that application before deciding whether or not to deny or suspend temporarily a permit under this subparagraph.".

SEC. 103. HEALTH AND SAFETY STANDARDS FOR FOREIGN FISHING VESSELS.

(a) STANDARDS FOR UNITED STATES OBSERVERS.—Subsection (i) of section 201 of the Act (19 U.S.C 1821(i)) is amended—

(1) by inserting "(A)" after "(1)" in paragraph (1);

(2) by inserting at the end of paragraph (1) the following new subparagraph:

"(B) The Secretary shall by regulation prescribe minimum health and safety standards that shall be maintained aboard each foreign fishing vessel with regard to the facilities provided for the quartering of, and the carrying out of observer functions by, United States observers."; and

(3) by amending subparagraph (B) of paragraph (2) to read as follows:

"(B) the time during which a foreign fishing vessel will engage in fishing within the exclusive economic zone will be of such short duration that the placing of a United States observer aboard the vessel would be impractical; or".

(b) COMPLIANCE WITH VESSEL SAFETY STANDARDS OF THE FLAG COUNTRY.—Paragraph (3) of section 204(b) of the Act (16 U.S.C. 1824(b)(3)) is amended—

(1) by striking "and" at the end of subparagraph (E);

(2) by inserting "and" after the semicolon at the end of subparagraph (F); and

(3) by adding after subparagraph (F) the following new subparagraph:

"(G) all applicable vessel safety standards imposed by the foreign country, and shall include written certification that the vessel is in compliance with those standards;".

SEC. 104. REGIONAL FISHERY MANAGEMENT COUNCILS.

(a) VOTING MEMBERS.—(1) Subsection (b) of section 302 of this Act (16 U.S.C. 1852(b)) is amended as follows:

(A) Paragraph (2)(A) is amended to read as follows:

"(2)(A) The members of each Council required to be appointed by the Secretary must be individuals who are knowledgeable and experienced with regard to the conservation and management, or the recreational or commercial harvest, of the fishery resources of the geographical area concerned. The Secretary, in making appointments under this section, shall, to the extent practicable, ensure a fair apportionment, on a rotating or other basis, of the active participants (or their representatives) involved in the fisheries under Council jurisdiction.".

(B) Paragraph (2)(B) is amended—

(i) by adding after the first sentence thereof the following new sentence: "A Governor may not submit the names of individuals to the Secretary for appointment unless the Governor has, to the extent practicable, first consulted with representatives of the commercial and recreational fishing interests of the state regarding those individuals.";

(ii) by striking out "knowledge or experience" in the third sentence thereof and inserting "knowledge and experience"; and

(iii) by adding at the end thereof the following new sentence: "An individual is not eligible for appointment by the Secretary until that individual complies with the applicable financial disclosure requirements under subsection (k).".

(C) Paragraph (3) is amended to read as follows:

"(3) Each voting member appointed to a Council by the Secretary in accordance with subsection (b)(2) shall serve for a term of 3 years; except that the Secretary may designate a shorter term if necessary to provide for balanced expiration to terms of office.".

(2) The amendments made by paragraph (1) shall apply with respect to voting members of regional fishery management councils who are appointed, and to individuals who are nominated for appointment as voting members, on or after the date of the enactment of this Act.

(b) COUNCIL COMMENT ON FEDERAL AND STATE ACTION AFFECTING HABITAT.—Section 302 is further amended—

(1) by redesignating subsection (i) as subsection (j); and

(2) by adding after subsection (h) the following new subsection:

"(i) FISHERY HABITAT CONCERNS.—Each Council may comment on, or make recommendations concerning, any activity undertaken, or proposed to be undertaken, by any State or Federal agency that, in the view of the Council, may affect the habitat of a fishery resource under its jurisdiction. Within 45 days after receiving such a comment or recommendation from a Council, a Federal agency must provide a detailed response, in writing, to the Council regarding the matter.".

(c) CLOSURE OF MEETINGS.—Paragraph (4) of section 302(j) of the Act (as redesignated by subsection (b)) is amended by striking out "; except that" and all that follows thereafter and inserting "; except that such procedures, in the case of statistics submitted to the Council by a State or by the Secretary under section 303(d), must be consistent with the laws and regulations of that State, or with the procedures of the Secretary, as the case may be, concerning the confidentiality of the statistics.".

(d) COMMITTEES AND PANELS.—Subsection (j) (as redesignated by subsection (b)) of section 302 of the Act is further amended by adding at the end thereof the following new paragraph:

"(5) Each Council shall specify those procedures that are necessary or appropriate to ensure that the committees and advisory panels established under subsection (g) are involved, on a continuing basis, in the development and amendment of fishery management plans.".

(e) DISCLOSURE OF FINANCIAL INTEREST.—(1) Section 302 of the Act is further amended by adding at the end thereof the following new subsection:

"(k) DISCLOSURE OF FINANCIAL INTEREST.—(1) For purposes of this subsection, the term "affected individual" means an individual who—

"(A) is nominated by the Governor of a State for appointment as a voting member of a Council in accordance with subsection (b)(2);

"(B) is a voting member of a Council appointed under subsection (b)(2); or

"(C) is the executive director of a Council.

"(2) Each affected individual must disclose any financial interest held by—

"(A) that individual;

"(B) the spouse, minor child, or partner of that individual; and

"(C) any organization (other than the Council) in which that individual is serving

as an officer, director, trustee, partner, or employee;
in any harvesting, processing, or marketing activity that is being, or will be, undertaken within any fishery over which the Council concerned has jurisdiction.

"(3) The disclosure required under paragraph (2) shall be made—

"(A) in the case of an affected individual referred to in paragraph (1)(A), before appointment by the Secretary; and

"(B) in the case of an affected individual referred to in paragraph (1)(B) or (C), within 45 days of taking office.

"(4) An affected individual referred to in paragraph (1)(B) or (C) must update his or her disclosure form at any time any such financial interest is acquired, or substantially changed, by any person referred to in paragraph (2)(A), (B), or (C).

"(5) The financial interest disclosures required by this subsection shall—

"(A) be made on such forms, in accordance with such procedures, and at such times, as the Secretary shall by regulation prescribe; and

"(B) be kept on file, and made available for public inspection at reasonable hours, at the Council offices.

"(6) The participation by an affected individual referred to in paragraph (1)(B) or (C) in an action by a Council during any time in which that individual is not in compliance with the regulations prescribed under paragraph (5) may not be treated as cause for the invalidation of that action.

"(7) Section 208 of title 18, United States Code, does not apply to an affected individual referred to in paragraph (1)(B) or (C) during any time in which that individual is in compliance with the regulations prescribed under paragraph (5).".

(2) For purposes of applying subsection (k) of section 302 of the Act (as added by paragraph (1)) to voting members and executive directors of regional fishery management councils who are serving in those capacities on the date on which the regulations prescribed to carry out that subsection first take effect, each such member or director must file a disclosure form under that subsection within 45 days after that date.

SEC. 105. FISHERY MANAGEMENT PLANS; DISCLOSURE OF CONFIDENTIAL STATISTICS.

(a) REQUIRED PROVISIONS.—(1) Section 303(a) of the Act (16 U.S.C. 1853(a)) is amended—

(A) by striking out "and" at the end of paragraph (4);

(B) by striking out the period at the end of paragraph (5) and inserting a comma; and

(C) by adding after paragraph (5) the following new paragraphs:

"(6) consider, and may provide for, temporary adjustments, after consultation with the Coast Guard and persons utilizing the fishery, regarding access to the fishery for vessels otherwise prevented from harvesting because of weather or other ocean conditions affecting the safety of the vessels; and

"(7) include readily available information regarding the significance of habitat to the fishery and assessment as to the effects which changes to that habitat may have upon the fishery.".

(2) The amendments made by paragraph (1) apply to each fishery management plan that—

(A) is submitted to the Secretary of Commerce for review under section 304(a) of the Act, or that is prepared by the Secretary, after January 1, 1987; or

(B) is in effect on that date, but compliance with those amendments is not required except in conjunction with the amendment to the plan next occurring after that date.

(b) DISCLOSURE OF CONFIDENTIAL STATISTICS.—The first sentence of section 303(d) of the Act (16 U.S.C. 1853(d)) is amended to read as follows: "Any statistic submitted to the Secretary by any person in compliance with any requirement under subsection (a)(5) shall be confidential and shall not be disclosed; except—

"(1) to National Marine Fisheries Service personnel and Council employees who are responsible for management plan development and monitoring; or

"(2) when required by court order.".

SEC. 106. ACTION BY SECRETARY REGARDING FISHERY MANAGEMENT PLANS.

Section 304 of the Act (16 U.S.C. 1854) is amended as follows:

(1) Subsection (a) is amended—

(A) by striking out "(the date of receipt of which is hereafter in this section referred to as the 'receipt date')" in paragraph (1);

(B) by redesignating subparagraphs (A), (B), and (C) of paragraph (1) as subparagraphs (B), (C), and (D), respectively;

(C) by inserting immediately before subparagraph (B), as so redesignated, of paragraph (1) the following new subparagraph:

"(A) immediately make a preliminary evaluation of the management plan or amendment for purposes of deciding if it is consistent with the national standards and sufficient in scope and substance to warrant review under this subsection and—

"(i) if that decision is affirmative, implement subparagraphs (B), (C), and (D) with respect to the plan or amendment, or

"(ii) if that decision is negative—

"(I) disapprove the plan or amendment, and

"(II) notify the Council, in writing, of the disapproval and of those matters specified in subsection (b)(2)(A), (B) and (C) as they relate to the plan or amendment;";

(D) by amending subparagraph (C) (as so redesignated) of paragraph (1) by striking out "75-day" and inserting "60-day";

(E) by amending subparagraph (D) (as so redesignated) of paragraph (1) by striking out "30th day" and inserting "15th day";

(F) by amending paragraph (2)—

(i) by striking out "(1)(A)" and inserting "(1)(B)"; and

(ii) by striking out the period at the end of subparagraph (C) and inserting "and to fishery access adjustments referred to in section 303(a)(6)."; and

(G) by adding at the end thereof the following new paragraph:

"(3)(A) The Secretary shall take action under this section on any fishery management plan or amendment to a plan which the Council characterizes as being a final plan or amendment.

"(B) For purposes of this section, the term 'receipt date' means the 5th day after the day on which a Council transmits to the Secretary a fishery management plan, or an amendment to a plan, that it characterizes as a final plan or amendment."

(2) Subsection (b) is amended—

(A) by amending paragraph (1)(A) to read as follows:

"(A) the Secretary does not notify the Council in writing of—

"(i) his disapproval under subsection (a)(1)(A)(ii), or

"(ii) his disapproval, or partial disapproval, under paragraph (2), of the plan or amendment before the close of the 95th day after the receipt date; or";

(B) by striking out "75th day" in paragraph (1)(B) and inserting "60th day";

(C) by amending paragraph (2) by striking out "paragraph (1)(A)" and inserting "paragraph (1)(B)"; and

(D) by amending paragraph (3)—

(i) by striking out "If the Secretary" in subparagraph (A) and inserting "If the Secretary disapproves a proposed plan or amendment under subsection (a)(1)(A)(ii), or", and

(ii) by striking out "(a)(1)(A)" in each of subparagraphs (B)(i) and (C)(i) and inserting "(a)(1)(B)".

(3) Subsection (c) is amended—

(A) by striking out "75-day" in paragraph (2)(A)(ii) and inserting "60-day";

(B) by striking out "30th day" in paragraph (2)(A)(iii) and inserting "15th day"; and

(C) by striking out "75-day" wherever it appears in paragraph (2)(B) and inserting "60-day".

(4) Subsection (e) is amended—

(A) by inserting ", in cooperation with the Councils," immediately after "maintain";

(B) by striking out "management," and inserting "management and on the economics of the fisheries,"; and

(C) by adding at the end thereof the following: "The Secretary shall annually review and update the comprehensive program and make the results of the review and update available to the Councils.".

SEC. 107. SUBMISSION OF CERTAIN FALSE STATEMENTS A PROHIBITED ACT.

(a) KNOWING AND WILLFUL SUBMISSION.—Paragraph (1) of section 307 of the Act (16 U.S.C. 1857(1)) is amended—

(1) by striking out "or" at the end of subparagraph (G);

(2) by inserting "or" after the semicolon at the end of subparagraph (H); and

(3) by adding at the end thereof the following new subparagraph:

"(I) to knowingly and willfully submit to a Council, the Secretary, or the Governor of a State false information (including, but not limited to, false information regarding the capacity and extent to which a United States fish processor, on an annual basis, will process a portion of the optimum yield of a fishery that will be harvested by fishing vessels of the United States) regarding any matter that the Council, Secretary, or Governor is considering in the course of carrying out this Act.".

(b) CONFORMING AMENDMENT.—Section 309(a)(1) of the Act (16 U.S.C. 1859(a)(1)) is amended by striking out "or (H)" and inserting "(H), or (J)".

SEC. 108. CIVIL PENALTIES.

Section 308 of the Act (16 U.S.C. 1858) is amended—

(1) by amending the first sentence of subsection (b) to read as follows: "Any person against whom a civil penalty is assessed under subsection (a) may obtain review thereof in the United States district court for the appropriate district by filing a complaint in such court within 30 days from the date of such order and by simultaneously serving a copy of such complaint by certified mail on the Secretary, the Attorney General and the appropriate United States Attorney.";

(2) by redesignating subsections (d) and (e) as subsections (e) and (f), respectively; and

(3) by inserting immediately after subsection (c) a new subsection (d) to read as follows:

"(d) IN REM JURISDICTION.—A fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used in the commission of an act prohibited by section 307 shall be liable in rem for any civil penalty assessed for such violation under section 308 and may be proceeded against in any district court of the United States having jurisdiction thereof. Such penalty shall constitute a maritime lien on such vessel which may be recovered in an action in rem in the district court of the United States having jurisdiction over the vessel.".

SEC. 109. ADMINISTRATIVE FORFEITURES.

(a) PROCEDURES.—Section 310 of the Act (16 U.S.C. 1860) is amended—

(1) by amending the second sentence of subsection (c) to read as follows: "The provisions of the customs laws relating to—

"(1) the seizure, forfeiture, and condemnation of property for violation of the customs law;

"(2) the disposition of such property or the proceeds from the sale thereof; and

"(3) the remission or mitigation of any such forfeiture;

shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, unless such provisions are inconsistent with the purposes, policy, and provisions of this Act."; and

(2) by adding at the end of subsection (d)(1) the following new sentence: "Nothing in this paragraph may be construed to require the Secretary, except in the Secretary's discretion or pursuant to the order of a court under section 311(d), to release on bond any seized fish or other property or the proceeds from the sale thereof.".

(b) JURISDICTION OF COURTS.—Section 311 of the Act (16 U.S.C. 1861) is amended—

(1) by redesignating subsection (e) as subsection (f); and

(2) by inserting after subsection (d) the following:

"(e) PAYMENT OF STORAGE, CARE, AND OTHER COSTS.—Notwithstanding any other provision of law, after September 30, 1986, the Secretary or the Secretary of the Treasury may pay from sums received as fines, penalties, or forfeitures of property for violations of any provision of this Act—

"(1) the reasonable and necessary costs incurred in providing temporary storage, care, and maintenance of seized fish or other property pending disposition of any civil or criminal proceeding alleging a violation of any provision of this Act with respect to that fish or other property; and

"(2) a reward to any person who furnishes information which leads to an arrest, conviction, civil penalty assessment, or forfeiture of property for any violation of any provision of this Act.

Any person assessed a civil penalty for, or convicted of, any violation of any provision of this Act shall be liable for the cost incurred in storage, care, and maintenance of any fish or other property seized in connection with the violation concerned.".

SEC. 110. REPEAL.

Section 401 of the Act (16 U.S.C. 1881; relating to the Law of Sea Treaty), and the entry referring to that section in the table of contents of the Act, are repealed.

SEC. 111. AUTHORIZATION OF APPROPRIATIONS.

(a) AUTHORIZATION.—Section 406 of the Act (16 U.S.C. 1882) is amended by adding at the end thereof the following new paragraphs:

"(12) $69,000,000 for fiscal year 1986.

"(13) $70,800,000 for fiscal year 1987.

"(14) $72,900,000 for fiscal year 1988.

"(15) $75,000,000 for fiscal year 1989.".

(b) LIMITATIONS REGARDING CERTAIN NOAA FISHERY RESEARCH VESSELS.—During fiscal years 1986 and 1987, the Secretary of Commerce may not replace with chartered fishery survey vessels the fishery research vessels of the National Oceanic and Atmospheric Administration operated by the Atlantic Marine Center, unless a period of 90 days has expired after the Secretary has submitted to Congress a full and complete statement (including relevant supporting studies) concerning the proposed chartering and the reasons therefor.

SEC. 112. CLERICAL AMENDMENTS.

Section 3(4) of the Act (16 U.S.C. 1802(4)) is amended—

(1) by striking out "Artica islandica" in the listing of mollusks and inserting in lieu thereof "Arctica islandica"; and

(2) by striking out "Hippiospongia canaliculata" in the listing of sponges and inserting in lieu thereof "Spongia cheiris".

SEC. 113. DIRECTIONS REGARDING FISHERY MANAGEMENT COUNCIL MEMBERSHIP.

Notwithstanding section 302 of the Act (16 U.S.C. 1852) and effective on and after the date of the enactment of this Act, the Secretary shall take action to ensure, to the extent practicable, that those persons dependent for their livelihood upon the fisheries within the respective jurisdictions of the Regional Fishery Management Councils are fairly represented as voting members of the Councils.

TITLE II—FISH AND SEAFOOD PROMOTION

SEC. 201. SHORT TITLE.

This title may be cited as the "Fish and Seafood Promotion Act of 1986".

SEC., 202. FINDINGS.

The Congress finds that—

(1) the commercial fishing industry of the United States significantly contributes to the national economy, and could make a greater contribution if fish resources within the United States Exclusive Economic Zone were most fully utilized;

(2) the commercial fisheries of the United States provide significant employment in coastal areas and in processing and distribution centers;

(3) fish contribute an important nutritional component to the American diet;

(4) increased consumption of seafood in the United States could significantly lower the risk of many cardiovascular diseases;

(5) Federally supported development programs for commercial fisheries are unable to meet present and future marketing needs;

(6) many fish species are underutilized by the United States fishing industry because of underdeveloped markets; and

(7) the United States fishing industry has the potential to expand greatly its contribution to interstate and foreign commerce, favorably affecting the balance of trade.

SEC. 203. PURPOSE.

The purpose of this title is to—

(1) strengthen the competitive position of the United States commercial fishing industry in the domestic and international marketplace;

(2) encourage the development and utilization of all species of fish available for harvest by the United States fishing industry;

(3) encourage the utilization of domestically-produced fish through enhancement of markets, promotion, and public relations;

(4) help the United States fishing industry develop methods to improve quality and efficiency in the marketplace;

(5) educate and inform consumers on the use of fish;

(6) develop better coordination of fisheries marketing and promotion activities with commercial fisheries research and development programs; and

(7) educate and inform the public about the nutritional value of fish in the diet.

SEC. 204. DEFINITIONS.

As used in this title, the term—

(1) "consumer education" means actions undertaken to inform consumers on matters related to the consumption of fish and fish products;

(2) "council" means a seafood promotional council established under section 210 of this title;

(3) "fish" means finfish, mollusks, crustaceans, and all other forms of aquatic animal life used for human consumption; the term does not include marine mammals and seabirds;

(4) "Fund" means the Fisheries Promotional Fund established in section 209 of this title;

(5) "harvester" means any individual who is in the business of catching or growing fish for purposes of sale;

(6) "importer" means any person in the business of importing fish or fish products into the United States from another country for commercial purposes or who acts as an agent, broker, or consignee for any person or nation that produces, processes or markets fish or fish products outside of the United States for sale or other commercial purpose in the United States;

(7) "marketer" means any person who is in the business of selling fish or fish products in the wholesale, retail, or restaurant trade, but whose primary business function is not the processing or packaging of fish or fish products in preparation for sale;

(8) "marketing and promotion" means an activity aimed at encouraging the consumption of fish or fish products or expanding or maintaining commercial markets for fish or fish products;

(9) "member" means any person serving on the National Council or on any council;

(10) "National Council" means the National Fish and Seafood Promotional Council established in section 205 of this title;

(11) "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any private entity organized or existing under the laws of the United States or any State, commonwealth, territory or possession of the United States;

(12) "processor" means any person who is in the business of preparing or packaging fish or fish products (including fish of the processor's own harvesting) for sale;

(13) "receiver" means any person who owns fish processing vessels and any person in the business of acquiring fish directly from harvesters;

(14) "research" means any type of research designed to advance the image, desirability, usage, marketability, production or quality of fish and fish products;

(15) "sector" means—

(A) the sector consisting of harvesters;

(B) the sector consisting of importers;

(C) the sector consisting of marketers;

(D) the sector consisting of processors;

(E) the sector consisting of receivers; or

(F) the consumer sector consisting of persons professionally engaged in the dissemination of information pertaining to the nu-

tritional benefits and preparation of fish and fish products;

(16) "Secretary" means the Secretary of Commerce, or the Secretary's designee; and

(17) "United States" means the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands and any other territory, possession, or commonwealth of the United States.

SEC. 205. ESTABLISHMENT OF THE NATIONAL COUNCIL.

(a) ESTABLISHMENT.—There is established the National Fish and Seafood Promotional Council.

(b) COMPOSITION OF THE NATIONAL COUNCIL.—(1) The National Council shall be composed of the Secretary, who shall be a nonvoting member, and fifteen voting members appointed by the Secretary.

(2) Nominations for appointees shall be submitted in a manner prescribed by the Secretary.

(c) REGIONAL REPRESENTATION.—The National Council shall be comprised of regional representation from the Northeast, Southeast, Pacific, and Alaska regions. The Northeast region shall consist of the States of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, Maryland and Virginia. The Southeast region shall consist of the States of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana and Texas, the Commonwealth of Puerto Rico, and the territory of the Virgin Islands. The Pacific region shall consist of the States of Idaho, Washington, Oregon, California, and Hawaii, the territories of Guam and American Samoa, and the Commonwealth of the Northern Mariana Islands. The Alaska region shall consist of the State of Alaska.

(d) VOTING MEMBERS.—(1) The voting members of the National Council shall be—

(A) three members who reside in or do substantial fishing industry business in the Northeast region;

(B) three members who reside in or do substantial fishing industry business in the Southeast region;

(C) three members who reside in or do substantial fishing industry business in the Pacific region;

(D) three members who reside in or do substantial fishing industry business in the Alaska region;

(E) two members-at-large with demonstrated expertise in fresh-water and inland commercial fisheries; and

(F) one member-at-large from an organized labor union, with demonstrated expertise in the United States fishing industry.

(2) Of the members appointed pursuant to each of paragraphs (1)(A) through (D) of this subsection, one shall be a harvester, one shall be a processor or a receiver, and one shall be a marketer.

(e) TERM OF OFFICE.—Members of the National Council shall be appointed for a term of 4 years. A vacancy in the National Council shall not affect its ability to function. The Secretary shall appoint a new member within sixty days to fill a vacancy in an unexpired term. Any member may remain on the National Council beyond that member's term until a successor is appointed.

(f) CHAIRMAN.—The National Council shall annually elect a Chairman by a majority of those voting, if a quorum is present. Ten members of the National Council shall constitute a quorum, but a lesser number may hold hearings.

(g) FIRST MEETING.—The National Council shall first meet within one hundred and eighty days after the date of enactment of this Act.

(h) COMPENSATION OF MEMBERS.—Members of the National Council shall serve without compensation, but shall be reimbursed in accordance with section 5703 of title 5, United States Code, for reasonable travel costs and expenses incurred in performing their duties as members of the National Council.

SEC. 206. FUNCTIONS AND DUTIES OF THE NATIONAL COUNCIL.

(a) FUNCTIONS AND DUTIES.—The National Council shall—

(1) prepare and submit to the Secretary, for the Secretary's review and approval, an annual marketing and promotion plan which contains descriptions of consumer education, research, and other marketing and promotion activities of the National Council for the following year, including plans to coordinate the activities of councils established under section 210 of this title;

(2) prepare and submit to the Secretary, for the Secretary's review and approval, an annual budget of the anticipated expenses and disbursements of the National Council, including probable costs of consumer education, research, and other marketing and promotion plans or projects, and referenda under section 210 of this title;

(3) maintain accounting records of the receipt and disbursement of all funds entrusted to the National Council, subject to the Secretary's right to review or inspect such records;

(4) maintain such books and records as the Secretary determines appropriate; and

(5) prepare and submit to the Secretary from time to time such reports or proposals as the Secretary or the National Council determines appropriate for furthering the purposes and policies of this title.

(b) ANNUAL PLAN.—Each annual marketing and promotion plan shall be directed to—

(1) increasing the general demand for fish and fish products;

(2) encouraging, expanding, or improving the marketing and promotion and utilization of fish and fish products; and

(3) improving the dissemination of data collected by consumer education, research, and other marketing promotion activities.

(c) PROHIBITION ON CERTAIN REFERENCES.—Consumer education and other marketing and promotion activities of the National Council shall contain no reference to a private brand or trade name and shall avoid use of deceptive acts or practices in behalf of fish or fish products or with respect to the quality, value, or use of any competing product or group of products.

(d) EXECUTIVE DIRECTOR.—The National Council may employ and determine the salary of an executive director, but such salary shall not exceed Senior Executive Service Level 6. The executive director shall have demonstrated expertise in the marketing and promotion of food products and may, without regard to the provisions of title 5, United States Code, with the approval of the Natinal Council, select and employ additional staff as necessary.

(e) FUNDING OF REFERENDUM.—The National Council may enter into agreements with applicants proposing to establish a council under section 210 of this title for the purposes of funding a referendum establishing the council. The National Council may enter into agreements with the councils established under section 210 of this title for the purpose of funding a referendum to establish quality standards, or a referendum to terminate any such council.

(f) AGREEMENTS—The National Council may enter into agreements to develop and carry out activities authorized under this title.

(g) TERMINATION OF NATIONAL COUNCIL.—The National Council shall cease to exist on October 1, 1990.

SEC. 207. DUTIES OF THE SECRETARY WITH REGARD TO THE NATIONAL COUNCIL.

(a) DUTIES OF THE SECRETARY.—The Secretary shall—

(1) within sixty days after its submission by the National Council, review the annual marketing and promotion plan and budget and, if the Secretary determines that such plan and budget are in accordance with the purposes and policies of this title,approve such plan and budget;

(2) administer the Fund and, in accordance with subsection (b) of this section, withdraw from the Fund such sums as are necessary to carry out the National Council's approved marketing and promotion plan and budget;

(3) promulgate regulations necessary to carry out the purposes and policies of this title;

(4) provide such administrative assistance as the National Council may require for purposes of its initial organization and operation; and

(5) make all appointments to the National Council within ninety days after the date of enactment of this Act.

(b) WITHDRAWAL OF FUNDS.—The Secretary shall make withdrawals of sums from the Fund under this section at the request of the National Council, unless the Secretary determines that the purposes for which such sums are requested are not reasonably likely to further the purposes and policies of this title.

SEC. 208. VOLUNTARY PAYMENTS.

Any person may make voluntary payments to assist the Natonal Council to carry out its annual marketing and promotion plan and annual budget. The Secretary shall deposit such payments into the Fund.

SEC. 209. ESTABLISHMENT OF FISHERIES PROMOTIONAL FUND.

(a) ESTABLISHMENT OF THE FUND.—There is established in the Treasury of the United States a Fisheries Promotional Fund. The Fund shall be available for the purpose of making payments to carry out the annual marketing and promotion plan and annual budget of the National Council under this title.

(b) DEPOSITS.—There shall be deposited in the Fund—

(1) $750,000 in fiscal year 1987, $3,000,000 in fiscal years 1988 and 1989, and $2,000,000 in fiscal year 1990 from foreign fishing fees collected under section 204(b)(10) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1824(b)(10);

(2) payments made voluntarily pursuant to section 208 of this title; and

(3) receipts from investments made under subsection (c) of this section.

(c) DEPOSITS AND INVESTMENTS.—Sums in the Fund that are not currently needed for the purposes of the Fund shall be kept on deposit in appropriate interest-bearing accounts that shall be established by the Secretary of the Treasury, or invested in obligations of, or guaranteed by, the United States. Any revenue accruing from such deposits and investments shall be deposited in the Fund.

(d) AUTHORIZATION.—There are authorized to be appropriated from the Fund, for the purposes of carrying out the annual marketing and promotion plan and annual budget of the National Council under this title, such sums as are deposited in the Fund under subsection (b) of this section in each fiscal year beginning in fiscal year 1987 through fiscal year 1990.

(e) AMENDMENT TO THE MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT.—Section 204(b)(10) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1824(b)(10)) is amended—

(1) by adding at the end of subparagraph (A) the following: "The Secretary shall increase such schedule by a total of $750,000 in calendar year 1987, $3,000,000 in calendar years 1988 and 1989, and $2,000,000 in calendar year 1990, for purposes of making the deposit required by section 209(b) of the Fish and Seafood Promotion Act of 1986."; and

(2) in subparagraph (B), by inserting immediately after "amount" the second time it appears the following: "equal to such deposit, plus an amount".

SEC. 210. ESTABLISHMENT OF A COUNCIL.

(a) APPLICATION.—An application for a charter for a seafood marketing council for one or more species of fish and fish products of that species may be filed by persons who meet the requirements specified in accordance with subsection (b)(6) of this section.

(b) FORM OF APPLICATION.—An application for a charter for a council shall be made by filing with the Secretary the text of a proposed charter in such form as shall be prescribed by regulation by the Secretary. The text of a proposed charter must contain such information as the Secretary considers necessary or appropriate for carrying out the provisions of this title, including—

(1) the name of the council and a provision proclaiming its establishment;

(2) a declaration of the purposes and objectives of the council;

(3) a description of the species of fish and fish products for which the council will implement marketing and promotion plans under section 211 of this title;

(4) the identification of each sector and the number and terms of representatives of each sector that will be represented as voting members of the council;

(5) the identification of those sectors (including the sector consisting of harvesters, the sector consisting of receivers, and, if subject to assessment, the sector consisting of importers) subject to a referendum to establish a council under subsection (e) of this section;

(6) a specification for each sector described under paragraph (5) of this subsection of the minimum requirements, as measured by income, volume, or other relevant factors, that a person engaging in business in the sector must meet in order to participate in a referendum;

(7)(A) a description of the procedures for determining assessment rates under section 213 of this title;

(B) the proposed rate or rates that will be imposed by the council on receivers and, if subject to assessment, importers during its first year of operation;

(C) the maximum amount an assessment rate for any period may be raised above the rate applicable for the immediately preceding period; and

(D) the maximum rate or rates that can be imposed by a council on receivers or importers during the operation of the council;

(8) a provision setting forth the definition of a quorum for making decisions on council business and the procedures for selecting a chairman of the council;

(9) a provision setting forth the voting procedures by which votes may be cast by proxy; and

(10) such other provisions relating to administration of the council as the Secretary considers necessary.

The text of a proposed charter shall be accompanied by a document identifying, to the extent practicable by address of place of business, the persons (hereinafter referred to as "sector participants") that are considered by the applicants to meet the requirements specified in paragraph (6) of this subsection. The text of a proposed charter shall include provisions setting forth procedures for providing refunds to those sector participants subject to assessment under section 213 of this title, and may also include provisions which establish a maximum limit on the amount that any one sector participant may be required to pay under an assessment for any period.

(c) CONTENTS OF CHARTER.—The Secretary may not approve a proposed charter filed under subsection (a) of this section unless such charter provides that—

(1) the council will have voting members representing the harvesting, receiving and, if subject to assessment, importing sectors; and

(2) the members of the council shall serve without compensation, but shall be reimbursed for their reasonable, expenses incurred in performing their duties as members of the council.

(d) REVIEW OF CHARTER.—(1) Within 180 days of the receipt of an application to establish a council, the Secretary shall—

(A) identify, to the extent practicable, those sector participants that meet the requirements for eligibility to participate in the referendum under subsection (e) of this section;

(B) determine, to the extent practicable, if the charter is accompanied by a petition comprised of the signatures or corporate certifications, as the case may be, of no less than three sector participants in each sector identified in accordance with subsection (b)(5) of this section who collectively accounted for, in the twelve-month period immediately preceding the month in which the application was filed, not less than 10 percent of the value of the fish or fish products described in accordance with subsection (b)(3) of this section that were handled by each such sector during that period; and

(C) determine if the proposed charter is consistent with the provisions of this title and any other applicable law.

(2) If any negative determination is made under paragraph (1) of this subsection regarding a proposed charter, the Secretary shall advise in writing the sector participants who made the application of the reasons for such determination. A corrected application may be submitted thereafter to the Secretary for approval.

(e) CONDUCT OF REFERENDUM.—(1) Upon making affirmative determinations under subsection (d)(1) of this section regarding a proposed charter, the Secretary, within 90 days after the date of the last of such determinations, shall conduct a referendum on the adoption of the proposed charter among all sector participants identified in accordance with subsection (d)(1)(A) of this section. The Secretary shall by order establish the council and approve the proposed charter, if the referendum votes which are cast in favor of the proposed charter constitute a majority of the sector participants voting in each sector and the majority collectively accounts for, in the twelve-month period immediately preceding the month in which the proposed charter was filed under subsection (a) of this section, at least sixty-six percent of the value of the fish and fish products described in accordance with subsection (b)(3) of this section that were handled by that sector during such period.

(2) Not less than thirty days prior to holding a referendum under this subsection, the Secretary shall—

(A) publish (by such means as will result in wide publicity in regions affected by the proposed charter) the text of the proposed charter and a list of those sector participants eligible to vote in the referendum; and

(B) provide for public comment, including the opportunity for a public meeting.

(3)(A) The Secretary shall pay all costs of a referendum which establishes a council under this subsection. Within two years after a council is established the council shall reimburse the Secretary for any expenses incurred for the conduct of the referendum from assessments collected by the council. Prior to the holding of a referendum under this subsection, the Secretary shall require the applicants to post a bond or other security acceptable to the Secretary, in an amount which the Secretary determines to be sufficient to pay any expenses incurred for the conduct of the referendum, and shall immediately recover such amount if a referendum fails to result in the establishment of a council.

(B) As used in this paragraph, the term "expenses incurred for the conduct of the referendum" does not include salaries of Government employees or other administrative overhead, but is limited to those additional direct costs incurred in connection with conduct of the referendum.

(f) NOMINATIONS.—(1) Within thirty days after a council is established under subsection (e) of this section, the Secretary shall solicit from the sectors represented on the council nominations for members of the council. If the harvesters and receivers represented on the council are engaged in business in two or more regions of the United States, the nominations made under paragraph (3) of this subsection, must, to the extent practicable, result in equitable representation for the constituent regions.

(2) No person is eligible for nomination or appointment as a member of a council unless such person is knowledgeable and experienced with regard to the activities of, and is or has been actively engaged in the business of, the sector which such person will represent on the council.

(3) The Secretary shall, within sixty days after the end of the thirty-day period referred to in paragraph (1) of this subsection, appoint the members of the council from among the nominees.

(4) A vacancy on a council shall be filled, within sixty days after the vacancy occurs, in the same manner in which the original appointment was made. A member appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of such term.

(5) The Secretary shall remove any member of a council if the council concerned first recommends, by not less than two-thirds of its members, removal for cause. Such a recommendation of a council must be in writing and accompanied by a

statement of the reasons upon which the recommendation is based.

(g) NATURE OF A COUNCIL.—A council is not an instrumentality of the United States Government.

SEC. 211. FUNCTIONS AND POWERS OF COUNCILS.

(a) ACTIVITIES OF A COUNCIL.—(1) Each council shall—

(A) Adopt a seal which shall be judicially noticed;

(B) implement all terms of its charter;

(C) prepare and submit to the Secretary, for review and approval under section 212(a)(1) of this title, a marketing and promotion plan and amendments to such plan which contain descriptions of the projected consumer education, research, and other marketing and promotion activities of the council;

(D) implement and administer an approved marketing and promoting plan and amendments to such plan;

(E) determine the assessments to be made under section 213 of this title and administer the collection of such assessments to finance council expenses described in paragraph (2) of this subsection;

(F) receive, investigate and report to the Secretary accounts of violations of rules or orders relating to assessments collected under section 213 of this title, or quality standard requirements established under subsection (c) of this section;

(G) prepare and submit to the Secretary, for review and approval under section 212(a)(1) of this title, a budget (on a fiscal year basis) of the anticipated expenses and disbursements of the council, including—

(i) all administrative and contractual expenses;

(ii) the probable costs of consumer education, research, and other marketing and promotion plans or projects;

(iii) the costs of the collection of assessments; and

(iv) the expense of repayment of the costs of each referendum conducted in regard to the council;

(H) maintain books and records, prepare and submit to the Secretary such reports from time to time as may be necessary for appropriate accounting with respect to the receipt and disbursement of funds entrusted to it, and cause a complete audit report to be submitted to the Secretary at the end of each fiscal year;

(I) reimburse the Secretary for the expenses incurred for the conduct of the referendum to establish the council or any subsequent referendum to terminate the council that fails; and

(J) prepare and submit to the Secretary from time to time such reports or proposals as the council determines appropriate to further the purposes of this title.

(2) Funds collected by a council under section 213 of this title shall be used by the council for—

(A) research, consumer education, and other marketing and promotion activities regarding the quality and marketing of fish and fish products;

(B) other expenses, as described in subsection (a)(1)(G) of this section;

(C) such other expenses for the administration, maintenance, and functioning of the council as may be authorized by the Secretary;

(D) any reserve fund established under subsection (b)(5) of this section and any administrative expenses incurred by the Secretary specified as reimbursable under this title.

(3) Marketing and promotion plans and amendments to such plans prepared by a council under subsection (a)(1)(C) of this section shall be designed to increase the general demand for fish and fish products described in accordance with section 210(b)(3) of this title by encouraging, expanding, and improving the marketing, promotion and utilization of such fish and fish products, in domestic or foreign markets, or both, through consumer education, research, and other marketing and promotion activities.

(4) Consumer education and other marketing and promotion activities carried out by a council under a marketing and promotion plan and amendments to such plan may not contain references to any private brand or trade name and shall avoid the use of deceptive acts or practices in promoting fish or fish products or with respect to the quality, value, or use of any competing product or group of products.

(b) AUTHORITY OF A COUNCIL.—A council may—

(1) sue and be sued;

(2) enter into contracts;

(3) employ and determine the salary of an executive director who may, with the approval of the council, employ and determine the salary of such additional staff as may be necessary;

(4) collaborate with other councils and with the National Council in establishing and implementing a national marketing and promotion plan for one or more species of fish or fish products; and

(5) establish a reserve fund from monies collected and received under section 213 of this title to permit an effective and sustained program of research, consumer education, and other marketing and promotion activities regarding the quality and marketing of fish and fish products in years when production and assessment income may be reduced, but the total reserve fund may not exceed the amount budgeted for the current fiscal year of operation.

(c) QUALITY STANDARDS.—(1) A council may develop and submit to the Secretary for approval, or upon the request of a council the Secretary shall develop, quality standards for a fish or fish product described in accordance with section 210(b)(3) of this title. Any quality standard developed under this paragraph shall be consistent with the purposes of this title.

(2) A quality standard developed under paragraph (1) of this subsection may be adopted by a council by a majority of the members of the council if first approved, in a referendum conducted by the council, by a majority of the sector participants of the sector concerned voting and the majority collectively accounted for, in the twelve-month period immediately preceding the month in which the referendum is held, not less than sixty-six percent of the value of the fish or fish products described in accordance with section 210(b)(3) of this title that were handled by that sector during such period.

(3) With respect to a quality standard adopted under paragraph (2) of this subsection, the council shall develop and file with the Secretary an official identification in the form of a symbol, stamp, label, or seal that will be used to indicate that a fish or fish product meets the quality standard at the time the official identification is affixed to the fish or fish product, or is affixed to or printed on the packaging material of the fish or fish product.

(4) The Secretary shall establish by regulation procedures for the use of an official identification filed with the Secretary under paragraph (3) of this subsection. Misuse of an official identification established under this section shall constitute a violation of this title.

(5) Prior to issuing final regulations under paragraph (4) of this subsection, the Secretary shall—

(A) publish the proposed regulations by such means as will result in wide publicity in affected regions; and

(B) provide for public comment and the opportunity for a public hearing.

(6) A council may receive, investigate and report to the Secretary accounts of violations of regulations issued under paragraph (4) of this subsection.

(7) Any regulation issued under paragraph (4) of this subsection shall be repealed immediately by the Secretary upon the termination under section 216 of this title of the council that developed the official identification to which the regulations apply.

(8) The procedures applicable to the adoption and the taking effect of a quality standard developed under this subsection also apply to a subsequent amendment or the termination of such standard.

(d) AMENDMENT OF A CHARTER.—A council may submit to the Secretary amendments to the text of the council's charter. Any proposed amendments to a character shall be approved or disapproved in the same manner as the original charter was approved under section 210 (d) and (e) of this title, with the exception of section 210(d)(1)(B).

SEC. 212. FUNCTIONS AND POWERS OF THE SECRETARY.

(a) DUTIES OF THE SECRETARY.—In addition to the duties prescribed under section 210 of this title, the Secretary shall—

(1) review of consistency with the provisions of this title and other applicable law, and approve or disapprove, marketing and promotion plans and budgets within sixty days after their submission by a council;

(2) immediately notify a council in writing of the disapproval of a marketing and promotion plan or budget, together with reasons for such disapproval;

(3) issue orders and amendments to such orders that are necessary to implement quality standards under section 211(c) of this title;

(4) promulgate regulations necessary to carry out the purposes of this title;

(5) enforce the provisions of this title, as provided under section 217 of this title; and

(6) make all appointments to councils in accordance with section 210(f) of this title.

(b) ASSISTANCE.—The Secretary may provide, on a reimbursable or other basis, such administrative or technical assistance as a council may request for purposes of the initial organization and subsequent operation of the council.

SEC. 213. ASSESSMENTS.

(a) AUTHORITY.—A council shall impose and administer the collection of the assessments that are necessary to pay for all expenses incurred by the carrying out its functions under this title.

(b) METHOD OF IMPOSITION.—(1) Assessments shall be imposed on sector participants in the receiving sector or the importing sector, or both, as specified in an approved council charter.

(2) An assessment on sector participants in the receiving sector shall be—

(A) except for an owner of a fish processing vessel, in the form of a percentage of the value of the fish described in accordance

with section 210(b)(3) of this title when purchased by such participants from fish harvesters; and

(B) for an owner of a fish processing vessel, in the form of a percentage of the value of the fish described in accordance with section 210(b)(3) of this title and harvested by such a vessel that is no less than the value of such fish, if such fish had been purchased by a receiver other than an owner of such a vessel.

(3) An assessment on sector participants in the importing sector shall be in the form of a percentage of the value, as determined for the purposes of the customs laws, of the fish or fish products described in accordance with section 210(b)(3) of this title when entered, or withdrawn from warehouse for consumption, in the customs territory of the United States by such sector participants.

(c) PROHIBITION ON ASSESSMENT.—A council may not impose an assessment on any person that was not eligible to vote in the referendum establishing the council under section 210(e) of this title by reason of failure to meet the requirements specified under section 210(b)(6) of this title, unless such person, after the date on which such referendum is held, meets the requirements of section 210(b)(6) of this title.

(d) VOLUNTARY PAYMENTS.—Any person may make voluntary payments or in-kind contributions to a council for purposes of assisting the council in carrying out its functions.

(e) DEPOSIT OF FUNDS.—All funds collected or received by a council under this section shall be deposited by the council in an appropriate account in the name of the council specified in its charter. Funds eligible to be collected or received by a council shall be limited to those authorized under this section.

(f) INFORMATION.—(1) Sector participants shall make available to the Secretary such information and data as is necessary for the effectuation, administration or enforcement of this title or any order or regulation issued pursuant to this title. Except as provided in paragraphs (2) and (3) of this subsection, any information obtained in carrying out this subsection shall be kept confidential by all officers and employees of the Department of Commerce, independent accountants and other persons who have access to such information.

(2) If the Secretary or an employee of the United States Government is a party to a suit or administrative action involving an assessment, order, or regulation issued under this title, the Secretary may disclose information obtained under paragraph (1) of this subsection to the extent allowed by the judicial or administrative officer presiding over such suit or action.

(3) This subsection shall not prohibit—

(A) the issuance of general or statistical statements based upon reports of a number of persons subject to the provisions of this title which do not identify the information furnished by any person; or

(B) the publication by direction of the Secretary of the name of any person violating a requirement relating to an assessment imposed under subsection (a) of this section or to quality standards implemented by the Secretary under section 211(c) of this title, and a statement of the particular provisions of the requirement violated by such person.

(4) Any individual who is required to keep information confidential under this subsection and who knowingly violates this subsection shall, upon conviction, be—

(A) subject to a fine of not more than $1,000 or to imprisonment for not more than one year, or both; and

(B) removed from office if an officer or employee of a council or the Department of Commerce.

SEC. 214. PETITIONS.

(a) FILING OF PETITION.—Any person subject to assessment under section 213 of this title may file a written petition with the Secretary alleging that—

(1) the assessment,

(2) the plan approved under section 212(a)(1) of this title on which the assessment is based, or

(3) any obligation imposed under the plan, is not in accordance with law and requesting the Secretary to modify or take other appropriate action regarding the assessment or plan.

(b) FORM OF PETITION.—Any such petition shall be in writing and filed within the period prescribed by the Secretary. A person who files a petition under this section shall be given an opportunity for a hearing regarding the petition in accordance with regulations issued by the Secretary. After such a hearing, or if no hearing is requested, after consideration of all documentation and other evidence, the Secretary shall make a ruling upon such petition.

SEC. 215. REFUNDS.

Notwithstanding any other provision of this title, any person who pays an assessment under this title may demand and shall promptly receive from the council a refund of such assessment. A demand for refund must be made in accordance with the procedures, and within such time, as shall be prescribed by the council and approved by the Secretary. Procedures to provide such a refund shall be established before any such assessment may be collected. Such procedures shall allow any person to request a refund for not less than ninety days from such collection, and provide that any such refund shall be made within sixty days after demand for such refund is made.

SEC. 216. TERMINATION OF A COUNCIL.

(a) PETITION FOR TERMINATION.—(1) A petition to terminate a council may be filed with the Secretary by no less than three sector participants in any one sector. Any petition filed under this subsection shall be accompanied by a written document explaining the reasons for such petition.

(2) If the Secretary determines that a petition filed under paragraph (1) of this subsection is accompanied by the signatures, or corporate certifications, as the case may be, of no less than three sector participants in a sector referred to in paragraph (1) of this subsection who collectively accounted for, in the twelve-month period immediately preceding the month in which such petition was filed, not less than 20 percent of the value of the fish or fish products described in accordance with section 210(b)(3) of this title that were handled by that sector during such period, the Secretary, within 90 days after such determination, shall conduct a referendum for termination of the council among all sector participants in that sector.

(3) Not less than 30 days prior to holding a referendum under this subsection, the Secretary shall publish a notice of such referendum, including the document explaining the reasons for the petition filed under paragraph (1) of this subsection and any other relevant information the Secretary considers appropriate.

(4) If the referendum votes which are cast in favor of terminating the council constitute a majority of the sector participants voting and the majority, in the period referred to in paragraph (2) of this subsection, collectively accounted for not less than sixty-six percent of the value of such fish and fish products that were handled during such period by a sector referred to in paragraph (1) of this subsection, the Secretary shall by order terminate the council effective as of a date by which the affairs of the council may be concluded on an orderly basis.

(5) The Secretary initially shall pay all costs of a referendum conducted under this subsection. Prior to conducting such a referendum, the Secretary shall require petitioners to post a bond or other security acceptable to the Secretary in an amount which the Secretary determines to be sufficient to pay any expenses incurred for the conduct of such referendum.

(6)(A) If a referendum conducted under this subsection fails to result in the termination of the council, the Secretary shall immediately recover the amount of the bond posted by petitioners under paragraph (5) of this subsection.

(B) If a referendum conducted under this subsection results in the termination of the council, the Secretary shall recover the expenses incurred for the conduct of the referendum from the account established by the council under section 213(e) of this title. If the amount remaining in such amount is insufficient for the Secretary to recover all expenses incurred for the conduct of the referendum, the Secretary shall recover the balance of such expenses from the petitioners that posted a bond under paragraph (5) of this subsection.

(b) PAYMENT OF REMAINING FUNDS.—If a council is terminated under subsection (a) of this section, the Secretary, after recovering all expenses incurred for the conduct of the referendum under subsection (a) of this section, shall take such action as is necessary and practicable to ensure that moneys remaining in the account established by the council under section 213(e) of this title are paid on a prorated basis to the sector participants from whom those moneys were collected under section 213 of this title.

SEC. 217. ENFORCEMENT.

(a) AUTHORITY.—(1) The district courts of the United States shall have jurisdiction specifically to enforce and to prevent and restrain any person from violating any assessment, order or regulation made or issued under this title.

(2)(A) If a council has reason to believe that a person subject to an assessment, order or regulation made or issued under this title is violating such assessment, order or regulation, it may refer the matter to the Secretary.

(B) Except as provided in subparagraphs (C) or (D) of this paragraph, any civil action authorized to be brought under this subsection, when referred by a council under subparagraph (A) of this paragraph, shall be referred to the Attorney General for appropriate action.

(C) If the Secretary believes that the administration and enforcement of the provisions of this title would be adequately served by taking administrative action under subsection (b) of this section or by providing written notice or warning to any person committing a violation of this title, the Secretary is not required to refer such violation to the Attorney General.

(D) Whenever a matter has been referred to by a council under subparagraph (A) of

this paragraph and the Secretary or the Attorney General fails within 60 days of such referral to take appropriate action, the council may, upon filing notice with the Secretary or Attorney General, as appropriate, and other interested parties, bring an action in its own name.

(b) RECOVERY OF COSTS.—(1)(A) When a council brings an action under subsection (a)(2) of this section, the council may recover costs of litigation and, where the action is brought to collect an unpaid assessment, interest from the date the amount became due and payable.

(B) Any person who violates any provision of an order (including a cease and desist order previously issued under this paragraph) or regulation issued by the Secretary under this title, or who fails or refuses to pay, collect, or remit any assessment required under this title, may be assessed a civil penalty by the Secretary of not less than $500 nor more than $5,000 for each such violation. Each violation shall be a separate offense. In addition to, or in lieu of, a civil penalty under this subparagraph, the Secretary may issue an order requiring such person to cease and desist from continuing such violation.

(C) No penalty shall be assessed, or cease and desist order issued, under this paragraph unless the affected person is given notice and opportunity for a hearing before the Secretary with respect to such violation.

(D) Any order of the Secretary under this paragraph assessing a penalty or imposing a cease and desist order shall be final and conclusive, unless the affected person files an appeal from the Secretary's order with the appropriate United States court of appeals.

(2)(A) Any person against whom a violation is found under paragraph (1) of this subsection may obtain review of such action in the United States court of appeals for the circuit in which such person resides or has his place of business, or in the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days after the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary.

(B) The Secretary shall promptly file in the court a certified copy of the record upon which such violation was found.

(C) The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence or not in accordance with law.

(3)(A) If any person fails to pay a civil penalty under this subsection after it has become final, the Secretary shall refer the matter to the Attorney General.

(B) The Attorney General shall institute appropriate action to recover the amount assessed under this subsection in a district court of the United States.

(C) If, within sixty days after such referral, the Attorney General fails to institute such appropriate action, the council to whose programs the assessment, order or regulation relates may institute an action in its own name.

SEC. 218. INVESTIGATIONS.

(a) AUTHORITY TO MAKE INVESTIGATIONS.—The Secretary may make such investigations as the Secretary determines necessary to—

(1) carry out the Secretary's responsibilities under this title; and

(2) determine whether any person has engaged in any act or practice which constitutes a violation of the provisions of this title.

(b) OATHS AND AFFIRMATIONS.—For the purpose of investigations under subsection (a) of this section, the Secretary may administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents which are relevant to the inquiry. The attendance of such witnesses and the production of any such records may be required from any place in the United States.

(c) COURT ORDERS.—In case of contumacy or refusal to obey a subpoena issued under this section by any person, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or has his business, to require the attendance and testimony of witnesses and the production of books, papers, and documents. Such court may issue an order requiring such person to appear before the Secretary to produce records or to give testimony relating to the matter under investigation.

SEC. 219. REPORT.

The Secretary shall, not later than March 1, 1989, submit to the Congress a report on the effectiveness of the implementation of this title in achieving the purposes of this title.

TITLE III—INTERJURISDICTIONAL FISHERIES

SEC. 301. SHORT TITLE.

This title may be cited as the "Interjurisdictional Fisheries Act of 1986".

SEC. 302. PURPOSES.

The purposes of this title are—

(1) to promote and encourage State research in support of the management of priority interjurisdictional fishery resources; and

(2) to promote and encourage management of priority interjurisdictional fishery resources throughout their range.

SEC. 303. DEFINITIONS.

For the purposes of this title:

(1) The term "Federal fishery management plan" means a plan developed under the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.).

(2) The term "fishery resource" means finfish, mollusks, crustaceans, and any other form of marine animal or plant life, other than marine mammals and birds.

(3) The term "interjurisdictional fishery resource" means—

(A) a fishery resource for which a fishery occurs in waters under the jurisdiction of one or more States and the exclusive economic zone established by Proclamation Numbered 5030, dated March 10, 1983;

(B) a fishery resource for which there exists an interstate fishery management plan; or

(C) a fishery resource which migrates between the waters under the jurisdiction of two or more States bordering on the Great Lakes.

For purposes of applying section 305(a)(3) during fiscal year 1987, a Federal fishery management plan or an interstate fishery management plan for the fishery resource need not be in existence, but a plan of either kind for that resource must be in the development process during that year.

(4) The term "interstate fishery management plan" means a plan for managing fisheries developed and adopted by an interstate commission.

(5) The term "interstate commission" means a commission or other administrative body established by an interstate compact.

(6) The term "interstate compact" means a compact that has been entered into by two or more States, established for the purposes of conserving and managing interjurisdictional fishery resources throughout their range, and consented to and approved by Congress.

(7) The term "project" means a program for research in support of the management of an interjurisdictional fishery resource or an interstate cooperative fishery management agreement.

(8) The term "Secretary" means the Secretary of Commerce.

(9) The term "State" means any of the several States of the United States, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, or the Northern Mariana Islands.

(10) The term "State agency" means any department, agency, commission, or official of a State authorized under the laws of the State to regulate commercial fisheries or enforce laws relating to commercial fisheries.

SEC. 304. APPORTIONMENT.

(a) TIME WHEN APPORTIONMENTS MADE.—Funds appropriated under section 308(a) shall be apportioned by the Secretary among the States on October 1 of each fiscal year, or as soon thereafter as practicable.

(b) APPORTIONMENT FORMULA.—The amount of funds apportioned to each State shall be determined by the Secretary as the ratio which the equally weighted average of the volume and value of fishery resources harvested by domestic commercial fishermen and received within such State during the 3 most recent calendar years for which data satisfactory to the Secretary are available bears to the total equally weighted average of the volume and value of all fishery resources harvested by domestic commercial fishermen received within all of the States during those calendar years.

(c) LIMITATIONS.—(1) No State may receive an apportionment under subsection (b) for either fiscal year 1987 or fiscal year 1988 which is less than one-half of one percent of the total amount of funds available for that fiscal year.

(2) For any fiscal year after fiscal year 1988, no State that, under the apportionment formula in subsection (b), has a ratio of one-third of one percent or higher may receive an apportionment for any fiscal year which is less than one percent of the total amount of funds available for that fiscal year.

(3) For any fiscal year after fiscal year 1988, no State may receive an apportionment under this section for any fiscal year if that State's ratio under the apportionment formula in subsection (b) is less than one-third of one percent, unless the State—

(A) is signatory to an interstate fishery compact;

(B) has entered into an agreement with the Secretary or the Secretary of the Interior under which the personnel, services, and equipment of the State and the Federal agency concerned will be made mutually available for the enforcement of Federal and State laws pertaining to the protection of fishery resources;

(C) borders one or more of the Great Lakes; or

(D) has entered into an interstate cooperative fishery management agreement.

(3) No State that, under the apportionment formula in subsection (b), has a ratio of less than one-third of one percent and meets any of the requirements set forth in

paragraph (1) (A), (B), (C), or (D) may receive an apportionment for any fiscal year which is less than one-half of one percent of the total amount of funds available for apportionment for such fiscal year.

(4) No State may receive an apportionment for any fiscal year under this section which is more than 6 percent of the total amount of funds available for apportionment for such fiscal year.

(b) UNUSED APPORTIONMENTS.—Any part of an apportionment for any fiscal year to any State—

(1) that is not obligated during that year;

(2) with respect to which the State notifies the Secretary that it does not wish to receive that part; or

(3) that is returned to the Secretary by the State,

may not be considered to be apportioned to that State and shall be added to such funds as are appropriated pursuant to section 308(a) for the next fiscal year (and shall be treated as having been appropriated for such next year) for apportionment under subsection (a). Any notification or return of funds referred to in paragraph (2) or (3) by a State is irrevocable.

SEC. 305. STATE PROJECTS.

(a) IN GENERAL.—(1) Any State may, through its State agency or an interstate commission, submit to the Secretary a proposal for a project which includes full plans, specifications, and cost estimates for such project. The total cost of all items included for engineering, planning, inspection, and unforeseen contingencies in connection with any works to be constructed as part of such a proposed project shall not exceed 10 percent of the total cost of such works, and shall be paid by the State as a part of its contribution to the total cost of the works.

(2) No part of any funds appropriated under any authorization contained in section 308 may be obligated with respect to any project until the proposal for such project has been submitted under paragraph (1) and approved by the Secretary. The Secretary, before approving any proposal for a project, must evaluate the proposal as to—

(A) the soundness of design;

(B) the possibilities of securing productive results;

(C) the minimization of duplication with other research projects in support of the management of interjurisdictional fishery resources and carried out under this title or under any other law or regulation;

(D) the organization and management of the project;

(E) the methods proposed for monitoring and evaluating the success or failure of the project;

(F) the consistency of the project with the purposes of this title specified in section 302; and

(G) such other criteria as the Secretary may prescribe.

(3) The Federal share of the cost of any project conducted under this title shall not exceed 75 percent of the total estimated cost of the project, unless—

(A) the State has adopted an interstate fishery management plan for the resource to which the project applies; or

(B) the State has adopted fishery regulations which the Secretary has determined are consistent with any Federal fishery management plan for the species to which the project applies;

in which case the Federal share shall not exceed 90 percent of the total estimated cost of the project.

(4)(A) If the Secretary approves or disapproves a proposal for a project, the Secretary shall promptly give written notification, including, if disapproved, a detailed explanation of the reasons for the disapproval, to the State agency submitting the proposal or, if the proposal is submitted through an interstate commission, such commission and the State.

(B) For the purposes of this title, funds apportioned under this section to any State shall be treated as having been obligated with respect to a project during the fiscal year in which the written notification of approval required under subparagraph (A) for the project proposal is made.

(b) RESTRICTION.—The expenditure of funds under this title shall be applied only to projects for which a proposal has been approved under subsection (a), except that up to $25,000 each fiscal year may be obligated for a State to carry out an agreement with the Secretary or the Secretary of the Interior under which the personnel, services and equipment of the State and the Federal agency concerned will be made mutually available for the enforcement of Federal and State laws pertaining to the protection of fishery resources. If otherwise applied, such funds shall be replaced by the State before the State may receive any additional funds under this title.

(c) PAYMENT.—When the Secretary determines that a project carried out under a proposal approved by the Secretary has been completed, or where the Secretary otherwise deems it appropriate, the Secretary shall cause to be paid to the proper authority of the State, or to the official or depository designated by the interstate commission if the State agency specifies that payment is to be made to the interstate commission, the Federal share of the project. Any payment made to an interstate commission shall be charged against the apportionment of the State concerned.

SEC. 306. PROPERTY.

(a) APPLICATION OF FEDERAL AND STATE LAWS.—All work, including the furnishing of labor and materials, needed to complete any project approved by the Secretary shall be performed in accordance with applicable Federal and State laws under the direct supervision of the State agency, and in accordance with regulations as the Secretary may prescribe.

(b) TITLE.—Title to all property, real and personal, acquired for the purposes of completing any project approved by the Secretary vests in the State.

(c) DISPOSAL.—If a State disposes of any real or personal property acquired under this title, the State shall pay into the Treasury of the United States the amount of any proceeds resulting from the property disposed to the extent of and in the same ratio that funds provided under this title were used in the acquisition of the property. In no case shall the amount paid into the Treasury of the United States under this section exceed the amount of funds provided by this chapter for the acquisition of the property involved.

SEC. 307. REPORTS.

After consultation with the States receiving funds under this title and with any interstate commission involved in carrying out a project under this title, the Secretary shall submit to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate not later than 90 days after the end of the fiscal year 1988, and each second fiscal year occurring after that fiscal year, a report which contains—

(1) a description of each project and law enforcement effort receiving funds under this title during the last 2 fiscal years ending before such report is submitted;

(2) a specification of the total amount of funds from the Federal Government and the total amount of funds from each State spent on each project and law enforcement effort receiving funds under this title during the last 2 fiscal years ending before such report is submitted;

(3) an assessment of each project and law enforcement effort receiving funds under this title during the last 2 fiscal years ending before such report is submitted to determine whether such project is furthering the purposes of this title; and

(4) a statement specifying all funds which have been apportioned pursuant to section 305(a) and are available for obligation by a State or the Secretary but which have not been obligated.

SEC. 308. AUTHORIZATION OF APPROPRIATIONS.

(a) GENERAL APPROPRIATIONS.—There are authorized to be appropriated to the Department of Commerce for apportionment to carry out the purposes of this title $5,000,000 for each of fiscal years 1987, 1988, and 1989.

(b) ADDITIONAL APPROPRIATIONS.—In addition to the amounts authorized in subsection (a), there are authorized to be appropriated to the Department of Commerce $2,500,000 for each of fiscal years 1988 and 1989, which shall be available in such amounts as the Secretary may determine appropriate for the purposes of this title; except that—

(1) in providing funds to States under this subsection, the Secretary shall give a preference to those States regarding which the Secretary determines there is a commercial fishery failure or serious disruption affecting future production due to a fishery resource disaster arising from natural or undetermined causes, and any sums made available under this subsection may be used either by the States or directly by the Secretary in cooperation with the States for any purpose that the Secretary determines is appropriate to restore the fishery affected by such a failure or to prevent a similar failure in the future; and

(2) the funds authorized to be appropriated under this subsection shall not be available to the Secretary for use as grants for chartering fishing vessels.

Amounts appropriated under this subsection shall remain available until expended.

(c) DEVELOPMENT OF MANAGEMENT PLANS.—In addition to the amounts authorized under subsections (a) and (b), there are authorized to be appropriated to the Department of Commerce $350,000 for each of fiscal years 1988 and 1989 to support the efforts of the following interstate commissions to develop interstate fishery management plans for interjurisdictional fishery resources:

(1) The commission established by the Atlantic States Marine Fisheries Compact, as consented to and approved by Public Law 77-539 (56 Stat. 267), approved May 4, 1942.

(2) The commission established by the Pacific Marine Fisheries Compact, as consented to and approved by Public Law 80-232 (61 Stat. 419), approved July 24, 1947.

(3) The commission established by the Gulf States Marine Fisheries Compact, as consented to and approved by Public Law 81-66 (63 Stat. 70), approved May 19, 1949.

SEC. 309. REPEAL.

The Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779 et seq.) is repealed.

SEC. 310. EFFECTIVE DATE.

This title takes effect October 1, 1987.

TITLE IV—MISCELLANEOUS PROVISIONS

SEC. 401. NOAA MARINE FISHERIES PROGRAM AUTHORIZATIONS.

The National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act (Public Law 98-210; 97 Stat. 1409) is amended—

(1) in section 2(a), by striking out "and" after "1984,", and by inserting ", $27,382,000 for fiscal year 1986, $28,121,314 for fiscal year 1987, $28,915,392 for fiscal year 1988, and $29,764,234 for fiscal year 1989" immediately after "1985";

(2) in section 3(a), by striking out "and" after "1984,", and by inserting ", $25,933,000 for fiscal year 1986, $26,633,191 for fiscal year 1987, $27,385,248 for fiscal year 1988, and $28,189,171 for fiscal year 1989" immediately after "1985"; and

(3) in section 4(a), by striking out "and" after "1984,", and by inserting ", $11,395,000 for fiscal year 1986, $11,702,665 for fiscal year 1987, $12,033,120 for fiscal year 1988, and $12,386,365 for fiscal year 1989" immediately after "1985".

SEC. 402. ANADROMOUS FISH CONSERVATION ACT AUTHORIZATIONS.

Section 4(a) of the Anadromous Fish Conservation Act (16 U.S.C. 757d(a)) is amended—

(1) by striking out "and 1985." in paragraph (4) and inserting "1985, and 1986."; and

(2) by adding after paragraph (4) the following:

"(5) $7,702,500 for fiscal year 1987.

"(6) $7,920,000 for fiscal year 1988.

"(7) $8,152,500 for fiscal year 1989.".

SEC. 403. CENTRAL, WESTERN, AND SOUTH PACIFIC FISHERIES DEVELOPMENT ACT AUTHORIZATIONS.

Section 8 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) is amended—

(1) by striking "and" after "1984,"; and

(2) by inserting immediately after "1985" the following: ", 1986, 1987, and 1988".

SEC. 404. ATLANTIC TUNAS CONVENTION ACT OF 1975 AUTHORIZATIONS.

Section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "year 1976, the period beginning July 1, 1976, and ending September 30, 1976, and fiscal years 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, and 1986" and inserting "years 1986, 1987, 1988, and 1989".

SEC. 405. GREAT LAKES FISHERY COMMISSION.

(a) INCREASE IN NUMBER OF COMMISSIONERS.—Section 3 of the Great Lakes Fishery Act of 1956 (16 U.S.C. 932) is amended to read as follows:

"SEC. 3. (a)(1) The United States shall be represented on the Commission by 4 Commissioners who shall be appointed by the President and who may not receive compensation for service as Commissioners. Of the Commissioners—

"(A) 1 shall be an official of the United States Government; and

"(B) 3 shall be individuals who reside in different Great Lakes States and who are knowledgeable regarding the fisheries of the Great Lakes, except that 1 of them must also be an official of a Great Lakes State.

"(2) The President shall appoint an alternate Commissioner who shall perform the duties of a Commissioner—

"(A) until a vacancy referred to in subsection (b)(3) is filled; and

"(B) in the event of the absence of a Commissioner from any meeting of the United States Section or the Commission.

"(b)(1) Except as provided in paragraph (2), the term of office of Commissioners appointed under subsection (a)(1)(B) is 6 years.

"(2) Of the Commissioners first appointed under subsection (a)(1)(B) after the date of the enactment of this subsection, 1 shall be appointed for a term of 2 years, 1 shall be appointed for a term of 4 years, and 1 shall be appointed for a term of 6 years.

"(3) Whenever a vacancy occurs among Commissioners appointed under subsection (a)(1)(B), the President shall appoint an individual to fill that vacancy for the remainder of the applicable term.".

(b) TRANSITION.—The term of office of each United States Commissioner on the Great Lakes Fishery Commission who is serving on the date of enactment of this Act is terminated (except the United States Government official appointed under section 3(a) of the Great Lakes Fishery Act of 1956 (16 U.S.C. 932(a), as in effect before the date of enactment). However, the individuals appointed to those terms shall continue to serve as Commissioners until the President makes appointments under section 3(b)(2) of the Act of 1956 (as added by subsection (a)), which appointments shall be made within 60 days after the date of enactment.

(c) CONFORMING AMENDMENT.—Section 201 of the Act entitled "An Act to amend the North Pacific Fisheries Act of 1954, and for other purposes", approved October 9, 1972 (22 U.S.C. 2672a) is amended by striking out "the Great Lakes Fishery Commission,".

SEC. 406. NOAA ESTUARINE PROGRAMS OFFICE.

(a) ESTABLISHMENT.—The Administrator of the National Oceanic and Atmospheric Administration (hereinafter in this section referred to as the "Administrator") shall establish within the Administration an Estuarine Programs Office.

(b) FUNCTIONS.—The Estuarine Programs Office shall—

(1) develop and implement a national estuarine strategy for the Administration that integrates the research, regulatory, and trusteeship responsibilities of the Administration;

(2) coordinate the estuarine activities of the various organizations within the Administration, including activities in estuarine research and assessment, fisheries research, coastal management, and habitat conservation;

(3) coordinate the estuarine activities of the Administration with the activities of other Federal and State agencies; and

(4) provide technical assistance to the Administrator, to other Federal agencies, and to State and local government agencies in—

(A) assessing the condition of estuaries;

(B) identifying estuaries of critical national or regional importance;

(C) identifying technical and management alternatives for the restoration and protection of estuarine resources; and

(D) monitoring the implementation and effectiveness of estuarine management plans.

(c) AUTHORIZATION.—There are authorized to be appropriated to the Administration not to exceed $500,000 for fiscal year 1987, $530,000 for fiscal year 1988, $560,000 for fiscal year 1989, and $600,000 for fiscal year 1990 to carry out the provisions of this section.

SEC. 407. NOAA OFFICERS.

(a) UNDER SECRETARY.—There shall be in the Department of Commerce an Under Secretary of Commerce for Oceans and Atmosphere who shall serve as the Administrator of the National Oceanic and Atmospheric Administration established by Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) and perform such duties as the Secretary of Commerce shall prescribe. The Under Secretary shall be appointed by the President by and with the advice and consent of the Senate and shall be compensated at the rate now or hereafter provided for Level III of the Executive Schedule Pay Rates (5 U.S.C. 5314).

(b) ASSISTANT SECRETARY.—There shall be in the Department of Commerce, in addition to the Assistant Secretaries of Commerce provided by law before the date of enactment of this Act, one additional Assistant Secretary of Commerce who shall have the title Assistant Secretary of Commerce for Oceans and Atmosphere and shall serve as the Deputy Administrator of the National Oceanic and Atmospheric Administration established by Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) and perform such duties and functions as the Under Secretary of Commerce for Oceans and Atmosphere shall prescribe. The Assistant Secretary for Oceans and Atmosphere shall be appointed by the President by and with the advice and consent of the Senate and shall be compensated at the rate now or hereafter provided for Level IV of the Executive Schedule Pay Rates (5 U.S.C. 5315).

(c) APPLICABILITY.—The individual serving on the date of the enactment of this Act—

(A) as the Administrator of the National Oceanic and Atmospheric Administration shall also serve as the Under Secretary of Commerce for Oceans and Atmosphere until such time as a successor is appointed under subsection (a) of this section; and

(B) as the Deputy Administrator of the National Oceanic and Atmospheric Administration shall also serve as the Assistant Secretary of Commerce for Oceans and Atmosphere until such time as a successor is appointed under subsection (b) of this section.

(d) CHIEF SCIENTIST OF NOAA.—Section 2(d) of Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) is amended to read as follows:

"(d) There shall be in the Administration a Chief Scientist of the National Oceanic and Atmospheric Administration who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for Level V of the Executive Schedule Pay Rates (5 U.S.C. 5316). The Chief Scientist shall be the principal scientific adviser to the Administrator, and shall perform such other duties as the Administrator may direct. The Chief Scientist shall be an individual who is, by reason of scientific education and experience, knowledgeable in the principles of oceanic, atmospheric, or other scientific disciplines important to the work of the Administration.".

(e) CONFORMING AMENDMENTS.—(1) Section 5314 of title 5, United States Code, is amended by striking out "Administrator, National Oceanic and Atmospheric Administration." and inserting in lieu thereof "Under Secretary of Commerce for Oceans and Atmosphere, the incumbent of which also serves as Administrator of the National Oceanic and Atmospheric Administration.".

(2) Section 5315 of title 5, United States Code, is amended—

(A) by striking "Deputy Administrator, National Oceanic and Atmospheric Adminis-

tration." and inserting in lieu thereof "Assistant Secretary of Commerce for Oceans and Atmosphere, the incumbent of which also serves as Deputy Administrator of the National Oceanic and Atmospheric Administration."; and

(B) by striking "Associate Administrator, National Oceanic and Atmospheric Administration.".

(3) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following:

"Chief Scientist, National Oceanic and Atmospheric Administration.".

SEC. 408. TRANSFER OF AUTHORITY FOR REIMBURSEMENT UNDER THE FISHERMEN'S PROTECTIVE ACT OF 1967.

Effective October 1, 1986, paragraph (1) of section 7(f) of the Fishermen's Protective Act of 1967 (22 U.S.C. 1977(f)(1)) is amended to read as follows:

"(1) the term 'Secretary' means the Secretary of State.".

SEC. 409. FISHERIES LOAN FUND.

The third sentence of section 4(c) of the Fish and Wildlife Act of 1956 (16 U.S.C. 742(c)) is amended to read as follows: "Any funds received in the fisheries loan fund after September 30, 1986, shall be covered into the Treasury as miscellaneous receipts.".

SEC. 410. CONVEYANCE AGREEMENT PROVISIONS.

(a) IN GENERAL.—Under the Agreement dated December 9, 1977, between the Commandant of the Coast Guard and Koniag, Incorporated, a regional native corporation, pursuant to Public Law 92-203 (a copy of which is recorded beginning at Book 44, Page 179 of the Kodiak Recording District, Kodiak, Alaska) and any conveyance made under that Agreement, the rights or title conveyed to Koniag, Incorporated, shall be construed to include the following:

(1) Under the Agreement, welding or other equipment or machinery may be operated or maintained on lands conveyed to Koniag, Incorporated, if the equipment or machinery does not cause harmful electromagnetic interference with the Coast Guard Holiday Beach receiver site or is operated or maintained under terms and conditions mutually agreeable to the Coast Guard and Koniag, Incorporated. Harmful electromagnetic interference is defined as radio frequency signals which disrupt or degrade communications reception performance.

(2) The conveyance of the "old shipyard" includes the wharf and all lands of any nature beneath the wharf.

(3) An access and utility easement is intended as part of the conveyance for Parcel 2, known as Cliff Point, which consists of—

(A) a 100-foot wide access easement along the existing access road or a location that is mutually agreeable to the Coast Guard and Koniag, Incorporated, and includes the right to construct and operate an access road, bridges, guard rails, and other associated improvements; and

(B) a 40-foot wide utility easement adjacent to the access easement in paragraph (3)(A) of this subsection or a location that is mutually agreeable to the Coast Guard and Koniag, Incorporated.

(4) The construction, maintenance, and operation of a dock facility or location of any structure or thing on the premises described in section (c) of Schedule 4 of the Agreement is not inconsistent with the easement for the barge landing easement and access to and from the barge landing area reserved by the United States Government (hereinafter referred to in this paragraph as the "Government"), if the dock facility is con- structed or the structure or thing is located as approved by the Government. Approval by the Government is deemed to be granted if a proposal for the construction and location of the dock facility, structure, or thing is submitted to the Government and—

(A) the Government does not respond within 60 days of receipt of the proposal; or

(B) if a response with recommendations for modification is submitted by the Government within 60 days of receipt of the proposal, the proposal is modified in a manner necessary to reasonably satisfy the requirements of the Government—

(i) to use the dock facility for a barge landing area as contemplated by the easement; and

(ii) to permit access to and from the barge loading area to public highways for the transportation of materials as specified in Agreement.

(b) APPLICATION.—All rights or conveyances confirmed by this section are subject to the sanctions in the Agreement referred to in subsection (a).

(c) IMPLEMENTATION.—The Commandant of the Coast Guard or other appropriate Federal officer shall issue the appropriate corrective conveyance and perform any other appropriate ministerial or official act necessary to carry out the purposes of this section within 60 days after the date of the enactment of this title.

SEC. 411. INCIDENTAL TAKING OF DEPLETED MARINE MAMMALS.

(a) AMENDMENT OF THE MARINE MAMMAL PROTECTION ACT.—Paragraph (5)(A) of section 101(a) of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1371(a)(5)(A)) is amended—

(1) by striking "that is not depleted";

(2) in clause (i)—

(A) by striking "its habitat, and" and inserting in lieu thereof "will not have an unmitigable adverse impact"; and

(B) by inserting "or, in the case of a cooperative agreement under both this Act and the Whaling Convention Act of 1949 (16 U.S.C. 916 et seq.), pursuant to section 112(c)" immediately after "or section 109(f)"; and

(3) in clause (ii)(I), by inserting ", and on the availability of such species or stock for subsistence uses" immediately after "significance".

(b) STATEMENT BY THE SECRETARY.—Paragraph 4 of section 7(b) of the Endangered Species Act of 1973 (16 U.S.C. 1536(b)(4)) is amended—

(1) by striking "and" at the end of subparagraph (A);

(2) by inserting "and" after the semicolon at the end of subparagraph (B); and

(3) by inserting after subparagraph (B) the following subparagraph:

"(C) if an endangered species or threatened species of a marine mammal is involved, the taking is authorized pursuant to section 101(a)(5) of the Marine Mammal Protection Act of 1972;";

(4) by striking "and" at the end of clause (ii);

(5) by redesignating clause (iii) as clause (iv) and by striking "clause (ii)" in that clause and inserting in lieu thereof "clauses (ii) and (iii)"; and

(6) by inserting after clause (ii) the following new clause:

"(iii) in the case of marine mammals, specifies those measures that are necessary to comply with section 101(a)(5) of the Marine Mammal Protection Act of 1972 with regard to such taking, and".

(c) EXEMPTIONS.—Subsection (o) of section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536(o)) is amended—

(1) in the matter preceding paragraph (1)—

(A) by inserting ", sections 101 and 102 of the Marine Mammal Protection Act of 1972," immediately before "or any regulation"; and

(B) by striking "either" and inserting in lieu thereof "any"; and

(2) in paragraph (2)—

(A) by striking out "(b)(4)(iii)" and inserting in lieu thereof "(b)(4)(iv)"; and

(B) by inserting "prohibited" immediately before "taking of the species".

SEC. 412. AUTHORITY TO ISSUE CERTAIN CERTIFICATES.

Notwithstanding sections 12105, 12106, 12107, and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), as applicable on the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for the following vessels: Dunes Spirit, United States official number 690176; Kodiak Queen, United States official number 507891; La Reina, United States official number 230115; Northwind, United States official number 230147; and Wanderbird, United States official number 229607.

SEC. 413. COAST GUARD CONTRACTS.

Notwithstanding any other provision of law, each contract awarded by the Coast Guard in fiscal year 1987 for construction or services to be performed in whole or in part in a State which has an unemployment rate in excess of the national average rate of unemployment (as determined by the Secretary of Labor) shall include a provision requiring the contractor to employ, for the purpose of performing that portion of the contract in that State, individuals who are local residents and who, in the case of any craft or trade, possess or would be able to acquire promptly the necessary skills. The Secretary of the department in which the Coast Guard is operating may waive the requirements of this subsection in the interest of national security or economic efficiency.

SEC. 414. MISCELLANEOUS AMENDMENTS TO TITLE 46, UNITED STATES CODE.

(a) DEFINITIONS.—Section 2102(11b) of title 46, United States Code, is amended by inserting "freezing," immediately after "icing,".

(b) TRAVEL AND EXPENSE REIMBURSEMENT.—(1) Chapter 75 of title 46, United States Code, is amended by adding at the end the following new section:

"§ 7504. Travel and expense reimbursement

"When a requirement to qualify for the issuance of, or endorsement on, a certificate, license, or document under this part is administered at a place at the request of an applicant or an applicant's representative, the applicant or representative may reimburse the Secretary for the travel and subsistence expenses incurred by the personnel assigned to perform the administration of the requirement. Amounts received as reimbursement under this section shall be credited to the appropriation for operating expenses of the Coast Guard.".

(2) The analysis of chapter 75 of title 46, United States Code, is amended by adding at the end the following:

"7504. Travel and expense reimbursement.".

Amend the title so as to read: "An Act to amend certain provisions of the law regard-

ing the fisheries of the United States, and for other purposes.".

WILD AND SCENIC RIVERS ACT

McCLURE AMENDMENT NO. 3404

Mr. CHAFEE (for Mr. McCLURE) proposed an amendment to the amendments of the House to the amendments of the Senate to the bill (H.R. 4350) to amend the Wild and Scenic Rivers Act, and for other purposes, as follows:

Add the following new title at the end of the act:

TITLE VII—TO PROVIDE RELIEF FOR CERTAIN DESERT LAND ENTRYMEN IN IDAHO

SEC. 701. The Congress finds that—

(1) certain developed and productive desert land entries in Idaho, identified in section 702 of this title, made pursuant to the Act entitled "An Act to provide for the sale of desert lands in certain States and Territories", approved March 3, 1877 (43 U.S.C. 321, et seq.), commonly known and hereinafter referred to as the "Desert Land Act", have been cancelled by the Secretary of the Interior pursuant to holding limitation regulations promulgated pursuant to section 7 of the Act (43 U.S.C. 329);

(2) such regulations were retroactively applied to such desert land entries several years after the entries were allowed and more than two years after final development, proof and final payment for such entries were made, without giving the entrymen any opportunity to comply with the new interpretation of such regulations;

(3) cancellation of such desert land entries was harsh and unfair, and resulted in forfeiture to the Government of the developed entries and the monies paid for the land;

(4) such entrymen have fulfilled the requirements of the Desert Land Act in all respects other than such holding limitation regulations; and

(5) such entrymen, or their heirs or devisees, should have the entries reinstated and qualify for issuance of patents to carry out the objectives of the Desert Land Act.

SEC. 702. The names of the entrymen, and the serial numbers of the desert land entries generally known as the "Sailor Creek Project", to which this title applies, are as follows:

Entryman	Bureau of Land Management Serial Number
G. Patrick Morris	Idaho 013820
John E. Roth	Idaho 013905
Elise L. Neeley	Idaho 013906
Lyle D. Roth	Idaho 013907
Vera M. Nobel (Now Baltzor)	Idaho 014126
Charlene S. Baltzor	Idaho 014128
George R. Baltzor	Idaho 014129
John E. Morris (deceased)	Idaho 014130
Juanita M. Morris	Idaho 014249
Nellie Mae Morris (deceased)	Idaho 014250
Milo Axelsen	Idaho 014251
Peggy Axelsen	Idaho 014252

SEC. 703. (a) The desert land entries identified in section 702 of this title are hereby reinstated. The entrymen, or the heirs or devisees of any deceased entryman, may—

(1) rescind any agreement which is prohibited by the Secretary of the Interior pursuant to regulations under section 7 of the Act (43 U.S.C. 329) within six months after the date of enactment of this title; and

(2) resubmit final proof of reclamation and cultivation of the land in accordance with the provisions of section 7 of the Act (43 U.S.C. 329) before December 31, 1988.

(b) The Secretary of the Interior shall issue patents to the entrymen named in section 702, or their heirs or devisees upon compliance with the provisions of subsection (a) and the submission of satisfactory final proof.

SEC. 704. Notwithstanding any other provision of law, the property right prior to issuance of a patent to the land of any entryman identified in section 702 of this title, or the heirs, or devisees of any such entryman whose entry is reinstated in accordance with section 703 of this title, shall be a personal right, inheritable but not assignable. Any such entry may be mortgaged in the manner permitted by regulations promulgated by the Secretary of the Interior for the purpose of securing repayment of monies borrowed for development of the entry or for farm operating or crop production expenses.

Add at the end of the Act new titles 8, 9 and 10 as follows:

TITLE VIII—BLACK REVOLUTIONARY WAR PATRIOTS MEMORIAL

SEC. 801. AUTHORIZATION OF MEMORIAL.

The Black Revolutionary War Patriots Foundation is authorized to establish a memorial of Federal land in the District of Columbia and its environs to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

FUNDING

SEC. 802. The Black Revolutionary War Patriots Foundation shall establish the memorial with non-Federal funds.

TITLE IX—WOMEN IN THE ARMED FORCES MEMORIAL

SEC. 901. AUTHORIZATION OF MEMORIAL.

The Women in Military Service for America Memorial Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor women who have served in the Armed Forces of the United States. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

SEC. 902. FUNDING.

The Women in Military Service for America Memorial Foundation shall establish the memorial with non-Federal funds.

TITLE X—NEW RIVER GORGE ADMINISTRATIVE SITE

SEC. 1001. Section 1102(a) of the National Parks and Recreation Act of 1978 (Public Law 95-625) is amended by inserting the following after the second sentence: "In addition, the Secretary may acquire by any of the foregoing methods not to exceed ten acres outside the boundaries of the national river for an administrative headquarters site, and funds appropriated for land acquisition shall be available for the acquisition of the administrative headquarters site.".

SEC. 1002. Section 1112 of the same act is amended by striking "$500,000" and inserting "$3,000,000".

ANTI-DRUG ABUSE ACT OF 1986

DOMENICI AMENDMENT NO. 3405

(Ordered to lie on the table)

Mr. DOMENICI submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra; as follows:

On page 432, strike all beginning with "verifying" on line 7 through "with respect to," on line 8 and insert in lieu thereof "making aid available to".

On page 432, lines 14 and 14, strike "verifying the eligibility of, and".

NATIONAL APPLIANCE ENERGY CONSERVATION ACT

EVANS AMENDMENT NO. 3406

Mr. EVANS proposed an amendment to the bill (H.R. 5465) to amend the Energy Policy and Conservation Act with respect to energy conservation standards for appliances, as follows:

On page 40, line 18, after "regulation" insert the following: "effective on or after January 1, 1992".

McCLURE (AND OTHERS) AMENDMENT NO. 3407

Mr. EVANS (for Mr. McCLURE, for himself, Mr. KASTEN, and Mr. PROXMIRE) proposed an amendment to the bill H.R. 5465, supra; as follows:

At the end of the bill add the following new section:

SEC. 12. FERC Requirement.

"(a) Notwithstanding any other applicable provision of law, on November 17, 1986, or within 10 working days thereafter, the Federal Energy Regulatory Commission shall, in the case of ANR Pipeline Company, FERC Docket No. RP82-80, filed April 30, 1982, publish a schedule for issuing a final order in such case, which schedule shall provide for such order to be issued not later than February 28, 1987. Such schedule shall include an opportunity for an oral argument prior to issuance of such final order, as requested by one or more of the parties, unless the Commission determines that such argument would not assist the Commission in deciding such case.

"(b) Except as expressly provided in subsection (a), nothing in this section shall affect—

"(1) any Stipulation and Agreement reached by the parties in such case or any applicable provisions of law with respect thereto;

"(2) the right of any party to such case to appeal the final order issued in such case in accordance with the applicable provisions of law; or

"(3) any other applicable provisions of law with regard to any such ruling or order."

McCLURE (AND SYMMS) AMENDMENT NO. 3408

Mr. EVANS (for Mr. McCLURE), (for himself and Mr. SYMMS) proposed an amendment to the bill H.R. 5465, supra, as follows:

At the end of the bill add the following new section:

"SEC. 13—Miscellaneous.

"(a) FERC ORDER.—Notwithstanding any petition filed by the Idaho Power Company on November 26, 1984 with the Federal Energy Regulatory Commission for a declaratory order concerning an Agreement dated October 25, 1984 (Exhibit A, Petition of Idaho Power Company for Declaratory Order, Docket No. EL 85-38-000) relative to the projects of such company specifically referenced in the petition, the Federal Energy Regulatory Commission is only authorized and directed, in lieu of the petition request, to issue an order within 90 days after enactment of this Act under the Federal Power Act that such Agreement shall not be considered by the Commission in any subsequent proceeding before the Commission during the remaining term of the licenses applicable to such projects, to be (1) inconsistent with the terms and conditions of such licenses concerning project property or the utilization thereof; or (2) imprudent for purposes of section 205 of the Federal Power Act.

"(b) SAVINGS PROVISION.—Nothing in this section or in any order issued by the Commission pursuant to this section, shall be construed as affecting any stipulation or other agreement entered into with the State of Idaho or the Idaho Power Company prior to enactment of this section relating to any fish and wildlife matters affected by any such project. Except as expressly provided in subsection (a), nothing in such subsection shall affect the application or requirements of section 10 of the Federal Power Act or any other provision of such Act to any person or project."

GRAMM (AND OTHERS) AMENDMENT NO. 3409

Mr. GRAMM (for himself, Mr. NICKLES, Mr. McCLURE, Mr. DOLE, Mr. STEVENS, Mr. COCHRAN, Mr. HELMS, Mr. MURKOWSKI, Mr. SIMPSON, Mr. WALLOP, Mr. BOREN, Mr. DOMENICI, and Mrs. KASSEBAUM) proposed an amendment to the bill H.R. 5465, supra, as follows:

At the end of the bill, add the following new title:

TITLE —OIL AND GAS PRODUCTION REVITALIZATION ACT

SEC. *01. SHORT TITLE.

This title may be cited as the "Oil and Gas Production Revitalization Act".

Subitile A—Oil Provisions

SEC. *11. WINDFALL PROFIT TAX REPEAL.

(a) Chapter 45 of the Internal Revenue Code of 1954 is repealed.

(b)(1) Sections 6050C, 6076, 6232, 6430, and 7241 of the Internal Revenue Code of 1954 are repealed.

(2)(A) Subsection (a) of section 164 of such Code is amended by striking paragraph (5).

(B) Paragraph (3) of section 168(i) of such Code is amended by striking "(A) In general.—" and subparagraph (B).

(C) The following provisions of such Code are each amended by striking "44, or 45" each place it appears and inserting "or 44":

(i) section 6211(a),
(ii) section 6211(b)(2),
(iii) section 6212(a),
(iv) section 6213(a),
(v) section 6213(g),
(vi) section 6214(c),
(vii) section 6214(d),
(viii) section 6161(b)(1),
(ix) section 6344(a)(1), and
(x) section 7422(e).

(D) Subsection (a) of section 6211 of such Code is amended by striking "44, and 45" and inserting "and 44".

(E) Subsection (b) of section 6211 of such Code is amended by striking paragraphs (5) and (6).

(F) Paragraph (1) of section 6212(b) of such Code is amended—

(i) by striking "chapter 44, or chapter 45" and inserting "or chapter 44", and

(ii) by striking "chapter 44, chapter 45, and this chapter" and inserting "chapter 44, and this chapter".

(G) Paragraph (1) of section 6212(c) of such Code is amended—

(i) by striking "of chapter 42 tax" and inserting "or of chapter 42 tax", and

(ii) by striking ", or of chapter 45 tax for the same taxable period".

(H) Subsection (e) of section 6302 of such Code is amended by striking paragraph (2).

(I) Section 6501 of such Code is amended by striking subsection (p).

(J) Section 6511 of such Code is amended by striking subsection (h) and redesignating subsection (i) as subsection (h).

(K) Subsection (a) of section 6512 of such Code is amended—

(i) by striking "of tax imposed by chapter 41" and inserting "or of tax imposed by chapter 41", and

(ii) by striking ", or of tax imposed by chapter 45 for the same taxable period".

(L) Paragraph (1) of section 6512(b) of such Code is amended—

(i) by striking "of tax imposed by chapter 41" and inserting "or of tax imposed by chapter 41", and

(ii) by striking ", or of tax imposed by chapter 45 for the same taxable period".

(M) Section 6611 of such Code is amended by striking subsection (h) and redesignating subsections (i) and (j) as subsections (h) and (i), respectively.

(N) Subsection (a) of section 6653 of such Code is amended—

(i) by striking "Gift, or Windfall Profit Taxes", in the heading and inserting "or Gift Taxes",

(ii) by striking ", or by chapter 45 (relating to windfall profit tax)" in paragraph (1), and

(iii) by striking the comma after "subtitle A" in paragraph (1) and inserting "or".

(O) Paragraph (3) of section 6678(a) of such Code is amended by striking subparagraphs (A) and (C) and redesignating subparagraphs (B), (D), (E), and (F) as subparagraphs (A), (B), (C), and (D), respectively.

(P) Subsection (a) of section 6862 of such Code is amended by striking "44, and 45" and inserting "and 44".

(Q) Section 7512 of such Code is amended—

(i) by striking ", by chapter 33, or by section 4986" in subsections (a) and (b) and inserting "or chapter 33", and

(ii) by striking ", chapter 33, or section 4986" in subsections (b) and (c) and inserting "or chapter 33".

(3)(A) The table of contents of subtitle D of such Code is amended by striking the item relating to chapter 45.

(B) The table of contents of subpart B of part III of subchapter A of chapter 61 is amended by striking the item relating to section 6050C.

(C) The table of contents of part V of such subchapter is amended by striking the item relating to section 6076.

(D) The table of contents of subchapter C of chapter 63 is amended by striking the item relating to section 6232.

(E) The table of contents of subchapter B of chapter 65 is amended by striking the item relating to section 6430.

(F) The table of contents of part II of subchapter A of chapter 75 is amended by striking the item relating to section 7241.

(c) The amendments made by this section shall apply to crude oil removed from the premises beginning after December 31, 1986.

SEC. *12. STRATEGIC PETROLEUM RESERVE PETROLEUM ACQUISITION.

Section 160 of the Energy Policy and Conservation Act (42 U.S.C. 6240) is amended by adding after subsection (e) the following new subsection:

"(f)(1) The Secretary shall assure that at least 50 percent, by volume, of the petroleum products acquired for storage in the Strategic Petroleum Reserve during each fiscal year, exclusive of crude oil produced from the Naval Petroleum Reserves or received in kind as royalties from production on Federal lands, are derived from domestic crude oil production, provided that these domestic petroleum products can be aquired at delivered prices that are no less favorable to the United States than the price of comparable foreign petroleum products available to the Reserve, exclusive of duty.

"(2) If, during the acquisition of domestic petroleum products for the Strategic Petroleum Reserve, the Secretary determines that the requirement in paragraph (1) of this subsection cannot be met, the Secretary may acquire imported petroleum products totaling more than 50 percent of the petroleum products acquired for storage in the Reserve for that fiscal year.

"(3) The Secretary may issue the regulations and directives necessary to carry out this subsection.".

SEC. *13. INVESTIGATIONS BY DEPARTMENT OF COMMERCE.

(a) The Congress finds that—

(1) falling oil prices are encouraging increased consumption of petroleum products while discouraging petroleum exploration and development;

(2) broad sectors of the economy have suffered severe impacts as a result of the sharp decline of the energy industry;

(3) the decline in domestic exploration and development could result in increased dependence on imports of energy resources from unreliable sources;

(4) surplus worldwide production capacity may discourage oil and gas exploration investment, development of alternative sources of energy, and conservation by the United States and its allies;

(5) a healthy domestic energy industry and reliable international energy sources are critical to assure an adequate supply of energy at a reasonable cost, minimize our dependence on unreliable sources, assure free and fair trade in energy products, and attain the goal of energy independence and diversification; and

(6) the Administration has, in response, implemented a number of appropriate

changes in Federal energy programs, including a decision to fill the Strategic Petroleum Reserve, revision of natural gas valuation methods to better reflect actual market prices, and implementation of procedures to prevent premature abandonment of producing oil and gas wells, both onshore and offshore, and is seeking to identify further actions to respond to these conditions and assure our national security.

(b)(1) The Congress is deeply concerned about the adverse effects of the current state of the energy industry on the national security and economic well-being of the United States. Therefore the Congress urges the Administration to expand upon the initiatives already undertaken by identifying and using all authority available, consistent with free market principles and protection of the environment, to increase the exploration and development of domestic energy resources. The Congress also urges the President to take whatever actions are necessary and appropriate to protect our national security. To accomplish this, the Congress strongly urges the Secretary of Commerce to undertake immediately, upon fulfillment of the requirements of section 232(b) of the Trade Expansion Act of 1962 (19 U.S.C. 1862(b)), and to complete as soon as feasible a study under section 232 of the Trade Expansion Act of 1962 of the national security effects and implications of the current and projected levels of petroleum imports into this Nation.

(2) The Congress urges the President to evaluate any study conducted by the Secretary of Commerce pursuant to section 232 of the Trade Expansion Act of 1962 and take appropriate action without causing undue adverse effects on our domestic and international economic interests.

(3) The Congress urges the Department of Commerce in conjunction with other affected departments to fully analyze the economic impact of current restrictions on the export of oilfield equipment and drilling technology as required in the Export Administration Act of 1979, as amended. The Congress specifically urges that the required study for 1986 assess the present effect of such restrictions on employment and growth of the United States economy, taking into account the recent domestic change in a number of sectors of the energy industry, and further assess the availability of other similar technologies from Western countries. Due to the particular impact of foreign policy controls on the domestic oil and gas equipment and technology industry the Congress urges that the study be undertaken immediately upon passage of this title.

Subtitle B—Natural Gas Provisions

SEC. *21. TRANSPORTATION OF NATURAL GAS.

(a) Section 311(a) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3371(a)) is amended by—

(1) amended paragraph (1) to read as follows:

"(1) IN GENERAL.—The commission, by rule or order, may authorize any pipeline to transport natural gas on behalf of any person.";

(2) redesignating paragraph (1)(B) as paragraph (2);

(3) striking paragraph (2)(A);

(4) redesignating paragraphs (2)(B)(i), (2)(B)(ii), (2)(B)(ii)(I), and (2)(B)(ii)(II) as paragraphs (3)(A), (3)(B), (3)(B)(i), and (3)(B)(ii), respectively; and

(5) adding a new paragraph (4) to read as follows:

"(4) NON-DISCRIMINATION.—

"(A) A pipeline transporting gas pursuant to this subsection shall do so without discrimination.

"(B) A intrastate pipeline receiving gas pursuant to this subsection shall provide transportation service pursuant to this subsection without discrimination.".

(b)(1) Title III of the Natural Gas Policy Act of 1978 (15 U.S.C. 3361-3375) is amended by adding the following new section:

"SEC. 316. OPEN ACCESS CARRIAGE.

"Upon request by any person, the Commission shall order any interstate pipeline to provide transportation service without discrimination unless the pipeline demonstrates to the Commission that it lacks the physical capacity necessary to render the service. The Commission may implement this section by rule or order, and may attach appropriate terms and conditions consistent with the fullest practicable use of capacity. The rates and charges for transportation service under this section shall be just and reasonable within the meaning of the Natural Gas Act.".

(2) The table of contents of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301 note) is amended by adding after the item relating to section 315 the following:

"Sec. 316. Open access carriage.".

SEC. *22. FUEL USE ACT.

(a) The following sections of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 et seq.) are repealed:

(1) sections 103 (a)(16), (a)(18), (a)(19), and (a)(29) (42. U.S.C. 8302 (a)(16), (a)(18), (a)(19), and (a)(29));

(2) sections 201(1) and 202 (42 U.S.C. 8311(1) and 8312);

(3) section 302 (42 U.S.C. 8342);

(4) section 401 (42 U.S.C. 8371);

(5) section 402 (42 U.S.C. 8372); and

(6) section 405 (42 U.S.C. 8375).

(b) The table of contents in section 101(b) of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301(b)) is amended by striking the items relating to the sections repealed by subsection (1) of this section.

(c)(1) Section 102 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301) is amended by striking "major fuel-burning installations" each place it appears.

(2) Section 103 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8302) is amended—

(A) in subsection (a)(13)(B), by—

(i) striking clause (ii)(III);

(ii) striking "; or" at the end of clause (ii)(II), and inserting a period in its place; and

(iii) inserting "and" at the end of clause (ii)(I);

(B) in subsection (a)(15), by striking "or major fuel-burning installation" each place it appears;

(C) in subsection (a)(20), by striking "or major fuel-burning installation";

(D) by redesignating subsections (a)(17), (a)(20), (a)(21), (a)(22), (a)(23), (a)(24), (a)(25), (a)(26), (a)(27), and (a)(28), as subsections (a)(16), (a)(17), (a)(18), (a)(19), (a)(20), (a)(21), (a)(22), (a)(23), (a)(24), (a)(25), respectively;

(E) in subsection (b), by striking "or major fuel-burning installation" wherever this phrase appears;

(F) in subsection (b)(1)(D), by striking everything after "synthetic gas involved" and inserting in its place a period; and

(G) by striking subsection (b)(3), and redesignating subsection (b)(4) as subsection (b)(3).

(3) Section 104 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8303) is amended to read as follows:

"The provisions of this Act shall apply in all the States, Puerto Rico, and the territories and possessions of the United States.".

(4) Section 211 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8321) is amended by striking subsection (c) and redesignating the following subsections accordingly.

(5) Section 303 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8343) is amended by—

(A) striking "or installation" and "or installations" wherever the phrases appear;

(B) striking "or 302" wherever the phrase appears;

(C) striking subsection (a)(3);

(D) amending subsection (b)(1) to read as follows:

"(1) The Secretary may prohibit, by rule, the use of natural gas or petroleum under section 301(b) in existing electric powerplants.";

(E) in subsection (b)(3), striking "or major fuel-burning installation"; and

(F) amending the last sentence of subsection (b)(3) to read as follows: "Any such rules shall not apply in the case of any existing electric powerplant with respect to which a comparable prohibition was issued by order.".

(6) Section 403 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8373) is amended by striking—

(A) in subsection (a)(1), "major fuel-burning installation, or other unit" and the comma immediately preceding this phrase and "installation, or unit" and the comma immediately preceding this phrase;

(B) in subsection (a)(2), "installation, or other unit" and the comma immediately preceding that phrase, and "installation, or unit" and the comma immediately preceding that phrase;

(C) in subsection (a)(2), the last sentence; and

(D) subsection (a)(3).

(7) Section 404 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8374) is amended by striking—

(A) in subsection (c), "new or' in phrase "applicable to any new or existing electric powerplant"; and

(B) subsection (g).

(8) Section 701 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8411) is amended by striking—

(A) in the last sentence of subsection (b), "or installation";

(B) subsection (c);

(C) in the title of subsection (d), "AND EXEMPTIONS";

(D) in the first sentence granting an exemption (or permit)"; of subsection (d)(2), "or any petition for any order"

(E) in subsection (d)(1)(B), "or in the consideration of such petition";

(F) in subsection (f), "or a petition for an exemption (or permit) under this Act (other than under section 402 or 404),"; and

(G) subsection (g).

(9) Section 702 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8412) is amended by striking—

(A) in the title of subsection (a), "OR EXEMPTION";

(B) in subsection (a), "or granting an exemption (or permit)";

(C) subsection (b), and redesignating subsection (c) as subsection (b);

(D) in the first sentence of subsection (b)(1) (as redesignated) ", or by the denial

of a petition for an order granting an exemption (or permit) referred to in subsection (b),";

(E) in the first sentence of subsection (b)(1) (as redesignated), "such rule, order, or denial is published under subsection (a) or (b)" and inserting in its place "such rule or order is published under subsection (a)";

(F) in the first sentence of subsection (b)(2) (as redesignated), "the rule, order, or denial" and inserting in its place "the rule or order";

(G) in the second sentence of subsection (b)(2) (as redesignated), "(or denial thereof)"; and

(H) in subsection (b)(3) (as redesignated), "any such rule, order, or denial" and inserting in its place "any such rule or order".

(10) Section 711 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8421) is amended by striking in the first sentence of subsection (a), "or major fuel-burning installation".

(11) Section 721 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8431) is amended by striking subsection (c) and redesignating subsection (d) as subsection (c).

(12) Section 723 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8433) is amended by striking subsection (b) and redesignating subsections (c) and (d) as subsections (b) and (c), respectively.

(13) Section 731 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8441) is amended by striking—

(A) "or major fuel-burning installation" wherever the phrase appears; and

(B) "title II or" subsections (a)(1) and (g)(3).

(14) Section 745 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8455) is amended by striking in the first sentence of subsection (a), "from new and existing electric powerplants and major fuel-burning installations" and inserting in its place "from existing electric powerplants".

(15) Section 761 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8471) is amended by striking—

(A) in subsection (a), "any existing or new electric powerplant or major fuel-burning installation" and inserting in its place "any existing electric powerplant"; and

(B) in subsection (b)—

(i) "new or" in the phrase "In the case of any new or existing facility"; and

(ii) "except to the extent provided under section 212(b) or section 312(b)" and the comma immediately preceding that phrase.

(d)(1) Subject to paragraphs (2) and (3), title II of the Natural Gas Policy Act of 1978 (15 U.S.C. 3341-3348) is repealed, and the items relating to title II are stricken from the table of contents of that Act.

(2) A rule promulgated by the Commission under title II of the Natural Gas Policy Act of 1978 shall continue in effect only with respect to the flow-through of costs incurred before the enactment of the Oil and Gas Production Revitalization Act, including any surcharges based on such costs.

(3) The Commission may take appropriate action to implement this section.

SEC. *23. LIMITED ANTITRUST EXEMPTION FOR INDEPENDENT PRODUCER COOPERATIVES.

(a) There shall be available as a defense to any civil or criminal action brought under the Federal antitrust laws as that term is defined in section 2(37) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301(37)), or any similar State law, with respect to action taken to develop cooperative associations of independent producers or actions taken by such cooperative associations to carry out any voluntary agreement or plan of action to market natural gas if—

(1) the action is necessary to market natural gas, and

(2) the action is not taken for the purpose of reducing competition.

(b) For purposes of this section, the term "independent producer" means, with respect to any quarter, any person other than a person to whom subsection (c) of section 613A of the Internal Revenue Code of 1954 does not apply by reason of paragraph (2) (relating to certain retailers) or paragraph (4) (relating to certain refiners) of section 613A(d) of such Code. For purposes of the preceding sentence, paragraphs (2) and (4) of section 613A(d) shall be applied by substituting "quarter" for "taxable year" each place it appears in such paragraphs, and by substituting "$1,250,000" for "$5,000,000" in paragraph (2) of section 613A(d).

SEC. *24. FAIR STANDARD FOR COMPARING COST OF PURCHASED GAS SUBJECT TO COMMISSION JURISDICTION.

Section 4(a) of the National Gas Act of 1938 (15 U.S.C. 717(b)) is amended by adding at the end thereof the following new paragraph:

"In ascertaining whether any amount paid in any purchase of natural gas for resale (other than a first sale of natural gas as defined in section 2(21)) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301) is just and reasonable, the Commission shall consider the full cost of the purchased gas, both demand and commodity rates, it separately stated. Nothing in this section shall affect the jurisdiction of the Secretary of Energy under section 3 of the Natural Gas Act.

Subtitle C—Regulatory Reform Provisions

SEC. *31. REGULATION OF PRODUCTION WASTES UNDER THE SOLID WASTE DISPOSAL ACT.

Section 8002(m) of the Solid Waste Disposal Act (42 U.S.C. 6982(m)) is amended—

(1) in paragraph (1) by adding at the end the following new sentence: "The Administrator shall conduct the study and prepare the report with the participation of the Secretary of Energy; the Secretary of the Interior; representatives of the industries associated with the exploration, development, or production of crude oil or natural gas or geothermal energy; and representatives of the State agencies that regulate these industries."; and

(2) in paragraph (2) by striking "twenty-four months from the date of enactment of the Solid Waste Disposal Act Amendments of 1980" and inserting in its place "January 1, 1989".

SEC. *32. UNDERGROUND STORAGE TANKS.

Section 9001(1) of the Solid Waste Disposal Act (42 U.S.C. 6991(1)) is amended—

(1) in subparagraph (H) by inserting "; well cellars, sumps, or drip collection devices" after "lines" and by striking out "or" at the end thereof; and

(2) by redesignating paragraph (I) as paragraph (J) and by adding after paragraph (H) the following:

"(I) hydraulic lift reservoirs in petroleum marketing operations, oil/water separators in petroleum marketing, production, and refining operations, and sumps in petroleum marketing and refining operations, or".

SEC. *33. FACILITY VARIANCES.

It is the sense of Congress that—

(1) fundamentally different factors variances should be available for any facility that is subject to national effluent limitation guidelines including, but not limited to, the oil and gas extraction point source category; and

(2) applications for fundamentally different factors variances from national effluent limitation guideline requirements for the oil and gas extraction industry may be based upon information and supporting data which had not been submitted earlier to the Administration, but shall be submitted at the earliest practicable time that such information and data exist or is reasonably available to the applicant.

SEC. *34. RECYCYLING ACTIVITIES.

It is the sense of Congress that the "mixture" and "derived from" rules in 40 CFR 261.3 were promulgated to address intentional dilution of hazardous wastes—a mismanagement practice designed to avoid regulation. These rules should not be invoked to curtail recycling activities in the petroleum industry designed to conserve resources or minimize wastes when there is no information to demonstrate that the recycling activities pose any threat to human health and the environment.

SEC. *35. LAND TREATMENT SITES.

It is the sense of Congress that—

(1) the Administrator of the Environmental Protection Agency should encourage continued use of land treatment for petroleum waste to the extent consistent with protection of human health and the environment;

(2) protection of human health and the environment from air emissions at land treatment units under the Solid Waste Disposal Act should be addressed solely through promulgation of standards under section 3004(n) of such Act;

(3) land treatment should be determined to be protective of human health and the environment under subsections (d), (e), and (g) of section 3004 of the Solid Waste Disposal Act when an owner or operator demonstrates there will be no statistically significant increase of hazardous constituents over background to groundwater arising from placement of hazardous waste at the land treatment unit; and

(4) land treatment of petroleum waste should be considered to be a method of treatment which meets the requirements of section 3004(m) of the Solid Waste Disposal Act (42 U.S.C. 6924(m)).

SEC. *36. INDUSTRY ACCOUNTING METHODS.

It is the sense of Congress that—

(1) the full cost method of accounting for oil and gas operations should continue to be recognized as an acceptable financial accounting practice in the United States;

(2) financial statements using the full cost method should continue to be accepted in documents filed with all Federal agencies, including registration statements, reports and other filings with the Securities and Exchange Commission; and

(3) the use of the full cost method should not be limited by action of any Federal regulatory agency.

ANTI-DRUG ABUSE ACT OF 1986

MATHIAS AMENDMENT NOS. 3410 THROUGH 3422

(Ordered to lie on the table.)

Mr. MATHIAS submitted 13 amendments intended to be proposed by him to the motion to concur, with an

amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill, H.R. 5484, supra, as follows:

AMENDMENT No. 3410

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) No person may be sentenced to death under this section for an offense for which a sentence of death is not authorized under the law of the State in which the defendant resided at the time posecution was initiated.

AMENDMENT No. 3411

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) No person may be sentenced to death under this section for an offense for which a sentence of death is not authorized under the law of the State in which the defendant is domiciled.

AMENDMENT No. 3412

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) No person may be sentenced to death under this subsection for an offense for which a sentence of death is not authorized under the law of the State in which the execution is to be carried out.

AMENDMENT No. 3413

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) No person may be sentenced to death under this section for an offense for which a sentence of death is not authorized under the provisions of the law of the State in which the offense is committed.

AMENDMENT No. 3414

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

( ) No person may be sentenced to death under this section for an offense for which a sentence of death is not authorized under the law of the State in which the defendant has been indicted.

AMENDMENT No. 3415

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following subsection:

"IMPLEMENTATION OF DEATH SENTENCES BY ELECTROCUTION"

"( ) A sentence of death rendered pursuant to this section shall not be implemented by electrocution. If the method of execution prescribed by the sentencing court is prohibited by this section a sentence other than death shall be imposed."

AMENDMENT No. 3416

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following subsection:

"IMPLEMENTATION OF DEATH SENTENCES BY INJECTION"

"( ) A sentence of death rendered pursuant to this section shall not be implemented by lethal injection. If the method of execution prescribed by the sentencing court is prohibited by this section a sentence other than death shall be imposed."

AMENDMENT No. 3417

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following subsection:

"IMPLEMENTATION OF DEATH SENTENCES BY HANGING"

"( ) A sentence of death rendered pursuant to this section shall not be implemented by hanging. If the method of execution prescribed by the sentencing court is prohibited by this section a sentence of other than death shall be imposed."

AMENDMENT No. 3418

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) A sentence of death shall not be imposed upon any individual who is terminally ill.

AMENDMENT No. 3419

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) A sentence of death shall not be imposed upon any individual who is pregnant.

AMENDMENT No. 3420

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment no. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) A sentence of death shall not be imposed upon any individual who is mentally ill.

AMENDMENT No. 3421

Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by subtitle U of Title I of amendment No. 3275, as modified, is further amended as follows:

At the end of the section, add the following new subsection:

( ) A sentence of death shall not be imposed on any person who is unable to understand the fact of his impending execution or the reason for it.

AMENDMENT No. 3422

Subsection (h) of section 408 of the Controlled Substances Act, as added by section 1951(b) of the Senate amendment as modified is amended by inserting the following at the conclusion of paragraph (2) thereof—

"(3) In every criminal action in which a defendant is charged with a crime which may be punishable by death under this subtitle a person may not be disqualified, excused or excluded from service as a juror therein by reason of his/her beliefs or attitudes against capital punishment unless such beliefs or attitudes would render him/her unable to return a verdict of guilty according to law."

DOMENICI AMENDMENT No. 3423

(Ordered to lie on the table.)

Mr. DOMENICI submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484 supra as follows:

On page 41, beginning with line 14, strike all through line 13 of page 45 and insert in lieu thereof the following:

SEC. 1152. ASSET FORFEITURE FUNDS.

(a) DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.—Subsection (c) of section 524 of title 28, United States Code, is amended—

(2) by inserting at the end of subparagraph (A) of paragraph (1) the following: "such payments may also include those, made pursuant to regulations promulgated by the Attorney General, that are necessary and direct program-related expenses for the purchase or lease of automatic data processing equipment (not less than 90 percent of which use will be program related), training, printing, contracting for services directly related to the processing of and accounting for forfeitures, and the storage, protection, and destruction of controlled substances;";

(3) by inserting after subparagraph (A) of paragraph (1) the following new subparagraph and renumbering the subsequent subparagraphs appropriately;

"(B) the payment of awards for information or assistance directly relating to violations of the criminal drug laws of the United States;".;

(4) by amending newly designated subparagraph (F) of paragraph (1) to read as follows:

"(F) for equipping for drug law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the Drug Enforcement Administration, the Federal Bureau of Investigation, the Immigration and Naturalization Service, or the United State Marshals Service; and";

(5) by striking out in paragraph (4) "remaining after payment of expenses for forfeiture and sale authorized by law" and inserting in lieu thereof ", except all proceeds of forfeitures available for use by the Secretary of the Treasury or the Secretary of the Interior pursuant to section 11(d) of the Endangered Species Act (16 U.S.C. 1540(d)) or section 6(d) of the Lacey Act Amendments of 1981 (16 U.S.C. 3375(d))";

(6) by striking out paragraph (8) and renumbering paragraph (9) as paragraph (8); and

(7) by adding at the end of the subsection the following new paragraph:

"(9)(A) If any funds deposited in the Department of Justice Assets Forfeiture Fund or the Customs Forfeiture Fund (19 U.S.C. 1613a, 1613b) are not expended or obligated prior to thirty days after the end of the fiscal year, 90 percent of such funds (not to exceed amounts specified in appropriation

Acts) shall be transferred into a Special Forfeiture Fund.

"(B) The funds in the Special Forfeiture Fund shall be disbursed (in amounts not to exceed amounts specified in appropriation Acts), during the fiscal year in which they are transferred into the Special Fund, by the Attorney General, after consultation with the Secretary of the Treasury, the Secretary of Health and Human Services, and the Secretary of Education, to enhance the following efforts:

"(i) Federal drug law enforcement agencies and programs;

"(ii) Federal drug abuse agencies and programs relating to drug abuse education, prevention, treatment, rehabilitation, and research;

"(iii) State, local, and nonprofit agencies with drug abuse responsibilities; and

"(iv) State and local law enforcement agencies for drug law enforcement efforts, under subtitle M of title I of the Omnibus Crime Control and Safe Streets Act of 1986 (42 U.S.C. 3721 et seq.).

"(C) Funds disbursed from the Special Forfeiture Fund shall not be used to supplant existing funds, but shall be used to supplement funds that are otherwise available.

"(D) The Attorney General shall report annually to the Congress on all disbursements made under the authority of subparagraph (B).".

(b) CUSTOMS FORFEITURE FUND.—

(1) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613a) as added by Public Law 98-473, is amended—

(B) by amending paragraph (3) of subsection (a) to read as follows:

"(3) for equipping for law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the United States Customs Service; and"; and

(C) by striking out subsection (h).

(2) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613b) as added by Public Law 98-573, is repealed.

OWNERSHIP OF CERTAIN COGENERATION FACILITIES BY PUBLIC UTILITY HOLDING COMPANIES

KASTEN (AND PROXMIRE) AMENDMENT NO. 3424

Mr. DOLE (for Mr. KASTEN, for himself and Mr. PROXMIRE) proposed an amendment to the bill (H.R. 5056) to permit registered public utility companies to own certain interests in qualifying cogeneration facilities; as follows:

"Strike all of Section 2."

METZENBAUM AMENDMENT NOS. 3425 THROUGH 3450

(Ordered to lie on the table.)

Mr. Metzenbaum submitted 26 amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, to the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3425

Strike section 1801 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3426

Strike section 1802 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3427

Strike section 1803 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3428

Strike section 1804 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3429

Strike section 2001 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3430

Strike section 2002 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3431

Strike section 2003 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3432

Strike section 2004 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3433

Strike section 2005 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3434

Strike section 2006 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3435

Strike section 2007 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3436

Strike section 2008 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3437

Strike section 2009 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3438

Strike section 2010 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3439

Strike section 2011 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3440

Strike section 2012 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3441

Strike section 2013 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3442

Strike section 2014 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3443

Strike section 2018 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3444

Strike section 2016 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3445

Strike section 2017 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3446

Strike section 2018 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3447

Strike section 2019 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3448

Strike section 2020 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3449

Strike section 2021 of Senate Amendment No. 3275 as modified.

AMENDMENT No. 3450

Strike section 2022 of Senate Amendment No. 3275 as modified.

WILSON AMENDMENT NO. 3451

(Ordered to lie on the table)

Mr. WILSON submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

On page 41, beginning with line 14, strike all through line 13 on page 45 and insert in lieu thereof the following:

SEC. 1152. ASSET FORFEITURE FUNDS.

(a) DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.—Subsection (c) of section 524 of title 28, United States Code, is amended—

(1) by inserting at the end of subparagaph (A) paragraph (1) the following: "such payments may also include those, made pursuant to regulations promulgated by the Attorney General, that are necessary and direct program-related expenses for the purchase or lease of automatic data processing equipment (not less than 90 percent of which use will be program related), training, printing, contracting for services directly related to the processing of and accounting for forefeitures, and the storage, protection, and destruction of controlled substances;"

(2) by inserting after subparagraph (A) of paragraph (1) the following new subparagraph and renumbering the subsequent subparagraphs appropriately;

"(B) the payment of awards for information or assistance directly relating to violations of the criminal drug laws of the United States;";

(3) by amending newly designated subparagraph (F) of paragraph (1) to read as follows:

"(F) for equipping for drug law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the Drug Enforcement Administration, the Federal Bureau of Investigation, the Immigration and Naturalization Service, or the United States Marshals Service; and";

(4) by striking out in paragraph (4) "remaining after payment of expenses for forfeiture and sale authorized by law" and inserting in lieu thereof ", except all proceeds of forfeitures available for use by the Secretary of the Treasury or the Secretary of the Interior pursuant to section 11(d) of the En-

dangered Species Act (16 U.S.C. 1540(d)) or section 6(d) of the Lacey Act Amendments of 1981 (16 U.S.C. 3375(d))";

(5) by striking out paragraph (8) renumbering paragraph (9) as paragraph (8); and

(b) CUSTOMS FORFEITURE FUND.—

(1) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613a) as added by Public Law 98-473, is amended—

(A) by amending paragraph (3) of subsection (a) to read as follows:

"(3) for equipping for law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the United States Customs Service; and"; and

(B) by striking out subsection (h).

(2) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613b) as added by Public Law 98-573, is repealed.

SIMON AMENDMENT NOS. 3452 AND 3453

(Ordered to lie on the table.)

Mr. SIMON submitted two amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT No. 3452

Amend H.R. 5484, on page 177 of the amendment between lines 4 and 5 insert the following:

"The sentence of death authorized by this act shall not be implemented by hanging. No such authority shall be available until the State in which the trial was held provides for the transfer of prisoners so sentenced to a State where execution by hanging is not permitted."

AMENDMENT No. 3453

Amend H.R. 5484, on page 177 of the amendment between lines 4 and 5 insert the following:

"The sentence of death authorized by this act shall not be implemented by firing squad. No such authority shall be available until the State in which the trial was held provides for transfer of prisoners so sentenced to a State where execution by hanging is not permitted."

BINGAMAN AMENDMENT NO. 3454

(Ordered to lie on the table.)

Mr. BINGAMAN submitted an amendment intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

At the appropriate place, insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "National Nutrition Monitoring and Related Rearch Act of 1986".

PURPOSES

SEC. 2. The purposes of this Act are to—

(1) make more effective use of Federal and State expenditures for nutrition monitoring, and enhance the performance and benefits of current Federal nutrition monitoring and related research activities;

(2) establish and facilitate the timely implementation of a coordinated National Nutrition Monitoring and Related Research Program, and thereby provide a scientific basis for the maintenance and improvement of the nutritional status of the people of the United States and the nutrient content of the United States food supply;

(3) establish and implement a comprehensive plan for the National Nutrition Monitoring and Related Research Program to assess, on a continuing basis, the dietary and nutritional status of the people of the United States and the trends with respect to such status, the state of the art with respect to nutrition monitoring and related research, future monitoring and related research priorities, and the relevant policy implications;

(4) establish and improve the quality of national nutritional and health status data and related data bases and networks, and stimulate research necessary to develop uniform indicators, standards, methodologies, technologies, and procedures for nutrition monitoring;

(5) establish a central Federal focus for the coordination, management, and direction of Federal nutrition monitoring activities;

(6) establish mechanisms for addressing the nutrition monitoring needs of Federal, State, and local governments, the private sector, scientific and engineering communities, health care professionals, and the public in support of the foregoing purposes; and

(7) provide for the conduct of such scientific research and development as may be necessary or appropriate in support of such purposes.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "nutrition monitoring and related research" means the set of activities necessary to provide timely information about the role and status of factors that bear on the contribution that nutrition makes to the health of the people of the United States, including (A) dietary, nutritional, and health status measurements, (B) food consumption measurements, (C) food composition measurements and nutrient data banks, (D) dietary knowledge and attitude measurements, and (E) food supply and demand determinations;

(2) the term "coordinated program" means the National Nutrition Monitoring and Related Research Program established by section 101(a);

(3) the terms "Interagency Board for Nutrition Monitoring and Related Research" and "Board" mean the Federal coordinating body established by section 101(c);

(4) the term "comprehensive plan" means the comprehensive plan prepared under section 103;

(5) the term "Joint Implementation Plan for a Comprehensive National Nutrition Monitoring System" means the plan of that title submitted to Congress in September 1981 by the Department of Agriculture and the Department of Health and Human Services, under section 1428 of the Food and Agriculture Act of 1977 (7 U.S.C. 3178);

(6) the terms "National Nutrition Monitoring Advisory Council" and "Council" mean the advisory body established under section 201;

(7) the term "Secretaries" means the Secretary of Agriculture and the Secretary of Health and Human Services, acting jointly; and

(8) The term "local government" means a local general unit of government or local educational unit.

TITLE I—NUTRITION MONITORING AND RELATED RESEARCH

ESTABLISHMENT OF THE COORDINATED PROGRAM

SEC. 101. (a) There is hereby established a ten-year coordinated program, to be known as the National Nutrition Monitoring and Related Research Program, to carry out the purposes of this Act.

(b) The Secretaries shall be responsible for the implementation of the coordinated program.

(c) To assist in implementing the coordinated program, there is hereby established an Interagency Board for Nutrition Monitoring and Related Research, of which an Assistant Secretary in the Department of Agriculture (designated by the Secretary of Agriculture) and an Assistant Secretary in the Department of Health and Human Services (designated by the Secretary of Health and Human Services) shall be joint chairpersons. The remaining membership of the Board shall consist of additional representatives of Federal agencies, as deemed appropriate by the joint chairpersons of the Board. The Board shall meet no less often than once every three months.

(d) To establish a central focus and coordinator for the coordinated program, the Secretaries may appoint a full-time Administrator of Nutrition Monitoring and Related Research. The Administrator shall—

(1) be an individual who is eminent in the field of nutrition monitoring and related areas, and be selected on the basis of his or her established record of expertise and distinguished service; and

(2) administer the coordinated program with the advice and counsel of the joint chairpersons of the Board, serve as the focal point for the coordinated program, and serve as the Executive Secretary for the National Nutrition Monitoring Advisory Council.

FUNCTIONS OF THE SECRETARIES

SEC. 102. (a) The Secretaries, with the advice of the Board, shall—

(1) establish the goals of the coordinated program and identify the activities required to meet such goals, and identify the responsible agencies with respect to the coordinated program;

(2) update the Joint Implementation Plan for a Comprehensive National Nutrition Monitoring System, and integrate it into the coordinated program;

(3) ensure the timely implementation of the coordinated program and the comprehensive plan prepared under section 103;

(4) include in the coordinated program and the comprehensive plan a competitive grants program, in accordance with the provisions of this act, to encourage and assist the conduct, by Federal and non-Federal entities on an appropriate matching funds basis, of research (including research described in section 103(a)(3)) that will accelerate the development of uniform and cost-effective standards and indicators for the assessment and monitoring of nutritional and dietary status and for relating food consumption patterns to nutritional and health status;

(5) include in the coordinated program and the comprehensive plan a grants program, in accordance with the provisions of this Act, to encourage and assist State and local governments in developing the capacity to conduct monitoring and surveillance of nutritional status, food consumption, and nutrition knowledge and in using such capacity to enhance nutrition services (includ-

ing activities described in sections 103(a)(5) and 103(b)(9));

(6) include in the coordinated program each fiscal year an annual interagency budget for each fiscal year of the program;

(7) foster productive interaction, with respect to nutrition monitoring and related research among Federal efforts, State and local governments, the private sector, scientific communities, health professionals, and the public;

(8) contract with a scientific body, such as the National Academy of Sciences or the Federation of American Societies for Experimental Biology, to interpret available data analyses, and publish every two years, or more frequently if appropriate, a report, on the dietary, nutritional, and health-related status of the people of the United States and the nutrient content of the national food supply; and

(9)(A) foster cost recovery management techniques in the coordinated program, and (B) impose appropriate charges and fees for publications of the coordinated program, including print and electronic forms of data and analysis, and use the proceeds of such charges and fees for purposes of the coordinated program (except that no such charge or fee imposed on an educational or other nonprofit organization shall exceed the actual costs incurred by the coordinated program in providing the publications involved).

(b) The Secretaries shall submit to the President for transmittal to Congress by January 15 of each year an annual report that shall—

(1) evaluate the progress of the coordinated program;

(2 summarize the results of such coordinated program components as are developed under section 103;

(3) analyze the dietary, nutritional, and related health status of the people of the United States, the nutritional quality of the national food supply, the relevant policy implications of the analytical findings, and future nutrition monitoring and related research priorities;

(4) include in full the annual report of the Council provided for in section 202; and

(5) include an executive summary of the report most recently published by the scientific body, as provided for in subsection (a)(8).

DEVELOPMENT OF THE COMPREHENSIVE PLAN FOR THE NATIONAL NUTRITION MONITORING AND RELATED RESEARCH PROGRAM

SEC. 103. (a) The Secretaries, with the advice of the Board, shall prepare and implement a comprehensive plan for the coordinated program which shall be designed to—

(1) assess, collate data with respect to, analyze, and report, on a continuous basis, the dietary and nutritional status of the people of the United States and the trends with respect to such status (dealing with such status and trends separately in the case of pre-school and school-age children, pregnant and lactating women, elderly individuals, low income populations, blacks, Hispanics, and other groups, at the discretion of the Secretaries), the state of the art with respect to nutrition monitoring and related research, future monitoring and related research priorities, and relevant policy implications of findings with respect to such status, trends, and research;

(2) assess, analyze, and report, on a continuous basis, for a representative sample of the low income population, food and household expenditures and participation in food assistance programs;

(3) sponsor or conduct research necessary to develop uniform indicators, standards, methodologies, technologies, and procedures for conducting and reporting nutrition monitoring and surveillance;

(4) develop and keep updated a national dietary and nutritional status data bank, a nutrient data bank, and other data resources as required;

(5) assist State and local government agencies in developing procedures and networks for nutrition monitoring and surveillance; and

(6) focus the activities of the Federal agencies.

(b) The comprehensive plan, at a minimum, shall include components to—

(1) maintain and coordinate the National Health and Nutrition Examination Survey (NHANES) and the Nationwide Food Consumption Survey (NFCS);

(2) provide, by 1990, for the continuous collection, processing, and analysis of nutritional and dietary status data through a stratified probability sample of the people of the United States designed to permit statistically reliable estimates of the dietary and nutritional status of the population including high-risk groups and to permit accelerated data analysis (including annual analysis, as appropriate);

(3) maintain and enhance other Federal nutrition monitoring efforts such as the Centers for Disease Control Nutrition Surveillance Program and the Food and Drug Administration Total Diet Study, and, to the extent possible, coordinate such efforts with the surveys described in paragraphs (1) and (2);

(4) incorporate military and institutionalized populations, where appropriate;

(5) complete the analysis and interpretation of the data sets from the surveys described in paragraph (1) collected prior to 1984 within the first year of the comprehensive plan;

(6) improve the methodologies and technologies, including those suitable for use by States and localities available for the assessment of nutritional and dietary status and trends;

(7) develop uniform standards and indicators for the assessment and monitoring of nutritional and dietary status, for relating food consumption patterns to nutritional and health status, and for use in the evaluation of Federal food and nutrition intervention programs;

(8) establish national baseline data and procedures for nutrition monitoring;

(9) provide scientific and technical assistance, training and consultation to State and local governments for the purpose of obtaining dietary and nutritional status data and developing related date base;

(10) establish mechanisms to identify the needs of users of nutrition monitoring data and to encourage the private sector and the academic community to participate in the development and implementation of the comprehensive plan and contribute relevant data from non-Federal sources to promote the development of a national nutritional status network;

(11) compile an inventory of Federal, State, and nongovernment activities related to nutrition monitoring and related research;

(12) focus on national nutrition monitoring needs while building on the responsibilities and expertise of the individual membership of the Board;

(13) administer the coordinated program, define program objectives, priorities, oversight, responsibilities and outcomes, and define the organization and management of the Board and the Council; and

(14) provide a mechanism for periodically evaluating and refining the coordinated program and the comprehensive plan that facilitates cooperation and interaction by State and local governments, the private sector, scientific communities, and health care professionals, and that facilitates coordination with non-Federal activities.

(c) The comprehensive plan shall allocate the projected functions and activities under the coordinated program among the various Federal agencies and offices that will be involved, and shall contain an affirmative statement and description of the functions to be performed and activities to be undertaken by each of such agencies and offices in carrying out the coordinated program.

(d) The comprehensive plan shall—

(1) be submitted in draft form to the President for submission to Congress, and for public review, within twelve months after the date of the enactment of this Act;

(2) be available for public comment for a period of sixty days after its submission in draft form under paragraph (a) by means of publication in the Federal Register;

(3) be submitted in final form, incorporating such needed revisions as may arise from comments received during the review period, to the President for submission to Congress within sixty days after the close of the period allowed for comments on the draft comprehensive plan under paragraph (2); and

(4) constitute the basis on which each agency participating in the coordinated program request authorizations and appropriations for nutrition monitoring and related research during the ten-year period of the program.

(e) Nothing in this section may be construed as modifying, or as authorizing the Secretaries or the comprehensive plan to modify, any provision of an appropriation Act (or any other provision of law relating to the use of appropriated funds) that specifies (1) the department or agency to which funds are appropriated, or (2) the obligations of such department or agency with respect to the use of such funds.

IMPLEMENTATION OF THE COMPREHENSIVE PLAN

SEC. 104. (a) The comprehensive plan shall be carried out during the period ending with the close of the ninth fiscal year following the fiscal year in which the comprehensive plan is submitted in its final form under section 103(d)(3), and shall be—

(1) carried out in accord with, and meet the program objectives specified in, section 103(a) and paragraphs (1) through (11) of section 103(b);

(2) managed in accord with paragraphs (12) through (14) of section 103(b);

(3) carried out, by the Federal agencies involved, in accord with the allocation of functions and activities under section 103(c); and

(4) funded by appropriations made to such agencies as described in section 106, for each fiscal year of the program.

Congress through its appropriate authorizing committees, the House Committee on Agriculture, the Senate Committee on Agriculture, Nutrition and Forestry, the Senate Committee on Labor and Human Resources and the House Committee on Energy and Commerce, shall exercise continuing oversight over the coordinated program, taking

into account the Secretaries' annual reports and such other information and data as may be developed.

(b) Nothing in this title may be deemed to grant any new regulatory authority or to limit, expand, or otherwise modify any regulatory authority under existing law, or to establish new criteria, standard, or requirements for regulation under existing law.

AUTHORIZATIONS AND APPROPRIATIONS

SEC. 105. (a) Authorizations and appropriations for the fiscal year in which the comprehensive plan is submitted in final form under section 103(d)(3) and for the nine succeeding fiscal years, for purposes of carrying out the coordinated program and implementing the comprehensive plan, shall be requested by the Secretaries and by each of the agencies that are allocated responsibilites under the coordinated program under section 103(c), in a separate line item of the budget of the agency involved and consistent with the interagency budget for the coordinated program.

(b) Nothing in this title is intended either (1) to authorize the appropriation or require the expenditure of any funds in excess of the amount of funds that would be authorized or expended for the same purpose in the absence of the coordinated program, or (2) to limit the authority of any of the participating agencies to request and recieve funds or those purposes (for use in the coordinated program) under other laws.

TITLE II—NATIONAL NUTRITION MONITORING ADVISORY COUNCIL

ESTABLISHMENT OF THE COUNCIL

SEC. 201. (a)(1) The President shall establish, withing ninety days after the date of the enactment of this Act, a National Nutrition Monitoring Advisory Council. The Council shall assist in carrying out the purposes of this Act. Provide scientific and technical advice on the development and implementation of the coordinated program and comprehensive plan, and serve in an advisory capacity to the Secretaries.

(2) The Council shall consist of eleven voting members, of whom—

(A) seven members shall be appointed by the President: and

(B) four members shall be appointed by Congress—one by the Speaker of the House of Representatives, one by the minority leader of the House of Representatives, one by the President pro tempore of the Senate, and one by the minority leader of the Senate.

(3) The Council also shall include the joint chairpersons of the Boards as ex officio nonvoting members.

(b) Each person appointed to the Council shall be—

(1) Eminent in the field of administrative dietetics, clinical dietetics, community nutrition research, public health nutrition, monitoring and surveillance, nutritional biochemistry, food composition and nutrient analysis, health statistics management, epidemiology, food technology, clinical medicine, public administration, health education, nutritional anthropology, food consumption patterns, food assistance programs, agriculture or economics; and

(2) selected solely on the basis of an established record of distinguished service.

(c) The persons appointed to the Council by the President shall include—

(1) one member who is a director of a nutrition research unit that is primarily supported by Federal funds, and who has specialized interest in nutrition monitoring;

(2) one member who is an employee of a State government and has a specialized interest in nutrition monitoring;

(3) one member who is an employee of a local government and has a specialized interest in nutrition monitoring; and

(4) one member who is an appointed representative of the Food and Nutrition Board, National Academy of Sciences.

(d) The Council membership, at all times, shall have representatives from various geographic areas, the private sector, academia, scientific and professional societies, minority organizations, and public interest organizations.

(e) The Chairperson of the Council shall be elected from and by the Council membership. The term of office of the Chairperson shall not exceed five years. In case a vacancy occurs in the Chairpersonship, the Council shall elect a member to fill such vacancy.

(f) The term of office of each of the voting members of the Council shall be five years, except that of the seven members first appointed by the President, one shall be appointed for a term of two years, three for terms of three years, and three for terms of four years, as designated by the President at the time of appointment. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term. No member shall be eligible to serve continuously for more than two consecutive terms.

(g) The initial members of the Council shall be appointed or designated (without regard to the requirements of the Federal Advisory Committee Act) not later than ninety days after the date of the enactment of this Act.

(h) The Council shall meet on a regular basis at the call of the Chairperson, or on the written request of one-third of the members. A majority of the appointed members of the Council shall constitute a quorum.

(i) Appointed members of the Council shall not be employed by the Federal Government, and shall be allowed travel expenses as authorized by section 5703 of title 5, United States Code.

(j) The Administrator of Nutrition Monitoring and Related Research (if appointed under section 101(d)) shall serve as the Executive Secretary of the Council.

FUNCTIONS OF THE COUNCIL

SEC. 202. The Council shall—

(1) provide scientific and technical advice on the development and implementation of all components of the coordinated program and the comprehensive plan;

(2) evaluate the scientific and technical quality of the comprehensive plan and the effectiveness of the coordinated program;

(3) recommend to the Secretaries, on an annual basis, means of enhancing the comprehensive plan and the coordinated program; and

(4) submit to the Secretaries annual reports that shall contain the components specified in paragraphs (2) and (3), and that shall be included in full in the Secretaries' annual reports to the President for transmittal to Congress under section 102(b).

TITLE III

DIETARY GUIDANCE

SEC. 301. (a). The Secretaries shall review and revise as necessary, at least every 5 years, Dietary Guidelines for Americans based on a consensus of current scientific knowledge. The Dietary Guidelines for Americans shall be the policy of the Federal Government with regard to nutritional advice for the general population. No dietary guidance shall be issued for the general population by any agency of the Federal Government if it is inconsistent with the consensus of scientific and medical knowledge as reflected in the Dietary Guidelines for Americans.

(b)(1) Any agency of the Federal Government planning to issue dietary guidance for the general population shall submit the text of the proposed guidance to the Secretaries for review prior to release. A Federal Register notice will be published announcing the submission of the text to the Secretaries for review. The Secretaries shall review the proposed guidance to assure its consistency with the consensus of scientific and medical knowledge as reflected in the Dietary Guidelines for Americans.

(2) The Secretaries shall review the dietary guidance within 120 days and inform the submitting agency of their approval or disapproval. If the Secretaries both disapprove of the submitted dietary guidance it shall not be published. If both Secretaries do not disapprove, the dietary guidance may be published.

(3) Nothing herein shall be interpreted to limit scientific research by any agency of the Federal Government, the presentation of the scientific findings, or the exchange and review of scientific information within the scientific community.

WARNER AMENDMENT NOS. 3455 THROUGH 3463

(Ordered to lie on the table.)

Mr. WARNER submitted eight amendments intended to be proposed by him to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

AMENDMENT NO. 3455

On page 217, after line 25, insert the following:

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT NO. 3456

On page 217, after line 25, insert the following:

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT NO. 3457

On page 217, after line 25, insert the following:

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension,

search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT No. 3458

On page 217, after line 25, insert the following;

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT No. 3459

On page 217, after line 25, insert the following;

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT No. 3460

On page 217, after line 25, insert the following;

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT No. 3461

On page 217, after line 25, insert the following:

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

AMENDMENT No. 3462

On page 217, after line 25, insert the following:

SEC. 3056A. POSSE COMITATUS LIMITATIONS.

The provisions of section 3056 do not authorize or permit direct participation by a member of the Army, Navy, Air Force, or Marine Corps in any arrest, apprehension, search, or seizure involving violations or alleged violations of the laws referred to in section 374(a) of title 10, United States Code.

HATCH (AND OTHERS) AMENDMENT NO. 3463

(Ordered to lie on the table.)

Mr. HATCH (for himself, Mrs. HAWKINS, Mr. CHILES, Mr. DODD, Mr. D'AMATO, and Mr. MOYNIHAN) submitted an amendment intended to be proposed by them to the motion to concur, with an amendment, as modified to the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra as follows:

Strike out section 4112(a)(2) and insert in lieu thereof the following:

(2) Of the amounts appropriated or otherwise made available to carry out this subtitle for any fiscal year, $5,000,000 shall be available to the Secretary of Health and Human Services for such fiscal year to carry out section 4134 of this Act and sections 508 and 509 of the Public Health Service Act.

Strike out subtitle A of title IV and insert in lieu thereof the following:

Subtitle A—Treatment and Rehabilitation

SEC. 4001. SHORT TITLE; REFERENCE.

(a) This subtitle may be cited as the "Alcohol and Drug Abuse Amendments of 1986".

(b) Except as otherwise specifically provided, whenever in this subtitle an amendment or repeal is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Public Health Service Act.

SEC. 4002. SPECIAL ALLOTMENTS FOR ALCOHOL ABUSE AND DRUG ABUSE TREATMENT AND REHABILITATION PROGRAMS.

Title XIX is amended by inserting after section 1920A the following new sections:

"SPECIAL ALLOTMENTS TO STATES FOR ALCOHOL ABUSE AND DRUG ABUSE TREATMENT AND REHABILITATION PROGRAMS

"SEC. 1921. (a) To carry out this section and sections 1922, 1923, 508, and 510 there are authorized to be appropriated $241,000,000 for fiscal year 1987. Of the total amount appropriated under the preceding sentence for fiscal year 1987, 7 percent shall be added to and included with the amounts otherwise available under this part for allotments to States under section 1913 for such fiscal year, 72 percent shall be available for allotments to States under this section for such fiscal year, 5 percent shall be available for transfer to the Administrator of Veterans' Affairs under section 1922 for such fiscal year, 1 percent shall be available to carry out section 1923 for such fiscal year, and 15 percent shall be available to carry out sections 508 and 510 for such fiscal year.

"(b)(1) The allotment of a State under this section for a fiscal year shall be the sum of the amounts allotted to such State under paragraphs (2) and (3).

"(2) Forty-five percent of the amount available for allotment under this section for a fiscal year shall be allotted in accordance with this subsection. The allotment of a State under this subsection for a fiscal year shall be an amount which bears the same ratio to the total amount required pursuant to the preceding sentence to be allotted under this subsection for such fiscal year as the population of such State bears to the population of all States.

"(3) Fifty-five percent of the amount available for allotment under this section for a fiscal year shall be allotted by the Secretary to States on the basis of the need of each State for amounts for programs and activities for the treatment and rehabilitation of the alcohol abuse and drug abuse. In determining such need for each State under this subsection, the Secretary shall consider—

"(A) the nature and extent, in the State and in particular areas of the State, of the demand for effective programs and activities for the treatment and rehabilitation of alcohol abuse and drug abuse;

"(B) the number of individuals in the State who abuse alcohol or drugs and the capacity of the State to provide treatment and rehabilitation for such individuals (as determined by the Secretary on the basis of the number of individuals who requested treatment for alcohol abuse and drug abuse in the State during the most recent calendar year ending prior to the date on which a statement is submitted by the State under subsection (d); and

"(C) the ability of the State to provide additional services for the treatment and rehabilitation of alcohol abuse and drug abuse.

"(4) The Secretary shall make allotments to States under paragraph (1) for fiscal year 1987, and shall make payments to States under subsection (c) from such allotments, at the same time that the Secretary makes allotments and payments under sections 1913 and 1914, respectively, for such fiscal year. The Secretary shall make allotments to States under paragraph (2) for fiscal year 1987, and shall make payments to States under subsection (c) from such allotments, within four months after the date of enactment of the Alcohol and Drug Abuse Amendments of 1986.

"(c)(1) For each fiscal year, the Secretary shall make payments, as provided by section 6503 of title 31, United States Code, to each State from its allotment under paragraphs (2) and (3) of subsection (b) from amounts which are appropriated for that fiscal year and available for such allotments.

"(2) Any amount paid to a State under paragraph (1) for a fiscal year and remaining unobligated at the end of such fiscal year shall remain available to such State for the purposes for which it was made for the next fiscal year.

"(d) In order to receive an allotment for a fiscal year under subsection (b), each State shall include with the application submitted to the Secretary under section 1916 a separate statement requesting an allotment under this section. Each such statement shall contain—

"(1) such information as the Secretary may prescribe, including information necessary for the Secretary to consider the matters specified in subparagraphs (A) through (D) of subsection (b)(3);

"(2) a description of the manner in which programs and activities conducted with payments under subsection (c) will be coordinated with other public and private programs and activities directed toward individuals who abuse alcohol and drugs;

"(3) assurances that, in the preparation of any statement under this section, the State will consult with local governments and public and private entities, including community based organizations, involved in the provision of services for the treatment and rehabilitation of alcohol abuse and drug abuse;

"(4) a description of the manner in which the State will evaluate programs and activities conducted with payments made to the State under subsection (c) and assurances that the State will report periodically to the Secretary on the results of such evaluations; and

"(5) assurances that payments made to the State under subsection (c) will supplement and not supplant any State or local expenditures for the treatment and rehabilitation of alcohol abuse and drug abuse that would have been made in the absence of such payments.

"(e)(1) Except as provided in subsections (f) and (i), amounts paid to a State under subsection (c) may be used by the State for alcohol abuse and drug abuse treatment and

rehabilitation programs and activities, including—

"(A) activities to increase the availability and outreach of programs provided by major treatment centers and regional branches of such centers which provide services in a State in order to reach the greatest number of people;

"(B) activities to expand the capacity of alcohol abuse and drug abuse treatment and rehabilitation programs and facilities to provide treatment and rehabilitation services for alcohol abusers and drug abusers who have been refused treatment due to lack of facilities or personnel; and

"(C) activities to provide access to vocational training, job counseling, and education equivalency programs to alcohol abusers and drug abusers in need of such services in order to enable such abusers to become productive members of society.

"(2) A State may request the Secretary to waive the provisions of section 1915(b)(1) (as such section applies to this section pursuant to subsection (i) of this section) in order to permit such State to conduct model programs for the provision of inpatient hospital services for alcohol abuse and drug abuse treatment, and the Secretary may grant such a waiver.

"(f) Of the total amount paid to any State under subsection (c) for a fiscal year, not more than 2 percent may be used for administering the funds made available under such subsection. The State will pay from non-Federal sources the remaining costs of such administering such funds.

"(g) The Secretary may provide training and technical assistance to States in planning and operating activities to be carried out under this section.

"(h) The Secretary may conduct data collection activities to enable the Secretary to carry out this section.

"(i) Except as provided in subsection (e)(2), the provisions of subsections (a) and (d) and paragraphs (1) through (5) of subsection (b) of section 1917 and the provisions of sections 1914(b), 1915(b), 1918, 1919, and 1920 shall apply to this section in the same manner as such provisions apply to payments made under section 1914 from allotments made under section 1913.

"TRANSFER TO THE ADMINISTRATOR OF VETERANS' AFFAIRS

"SEC. 1922. The Secretary shall transfer to the Administrator of Veterans' Affairs the amount which, under the second sentence of section 1921(a), is available for such transfer. The amount transferred pursuant to the preceding sentence shall be used for outpatient treatment, rehabilitation, and counseling under section 612 of title 38, United States Code, of veterans for their alcohol or drug abuse dependence or abuse disabilities and for contract care and services under section 620A of such title for veterans for such disabilities.

"TREATMENT PROGRAM EVALUATIONS

"SEC. 1923. One percent of the total amount appropriated under section 1921(a) for any fiscal year may be used by the Secretary, acting through the Administrator of the Alcohol, Drug Abuse, and Mental Health Administration, to develop and evaluate alcohol and drug abuse treatment programs to determine the most effective forms of treatment. Such programs may be developed and evaluated through grants, contracts, and cooperative agreements provided to nonprofit private entities. In carrying out this section, the Secretary shall assess the comparative effectiveness of various treatment forms for specific patient groups.".

SEC. 4003. ADVISORY COUNCILS.

(a) Part A of title V is amended by redesignating sections 505 and 506 as sections 506 and 507, respectively, and by inserting after section 504 the following new section:

"ADVISORY COUNCILS

"SEC. 505. (a)(1) The Secretary shall appoint an advisory council for the National Institute on Alcohol Abuse and Alcoholism, for the National Institute on Drug Abuse, and for the National Institute of Mental Health. Each such advisory council shall advise, consult with, and make recommendations to the Secretary and the Director of the Institute for which it was appointed on matters relating to the activities carried out by and through the Institute and the policies respecting such activities.

"(2) Each advisory council for an Institute may recommend to the Secretary acceptance, in accordance with section 2101, of conditional gifts for—

"(A) study, investigation, or research respecting the diseases, disorders, or other aspect of human health with respect to which the Institute was established;

"(B) the acquisition of grounds for the Institute; or

"(C) the construction, equipping, or maintenance of facilities for the Institute.

"(3) Each advisory council for an Institute—

"(A)(i) may on the basis of the materials provided under section 507(d)(2) respecting research conducted at the Institute, make recommendations to the Director of the Institute respecting such research;

"(ii) shall review applications for grants and cooperative agreements for research or training and for which advisory council approval is required under section 507(e)(2), and recommend for approval applications for projects which show promise of making valuable contributions to human knowledge; and

"(iii) may review any grant, contract, or cooperative agreement proposed to be made or entered into by the Institute;

"(B) may collect, by correspondence or by personal investigation, information as to studies which are being carried on in the United States or any other country as to the diseases, disorders, or other aspect of human health with respect to which the Institute was established and with the approval of the Director of the Institute make available such information through appropriate publications for the benefit of public and private health entities and health professions personnel and scientists and for the information of the general public; and

"(C) may appoint subcommittees and convene workshops and conferences.

"(b)(1) Each advisory council shall consist of nonvoting ex officio members and not more than 12 members appointed by the Secretary.

"(2) The ex officio members of an advisory council shall consist of—

"(A) the Secretary, the Administrator, the Director of the Institute for which the advisory council is established, the Chief Medical Director of the Veterans' Administration, and the Assistant Secretary of Defense for Health Affairs (or the designees of such officers), and

"(B) such additional officers or employees of the United States as the Secretary determines necessary for the advisory council to effectively carry out its functions.

"(3) The members of an advisory council who are not ex officio members shall be appointed as follows:

"(A) Nine of the members shall be appointed by the Secretary from among the leading representatives of the health and scientific disciplines (including public health and the behavioral or social sciences) relevant to the activities of the Institute for which the advisory council is established.

"(B) Three of the members shall be appointed by the Secretary from the general public and shall include leaders in fields of public policy, public relations, law, health policy, economics, and management.

"(4) Members of an advisory council who are officers or employees of the United States shall not receive any compensation for service on the advisory council. The other members of an advisory council shall receive, for each day (including travel time) they are engaged in the performance of the functions of the advisory council, compensation at rates not to exceed the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule.

"(c) The term of office of an appointed member of an advisory council is 4 years, except that any member appointed to fill a vacancy for an unexpired term shall be appointed for the remainder of such term and the Secretary shall make appointments to an advisory council in such manner as to ensure that the terms of the members do not all expire in the same year. A member may serve after the expiration of the member's term until a successor has taken office. A member who has been appointed for a term of 4 years may not be reappointed to an advisory council before 2 years from the date of expiration of such term of office. If a vacancy occurs in the advisory council among the appointed members, the Secretary shall make an appointment to fill the vacancy within 90 days from the date the vacancy occurs.

"(d) The chairman of an advisory council shall be selected by the Secretary from among the appointed members, except that the Secretary may select the Director of the Institute for which the advisory council is established to be the chairman of the advisory council. The term of office of chairman shall be 2 years.

"(e) The advisory council shall meet at the call of the chairman or upon the request of the Director of the Institute for which it was established, but at least 3 times each fiscal year. The location of the meetings of each advisory council is subject to the approval of the Director of the Institute for which the advisory council was established.

"(f) The Director of the Institute for which an advisory council is established shall designate a member of the staff of the Institute to serve as the executive secretary of the advisory council. The Director of the Institute shall make available to the advisory council such staff, information, and other assistance as it may require to carry out its functions. The Director of the Institute shall provide orientation and training for new members of the advisory council to provide them with such information and training as may be appropriate for their effective participation in the functions of the advisory council.".

(b) The amendment made by subsection (a) does not terminate the membership of any advisory council for the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, or the National Institute of Mental Health which

was in existence on the date of enactment of this Act. After such date—

(1) the Secretary of Health and Human Services shall make appointments to each such advisory council in such a manner as to bring about as soon as practicable the composition for such council prescribed by section 505 of the Public Health Service Act;

(2) each advisory council shall organize itself in accordance with such section and exercise the functions prescribed by such section; and

(3) the Director of each such institute shall perform for such advisory council the functions prescribed by such section.

(c) Section 217 is amended—

(1) by striking out subsections (a), (b), (c), and (d);

(2) by striking out "(e)(1)" and inserting in lieu thereof "(a)";

(3) by striking out "(2)" and inserting in lieu thereof "(b)";

(4) by striking out "(3)" and inserting in lieu thereof "(c)";

(5) by striking out "(4)" and inserting in lieu thereof "(d)"; and

(6) by redesignating clauses (A) and (B) of subsection (c) (as redesignated by the amendment made by paragraph (4) of this subsection) as clauses (1) and (2), respectively.

SEC. 4004. OFFICE FOR SUBSTANCE ABUSE PREVENTION.

(a) Part A of title V (as amended by section 4003 of this Act) is further amended by adding at the end thereof the following new sections:

"OFFICE FOR SUBSTANCE ABUSE PREVENTION

"SEC. 508. (a) There is established in the Administration an Office for Substance Abuse Prevention (hereafter in this part referred to as the 'Office'). The Office shall be headed by a Director appointed by the Secretary from individuals with extensive experience or academic qualifications in the prevention of drug or alcohol abuse.

"(b) The Director of the Office shall—

"(1) sponsor regional workshops on the prevention of drug and alcohol abuse;

"(2) coordinate the findings of research sponsored by agencies of the Service on the prevention of drug and alcohol abuse;

"(3) develop effective drug and alcohol abuse prevention literature (including literature on the adverse effects of cocaine free base (known as 'crack');

"(4) in cooperation with the Secretary of Education, assure the widespread dissemination of prevention materials among States, political subdivisions, and school systems;

"(5) support programs of clinical training of substance abuse counselors and other health professionals;

"(6) in cooperation with the Director of the Centers for Disease Control, develop educational materials to reduce the risks of acquired immune deficiency syndrome among intravenous drug abusers;

"(7) conduct training, technical assistance, data collection, and evaluation activities of programs supported under the Drug Free Schools and Communities Act of 1986;

"(8) support the development of model, innovative, community-based programs to discourage alcohol and drug abuse among young people; and

"(9) prepare for distribution documentary films and public service announcements for television and radio to educate the public concerning the dangers to health resulting from the consumption of alcohol and drugs and, to the extent feasible, use appropriate private organizations and business concerns in the preparation of such announcements.

"(c) The Director may make grants and enter into contracts and cooperative agreements in carrying out subsection (b).

"(d) Of the amounts available under the second sentence of section 1921(a) to carry out this section and section 510, $20,000,000 shall be available to carry out section 510.

"ALCOHOL AND DRUG ABUSE INFORMATION CLEARINGHOUSE

"SEC. 509. The Secretary, through the Director of the Office, shall establish a clearinghouse for alcohol and drug abuse information to assure the widespread dissemination of such information to States, political subdivisions, educational agencies and institutions, health and drug treatment and rehabilitation networks, and the general public. The clearinghouse shall—

"(1) disseminate publications by the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, and the Department of Education concerning alcohol abuse and drug abuse;

"(2) disseminate accurate information concerning the health effects of alcohol abuse and drug abuse;

"(3) collect and disseminate information concerning successful alcohol abuse and drug abuse education and prevention curricula; and

"(4) collect and disseminate information on effective and ineffective school-based alcohol abuse and drug abuse education and prevention programs, particularly effective programs which stress that the use of illegal drugs and the abuse of alcohol is wrong and harmful.

"PREVENTION, TREATMENT, AND REHABILITATION MODEL PROJECTS FOR HIGH RISK YOUTH

"SEC. 510. (a) The Secretary, through the Director of the Office, shall make grants to public and nonprofit private entities for projects to demonstrate effective models for the prevention, treatment, and rehabilitation of drug abuse and alcohol abuse among high risk youth.

"(b)(1) In making grants for drug abuse and alcohol abuse prevention projects under this section, the Secretary shall give priority to applications for projects directed at children of substance abusers, latchkey children, children at risk of abuse or neglect, preschool children eligible for services under the Head Start Act, children at risk of dropping out of school, children at risk of becoming adolescent parents, and children who do not attend school and who are at risk of being unemployed.

"(2) In making grants for drug abuse and alcohol abuse treatment and rehabilitation projects under this section, the Secretary shall give priority to projects which address the relationship between drug abuse or alcohol abuse and physical child abuse, sexual child abuse, emotional child abuse, dropping out of school, unemployment, delinquency, pregnancy, violence, suicide, or mental health problems.

"(3) In making grants under this section, the Secretary shall give priority to applications from community based organizations for projects to develop innovative models with multiple, coordinated services for the prevention or for the treatment and rehabilitation of drug abuse or alcohol abuse by high risk youth.

"(4) In making grants under this section, the Secretary shall give priority to applications for projects to demonstrate effective models with multiple, coordinated services which may be replicated and which are for the prevention or for the treatment and rehabilitation of drug abuse or alcohol abuse by high risk youth.

"(c) To the extent feasible, the Secretary shall make grants under this section in all regions of the United States, and shall ensure the distribution of grants under this section among urban and rural areas.

"(d)(1) In order to receive a grant for a project under this section for a fiscal year, a public or nonprofit private entity shall submit an application to the Governor of the State in which the project will be conducted. Such application shall be in such form, shall contain such information, and shall be submitted at such time as the Secretary may by regulation prescribe.

"(2) The Governor of each State shall review each application received under subsection (a) for a fiscal year and shall submit to the Secretary, by a date prescribed by the Secretary for such fiscal year, the recommendations of the Governor concerning the approval or disapproval of each such application and a ranking recommended by the Governor of the priority for approval of such applications. In making recommendations under the preceding sentence, the Governor shall consider the priorities and requirements for grants established by subsections (b) and (c).

"(e) The Director of the Office shall evaluate projects conducted with grants under this section.

"(f) For purposes of this section, the term 'high risk youth' means an individual who has not attained the age of 21 years, who is at high risk of becoming, or who has become, a drug abuser or an alcohol abuser, and who—

"(1) is identified as a child of a substance abuser;

"(2) is a victim of physical, sexual, or psychological abuse;

"(3) has dropped out of school;

"(4) has become pregnant;

"(5) is economically disadvantaged;

"(6) has committed a violent or delinquent act;

"(7) has experienced mental health problems;

"(8) has attempted suicide; or

"(9) is disabled by injuries.".

(b)(1) Section 502(e) is repealed.

(2) Section 503(d) is amended—

(A) by inserting "and" at the end of paragraph (2);

(B) by striking out "; and" at the end of paragraph (3) and inserting in lieu thereof a period; and

(C) by striking out paragraph (4).

SEC. 4005. PUBLIC HEALTH EMERGENCIES.

Part A of title V (as amended by sections 4003 and 4004 of this Act) is further amended by adding at the end thereof the following:

"RESEARCH ON PUBLIC HEALTH EMERGENCIES

"SEC. 511. (a) If the Secretary determines, after consultation with the Administrator, the Commissioner of Food and Drugs, or the Director of the Centers for Disease Control, that a disease or disorder within the jurisdiction of an Institute of the Administration constitutes a public health emergency, the Secretary, acting through the Administrator—

"(1) shall expedite the review by advisory councils and by peer review groups of applications for grants for research on such disease or disorder or proposals for contracts for such research;

"(2) shall exercise the authority in section 3709 of the Revised Statutes (41 U.S.C. 5) respecting public exigencies to waive the advertising requirements of such section in

the case of proposals for contracts for such research;

"(3) may provide administrative supplemental increases in existing grants and contracts to support new research relevant to such disease or disorder; and

"(4) shall disseminate, to health professionals and the public, information on the cause, prevention, and treatment of such disease or disorder that has been developed in research assisted under this section.

The amount of an increase in a grant or contract provided under paragraph (3) may not exceed one-half the original amount of the grant or contract.

"(b) Not later than 90 days after the end of a fiscal year, the Secretary shall report to the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate on actions taken under subsection (a) in such fiscal year if any actions were taken under such subsection in such fiscal year.".

SEC. 4006. PEER REVIEW.

Subsection (b) of section 507 (as redesignated by section 4003(a) of this Act) is amended by inserting "applications made for" after "review of" in the matter preceding paragraph (1).

SEC. 4007. NATIONAL ALCOHOL RESEARCH CENTERS.

Section 511(b) is amended—

(1) by striking out "or rental" before "any land"; and

(2) by striking out "rental," before "purchase".

SEC. 4008. EXPANSION OF DRUG ABUSE RESEARCH.

Section 515(a) is amended—

(1) by striking out "and" after the semicolon in paragraph (4);

(2) by striking out paragraph (5) and inserting in lieu thereof the following:

"(5) effective methods of drug abuse prevention, treatment, and rehabilitation, particularly methods of intervention to treat abuse of specific drugs; and"; and

(3) by adding at the end thereof the following:

"(6) the development of chemical antidotes and narcotic antagonists for use in the treatment of cocaine and heroin addiction.".

SEC. 4009. RESEARCH AUTHORIZATION.

(a) Section 513 is amended to read as follows:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 513. There are authorized to be appropriated to carry out this subpart $69,000,000 for fiscal year 1987.".

(b) Section 517 is amended to read as follows:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 517. There are authorized to be appropriated to carry out this subpart $129,000,000 for fiscal year 1987.".

SEC. 4010. SUICIDE.

(a) Section 504 is amended by adding at the end thereof the following new subsection:

"(h) The Director shall—

"(1) develop and publish information respecting the causes of suicide and the means of preventing suicide; and

"(2) make such information generally available to the public and health professionals.

Information developed, published, and distributed under this subsection shall especially relate to suicide among individuals under the age of 21.".

(b) Not later than one year after the date of enactment of this Act, the Director of the National Institute of Mental Health shall report to Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives on the activities undertaken under section 504(h) of the Public Health Service Act and shall include in such report an assessment of the effectiveness of such activities.

SEC. 4011. MENTAL HEALTH NEEDS OF THE ELDERLY.

Section 504(c) is amended by adding at the end thereof the following: "Special consideration shall be given to programs for training and research on the mental health needs of the elderly.".

SEC. 4012. TECHNICAL AMENDMENT.

Section 504(e) is amended by striking out the period at the end of paragraph (2)(A) and inserting in lieu thereof a semicolon.

SEC. 4013. INFANT FORMULAS.

(a) Section 412 of the Federal Food, Drug, and Cosmetic Act is amended—

(1) by redesignating subsections (e), (f), and (g) as subsections (g), (h), and (i), respectively,

(2) by amending the last sentence of paragraph (1) of subsection (g) (as so redesignated) to read as follows: "Such records shall be retained for at least one year after the expiration of the shelf life of the infant formula.",

(3) by striking out "(a) and (b)" in the first sentence of subsection (h)(1) (as so redesignated) and inserting in lieu thereof "(a), (b), and (c)",

(4) by striking out "(c)(1)" in the second sentence of such subsection and inserting in lieu thereof "(e)(1)",

(5) by striking out "(e)(1)(B)" in such sentence and inserting in lieu thereof "(d)(1)(B)",

(6) by striking out "(a) and (b)" in subsection (h)(2) (as so redesignated) and inserting in lieu thereof "(a), (b), and (c)", and

(7) by striking out subsections (a) through (d) and inserting in lieu thereof the following:

"(a) An infant formula, including an infant formula powder, shall be deemed to be adulterated if—

"(1) such infant formula does not provide nutrients as required by subsection (i),

"(2) such infant formula does not meet the quality factor requirements prescribed by the Secretary under subsection (b)(1), or

"(3) the processing of such infant formula is not in compliance with the good manufacturing practices and the quality control procedures prescribed by the Secretary under subsection (b)(2).

"(b)(1) The Secretary shall by regulation establish requirements for quality factors for infant formulas to the extent possible consistent with current scientific knowledge, including quality factor requirements for the nutrients required by subsection (i).

"(2)(A) The Secretary shall by regulation establish good manufacturing practices for infant formulas, including quality control procedures that the Secretary determines are necessary to assure that an infant formula provides nutrients in accordance with this subsection and subsection (i) and is manufactured in a manner designed to prevent adulteration of the infant formula.

"(B) The good manufacturing practices and quality control procedures prescribed by the Secretary under subparagraph (A) shall include requirements for—

"(i) the testing, in accordance with paragraph (3) and by the manufacturer of an infant formula or an agent of such manufacturer, of each batch of infant formula for each nutrient required by subsection (i) before the distribution of such batch,

"(ii) regularly scheduled testing, by the manufacturer of an infant formula or an agent of such manufacturer, of samples of infant formulas during the shelf life of such formulas to ensure that such formulas are in compliance with this section,

"(iii) in-process controls including, where necessary, testing required by good manufacturing practices designed to prevent adulteration of each batch of infant formula, and

"(iv) the conduct by the manufacturer of an infant formula or an agent of such manufacturer of regularly scheduled audits to determine that such manufacturer has complied with the regulations prescribed under subparagraph (A).

In prescribing requirements for audits under clause (iv), the Secretary shall provide that such audits be conducted by appropriately trained individuals who do not have any direct responsibility for the manufacture or production of infant formula.

"(3)(A) At the final product stage, each batch of infant formula shall be tested for vitamin A, vitamin B1, vitamin C, and vitamin E to ensure that such infant formula is in compliance with the requirements of this subsection and subsection (i) relating to such vitamins.

"(B) Each nutrient premix used in the manufacture of an infant formula shall be tested for each relied upon nutrient required by subsection (i) which is contained in such premix to ensure that such premix is in compliance with its specifications or certifications by a premix supplier.

"(C) During the manufacturing process or at the final product stage and before distribution of an infant formula, an infant formula shall be tested for all nutrients required to be included in such formula by subsection (i) for which testing has not been conducted pursuant to subparagraph (A) or (B). Testing under this subparagraph shall be conducted to—

"(i) ensure that each batch of such infant formula is in compliance with the requirements of subsection (i) relating to such nutrients, and

"(ii) confirm that nutrients contained in any nutrient premix used in such infant formula are present in each batch of such infant formula in the proper concentration.

"(D) If the Secretary adds a nutrient to the list of nutrients in the table in subsection (i), the Secretary shall by regulation require that the manufacturer of an infant formula test each batch of such formula for such new nutrient in accordance with subparagraph (A), (B), or (C).

"(E) For purposes of this paragraph, the term 'final product stage' means the point in the manufacturing process, before distribution of an infant formula, at which an infant formula is homogenous and is not subject to further degradation.

"(4)(A) The Secretary shall by regulation establish requirements respecting the retention of records. Such requirements shall provide for—

"(i) the retention of all records necessary to demonstrate compliance with the good manufacturing practices and quality control procedures prescribed by the Secretary under paragraph (2), including records containing the results of all testing required under paragraph (2)(B),

"(ii) the retention of all certifications or guarantees of analysis by premix suppliers,

"(iii) the retention by a premix supplier of all records necessary to confirm the accuracy of all premix certifications and guarantees of analysis,

"(iv) the retention of—

"(I) all records pertaining to the microbiological quality and purity of raw materials used in infant formula powder and in finished infant formula, and

"(II) all records pertaining to food packaging materials which show that such materials do not cause an infant formula to be adulterated within the meaning of section 402(a)(2)(C),

"(v) the retention of all records of the results of regularly scheduled audits conducted pursuant to the requirements prescribed by the Secretary under paragraph (2)(B)(iv), and

"(vi) the retention of all complaints and the maintenance of files with respect to, and the review of, complaints concerning infant formulas which may reveal the possible existence of a hazard to health.

"(B)(i) Records required under subparagraph (A) with respect to an infant formula shall be retained for at least one year after the expiration of the shelf life of such infant formula. Except as provided in clause (ii), such records shall be made available to the Secretary for review and duplication upon request of the Secretary.

"(ii) A manufacturer need only provide written assurances to the Secretary that the regularly scheduled audits required by paragraph (2)(B)(iv) are being conducted by the manufacturer, and need not make available to the Secretary the actual written reports of such audits.

"(c)(1) No person shall introduce or deliver for introduction into interstate commerce any new infant formula unless—

"(A) such person has, before introducing such new infant formula, or delivering such new infant formula for introduction, into interstate commerce, registered with the Secretary the name of such person, the place of business of such person, and all establishments at which such person intends to manufacture such new infant formula, and

"(B) such person has at least 90 days before marketing such new infant formula, made the submission to the Secretary required by subsection (c)(1).

"(2) For purposes of paragraph (1), the term 'new infant formula' includes—

"(A) an infant formula manufactured by a person which has not previously manufactured an infant formula, and

"(B) an infant formula manufactured by a person which has previously manufactured infant formula and in which there is a major change, in processing or formulation, from a current or any previous formulation produced by such manufacturer.

For purposes of this paragraph, the term 'major change' has the meaning given to such term in section 106.30(c)(2) of title 21, Code of Federal Regulations (as in effect on August 1, 1986), and guidelines issued thereunder.

"(d)(1) A person shall, with respect to any infant formula subject to subsection (c), make a submission to the Secretary which shall include—

"(A) the quantitative formulation of the infant formula,

"(B) a description of any reformulation of the formula or change in processing of the infant formula,

"(C) assurances that the infant formula will not be marketed unless it meets the requirements of subsections (b)(1) and (i), as demonstrated by the testing required under subsection (b)(3), and

"(D) assurances that the processing of the infant formula complies with subsection (b)(2).

"(2) After the first production of an infant formula subject to subsection (c), and before the introduction into interstate commerce of such formula, the manufacturer of such formula shall submit to the Secretary, in such form as may be prescribed by the Secretary, a written verification which summarizes test results and records demonstrating that such formula complies with the requirements of subsections (b)(1), (b)(2)(A), (b)(2)(B)(i), (b)(2)(B)(iii), (b)(3)(A), (b)(3)(C), and (i).

"(3) If the manufacturer of an infant formula for commercial or charitable distribution for human consumption determines that a change in the formulation of the formula or a change in the processing of the formula may affect whether the formula is adulterated under subsection (a), the manufacturer shall, before the first processing of such formula, make the submission to the Secretary required by paragraph (1).

"(e)(1) If the manufacturer of an infant formula has knowledge which reasonably supports the conclusion that an infant formula which has been processed by the manufacturer and which has left an establishment subject to the control of the manufacturer—

"(A) may not provide the nutrients required by subsection (i), or

"(B) may be otherwise adulterated or misbranded,

the manufacturer shall promptly notify the Secretary of such knowledge. If the Secretary determines that the infant formula presents a risk to human health, the manufacturer shall immediately take all actions necessary to recall shipments of such infant formula from all wholesale and retail establishments, consistent with recall regulations and guidelines issued by the Secretary.

"(2) For purposes of paragraph (1), the term 'knowledge' as applied to a manufacturer means (A) the actual knowledge that the manufacturer had, or (B) the knowledge which a reasonable person would have had under like circumstances or which would have been obtained upon the exercise of due care.

"(f)(1) If a recall of infant formula is begun by a manufacturer, the recall shall be carried out in accordance with such requirements as the Secretary shall prescribe under paragraph (2) and—

"(A) the Secretary shall, not later than the 15th day after the beginning of such recall and at least once every 15 days thereafter until the recall is terminated, review the actions taken under the recall to determine whether the recall meets the requirements prescribed under paragraph (2), and

"(B) the manufacturer shall, not later than the 14th day after the beginning of such recall and at least once every 14 days thereafter until the recall is terminated, report to the Secretary the actions taken to implement the recall.

"(2) The Secretary shall by regulation prescribe the scope and extent of recalls of infant formulas necessary and appropriate for the degree of risks to human health presented by the formula subject to the recall.

"(3) The Secretary shall by regulation require each manufacturer of an infant formula who begins a recall of such formula because of a risk to human health to request each retail establishment at which such formula is sold or available for sale to post at the point of purchase of such formula a notice of such recall at such establishment for such time that the Secretary determines necessary to inform the public of such recall.".

(b)(1) Subsection (i) of such section (as so redesignated) is amended—

(A) by inserting "(1)" after "(i)",

(B) by striking out "subsection (a)" and inserting in lieu thereof "paragraph",

(C) by striking out the colon and inserting in lieu thereof a period, and

(D) by adding at the end the following:

"(2) The Secretary may by regulation—

"(A) revise the list of nutrients in the table in this subsection, and

"(B) revise the required level for any nutrient required by the table.".

(2) Section 301(s) of the Federal Food, Drug, and Cosmetic Act is amended to read as follows:

"(s) The failure to provide the notice required by section 412(c) or 412(d), the failure to make the reports required by section 412(f)(1)(B), the failure to retain the records required by section 412(b)(4), or the failure to meet the requirements prescribed under section 412(f)(3).".

SEC. 4014. STUDY ON ALKYL AND BUTYL NITRITES.

The Secretary of Health and Human Services, through the Commissioner of Food and Drugs, should conduct a study on alkyl and butyl nitrites and report to the appropriate committees of the Congress recommendations concerning whether alkyl and butyl nitrites should be treated as a drug under the Federal Food, Drug, and Cosmetic Act.

SEC. 4015. SENSE OF THE SENATE WITH RESPECT TO POSSESSION OR DISTRIBUTION OF DRUGS UNDER STATE LAW.

It is the sense of the Senate that, if the possession or distribution of a drug is an offense under the Controlled Substances Act, the laws of the States should not be amended or revised to provide that the possession or distribution, respectively, of such drug is not a criminal offense.

SEC. 4016. STUDIES ON HEALTH WARNING LABELS FOR ALCOHOLIC BEVERAGES.

(a) The Senate finds that—

(1) the most abused drug in America is alcohol;

(2) alcohol abuse costs the American economy nearly $120,000,000,000 per year, including increased medical expenses and decreased productivity;

(3) in 1984, 53 percent of the traffic fatalities in the United States, accounting for more than 23,500 deaths, were related to the consumption of alcohol;

(4) over 12,000,000 American adults have one or more symptoms of alcoholism, and this represents an 8.2 percent increase in problem drinking since 1980;

(5) in 1984, almost 3,300,000 individuals between the ages of 14 and 17 experienced serious problems at home, in school, or with the law because of alcohol consumption;

(6) fetal alcohol syndrome is the third leading cause of birth defects, and is the only preventable cause of birth defects among the top three causes;

(7) nearly 5,000 babies per year are born with birth defects related to fetal alcohol syndrome;

(8) the statistics cited in the preceding paragraphs of this subsection indicate that many Americans are not aware of the adverse effects that the abuse of alcoholic beverages may have on health;

(9) it is necessary to undertake a serious national effort to educate the American

people of the serious consequences of alcohol abuse; and

(10) carefully drafted warning labels on the containers of alcoholic beverages concerning serious health consequences resulting from the abuse of alcohol may assist in providing such education.

(b) Therefore, it is the sense of the Senate that—

(1) the Public Health Service should focus attention on the problem of educating the American people on the serious health consequences of alcohol abuse;

(2) the Public Health Service should review available knowledge and conduct studies to assess the most effective means of providing such education, including an assessment of the potential educational impact of health warning labels on the containers of alcoholic beverages; and

(3) the Public Health Service should transmit a report to the Congress within 6 months after the date of enactment of this Act concerning any activities described in paragraph (2) which have been undertaken, and should include in such report any findings respecting the impact and potential benefits of displaying health warnings on the containers of alcoholic beverages and recommendations for specific language for such labels.

SEC. 4017. EFFORTS OF THE ENTERTAINMENT AND WRITTEN MEDIA INDUSTRY.

It is the sense of Congress that—

(1) whereas illegal drug and alcohol consumption and the trafficking in those illegal drugs and alcohol is a major problem in the United States,

(2) whereas the problem of alcohol abuse is particularly prevalent among and harmful to the Nation's young people, and

(3) whereas the values and mores portrayed in various forms of commercially produced entertainment have a profound effect on the attitudes of young people in this country,

the entertainment and written media industry should refrain from producing material meant for general entertainment which in any way glamorizes or encourages the use of illegal drugs and alcohol and the entertainment and written media industry should develop films, television programs, records, videos, and advertising which discourage the use of illegal drugs and alcohol.

SEC. 4018. SENSE OF THE CONGRESS URGING THE CATEGORIZATION OF FILMS WHICH PROMOTE ALCOHOL ABUSE AND DRUG USE.

(a) The Congress finds that—

(1) the abuse of alcohol and the use of drugs has become a societal problem of epidemic proportions,

(2) it is in the interest of all citizens to contribute to the reduction of alcohol abuse and drug use, particularly among youth,

(3) the entertainment industry, particularly the motion picture industry's production of youth-oriented films, often depicts alcohol abuse and drug use in a benign, even glamorous way,

(4) the motion picture industry has a profound impact of societal norms and is a powerful medium which exerts great influence on the values of youth, and

(5) the motion picture industry has recognized the need to inform parents about the contents of movies regarding violence, sex, language, and nudity and therefore currently employs a voluntary rating system.

(b) It is the sense of the Congress that the Motion Picture Association of America should incorporate a new rating in its voluntary movie rating system to clearly identify films which depict alcohol abuse and drug use.

DOLE (AND OTHERS) AMENDMENT NO. 3464

Mr. DOLE (for himself and Mr. BYRD), proposed an amendment to the motion to concur, with an amendment, as modified in the amendment of the House to the amendment of the Senate to the bill H.R. 5484, supra, as follows:

Strike out subtitle U and insert in lieu thereof the following:

SUBTITLE U—MANDATORY LIFE IMPRISONMENT WITHOUT POSSIBILITY OF PAROLE FOR CERTAIN OFFENSES

SEC. 1951. LIFE IMPRISONMENT WITHOUT POSSIBILITY OF PAROLE FOR CERTAIN CONTINUING CRIMINAL ENTERPRISE DRUG OFFENSES.

(a) ELEMENTS OF OFFENSE.—Section 408(a) of the Controlled Substances Act (21 U.S.C. 848(a)) is amended—

(1) by striking out "(a) Any" and inserting "(a)(1) Except as otherwise provided in this section, any" in lieu thereof;

(2) by striking out "; except that if" and inserting ". If" in lieu thereof; and

(3) by adding at the end the following:

"(2) If an individual in the course of a continuing criminal enterprise:

"(A) intentionally killed the victim;

"(B) intentionally inflicted serious bodily injury which resulted in the death of the victim; or

"(C) intentionally engaged in conduct intending that the victim be killed or that lethal force be employed against the victim, which resulted in the death of the victim;

then such individual shall be subject to a sentence of life imprisonment without possibility of parole in accordance with this section.

(b) PROCEDURE APPLICABLE WITH RESPECT TO A SENTENCE OF LIFE IMPRISONMENT.—Section 408 of the Controlled Substances Act is amended by adding at the end the following:

"HEARING REQUIRED WITH RESPECT TO A SENTENCE OF LIFE IMPRISONMENT

"(f) A person shall be subjected to life imprisonment without possibility of parole for any offense under this section only if a hearing is held in accordance with this section.

"NOTICE BY THE GOVERNMENT IN LIFE IMPRISONMENT PENALTY CASES

"(g)(1) Whenever the Government intends to seek a sentence of life imprisonment without possibility of parole for an offense under this section for which one of the sentences provided is life imprisonment without possibility of parole, the attorney for the Government, a reasonable time before trial or acceptance by the court of a plea of guilty, shall sign and file with the court, and serve upon the defendant, a notice—

"(A) that the Government in the event of conviction will seek a sentence of life imprisonment without possibility of parole; and

"(B) setting forth the aggravating factors which the Government will seek to prove as the basis for a sentence of life imprisonment without possibility of parole.

"(2) The court may permit the attorney for the Government to amend this notice for good cause shown.

"HEARING BEFORE COURT OR JURY

"(h)(1) When the attorney for the Government has filed a notice as required under subsection (g) and the defendant is found guilty of or pleads guilty to an offense under subsection (a)(2), the judge who presided at the trial or before whom the guilty plea was entered, or any other judge if the judge who presided at the trial or before whom the guilty plea was entered is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. The hearing shall be conducted—

"(A) before the jury which determined the defendant's guilt;

"(B) before a jury impaneled for the purpose of the hearing if—

"(i) the defendant was convicted upon a plea of guilty;

"(ii) the defendant was convicted after a trial before the court sitting without a jury;

"(iii) the jury which determined the defendant's guilt has been discharged for good cause; or

"(iv) after initial imposition of a sentence under this section, redetermination of the sentence under this section is necessary; or

"(C) before the court alone, upon the motion of the defendant and with the approval of the Government.

"(2) A jury impaneled pursuant to paragraph (1)(B) shall consist of 12 members, unless, at any time before the conclusion of the hearing, the parties stipulate with the approval of the court that it shall consist of any number less than 12.

"PROOF OF AGGRAVATING AND MITIGATING FACTORS

"(i) Nowwithstanding rule 32(c) of the Federal Rules of Criminal Procedure, when a defendant is found guilty of or pleads guilty to an offense under subsection (a)(2), no presentence report shall be prepared. In the sentencing hearing, information may be presented as to any matter relevant to the sentence and shall include matters relating to any of the aggravating or mitigating factors set fort in subsections (l) and (m), or any other mitigating factor. Where information is presented relating to any of the aggravating factors set forth in subsection (m), information may be presented relating to any other aggravating factor. Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to such mitigating or aggravating factors may be presented by either the Government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury. The Government and the defendant shall be permitted to rebut any information received at the hearing and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any of the aggravating or mitigating factors, and as to appropriateness in that case of imposing a sentence of life imprisonment without possibility of parole. The Government shall open the argument. The defendant shall be permitted to reply. The Government shall then be permitted to reply in rebuttal. The burden of establishing the existence of any aggravating factor is on the Government, and is not satisfied unless established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless established by a preponderance of the information.

"RETURN OF FINDINGS

"(j) The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return special findings identifying any mitigating factors, and any aggravating factors set forth in subsection (m), found to exist. If one of the aggravating factors set forth in subsection (m) is found to exist, a special finding identifying any other aggravating factor may be returned. A finding of any aggravating or mitigating factor by a jury shall be made by unanimous vote. If no aggravating factor set forth in subsection (m) if found to exist, the court shall impose a sentence, other than life imprisonment without possibility of parole, authorized by law. If one or more aggravating factors set forth in subsection (m) are found to exist, the jury, or if there is no jury, the court, shall then consider whether the aggravating factors found to exist sufficiently outweigh any mitigating factor or factors found to exist, or in the absence of mitigating factors, whether the aggravating factors are themselves sufficient to justify a sentence of life imprisonment without possibility of parole. Based upon this consideration, the jury by unanimous vote, or if there is no jury, the court, shall return a finding as to whether such sentence is justified.

"IMPOSITION OF SENTENCE

"(k) Upon a finding that a sentence of life imprisonment without possibility of parole is justified, the court shall sentence the defendant to such sentence. Otherwise the court shall impose a sentence, other than life imprisonment without possibility of parole, authorized by law.

"MITIGATING FACTORS

"(1) In determining whether a sentence of life imprisonment without possibility of parole is to be imposed on a defendant, the following mitigating factors shall be considered but are not exclusive:

"(1) The defendant was less than 18 years of age at the time of the crime.

"(2) The defendant's capacity to appreciate the wrongfulness of the defendant's conduct or to conform the defendant's conduct to the requirements of law was significantly impaired, but not so impaired as to constitute a defense to the charge.

"(3) The defendant was under unusual and substantial duress, although not such duress as constitutes a defense to the charge.

"(4) The defendant is punishable as a principal (as defined in section 2(a) of title 18 of the United States Code) in the offense, which was committed by another, but the defendant's participation was relatively minor, although not so minor as to constitute a defense to the charge.

"AGGRAVATING FACTORS

"(m) If the defendant is found guilty of or pleads guilty to an offense under subsection (a)(2), the following aggravating factors shall be considered but are not exclusive:

(1) The defendant has previously been convicted of another Federal offense or a State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute.

"(2) The defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, serious bodily injury upon another person.

"(3) The defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the distribution of a controlled substance.

"(4) In the commission of the offense or in escaping apprehension for a violation of subsection (a)(1), the defendant knowingly created a grave risk of death to one or more persons in addition to the victim of the offense.

"(5) The violation of this chapter in relation to which the conduct described in subsection (a)(2) occurred was a violation of section 405.

"(6) The defendant committed the offense in an especially heinous, cruel, or depraved manner.

"(7) The defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value.

"(8) The defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value.

"(9) The defendant committed the offense against a judge, a law-enforcement officer, or an employee of a penal or correctional institution, while that victim was performing official duties or because of that victim's status as a public servant of the United States, or a State or political subdivision of the United States. For purposes of this paragraph the term 'law-enforcement officer' means a public servant authorized by law to conduct or engage in the prevention, investigation, or prosecution of an offense.

"INSTRUCTION TO JURY ON RIGHT OF THE DEFENDANT TO JUSTICE WITHOUT DISCRIMINATION

"(n) In any hearing held before a jury under this section, the court shall instruct the jury that in its consideration of whether a sentence of life imprisonment without possibility of parole is justified it shall not consider the race, color, national origin, creed, or sex of the defendant, the victim—the jury shall return to the court a certificate signed by each juror that consideration of race, color, national origin, creed, or sex of the defendant or the victim was not involved in reaching his or her individual decision.

"SENTENCING IN CASES IN WHICH A SENTENCE OF LIFE IMPRISONMENT IS NOT SOUGHT OR IMPOSED

"(o) If a person is convicted for an offense under subsection (a)(2) and the court does not impose a sentence of life imprisonment without possibility of parole, the court may impose a sentence of life imprisonment or any other sentence authorized by law.

"APPEAL

"(p)(1) In any case in which the sentence of life imprisonment without possibility of parole is imposed under this section, such sentence shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal must be filed within the time prescribed for appeal of judgment in section 2107 of title 28 of the United States Code. An appeal under this section may be consolidated with an appeal of the judgment of conviction. Such review shall have priority over all other cases.

"(2) On review of the sentence, the court of appeals shall consider the record, the evidence submitted during the trial, the information submitted during the sentencing hearing, the procedures employed in the sentencing hearing, and the special findings returned under this section.

"(3) The court shall affirm the sentence if it determines that—

"(A) the sentence of life imprisonment without possibility of parole was not imposed under the influence of passion, prejudice, error of law, abuse of discretion, or any other arbitrary factor; and

"(B) the information supports the special finding of the existence of every aggravating factor upon which the sentence was based, together with the failure to find sufficient mitigating factors as set forth or allowed in this section.

In all other cases the court shall remand the case for reconsideration under this section. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence.".

DOLE AMENDMENT NO. 3465

Mr. DOLE proposed an amendment to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill (H.R. 5484), supra, as follows:

On page 542 of the amendment strike lines 21–24.

Strike page 543.

Strike page 544.

Strike page 545.

DOLE AMENDMENT NO. 3466

Mr. DOLE proposed an amendment to the motion to concur, with an amendment, as modified, in the amendment of the House to the amendment of the Senate to the bill (H.R. 5484), supra, as follows:

Section 1552(c)(1)(C) of the amendment is amended by striking the proposed paragraph (6) and inserting in lieu thereof the following:

"(6) There are authorized to be appropriated $230,000,000 for fiscal year 1987, $230,000,000 for fiscal year 1988, and $230,000,000 for fiscal year 1989, to carry out the programs under part M of this title."

Strike out subsection (d) of section 3053 of the amendment as modified.

Section 3401(c)(2) of the amendment is amended in the quoted matter by striking "such aircraft" and inserting "such aircraft".

After the heading for subtitle H of title III, insert the following:

SEC. 3421. ADDITIONAL FUNDS FOR THE DEPARTMENT OF JUSTICE.

There are authorized to be appropriated to the Department of Justice for fiscal year 1987, in addition to any other amounts authorized to be appropriated to the Department for such fiscal year, $7,000,000 for helicopters with forward looking infrared radiation detection devices for drug interdiction operations in Hawaii.

SUBTITLE I—FEDERAL COMMUNICATIONS COMMISSION

Section 3451 of the amendment is amended—

(1) in the first sentence by striking "shall revoke any license" and inserting "may revoke any private operator's license"; and

(2) in the second sentence by striking "shall" and inserting "may".

After section 3451, add the following:

TITLE IV—DEMAND REDUCTION

Section 12003(4) of the amendment is amended by striking "self-proposed" and inserting "self-propelled".

Section 12006(2) of the amendment is amended by striking "section 12005" and inserting "section 12004".

Section 12007 of the amendment is amended—

(1) in subsection (a)(1) by striking "section 6 of this Act" and inserting "section 12006 of this title";

(2) by striking paragraph (8) of subsection (a);

(3) in subsection (b)(1) by striking "Act" and inserting "title"; and

(4) in subsection (b)(5)(D) by striking "section 1 of this Act" and inserting "section 12006 of this title".

Section 12014 of the amendment is amended by inserting "and" after the semicolon in clause (2).

Strike out title 13 of the amendment.

In the table of contents of the amendment, strike the items for title 9 and title 13.

Strike out section 2016 of the amendment.

On page 41, beginning with line 14, strike all through line 13 on page 45 and insert in lieu thereof the following:

SEC. 1152. ASSET FORFEITURE FUNDS.

(a) DEPARTMENT OF JUSTICE ASSETS FORFEITURE FUND.—Subsection (c) of section 524 of title 28, United States Code, is amended—

(2) by inserting at the end of subparagraph (A) of paragraph (1) the following: "such payments may also include those, made pursuant to regulations promulgated by the Attorney General, that are necessary and direct program-related expenses for the purchase or lease of automatic data processing equipment (not less than 90 percent of which use will be program related), training, printing, contracting for services directly related to the processing of and accounting for forfeitures, and the storage, protection, and destruction of controlled substances;";

(3) by inserting after subparagraph (A) of paragraph (1) the following new subparagraph and renumbering the subsequent subparagraphs appropriately;

"(B) the payment of awards for information or assistance directly relating to violations of the criminal drug laws of the United States;";

(4) by amending newly designated subparagraph (F) of paragraph (1) to read as follows:

"(F) for equipping for drug law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the Drug Enforcement Administration, the Federal Bureau of Investigation, the Immigration and Naturalization Service, or the United States Marshals Service; and";

(5) by striking out in paragraph (4) "remaining after payment of expenses for forfeiture and sale authorized by law" and inserting in lieu thereof ", except all proceeds of forfeitures available for use by the Secretary of the Treasury or the Secretary of the Interior pursuant to section 11(d) of the Endangered Species Act (16 U.S.C. 1540(d)) or section 6(d) of the Lacey Act Amendments of 1981 (16 U.S.C. 3375(d))";

(6) by striking out paragraph (8) and renumbering paragraph (9) as paragraph (8); and

(7) by adding at the end of the subsection the following new paragraph:

"(9)(A) If any funds deposited in the Department of Justice Assets Forfeiture Fund or the Customs Forfeiture Fund (19 U.S.C. 1613a, 1613b) are not expended or obligated prior to thirty days after the end of the fiscal year, 90 percent of such funds (not to exceed amounts specified in appropriation Acts) shall be transferred into a Special Forfeiture Fund.

"(B) The funds in the Special Forfeiture Fund shall be disbursed (in amounts not to exceed amounts specified in appropriation Acts), during the fiscal year in which they are transferred into the Special Fund, by the Attorney General, after consultation with the Secretary of the Treasury, the Secretary of Health and Human Services, and the Secretary of Education, to enhance the following efforts:

"(i) Federal drug law enforcement agencies and programs;

"(ii) Federal drug abuse agencies and programs relating to drug abuse education, prevention, treatment, rehabilitation, and research;

"(iii) State, local, and nonprofit agencies with drug abuse responsibilities; and

"(iv) State and local law enforcement agencies for drug law enforcement efforts, under subtitle M of title I of the Omnibus Crime Control and Safe Streets Act of 1986 (42 U.S.C. 3721 et seq.).

"(C) Funds disbursed from the Special Forfeiture Fund shall not be used to supplant existing funds, but shall be used to supplement funds that are otherwise available.

"(D) The Attorney General shall report annually to the Congress on all disbursements made under the authority of subparagraph (B).".

(b) CUSTOMS FORFEITURE FUND.—

(1) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613a) as added by Public Law 98-473, is amended—

(B) by amending paragraph (3) of subsection (a) to read as follows:

"(3) for equipping for law enforcement functions any government-owned or leased vessels, vehicles, and aircraft available for official use by the United States Customs Service; and"; and

(C) by striking out subsection (h).

(2) Section 613a of the Tariff Act of 1930 (19 U.S.C. 1613b) as added by Public Law 98-573, is repealed.

In section 1152(a)(7) of the amendment, in the newly created section 524(c)(9)(B) of Title 28 United States Code, strike out ", during the fiscal year in which they are transferred into the Special Fund,"

Strike out section 4112(a)(2) and insert in lieu thereof the following:

(2) Of the amounts appropriated or otherwise made available to carry out this subtitle for any fiscal year, $5,000,000 shall be available to the Secretary of Health and Human Services for such fiscal year to carry out section 4134 of this Act and sections 508 and 509 of the Public Health Service Act.

Strike out subtitle a of title IV and insert in lieu thereof the following:

SUBTITLE A—TREATMENT AND REHABILITATION

SEC. 4001. SHORT TITLE; REFERENCE.

(a) This subtitle may be cited as the "Alcohol and Drug Abuse Amendments of 1986".

(b) Except as otherwise specifically provided, whenever in this subtitle an amendment or repeal is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Public Health Service Act.

SEC. 4002. SPECIAL ALLOTMENTS FOR ALCOHOL ABUSE AND DRUG ABUSE TREATMENT AND REHABILITATION PROGRAMS.

Title XIX is amended by inserting after section 1920A the following new sections:

"SPECIAL ALLOTMENTS TO STATES FOR ALCOHOL ABUSE AND DRUG ABUSE TREATMENT AND REHABILITATION PROGRAMS

"SEC. 1921. (a) To carry out this section and sections 1922, 1923, 508, and 510 there are authorized to be appropriated $241,000,000 for fiscal year 1987. Of the total amount appropriated under the preceding sentence for fiscal year 1987, 7 percent shall be added to and included with the amounts otherwise available under this part for allotments to States under section 1913 for such fiscal year, 72 percent shall be available for allotments to States under this section for such fiscal year, 5 percent shall be available for transfer to the Administrator of Veterans' Affairs under section 1922 for such fiscal year, 1 percent shall be available to carry out section 1923 for such fiscal year, and 15 percent shall be available to carry out sections 508 and 510 for such fiscal year.

"(b)(1) The allotment of a State under this section for a fiscal year shall be the sum of the amounts allotted to such State under paragraphs (2) and (3).

"(2) Forty-five percent of the amount available for allotment under this section for a fiscal year shall be allotted in accordance with this subsection. The allotment of a State under this subsection for a fiscal year shall be an amount which bears the same ratio to the total amount required pursuant to the proceding sentence to be allotted under this subsection for such fiscal year as the population of such State bears to the population of all States.

"(3) Fifty-five percent of the amount available for allotment under this section for a fiscal year shall be allotted by the Secretary to States on the basis of the need of each State for amounts for programs and activities for the treatment and rehabilitation of the alcohol abuse and drug abuse. In determining such need for each State under this subsection, the Secretary shall consider—

"(A) the nature and extent, in the State and in particular areas of the State, of the demand for effective programs and activities for the treatment and rehabilitation of alcohol abuse and drug abuse;

"(B) the number of individuals in the State who abuse alcohol or drugs and the capacity of the State to provide treatment and rehabilitation for such individuals (as determined by the Secretary on the basis of the number of individuals who requested treatment for alcohol abuse and drug in the State during the most recent calendar year ending prior to the date on which a statement is submitted by the State under subsection (d); and

"(C) the ability of the State to provide additional services for the treatment and rehabilitation of alcohol abuse and drug abuse.

"(4) The Secretary shall make allotments to States under paragraph (1) for fiscal year 1987, and shall make payments to States under subsection (c) from such allotments, at the same time that the Secretary makes allotments and payments under sections 1913 and 1914, respectively, for such fiscal year. The Secretary shall make allotments to States under paragraph (2) for fiscal year 1987, and shall make payments to States under subsection (c) from such allotments, within four months after the date of enact-

ment of the Alcohol and Drug Abuse Amendments of 1986.

"(c)(1) For each fiscal year, the Secretary shall make payments, as provided by section 6503 of title 31, United States Code, to each State from its allotment under paragraphs (2) and (3) of subsection (b) from amounts which are appropriated for that fiscal year and available for such allotments.

"(2) Any amount paid to a State under paragraph (1) for a fiscal year and remaining unobligated at the end of such fiscal year shall remain available to such State for the purposes for which it was made for the next fiscal year.

"(d) In order to receive an allotment for a fiscal year under subsection (b), each State shall include with the application submitted to the Secretary under section 1916 a separate statement requesting an allotment under this section. Each such statement shall contain—

"(1) such information as the Secretary may prescribe, including information necessary for the Secretary to consider the matters specified in subparagraphs (A) through (D) of subsection (b)(3);

"(2) a description of the manner in which programs and activities conducted with payments under subsection (c) will be coordinated with other public and private programs and activities directed toward individuals who abuse alcohol and drugs;

"(3) assurance that, in the preparation of any statement under this section, the State will consult with local governments and public and private entities, including community based organizations, involved in the provision of services for the treatment and rehabilitation of alcohol abuse and drug abuse;
